This would be especially unfortunate in light of the fact that even with the supplemental, the number of full-time slots provided last summer were some 145,173 less than the cities had indicated could be effectively used. I ask unanimous consent that the RECORD include a letter dated May 7, 1970, from the U.S. Conference of Mayors documenting that need.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., May 7, 1970.

Hon. JACOB K. JAVITS,
Old Senate Office Building,
Washington, D.C.

DEAR SENATOR JAVITS: In response to your request for information, we have made inquiries as to the cities' 1970 needs for the summer Neighborhood Youth Corps slots beyond those allocated to them to date. The information we have received from the fifty largest cities shows that the total number of additional slots that these cities could effectively utilize this summer is 165,298.

On the basis of our contacts with a sample of the smaller cities, we estimate their need and capacity to utilize additional slots to be approximately 30 percent above their present allocation. This would mean an additional 61,875 slots needed by the smaller cities.

Combining these figures, the present real need for summer 1970 is 227,173 additional slots nation-wide.

I trust that these statistics will be helpful to you in pointing up the critical need for an enlarged appropriation for the summer Neighborhood Youth Corps program.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

1970 SUMMER NEIGHBORHOOD YOUTH CORPS PROGRAM—THE NEEDS OF THE 50 LARGEST CITIES

City	1969 total need	1970 allocation	Total city needs 1970	Additional required

Mr. JAVITS. Mr. President, while need figures are not now available for next summer, we can expect them to approach last summer.

Mr. President, during the first quarter of this year, while the national level of unemployment ranged between 4.4 and 4.9 percent—the unemployment rate among black teenagers in the poverty neighborhoods was 32.7 percent—almost one-third—compared with 20.9 percent in the first quarter of 1969.

We can expect these conditions of unemployment to continue into the next year as a result of the efforts of the administration to cool down the economy, and even if the national unemployment rate should decline, the rate in poverty areas can be expected to remain at the high levels which I have indicated.

I urge the Congress, therefore, not only to recognize the great need for man-

power funds to deal with these conditions generally, but to take action now in anticipation of what will be obvious special needs as the summer approaches.

If the recommendation which I have made for an increase of poverty funds is accepted, then the Director of the Office of Economic Opportunity would be in a position to allocate greater funds to the Neighborhood Youth Corp support program in the course of regular planning—rather than waiting, as is usually the case, until the middle of the summer.

However, should the Senate committee decide not to allow additional funds under the poverty program, then I would consider proposing an amendment to increase the $744,494,000 set forth on page 2 of H.R. 18515, the appropriations bill for manpower development and training activities to $780,894,000 so as to provide the additional $36,400,000 necessary to bring the funding level for next summer up to the level for this summer.

I conclude as follows: There are a number of ways in which we can measure our efforts to combat poverty. In the foregoing comments and in materials which I have submitted on particular programs, I have measured proposed efforts in terms of the portion of the target groups to be served, previous levels of funding and information as to the number of applications that have gone unfunded in recent years.

We can also measure these efforts and the sufficiency of funds in terms of the extent to which the funds requested will permit the Office of Economic Opportunity to fund new projects and efforts proposed by those closest to the problems on the local level. In that connection, I ask unanimous consent that there be included in the RECORD at this point, a table prepared by the Office of Economic Opportunity entitled "Fiscal Year 1971 Schedule of Annualization and New Starts," which indicates that of the $2,080,200,000 requested for fiscal year 1971, only $167,100,000 would go for new efforts.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FISCAL YEAR 1971 SCHEDULE OF ANNUALIZATION AND NEW STARTS

	Fiscal year 1971 total plan	Annualization	New starts
Total EOA	$2,080.2	$1,913.1	$167.1

Mr. JAVITS. Mr. President, under the amendment, we have proposed a $149,300,000 increase in expenditures for our poverty programs for this fiscal year over last. In terms of priorities, this will but place our efforts to fight poverty on a par or even with the new commitments made this year to other struggles. For fiscal year 1971, Federal budget requests for water pollution control are $200 million greater than for last year; requests for crime control have increased by $300 million, and requests for airways, airports, and supersonic transport have increased by $400 million.

Mr. President, as I indicated earlier, the administration deserves credit for seeking an expanded appropriation for these programs—and the Office of Economic Opportunity deserves the greatest praise for including in its budget request essential "target group" information upon which we can assess the inroads being made on the problems of poverty.

However, I think that it is necessary that the Congress—which also participates in the matter of budget priorities—add to that amount the essential funds that I have proposed.

Mr. President, I ask unanimous consent that there be also placed in the RECORD certain tables set forth in an excellent publication by Dr. Sar Levitan, entitled "Progress in Aid of the Poor for the 1970's," which indicate the various characteristics of the poor and total expenditures on behalf of the poor, and a chart indicating the sums available for each program during fiscal year 1970, the amount earmarked for fiscal year 1971, and the amount requested by the administration for that year.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—SELECTED CHARACTERISTICS OF THE POOR, 1966

Characteristic	Percent of poor	Poor as percent of total in group
Total	100.0	14.7
Age group:		
Under 18	43.5	18.5
18 to 64	38.5	10.9
65 and over	18.0	29.9
Race:		
White	68.3	12.0

[1] Based on Justification of Appropriations, May 1970, Office of Economic Opportunity. [2] Not available from OEO.

The PRESIDING OFFICER (Mr. HUGHES). The amendment will be received, appropriately referred and printed.

The amendment (No. 858) was referred to the Committee on Appropriations, and ordered to be printed.

ADDITIONAL COSPONSORS OF AMENDMENTS

AMENDMENT NO. 754 TO H.R. 17123

Mr. PROXMIRE. Mr. President, I ask unanimous consent that, at the next printing, the names of the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. YOUNG), the Senator from Idaho (Mr. CHURCH), the Senator from Texas (Mr. YARBOROUGH), and the Senator from South Dakota (Mr. MCGOVERN) be added as cosponsors of amendment 754 to the military authorizations bill, an amendment to restrict the use of funds for the purpose of sending draftees to South Vietnam, Cambodia, or Laos, unless funds are specifically authorized to be expended for such purpose by law hereafter enacted.

The PRESIDING OFFICER (Mr. BOGGS). Without objection, it is so ordered.

AMENDMENTS NOS. 798 AND 799 TO H.R. 17123

Mr. HATFIELD. Mr. President, on behalf of the Senator from Massachusetts (Mr. BROOKE), I ask unanimous consent that the names of the Senator from Alaska (Mr. GRAVEL), the Senator from Wisconsin (Mr. PROXMIRE), and the Senator from Ohio (Mr. YOUNG) be added as cosponsors of amendments Nos. 798 and 799, to H.R. 17123, the military procurement authorization bill.

The PRESIDING OFFICER (Mr. BOGGS). Without objection, it is so ordered.

AMENDMENT NO. 838 TO H.R. 17123

Mr. HATFIELD. Mr. President, on behalf of the Senator from New York (Mr. GOODELL), I ask unanimous consent that the names of the Senator from Alaska (Mr. GRAVEL), the Senator from Montana (Mr. METCALF), and the Senator from Kentucky (Mr. COOK) be added as cosponsors of amendment No. 838, to H.R. 17123, the military procurement authorization bill.

The PRESIDING OFFICER (Mr. BOGGS). Without objection, it is so ordered.

AMENDMENT NO. 844 TO H.R. 17123

Mr. HATFIELD. Mr. President, I ask unanimous consent that at the next printing, the name of the Senator from Hawaii (Mr. INOUYE) be added as a cosponsor of amendment No. 844 to H.R. 17123, the military procurement authorization bill.

The PRESIDING OFFICER (Mr. BOGGS). Without objection, it is so ordered.

ADDITIONAL STATEMENTS OF SENATORS

SELECTED REMAINING "MAJOR" LEGISLATION

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD a compilation of selected remaining "major" legislation in the Senate as of August 20, 1970.

There being no objection, the compilation was ordered to be printed in the RECORD, as follows:

SELECTED REMAINING "MAJOR" LEGISLATION (SENATE), 91ST CONGRESS AS OF AUGUST 20, 1970 [1]

AGRICULTURE

Omnibus farm bill (Agricultural Act of 1970, H.R. 18546). Administration requested [2] "set aside" land retirement plan to control production, and price supports geared to world market prices, rather than parity. House-passed bill tied payments for feed grains and cotton to fixed figure for part, rather than all, of the permitted production. Wheat payments based on parity but would not be difference between parity and the support loan, as under present law, but difference between the objective price and the average price for the first five months of the marketing year. There would be no marketing quotas, and acreage limitations and set aside acreage could be required. This bill includes the PL 480 extension and revision (foreign aid and special export programs).

Markup underway.

Food stamps (S. 2547, H.R. 18582). Administration requested $1.25 billion for FY 1971, free stamps to families with monthly incomes under $30 and requirement that all states adopt a participating plan for all communities or face loss of program. House committee reported bill with open-ended authorization in FY 1971–73, minimum .50c payment and to compel able-bodied men to work to qualify.

Senate has passed bill authorizing $2 billion for FY 1971, $2.5 billion for FY 1972 and free stamps for families of four with less than $60 a month income.

CIVIL RIGHTS

Equal employment (S. 2453). Administration requested EEOC authority to initiate law suits against employers guilty of discrimination.

Committee reported bill authorizing EEOC to issue cease-and-desist orders against recalcitrant employers.

Equal rights (H.J. Res. 264). On calendar. Judiciary Committee hearings planned.

CRIME

Preventive detention (S. 546, 2600). Administration requested authority for Federal judges to detain "dangerous" defendants for 60 days before trial.

Bail reform (generally) subcommittee hearings recessed; preventive detention hearings underway.

Law enforcement (S. 3541 et al). Administration requested $480 million for Law Enforcement Assistance Administration (LEAA) for FY 1971. House passed bill authorizes $3 billion for FY 1971–73.

Subcommittee hearings underway.

Obscenity (S. 2073, 2074). Administration requested legislation to make it a Federal crime to use mails to send obscene material to minors, obscene advertisements to persons, and to enable a person to bar obscene mail from his address.

Subcommittee reported.

CONGRESS AND ITS OPERATIONS

Congressional reorganization (S. 844). On calendar. (H.R. 17654 requires two-thirds vote for nongermane amendments added by Senate to House passed bills).

Financial disclosure (S. 1993). Bill in committee to require disclosures by all Government employees earning over $18,000 a year, and candidates for Senate or House.

CONSUMERS

Class action suits (S. 3201). Administration requested law allowing private citizens to bring suits following successful Justice Department action.

Commerce Committee reported bill allowing suits without Justice Department action, and referred to Judiciary Committee with instructions to report by September 14.

Consumer agency (S. 3240). Administration requested Office of Consumer Affairs in Executive Office of President, and Consumer Protection Division in Justice Department.

Subcommittee reported bill to create independent consumer agency and consumer fraud division in Justice Department.

Flammable Fabrics Act authorization (S. 3765). On calendar.

DEFENSE

Authorization (H.R. 17123, 17604). Administration requested $20 billion for Military Procurement and R&D, and $2 billion for Military Construction.

H.R. 17123 is Pending business.

Appropriations (H.R. 17970). House passed bill appropriating $2 billion.

[1] Sources: Legislative Status Reports, Legislative Status Checklists, Joint Committee on Reduction of Federal Expenditures 1971 Budget Scorekeeping Report, Staff Report No. 9, Congressional Quarterly, and House and Senate Calendars.

[2] Includes budget, special messages and draft bills. Bills in process do not necessarily correspond to bills proposed by Administration.

Committee hearings underway.

Draft (H.R. 17314). Administration asked abolition of undergraduate college deferments and 20% raise for enlisted men.

Proposed amendment for volunteer army on pending business.

DISTRICT OF COLUMBIA

Congressional representation (H.R. 18725). Bill on calendar to provide non-voting delegate for House. S.J. Res. 52 and 56, to provide full congressional representation, in executive session.

ECONOMIC POLICY

Guideposts (H.R. 14460). No Administration request. President announced "inflation alert" reports. Bill pending in House Government Operations Committee to require Council of Economic Advisors to prepare wage and price guideposts similar to those in the Kennedy and Johnson administrations, to report these guideposts to the Joint Economic Committee, and to require the President to review wage and price behavior inconsistent with the guideposts, making recommendations thereafter.

Revenue. Administration requested added 1 year postponement of automobile and telephone excise tax reductions, speed up in collecting excise and gift taxes, and tax on gasoline lead.[3]

One-bank holding companies (H.R. 6778) (not administration bill). Administration requested legislation to regulate one-bank holding companies.

On calendar.

Foreign bank secrecy (S. 3678, H.R. 15073). No Administration request.

Subcommittee hearings underway on H.R. 15073 (Federal Deposit Insurance Act Amendments).

Securities dealer insurance (S. 2348). No Administration request but SEC supported bills in testimony.

Hearings completed on bill to protest customers from mismanagement and insolvency of securities brokers and dealers by establishing Federal Broker-Dealer Insurance Corporation, similar to FDIC.

Small business (S. 3699). Administration requested expansion of SBA loan guarantee authority, SBA authority to guarantee surety bonds, interest subsidy grants, tax incentives for lenders, and tax advantages to minority enterprises.

Subcommittee executive sessions including S. 1750, to assist development of waste disposal and pollution control.

Conglomerates (S. 1494). No Administration request.

Subcommittee hearings concluded.

Franchising (S. 3844). No Administration request.

In committee.

EDUCATION

Higher education (S. 3636). Administration requested national student loan program, $100 million for community colleges and $200 million grant program to be administered by proposed National Foundation for Higher Education.

Hearings underway. Existing programs expire mid-1971.

Impact aid (S. 3581, 3593). Administration requested reduction of payments from existing 50% per pupil to 40% if families reside in jurisdiction, and 20% if they reside in another jurisdiction.

Subcommittee hearings adjourned.

Emergency school aid (S. 3883). Administration requested $500 million for FY 1971 and $1 billion for FY 1972 for desegregating local districts.

Subcommittee hearings underway. (Problems over allocation formula, which some say favors the South, and over the use of funds for busing students).

[3] Total estimated receipts $3.6 billion.

ENVIRONMENT

Environmental Financing Act of 1970 (S. 3468). Administration requested creation of Environmental Financing Authority to buy State and local bonds for constructing waste treatment facilities.

Subcommittee hearings underway.

Water pollution (S. 3470). Administration requested funds for R&D, facilities, enforcement and financing.

Subcommittee hearings underway.

Air pollution (S. 3466, 3229, 3546). Administration requested extension of Clean Air Act for 3 years, authority to set nationwide standards for air quality, emission and transportation fuels and additives, and for testing emission controls on new cars.

Executive Session.

Disaster relief (S. 3619). Administration requested reorganization of Federal disaster relief operations, including loans to local governments for property tax losses.

Ordered reported.

FOREIGN AFFAIRS

Foreign assistance appropriations (H.R. 17867). Administration requested $2.976 billion, including foreign economic and military assistance and foreign military credit sales, Peace Corps, and international development banks.[4]

In committee.

Trade bill (H.R. 14870). Administration requested extension of Presidential tariff-cutting authority, eliminating American Selling Price (ASP) for figuring duties on chemical imports, liberalizing escape-clause and adjustment-assistance, and strengthening Presidential authority to retaliate against unfair trade practices by other nations.

House reported bill approving textile and shoe quotas, restricting other imports, and retaining oil import quota and ASP.

HEALTH

Regional program (S. 3443, 3586, 3355). Administration requested one year extension of 3 programs—regional medical, comprehensive health services and health services development.

S.3586 in conference; S. 3355 on calendar.

HOUSING

Housing and Urban Development Act of 1970 (S. 3639). Administration requested streamlining of FHA programs, to reduce them from 50 to 8, replace 40 existing HUD programs with 4, and establish uniform criteria for low-income housing.

Subcommittee Executive Sessions. (H.R. 17795, Emergency Communities Facilities Act, scheduled for House action week of September 9).

Housing and Urban Development Act (H.R. 17845). Covers FHA Mortgage Credit programs, Urban Renewal and Housing Assistance programs, and Model Cities and Metropolitan Development programs.

Subcommittee reported clean bill.

Urban Growth and New Community Development Act of 1970 (S. 3640). Provides for developing national urbanization policy and encourage more rational and economic growth through developing new communities and inter-cities.

Executive Session.

LABOR

Manpower programs (S. 3867). Administration requested consolidation of manpower programs, and State administration of Federally-funded job training programs.

On calendar.

Occupational safety (S. 2788, 2193). Administration requested establishment of National Occupational Safety and Health Board to set standards to protect workers.

Markup and executive session.

[4] Foreign Economic Assistance authorized through FY 71.

Private pension plans. (S. 3589). Administration requested legislation for stronger protection of rights of workers under private pension and welfare plans.

In committee. (Joint Economic Subcommittee on Fiscal Policy held hearings on pension plans investments last Spring).

SOCIAL WELFARE

Social security (S. 2973). Administration requested 10% benefits increase, future automatic increases, and reforms in Medicare and Medicaid programs. Congress in 1969 increased benefits 15%, and Administration requested no further increase.

Hearings underway.

Welfare (H.R. 16311). Administration proposed Family Assistance Program (FAP) for minimum $1600 a year (family of four with no income), and reduced benefits for working poor.

Hearings underway.

TRANSPORTATION

SST (H.R. 17755) (DOT Appropriations). Administration requested $290 million to construct and flight test 2 SST prototypes.

Hearings underway.

Highway programs (Including Federal Aid Highway, Highway Trust Fund, and Public Lands Highway) (S. 4055). Administration requested extension of completion date for Interstate system and funding all highway programs from highway trust fund. (Estimated completion cost $70 billion).

Hearings and executives.

Rail Passenger Service Act of 1970 (H.R. 18125, S. 4011, 4014, 4016). To improve rail passenger service.

Hearings underway.

Maritime program (S. 3287). To strengthen Federal merchant marine.

On calendar.

WILDLIFE PRESERVATION

Wholesome Fish and Fishery Products Act (S. 2712). Provides safeguards on quality and wholesomeness of fish and fishery products.

Subcommittee hearings concluded.

GENERAL GOVERNMENT

Federal Economy Act of 1970 (S. 3593). To reduce, terminate or restructure Federal programs needing basic reform (Administration bill). Before, various committees depending on jurisdiction.

Intergovernmental Cooperation Act (S. 2479, 2035). To improve financial management of Federal assistance programs.

Executive Session.

OTHER ISSUES

Broadcast campaign spending (S. 3637). Senate passed bill limiting T.V. and radio spending by Presidential and Congressional candidates, and revoking "equal time" provision for Presidential elections.

Conference report in House.

Electoral college reform (S.J. Res. 1). Administration supports proposed Constitutional Amendment to abolish Electoral College and provide for direct election of President and Vice President.

On calendar.

Genocide treaty. Administration has asked Senate ratification of 1948 UN convention.

Subcommittee hearings held and action postponed until Administration sends up proposed legislation making Genocide a crime.

Southeast Asia. Various bills, resolutions, and amendments to limit US military involvement in Southeast Asia, and set legislative timetable for withdrawal from Vietnam.

APPROPRIATIONS

Treasury, Post Office, Executive Offices (H.R. 16900). Administration request $3.045 billion.

State, Justice, Commerce, Judiciary, related agencies (H.R. 17575). Administration request $3.251 billion. Committee reported $3.1 billion.

On calendar.

Transportation Department, related agencies (H.R. 17755). Administration request $2.490 billion.

Foreign assistance, related programs (H.R. 17867). Administration request $2.976 billion. (See p. 6, above).

Agriculture, related agencies (H.R. 17923). Administration request $7.748 billion, Senate action $8.475 billion. In conference.

Military construction (H.R. 17970). Administration request $2.134 billion.

Public Works, Atomic energy (H.R. 18127). Administration request $5.263 billion. Committee reported $5.258 billion. On calendar.

Labor, HEW, OEO (H.R. 18515). Administration requested $18.731 billion.

Defense. Administration request $69 billion.

PRESIDENT NIXON AND PRESIDENT DIAZ ORDAZ CONCLUDE PRODUCTIVE MEETING

Mr. FANNIN. Mr. President, President Nixon and Attorney General Mitchell have just concluded an important visit to our good neighbor to the south. During an extremely productive 2 days of meetings, the Presidents of the United States and Mexico made significant progress in settling major problems and in fostering international cooperation.

They completed an agreement to end a century-old boundary dispute.

They apparently made progress toward a new agreement on the share and quality of Colorado River water going to Mexico.

Perhaps most important of all, the two Presidents pledged cooperation in trying to stem the international traffic in marihuana and narcotics.

It is refreshing to see that while neighboring countries bristle at each other in much of the world, we are able to continue a fruitful partnership with our neighbors both to the north and the south.

As is often the case even with good neighbors, we have had our occasional problems. Presidents Nixon and Diaz Ordaz have gone a long ways toward solving the most important of these disputes.

Operation Intercept along the United States-Mexico border last year caused unfortunate inconvenience to tourists and disruption of legitimate business on both sides of the boundary. But it also brought home the deep concern in the United States over the narcotics problem. Operation Intercept very fortunately evolved quickly into Operation Cooperation. Mexican officials now fully realize that illegal narcotics traffic jeopardizes legitimate border trade.

Just last month, the United States gave Mexico five helicopters and three airplanes to be used in the search for marihuana and opium poppy crops. Such aid should help Mexican officials carry through effectively on pledges to crack down on illegal growing operations.

Marihuana and narcotics smuggled into the United States from Mexico are of concern to the entire Nation, but the impact can be felt the most in the bordering States. In the past, Mexico because of its geographical location has been an all too convenient source of illegal drugs and marihuana which is smuggled into the Southwest.

Therefore, I feel that we who live in Arizona and other States bordering Mexico should be especially thankful that the President and the Attorney General went to Mexico to discuss these matters personally and arrived at such a satisfactory understanding with the President of Mexico.

PROHIBITION OF THE USE OF HERBICIDES IN VIETNAM

Mr. McINTYRE. Mr. President, within a day or two, we will begin debate on the Nelson-Goodell amendment, which prohibits our use of herbicides in Vietnam.

Our use of herbicides in that beleaguered country was carefully reviewed by the Armed Services Committee in the course of its deliberations on the military procurement bill. The committee concluded that an end to our use of herbicides would be ill advised. It reasoned that the evidence regarding the ecological and physiological side effects of our herbicide program was inconclusive, while the primary contribution of the program was indisputable: it has saved the lives of Americans in Vietnam. The committee believed that until more conclusive evidence as to the side effects materialized, the safety of our troops had to be made an overriding consideration.

I shall speak in far greater depth about the committee's position when the Nelson-Goodell amendment is called up. At present, I should like to place in the RECORD, as background to the debate some of the questions regarding the herbicide program addressed by the committee to the Department of Defense, together with the Department's unclassified answers to those questions.

Mr. President, an answer to the issue posed by the Nelson-Goodell amendment requires a careful weighing of conflicting considerations. I sincerely hope that this information will be of use to Senators as they grapple with that issue.

I ask unanimous consent that the material to which I have referred be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

QUESTIONS AND ANSWERS ON DEFOLIATION

Question. In a letter to Dr. Richard Novick, on 3 February 1970, Dr. Foster stated that "the President's policy prohibiting the use of *biological* weapons includes agents directed against crops and animals as well as anti-personnel agents. Any stockpiles of such agents will be destroyed."

Is this a correct statement of the present policy? If so, what anti-crop and anti-animal agents, either in the procurement or R&D stage, are covered by Dr. Foster's statement? How has his statement affected DOD activities involving these agents?

Reply. Yes, this is a current statement of current policy. DOD terminated its research in anti-animal biological agents in 1954, thus there are no anti-animal agents involved. Anti-crop agents include stem rust and stripe rust of wheat and rice blast. All DOD activities with respect to these agents, except for destruction of stockpiles, has been terminated.

Question. Are there, either in the procurement or R&D stage, anticrop and anti-animal agents of a *chemical* nature? If so, what are the names of these agents? Has their status been affected in any way by the President's announcement of last November 25th or his follow-on announcement regarding toxins?

Reply. Any of the commercially available herbicides can be used as chemical anti-crop agents. Examples are 2,4–D, picloram and cacodylic acid. Their status has not been affected by the President's announcements of November 24, 1969 and February 14, 1970. Lethal chemical agents effective against man would also be lethal for animals. There are no chemical agents or weapons in R&D or procurement designed to attack animals, nor are there any stockpiles of such agents or weapons.

Question. Are herbicides either chemical or biological agents, and if not, why not?

Reply. While herbicides are clearly chemical substances, the position taken by the United States has been that they are not chemical warfare agents, which are proscribed by the Geneva Protocol of 1925.

Question. Is it true that since 1962 defoliation operations have covered almost five million acres, an area equivalent to about 12% of the entire territory of South Vietnam? How much of the acreage covered has consisted of food crops? What has been the nature of the remaining acreage?

Reply. The first statement is essentially correct. Since 1962, an area equivalent to 5,517,000 acres has been sprayed. 4,985,000 acres consisted primarily of dense jungle terrain with a small portion being mangrove swamp areas. The actual area sprayed is less than indicated above because some areas have been sprayed two or three times. Total area affected is more nearly 10 percent than 12 percent. Of the area affected, 532,000 acres has been for anti-crop attack. Anti-crop attacks have never affected as much as 1.0 percent of the annual food production of the Republic of Vietnam.

Question. Considerable criticism has been voiced as to the military ineffectiveness of our defoliation program. Is the program in fact justifiable militarily?

Reply. (U) Yes.

In answering, please comment on the following charges of ineffectiveness which have been raised against certain aspects of it:

One use of defoliants has been to reduce the cover available along roads for use in Vietcong ambushes. Roger Hilsman has contended that defoliation for this objective has "actually aided the ambushers—if the vegetation was close to the road those who were ambushed could take cover quickly; when it was removed the guerillas had a better fire."

Reply. One of the main requirements of a successful ambush is the complete concealment of the ambushers in a position where they can cause rapid, effective fire to be placed on the ambushed. Defoliation along the road will cause the enemy forces to take positions further away from the road thereby reducing their ability to deliver accurate fire onto the road. The trunks of defoliated trees will also limit fields of fire. If the enemy moves into the defoliated area, he will be exposed and subject to friendly fire before, during and after the ambush.

Question. Another use of defoliants has been the spraying of crops supposedly grown for Vietcong use, in an effort to deny this food to the Vietcong. Isn't such a program ultimately directed against the weakest elements of the civilian population—the women, children, and the elderly, since in the sprayed area Vietcong soldiers can be expected to get the fighter's share of whatever food there is? Isn't a corollary effect of this policy to drive villagers, who would otherwise be without food, to leave their villages and come into areas controlled by friendly forces? Even if this results into some extent separating the enemy from civilian elements, doesn't it result in an alienation of these civilians such

as is counterproductive in a guerilla war, where loyalty of the population is the ultimate objective? Doesn't this policy also contribute to the already great malnutrition present in the civilian population and to the disease associated with it?

Reply. Most of the anti-crop spraying is aimed at those crops grown for enemy units as distinguished from crops grown by the civilian population in enemy controlled areas. Captured intelligence documents indicate that many units are required to grow their own food and must use troops to accomplish this task. Most of the civilians who might be in the area where crops are grown for enemy troops are sympathizers and thus already alienated.

It is true that the anti-crop program frequently may be a partial influence on civilians to leave their village and come in to secure areas. However, this is only the case where US/GVN security cannot be provided. If physical security can be achieved, crop destruction is not approved. However, for areas where security cannot be provided the local province/district chiefs recommend relocation of friendly civilians prior to initiation of crop destruction. Furthermore, crop destruction programs are approved only for areas known to be actively controlled by the enemy. For example, areas from which fire is frequently received on helicopters and on Free World/GVN forces. In many cases, friendly populations are evacuated from insecure areas, as part of the normal pacification program for protection and security. In many of these cases, crops which cannot be harvested by the GVN are destroyed rather than leaving them for the enemy.

Total crop reduction due to defoliation has been estimated to be less than 1% of the total food production in South Vietnam. As such, although no data as to the extent of malnutrition caused by anti-crop operations exists, it seems unlikely that significant malnutrition has resulted from these operations.

Question. Concern has been expressed in many quarters about the ecological consequences of our defoliation activities. It is true that we have sprayed up to 100,000 acres of mangrove associations along rivers and estuaries, and that many have shown little sign of recovery after several years? Has DOD conducted studies to determine whether such spraying of mangrove associations deprives shellfish and migratory fish of an important ecological niche, leading first to the disappearance of these species from an area and second to a severe protein deficiency in Vietnamese diets? Has DOD studied whether defoliation operations have encouraged the growth of bamboo in defoliated areas and an attendant dislocation of the prevailing agriculture? Has DOD studied whether soil laterization is a danger inherent in defoliation operations? If such studies have been conducted, what have been their results?

Reply. A study of the ecological effects of defoliation in Vietnam was undertaken in 1968 by Dr. Fred H. Tschirley of the Department of Agriculture. He was invited to conduct the study by the Department of State and the Department of Defense. The report of his observations was reported at a convention of the American Association for the Advancement of Science (AAAS), and was published in their weekly journal SCIENCE (Volume 163, 21 Feb. 1969, pp. 779–786).

Dr. Tschirley reported on a block of about 100,000 acres of mangrove forest defoliated in the Rung Sat Special Zone, surrounding the ship channel into Saigon. Signs of seedling growth have been observed in some areas, but no comprehensive survey has been made to ascertain the extent of the recovery. Full re-establishment of the mangrove forest may require as much as 20 years, and there is no reason to doubt it will occur.

No detailed study has been made of the effect of spraying on fish and shellfish ecology. Tschirley reported that fish catch has been increasing, giving a strong indication that the aquatic food chain has not been seriously disturbed.

There has not been sufficient time for bamboo invasion of defoliated areas to become evident, if it occurs. Bamboo invasion has occurred in the agricultural areas farmed by the Montagnard tribesmen who practice a form of slash and burn agriculture which denudes and depletes the soil. Denudation does not occur with defoliation; lower, fast growing shrubs and grasses and seedlings are encouraged by the increased sunlight reaching the forest floor.

Laterization of soil is a long-term natural process which requires very specific conditions. Tschirley reported that while 30% of the soils in Vietnam have a potential for laterization, laterite is not formed in significant quantities. He finds it unreasonable to conclude that defoliation in Vietnam would hasten the laterization process because, as noted above, bare soil does not result from defoliation.

Dr. Tschirley recommended that ecologic research should be carried out in Vietnam when the war ends, that continuing assessment of the defoliation program as it affects forestry and watershed values should be carried out, and that defoliation should be conducted in a manner so as to leave undefoliated areas as a seed source and as habitate for wildlife. His recommendations were endorsed in principle by Ambassador Bunker. Subsequently, the AAS has established a study program looking to the design of tests required for postwar studies in Vietnam. The Department of Defense is cooperating with the study group and has provided information for their use.

Question. What action has been taken to date to control the use of 2,4,5-T in this country both on the commercial market and in Department of Interior and Department of Agriculture programs?

Reply. Insofar as the commercial market is concerned, the Department of Agriculture is taking action to suspend certain domestic uses of 2,4,5-T. Both the Departments of Agriculture and Interior have taken action to stop the use of 2,4,5-T in their own programs except in certain carefully controlled uses. Previous precautionary measures were announced by the President's Science Advisor on October 29, 1969.

Question. For the past several months concern about the possible ecological consequences of herbicides has given way to a concern over the teratogenic, or fetus-deforming, properties of 2,4,5-T, which is present in a number of the herbicides used in Vietnam. What precipitated this concern was a report by Bionetics Research Laboratories showing the results of extensive tests as to the effects of 2,4,5–T on mice and rats who were given oral doses of it during pregnancy.

(a) Is it not true that this report concluded that it was "inescapable that 2,4,5-T is teratogenic in this strain of rats at the dosage schedules used here," and that even the lowest dosage given resulted in very significant numbers of deformities?

Reply. This statement was made in the report by Bionetics Research Laboratories. However, it was not clear at that time whether 2,4,5-T or a contaminant called dioxin was the responsible material. HEW has recently reported that their laboratory data indicates 2,4,5-T itself teratogenic.

Question. Is it not true that the Bionetics study involved a far larger test sample than is required in F.D.A. tests conducted by the F.D.A. in order to determine whether a pesticide is fit for the commercial market?

Reply. We are not aware of any FDA requirement with regard to the size of sample of a material for tests such as these. The amount of material tested for allowable residues in the so-called "market-basket" tests is quite small, but rules for residue tests are not applicable to the Bionetics work. Many scientists believe that the number of animals and number of species of animals in the Bionetics study were minimal judged on scientific standards. This judgment was expressed by the President's Science Advisory.

Question. Since the Bionetics study, it has been suggested that the presence of a dioxin contaminant in the 2,4,5–T used biased the result, and that this contaminant was itself responsible for the teratogenic results found. Isn't it true, however, that a certain amount of this contaminant is present in all 2,4,5–T produced and that it is difficult to control its presence?

Reply. The sample of 2,4,5–T used by Bionetics contained an unusually large amount of dioxin—about 27 ppm (parts per million). Other samples of 2,4,5–T tested to date contain 0.5 to 1.0 ppm. Whether all 2,4,5–T contains dioxin is not known, although there is reason to suppose that it would be present in some amount. Its presence could be controlled, but whether it would be economically feasible to produce 2,4,5–T with no dioxin is not known. However, recent data from the laboratories of the National Institute of Environmental Health indicate that 2,4,5–T is itself teratogenic.

Question. Is it true that both FDA and the Department of Agriculture are now conducting tests designed to verify the Bionetics study and that all results to date in these tests do verify those results? When will these tests be completed and their final results known?

Reply. It is true that the Department of HEW is conducting tests similar to those of the Bionetics study and that the HEW work has reported evidence of teratogenicity on the part of 2,4,5–T.

Question. Since the Bionetics report was issued, DOD has continued its use of 2,4,5–T. Spokesmen for the Department have claimed that DOD policy, both before and after the report, was to avoid the use of 2,4,5–T in populated areas. It is not true, however, that Rear Admiral William E. Lemos, of the Policy Plans and National Security Council Affairs Office of the Department of Defense, has subsequently testified to a House Foreign Affairs Subcommittee that it has also been used against "enemy base camps" and "enemy training and regroupment centers" in order to expose both the enemy forces and the accompanying civilian populations in these areas to aerial observation? And is this not still, as several journalists have reported, an important part of the U.S. policy?

Reply. The statement made by Admiral Lemos in its entirety was:

"We know from prisoners of war and from observation that the enemy will move from areas that have been sprayed. Therefore, enemy base camps or unit headquarters are sprayed in order to make him move to avoid exposing himself to aerial observation. If he does move back in while the area is still defoliated, he will be observed and can be engaged."

It is not part of U.S. policy to spray civilian areas to render the civilian population subject to aerial observation. The HEW data on 2,4,5–T were given to DOD on the afternoon of 14 April 1970. At 0900 on 15 April Secretary Packard suspended use of 2,4,5–T for military operations.

Question. What effect would it have on defoliation operations in Vietnam if the Senate were to prohibit further use of herbicides containing 2,4,5–T? Could this effect not be absorbed in light of the present reduction of the U.S. involvement in the war inherent in Vietnamization? To what extent could herbicides without 2,4,5–T replace agents containing it which are now in use in an attempt to continue the same defoliation objectives?

Reply. It would be possible to substitute the defoliant identified as White, a mixture of 2,4–D and picloram. Although the use of

defoliants is decreasing as the pacification and Vietnamization programs proceed, it is not believed that use of defoliants could be stopped at this time.

Question. A further cause for the alleged ineffectiveness of defoliation operations has been an inability to spray herbicides from the air in a really accurate manner, as a result of which other than target areas have often been hit. Is it true that in 1966 herbicidal operations caused extensive damage, through wind drift, to a large rubber plantation northwest of Saigon owned by the Michelin rubber interests, and that the South Vietnamese authorities, through the American military, paid the owners nearly a million dollars in reparations? Is it true that in 1967 the South Vietnamese budget for settling claims arising from inadvertent crop damage was $3.6 million, and that these funds were provided by the United States? What is the total U.S. funding to date of reparations paid as a result of our defoliation programs? What is the present status of the Cambodian claim of last June 2nd seeking reparations for extensive damage to Cambodian rubber plantations and other crops? Doesn't this accidental spraying, apart from its dollar costs in reparations, lose far more in civilian support than it gains in short-term military advantages? Granted that the Vietcong use terror tactics, but aren't their tactics—such as the killing of village leaders while leaving the rest of the village untouched—of the selective nature needed to succeed in a guerrilla war?

Reply. In 1966 there were many claims of alleged damages to rubber plantations. A team of experts investigated alleged damage at 16 plantations in April 1967. Symptoms of herbicide damage were found at only seven plantations, and of these, two had been sprayed. To minimize the possibility of drift or accidental spraying, even larger buffer zones have been instituted around all rubber plantations.

Accurate figures on number of claims made, processed and pending cannot be developed. This is a GVN program. US advisers at different levels do not maintain records of claims actions. GVN records at district and provincial centers where claims are initiated and processed are maintained at varying standards set by different officials in charge. To our knowledge GVN has never attempted country-wide tabulation. US records of claims are based on number of validated claims paid or pending payments after validation. They do not reflect unsuccessful claims. Records available cover 1968 and 1969 only. In 1968, 7339 claims were validated and 3519 paid for a total of 77,477,000 piastres. A backlog of 3,820 validated claims caused by suspension of milcap during Tet 68 fighting was carried over to 1969. In 1969, 2,820 additional claims were validated and 6,350 paid (this includes a 1968 backlog) for a total of 156,289,000 piastres. A backlog of 290 validated claims carried into 1970. Since Jan. 1, eleven additional claims were validated for a total of 301 validated claims now awaiting payment totaling 4,575,290 piastres. The delay between validation and payment represents time involved in GVN accounting process and delivery of payment check to a claimant by the province chief.

DoD is not involved in negotiations regarding Cambodian damage claims. This is a State Department matter.

The last question equates accidental spraying with the terror tactics of the Vietcong, and DoD is of the opinion that accidental spraying is not equatable with terror tactics.

RELEASE FROM EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF SCIENCE AND TECHNOLOGY, OCTOBER 29, 1969

Dr. Lee A. DuBridge, Science Adviser to the President and Executive Secretary of the President's Environmental Quality Council, announced today a coordinated series of actions that are being taken by the agencies of Government to restrict the use of the weed-killing chemical, 2,4,5-T.

The actions to control the use of the chemical were taken as a result of findings from a laboratory study conducted by Bionetics Research Laboratories which indicated that off-spring of mice and rats given relatively large oral doses of the herbicide during early stages of pregnancy showed a higher than expected number of deformities.

Although it seems improbable that any person could receive harmful amounts of this chemical from any of the existing uses of 2,4,5-T, and while the relationships of these effects in laboratory animals to effects in man are not entirely clear at this time, the actions taken will assure safety of the public while further evidence is being sought.

The study involved relatively small numbers of laboratory rats and mice. More extensive studies are needed and will be undertaken. At best it is difficult to extrapolate results obtained with laboratory animals to man—sensitivity to a given compound may be different in man than in animal species; metabolic pathways may be different.

2,4,5-T is highly effective in control of many species of broad-leaf weeds and woody plants, and is used on ditch banks, along roadsides, on rangelands, and other places. Almost none is used by home gardeners or in residential areas. The chemical is effective in defoliating trees and shrubs and its use in South Vietnam has resulted in reducing greatly the number of ambushes, thus saving lives.

The following actions are being taken:

The Department of Agriculture will cancel registrations of 2,4,5–T for use on food crops effective January 1, 1970, unless by that time the Food and Drug Administration has found a basis for establishing a safe legal tolerance in and on foods.

The Department of Health, Education, and Welfare will complete action on the petition requesting a finite tolerance for 2,4,5–T residues on foods prior to January 1, 1970.

The Department of Agriculture and Interior will stop use in their own programs of 2,4,5–T in populated areas or where residues from use could otherwise reach man.

The Department of Defense will restrict the use of 2,4,5–T to areas remote from the population.

Other Departments of the Government will take such actions in their own programs as may be consistent with these announced plans.

The Department of State will advise other countries of the actions being taken by the United States to protect the health of its citizens and will make available of such countries the technical data on which these decisions rest.

Appropriate Departments of Government will undertake immediately to verify and extend the available experimental evidence so as to provide the best technical basis possible for such future actions as the Government might wish to undertake with respect to 2,4,5–T and similar compounds.

FATE OF POW'S MUST HAVE TOP PRIORITY

Mr. COOK. Mr. President, from time to time in the Senate and in the press there is talk of national priorities and the proper ordering thereof. I should like to remind Senators that there is one item of unfinished business which must always take top priority in our consideration; that is, our concern for those Americans still held prisoner by the North Vietnamese.

We must, as a government and as individuals, work ceaselessly and diligently for the release of these men. Meanwhile, we must do all that we can, daily, to make life for the men being held and for their families more bearable. Many of these men are still being held without being allowed to communicate with their families. Their wives, mothers, and children are without news and without knowledge of their whereabouts and their condition.

This situation is in clear violation of the Geneva Accords on Prisoners of War and must be remedied. This is the least that can be done for the men.

It is up to us to join in the worldwide effort to gain for these prisoners more humane, more decent treatment.

SEGREGATED SCHOOLS

Mr. ALLEN. Mr. President, the able and distinguished Senator from Connecticut (Mr. RIBICOFF), speaking in the Senate on February 7, 1970, made a historic speech accusing the North of monumental hypocrisy in the handling of the segregation which exists in its public schools. He pointed out that there is no real difference in de jure and de facto segregation—that if one is harmful, so is the other; that if one should be wiped out, so should the other.

The argument of the Senator from Connecticut was so logical and persuasive, and its moral force so strong, that it contributed in large measure to the adoption by the Senate of the Stennis amendment.

The junior Senator from Alabama, in tribute to the distinguished Senator from Connecticut, would say that the leadership furnished by the able Senator from Connecticut was second only to that of the distinguished Senator from Mississippi (Mr. STENNIS) in bringing about the adoption of the Stennis amendment.

I ask unanimous consent that an article entitled "Do Most Americans Secretly Want Segregation?" written by the able statesman and Senator from Connecticut (Mr. RIBICOFF), and published in Look magazine for September 8, 1970, be printed in the RECORD. The article will be of interest to all thoughtful and fair-minded Americans.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DO MOST AMERICANS SECRETLY WANT SEGREGATION?

(By Senator ABRAHAM A. RIBICOFF)

Last February 9, in a speech on the floor of the United States Senate, I accused my own part of the country, the North, of "monumental hypocrisy" in its treatment of the black man. My speech occurred during debate on an amendment calling for a uniform national policy on school desegregation. Sen. John Stennis of Mississippi sponsored the amendment. I said I would support Senator Stennis.

In the speech, I argued that what is evil in Mississippi does not become a virtue when it is practiced in Connecticut. We Northerners have been too eager to point out the horrors of Southern segregation originally based on law (*de jure*), while moving to the suburbs and segregating our schools according to our housing patterns (*de facto*).

Of course, Presidents, senators, sociologists and boards of education can debate the relative evils of *de jure* and *de facto* segregation all they want. But for the black child who

is forced to suffer a segregated education, there is no difference.

Whether you call it *de jure* or *de facto*, it is segregation—pure and plain. For the black child, it means white people don't think his life is as important as a white child's, or that he is good enough to associate with their children.

How the message comes, whether by *de jure* or *de facto*, is irrelevant. What counts is the damage. That is the same in both cases. It often is permanent, jeopardizing the black child's entire adult life. No legal phrase can soften the blow or end the pain. The phrase *de facto* has only one purpose. It provides a "respectable" screen behind which white Americans can discriminate against black children.

Without question, many Southerners hoped the Stennis amendment would slow down integration in the South. Though the states that had dual school systems are desegregating under constitutionally based Supreme Court orders that nobody can change, some hard-core resisters are still trying to circumvent those orders by such methods as segregated classrooms in "integrated" schools or with private schools for whites. Clearly, any kind of slowdown in the South is unacceptable.

But it is time for us to stop looking only at the motives of the South. What about the motives of the rest of us? How committed are we to integration in our own backyards?

Those of us in the North should begin to look honestly at ourselves and see that our contribution to integration has been to refine the art of making sure blacks can ride in the front of buses we never ride, can live in someone else's neighborhoods and can work in the lower reaches of our organizations.

The fundamental problem is the increase in *de facto* segregation in both the North and the South. As long as this nation avoids facing the issue of *de facto* segregation squarely, many will insist that such segregation is accidental and therefore not illegal. This does more than absolve the North of responsibility for the unequal education afforded black children in their own communities. It also is an open invitation to the South to emulate the North.

In time, the South can argue that it has ended *de jure* segregation and replaced it with the *de facto* kind. As proof, the South will soon be able to say its cities and suburbs are just like the North's—black cities, white suburbs. Then what will our tolerance of *de facto* segregation have achieved? I argued seven months ago that we needed a national policy to end segregation in the North as well as the South. The need seems even more urgent now. If anything, recent actions by the President and the Congress have strengthened my conviction that America is heading down the road to apartheid, a strict separation of the races, based on *de facto* segregation, and that nobody who has the power to alter this course appears willing to do so.

The Senate did pass the Stennis amendment. But the Senate-House conference committee watered it down to the point where it marked a giant step backward. For the first time, Congress wrote into law the distinction between *de facto* and *de jure* and singled out only *de jure* for government action.

On March 24, President Nixon told the nation that while *de facto* segregation was "undesirable," his Administration would require no steps to end it, in either the North or the South.

Then, on May 21, the President introduced his Emergency School Aid Act of 1970, a two-year, $1.5 billion package designed to promote desegregation. This legislation provides financial assistance for *de jure* school systems that must desegregate.

But the President's program also builds on the shortcomings of the earlier desegregation message with regard to *de facto* segregation. It doesn't require anything of anyone. It is purely voluntary. If you want to desegregate, fine. There will be money available to help you over the hurdles. If you don't, that's OK, too. It's not illegal. The decision is yours. The Federal Government will stay neutral.

In short, *de facto* segregation is still a "U.S. Government Approved" product. The President's program allows us all to continue to talk a good game of integration while serenely practicing segregation. The message to the South is unmistakable: If you segregate your society as well as your schools, as we do in the North, we can all segregate together.

What bitter irony that the model for American apartheid should come from the North. Most of us always believed apartheid would come exclusively from the South whose legacy of slavery and legalized segregation was fundamentally responsible for most of the racial tension in this nation. There is little doubt that if life had been better in the South, the black man would have stayed. He would not have embarked upon one of the greatest and swiftest migrations of a single people in our history.

But the South, no matter what happens with this month's school-desegregation drive, has no monopoly on being brutal to the black man. When he moved North, our welcome was a ghetto, an unemployment line, a substandard tenement, a poor school and no medical care. And all our criticism of the South, no matter how justified, cannot excuse or erase these facts. The North has been just as successful in denying to the black man and his family the opportunities we insist upon for ourselves and our families. Only we tell ourselves it isn't our fault. The institutions are responsible. There is nothing we can do. It's a terrible "accident," a fact all of us may decry, but for which few of us will accept responsibility.

An almost classic example of this kind of thinking occurred recently in Pontiac, Mich., when the Board of Education told a Federal court that the city's schools were segregated because its neighborhoods were segregated. The Board agreed with the black parents who had brought suit that a black child's segregated education was inferior and harmful and that the resulting damage was irreparable. But the Board argued that, since it had not created the segregation, it had no responsibility to correct this admittedly harmful and devastating condition.

The U.S. District Court Judge, Damon J. Keith, ruled otherwise. He found that despite its frequent pronouncements in support of integrated education, the Board had used its powers to perpetuate segregation and prevent integration.

The segregation in Pontiac is no accident. Nor is it in many American communities. Unlike its Southern counterpart, Northern segregation may not be traceable to one official action. But the thousands of individual decisions—by school boards, real estate brokers, businessmen, politicians, and private citizens—that created *de facto* segregation were all based on the same objective as the official *de jure* action: to keep blacks and whites separate.

Furthermore, a segregated education is harmful to white children as well. White students having no contact with blacks during their school years receive a distorted view of American society. Many of them acknowledge this fact and complain about it.

How can we reverse this trend?

We can begin by recognizing that we don't have to wait for the Supreme Court to rule on *de facto* segregation. The President and the Congress have all the power they need. The longer we wait, the worse the problems will be.

The Supreme Court originally acted against segregation in 1954 largely because every other political institution refused to act. If the President and the Congress continue to abdicate their constitutional responsibilities, they will only succeed in paralyzing the courts, which cannot carry the entire burden by themselves. Or, taking their cues from a reluctant Washington, courts may begin to give legal sanction to *de facto* segregation.

We must also recognize that focusing only on integration in our central cities will simply drive many of the remaining whites to the sanctuary of the surrounding suburbs.

A recent opinion poll reported that most Americans support integration and are willing to send their children to integrated schools. Substantial opposition to integration generally occurs when schools and neighborhoods cease to reflect the society at large. But this need not be an insurmountable problem if we view the entire metropolitan area—including the suburbs—as a whole. The percentage of blacks in most of these areas is less than 20 percent. In fact, in the major metropolitan areas in 1969, blacks made up only 12 percent of the population.

Our goal then should be a national policy to end segregation in all our schools, no matter what we call that segregation or how it occurred. We can't expect this to happen overnight. But we can require that all school districts in a metropolitan area formulate plans now to end segregation in all our schools within ten years. Every area's plan must provide for uniform progress each year, with the result being an end to all racial segregation in the final year.

Only when we require school integration throughout our metropolitan areas can we guarantee sufficient stability to avoid the white flight that has characterized large-scale integration thus far. Variations should be allowed, but only those that occur within the context of obtaining general racial balance.

Our policy, and the methods of achieving it, must be compulsory, all-inclusive and based on a timetable. We have had enough halfway houses for human rights in this country. They don't work. Left to our own devices, we will behave just as the South did for so many years—long on deliberations and short on speed.

Many argue that the suburbs never will go along with this. My answer is to end all Federal educational assistance to any individual school district that refuses to participate in its area's plan. Federal assistance also should be denied any state that gives aid to a school district that does not participate in such a plan.

Those communities that are hard-pressed to finance integration will need whatever help we can give them. Therefore, as the President has suggested in part, the Federal Government should provide school districts with funds to cover the additional expenses involved in desegregation. Cost is not a valid reason for the continued denial of human rights.

Talk of integrating suburban schools often results in frantic discussions about busing. Much of this issue is a "red herring." Millions of American children already are bused to school. Suburban parents often insist upon the opportunity for their children to ride on a school bus as a matter of right.

Moreover, busing is only one technique for integrating schools. Many school districts have successfully integrated their schools by redrawing district lines, pairing neighborhood schools, and locating new schools in areas that make integration easier. These techniques have actually reduced the amount of busing in some areas.

Many who object to busing don't really object to the bus ride. Their concern is the school at the end of the ride. As long as broad disparities exist in the caliber of students,

teachers, atmosphere and equipment in our schools, I can understand a parent's concern over proposals that would take his child from a school he knows to one that is unknown.

America cannot allow these disparities in its schools to continue. But the solution is not continued opposition to integration. Nor is it a call limited only to improving ghetto schools. Integration and the improvement of all schools must go forward together.

In the long run, though, lasting school integration cannot occur in a segregated society. It is a fantasy to think that integration can be achieved by letting black children attend our schools when we won't let their parents live in our neighborhoods. That was the basic point I sought to make last February. It is of critical importance.

Some 80 percent of all the new jobs developed in the past 20 years are in the suburbs. Blacks must have access to those jobs and to homes near them. We should encourage the suburbs to provide low-income housing. Private industry should hire more blacks and refuse to move into a suburb until housing for their low-income workers is provided. The Federal Government should refuse to locate its facilities or allow its contractors to locate in areas that do not provide low-income housing.

At the same time, the Federal Government must recognize the severe financial problems confronting suburban communities throughout the country. We therefore should supply additional funds to those suburbs that provide housing, employment and education for blacks in order to cover the additional expenses they have as a result of these activities.

I realize that this is a tall order, one that causes many supporters of integration to despair of the likelihood that we ever will take these steps. Some liberals even oppose a uniform national policy on desegregation on the grounds that spreading the skimpy Federal resources for implementing desegregation across the country will totally destroy their usefulness; that *de facto* segregation is a complex process against which we must move very carefully and slowly; and that moving in the North will generate such opposition that progress will stop everywhere.

But to me, these arguments are as unpersuasive today as they were last February. The Congress has said it would provide the men and the money to implement desegregation on a national scale. Tripling Federal school-desegregation-enforcement activities would cost only $10 million more a year. This country presently spends less than $5 million a year in this area.

The "go slow" argument is based on the same reasoning that sent many Northern liberals into hysterics when it came from south of the Mason-Dixon line. Except we don't even have a policy of "go slow" in the North. We have a policy of "no go."

On the third point, that moving in the North would create enormous opposition, I have always assumed that we sought integration—and still seek it—not because we think it is popular but because we prize certain basic human rights. Nobody ever argued that integration was popular. But that doesn't justify a double standard for black children that says what's bad for you in the South is good for you in the North.

There is another question that we ought to settle once and for all: Why should we fight for integration when many blacks themselves call for separatism?

It is true that some blacks don't want integration. This is an understandable paradox. White tokenism in both the North and the South has made these blacks frustrated, bitter and angry. They want only to be left alone.

But it's a curious kind of morality that drives blacks to such despair over the possibilities of achieving integration and then uses this despair to justify doing—or not doing—what we have always done or not done.

The most important fact is this: Most blacks still want integration. They cling to the same hopes and goals America has held out to every other group. Denying them their rightful opportunity because a minority of blacks has become impatient, and with good reason, is a shabby betrayal of the ideals this country is supposed to represent.

Making integration a national goal should not make it an impossible goal. I fervently hope that our commitment to integration is not so fragile that we shall discard it when we are asked to meet it. There are more constructive things for us to do than write obituaries for the cause of human rights in America.

BOMBING OF CULEBRA

Mr. FULBRIGHT. Mr. President, last week I placed in the RECORD a telegram I received from Mr. Rafael Hernandez Colon, President of the Senate of the Commonwealth of Puerto Rico, in support of the amendment to H.R. 17123, the Military Procurement Authorization Act, which would have the effect of terminating the Navy's use of the island of Culebra for bombing and shelling practice.

At the same time I reported that Gov. Luis Ferre and Mr. Jorge Córdova, the Resident Commissioner of Puerto Rico, had visited my office to discuss the matter.

Since that time I have also received a cablegram from another distinguished Puerto Rican leader, Mr. Luis Munoz Marin, who for many years was Governor of the Commonwealth.

Mr. President, I ask unanimous consent that the cablegram be printed in the RECORD.

There being no objection, the cablegram was ordered to be printed in the RECORD, as follows:

SAN JUAN, PUERTO RICO,
August 13, 1970.

Hon. J. W. FULBRIGHT,
U.S. Senate,
Washington, D.C.:

As I am convinced that the use of Culebra by the Navy is not necessary to national security in any fundamental sense I will fully support Governor Ferre if he decides to take a definite and unequivocal position on the return of Culebra to the full and uninhibited use of its citizens stop.

Best regards.

LUIS MUNOZ MARIN.

MARK TRICE

Mr. GOODELL. Mr. President, I wish to join Senators in paying tribute to Mark Trice for his 50 years of service to the Senate.

Although I have been a Member of the Senate for less than 2 of the 50 years which Mark has devoted to this body, I am deeply grateful to him for his thoughtfulness to me.

It is rare, in public life, that efficiency can be combined with good humor, courtesy, and charm. And yet, Mark Trice has been doing precisely this. He has impressed all of us who have worked with him with his ability to remain friendly and calm even in the most trying of circumstances. Mark has set an example for us in this respect.

In the course of 50 years, Senators have come and gone, issues have been raised and then forgotten, wars have been fought, bills have been enacted into law, great changes have been wrought over the face of the earth—and Mark Trice still serves the Senate and his country with the same consummate dignity which has marked his years of service in this Chamber. Truly, it is no exaggeration to say that Mark Trice has become an institution.

On this occasion, I offer my best wishes to him for the future.

ADDITIONAL SUPPORT FOR RATIFICATION OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, support for ratification of the genocide convention has been steadily increasing over the last few years. The treaty has been endorsed by virtually every major religious group. It has the support of humanitarian groups throughout the United States. As evidence of this widespread support I would like to submit for the record copies of several letters addressed to Senator CHURCH, the chairman of the Subcommittee on Genocide, from various religious and humanitarian organizations which support ratification of the convention. These organizations represent the views of thousands of their members and their support for ratification of the treaty demonstrates the need for immediate action on this convention.

I ask unanimous consent that three letters, one from the American Baptist Convention, another from the Commission on International Affairs, the American Jewish Congress, and one from the American Ethical Union, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MAY 6, 1970.

Senator FRANK CHURCH,
Chairman, Sub-committee on Genocide, Senate Foreign Relations Committee, New Senate Office Building, Washington, D.C.

DEAR SENATOR CHURCH: Please make the following statement and attachment part of the record on the need for ratification of the Genocide Convention.

"In urging you to ratify the United Nations Convention on Genocide, we call to your attention the fact that American Baptists meeting in Annual Convention on eight different occasions have stated their belief that 'discrimination is one of the great evils of our time * * * and is contrary to the Christian concept of the oneness of the human family.'

"We refer you also to our testimony before the Senate Foreign Relations Subcommittee on March 8, 1967 in which we noted that American Baptists had gone on record requesting the Senate to ratify four United Nations Human Rights Conventions, including the Convention on Genocide.

"We cannot emphasize too strongly the urgency of this action on which the United States has delayed so long."

Sincerely,

MABEL MARTIN,
U.N. Representative,
American Baptist Convention.

APRIL 17, 1970.

Senator J. W. FULBRIGHT,
Chairman, Senate Foreign Relations Committee, Senate Office Building, Washington, D.C.

DEAR SENATOR FULBRIGHT: We are deeply gratified to learn that a subcommittee of the

Foreign Relations Committee shortly will begin holding hearings on the United Nations Genocide Convention.

It is more than twenty years since the Genocide Convention was first passed by the General Assembly and signed by the United States; and it is more than twenty years since that Convention was transmitted by President Truman to the Senate for its approval. During this period 75 nations have proceeded to ratify the Convention. Our own country, however, has regrettably, and to many inexplicably, continued to withhold its endorsement. This failure to act has compromised our country's support of the worldwide effort to elevate standards of morality and decency among nations.

We earnestly hope that that tragic impasse has now been broken. We are encouraged by the forthright action taken by the President, the Attorney General and the Secretary of State, each of whom has endorsed the call for immediate ratification. They have done so because they are convinced that such action would significantly advance international standards of justice without in any way derigating from the rights and protections enjoyed by American citizens under our Constitution and under our system of law. This view has been affirmed not only by the Attorney General but by legal scholars, jurists, numerous state bar associations and the faculties of law schools.

The responsibility for further action now rests inescapably upon the Senate. As one of more than 60 organizations in the Ad Hoc Committee on the Human Rights and Genocide Treaties, representing all sectors of American society, we are convinced that ratification reflects the genuine aspiration of each of these groups and of their tens of millions of constituents. We know that the overwhelming majority of Americans join us in the hope that your Committee will move promptly and positively in support of the Convention and will thus enable the entire Senate to act to bring about the long overdue ratification of this important treaty.

We respectfully request that this letter be incorporated in the record of the Subcommittee hearings.

Sincerely yours,

ELEAZAR LIPSKY,
Chairman, Commission on International Affairs American Jewish Congress.

U.N. COMMITTEE OF THE
AMERICAN ETHICAL UNION,
New York, N.Y., April 20, 1970.

Hon. Senator FRANK CHURCH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHURCH: The American Ethical Union has favored the ratification of the Genocide Convention in resolutions at various AEU Assemblies as far back as 1950. Our position is still the same, as stated in the copies of the resolutions enclosed.

In view of President Nixon's recommendation, we earnestly urge that the Foreign Relations Committee recommend ratification and that other Senators be urged to vote favorably on it.

Sincerely yours,

Mrs. MAY WEIS,
Chairman,
Mrs. ROSE WALKER,
Mrs. VERA GALANTER.

THE HONORABLE ALF M. LANDON DISCUSSES NIXON FOREIGN POLICY

Mr. DOLE. Mr. President, the State of Kansas is honored and fortunate to be the home of Alf M. Landon, a former Governor and 1932 Republican candidate for President of the United States. Governor Landon is now retired from public life, but from his home in Topeka he maintains a lively interest in the affairs of his State and country.

On August 19, Governor Landon appeared on the Kansas educational television network to discuss the new directions in U.S. foreign policy under President Nixon. As those of us who know him have come to expect, Mr. Landon's observations were perceptive, stimulating, and most worthwhile.

Mr. President, I have obtained a transcript of the television program, and I believe that Senators would enjoy and profit from reading Governor Landon's foreign policy analysis. I ask unanimous consent that the transcript be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

PRESIDENT NIXON BUILDING BRIDGES

(By Alf M. Landon)

Many people are asking the question, "What is our goal in Vietnam?"

As I said three years ago, the Vietnam war is part and parcel of the entire world situation. It seems to me we are looking at the formulation of a tremendous and vital change in our entire foreign policy.

When you put it all together, it means a gradual, calm and firm disengagement from the containment of communism policies of Truman, Eisenhower, Kennedy and Johnson without returning to the smug isolationism of Coolidge, Hoover and Franklin Roosevelt in the 1920's and 1930's.

President Nixon is returning Okinawa to Japan in 1971. He is also starting to phase out American military bases there.

He is cutting our troops in Vietnam in half or more. In Korea, he is reducing our troops by a third or more. Aside from the valid military and political factors involved is the upsetting impact on the economy of these countries by a precipitous change in American foreign policies. Our President is confronted with these same problems in West Germany, where it is apparent he will shortly cut our troop strength.

Both in Asia and in Europe, our friends and allies are unhappy and nervous over the American President's new policies. Yet none have been willing to carry their fair share of their own defenses or are doing anything about that now.

Furthermore, their trade policies of blocking out American products are encouraging a rising tide in the Congress toward protective tariffs under the guise of quotas, a virulent form of isolationism. President Nixon's vigorous opposition to this legislation which is contrary to his policies and our national interests is effective in shaping up a better trade bill.

Arguing over Cambodia is like arguing over the Bay of Pigs or Santo Domingo. The indirect effects were as important as the direct effects. Cambodia, however, was in collaboration with the de facto government. The Bay of Pigs was not.

In the really crucial situation in the world today—the Explosive Middle East—the key country is Israel. Israel is also part and parcel of the entire world situation.

The Israelis are a tough people. They have proven their ability to defend themselves. However, they are a little country and cannot stand indefinitely military logistic losses and the economic pressure as well.

The success of our President's quiet, persistent policy for a temporary ceasefire there is a major step toward ultimate formal acceptance of a workable agreement between the governments in that area.

To sum it all up: While President Nixon at Guam was really abandoning President Johnson's assumption of the guardianship of all Asia at the Manila Conference in October, 1966, he also is abandoning our policy since World War II of trying to reform the world en masse in our own image. That is as applicable to Western Europe and the western hemisphere as it is to Asia and Africa.

Any president of a country the size, influence and affluence of the United States is bound in some degree to the policies of his predecessors. He cannot reverse them overnight. It takes time and patience.

So, when the question is raised as to what the goal of our government is in Vietnam or in the Middle East, I submit it is part of President Nixon's entire world policy of normalizing relations with other countries in the world—trade as well as military—Russia and China as well as the European Economic Community. It is the basic policy which U Thant has repeatedly urged on the United Nations. It is a modification, at least, of the unilateral policy in the United Nations, in favor of a more collective policy, which will build for the security on which peace of the world is built.

Put together, the steps taken by President Nixon are impressive toward establishing international relations based on mutuality of national interests instead of military garrisons.

1. Our President's policy does not involve retreating from Asia. The United States intends to remain a major influence in that area.

2. In the Middle East, President Nixon is accepting the fait accompli of Russian penetrations and growing influence in that area. Between the two governments, a favorable start is being made on hammering out workable relations that can contribute to Middle East stabilization.

3. West Germany and Russia have agreed upon a non-aggression treaty. That points up the fact that, following World War Two, no peace treaty was ever made. The new treaty is an important factor in world affairs, which has the support of the Nixon administration. And now comes East Germany asking for admission to the United Nations and diplomatic relations with its members. Also is the highly important resumption of diplomatic relations between the Vatican and Yugoslavia.

4. His policies are not based on the old concept of monopolistic special privilege in spheres of influence or of a unilateral balance of power. It is another illustration of the President's recognition of the realities and potentialities of life in the world in which we live.

5. They are not isolationism or Fortress America or nebulous. There are those unable to see the forest for the trees.

6. They are a slow and firm development, without blare of bugles, bluster or brinkmanship, of disengagement from containment policies. I think that leaves the United States in its rightful and sound position of speaking softly but keeping a big stick when necessary for world peace, recognizing the legitimate and enduring national interests of other peoples. It is also the recognition that, while technical developments make war more terrible, they also make peace more possible; for example, through better photographic surveillance methods.

These policies are designed to relieve us of the incredible drain on our material, mental and spiritual resources by attempts to police the world, which have disunited us at home without any compensating advantages. The incipient Nixon policy makes possible bringing our human and material resources to bear on our pressing and grave economic, racial and environmental problems at home.

We are handicapped in tackling our national and international problems with our house torn up and untidy. The same is true of the world at large. Mr. Nixon is formulating his practical foreign policies with new men or men who will be coming into governments all over the world, on the reasonable

assumption they are willing to face and adopt changes of mutual and creative advantage.

His policies are a cautious approach to a multilateral balance of power built on the broad base of mutual advantage—replacing military tension with a growing atmosphere of fundamental potentialities for human development offered by better worldwide educational facilities—more effective agencies for meeting the widening range of economic and environmental needs—a wider range of acquaintance among governments—and closer contacts in all human relations at the grass roots level.

That will do much to encourage lessening competition in the arms race, which is necessary to bring tranquility and prosperity—on which peace is ultimately based—to the whole world.

That will also encourage the development of a state of mind—a determination to find positive roads to peace.

IMPACT OF THE WAR ON AMERICAN LABOR

Mr. FULBRIGHT. Mr. President, last week the Committee on Foreign Relations had to cancel a hearing it had scheduled to receive testimony from labor leaders on the impact of the Vietnam war on labor in the United States. Subsequently, the individuals who were to appear submitted their statements and other material for the record. These will be reprinted in the committee's hearings on Vietnam.

In the meantime, however, I wish to place in the CONGRESSIONAL RECORD a news release issued by the United Automobile Workers which contains a succinct summary of the 75-page statement which was prepared for the committee by UAW President Leonard Woodcock.

As Mr. Woodcock points out:

The Vietnam war has cost the U.S. 8.8 million man-years in labor, has reduced workers' real wages and has intensified unemployment problems.

Mr. Woodcock has prepared a very thorough analysis of the effect of the war on American workers and I hope Members of the Congress and the general public will take the time to read the full text of his statement in the committee's hearings which should be available in the near future.

I ask unanimous consent that the UAW press release be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

VIETNAM WAR WASTES MANPOWER, CUTS JOBS AND REAL WAGES, WOODCOCK TELLS SENATE COMMITTEE

The Vietnam war has cost the U.S. 8.8 million man-years of labor, has reduced workers' real wages and has intensified unemployment problems, UAW President Leonard Woodcock declared in a statement submitted to the U.S. Senate's Foreign Relations Committee.

Woodcock's statement, at the committee's request, focused on the impact of the Vietnam war on American workers. The cost of the war, however, "has been greatest for the 50,000 or more young men who have lost their lives and for their families," he declared, and "for the more than 270,000 who have been wounded—many of them blinded, maimed or crippled for life.

"The cost has been very great for the American economy. Just in money terms it has been at least $150 billion. But far more important has been the waste of manpower, not only through the number of men put into uniform, but through the number in both government and private employment servicing and supplying the Vietnam war." The almost nine million man-years of wasted labor otherwise could have been used to "produce goods and services for the use of the American people," Woodcock pointed out.

Woodcock disagreed with the contention that the war benefited workers by creating 1.5 million additional jobs.

Certainly the jobs have been added, he said, "but at the time of the Vietnam build-up our economy was already expanding rapidly, unemployment was steadily falling, and there were still sufficient unmet needs in the country to have provided a civilian job for every person able and willing to work."

Working people have felt a disproportionate share of the war's impact through unequal draft and tax measures, unemployment, and other economic factors and the neglect of domestic needs, Woodcock asserted.

"To begin with the heaviest cost, we believe that the working people of America have borne more than their proportionate share of the direct human cost of military participation—the deaths, the woundings" and intensified social problems, he said.

The financial costs of the war, too, have fallen most heavily on the working people, Woodcock added. Increased taxes, inflation, short work-weeks and a loss of overtime—all traceable to policies resulting from the war—have caused workers' real buying power to fall.

He pointed out that median earnings for 1969 of every group of workers below the professional or managerial level are less than what government called necessary for "modest but adequate" standard of living. Their real buying power decreased between 1965 and 1969 despite higher wages.

The burden of unemployment, resulting from misguided efforts to stem the wartime inflation, falls upon workers, the UAW president said.

And, he added, not only does the burden of taxation to finance the war bear relatively heaviest on labor, but so does the resulting neglect of domestic needs.

In fiscal 1969, Woodcock pointed out, Vietnam expenditures were $28.8 billion—$550 million more than the combined domestic expenditures for health, education and manpower, community development and housing, economic assistance and Food for Peace, public assistance and natural resources. The war on poverty in America is one of the major casualties of the war in Vietnam, he said.

To meet the nation's real needs, Woodcock suggested numerous changes in national policy. He began with a reiteration of UAW's proposal for government to develop a conversion program that will offer workers an alternative to military production jobs and will insure the maintenance of payrolls. Unemployment, he stated, is greater than the official count of approximately 4 million. Adding persons not counted under present techniques of the Department of Labor would raise the true total "closer to 5.5 million," he said.

Other suggestions offered by Woodcock are aimed at problems of manpower policy, technology, training programs, relocation of workers, protection of workers' civil rights, full employment, a price-wage review board and overall national planning.

COMMEMORATION OF MR. JAMES D. BROWN

Mr. THURMOND. Mr. President, on August 18, 1970, one of South Carolina's outstanding and dedicated educators passed away. Mr. James D. Brown was a great South Carolinian, and our State has suffered a loss in his death.

In 1948, when I was Governor of South Carolina and ex-officio chairman of the State board of education, James D. Brown was appointed superintendent of education for Newberry County's public schools and served in that position until his retirement in July 1969. We who knew this man and are familiar with his work can praise him as a man devoted to educating our children in a manner that would prepare them for leading useful and productive lives. By his example, Superintendent Brown instilled in those who were privileged to come in contact with him a deep feeling of civic responsibility and high moral values.

Mr. President, I wish to express my deepest sympathies to Mrs. Lelia Taylor Brown and other members of the family. I shall always remember James Brown as a good friend, a dedicated servant of the people, and an outstanding educator. He will always be remembered by his students, associates, and friends, and his stimulating influence will continue to be felt in South Carolina. If a man's worth is to be measured by what he left behind, Superintendent Brown will be at the head of the list of individuals who left their State and community a better place for all to live and work.

Mr. President, the Newberry Observer of August 21, 1970, carried a death notice and biography entitled "James Brown, Former Superintendent of Education, Dies" and a very fine editorial entitled "The Late James Brown." I ask unanimous consent that they be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

THE LATE JAMES BROWN

James Brown was for many years Superintendent of Education for Newberry County's public schools. In fact when he retired in this capacity last year he held the distinction of being the last Superintendent of Education in this county to be elected by the citizens. Under present law, this position is appointive.

Mr. Brown was unable to enjoy his brief retirement, for shortly after he left the office an illness confined his activity. This week, Mr. Brown died.

The position of Superintendent of Education in any county school system today is certainly not a popular one; but neither has it ever been. And during the many years that Mr. Brown held this position he was faced with the insurmountable problems that befall an education system.

Those who are familiar with his work in this field, however, can clearly define him as a man who was dedicated to the principles of education, who held the sincere interest of every child in the public school system close to him, and who handled the responsible duties of his office in a manner that reflected credit upon himself as an educator.

In more recent years, the title of the office held by Mr. Brown was somewhat misleading for more than being responsible for the duties normally expected of a Superintendent of Education he was, in fact, more a director of finance for it was Mr. Brown who was in charge of the financial transactions of the county schools. This, within itself, is a full-time undertaking and today the educational system employs a person with such a title who has this responsibility alone.

Mr. Brown did a job for many years for this county as Superintendent of Education that will long stand on its own merits. For many years, appreciation for his services was reflected by the voters who returned him to office.

Today, we add a final and belated appreciation to the late James Brown for his loyal, dedicated, faithful and valuable services to literally thousands of Newberry County youngsters during his tenure as our Superintendent of Education.

JAMES BROWN, FORMER SUPT. OF EDUCATION, DIES

James D. Brown, son of the late Mrs. Lily May Caldwell Brown Folk and the late Horace Brown, died Tuesday night at the Columbia Hospital after a short critical illness.

He spent most of his life in the Long Lane-Beth Eden section of Newberry County. He attended the county schools and was graduated from Newberry College. He also attended the University of South Carolina.

He served in the Army during World War II.

His life's work was in the field of education, having served as a teacher, principal and Superintendent of Education of Newberry County from 1948 until his retirement in July 1969.

He was a member of Beth-Eden Lutheran Church. He served his church in many capacities on local, district and state level. He was also active in many civic, service and charitable organizations.

Surviving are his wife, Mrs. Lelia Taylor Brown; a step-daughter, Mrs. Virginia Shipman of Dyersburg, Tenn.; one brother, Hamilton Folk of Newberry; three sisters, Miss Sarah Folk and Miss Lillie Mae Folk, both of Newberry, and Mrs. Olin Lominick Sr. of Pomaria; and three grandchildren.

Funeral will be conducted at 4 p.m. today (Thursday) at the Whitaker Funeral Home by Rev. Paul Hatch. Burial will be in Rosemont Cemetery.

Nephews who will serve as active pallbearers are David Folk, Hayne Folk, Wayne Folk, Bobby Lominick, Chris Lominick, Olin Lominick Jr. and Ralph Hembree Jr.

Serving as honorary pallbearers will be P. K. Harmon, J. V. Kneece, R. E. Beck, Ralph Watkins, Alan Caldwell, Ed Chandler, Tom Leitzsey, L. A. Richardson, Dave Waldrop, Dave Hayes, Charlie Lominick, Jim Phibbs Sr., Dr. B. M. Montgomery and Dr. E. J. Dickert.

Whitaker Funeral Home is in charge.

AN ALL-VOLUNTEER ARMY

Br. MOSS. Mr. President, I have long held the position that the Selective Service System needed drastic reform. As a cosponsor of several selective service reform bills, I have felt that if we must have the draft, then it must be as fair as possible.

I supported President Nixon, for example, when he requested authority to institute random selection. While there are still several bugs in the random selective system, at least it has removed some of the uncertainty that used to plague the lives of our young men.

But many unconscionable inequities still remain. Senator KENNEDY's bill, S. 1145, of which I am a cosponsor, would remove many of these inequities.

Yet I believe it will be impossible to make the draft completely fair. Conscription is inherently unfair. It is for this reason that I have always been in favor of instituting an all-volunteer army, if feasible.

Those two key words, "if feasible," have always been the problem. I now am of the opinion, however, that an all-volunteer army is feasible—or at least there is a high enough probability of success that we ought to give it a try by taking the first transitional step. I will support, therefore, the Hatfield-Goldwater amendment which institutes the pay increases and other reforms needed to make an all-volunteer army work.

All all-volunteer army is desirable for many reasons:

First. Denial of the freedom to lead one's own life according to one's own values is contrary to the spirit of our heritage.

Many of us have gotten so accustomed to the draft that we assume that there has always been one. But until World War II and the cold war era thereafter, there was no draft except briefly during the Civil War and the First World War.

Second. Forcing some to serve when not all must serve is an inequitable burden on a small minority. Too many young lives have been needlessly altered because of the dread of the draft. And as the Gates Commission notes, the draft is a tax-in-kind levied only on a small minority.

Third. Conscription is a costly and divisive procedure for manning the Armed Forces. It is costly because of the waste in manpower created by the great turnover. Its divisiveness is obvious to anyone who reads the newspaper.

Fourth. Making the military more attractive to volunteers should improve its way of life and its efficiency. The military has inevitably grown sloppy in its use of manpower because it has had an unlimited supply.

Fifth. Requiring congressional approval to activate the standby draft might deter a President from hasty deployment of troops. Never again could we have a full-scale war on our hands without some sort of congressional debate and approval.

Of course, an all-volunteer army will initially cost the Federal Government more in the budgetary sense. But I believe the Gates Commission makes a convincing case that the present system's true cost is actually higher.

Besides, there are many places where the military budget could be cut that would easily cover the additional costs of an all-volunteer army.

In summary, I believe the only fair draft is no draft. I intend to vote for the first step toward an all-volunteer army.

PRISONERS OF WAR HELD IN GLOOMY BONDAGE

Mr. HANSEN. Mr. President, the skies over North Vietnam are gray and gloomy with monsoon clouds, the earth underfoot soggy with monsoon rains. No wall, no window, no roof can keep out the all-pervading wetness and heavy heat of the Southeast Asian monsoon. It is a time when spirits are low and grayness seeps into the soul—particularly for those Americans who are held prisoner by the North Vietnamese Communist regime and are not allowed even the faintest glimmer of cheer by being able to communicate with their families.

We who are free here in America must do our utmost to insure every effort is made to alleviate the dreadful conditions under which these Americans exist. We cannot rest in these efforts. We must not allow the prisoners to think we are resting for to do so would be to add to the burden they already bear. We must work diligently to gain their freedom and to assure their families here at home that all is being done that can be done for their men in Vietnam.

Our own freedom must act as a spur to our conscience so that we can do nothing less.

CHIEF JUSTICE WARREN BURGER'S STATE OF THE JUDICIARY MESSAGE

Mr. THURMOND. Chief Justice Warren Burger, in his state of the judiciary message on August 10, 1970, proposed a plan to alleviate the serious problems our Federal court system is now experiencing. He noted that the long period of time it now takes to dispose of a criminal case has resulted in a loss of respect for justice and hence of deterrent power.

The public's faith in the protective function of government has declined to such an extent that the urgency that Chief Justice Burger cites cannot be disputed. Some steps to alleviate this serious problem should be taken by Congress now.

An excellent editorial published in the Augusta (Georgia) Chronicle of Friday, August 14, 1970, outlines Chief Justice Burger's proposals.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

COURT PROPOSALS

The implications of Chief Justice Warren Berger's proposals this week, in his State of the Judiciary message—the first in the Nation's history—could be far-reaching if a serious effort is made to put them into effect.

The urgency he cites cannot be disputed. Federal courts, as he noted, now take twice as long to dispose of a criminal case as they did a decade ago. The result has been, in part, a loss of respect for justice and hence of deterrent power. And, as a consequence of that loss, the public's faith in the protective function of government has declined. One example: Americans now spend $2 billion a year on private protection and crime control to supplement public systems. This auxiliary effort is, of course, legitimate and even essential, but if carried to ultimate lengths the trend could be terrifying for a free society.

In addition to calling for the obviously needed increases in numbers of federal judges and attorneys, Chief Justice Burger suggests:

A state-federal judicial council in each state to iron out joint problems. This could be a time-saver in many ways—for example, in determining in advance matters of jurisdiction.

Cooperation on standards of conduct. We are now, as all know, in a period in which barbaric and anti-social elements are out to disrupt the courts as a first attack on democratic government. A helpful defense will be determination of uniform ways to prevent, with justice and dignity, nauseating spectacles such as those by the "Chicago Seven."

A judiciary council created by the Congress to report on judicial problems. In order to avoid the creation of overlapping and unnecessary governmental machinery, we would suggest with regard to this proposal that instead of a new council, the Congress consider appointment of a joint committee for the purpose, to some degree absorbing the duties of and replacing the present Senate and House Judiciary Committees.

A study of the type of court matters which could more efficiently be handled elsewhere. If this were done, it should be remembered, we would gain not only in efficiency but in a more constitutional government. The Supreme Court has become mired down in acting as a third legislative house, making laws with regard to such things as how individual states should apportion their own legislative bodies. Other matters which would more appropriately be settled in the Congress, or by the states or in the private sector have absorbed the High Court's time—matters such as pollution, urban ills, abortion and consumerism. And the entire federal judiciary has become a sort of super-school board, usurping local functions which would better be performed—as the law provides—by local people who know local conditions.

Reexamination of criminal procedure and the appeals process. By setting up restrictive rules on the handling of criminal cases by local police and state courts—designed to preserve individual rights but often serving to turn loose defendants proved to be guilty, and even confessing their guilt—the ground was laid for fewer pleas of guilty and for a flood tide of appeals. This is an area in which the action must come from the Supreme Court itself, if equitable procedures to protect the public are to be restored.

Insistence on high standards of professional conduct. This applies, of course, to judges themselves. But the most glaring examples calling for correction are actions by some of the defense attorneys representing vandals and anarchists in the courts, who put on disgraceful exhibitions of contempt, bad manners and temper tantrums. This can be taken care of by stiff contempt sentences, and disbarments.

Chief Justice Burger has opened up the possibility of some helpful reforms. We will be interested in seeing how thoroughly they are acted upon by the Nation's attorneys, the Congress and the Supreme Court itself.

PRESERVATION OF THE ENVIRONMENT

Mr. PERCY. Mr. President, I have been disappointed to note that despite the recent flurry of rhetoric and activity concerning the state of our environment, apparently more smoke than fire has been generated within the vital private sector. If this proves true, it hazards grave ramifications. It will mean in the long run that we were content merely to see the problems, but not really to meet them; we were content merely to talk, but not to accept the heavy and difficult mantle of commitment and action; and we were willing to cop out in the face of the urgent mandate to provide for the survival of life as we know it on this planet.

Given the truly critical situation with which we are faced, and given the intensity of recent public debate, one would certainly have expected a significant and immediate increase in activities designed to control pollution. One might have hoped, and with some justification, that every citizen would finally have begun to realize the necessity of personal sacrifices in the fight against pollution and embarked on such a course. And one might have hoped that every businessman would have begun to understand the unavoidable need to balance profits with a concern for the environment, to commit the requisite funds and energy to insure that his business does all it can to preserve an environment capable of supporting life.

Unfortunately, this hoped-for increase in activity and commitment has not yet materialized according to our indicator. A recent newsletter published by the Midwestern Air Pollution Prevention Association reports that total U.S. sales of industrial air pollution control equipment by 29 major manufacturers were up only 2 percent in 1969 over 1968. When these figures are compared to the increase of 3.5 percent in inflation, it is clear that, in effect, sales have actually decreased.

These figures represent, what might be called in pollution jargon, the "gritty-gritty." I certainly hope that future figures will reveal an increase in commitment—financial and philosophical—commensurate with the clearly established needs.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INDUSTRIAL SALES OF MAJOR AIR POLLUTION MANUFACTURERS UP ONLY 2% IN 1969

Total U.S. sales of industrial air pollution control equipment by 29 major manufacturers were up only 2% in 1969 over 1968, according to figures compiled by the Industrial Gas Cleaning Institute, Inc., national trade association for the firms. Total sales in U.S. last year were $94-million, compared with $92-million in 1968, IGCI announced at its annual meeting in Boca Raton, Fla. An additional $9-million sales were reported for Canada last year.

IGCI estimates that member companies now sell about 75% of all the industrial air pollution and dust control equipment purchased in the U.S. Karel A. Weits, newly-elected president of IGCI and vice president of The Ducon Co., Mineola, N.Y., pointed out that these figures represent total sales for industry of the 4 basic types of equipment available for controlling particulate matter: (1) electrostatic precipitators; (2) mechanical collectors; (3) fabric collectors; (4) wet scrubbers; plus several kinds of equipment sold for gaseous control.

The figures do not include any field construction costs associated with the equipment, nor costs of auxiliary equipment such as foundations, ductwork, instrumentation, cooling towers, fans or motors which are often included in gross figures compiled by other sources.

IGCI figures show a total of $70-million sales reported by 17 companies in 1967, and $69-million by 15 companies in 1966. The 2% increase in 1969 probably reflects an actual decrease in hardware sales volume from 1968, when allowance is made for the national 3.5% inflation factor last year.

BREAKDOWN BY EQUIPMENT TYPES

Breakdown of the $94-million U.S. sales in 1969 by equipment types shows: electrostatic precipitators, $34.5-million; fabric collectors, $31-million; wet collectors, $14.3-million; mechanical collectors, $12.2-million; gaseous control, $2.0-million.

The 29 member companies included in the 1969 sales volume report are: American Air Filter Co.; American-Standard Industrial Products Dept.; Arco Industries Corp.; Belco Pollution Control Corp.; Buell Engineering Co.; Buffalo Force Co.; Chemical Construction Corp., Pollution Control Division; Delta P Incorporated; Ducon Co.; Dustex Division, American Precision Industries;

Fisher-Klosterman, Inc.; Fuller Co., Dracco Products; Gallagher-Kaiser Corp.; Kirk & Blum Mfg. Co.; Koppers Co., Metal Products Division; National Dust Collector Corp.; Pangborn Division, Carborundum Co.; Peabody Engineering Corp.; Precipitair Pollution Control, Inc., subsidiary of Advance Ross Corp.; Precipitation Associates of America, Inc.;

Pulverizing Machinery Division, Slick Corp.; Research-Cottrell, Inc.; Schutte and Koerting Co.; Seversky Electronatom Corp.; Torit Corp.; UOP Air Correction Division; Western Precipitation Division, Joy Manufacturing Co.; Wheelabrator Corp.; Zurn Industries, Inc., Air Systems Division.

CHESAPEAKE AND OHIO CANAL NATIONAL HISTORICAL PARK

Mr. MATHIAS. Mr. President, I am pleased to report that public interest in preserving the Chesapeake and Ohio Canal continues to grow. At recent hearings before the House Committee on Interior and Insular Affairs, the Interior Department and a large number of State and local officials, conservation groups, and individuals expressed their support for the creation of a Chesapeake and Ohio Canal National Historical Park. While the testimony reflected some inevitable differences in emphasis, the degree of consensus in favor of this park was rather remarkable.

In a very timely editorial published on Saturday, August 21, the Washington Evening Star reiterated its support for canal legislation to "preserve some of the most endearing remains of the slow-paced old America and provide refreshment for today's hurry-up urban populace." As the sponsor of the bill now pending in the Senate, S. 1859, I certainly share the sense of urgency expressed by the Evening Star.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CANAL PARK

Creation of a lengthy national park along the Chesapeake and Ohio Canal would preserve some of the most endearing remains of the slow-paced Old America and provide refreshment for today's hurry-up urban populace. The park proposal picked up momentum in recent House hearings, where it received strong support, and we hope it will soon win congressional approval.

Advocates of the 184-mile national historic park seem at last to have reached unity on a plan of action. They are backing an Interior Department request for the addition of 15,000 acres to the 5,430 already owned by the government in the canal corridor. Interior also wants to spend $47 million for canal restoration and a variety of family recreation facilities, and some conservationists think that would be too much clutter. But there is almost no prospect of appropriations for that work, and land is the paramount need anyway, as all the park proponents agree.

If the House Committee on Interior and Insular Affairs will issue a favorable report, the land-acquisition phase probably will follow in short order. Senator Mathias of Mary-

land warned the committee in the hearings that the canal strip "could become a sidewalk through a super-metropolis rather than a path through the countryside" if the legislation is delayed much longer. Land prices will burgeon and private developments will close in.

Almost 5.5 million people live within an hour's drive of the park which is visualized, and that total is swelling by the day. They deserve this quiet, shady retreat, for the dissipation of tensions and to retain a feeling of continuity with the people who passed this way before them. There are valuable lessons to be re-learned along the old towpaths.

TOWARD A FUEL CRISIS

Mr. HANSEN. Mr. President, it is unfortunate that events in the Middle East have resulted in what may well be a critical fuel shortage in some parts of the country this coming winter. These events have, however, pointed up the fallacy of Federal policies that have resulted in shortages of natural gas, coal, and fuel oil.

Those who have advocated these policies under the guise of consumer savings have, in fact, played a cruel hoax on the consumer who will now pay higher prices because of these policies.

A number of us in the Senate and House have been attempting for several years to bring this impending fuel shortage and energy crisis into focus and alert the public to the risks involved in "living it up" on cheap gas and what once was, but no longer is, cheap imported oil and oil products such as industrial fuel oil.

Now that the chickens have come home to roost in shortages of these vital energy fuels, the same advocates are searching frantically for a whipping boy and, as usual, blame it on the oil and gas industry.

A former chairman of the Federal Power Commission who advocated ceiling prices for gas producers that were unrealistically low in comparison with competing fuels now accuses the gas producers of holding down drilling for new wells in a pricing dispute.

Others accuse the oil companies of restricting the supply of industrial fuel oil by failing to build additional refining capacity on the east coast.

None of them mention the fact that these Federal policies—ceiling prices and a flood of imported industrial fuel oil, plus the fact that gas and oil exploration, drilling, producing, and distribution costs have skyrocketed like all other costs during the past several years—have caused this crisis.

Nor do they mention the fact that oil, gas and oil product prices have remained remarkably stable during this period in relation to other prices.

They apparently expect the oil and gas industry to do what no other industry is expected to do—continue to produce the abundant energy fuels the Nation has become accustomed to at a loss.

Mr. President, the public has been uninformed and ill informed for too long on this vital matter. I am glad to note that the news media has awakened to the real emergency aspects of the U.S. energy situation. I ask unanimous consent that an excellent article on the fuel crisis, published in the current issue of U.S. News & World Report, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. MOVES TOWARD A FUEL CRISIS

CLEAN ENVIRONMENT VERSUS FUEL FOR HOMES AND INDUSTRY—THE CONFLICT HAS COME TO A HEAD. PROBLEM: HOW TO FIND A SOLUTION BEFORE CRISES HIT

With little advance warning, the U.S. finds itself on the brink of an energy crisis. There are growing shortages of fuels from which energy flows to keep America's machinery humming and provide the base for its high standard of living.

Alarm is spreading at the highest levels in Washington.

The problem goes far beyond finding power to carry Eastern cities through the remaining days of summer heat and smog. Predicted are shortages, now or in the near future, of every basic source of energy—oil, natural gas, coal, hydroelectric power and nuclear power.

President Nixon, on August 6, warned of "the acute shortage of clean fuels for this winter." He directed his Domestic Council to take steps to alleviate this winter's shortages, and "to ensure an adequate fuel supply for the next five years."

On August 10, the Chairman of the Federal Power Commission, John N. Nassikas, reported coal stocks of many power companies supplies "critically short," and the supply of heavy fuel oil for utilities and industries jeopardized by a shortage of oil tankers.

What happened? Only a few months ago, the structure on which the U.S. supply of essential power sources is based seemed relatively secure and stable.

As 1969 ended, there was concern over dwindling U.S. reserves of natural gas, documented in a staff report of the Federal Power Commission. But the supply of crude oil available to the U.S. seemed more than ample. In fact, the majority of a Cabinet task force urged in February, 1970, that oil-import controls be modified to bring more foreign oil into the country and thus lower prices of gasoline and petroleum products.

Now, fast-moving developments have sent the nation's energy-supply structure tumbling. Growing concern over environment is seen by many experts as the main trigger to recent events. Says Charles Primoff, chief of the fuels and energy division of the White House Office of Emergency Preparedness:

"Environment is a principal reason for this sudden plunge into fuel scarcity. Air-pollution regulations, going into effect in many areas, have ruled out high-sulphur fuels—especially coal. Utilities, industries, government installations, office and apartment buildings are trying to switch to natural gas or low-sulphur residual oil.

"Natural-gas supply was already pinched. U.S. refineries for years have been cutting back on production of residual oil because imports made the price unattractive. Then came trouble in the Middle East, forcing more shipment of oil to Europe the long way around Africa. Tanker rates have gone through the roof, and so has the price of imported residual oil.

"Now coal, which could help ease this crisis, has become scarce. New environmental laws have increased strip-mining costs. The Federal Coal Mine Health and Safety Act, effective this year, has pushed up costs in underground mines.

"Some mines have closed, and many more may have to close. Others have been reluctant to expand production because of predictions that nuclear power would take over much of their market. But growth of nuclear power is far behind schedule for many reasons, not the least of which is the problem of locating plants where they will not disturb environment or people."

HIGHER PRICES?

If environment is to be protected and fuel shortages averted in the short and long-range future, energy experts say, consumer costs must rise sharply.

"The days of artificially low energy costs are drawing to a close," says John D. Emerson of the energy-economics division of the Chase Manhattan Bank in New York City. Mr. Emerson puts the situation in this perspective:

"Efforts will undoubtedly be made to protect the homeowner from the impact of the widespread and severe shortages which will develop over the next decade. Their success will vary from region to region. At this stage, it is not possible to be more precise. But one thing is sure: whether efforts are made to increase domestic supplies of suitable fuels for the residential market, or whether the nation will come to rely more on imports of foreign fuels, prices will rise."

A long period in which U.S. consumers have enjoyed a fast-rising supply of energy, at relatively stable costs, appears to be nearing an end.

American homes in 1970 consume more than six times as much electricity as they did in 1950. Use of basic fuels for home heating has increased by 50 percent in the same period.

On August 7, Dr. Paul W. McCracken, Chairman of the President's Council of Economic Advisers, issued an "inflation alert" in which he stated that "an important increase appears to be in progress in energy prices." Dr. McCracken gave this detail:

"Electricity prices have to date moved only slowly. Wholesale electricity prices are up only 1.8 percent in the 12 months ending in June, although this is itself a departure from the stability of earlier years. Wholesale natural-gas prices have increased about 3 percent in the last 12 months.

"These conditions of stability, however, are likely to change. . . . The prices of fossil fuel (coal and oil), which accounts for over three quarters of the production cost to generate electric power, have skyrocketed. Over half of the electric power in the country is generated by burning coal, and utility rates often contain an escalator clause tying the price of power to the price of fuel. . . ."

Dr. McCracken noted that the Tennessee Valley Authority, a public power agency long regarded as a "yardstick" for the power industry, is planning a substantial rate increase.

The higher TVA rates, effective October 1, will boost power costs to consumers in the utility's Southeastern U.S. service area by an estimated 23 percent. The rate boost is attributed by TVA officials to "rapidly rising costs for the coal burned in TVA steam-electric plants."

U.S. demand for energy in the decade 1970 to 1980 is expected to increase by 50 per cent. That forecast comes from the energy-economics division of the Chase Manhattan Bank, which provides this breakdown of present sources of energy:

	Percent
Oil	44.7
Natural gas	31.4
Coal	20.0
Hydropower	3.6
Nuclear power	0.3

All of these five energy sources must be expanded in the decade ahead if Americans continue to live in the style to which they have become accustomed. This look at present prospects and a size-up of possible expansion of each energy source comes from experts in government and industry:

Oil: the big scramble. U.S. demand for oil is tremendous—an average of 14.8 million barrels a day. The system delivering this oil, experts say, had become so strained that recent demand shifts have knocked it out of kilter.

A basic switch, says Richard J. Gonzalez, oil economist and consultant in Houston, Tex., has been to the industrial fuel oil known as "residual" because it is what remains when higher-quality products have been refined from crude petroleum.

A major source has been Venezuela, but much of its petroleum is too high in sulphur to meet U.S. air-pollution regulations. Equipment to remove sulphur from Venezuelan oil is going in, but will not be ready for several months.

A scramble for other sources of residual oil, combined with the tanker shortage, has pushed the average price on the U.S. East Coast to $4 a barrel, more than double that of a year ago.

Meanwhile, demand for all kinds of oil is rising fast. "Allowable" production in Texas, top oil-producing State, was raised August 1 to the highest level in 17 years. Louisiana's production is also at a record high.

Mr. Gonzalez notes that federal-leasing of offshore lands is at a virtual standstill, because of concern over oil spills.

More oil from Canada is a possibility to ease the present crisis, but over the long pull U.S. officials are not counting on large amounts from that country because demand there is rising, too.

Mr. Emerson of the Chase Manhattan Bank says that, at best, the flow of oil from Alaska by the end of this decade will be 2.5 million barrels a day. By that time, he predicts that U.S. demand may be as high as 25 million barrels daily, and as much as 7 million barrels a day will have to be imported from the Middle East and Africa.

Price and supply of Middle East oil, experts note, can change quickly. A few months ago, Persian Gulf oil could be laid down in the U.S. for less than $3 a barrel. Now, because of higher tanker rates, the cost ranges from $4.60 to $4.70 a barrel.

Natural Gas: a squeeze. Gas producers have long maintained that federal regulation had held prices too low to encourage exploration. The Federal Power Commission, since a U.S. Supreme Court decision in 1954, has had authority to regulate wellhead prices of natural gas moving through interstate pipe lines.

Now the FPC is acting to raise price ceilings. Says Chairman Nassikas, who came to the Commission in 1969: "We are attempting . . . to recognize the law of supply and demand and market conditions by taking action . . . to get gas flowing."

Most industry experts are predicting that critical natural-gas shortages will persist, even so. At hearings held in mid-July in New Orleans by the Interior Department on whether to open new areas offshore from Louisiana for oil and gas exploration, Mr. Emerson of Chase Manhattan Bank said:

"The total availability of gas that we can see in 1980 amounts to 63 billion cubic feet a day. Compared to the potential demand of 93 billion cubic feet a day, there is thus a deficit of 30 billion cubic feet a day—equivalant to more than 5 million barrels of oil."

Coal: spot shortages. The Office of Emergency Preparedness estimates total 1970 use of coal at 583 million tons, and production at only 571 million. Above-ground inventories are already shrinking, and spot shortages are showing up.

In early August, according to OEP officials, electric utilities nationally had 50 days' supply on hand. Ninety days' supply is considered normal. Some utilities were reported down to five days' supply and paying "staggering" prices for additional coal.

Bituminous-coal prices, on the average, increased by 35 per cent from June 1969, to June, 1970, according to the "inflation alert" issued by the White House on August 7.

Coal-supply problems have been accentuated by a dearth of railroad coal cars. Railroads have hesitated to order new cars in recent years because official forecasts have indicated that nuclear energy would take over much of coal's market for power generation.

For the long range, U.S. underground reserves of coal are enormous. But mining will have to be expanded and technology developed to remove sulphur from the coal itself and the smoke it produces.

Nuclear power: a shortfall. A comment from FPC Chairman Nassikas:

"The program for installations of nuclear power generation has lagged two or three years behind the predicted level of five years ago. . . ."

A study prepared for the Joint Committee on Atomic Energy of the U.S. Congress shows this: Of the 65 nuclear-power units that had been scheduled to go into service between 1970 and 1976, a total of 23 have already been delayed anywhere from a few months to well over a year.

Mr. Nassikas attributes the lag in development of nuclear energy to "delays in deliveries by major manufacturers of equipment, environmental opposition to proposed sites and technological problems affecting both physical and economic operation."

There is optimism that the present shortfall in nuclear energy can be overcome. Mr. Emerson of Chase Manhattan Bank says that an increase in nuclear-power output to furnish close to 10 per cent of total U.S. energy needs is possible by 1980.

Hydropower: the outlook. Industry experts say that significant amounts of power can be developed from "pump-storage installations." In these, water is pumped up to storage at a site above a river or reservoir at hours when power demand is low. The water is released to generate "peaking" power at hours when electricity demand is greatest.

New designs for pump-storage plants to make them intrude less on the environment have been developed. It is hoped that these will be acceptable to conservationists.

This sort of compromise, along with measures to overcome technical and other problems that beset the energy industry, are seen as essential if U.S. is to meet its soaring needs for energy.

PRAISE OF J. FRED BUZHARDT, JR., GENERAL COUNSEL, DEPARTMENT OF DEFENSE

Mr. THURMOND. Mr. President, last Thursday, August 20, 1970, J. Fred Buzhardt, Jr., of McCormick, S.C., was sworn in as a General Counsel of the Department of Defense by Secretary Melvin Laird.

Those of us in Congress from South Carolina are proud of this young man and are confident that Mr. Buzhardt will render our Nation a great service in this capacity. I take particular pride in this appointment, as Mr. Buzhardt served on my staff in the Senate for some 8 years.

On August 19, 1970, the editors of the State newspaper, Columbia, S.C., published an editorial on Mr. Buzhardt, entitled "A Quiet Man in a Big Job."

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A QUIET MAN IN A BIG JOB

The Nixon administration without a doubt has disappointed many of the South Carolinians who helped put it into office.

But no one in the state can deny that South Carolinians have greater influence in Washington now than at any time in recent history.

There is, of course, no Palmetto State individual in the Executive Department with the stature, prestige and power that James F. Byrnes enjoyed in his heyday.

But South Carolinians, topped by Harry S. Dent of the White House staff, hold positions of importance throughout the Administration. One Washington source alleges that this state ranks third behind California and Illinois in the total number of Administration appointees.

This comes to mind with the elevation of J. Fred Buzhardt Jr. of McCormick to general counsel (chief lawyer) of the vast Department of Defense.

Politicians consider this quite a plum. Every department of the government has a general counsel. The power and prestige of the job is generally what the Secretary chooses to make it.

Based on Defense Secretary Melvin Laird's comments about Buzhardt on the occasion of his appointment, it would seem that he places great confidence in the quiet, hard-nosed South Carolinian.

This feeling is buttressed by that fact that Laird held the job open for Buzhardt for over a year. It will be recalled that Buzhardt was proposed for the job at the outset of the Nixon regime, but flak from integrationists, who remembered Buzhardt as Sen. Strom Thurmond's top aide, forced a change of signals.

Buzhardt was slipped into a double job as Laird's special assistant and staff director of the top-flight committee studying Pentagon operations.

In these roles, to the surprise of no one who knows that competent soldier-lawyer, Buzhardt earned his spurs and silenced his critics to the left.

In his new job Buzhardt apparently will have a role in implementing the controversial recommendations of the reorganization committee. This will be a demanding task, requiring perseverance, tact and salesmanship.

On past performances, Fred Buzhardt is equal to it.

SECOND ANNIVERSARY OF SOVIET INVASION OF CZECHOSLOVAKIA

Mr. ALLOTT. Mr. President, last Friday marked the second anniversary of the Soviet invasion of Czechoslovakia. It is fitting that we all pause and remember the sights and sounds of the Soviet armor rumbling through the streets of Prague, and the mixture of anger and despair on the faces of the people.

The coming of the Soviet tanks did not crush a mighty structure of freedom. There was little enough freedom in Czechoslovakia at the time. It was still a one-party Communist dictatorship. But it was experimenting with some freedoms which might have enabled the nation to become a more open society.

It is evident that the Soviet Union cannot tolerate freedom even in small quantities, and even in neighboring nations. The severity of Soviet repression in Czechoslovakia in the last 24 months has confirmed the fact that the insecure tyrants in the Kremlin are deathly afraid of such slight opposition as is offered by mildly critical newspapers and the free and open discussion of public policy in public places.

The slight freedom enjoyed by Czechoslovaks in the months prior to the Soviet invasion was not the only casualty of that invasion. Here in the United States a theory was destroyed by that invasion. This was the tattered and threadbare

theory that the Soviet Union is mellowing and becoming a congenial member of the community of nations.

It seems inevitable that every time the Soviet Union goes 6 months without committing some especially loathsome act, a minor army of prophets will be ready to fill the quarterlies with essays describing the fundamental changes for the best in the Soviet despotism.

The only good that came from the Soviet invasion was the mortal wounding of the theory about emerging Soviet decency. The invasion of Czechoslovakia was too high a price to pay for that. But if we learn anew the facts about the continuing threat posed by the Soviet Union, then we can truly say the Czechoslovakian struggle for liberty was not in vain.

ALL-VOLUNTEER ARMED FORCE: A FORMULA FOR THE FUTURE

Mr. HANSEN. Mr. President, like many other Senators, I have for a number of years considered the pros and cons of an all-volunteer armed force for the United States. There is much to be said in favor of such a concept, and I believe most of this has been said, repeatedly, over the past 2 years.

In my opinion, the proposal to end the selective service program has been, and is, a nonpartisan issue. There are proponents and opponents to the measure throughout the political spectrum. The Gates Commission, in its report to the President, listed what it recognized as the "main objections" to elimination of the draft.

These were:

(1) an all volunteer force will become isolated from society and threaten civilian control;

(2) isolation and alienation will erode civilian respect for the military and hence dilute its quality;

(3) an all-volunteer force will be all-black or dominated by servicemen from low-income backgrounds;

(4) an all-volunteer force will lead to a decline in patriotism or in popular concern about foreign policy;

(5) an all-volunteer force will encourage military adventurism.

The Commission then set about replying to these objections.

These certainly have not been my objections. I do not believe that any of these consequences would necessarily result from termination of the draft. Neither did the Commission.

But I do believe that many of the Commission's assumptions are open to question because in most cases, they have selected the most favorable aspects of a number of conditions. It has appeared to me that the Commission report has been, rather than a balanced feasibility study of the proposal, a presentation of the favorable evidence for an all-volunteer force such as a defense counsel might present to a jury.

In addition to the defensive nature of the report, this type of presentation was continued by members of the Commission staff at briefings in the Senate Office Building conducted for Members of Congress and their staffs. These Commission staff members remarked several times during at least one of the briefing sessions that those who favor abolition of the draft should not defend the concept, but should endeavor to force those in opposition to the concept to defend their stand against ending the draft. It was difficult to accept these briefing sessions as an unbiased presentation of fact.

Nevertheless, in my view, these briefing sessions provided valuable information, information that should be carefully considered by the Members of the Senate. Dr. Walter Y. Oi, a director of research for the Commission, noted that 44 percent of the Army enlistees would not have volunteered had they not been draft motivated. He said that 30 percent of Marine volunteers would not have enlisted without draft motivation.

It was further pointed out at the briefing that 18 percent of the Army's volunteers currently have infantry assignments. This means, generally speaking, that the other 82 percent of the Army's volunteers serve in areas other than infantry.

There is not much question that, while the infantry is one of the proudest arms of the military forces, the infantry bears the brunt of the dangers of war, the highest casualty rates, and the least pleasant environment as we know conventional warfare.

What these figures bring us to is a "main objection" that the Gates report failed to list, and that is the question as to whether an all-volunteer military force will work, with the vast commitments of the United States today in Indochina and throughout the world, now or in the unforeseen future.

The Association of the United States Army had this to say in a resolution adopted October 15, 1969:

No. 7. ALL-VOLUNTEER ARMY

Throughout the history of the United States, military security has depended upon the willingness of all able-bodied citizens to serve in the armed forces, either as volunteers or through some form of selective service when the necessity has arisen.

It is recognized that the present selective service system has accomplished the following:

(1) Provided sufficient manpower to the active Army to enable it to accomplish the varied and difficult missions with which it has been charged.

(2) Increased the number of voluntary enlistments for longer periods among those who perhaps would not have considered military service had there been no selective service obligation.

(3) Insured the availability of individuals with varied skills and experience vital to the mission of the Army.

(4) Provided a source of trained manpower for Army Reserve and Army National Guard forces and has created a reservoir of battle-experienced citizens who could be counted on in any emergency requiring rapid expansion of the armed forces.

It is recognized that under future circumstances which might place a lower manpower requirement on the Army, an all-volunteer system of service could be practicable and desirable. However, it does not appear that the personnel requirements under present conditions could be maintained through an all-volunteer system. With an all-volunteer Army, it would be essential to provide a back-up of trained reserve elements in larger numbers than now exist to insure an effective force sufficient to meet any national emergency.

We therefore resolve to support the continuation of a selective service system as long as required, to function in concert with a strong volunteer system.

What the Army Association is saying is that the Selective Service System is time tested and proven, in time of actual war, and in time of the continuing cold war, which will not end with American withdrawal from Vietnam, and which will continue to require vast American manpower in uniform.

The Gates Commission staff briefings seemed to indicate that the all-volunteer concept also is time tested in the forces of the United States. They referred to the great success of the Marine Corps which, for the most part, has been an all-volunteer force and certainly has won worldwide recognition for its excellence in combat. But the Marine Corps is an elite force, and it is a relatively small force—normally in time of peace numbering less than 200,000 men and officers—including its air wings and other supporting units.

The Marine Corps, in World War II and in the Vietnam war, nevertheless found it necessary to go to the draft to meet its wartime combat requirements. During the Korean war, the Marine Corps found it necessary to call its civilian reserves to active duty. As pointed out earlier, 30 percent of the marine enlistees in the Vietnam war told the Gates Commission they volunteered to prevent being drafted into another service.

The Commission dwells heavily on increased pay and benefits as an incentive for military volunteers. It is important that the men and women of our Armed Forces receive good salaries and that they be able to support their families and have a standard of living as nearly as possible equal to that of Americans in other endeavors.

I certainly support this.

But I do not believe the main emphasis in seeking men to serve this Nation in its Armed Forces should be upon pay and benefits, but upon the honor of serving their country.

The Marine Corps has had and now has great success as a volunteer fighting force. But the men of the Marine Corps do not receive or have not received extra pay and allowances for the hazardous duty they are called upon to perform. Yet, hundreds of thousands of American men have volunteered for the Marines; not for high pay, but to serve their country.

To consider higher pay as a major incentive for serving this country is, in my view, a mercenary approach. Yet we hear many deploring the use of mercenaries from other nations—mercenaries who likely can be bought at a lower price than could Americans—to wage war.

I support the concept of Americans volunteering to fight for America.

But I respectfully question whether the all-volunteer armed force is really possible, especially with the short-range and long-range military commitments which face the United States today.

The problem, as the figures on the Army's draft-motivated volunteers indicate, is in obtaining combat troops.

The Gates report lumps all of the services together to obtain a favorable

overall percentage of volunteers in the armed services at this time. The combat troop problem has not been isolated. Combat troops are those whose mission it is to close with the enemy in offensive or defensive action and to defeat him on the battlefield and at his field bases. The exposure of these combat men to hardship and to the possibility of being killed, captured, or wounded is far greater than that of others in the armed forces. Except for certain elite units, men less readily volunteer for such direct combat duties.

Mr. President, I support higher pay and benefits for the men of our Armed Forces, but I do not feel the Hatfield-Goldwater amendment to be in the best interest of our national security at this time.

Therefore, I will vote against this proposal, and I urge its defeat.

UNIVERSITY PROFESSORS FOR ACADEMIC ORDER, INC.

Mr. ALLOTT. Mr. President, I invite the attention of the Senate to the formation of a new academic association that deserves the praise and support of us all. This is University Professors for Academic Order, Inc.

I am pleased to be able to share with the Senate the first issue of the organization's newsletter, Universitas. This newsletter contains six interesting items.

First, there is a spirited and learned essay on "The State of American Higher Education," written by Dr. William H. Roberts, professor of international law and relations at the Catholic University of America. I have been fortunate to receive the benefit of Dr. Robert's scholarship and shall soon be sharing with the Senate a memorandum he has prepared on the inadequacies of the so-called Amendment To End the War.

Second, there are excerpts from the Articles of Incorporation of the UPAO.

Third, there is a preliminary program and policy statement setting forth the aims of the UPAO, and it is especially interesting for its comments on the American Association of University Professors.

Fourth, there is a list of State and campus representatives of UPAO. This list is already impressive and, I am sure, will grow. I am pleased to see that Colorado is already well represented.

Fifth, there are excerpts from a lively and altogether splendid letter to the President's Commission on Campus Unrest. I am proud to note that this letter is from Prof. Tyrus Hillway, director of academic development and professor of higher education at the University of Northern Colorado. I applaud the sentiments he expresses, and am only sorry that I cannot agree with his assertion that the Commission on Campus Unrest is an objective commission for which we should be grateful.

Sixth, there is an interesting note from Prof. Fred W. Decker of the meteorology department at Oregon State University.

Mr. President, so that all Senators may enjoy the evidence of academic moderation, I ask unanimous consent that these items from Universitas be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

THE STATE OF AMERICAN HIGHER EDUCATION

(By William H. Roberts)

Judge Learned Hand once said that our courts cannot be better than our judges are. A similar statement can be made, and probably with even greater justification, in regard to our colleges and universities. In the course of the last years, headlines referring to campus unrest and student revolutions have become daily routine. However, the curiously similar patterns of student unrest in all Western countries give rise to the legitimate query, whether it is, in fact, as frequently urged upon us, only a reaction to national policies—foreign or otherwise—or just a symptom of the social environment of the late 1960's and early 1970's. Clearly, the leadership groups of the various national student movements seem to have taken upon themselves the apostolate of the ideology of the "New Left." These leadership groups are well endowed with travel funds to meet together, nationally and internationally, and thus to concert their policies.

However, we have to ask ourselves whether this revolutionary unrest has not deeper roots, and whether it could have reached its present dimensions if the universities and colleges had actually played their organic role in society. With Judge Hand, we believe that our institutions of higher education cannot be better than their faculties and administrators. It is they, who in view of their relatively long-term connection with the institutions, exercise a by far greater influence than the coming and going student body.

It is the deep-seated anomie of a wide sector of faculty members and of their representative organizations, which, in fact, makes the revolutionary student unrest possible, if it is not actually, however timidly, tacitly or nefariously, engendered by it.

In 1927 Jules Benda wrote his *La Trahison des Clerks* which has been clumsily translated as The Betrayal of the Intellectuals.

In his introduction to the translation Herbert Read stated that Benda's "clerk" was the "distinguished thinker—the man who pursues knowledge oblivious of the social and economic tendencies of the time. . . . Now M. Benda's charge is that the clerks of today, almost without exception and whatever their standing, have betrayed the cause of speculative thought of the interests of political passion." Read summarized correctly Benda's charges when he said that "Instead of humanism, which is an intellectual concept . . . they substitute a sentimental humanitarianism. . . . Instead of leading the mob, they follow the mob; they adopt the politics of the mob and sanctify them—give them an intellectual gloss." This is exactly the position which has been taken by many members of our college and university faculties in the course of the last decades.

It is imperative to raise the question whether the American universities and the academic profession can live up to the aims and goals of higher education in the environment of a permissive society. For centuries, the purpose of higher education has essentially been that of handing down our heritage to younger generations and of making new contributions to that heritage. Similarly, it was understood that professional or vocational training had to rest on a firm foundation of sound, general education if the advanced training was to produce more than men who came to know increasingly more about progressively shrinking slithers of knowledge. As the scope of their knowledge shrank, it became progressively more meaningless not only to them but also to those who did not happen to master the rarefied techniques necessary for the manipulation of these disjointed particles of knowledge. The balance shifted from a process of education to a mere learning of techniques. In the former, the educator fulfilled an essential and organic task. In the latter, the educator has become but a necessary evil that supervises the "learning" of the student. The teachers have disappeared from our classrooms and have yielded their places to petty bureaucrats. The students have been left to face their intellectual growing pains without the guidance of the educator in the past. Small wonder that the student came to dislike and to distrust the classroom bureaucrat who more often than not delegated his rather degrading task to graduate assistants and instructors. The actual professional life of the educator-bureaucrat is now lived in the never-ceasing battle to solicit ever more money for ever less meaningful "research projects." Frequently, the educator-bureaucrat does not even bother to do or to direct the research himself

This trend has been reinforced by the increasing tendency to consider colleges and universities as mass-education institutions and to use, therefore, mass-learning techniques. The transfer of the cultural heritage and, at a later point of the educational process, specialization within the framework of that heritage, has given way to the mere learning of essentially vocational or professional methodologies and techniques. The institutions of higher education and the academic profession found themselves and, indeed, find themselves increasingly confronted with a crisis in which they are about to lose the organic place which they had occupied in society for centuries.

The anomie and atomization of modern society have been assisted by the breakdown of the inner structure of higher education. In turn, the purveyors of the "multiversity" and of the "meritocracy" repayed their debt to modern society by accelerating the trend leading toward cultural nihilism. "Permissive" society has declined any responsibility and has shown neither interest nor understanding for the organic processes of higher education. The impact of this rapidly moving process on faculties and students alike has been disastrous. The student who had been abandoned and betrayed by the members of the academic and bureaucratic meritocracy came to understand intuitively that a power vacuum had come into existence. This vacuum the students have tried to fill in the face of disinterested faculties and academic administrators who consider it their job to run institutions, i.e., students and the more serious faculty members whose principal commitment is to the university rather than to foundations or professional organizations, as efficiently as possible. Clearly, administrative efficiency as the highest value has led to impersonal learning and an administrative structure which the students came to resent. It is necessary to point out that this resentment has been kindled and supported by forces which seem to have a vested interest in doing away with the very pillars of an organically integrated society. It was a Dutch Communist—incidentally, a university professor—who wrote several years before the First World War that the safest and quickest way to destroy society and to reshape it was the destruction of the educational process from within.

In the face of student resentment, the bureaucratic meritocracy and the academic administrators have all too frequently attempted to "alibi" themselves by, at best, permissiveness; at worst, by not only embracing the symbols but by providing the leadership in the wave of resentment which they themselves had triggered.

Many of these faculty members are "alumni" of the "Post-Huron Statement" period and were at one or the other time active SDS members. The later middle-age and

older groups of faculty members, as many of them frankly admit, have never overcome the trauma and deprivations of the great depression. The very inability to transcend their early experience, points to their emotional instability which, in turn, made them respond, behind the screen of various rationalizations, to the present ideologies and movements which, at best, tend to emphasize the weaknesses and to de-emphasize the inner strengths of American society.

Already in 1956, William Whyte in his now classic book on *The Organization Man* pointed out that the ethics of personal responsibility had been replaced by administrative and research team-work which lowers the level of personal responsibility to the point of disavowing it. Similarly, the "new American academic mandarins" are responsible for the steady decline of the most essential type of research, basic research, which—in the sciences and arts (including the humanities and social sciences)—is fundamentally a highly individualistic venture. Such research is directly and indirectly, e.g., by economic sanctions, discouraged and replaced by grandiose and costly projects whose budgets, similar to those of the universities and colleges, are inflated by the inordinate cost of an administrative superstructure which is disproportionate to the educational and research input and output. When in 1954 the Reece Committee of the House of Representatives filed its Report (83rd Cong., 2nd Sess., House Report No. 2681) it said: "The bureaucrats of the foundations have become a powerful group indeed. Not only do they determine grants and grantees, but they exert an influence on academic life second to no other group in our society." Today this statement has to be supplemented by adding to it the members of the academic and research bureaucracy. This is not to underestimate the national need for, and the great importance of, well-founded team research but only to point out its excesses which tend to destroy the very roots of American higher education. These excesses have also an entropic and erosive effect on the vitality of individual research which provides the very life springs of team-research.

The repercussions of all these developments are so closely linked to questions of the future shape and the very existence of this nation that the repeated attempts which have been made to present them either as isolated phenomena, or as reactions to this or that foreign or domestic policy, are completely misleading. The words of Werner Jaeger in his *Paideia: The Ideals of Greek Culture* apply to us as much as they applied to ancient Greece: " . . . education in any human community . . . is the direct expression of its active awareness of a *standard*" (Jaeger's emphasis). Jaeger might well have referred to the academic situation in our universities and colleges when he said that ". . . the regime was indirectly threatened by the frankly naturalistic tone of this Sophistic philosophy, which by rigid application of its own standard to all human life was undermining the authority of the existing moral code."

The faculty members and research associates of our universities who do not subscribe to the dogmas on which the bureaucratic meritocracy insists, have found themselves increasingly isolated, harrassed, economically disadvantaged, and endangered by possible denial of tenure and promotion. Unfortunately, AAUP which has been widely accepted as the organization which represents the interests of the academic profession has been increasingly influenced by the educational and research ideology pervading the new "spirit" of academia. Since AAUP has been mainly concerned of definite and generally accepted standards—has been completely controlled by the ideologies of those who wield the controlling influence on the campuses of the nation today. This fact has also found expression in uncalled-for AAUP statements on various non-academic issues.

In the face of this situation, has the time not come to bring to an end our enforced isolation, and to pool our moral and intellectual resources in the interest of the real values of higher education and research, which provide the backbone of the Republic, as well as in the interest of our self-preservation and protection?

EXCERPTS FROM THE ARTICLES OF INCORPORATION OF UNIVERSITY PROFESSORS FOR ACADEMIC ORDER, INC.

Third. The purposes for which the corporation is organized are:

1. To advance the legitimate ideals of the University within the framework of the Constitutional and ethical values upon which our government and social order have been founded.

2. To preserve and advance the ideals of the academic profession by furthering the cause of academic freedom for all teachers in all institutions of higher learning.

3. To promote scholastic excellence among teachers and research scholars at universities and colleges and research institutions of similar grade.

4. To facilitate effective, collegial cooperation among scholars of colleges, universities and related professional schools and research institutions.

PRELIMINARY PROGRAM AND POLICY STATEMENT ADOPTED BY THE BOARD OF DIRECTORS, UNIVERSITY PROFESSORS FOR ACADEMIC ORDER, INC., ON JULY 19, 1970

I. UPAO AND OTHER ACADEMIC PROFESSIONAL ORGANIZATIONS

"University Centers for Rational Alternatives" (UCRA) is basically interested in and committed to a discussion of the three principles stated in *Measure* (UCRA's publication). UCRA is not a centralized organization, but depends on individual campus organizations which address themselves on the basis of UCRA principles to specific problems of their respective institutions.

"The American Association of University Professors' (AAUP) is a policy-making and rule-enforcing (protective) organization which, though it has campus chapters, operates essentially through a national organization. Policy-making and protection lie in the hands of about twenty committees.

"University Professors for Academic Order" (UPAO) is intended to be a policy-making and rule-enforcing (protective) organization for members of the academic profession who feel, that, in fact, their professional and philosophical interests are not represented by AAUP.

In its first years, UPAO will not need the elaborate AAUP committee structure. UPAO can, for the time being, omit some of these committees which AAUP has set up. For its organizational purposes, UPAO will initially limit the number of its committees by assigning to each committee tasks handled by several AAUP committees.

II. INITIAL PROGRAM OF UPAO

1. Sustained and funded membership drive continuing through state (regional) and campus (local) organizations as soon as they are established. The goal should be at least 1500 members by the end of 1970.

2. Visits by UPAO's president to establish personal contact with provisional state (regional) and campus (local) representatives and members.

3. Convocation of a national meeting of State (regional) and campus (local) representatives in Washington, D.C., preferably on January 30–31, 1971, which will elect a Board of Directors. Suggested: National Chairman, Secretary, Treasurer, one or two permanent delegates from each region and the committee chairmen.

III. INITIAL COMMITTEE STRUCTURE OF UPAO

1. Executive Committee.
2. Committee on Policy Statements on Academic Issues (has no counterpart in AAUP).
3. Committee on Membership and Dues.
4. Committee on Representation of Professional and Economic Interests.
5. Committee on College and University Government.
6. Committee on Accreditation of Colleges and Universities.
7. Committee on College and University Teaching, Research, and Publications.
8. Committee on Relationships of Education to Federal and State Governments.
9. Committee on Academic Freedom and Tenure.
10. Committee on Chapters and Conferences.

IV. GENERAL POLICY STATEMENT

UPAO members will work for the realization of the following objectives:

1. To give UPAO members the opportunity to promote policies on academic issues which aim to recover for higher education and the academic profession their organic place and functions in an American society whose public life is governed by and organized in accordance with the Constitutional and ethical values upon which this nation's social and governmental order have been founded; and

2. To protect members of the academic profession from academic, professional and economic harrassment and from infringements upon their academic and civic rights.

STATE AND CAMPUS REPRESENTATIVES AS OF JULY 31, 1970

STATE REPRESENTATIVES

Colorado

Professor William C. Stickler, Department of Chemistry, University of Denver, Denver, Colorado 80210.

Missouri

Professor Jerzy Hauptmann, Department of Political Science, Park College, Parkville, Missouri 64152.

Oregon

Professor Fred W. Decker, Department of Meteorology, Oregon State University, Corvallis, Oregon 97331.

CAMPUS REPRESENTATIVES

Arkansas

Professor George P. Smith II, School of Law, University of Arkansas, Fayetteville, Arkansas.

California

Professor William H. Haeuser, Jr., Department of Business, Yuba College, Marysville, California 95901.

Professor Carl A. Thomas, Department of Theatrical Arts, Sacramento State College, Sacramento, California 95819.

Colorado

Professor Wladislaw Cieslewicz, Department of Economics, Colorado School of Mines, Golden, Colorado 80401.

Professor Roy Colby, Department of Modern Languages, University of Northern Colorado, Greeley, Colorado 80631.

Professor John Greenway, Department of Anthropology, University of Colorado, Boulder, Colorado 80302.

Professor Libor Brom, Department of Modern Languages, University of Denver, Denver, Colorado 80201.

Illinois

Professor Patrick Tarrant, Department of Foreign Languages, Illinois State University, Normal, Illinois 61761.

Professor Paul Warren Allen, Director, School of Music, North Central College, Naperville, Illinois 60540.

Kentucky

Professor R. M. Longyear, Department of Musicology, University of Kentucky, Lexington, Kentucky 40506.

Michigan

Professor John A. Clark, Department of Mechanical Engineering, University of Michigan, Ann Arbor, Michigan 48823.

Professor Allan Spitz, James Madison College Department of Political Science, Michigan State University, East Lansing, Michigan 48823.

Minnesota

Professor Mark Graubard, Director, National Science Program, University of Minnesota, Minneapolis, Minnesota 55455.

New Jersey

Dean Heinz Mackensen, The University Evening Division, Fairleigh Dickinson University, Rutherford, New Jersey 08028.

Professor George Geng, Department of Psychology, Glassboro State College, Glassboro, New Jersey 08028.

New York

Professor Sandor Balogh, Department of Political Science, Hudson Valley Community College, Troy, New York 12180.

Professor Yolanda Ortal, Department of Modern Languages, College of St. Rose, Albany, New York

Professor Anthony T. Bouscaren, Department of Political Science, LeMoyne College, Syracuse, New York.

North Carolina

Professor Robert C. Lamb, Department of Chemistry, East Carolina University, Greenville, North Carolina 27834.

Ohio

Professor Stephen T. Bihari, Department of Modern Languages, Ashland College, Ashland, Ohio 44304.

Professor Nathan F. Cardarelli, Division of Engineering & Science, University of Akron, Akron, Ohio 44304.

Professor William O. Swan, Department of Education, Youngstown State University, Youngstown, Ohio 44511.

Oregon

Professor Olaf Boedtker, Oregon State University, Corvallis, Oregon 97331.

Washington

Professor Rev. Robert Bradley, S. J., Dean, College of Arts & Sciences, Seattle University, Seattle, Washington 98122.

Professor Gary L. Peterson, Department of Speech, University of Puget Sound, Tacoma, Washington 98416.

Virginia

Professor Henry A. Myers, Department of Political Science, Madison College, Harrisonburg, Virginia 22801.

Richard O'Keeffe, Librarian, George Mason College of the University of Virginia, Fairfax, Virginia 22040.

West Virginia

Professor Dan C. Heldman, Department of Political Science Marshall University, Huntington, West Virginia.

Professor James B. Hickman, Department of Chemistry, University of West Virginia, Morgantown, West Virginia 26505.

OUR MEMBERS WRITE

Professor Tyrus Hillway, Director of Academic Development and Professor of High Education at the University of Northern Colorado, wrote to the Honorable William W. Scranton, Chairman of the President's Commission on Campus Unrest and with his permission, we reproduce some of the pertinent passages of the letter:

"Many of us in the academic community are extremely grateful to President Nixon for appointing an objective commission for the study of campus unrest and to the members of the commission for being willing to undertake so awesome a task . . . The only thing really clear is the fact that, had we educators been willing to stand firm in defending the democratic and academic principles we profess, unrest would have never assumed its present proportions of violence . . ."

Professor Hillway's letter then proceeds with analyzing student unrest and its characteristics and then proceeds:

"5. *Encouragement of protest by some faculty members:* In the nineteen sixties American higher education went through an era of massive growth unprecedented in our history. To accommodate the huge numbers of new students entering during those years, universities hired thousands of new teachers. Because of the demand, hiring standards inevitably fell. Persons with the shakiest of credentials were appointed to faculty positions. It is an open secret that about a third of those recruited to teach in our universities during the sixties were poorly qualified. But classes had to be met.

"The natural frustrations of misfit faculty members have been reflected not only in their effect upon student attitudes—since they encouraged the students to participate in their own resentments, but also in the tendency to perpetuate mediocrity and a hostility toward high intellectual achievement. The goal of many of these poor teachers, unable to compete on any other terms, became popularity; and the cheapest way to popularity, as every teacher knows, is to support student movements. The real motive in most cases, however, is to strike back at an institution and a society which have shown up the inadequate teacher for what he is . . ."

The letter continues with an analysis of the role of outsiders and the news media in campus unrest and goes on:

"8. *The development of distrust in our government.* It has become popular among our citizens to say that nobody in government can be believed. This used to be a kind of joke inspired by the excesses of certain politicians during their election campaigns. It is no longer stated as a joke. Even when the facts can be vertified, as when an Italian Communist newspaper published the official casualty figures from North Vietnam and they agreed substantially with enemy casualty figures issued by the United States armed forces, there has been a growing tendency to ignore or even flatly deny everything emanating from an official agency.

"Cynicism regarding the pronouncements of our own government would not be so dangerous if it were not accompanied by a rather simple-minded willingness to accept without challenge the propaganda statements of some clearly untrustworthy foreign governments. Misstatements I heard broadcast from Iron Curtain radio stations, which are under strict political control, as part of a propaganda campaign many months ago I now hear circulating in this country as undisputed fact. How could this come about? It is hardly logical, when the choice is offered, for an American to accept the word of those whom history has proved not only flagrantly dishonest, but rapacious for self-aggrandizement in preference to reports of our own government. Some consideration might well be given to possible remedies for this absurd condition which has a direct bearing on campus unrest."

Professor Fred W. Decker of the Meteorology Department of Oregon State University at Corvallis analyzed norms by which colleges could be classified as succeeding or declining as a result of the present crisis and came to the following conclusions:

"Violence, arson, commotion and money-squeeze have increasingly imperiled many colleges. Now, the past Spring 1970 chaos on the campus has evoked a sweeping public backlash threatening early curtailment of many colleges and universities . . . Will the survival of the fittest actually work, or will disaster fall on the fit and the unfit schools indiscriminately? Modern society needs the good colleges and universities to propagate Western Civilization. Still, freedom loses to slavery if campus sanctuaries produce more 'Doctor' Fidel Castro types . . . Distinguishing the fit from the unfit will pose a knotty problem for students, faculty and supporters. They need factual data such as these:

"1. How many classes did each college lose last year?

"2. What prospects exist for continuous instruction next year?

"3. How effectively did each college cope with campus chaos?

"4. Does each college have clear objectives and adhere to them?

"5. Does a wide spectrum of faculty viewpoint produce objective handling of such subjects as economics, political science, history, sociology and philosophy?

"Published ratings on these questions as researched by a fact-gathering academic body would help focus the backlash positively. This could ensure upbuilding the fit schools and reduce the waste of personal and material resources of colleges already doomed by inept leadership and by entrenchment of the anti-intellectual barbarians."

DEATH OF IRVING JAY FAIN OF PROVIDENCE

Mr. PELL. Mr. President, Scarcely ever have I been at a funeral service of a private citizen that was as moving and simple and broadly attended by the people and leaders of our State as was that today of Irving Jay Fain at Temple Beth-El in Providence. The reason was the character and contributions to our community of the truly good and fine man we were mourning.

Graduated from Harvard in 1927 and an Army officer in World War II, Irving Fain had through his whole adult life followed a course of total commitment to the causes in which he believed—be it the domestic cause of fair housing for Negroes or the world problem of peace. Irving Fain fought and pressed for what he considered right. Rabbi William Braude's eloquent eulogy and tribute to him reached the hearts of all of us there.

AMENDMENT TO END THE WAR: CASUALTY AND COST PROJECTIONS FOR DIFFERENT VIETNAM WITHDRAWAL PLANS

Mr. HATFIELD. Mr. President, I should like to present the fourth in a series of articles pertaining to various aspects of the amendment to end the war. The article, entitled "Casualty and Cost Projections for Different Vietnam Withdrawal Plans," written for the Congress of Young Professionals for Political Action by Arnold M. Kuzmack. Mr. Kuzmack is a former staff member of the Office of the Assistant Secretary of Defense—systems analysis—and is well within his realm of expertise in discussing the important issues of his research paper.

In our consideration of our future policy in Vietnam, it is essential to know the consequences and implications, particularly in terms of lives as well as financial resources of whatever course we choose to follow.

I found Mr. Kuzmack's article a valuable contribution to comparative knowl-

edge on the costs and casualties entailed in various withdrawal plans and future policies in Indochina, and would like to share this research with Senators. The article directs attention to vital areas to be discussed in the forthcoming debate on American involvement in Indochina: I would hope that Senators would take a few moments to study this paper. I therefore ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CASUALTY AND COST PROJECTIONS FOR DIFFERENT VIETNAM WITHDRAWAL PLANS

(By Arnold M. Kuzmack)

This paper presents estimates of the U.S. casualties and budget costs that would result over the next five years from five possible Vietnam withdrawal plans. The first is the plan in the McGovern-Hatfield Amendment. Since the Administration has not indicated what its plans are, other possibilities are considered, ranging from a continuation of the current withdrawal rate through maintenance of over 200,000 U.S. troops in Vietnam through 1975.

The casualty estimates are based on two key assumptions: (1) that U.S. casualties will be proportional to the number of U.S. troops in Vietnam, and (2) that the fractional casualty rate (casualties per American in Vietnam) will be the same as for the first three quarters of FY 1970 (a period of low activity rates before the Cambodian operation). Either of these assumptions might be false. For example, more U.S. casualties than predicted in this paper would occur if:

(1) U.S. forces increased their activity rates or if;

(2) Enemy attacks tended to be more successful because the remaining U.S. forces were largely support forces dependent upon the South Vietnam Army for their protection, or if;

(3) The enemy attempted to keep the number of attacks on U.S. forces at a constant level. (By and large the key assumptions imply that the enemy reduces the number of attacks on U.S. forces in proportion to the U.S. forces withdrawn).

Uncertainties such as those indicated above make casualty estimates very rough and often little more than an indication of the appropriate order of magnitude.

The cost estimates are developed by extrapolation of the official Defense Department estimates of the incremental cost of the war in FY 1969 and 1970, as presented by the Assistant Secretary of Defense (Comptroller), Robert C. Moot, to the House Appropriations Committee on March 3, 1970. The uncertainties in the original estimates and the method of extrapolation are such that errors as high as $1–2 billior cannot be ruled out.

The estimates are presented in constant FY 1971 dollars, with no attempt being made to estimate inflation beyond that point. They should be compared with incremental outlays for the war of $21.5 billion in FY 1969 and $17.4 billion in FY 1970 (current dollars).

Further details on methodology may be found in the Appendix.

SUMMARY TABLE

	Cost (dollars in billions)		Killed in action		Total casualties	
	Total cost, fiscal year 1971–75	Increase over col. 1	Total deaths, fiscal year 1971–75	Increase over col. 1	Total, fiscal year 1971–75	Increase over col. 1
Case 1: McGovern-Hatfield plan	11.5		2,500		22,600	
Case 2: Current withdrawal rate, out by early fiscal year 1973	19.7	8.2	5,400	2,900	47,900	25,300
Case 3: Current rate, residual force of 50,000 men	25.7	14.2	7,400	4,900	65,450	42,850
Case 4: Withdrawal delayed in fiscal year 1972, residual force of 50,000 men	31.5	20.0	9,500	7,000	84,000	61,400
Case 5: Continuing force of over 200,000 men	46.4	34.9	14,700	12,200	130,300	107,700

CASE 1: M'GOVERN-HATFIELD AMENDMENT PLAN

Under this plan, all U.S. troops would be withdrawn from Vietnam by the end of FY 1971, i.e., by 1 July 1971. No attempt is made to show the effect of avoiding "offensive" operations after December 1970, as the amendment requires, and it is doubtful there would be much effect. Beginning with FY 1972, $1.0 billion per year in military aid is provided.

The year-by-year effects of this plan are shown below:

	Fiscal year—				
	1971	1972	1973	1974	1975
End fiscal year troop level (thousands)					
U.S. casualties:					
Killed in action	2,500				
Wounded in action	20,100				
Total	22,600				
Budget outlays (billions)	$7.5	$1	$1	$1	$1

CASE 2: CURRENT WITHDRAWAL RATE CONTINUED

Under this plan, the current withdrawal rate of 50,000 men per quarter would continue until none are left in early FY 1973. Beginning with FY 1972, $1.0 billion per year in military aid is provided.

	Fiscal year—				
	1971	1972	1973	1974	1975
End fiscal year troop level (thousands)	223	23			
U.S. casualties:					
Killed in action	3,900	1,500			
Wounded in action	30,800	11,700			
Total	34,700	13,200			
Budget outlays (billions)	$11.2	$5.4	$1.1	$1	$1

CASE 3: CURRENT WITHDRAWAL RATE CONTINUED, RESIDUAL FORCE

This is the same as Case 2, except that troop levels do not fall below 50,000 men in Vietnam.

	Fiscal year—				
	1971	1972	1973	1974	1975
End fiscal year troop level (thousands)	223	50	50	50	50
U.S. casualties:					
Killed in action	3,900	1,700	600	600	600
Wounded in action	30,800	13,000	4,750	4,750	4,750
Total	34,700	14,700	5,350	5,350	5,350
Budget outlays (billions)	$11.2	$5.5	$3	$3	$3

CASE 4: WITHDRAWALS DELAYED IN FY 1972, RESIDUAL FORCE

Under this plan, troop levels remain constant in FY 1972, to provide support for the developing South Vietnamese armed forces. Withdrawals at the rate of 50,000 men per quarter resume in FY 1973 until the level of 50,000 is reached. Beginning with FY 1972, $1.0 billion per year in military aid is provided.

	Fiscal year				
	1971	1972	1973	1974	1975
End fiscal year troop level (thousands)	223	223	50	50	50
U.S. casualties:					
Killed in action	3,900	2,700	1,700	600	600
Wounded in action	30,800	21,200	13,000	4,750	4,750
Total	34,700	23,900	14,700	5,350	5,350
Budget outlays (billions)	$11.2	$8.8	$5.5	$3	$3

CASE 5: CONTINUING FORCE OF OVER 200,000 MEN

Under this alternative, a force level of about 223,000 men is reached by June 1971, and is maintained through FY 1975.

	Fiscal year				
	1971	1972	1973	1974	1975
End fiscal year troop level (thousands)	223	223	223	223	223
U.S. casualties:					
Killed in action	3,900	2,700	2,700	2,700	2,700
Wounded in action	30,800	21,200	21,200	21,200	21,200
Total	34,700	23,900	23,900	23,900	23,900
Budget outlays (billions)	$11.2	$8.8	$8.8	$8.8	$8.8

APPENDIX: METHODOLOGY

Casualty methodology

Casualty projections were derived as follows. U.S. troops provided about 537,000 man-years in South Vietnam in FY 1969 and 486,000 man-years (annual rate) for the first 9 months of FY 1970. Actual numbers of casualties and rates per 1,000 man-years are shown in the following table.

	Total number (rate per 1,000 man-years)	
	Fiscal year 1969	Fiscal year 1970 (9 months)
Killed in action	11,340 (21)	4,252 (12)
Wounded in action	67,391 (125)	34,594 (95)

The FY 1970 casualty rates are then applied to the number of man-years in South Vietnam that would obtain for the alternative considered.

Cost methodology

Costs are computed by associating Military Personnel (MilPers), Operations and Maintenance (O&M), and Procurement outlays for the war with the number of man-years in-country (MYIC) in South Vietnam. The calculations proceed as follows:

1. Official Defense Department estimates of the incremental costs of the war in FY 1969 and 1970 are shown in the next table. Figures for FY 1971 are not given in order to keep the President's assumed withdrawal rate secret. The figures shown are outlays in millions of current dollars.

	Fiscal year	
	1969	1970
Military personnel	$5,666	$5,375
O. & M.	6,488	5,438
Procurement	8,757	6,283
R.D.T. & E.	139	112
Military construction	494	220
Total	21,544	17,428

2. Incremental military personnel for the war can be estimated at about 950,000 men, consisting of 830,000 actual increase in end strength and about 120,000 made available by the civilian/military substitution program, as of end FY 1969. For FY 1969, this results in a Mil Pers cost of about $6,000 per man-year and 1.77 man-years per MYIC (the excess being in support functions outside Vietnam and in the training pipeline).

3. Assuming inflation in Mil Pers costs of 10% between FY 1969 and 1970 (consistent with Mr. Moot's figures) and 6% between FY 1970 and 1971 (reflecting recent pay raise decisions), we will have a Mil Pers cost per man-year of $6,600 in FY 1970 and $7,000 in FY 1971. This results in 1.73 man-years per MYIC in FY 1970, since there will be about 470,000 MYIC in FY 1970.

4. We assume that in FY 1971 and later years, the ratio can be reduced to 1.65 man-years per MYIC, reflecting the ability to reduce the training pipeline ahead of force level reductions. This results in Mil Pers outlays of about $11,500 per MYIC in FY 1971 and later years.

5. Mr. Moot's figures imply O&M outlays per MYIC of about $12,000 in FY 1969 and $11,500 in FY 1970. The trend is projected to $11,000 in FY 1971, and later years. Similarly, they imply Procurement outlays per MYIC of about $16,300 in FY 1969 and $13,300 in FY 1970, which we project to $11,000 in FY 1971 and later years. These calculations result in a variable cost of $33,500 per MYIC in FY 1971 and later years.

6. In addition, RDT&E and Military Construction are assumed to continue at their FY 1970 rate as long as large numbers of U.S. troops remain in Vietnam. Outlays for military aid to South Vietnam are taken at $0.1 billion in FY 1971, and $1.0 billion in FY 1972 and later.

SOME POINTS ON GEOPOLITICS

Mr. ALLOTT. Mr. President, Prof. Stefan Possony, director of the international studies program at the Hoover Institute on War, Revolution, and Peace at Stanford University, has kindly prepared for me a series of memorandums setting forth his views on various aspects of the most vexing international problems facing this Nation.

So that all Senators may be exposed to Professor Possony's thinking, I ask unanimous consent that two of his memorandums be printed in the RECORD.

There being no objection, the memorandums were ordered to be printed in the RECORD, as follows:

SOME POINTS ON GEOPOLITICS

A great deal of confusion has been created by geopoliticians who have been talking about so-called heartlands the possession of which, as they see it, provides control over far larger areas. Sir Halford MacKinder was talking of a heartland where the fate of the entire world has been customarily decided. He was sure that this heartland is somewhere in the plains which connect Europe with Asia, but he was mercifully vague and inconsistent about precise locations.

This theory stood in contradiction to that of Admiral Mahan who regarded the sea as the dominant geographic element. Others viewed primary industrial areas, such as the Ruhr, the Midlands, or Manchuria, as heartlands in the industrial age and it is this theory which unconsciously influences thinking about the importance or non-importance of Vietnam.

The logic is, essentially, that Vietnam does not have the potential for heavy industry, so it makes no difference who has the place. If the country remains divided, no one benefits from any advantage, and if it is united, the side which influences or controls it, does not gain, while the side which "loses", experiences no loss.

This theory is unconvincing because it fails to account for economic development and for "valueless" locations like Switzerland or Hong Kong. Moreover, power struggles are dynamic. *The importance of a given territory depends on where the fields of the competing forces intersect. Therefore, importance varies with time, the line-ups of international conflict, technology, and trade patterns, etc.* For example, during the 18th century, the Caribbean was considered to be of the greatest economic importance: it produced the world's sugar. Canada was regarded as useless because its climate was unmanageable.

No one has really stated that Vietnam has *no* strategic value but it is quite true that the geopolitics of the area have not been worked out. Nevertheless, history happens to be a rather good guide. Vietnam and the rest of Indochina have been the zone where the cultural and political orbits of India and China were intersecting and for which European imperialisms were heavily competing. The waters of Southeast Asia are one of the foremost maritime crossroads of the world.

During the 20th century the area proved to be a key to southern China which in turn, for the approaches from the western world, as well as for political development, has shown itself to be the key to China as a whole.[1]

The fact is that the United States did not seek any involvement in Southeast Asia but gradually was forced into the region. In 1941, President Roosevelt decided on economic sanctions when the Japanese entered Indochina. This last-ditch decision led to Pearl Harbor. By the end of World War II, the U.S. was heavily involved in Indochina and—inadvertently—facilitated Ho Chi Minh's road to power. When the French resumed control, we got out and decided not to support a decaying colonial structure; but we ended up helping the French against the communist offensive which followed in the wake of Mao's seizure of China and the armistice in Korea.

We decided, in 1954, against intervening militarily to save Dien Bien Phu but we did support South Vietnam economically and with some military assistance under President Eisenhower. President Kennedy stepped up help. President Johnson finally saw himself compelled to intervene in full force.

The point of this story is that no less than six American Presidents' every one of whom was opposed to an American involvement in Indochina, got drawn into the area—six American Presidents saw no alternative.

The Indochinese war has lasted for about thirty years, with different belligerents and changing meanings, and the conflict has gradually grown more serious. Some of the local guerrilla operations may not be important and most of them move slowly, but the duration of the crisis is not an accident. It is apparent that the conflict will continue as long as there is no re-orientation or no political change at Hanoi; and possibly at Peking.

It has become quite clear that the area is strategically important to China, the USSR, and the United States. The USSR and the U.S. are involved, among other reasons, because of the significance of Southeast Asia for India. The United States is seriously affected also because of its relations with Japan, the Philippines, and Indonesia; as well as Australia which is connected with Singapore, Malaysia, and Britain. China is concerned because of economic, ethnic, and geographical reasons.

Mr. Robert H. Yoakum, a contributor to the *New Republic*, talked to a mythical Mr. Hee, travelling propagandist for Red China. (CONGRESSIONAL RECORD, May 25, 1970, p. 16877.) Mr. Hee suggested that the communists tricked Mr. Nixon into Cambodia. But what is planned for the future? Hee smiled. "Well, we shall wait until you are as mired in Cambodia as you are in Vietnam. Then Laos. Then Burma, India, Pakistan, Afghanistan, Iran, Iraq . . ."

"Wait", Mr. Yoakum almost shouted. "You are taking us right into the Middle East. That might mean war with Russia as well!"

"Ah, so?" said Mr. Hee.

The story is funny. But it has an element of geopolitical truth. The Chinese don't believe in the domino theory but in the artichoke strategy. Mr. Wallace Carroll in an article inserted by Senator Church into the CONGRESSIONAL RECORD, May 25, 1970, pages 16897–16900, while suggesting that we "come home" from Southeast Asia, warned strongly that the dominoes are falling in the Middle East—in Iraq, Syria, UAR, Libya, Algeria, Sudan, the two Yemens. Aden. Somalia and

[1] During the 19th century much of the international power struggle centered on the Balkans and Turkey. By way of an analogue, Southeast Asia may be compared with the Balkans and China with the Ottoman Empire.

the Gulf.[2] So if the eastern dominoes fall toward the west and the mid-eastern dominoes toward the east, there will be a dramatic convergence. What about thinking in terms of breaking dikes instead of falling dominoes?

I refer again to my testimony of March 17, 1970, on the sino-soviet conflict. The general finding was that this conflict is a "border dispute" and an "ideological struggle", but that it transcends those limited descriptions by far.

The fundamental fact is that the USSR has a highly vulnerable flank in its Far Eastern and Pacific possessions. For all practical purposes, this flank appears to be indefensible against a strong and resolute future China.

The Far East is the area where the USSR, the strongest communist super-power, encounters China, the second strongest and hostile communist super-power; in that area, the USSR also encounters Japan, the second strongest power in the Free World and a key ally of the United States.

Thus, the Far East is the area where the strongest and the mutually most antagonistic political forces of the current epoch are intersecting.

The Far East is the rocky cradle of the potentially largest conflict the world has yet seen. Yet it is also the area where the USSR is weakest and where, with the resources currently at its disposal, it has the least capability of strengthening its position significantly. The Soviets may rely on nuclear weapons which in the Far East are their one and only military hope, yet the rapid emergence of China as a nuclear power is complicating the USSR's Far Eastern defense problems. In fact, 100–200 Chinese MRBM's and shorter range missiles gravely threaten the USSR east of the 60th meridian and render the Soviet hold on the Baikal-Amur-Ussuri area most tenuous. If the USSR were to be pushed away from the Pacific littoral, it would not only cease to be as powerful as it is today, but its fragile multi-ethnic arrangements in Siberia and Central Asia would collapse.

Soviet strategy against the United States has been motivated by a set of offensive goals which include the completion of the world revolution or the attainment of world hegemony or even domination; or negatively, the reduction or elimination of the United States as a world power. The accomplishment of such ultimate goals is not necessary for the survival of the USSR as a country. A gradual evolution of the imperial structure of the present Russo-communist inner and outer empire into a genuinely federal system would allow the USSR to achieve accommodation with the Free World; but this presupposed that offensive goals be scrapped. In other words, its offensive strategy is the USSR's most expensive luxury.

Soviet strategy directed at China is of an entirely *different* nature: it aims at political survival and the preservation of the USSR. This soviet strategy has a defensive goal, but it is not, and cannot be, a defensive strategy: the attainment of the defensive objective requires offensive actions.

Soviet operational goals include the recapture of Manchuria which the USSR must acquire to develop the soviet Far East and render it defensible. In order to strengthen the defense capacities of the USSR and weaken the Chinese threat, the soviets also appear to aim at separating from the main body of China the northern tier of Chinese provinces, more correctly the autonomous regions which are inhabited by ethnic and religious minority groups. Just as the USSR decided it cannot live with a unified Germany, so it now seems to regard a unified China as unacceptable.

The fundamental point is this: the USSR does need Manchuria, lest it ceases being a Pacific and perhaps even an Asian power.

If Manchuria were taken over by the soviets, a huge development program would have to be undertaken. The Kremlin may be compelled to renounce its preventive war plans because nuclear attack might boomerang against the Maritime Provinces. If then the USSR tries to strengthen its Far Eastern possessions as best as it can, a still more gigantic investment program would be mandatory. But in order to accelerate Far Eastern development by several orders of magnitude, the USSR needs logistics capabilities far beyond those offered by the very limited capacities of the Trans-Siberian Railroad and AN–22 giant cargo planes. The enlargement of west-east rail transportation would be extremely costly and probably impractical: the *rapid* build-up of a satisfactory rail and road net is impossible.

Economically speaking, the soviet Far East is far more difficult to integrate with the areas of the Urals than Britain with Canada or Australia.

During the 19th century, British imperial policy was dominated by the need to have secure sea communications between England and India. The USSR now finds itself in a position where it needs a secure sea route between its European territories and the Far East. The northern sea route through the Arctic which is short and entirely soviet-controlled, can serve only a supplementary line of communications.

It is this overpowering need for sea communications between the western and eastern USSR which has driven the Kremlin to the rapid build-up of sea power. That a fully developed soviet sea route to the Far East would have both defensive and offensive uses and would weigh heavily on the fate of all Asian nations is self-evident.

The Soviet sea route to the Far East starts in the Black Sea. Passage through the Dardanelles is presently secured through international agreements which are buttressed by friendly political relations with Turkey, a member of NATO. In due time, the Kremlin may find that this arrangement is unsatisfactory and may maneuver to extrude Turkey from the NATO alliance.

The soviets have secured port privileges in the Mediterranean, especially at Latakia, Syria, and Port Said and Alexandria, Egypt. They also are welcome in Algerian ports, including Mers-el-Khebir.

In the Red Sea, the soviets have privileges in Ras Banas, Egypt, and they have been building a port at Hodeida, Yemen. They have very satisfactory arrangements with Aden, gateway to the Arabian Sea. They are helping in port construction at Berbera, Somalia, and they are negotiating for privileges at Port Louis, Mauritius.

They appear to be welcome in Basra, Iraq. They are contributing to the building of the naval base at Vishakhapatnam, India, where they have been granted facilities, and they appear interested in acquiring a naval base of their own on the Andaman Islands.

The electoral victory of the left parties in Ceylon may greatly facilitate soviet naval strategy in Asia.

The soviets are penetrating, on a commercial basis, into Singapore, where they fell heir to British facilities. The soviets have taken initial steps for a presence at Hongkong. Earlier attempts to gain footholds in Indonesia are presently in abeyance.

All in all, a smashing performance.

While the soviets aim at a sea route by which they can circumnavigate the whole of the Asian continent, they may in the process acquire significant control over oil production and transportation, including Japan's and Western Europe's main oil flows. They will need Middle Eastern oil supplies themselves, and above all they may be interested in augmenting their cash income: their import needs are rising steeply but their exports still are largely restricted to raw materials. Perhaps the thought has occurred to the Kremlin that Middle Eastern oil revenues are needed to finance the sino-soviet dispute and the build-up of the soviet-controlled parts of the Far East.

The grandiose soviet sea route is at present blocked at the Suez Canal. For striking at China, the USSR would not rely on supplies coming through Suez. But if, unexpectedly, the war should drag on, they would need the sea route. Conversely, if they attain their territorial objectives, they need the sea route quite urgently to be able to hold their conquests and develop the conquered areas; and if they decide against preventive war, the sea route, as I pointed out, is still more important as a prerequisite for the industrialization of the Baikal-Amur region.

The Suez Canal is the key to soviet power in the Far East. It must, therefore, be expected that the USSR will be reaching out for control over the Canal, either for direct control or control by proxy.

The obvious Chinese recourse against soviet strategy in the Far East and the developments along the circumferential sea route is to move southward toward Singapore and, if possible, toward Indonesia. But in order to accomplish this advance, the Chinese need satellite governments in South Vietnam and Thailand.

The Chinese also have moved into the Arab guerrilla movement, especially, so it seems, into the Palestinian Liberation Front, for the purpose of derailing soviet strategy in the Middle East. The recent flare-up in Jordan suggests that Peking is trying to establish Jordan as a Maoist colony.

Precisely because there is a sino-soviet conflict which is steadily growing in importance, the Southeast Asian and Middle Eastern theaters are inter-connected and inter-dependent. It is obvious, therefore, that American national interests cannot be protected by disregarding one or the other of those inter-dependent theaters, nor can our strategy be successful, if it is not addressed to the Asian conflict in its entirety.

DID WE LOSE A BATTLE?

Many statements have been made to the effect that there was no pressing reason why the United States commenced the operation against Cambodia. Yet the critics failed to discuss the recent communist strategy as it was explained in a speech by General Giap. Giap's lengthy pronouncement, *The party's military line is the ever-victorious banner of*

[2] Mr. Carroll says "the GNP of South Vietnam, Laos, Cambodia, Thailand, and Malaysia combined is barely $11 billion. Compare this with little Belgium which alone has a GNP of about 22 billion." "If these five Asian countries joined up with China . . ., the effect on the world balance would be negligible." So let's rather worry about the Middle East.

In my judgment, we must not lose the Middle East, which we are doing. But Mr. Carrol's argument for holding the Middle East is quite false. Belgium's GNP was $21 billion in 1968, according to the London Institute for Strategic Studies. The combined GNP of the five Asian countries was $12.4 billion. Surely we should add Singapore which brings the total to $13.6 billion. If Burma and Indonesia were added, the total goes to $25 billion; and with the Philippines and Taiwan we would reach $36 billion. The GNP of Red China is supposedly $78 billion, which may be a little high. Thus, Southeast Asia, in terms of GNP, is about half that of China; the five states mentioned by Mr. Carroll plus Singapore have nearly 18% of the Chinese GNP. By contrast, the combined income of Algeria, Iraq, Syria, and UAR is $11.5 billion. The income of the other Middle Eastern States mentioned by Mr. Carroll is not exactly known but due to the characteristics of the Arab oil industry it is partly artificial.

people's war in our country, was broadcast by Radio Hanoi on December 14 to 20, 1969. Captured COSVN Resolution No. 9, dated July 1969, also made clear communist strategy, which moreover could be deduced from the deployment of the communist forces.

After study of those documents, early in 1970, I for one expected that the communists would continue with big unit offensives, which necessarily would have to be based upon the staging bases in Cambodia. Since then a Vietcong defector has confirmed that an offensive was planned for May of 1970 but was postponed because of Sihanouk's ouster: an offensive against Cambodia was substituted for the abandoned offensive against South Vietnam. (This defector, a Lieutenant Colonel, also disclosed that 16 Red Chinese advisers had been "helping with the planning of the Tet offensive of 1968".) (*San Jose Mercury*, June 6, 1970.)

The analysis of the broad evidence suggests that the general intention of Hanoi was to maintain guerrilla warfare within South Vietnam and to prepare for a decisive invasion with regular North Vietnamese troops from Cambodia against South Vietnam at a time when either the United States had withdrawn the bulk of its forces or when a "general uprising" could be launched inside the country. Meanwhile, the plan was to keep up the offensive pressure in order to neutralize the pacification programs. (Late in March the communists still were pushing their operations in the Mekong Delta.)

The fall of Sihanouk created a new situation, and a moment for negotiation seemed at hand. Even the soviets made proposals. President Nixon delivered his address of April 20, with the announced withdrawal of 150,000 men. This speech was designed to get serious negotiation underway.

In reply, two things happened: first, the Chinese organized the Indochinese summit conference which established the political framework for communist war against Cambodia; and second, communist attacks against Cambodia began coincident with that conference on April 24. Those attacks are described in a letter of May 1 by the Permanent Representative of Cambodia to the President of the U.N. Security Council. (CONGRESSIONAL RECORD, May 22, 1970, p. 16773). The hopes of negotiation were buried once again.

The objective of the re-scheduled communist offensive was to connect all the staging bases and create an unbroken, fully CP controlled corridor between Sihanoukville and the Ho Chi Minh "trail"; or, to put this differently, to have the North Vietnamese take over the entire eastern part of Cambodia. The communists also moved against Phnom Penh and the highway connecting Phnom Penh with Bangkok. This operation had obvious political purposes but also was designed to secure the supply of rice.

According to the best information published in the European and American press, the communists had 40,000 to 60,000 men organized in five or possibly six divisions in Cambodia.

The initiative taken by U.S. and South Vietnamese forces against Cambodia disrupted Hanoi's operational plans and dispersed the communist main units, forcing them into difficult, costly, and time-consuming re-groupings, and pushing them away from the most sensitive areas in South Vietnam, i.e. Saigon and the Mekong Delta. Furthermore, the operation closed communist logistics lines through the Cambodian ports. This logistics set-up supported the North Vietnamese forces in Cambodia (which were regarded as the forces that would win the decisive battle). It also provided 75% and 50% of the supplies the Vietcong needed, respectively, in the IV Corps and III Corps areas within South Vietnam.[3] Thirdly, the operation provided the South Vietnamese army with success and offensive experience which, after years of defensive fighting, it needed to become an effective battle force. Those results were far more important than the sizable booty which our forces seized, but which, nevertheless slashed deeply into the armament of at least half the North Vietnamese divisions in Cambodia.

Not the least result has been that the Cambodian operation created cooperation between South Vietnam and Thailand with Cambodia. It also has allowed the Combodian army to get organized, trained and armed, so that in the end it may prove to be an additional force of 80,000 to 100,000 men arrayed against the North Vietnamese aggressors.

The Cambodian army was given very low ratings but so far it has given a surprisingly good account of itself. Apparently it is infused by excellent morale which, by itself, is a revealing (if ignored) indicator of the political situation in Cambodia.

As to the (usually ignored) political situation among the North Vietnamese, it is certainly newsworthy that the defection rate has gone up since the Cambodian operation—the defection rate from North Vietnamese, *not* VC units.

Those results may not be final and the communists remain able to take countermeasures. They may succeed in capturing parts of Cambodia. But since the main requirement of the Vietnamization strategy is to gain time and to improve mutual self-defense among the Asian peoples, this operation was definitely helpful. The closing of the Cambodian ports to communist logistics should be a lasting gain. Since the extension of the Ho Chi Minh "trail" to the areas south of the 14th parallel is difficult for terrain reasons, the "logistics future" of that communist front depends in large measure on the utilization of the Mekong river.

The communists may put pressure on western Cambodia, perhaps to create a political base for Sihanouk, and they will have to fight for the Mekong. Otherwise they probably will put their new *center of gravity* into southern Laos and exert their main offensive pressure against I and II Corps areas in South Vietnam. There is much concern that the war has been expanded, yet chances are that the theater of war has shrunk in III and IV Corps areas, where the majority of the South Vietnamese population is concentrated.

There have been assertions that the Cambodian initiative was still another flop but about the only real support for this contention has been the fact that the communist forces have not all been wiped out. This is true, but it does not follow that, therefore, those forces are able to continue their operations unweakened from a few miles further back. According to this way of thinking, no one ever would have fought a battle in all history. If the criterion for an American initiative should be that the enemy must be smashed and annihilated or else we better do nothing, then the contention really is that we should have attacked the Cambodian sanctuaries with nuclear weapons.

The type of war we are fighting in South Vietnam requires many engagements none of which by itself is or can be decisive. It is the sum total of those engagements which ultimately tips the scales and it is the predominance of successes or failures which unless one of the billigerents loses his base areas, brings about a settlement of the war, i.e. the reestablishment of peace.

The pushing back of an enemy preparing for an offensive knocks out that particular offensive. The destruction of staging bases which he had been building for years—more than 8,000 bunkers!—and the seizure of masses of equipment inevitably weaken him. This means that if a new offensive will be tried nevertheless, it will be far weaker than it would have been, or else the offensive must be delayed and its preparation will be considerably more costly. To disregard the effects of a successful attack over a broad front is incompetent. At the very least, the North Vietnamese lost time, while we gained time.

The communists also have been forced into a larger theater of operations, without a safe rear and with a substantially increased number of enemies operating against their communications. Theoretically, the Chinese can supply additional manpower, but North Vietnam still has enough reserves and Chinese soldiers may not be too welcome in Cambodia. The point is that the logistics lines already have been operating to capacity.

This evaluation is platitudinous but necessary since a studied effort has been made to belittle or deny our success. Such belittling is routine propaganda and can be called the "so what?" theme. Suppose a man makes 1 million dollars in a week. Normally, this would be regarded as a great success. But it is easy to "question" the gain. What about taxes? Didn't he really want to make 2 million? Did the money cure his ulcers? And won't his wife now get a divorce?

The press invented the *canard* that the aim of the operation was to seize COSVN headquarters and personnel. This didn't work, see? Yet there were about a dozen strikes into Cambodia and only one, at most, was directed at COSVN. (For further detail on these red herring tactics, see CONGRESSIONAL RECORD, May 20, 1970, p. 16347.)

The most instructive case of the negativistic type of reporting deals with ARVN. Prior to the strike there was much moaning about the poor morale of the South Vietnamese forces. Now this morale proved to be high. Is this change perhaps advantageous? Not at all, because now the ARVN make difficulties for the United States.

According to an old saying, a battle lost is a battle one *believes* to be lost. Many people talk and write to convince the American people that we lost the battle. If we believe this, then the enemy will have won.

NATIONAL WILL

War, but especially the war in Indochina, is a contest of will. The point of those who advocate that we stop fighting and get out is really that the United States should display a weaker will than the enemy. Senator Fulbright stated that "the enemy" is "settling in for the long haul of indefinite guerrilla warfare, and we are not able to control the decisions that are made in Hanoi. We can only control the decisions that are made in Washington, and that, basically is why it is up to us to take an effective step toward peace."

In other words, the enemy does not want to agree to reasonable conditions, hence we must accept his terms. His will is very strong, hence if we want peace, we must give in to him. The logic is impeccable—it is the logic which says that there is no alternative to defeat.

The national will of the United States is being tested, not merely the capacity of people's war tactics. The reality of this test is the most fundamental reason why this con-

[3] According to other sources the Sihanoukville logistics line supplied some 90% of the VC military supplies in the III Corps area and also was a main weapons source for the communist forces operating against the II Corps area. The communist forces operating against IV Corps area received their equipment supplies exclusively from Sihanoukville. (CONGRESSIONAL RECORD, April 23, 1970, p. 12985.

flict cannot be viewed under the perspective of a mere local conflict.

The Vietnam or Indochina struggle has been the most severe test of wills, to which the United States was subjected since the Civil War. If the United States demonstrates that it lacks will power and does not have endurance when the going is rough, despite the fact that casualties are low and the war is being fought at a great distance, then *the United States loses its deterrent power* and it will cease to be the protector of world peace and the leader of the Free World.

Some people may rejoice if we abdicate this leadership role, but there is no one to take our place. Hence if we abdicate, unrest in the world will mount, and so will the concomitant dangers. By seemingly getting out of one trouble, we would be promoting entire sets of substitute troubles.

It is quite true that, as we leave Vietnam, our factories will remain standing, our GNP will continue to grow, and our strategic weapons will remain in a high state of readiness. But it is *not* the material factor which ensures that a *big* power also is a great power.

The question is whether those big resources will be used to achieve great purposes and *that* is a question of conviction, morale, courage, and will. If we should prove that we lack that will, we shall *ipso facto* prove that we lack foresight and insight. The conclusion will be drawn that we will not defend ourselves effectively.

In this case the attacker will no longer think about how to destroy our power, but rather about how he may *seize* and *appropriate* our resources for his purposes. Our material wealth suddenly will be transformed from a deterrent into an incentive.

I am able to rationalize a *voluntary defeat* just as well as the next man. The trouble is that unlike most Americans, I did experience the *consequences of defeat*—it is an evil disease which, if nothing else, breeds political polarization and radicalism—two primary objectives of communist political tactics. *Voluntary* defeat is in the nature of self-multiaction, and it is an act which cannot but be followed by political emasculation.

If indeed a voluntary defeat were imposed by Congress, the Executive would have a wonderful alibi for turning tail and unloading all responsibility on others. It would be interesting to watch the outcome of a *real* domestic battle. So far, the struggle on the Senate floor has been rooted in the safe expectation that *none* of the defeatist amendments will become law. But the exercise is not mere shadow-boxing: it is a largely unwitting maneuver to mobilize and strengthen opposition to national U.S. strategy. Hence it does jeopardize our continued ability to deter and contain.

I know quite well that even if the United States should lose the current test of strength, it may win the next one. American political passions are fickle and I believe that the American crowd is psychologically more feminine than the crowds of other nations; hence opinions are frequently reversed. The retrenchment which some Senators advocate will prove to be unworkable, partly because of the trouble in the Middle East.

I am reasonably certain that the communists who want to bury us, will miscalculate, because they misinterpret our domestic policies. But it is the American people who will have to pay for the communist miscalculation in American blood and treasure, *although* we will come out victorious in the end.

We will deter aggression and prevent war *only* if our opponents know that we will not falter *under any circumstances* and that we will prevail whenever we decide that the enemy is threatening American commitments, independence, freedom, as well as world peace.

STATE DEPARTMENT COMPLIMENTED ON PANAMA

Mr. CHURCH. Mr. President, I desire to compliment the Department of State and the Department of Defense upon relinquishing American rights to the Rio Hato military training area in Panama.

This area had been retained by the United States in the 1955 revision of the 1903 treaty with Panama, but in recent years it was far from fully utilized. It had become in my view an undesirable extension of the U.S. military presence in Panama and an unnecessary source of friction in United States-Panamanian relations. It is an act of statesmanship to return it to Panama.

I congratulate the executive branch and I express the hope that this action will be the start of a trend further to reduce our military presence in Panama and in Latin America generally.

I ask unanimous consent that the State Department's press release announcing this action may be printed in the RECORD.

There being no objection the release was ordered to be printed in the RECORD, as follows:

UNITED STATES AND PANAMA AGREE TO TERMINATE RIO HATO

AUGUST 20, 1970.

The Republic of Panama and the United States of America have agreed that the authorization for the exclusive use of the Rio Hato area by the United States of America, for the purpose of conducting maneuvers and military training of its Armed Forces, will be terminated August 23, 1970, as specified in section (a) of Article VIII of the 1955 Treaty of Mutual Understanding and Cooperation. In accordance with cited provision, the Republic of Panama permitted the United States of America, without cost and free of all encumbrances, exclusively to utilize the Rio Hato area as indicated above, for a period of fifteen (15) years, subject to extension thereafter as agreed by the two Governments. This authorization included the free access to, egress from, and movement within and over, said area.

HEW CONTRACTING PROCEDURES

Mr. GOODELL. Mr. President, I invite the attention of Senators to an article entitled "HEW Contracts Under the Table," written by Jack Anderson, and published in the Washington Post of Sunday, August 23, 1970.

Mr. Anderson describes the contents of an unreleased HEW survey on contracting procedures. Because of the broader questions which this article raises, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the Article was ordered to be printed in the RECORD, as follows:

HEW CONTRACTS UNDER THE TABLE

(By Jack Anderson)

The Department of Health, Education and Welfare has been guilty of slip-shod, even illegal purchasing practices, according to a survey made by the huge agency itself but kept quiet for eight months.

The alarming survey indicates that millions of public dollars desperately needed to combat poverty, upgrade schools and fight cancer are siphoned into the pockets of greedy contractors with the cooperation of HEW officials.

The report was made by four top-level investigators who delved into HEW's procedures for awarding contracts by negotiation instead of competitive bidding.

Negotiated contracts are common in all federal agencies, but strict regulations have been established governing the practice.

In most cases, the investigators learned, Department's authorized contract officers were bypassed by HEW program officials who lined up contracts on their own. "The contracting officer is often forced to provide a ratification service," the team notes acidly.

The investigators found that the agency repeatedly went back to the same firms with which it had been doing business instead of trying "to develop new sources and thereby further competition."

The result is that during fiscal 1969, 82 per cent of HEW's negotiated contracts over 2,500 were awarded without any competition whatever.

"The team believes this figure to be excessively high," says the report.

When a contract is let without competition, the agency must justify it in writing. But the investigators found that at least half of the justifications for HEW's noncompetitive contracts were "inadequate."

The Office of Education (OE) is singled out for special criticism.

The written reasons for negotiating rather than bidding contracts "were rarely found in the contract files" at the Education Office, the team discovered.

"Of these procurements which required publicity . . . in the Commerce Business Daily, over 90 per cent of the contract files showed to evidence that this had been done," the report said.

The inquiry revealed that instead of advertising contract work in the press, the Office of Education had been sending out brochures to hand-picked recipients.

RUNS, HITS—AND ERRORS

Mr. CHURCH. Mr. President, an item printed in the CONGRESSIONAL RECORD of August 19, 1970, purports to relate the saga of the undefeated staff softball team of the distinguished Senator from Michigan (Mr. HART). As a question of privilege, I now ask for equal time, as is the fashion of the day.

It may not appear in the weekly Sporting News, the "bible of baseball," but my staff's team is also undefeated. The Idaho team—perhaps because I have refrained from playing—has won two games. The first was a pitcher's duel in which the Church Pews defeated the Goldwater team 16 to 14 runs. The second win was by default—the other team wisely did not show up. The HART and CHURCH teams have not yet met, but I have no anxiety as to the result.

I say this because Idaho has produced many fine baseball players, and this is reflected in the playing ability of my staff's team. We read daily about the heroic exploits of Harmon "Killer" Killebrew of the Minnesota Twins. He is from Payette, Idaho. There are also Vernon Law, of Meridian, who pitched for the Pittsburgh Pirates; Larry Jackson, of Boise, who played for the same team; Frank Reberger, of Caldwell, who pitches for the San Francisco Giants; and Bill Stoneman, of the Montreal Expos, who pitched for the University of Idaho.

The weight of evidence is impressive, Mr. President, and I thereby claim equal prominence for my staff's team in Capitol Hill's baseball hall of fame.

And now for the staff touch-football season.

HATFIELD-GOLDWATER AMENDMENT TO THE MILITARY PROCUREMENT AUTHORIZATION

Mr. FONG. Mr. President, I have supported the principle of an all-volunteer armed force for a number of years but have reserved judgment as to when it should be implemented. After much study and after listening to the debate of this issue, I have now concluded that I can support the approach of the distinguished Senator from Oregon to implement the principle at this time. I have this date requested and have been allowed by the distinguished Senator from Oregon (Mr. HATFIELD) to be a cosponsor of this amendment.

Mr. President, I believe we should give the principle of an all-volunteer force a chance to operate now.

The President's Commission on an all-volunteer armed force, chaired by former Secretary of Defense Thomas Gates, unanimously found that a voluntary system is feasible. After intensive study, the members of the Commission concluded that a voluntary military will work and is desirable. This conclusion was reached for a variety of reasons. I would like to briefly outline two major considerations here.

First. Today we have a predominantly "true" volunteer armed force. Out of 3.1 million military personnel, more than two million are "true" volunteers, of which one and a quarter million men are serving beyond the original term of their enlistment, and 800,000 are currently serving their first term of enlistment. These 800,000 men are true volunteers who would have enlisted in the Armed Forces even if there were no draft looming over their heads, according to detailed studies made by the Commission.

The Gates Commission found that 250,000 men volunteer each year. The Commission found that because the number of true volunteers in the Armed Forces was so large, that a fully volunteer force of 2.5 million men could be achieved by merely improving conditions and pay enough to recruit an additional 75,000 more young men each year.

Therefore, Mr. President, we are not discussing the possibility of recruiting a million or two million volunteers into the Armed Forces. We already have that number of volunteers. We are debating the improvement of conditions to a level which would attract an additional 75,000 men into military service annually. I am quite sure that with added pay and other inducements as provided in the amendment, we will be able to attract these additional men.

The Gates Commission estimated that it would cost $3.2 billion in the transition years for a manpower level of 2.5 million men and $2.1 billion, once the all-volunteer force is fully operational. I believe that these projections are high, but even if they are correct, it would be a worthwhile investment to do away with compulsory military service.

We now have a system which invests thousands of dollars to train one man to effectively serve our country for little more than a year. The first 6 months of military service are spent in basic and advanced training, the last 3 months are used to process discharge. The draftee actually is of service to our country for little more than half of his total obligation of 2 years.

If we convert to a voluntary system, fewer men would enter the services each year, and the expertise they must acquire in this time of sophisticated weaponry could be retained for greater periods of time. We will no longer have to invest hundreds of thousands of dollars in training only to see these skilled men leave for better paying jobs after their obligation expires.

Mr. President, objections have been raised on various levels against a voluntary military force. In examining them, we find that many of them are not borne out by the findings of the Gates Commission.

First, an objection that is frequently heard is that a voluntary force would be composed primarily of members of minority groups, particularly blacks or those who are below the level of poverty. Although this argument is true in one sense because there is a momentary incentive for people below the poverty level in military service, the Gates Commission estimated that the difference between a mixed force of draftees and volunteers as compared to a totally vounteer force of the same size—2.5 million men—is an increase of 0.8 percent.

Another frequently encountered objection to an all-volunteer military is that such a force would become a group of mercenaries of questionable loyalty, isolated from the mainstream of American life, who could pose an internal threat to our security. This objection has always seemed strange to me when you consider the fact that over 2 million men currently serving in the military are "professionals." Our officers are almost exclusively professional and most of our senior noncommissioned officers are also career men. In other words, the leaders of our current military force are already in this so-called professional category.

The present military draft, which has existed for the past 20 years is the only peacetime draft our country has had. Begun in the Korean War, the draft was extended during the peacetime years after June 1953. Throughout our history, we have only instituted a draft three other times and these were only briefly, during a wartime situation.

Mr. President, let us remember that we are not repealing this Selective Service Act by passing this amendment. That act expires next June 30 and will remain on the statute books until then under this amendment. Next year, the Senate and the Congress can determine whether extension of the Selective Service Act is needed.

With the pending amendment, we are creating the necessary reforms, implementing the recommendations of the President's Commission of a voluntary military, so that the draft will no longer be necessary to fulfill our security requirements.

Let us examine the amendment before us.

First. We will raise the salary of all members of the Armed Forces.

Second. We will continue the registration of young men at age 18, so that if an emergency arises and the Selective Service System has been allowed to expire, the President may recommend, and the Congress may approve, the quick and efficient reinstitution of a draft.

Third. We provide for upgrading the various Reserve components.

Fourth. We direct improvements in career selection, increased use of civilian personnel, educational scholarships for specialists—doctors, dentists—better military recruitment, incentive programs—bonuses and accelerated promotions—and the upgrading of conditions in general.

Other changes include:

First. Special pay for professionals—doctors, dentists, and veterinarians.

Second. Increased proficiency pay, hostile fire and combat pay.

Third. Better travel and transportation benefits.

Fourth. More equitable enlistment and discharge regulations.

Fifth. Ten thousand ROTC scholarships for each service.

Sixth. A new salary structure which would combine existing allowances—housing, and so forth—and institute cash contributions for a retirement system which would be similar to the current Federal system.

Mr. President, these reforms are necessary and desirable. If we are serious about ending the draft at the earliest possible date, we must act now. If we support the principle of a voluntary military then we must support this amendment so that a foundation for the all-volunteer Armed Forces can be erected.

I ask my colleagues to give this plan a chance. Vote for the improvements which this amendment recommends and see whether we can attract the necessary number of volunteers so that a forced draft will no longer be necessary.

Let us vote now to provide all military personnel with decent and equitable service conditions.

The question of ending the draft will be before us next year. We now have the opportunity to support this effort, and put the Gates Commission's recommendation to the test before the draft law expires.

I urge Senators to support the Hatfield-Goldwater amendment.

ADDITIONAL QUESTIONS ON THE ELECTRONIC BATTLEFIELD

Mr. PROXMIRE. Mr. President, on Monday, August 17, I announced that I had decided not to offer an amendment on the so-called electronic battlefield in view of the reluctance of the Armed Services Committee to accept even the most moderate amendments to the bill. Instead I promised that I would question committee members very closely until we get some answers on this program. It is unfortunate that it has to be done this way. It will take much more time in the Senate, but I think this committee must be challenged and I am going to provide that challenge in depth and at length.

Today I am taking the first step in what I expect to be a lengthy investigation of this program.

The questions I shall present today deal with the military effectiveness of the sensor surveillance system. As I stated on Monday I have already received three letters from officers and enlisted men who were directly responsible for the use of the sensors in various parts of Vietnam. All of the letters came to the same conclusion: The electronic battlefield is not nearly as effective as advocates claim and it is simply not worth the money—cost effective in Pentagon terminology. There are several important questions which must be answered regarding the system's military effectiveness before we proceed with further development.

First. Advocates of the electronic battlefield have claimed that it has been very effective in Vietnam. On Monday the Senator from Arizona (Mr. GOLDWATER) stated that the equipment had been very successful in pinpointing trucks and other supply vehicles coming down the Ho Chi Minh trail. Whey then, Mr. President, have we been unable to cut off these supply routes long ago? We have bombed these trails until they have become virtually one continuous crater. Why then, have the North Vietnamese still been able to bring millions of tons of supplies down these trails? Where are the results? I will not accept the excuse that these results of sensor effectiveness are classified. I will not accept assurances that, while the figures are classified, the results have been excellent. This is precisely what the Pentagon told us for years regarding progress in Vietnam. It took a long time for Members of the Senate to see the truth—to see that the hard results did not justify the optimistic predictions.

Judging from the reports of the men in field—the men who have actually used these devices—I am very skeptical about the Senator from Arizona's (Mr. GOLDWATER) assurances that results have been excellent. The battlefield results in Vietnam simply do not bear out these reports. Khe Sanh was not an American victory—it ended in a strategic withdrawal of American forces under the cover of an armored column sent to rescue the defenders of that beleaguered outpost. And yet, the Senator from Arizona would have us believe that electronic battlefield devices were very effective in that battle. Why, Mr. President, could the Communists mount offensives virtually at will despite round the clock bombing by American aircraft? Why did the sensors not enable us to pinpoint and destroy the enemy's mortar positions? The Senator from Arizona says the sensors have been invaluable—invaluable in what sense? They certainly have not enabled us to seriously interrupt the flow of enemy supplies or interfere with his battle plans. What we need is concrete evidence of success—not bland assurances that everything is going smoothly.

Much more serious than the question of whether the sensors have added to our combat capability is the charge that they may have actually lowered our battlefield effectiveness by unnecessarily overloading our men. On Monday I quoted Col. Mark M. Boatner, former chief of the Concepts and Doctrine Division in the Office of the Assistant Chief of Staff for Force Development. The colonel stated:

> We may be actually lowering our military effectiveness by overloading our combat units with innovations they have not learned to use.

Second. What studies, if any, have been done to determine how well electronic battlefield equipment is being accepted by our men in Vietnam? Do the men who are actually using the devices really believe they improve their combat capability? It seems that every statement in support of the devices has come from a U.S. Senator or a high ranking military officer, none of whom have had direct experience with the equipment.

Third. What additional responsibilities or duties are imposed on the combat units which use this equipment?

Fourth. What additional training is necessary to insure that our men are familiar with this equipment? Does every man receive instruction in the use of these devices before they are distributed to field units?

Another important set of questions concern the ability of the command control centers to assimilate and digest into useful form all of the information which is gathered by the sensors. In a speech delivered at a symposium on Government use of computer systems, Brig Gen. Wilson R. Reed, the commanding general of the U.S. Army Computer Systems Command, stated that:

> A number of our studies indicate that the tactical operations center receives and is able to assimilate for use about one-third of the information that is sensed; thus the commander ends up basing his decisions on something less than 30% of the ground truth.

This fact raises a number of crucial questions:

First. If decisions to call in artillery and air strikes are made on as little as 30 percent of the information collected by the sensors in a certain area, how can we be at all sure what the nature of the target is?

Second. How do we know what information is missing? Is it not entirely possible that certain data could be ruled out by the computer which could change the type of armed response which is required?

Third. Does not the fact that we are basing armed responses on only 30 percent of the data gathered amount to making decisions on misinformation? Is it not more dangerous to make decisions this way than to make decisions based on other forms of more reliable, albeit limited, intelligence?

Fourth. What are the consequences of decisions based on such limited information?

Some of the most important questions concerning this system involve a determination of whether it is truly cost effective. I have received several letters from officers and servicemen who, based on their own experience, are convinced that the system is simply not worth the money. The reason is that it would be prohibitively expensive to plant sensors over a large area. Currently we are planting them in very narrow corridors in Vietnam. In no sense can they be considered capable of providing overall battlefield surveillance. In view of the tremendous cost of planting these devices over wide areas questions must be raised regarding the cost effectiveness of the sensors.

First. How much would it cost to cover, say a 100-square-mile area, with these sensors? How much would the computers necessary to assimilate the information from these sensors cost? What would be the operation costs of these computers?

Second. How reliable are the sensors once they have been planted? Are they subject to frequent malfunctions? Can they be rendered ineffective by the enemy?

Third. Is it true that one well-placed mortar round could knock out an entire command and control center making the entire system inoperative?

Fourth. What other countermeasures, if any, can be taken against the sensors?

Mr. President, these are just a few of the questions which must be answered concerning the effectiveness of the electronic battlefield before we authorize further development of this program. We must be sure that the devices are of real value to our men—that they actually increase combat capability rather than decrease it. I shall expect detailed answers to these questions. In coming days I shall raise additional questions regarding the cost of the program and its possible domestic and foreign policy implications. We will get the information necessary to determine whether this program should receive further support.

In addition, I have requested the General Accounting Office to make a comprehensive study of the entire program. This study will supplement the hearings which the distinguished chairman of the Armed Services Committee has announced on this program. Hopefully, these two reviews will give Congress the information it needs. I ask unanimous consent that the letter I have written Comproller Staats requesting the study be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
Washington, D.C., August 20, 1970.

Mr. ELMER STAATS,
Comptroller General of the United States, General Accounting Office, Washington, D.C.

DEAR MR. STAATS: Recently I have been raising questions and requesting information about a new program known as the electronic or integrated battlefield. This system is composed of various sensors backed by computers which are designed to provide field commanders with general battlefield intelligence. In the course of my inquiries about the program, a number of questions have been raised which deserve detailed study before the Congress proceeds with its further development. Therefore, I would like to request that you undertake an investigation of cost and effectiveness of the program centered around the following questions:

1. To what extent have the three branches of the armed forces coordinated their efforts in the development of electronic battlefield devices and what action, if any, has been taken to avoid duplication?

2. How effective have these devices been in combat in Vietnam? Have they contributed to improved combat capability and how reliable have they proven in actual combat?

3. Is it necessary, in view of the Vietnamization program, to proceed with the procurement of so-called phase III sensors and with the development of more advanced sensors for 1972 and 1975?

4. Does the Department of Defense plan to make these devices and related equipment available to foreign countries under the Foreign Military Sales Act or other foreign assistance programs, and if so, what restrictions, if any, will be placed on their use?

5. What kind of support units will be necessary to operate and monitor such devices and to what extent will the use of such devices permit a reduction in military manpower?

6. What are the potential applications of these devices in domestic law enforcement? What restrictions, if any, could be placed on their distribution and sale to domestic police forces and other groups?

7. What long range plans, if any, does the Department of Defense have concerning the development and procurement of these devices during the next ten years? What are the project costs of any long range programs?

I do not accept classified information and I therefore ask that your report to me be unclassified. I would hope that you could have this report completed by March 31, 1971.

If you have any questions, please do not hesitate to call me. Thank you for your cooperation in this matter.

Sincerely,

WILLIAM PROXMIRE,
U.S. Senator.

NO WONDER PASSENGER SERVICE IS DYING

Mr. CHURCH. Mr. President, I have commented before on the Senate floor of the death of the railroad passenger industry. I have noted that this is especially tragic in light of our Nation's awakening to the need for transportation systems to supplement the automobile. I have pointed out that poor treatment of passengers by the railroads and the refusal of the ICC to stand firm against the moves to discontinue services has led to our current sad state of affairs in rail transportation.

Today I noted an article by Tom Hodge in the Blackfoot, Idaho News, which describes in some detail the obstacle course set up by the railroads to discourage rail passengers. Stories like this reinforce the obvious fact that our Nation's railroads are doing all they can to drive passengers away.

I ask unanimous consent that Mr. Hodge's column, entitled "Hodge Podge," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HODGE PODGE

(By Tom Hodge)

Without being bitter, subjective or uncandid, (I hope) here's a personal story about the Union Pacific Railroad—a company to which I entrusted my family for 13 hours and about 700 miles.

As you who have been paying attention know, the UP is having trouble with its passenger service. The official line from the company is that passenger service is dying because people no longer want to ride the train.

In our family, the impression now is that people no longer want to ride the train because of the obstacle course the company sets up—and the wimpy service it provides once the passenger is through the maze.

It goes like this: I took my family to Denver on a vacation. My wife and I decided she and the kids could stay down there a few days after I had to come back—then return to Idaho on the train. Mistake No. 1.

You telephone the train station, dialing the number which is listed "Passenger Service, Ticket A Information," A recorded voice comes on, giving no information, asking the caller to wait for a real live human railroad employe to come on the line when he gets the time. No such employe exists. To get ticket information, one must call other numbers on the list until a person who happens to know can be found.

Using this method, my wife obtained a raft of information—most of it false. She got cost estimates ranging from $22 to $75 for tickets. (In the end, the trip cost about $35).

In desperation, she called the office of the Interstate Commerce Commission in Denver. A secretary there supplied the correct price estimate and arrival and departure and arrival times—but gave my wife the impression that's all the farther the complaint would go. ("After all the secretary's boss is a political appointee," my wife remarked.)

After all of this, the trip proper began. At the station, some UP employes were kindly and understanding. Others, though, were abusive to her, making personal references to how many children there were, and to how my wife was dressed (neat, clean and fashionable, I thought).

Leaving Denver, the exotic Portland Rose was made up of one engine, one car. They did have restrooms—one for men and one for women—but there was no food service of any kind.

A few miles out of Denver, the car became so unbearably hot that another passenger car was added. Either the heating equipment stuck on or the air conditioning stuck off. That's how the train ended up with two cars, anyway.

While on the train, one employee asked my wife if she had drugs with her. Particularly in these days, I consider that an insult. But perhaps in such a small train, the employe felt he had to engage in some kind of intimacy, and since my wife had worn bell-bottom slacks, I suppose he thought she was a hippie, and quite naturally, then, had drugs.

Arrival at Pocatello was about an hour later than scheduled—better, I know, than airlines do most of the time now, and good, considering all the trouble with the faulty equipment.

OK. So here come my four children down those steep rail car steps. I hadn't seen them for more than two weeks. They looked like angels. But at the precise moment, two big fat UP employes in blue uniforms (conducters or brakemen, I suppose) shoved right up the steps. The two youngest girls were cast aside, into the steel wall of the stairwell. Each child was carrying baggage of some kind, so the rudeness of the old men was all the worse. The kids could have been hurt. I think readers will understand that I was irked.

Many of the railroad people we came in contact with on both ends—Denver and Pocatello—were patient, kind, understanding and interested. Some weren't. The latter group ruined it for the good people.

As near as I can tell, this story is true. (It's difficult to interview one's spouse.) Now we know—we don't just suspect, we know—the railroad is overtly discouraging passengers.

I like trains. My kids are more excited when seeing a train than an airplane. Now, after having paid out some money and watching what happened, I know the company does not want my business. No longer will I feel guilty about not riding the trains as much as I should.

I know the railroad could push passenger service. I know people would ride the trains. But they can't. From now on, before traveling by rail, I'm going to find a handy witch doctor to turn us all into cattle, sugarbeets or chemicals. That way, we'll get good treatment from the Union Pacific.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND THE JUDICIARY APPROPRIATIONS, 1971

The PRESIDING OFFICER. Under the previous order the Chair lays before the Senate, H.R. 17575, which the clerk will state by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (17575) making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending June 30, 1971, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc; that the bill as thus amended be regarded, for the purposes of amendment, as original text, provided that no point of order shall be considered to have been waived by reason of agreement to this order.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Mr. President, there may be. I reserve the right to object.

I would like to know how the item for the International Labor Organization was handled. Was it by amendment to the bill, so that the unanimous-consent request would require us to deal with it affirmatively, or just how was it handled?

Mr. McCLELLAN. It was stricken from the House bill. In other words, the House bill was amended.

Mr. JAVITS. I would like to contest that amendment, and therefore I would ask——

Mr. McCLELLAN. The Senator would not have to do that. The bill would be considered as original text.

Mr. JAVITS. I am sorry. I would have to contest the amendment made by the Senate committee. Therefore, I would suggest to the Senator that he omit from his unanimous consent the request as to that particular amendment.

Mr. McCLELLAN. I have no objection if the Senator wants to do it that way, although I think he has a right to do it under the provision which I have suggested.

Mr. JAVITS. The difference is——

Mr. McCLELLAN. The Senator can move to strike.

Mr. JAVITS. No; I do not want to move to strike. I would rather move to oppose the amendment.

Mr. McCLELLAN. It is in the bill. I do not know any way the Senator can move to oppose it except by moving to strike it out.

Mr. JAVITS. No.

Mr. McCLELLAN. Maybe there is another way.

Mr. JAVITS. May I address a parliamentary inquiry, anyway, to the Chair?

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. JAVITS. Mr. President, if an amendment has been made by the Senate committee and there is no unanimous-consent request to accept that amendment and consider it as new text, and then I oppose the amendment, if I am successful in my opposition would the bill then stand as it came from the House?

The PRESIDING OFFICER. If the committee amendment in the bill as reported from the committee were agreed to by unanimous consent under the conditions proposed, it would take a motion to get it out, and it would take one more vote to get it out, obviously, than if it had not been previously agreed to.

Mr. JAVITS. The amendments which have been made by the committee and brought here by the committee are then to be voted on separately; are they not?

The PRESIDING OFFICER. Unless the unanimous-consent request is agreed to.

Mr. JAVITS. Exactly; and so, rather than object to the whole unanimous-consent request—which I do not wish to do in deference to my distinguished colleague—I would hope he would except this amendment, so I can oppose it, and we could separately vote on the amendment by a rollcall vote, and the Senate could decide whether it wished to accept or reject the amendment.

The PRESIDING OFFICER. Would the Senator identify just where the amendment that he refers to is in the bill?

Mr. JAVITS. Mr. President, in order to do that, I would have to suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, the committee amendment to which I refer is found on page 5, line 13 of the bill.

The PRESIDING OFFICER. Does the Senator from Arkansas make his unanimous-consent request with the exception of this amendment?

Mr. McCLELLAN. Mr. President, I would like first to make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLELLAN. If the unanimous-consent request is granted, is not the Senator's right protected on this amendment?

The PRESIDING OFFICER. With the condition which the Chair previously stated.

Mr. McCLELLAN. The Senator can move to strike it. It is in the bill. We are quibbling over nothing. We are going to get a vote on it either way.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. McCLELLAN. Yes, I yield.

Mr. JAVITS. I am not quibbling over nothing, and I will demonstrate it.

Mr. President, if there is a tie vote on the amendment of the committee, does the committee amendment win or lose?

The PRESIDING OFFICER. It loses.

Mr. JAVITS. Exactly. So I am not quibbling over nothing.

Mr. McCLELLAN. Just one vote?

Mr. JAVITS. That is right. But I should also like to point out——

Mr. McCLELLAN. Mr. President, this is the customary procedure. If we do not want that any more in the Senate, it is all right with me. I do not care whether we have it or not. I am a little older than most Senators, but I can stay here as long as the rest of you.

Mr. JAVITS. Will the Senator yield further?

Mr. McCLELLAN. I yield.

Mr. JAVITS. Mr. President, it is customary procedure to do exactly what I am suggesting. Many times, Senators have respectfully asked a subcommittee chairman to accept a given amendment.

Mr. McCLELLAN. I have no objection. It makes no difference to me. We are just quibbling here about nothing.

The PRESIDING OFFICER (Mr. BOGGS). Is there objection to the unanimous-consent request of the Senator from Arkansas, with this exception? The Chair hears none, and it is so ordered.

The amendments agreed to en bloc are as follows:

On page 3, line 6, after the word "aids;"; strike out "$220,100,000" and insert "$221,850,000"; in line 15, after the word "vehicles", insert a colon and *"Provided further,* That in addition, this appropriation shall be available for the purchase (not to exceed thirty-three) and modification of passenger motor vehicles for protective purposes without regard to any maximum price limitations otherwise established by law."

On page 4, line 18, after the word "States", insert "and for payments in Ceylonese rupees,".

On page 11, line 2, after the word "Congress", strike out "$2,505,800" and insert "$2,605,000".

On page 11, line 24, after the word "than", strike out "$6,000,000" and insert "$5,800,000".

On page 16, line 24, after the word "certificate;" strike out "$257,485,000" and insert "$260,235,000".

On page 19, line 19, after the word "account," strike out "$21,800,000," and insert "$22,350,000,".

On page 23, line 4, after the word "law," strike out "$45,000,000," and insert "$39,279,000,".

On page 24, line 13, after "83 Stat. 219)," strike out "$20,200,000" and insert "$21,390,000".

On page 25, at the beginning of line 1, strike out "$29,000,000" and insert "$45,000,000".

On page 25, line 6, after the word "Administration," strike out "$7,035,000" and insert "$7,235,000".

On page 25, line 21, after the word "abroad;", strike out "$21,500,000" and insert "$22,000,000".

On page 27, at the beginning of line 1, strike out "$5,851,000" and insert "$5,951,000, of which not to exceed $100,000 shall be available to the Secretary of Commerce for expenses necessary to carry out his responsibilities under the Trade Fair Act of 1959, and the Act to provide for Federal Government recognition of and participation in international expositions proposed to be held in the United States."

On page 27, line 10, after the date "1968," strike out "$2,500,000" and insert "$3,000,000".

On page 27, after line 15, insert:

"NATIONAL INDUSTRIAL POLLUTION CONTROL COUNCIL

SALARIES AND EXPENSES

"For necessary expenses to carry out the provisions of Executive Order 11523 of April 9, 1970, establishing the National Industrial Pollution Control Council, $300,000."

On page 28, line 18, after the word "year;", strike out "$140,000,000" and insert "$141,426,000".

On page 29, line 13, after the word "facilities;", strike out "$4,250,000" and insert "$4,565,000".

On page 30, line 14, after "278d"; strike out "$41,750,000" and insert "$42,350,000"; and at the beginning of line 15, strike out "$500,000" and insert "$800,000".

On page 31, line 23, after the word "expended", strike out "$199,500,000" and insert "$187,500,000".

On page 32, line 21, after the word "which", strike out "$4,000,000 shall be for operation of the N.S. Savannah; *Provided,* That none of the funds appropriated herein are to be used for a layup of the N.S. Savannah; *Provided further,"* and insert "$1,700,000 shall be for the initial phase of layup of the N.S. Savannah: *Provided,".*

On page 39, line 6, after the word "for," strike out "$54,078,000" and insert "$53,862,000".

On page 40, after line 11, strike out:

"FEES OF JURORS AND COMMISSIONERS

"For fees, expenses, and costs of jurors; compensation of jury commissioners; fees of United States commissioners and other committing magistrates acting under title 18, United States Code, section 3041; $15,800,000."

And, in lieu thereof, insert:

"FEES OF JURORS

"For fees, expenses, and costs of jurors; and compensation of jury commissioners: $14,930,000."

On page 41, at the beginning of line 19, strike out "$560,000" and insert "$4,560,000: *Provided,* That this appropriation shall be available for fees of United States Commissioners."

On page 42, line 25, after the word "than", strike out "$6.50" and insert "$12.00".

On page 45, line 9, after the word "Act," strike out "$14,313,000" and insert "$19,000,000."

On page 45, line 15, after "5901–5902," strike out "$3,929,000" and insert "$4,479,000."

On page 48, at the beginning of line 19, strike out "$550,000" and insert "$597,000".

On page 53, line 15, after the word "States", insert "and for payments in Ceylonese rupees".

On page 53, line 23, after "(75 Stat. 527)," strike out "$3,500,000," and insert "$4,566,000".

The PRESIDING OFFICER. The question now recurs on the committee amendment not agreed to, which the clerk will state.

The assistant legislative clerk read as follows:

On page 5, line 13, after the word "Congress," strike out "$144,611,000" and insert "$140,911,000".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. JAVITS. Mr. President, the regular procedure would be for the Senator from Arkansas now to present the bill. I hope very much that that will be possible.

Mr. McCLELLAN. Mr. President, a parliamentary inquiry. Are we taking up the amendment to which the exception was made?

The PRESIDING OFFICER. That particular amendment is the pending question, but the Senator from Arkansas has the right to make his full statement on the bill before the vote.

Mr. McCLELLAN. The question is, are all the other amendments going to be agreed to?

The PRESIDING OFFICER. They have all been agreed to.

Mr. McCLELLAN. With this one exception, they have been agreed to?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLELLAN. All right; then it is not necessarily the order of business. I think we have a right to present perfecting amendments first, and those things. I have no objection, if Senators want to change the whole procedure.

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian that this committee amendment comes first.

Mr. McCLELLAN. Proceed with it, then.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLELLAN. If I am to proceed now, I want to know if I can offer my perfecting amendments before I proceed with this amendment.

Mr. JAVITS. Mr. President, if the Senator will yield, whenever the Senator from Arkansas asks unanimous consent to displace the pending amendment for his perfecting amendments, I shall make no objection.

Mr. McCLELLAN. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Arkansas has the floor.

Mr. McCLELLAN. I thank the Chair.

Mr. President, I shall be rather brief in my analysis of the pending bill providing appropriations for the Departments of State, Justice, and Commerce, the judiciary, and 13 related agencies.

In my opinion, the sum recommended for expenses of the various activities is sufficient to meet their obligations this fiscal year, taking into consideration the fact that expenses have been restricted since July first under the continuing resolution.

As the report indicates, the total amount of the bill as reported to the Senate is $3,121,080,500. This sum is $467,703,600 over the total appropriated for the activities in fiscal 1970, and is $130,119,500 below the total revised budget estimates requested for fiscal 1971, and is a net increase of $14,124,000 above the total sum allowed in the House bill. I ask the Senate to note, however, that included in this increase of $14,124,000 is the sum of $8,364,000 to finance five important items that had not been considered by the House, namely:

First, $1,850,000 for the Department of State to provide $1,100,000 for protection costs of our overseas officials; $650,000 for the Government's contribution to the retirement fund; and $100,000 for the International Pacific Salmon Commission to match the Canadian contribution for the first year's costs of the construction project on the Nadina River.

Second, $2,750,000 for the Federal Bureau of Investigation for 400 additional employees needed to reactivate the fingerprint processing of non-Federal applications submitted by State and local authorities.

Third, $2,914,000 for the judiciary branch to finance the changeover costs from the U.S. commissioner to the magistrate system this fiscal year.

Fourth, $300,000 for the National Industrial Pollution Control Council, a new activity which the President delegated to the Department of Commerce, which is necessary to cover staff support for the Council, composed of 63 industry representatives, that will provide advice on pollution control problems.

Fifth, $550,000 for the Federal Maritime Commission to cover expenses of the new program which concerns the financial responsibility of some 13,000 vessel owners and operators for liability to the United States arising out of claims for damages due to the discharge of oil on coastal or inland waters.

Other changes recommended to the House bill, and considered worthy of note to Members, involve the following:

A reduction of $3,700,000 was made from the House allowance of $7,458,875 in the U.S. assessment for membership in the International Labor Organization, an item included in the appropriation "Contributions to international organizations" of the State Department. This sum represents the undisbursed portion of the amount to be paid in fiscal 1971.

An increase of $550,000 for the design of a specialized medical facility at Butner, N.C., a high-priority item, under the appropriation for "Buildings and Facilities" of the Federal Prison System, Department of Justice.

Also allowed for the Commerce Department were increases of $16 million for the Development Planning Commissions to provide the full budget estimate of $45 million, instead of $29 million allowed by the House; $1,190,000 additional for planning, technical assistance and research programs of the Economic Development Administration, which were considered essential to carry out an adequate program this fiscal year; and $1,426,000 for salaries and expenses of the Environmental Science Services Administration to provide additional funds for air pollution forecasts, modern river and flood forecasting services in critical areas of the country and the establishment of a river forecast service center for the lower Mississippi River Valley.

Offsetting the recommended increases for the Commerce Department were two decreases from the House allowance, one in the amount of $5,721,000, which related to the Nineteenth Decennial Census appropriation, and was agreed to by the Department; and the other, a reduction of $12 million from the House allowance of $199,500,000 in the appropriation "Ship construction" of the Maritime Administration, to provide instead a total of $187,500,000. This balance, together with the reported carryover of $12 million in uncommitted funds, is deemed adequate to finance the ship construction program planned for fiscal 1971.

Under the heading of Related Agencies, two major increases were recommended; namely, $4,687,000 for the Equal Employment Opportunity Commission, to provide the full budget estimate of $19,000,000 instead of $14,313,000, the House allowance; and for the U.S. Information Agency, an additional sum of $1,066,000 was provided in the appropriation for Special International Exhibits. The Committee that felt this increase was justified, in that $966,000 of the sum would be spent for trade fairs and exhibitions in Eastern Europe and the balance, $100,000, would be for Trade Missions, the activity that helps stimulate our overseas trade promotion programs under the Commerce Department.

Mr. President, this gives a brief outline of the major changes made by the Committee to the House bill. The details, of course, are set forth in the report that was unanimously approved by the Committee.

Mr. President, I send to the desk two perfecting amendments to the House bill in order to properly reflect the action taken by the committee. I ask unanimous consent that the amendments be stated.

The PRESIDING OFFICER. Is there objection to the present consideration of these amendments? The Chair hears none, and it is so ordered.

The amendments will be stated.

The assistant legislative clerk read as follows:

On page 11, line 2, strike "$2,605,000" and insert "$2,605,800".

On page 45, line 7, strike "$900,000" and insert "$1,200,000".

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc.

The amendments were agreed to.

Mr. McCLELLAN. Mr. President, I yield to the distinguished Senator from Nebraska.

Mr. HRUSKA. I am grateful to the Senator from Arkansas for yielding to me briefly.

Mr. President, for a number of years the senior Senator from Maine has been the ranking minority member of the subcommittee from which this appropriation bill emanates. She is unable to be present today because of official busi-

ness, and I have been requested to manage the bill on behalf of this side of the aisle. I am of course happy to do so.

The Senator from Maine has attended virtually all the hearings and has followed the procedures and the activities of the subcommittee very carefully. However when the Appropriations Committee held its markup session, she was unable to be present. She did discuss the items contained in the bill with various members of the subcommittee, and made her views known.

The Senator is to be commended for her long years of outstanding service in the Senate, and we hope that that will extend far into the future. It is because of her absence on official business that I undertake to make this brief statement.

Mr. President, I generally subscribe to the presentation just made by the chairman of the subcommittee. This bill should be acceptable, despite the cut of $130 million below the revised budget estimate. All the essential needs of higher priority are met, in our judgment, and it should be approved in its present form.

It is true that there is $14 million-plus over the amount that was included in the bill by the other body. However $8,764,000 of this is for increases in items not considered by the House. These items have all been discussed by the Senator from Arkansas, so I will make only some brief comments on a few of special interest.

The item of $1,100,000 for the Department of State to provide additional protection for our Foreign Service personnel, certainly is much needed. We all know of the increase in threats and violence to our ambassadors and other Foreign Service personnel serving overseas. We are all aware of the coldblooded murder of one of our officers that occurred just recently in Uruguay. The funds included in the bill should permit the Department to get a good start on the job of increasing the level of protection for our people abroad.

The second item I would bring to your special attention is an additional amount for the fingerprint identification services of the Federal Bureau of Investigation. Earlier this year the Bureau reluctantly concluded that it could no longer conduct certain categories of fingerprint checks at the request of State and local governments. The Bureau continued to process fingerprints related to law enforcement and other essential activities, but it could not do so for less critical occupations.

Some of the affected categories are real estate operators, gun permit holders, school teachers, bartenders, cab drivers, race track and casino operators, and so forth. There was a great uproar among the cities and the States when this service was curtailed because the FBI is the only place where a comprehensive collection of fingerprints is maintained.

In allowing this added amount, we are making possible the continuance of a very important service rendered to States and cities all across the country.

Mr. President, this bill contains an item in the amount of $550,000 for the Federal Bureau of Prisons. These funds will be used for planning the Butner Medical Center, which has been needed for a great many years.

Mr. President, I recall that almost 7 or 8 years ago, construction funds were first appropriated for this medical center. The bids which were tendered, however, were higher than the cost estimates upon which the appropriation was made. So, the bids were rejected. The appropriated money was reprogramed, and the construction of the new facility has been postponed ever since that time.

The Butner Medical Center will replace the Springfield, Mo., Medical Center, which is more than 40 years old. The Springfield facility is completely outdated, and is very inadequate as a medical center which must provide specialized medical services to approximately 21,000 inmates in the prison system. The new center will permit help to be given in the field of rehabilitation, and particularly for psychiatric treatment. In the Federal prison system, with approximately 21,000 inmates, there are only 20 psychiatrists scattered throughout the facilities. It is to be hoped that we can proceed with this. It is a matter of high priority in the construction of facilities in the Federal Bureau of Prisons.

Mr. President, I wish to mention only two other items. One is the regional development program which provides funding for the regional action planning commission. The other is the National Industrial Pollution Control Council, which will provide for the participation of industry in the Government's battle against pollution. It is hoped, that the increases for these items will be acceptable to the Senate and that they will be approved.

Mr. President, I want to commend the chairman of the subcommittee for the splendid fashion in which he has handled this bill, from the hearings on through to its successful conclusion.

Mr. President, I yield the floor.

Mr. DOMINICK. Mr. President, will the Senator from Arkansas yield for one or two brief questions?

Mr. McCLELLAN. I yield.

Mr. DOMINICK. Just as a matter of curiosity, and made in no way in the nature of trying to be critical, but the related agencies, I see, under the bill entitled State, Justice, and Ccmmerce, makes appropriations in the Department of Health, Education, and Welfare in the Office of Education and also in the Equal Opportunity Commission. I thought both of those were under HEW bills, and I wonder why they happen to be included in this one as opposed to the other where I believe they rightfully should be.

Mr. McCLELLAN. They are that way in the budget, would be the first answer to the Senator. The administration put them in the budget and the House included these items in the State Justice Commission bill. That is the reason they are in there.

Mr. DOMINICK. Is there any historical precedent for this in the past for the way this is being handled now?

Mr. McCLELLAN. I understand so.

Mr. HRUSKA. There is historic precedent for it, to place it in this bill rather than in some other bill. That has been done for a long time. I remember they have always put it in this bill.

Mr. DOMINICK. I thank the Senator.

Mr. PROXMIRE. Mr. President, on behalf of the Senator from Delaware (Mr. WILLIAMS), the Senator from New York (Mr. GOODELL) and myself, I send to the desk an amendment and ask unanimous consent for its immediate consideration.

Mr. JAVITS. Mr. President, a parliamentary inquiry, if the Senator will yield for that purpose?

Mr. PROXMIRE. Yes, indeed.

Mr. JAVITS. Will consideration of the amendment upon which I have reserved the right in respect of unanimous consent then follow immediately upon completion of the action on this one?

The PRESIDING OFFICER (Mr. BELLMON). As soon as the amendment of the Senator from Wisconsin has been disposed of, the amendment to which the Senator from New York refers will then be considered.

Mr. JAVITS. I thank the Presiding Officer.

The PRESIDING OFFICER. The amendment of the Senator from Wisconsin will be stated.

The legislative clerk read as follows:

On page 49, strike lines 1 through 7, inclusive.

The language sought to be stricken is as follows:

"SUBVERSIVE ACTIVITIES CONTROL BOARD
"SALARIES AND EXPENSES

"For necessary expenses of the Subversive Activities Control Board, including services as authorized by 5 U.S.C. 3109, not to exceed $15,000 for expenses of travel, and not to exceed $500 for the purchase of newspapers and periodicals, $401,400."

Mr. PROXMIRE. Mr. President, what this amendment would do would be to strike from the bill $401,400 for the Subversive Activities Control Board for fiscal year 1971.

The appropriation is $57,000 above the amount requested and granted last year. This reflects the higher salaries for members of the Board, general counsel, and other officials.

As of 1965, the Internal Security Act required individuals who were members of Communist-action or Communist-front organizations to come forward and register themselves as such. The act provided penalties for wilful refusal to register. In 1965, in *Albertson* v. *SACB*, 382 U.S. 70, the Supreme Court held that this provision of the act violated the self-incrimination provisions of the fifth amendment, and was unconstitutional.

From the time of this decision until floor debate in October 1967, the SCAB had had nothing whatsoever to do—and did nothing.

Mr. President, I interrupt at this point to ask unamious consent for a limitation of time on this amendment, with 15 minutes to a side.

The PRESIDING OFFICER (Mr. BELLMON). Is there objection to the request of the Senator from Wisconsin? The Chair hears none, and it is so ordered.

Mr. PROXMIRE. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for 5 minutes.

Mr. PROXMIRE. In an effort to give the Board one last chance, the Mansfield-Proxmire-Dirksen compromise was worked out. The compromise amended the law by changing the above provision, and providing instead that the Attorney

General would cite individuals to the Board—removing the onus from the individual to come forward himself and register. The Board would then investigate and if it found that the individual cited was in fact a member, it would register him. The compromise also provided that if no new cases—and hearings—were opened within a year, the Board would cease to exist.

On June 30, 1968, just before the deadline, Ramsey Clark certified seven new cases to the Board—one of them was Boorda, whose case was decided by the District of Columbia Court of Appeals last December. In September 1968, the Board opened hearings on these cases. This was enough to void the "self-destruct" provision of the compromise, and the Board has been in existence since.

As a result of last December's decision, though, the Board still has not actually registered anyone.

Board members now earn $36,000 each—or $180,000 for the five Board members. This must be the highest paid group of benchwarmers in the history of the Federal Government.

Basic reason for my amendment: the Board has absolutely nothing to do. The courts have left it completely powerless. I am as anxious as anyone in this body to see subversive elements—including the Communist Party—controlled, and to do all we can to protect our constitutional form of government from all efforts to overthrow it by violent means. However, I cannot condone appropriating the taxpayers' money for absolutely nothing, and nothing is all the Board has achieved in its 20 years of existence.

The most recent court action which rendered the Board powerless was in Boorda against SACB, decided by the District of Columbia Court of Appeals in December 1969. That case held that penalizing membership in an association, without requiring any finding that the member knew of the group's purposes, or intended to participate in those purposes, violates the freedom of association guarantees of the Constitution, the first amendment.

Here is some of what the court said:

In the present situation, we cannot assume that disclosure of an individual's membership in the Communist Party will not operate as a substantial burden upon the exercise of his right of free association. Therefore the disclosure provisions of sec. 13(g)(2) must fall as contrary to the First Amendment.

The court also went on to say:

When a quasi-political party or other group may embrace both legal and illegal aims, affiliation with and membership in that group are constitutionally protected except for those who join with the specific intent to further illegal action.

Mr. President, I ask unanimous consent that the full opinion be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER (Mr. BELLMON). Without objection, it is so ordered.

(See exhibit 1.)

Mr. PROXMIRE. Mr. President, in April of this year, the Supreme Court denied certiorari, thereby permitting this decision to stand—April 20, 1970. Thus, with this decision on the books, the SACB can no longer operate under the existing law.

Perhaps we should amend the law. Perhaps we should provide that the Board can only register individuals if it makes finding of membership—as at present—and in addition, makes the finding that the individual joined with knowledge of the group's purposes and with the intent to further them.

Such an amendment would restore the Board's power to take action. It would at least render the Board a functioning body. But, until we do so, we have no business appropriating an additional $400,000 for this board on top of the $6 million we have already wasted on this exercise in futility. If the Board has something to do, fine. But right now it has absolutely nothing to do. And as long as it has nothing to do, nothing is what Congress should appropriate for it.

Consider fiscal responsibility—and the President's two vetoes.

The President has vetoed four major bills passed by Congress on the ground of fiscal responsibility—Labor and HEW for fiscal year 1970, which was $1.3 billion over; independent offices for fiscal year 1971, which was $541 million over the President's request; Office of Education, which was $454 million over; the hospital authorization bill, which was $342 million over the first year of authorization.

Admittedly, the $6 million for the Subversive Activities Control Board in the past 20 years is small by comparison.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PROXMIRE. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for 2 additional minutes.

Mr. PROXMIRE. Mr. President, how can we hope to take the President to task for priorities if we go ahead and blithely appropriate $400,000 for a board which has accomplished nothing? It is perfectly obvious that unless we change the law or have a constitutional amendment, one or the other, the Board can do nothing.

Mr. President, I reserve the remainder of my time.

EXHIBIT 1

[Nos. 22514, 22522.—U.S. Court of Appeals District of Columbia Circuit]

SIMON BOORDA, PETITIONER, *v.* SUBVERSIVE ACTIVITIES CONTROL BOARD, RESPONDENT—ROBERT ARCHULETA AND WAYNE DALLAS HOLLEY, PETITIONERS, *v.* SUBVERSIVE ACTIVITIES CONTROL BOARD, RESPONDENT

Argued September 16, 1969.

Decided December 12, 1969.

Petitions for review of order of Subversive Activities Control Board. The Court of Appeals, Bazelon, Chief Judge, held that in proceedings to determine whether individuals were members of organization which was a Communist-action organization, the individuals were not entitled to have status of the organization redetermined, but that provisions of Subversive Activities Control Act allowing public disclosure of an individual's membership in a Communist-action organization without finding that individual concerned shares in any illegal purposes of organization to which he belongs violates First Amendment.

Cases remanded to Subversive Activities Control Board with instructions to dismiss the petitions.

1. War and National Defense—50: A basis objective of the Subversive Activities Control Act is to provide public information concerning Communist activities. Subversive Activities Control Act of 1950, §§ 1–21, 14(a) as amended 50 U.S.C.A. §§ 781–798, 793(a).

2. War and National Defense—50: In proceedings to determine whether individuals were members of organization which was a Communist-action organization, the individuals were not entitled to have status of the organization redetermined. Subversive Activities Control Act of 1950, §§ 1–21, 14(a) as amended 50 U.S.C.A. §§ 781–798, 793(a).

3. Constitutional Law—91: Mere membership in Communist Party is protected by First Amendment. U.S.C.A.Const. Amend. 1.

4. Constitutional Law—91: Individual's right of association is protected by the First Amendment. U.S.C.A.Const. Amend. 1.

5. Constitutional Law—91: When a quasi-political party or other group may embrace both legal and illegal aims, affiliation with and membership in that group are constitutionally protected except for those who join with specific intent to further illegal action. U.S.C.A.Const. Amend. 1.

6. Constitutional Law—91: That some members of Communist Party might be engaged in activities not protected by First Amendment does not mean that the protected activity of other members may be infringed. U.S.C.A.Const. Amend. 1.

7. Constitutional Law—82: If constitutional rights are abused, legislative intervention can find constitutional justification only by dealing with the abuse and the rights themselves must not be curtailed.

8. Constitutional Law—91, War and National Defense—36: Disclosure provisions of Subversive Activities Control Act allowing public disclosure of individual membership in a Communist-action organization without finding that individual concerned shares in any illegal purposes of organization to which he belongs violates First amendment. U.S.C. Const. Amend. 1; Subversive Activities Control Act of 1950, § 13(g) (2) as amended 50 U.S.C.A. § 792(g) (2).

9. Constitutional Law—91: First Amendment precludes government from claiming an interest in public disclosure of associations of innocent members of Communist-action organizations. U.S.C.A.Const. Amend. 1; Subversive Activities Control Act of 1950, § 13(g) (2) as amended 50 U.S.C.A. § 792 (g) (2).

Mr. John J. Abt, New York City, of the bar of the Court of Appeals of New York, pro hac vice, by special leave of court, with whom Mr. Joseph Forer, Washington, D.C., was on the brief, for petitioners.

Mr. Kevin T. Maroney, Atty., Department of Justice, with whom Mr. J. Walter Yeagley, Asst. Atty. Gen., Messrs. Frank R. Hunter, Jr., General Counsel, Charles F. Dirlam, Assistant General Counsel, Subversive Activities Control Board, and Mrs. Lee B. Anderson, Atty., Department of Justice, were on the brief for respondent.

Mr. Lawrence Speiser, Washington, D.C., filed a brief on behalf of American Civil Liberties Union, as amicus curiae urging reversal.

Before Bazelon, Chief Judge, and Wright and McGowan, Circuit Judges.

Bazelon, Chief Judge:

These are petitions under § 14(a) of the Subversive Activities Control Act[1] to set aside orders of the Subversive Activities Control Board determining that each of the several petitioners is "a member of the Communist Party of the United States of America, a Communist-action organization." The fact of membership is not at issue.[2] Instead, petitioners attack the Board's construction, and the constitutionality, of the Act. The Board erred, they argue, in taking official notice of its prior determination that the Communist Party is a Communist-action organization, and in not allowing petitioners to demand a redetermination of the status of the Party in the proceedings against them.

Footnotes at end of article.

Additionally, they claim that the Act is constitutionally defective in allowing public disclosure of an individual's membership to be made without a finding that the individual concerned shares in any illegal purposes of the organization to which he belongs. We find this second argument persuasive.[3]

I

Under the Act, when the Attorney General has "reason to believe * * * that any individual is a member of an organization which has been determined by final order of the Board to a Communist-action organization," he is to file a petition with the Board seeking a determination "that such individual is a member of such Communist-action organization." § 13(a). After hearing, the Board is to make a written report including its findings of fact. If it determines that the "individual is a member of a Communist-action organization," it shall issue and serve him with an order "determining such individual to be a member of a Communist-action organization." § 13(g)(2).[4] Petitioners argue that the difference in language between the two subsections is critical: that is, they would read § 13(a) as instructing the Attorney General to institute proceedings before the Board whenever it comes to his attention that an individual belongs to any organization "which *has been determined by final order of the Board* to be a Communist-action organization." But § 13(g)(2) requires the Board to determine that the "individual *is* a member of a Communist-action organization," and this language is said to imply that, during the course of the hearings on a petition to determine an individual's membership, the Board must not only find that the individual is a member of a named organization, but must also redetermine that the organization is in fact a Communist-action organization.[5] Support for this construction is sought in § 13(b) and (1), which provide for redetermination not more than once each calendar year, of the status of individuals and organizations against which Board orders are outstanding. Petitioners would read these subsections to allow an individual to reopen the status of an organization of which he is a member in a § 13(b) petition for redetermination. Therefore, they argue, § 13(g) should be read in the same way, and an individual should be allowed to litigate the status of an organization of which he is alleged to be a member during the course of the initial proceedings against him.

On its face, § 13(b) does not compel the construction sought by petitioners. It provides, in pertinent part:

"Any organization as to which there is in effect a final order of the Board determining it to be a Communist-action or Communist-front organization, and *any individual as to whom there is in effect a final order of the Board* determining such individual to be a member of a Communist-action organization *may, not more often than once in each calendar year, file* with the Board and serve upon the Attorney General *a petition for a determination that such organization no longer is a Communist-action or Communist-front organization, or that such individual no longer is a member of a Communist-action organization, as the case may be.*" (Emphasis added.)

This language is not entirely free from ambiguity, but it seems to imply that an individual, in a § 13(b) proceeding, may contest only the fact of his membership in a named organization against which an order is already outstanding.[6] The limitation of petitions to one per calendar year is at least an indication that Congress intended that no particular issue should be relitigated more than once each year.[7] Allowing individual members of an organization to reopen the complex question whether the organization to which they belong is a Communist-action organization would be to open the door to substantial delaying tactics without providing a corresponding benefit to anyone.[8] Absent any support in the legislative history for petitioners' construction of § 13(b),[9] we cannot conclude that it was intended to allow individuals to contest the status of the organizations to which they belong.

Deprived of any support from § 13(b), petitioners' construction of § 13(g) must likewise fail. That construction would require us to read identical statutory language[10] in substantially different ways without any apparent support for such a different construction in the legislative history.[11] It would raise a serious risk of inconsistent adjudications; that is, of opposite determinations of the same question (whether a given organization is a Communist-action organization) in proceedings against different individuals.[12] That § 13(a) allows individual proceedings to be consolidated is no assurance that they would be. The Board did not err in holding that petitioners may not challenge the status of the Communist Party in the instant proceeding.

II

We must therefore face the constitutional question. Petitioners argue that § 13(g)(2) of the Act[13] is invalid because it provides for public disclosure of the fact of their membership in the Communist Party whether or not they intend to further any of the Party's illegal, as well as its legal and constitutionally protected aims.[14] The Board's primary response to this argument is that it is foreclosed by the Supreme Court's decision in Communist Party v. Subversive Activities Control Board, 367 U.S. 1, 81 S.Ct. 1357, 6 L.Ed.2d 625 (1961).[15]

The Supreme Court in the *Communist* Party case was presented with the question whether the First Amendment prohibited the requirement, set forth in § 7 of the original Act,[16] that organizations found to be dominated by a foreign power and intending the illegal overthrow of existing government could be required to file registration statements including the names and addresses of their members.[17] Individual members of the Communist Party were not parties to the action, but the Court allowed the Party standing to assert those rights of its members, such as anonymity, which are allegedly infringed by the very act of *its filing a registration statement*, and which could not be otherwise asserted than by raising them here." 367 U.S. at 81, 81 S.Ct. at 1402.

The Court examined the structure of the Act, and found that the registration and disclosure requirement of § 7 did not attach "to the incident of speech, but to the incidents of foreign domination and of operation to advance the objectives of the World Communist movement." *Id* at 90, 81 S.Ct. at 1407. Since regulation was premised on constitutionally unprotected conduct, the Court was required to balance "the value to the public of the ends which the regulation may achieve" against "the impediments which particular governmental regulation causes to entire freedom of individual action." *Id.* at 91, 81 S.Ct. at 1407; see United States v. O'Brien, 391 U.S. 367, 377, 88 S.Ct. 1673, 20 L.Ed.2d 672 (1968). Although the Court did not consider the incidental infringement of First Amendment rights to be insubstantial, *see* 367 U.S. at 102, 81 S.Ct. 1357, it concluded that the importance of the government's interest in disclosing the names of those who desired to further the illegal aims of Communist-action organizations justified the requirement that such organizations make public their membership lists. *Id.* at 102–103, 81 S.Ct. 1357.

The present case, however, stands on an entirely different footing. Of course, in both cases the class of persons upon whom disclosure ultimately operates is the same—all members of the organization, whether innocent or guilty. But § 7 of the original Act on its face dealt directly with organizations at least some of whose members shared in the illicit, constitutionally unprotected aims of the organization. *See id.* at 23–27, 42–55. Of course it would hardly have been practicable to require the organizations themselves to distinguish in their membership lists between innocent and guilty members. Therefore, the disclosure provisions were viewed as attaching to the incidents of foreign domination and illicit purpose, characteristics of the organization and of some but not all of its members. Innocent members were unavoidably caught up in a net designed to disclose the guilty. But § 13(g)(2) operates directly on individuals; consequently, the "operative fact[s] upon which [the statute] depends," United States v. Robel, 389 U.S. 258, 263, 88 S.Ct. 419, 423, 19 L.Ed.2d 508 (1967), must be facts characteristic of the individual upon whom the statute operates. Under § 13(g)(2), disclosure attaches to mere membership in a Communist-action organization, whether or not the member whose affiliation is to be publicized has engaged in, or has any intent to further, the illicit ends of the organization. If mere membership, to which disclosure attaches, is constitutionally protected, the balancing test is inapplicable. *Communist Party, supra,* 367 U.S. at 90, 81 S.Ct. 1357.[18] Consequently, the question for decision is simply whether the statute infringes protected rights. De Jonge v. Oregon, 299 U.S. 353, 364–365, 57 S.Ct. 255, 81 L.Ed. 278 (1937).

[3–7] It seems clear to us that mere membership in the Communist Party is protected by the First Amendment. For it is "now beyond dispute," Bates v. City of Little Rock, 361 U.S. 516, 523, 80 S.Ct. 412, 4 L.Ed.2d 480 (1961), that "an individual's right of association * * * is protected by the provisions of the First Amendment." United States v. Robel, 389 U.S. 258, 263, 88 S.Ct. 419, 423 (1967). When a "quasi-political part[y] or other group * * * may embrace both legal and illegal aims," Scales v. United States, 367 U.S. 203, 229, 81 S.Ct. 1469, 1486, 6 L.Ed.2d 782 (1961), affiliation with and membership in that group are constitutionally protected except for those who join "with the 'specific intent' to further illegal action." Elfbrandt v. Russell, 384 U.S. 11, 17, 86 S.Ct. 1238, 1241, 16 L.Ed.2d 321; *see* Noto v. United States, 367 U.S. 290, 299–300, 81 S.Ct. 1517, 6 L.Ed.2d 836 (1961). "Assuming that some members of the Communist Party * * * had illegal aims and engaged in illegal activities, it cannot automatically be inferred that all members shared their evil purposes or participated in their illegal conduct." Schware v. Board of Bar Examiners, 353 U.S. 232, 246, 77 S.Ct. 752, 760, 1 L.Ed.2d 796, 64 A.L.R. 2d 288 (1957). For "men in adhering to a political party or other organization notoriously do not subscribe unqualifiedly to all of its platforms or asserted principles." Schneiderman v. United States, 320 U.S. 118, 136, 63 S.Ct. 1333, 1342, 87 L.Ed. 1796 (1943).[19] Therefore the fact that some members of the Communist Party may be engaged in activity not protected by the First Amendment does not mean that the protected activity of other members may be infringed. If rights are abused, "legislative intervention can find constitutional justification only by dealing with the abuse. The rights themselves must not be curtailed." De Jonge v. Oregon, *supra,* 299 U.S. at 364–365, 57 S. Ct. at 260.

[8] Since the disclosure provisions of § 13(g)(2) attach solely to constitutionally protected rights, the only remaining question is whether they operate to discourage or penalize the exercise of those rights. We believe that they do. "Inviolability of privacy in group association may in many circumstances be indispensable to preservation of freedom of association, particularly where a group espouses dissident beliefs." NAACP v. Alabama ex rel. Patterson, 357 U.S. 449, 462, 78 S.Ct. 1163, 1172, 2 L.Ed.2d 1488 (1958). In the present situation, we cannot assume

Footnotes at end of article.

that disclosure of an individual's membership in the Communist Party will not operate as a substantial burden upon the exercise of his right of free association.[20] Therefore, the disclosure provisions of § 13(g) (2) must fall as contrary to the First Amendment. United States v. Robel, *supra;* De Jonge v. Oregon, *supra.*

III

[9] We would be led to the same conclusion under the balancing test as enunciated in the *Communist Party* case.[21] The court in that case sustained the disclosure provisions of § 7 of the original Act, which like the present statute made no distinction between innocent and guilty members. But disclosure in that case was sought from the Party, not from individuals,[22] and consequently there was available no practicable, less intrusive alternative to disclosure of the names of all members: to ask the Party itself to distinguish between those of its members who did and who did not share its illegal aims would be to ask the impossible. But proceedings under § 13(g) (2) are on a case-by-case basis, rendering it feasible to distinguish in each case between protected and unprotected membership. Scales v. United States, 367 U.S. 203, 81 S.Ct. 1469, 6 L.Ed.2d 782 (1961). Therefore, in weighing the public interest in disclosure, we must weigh a different quantity: since innocent members may easily be separated from guilty ones, the public interest in exposure of the guilty cannot be used to justify exposure of the innocent. See Keyishian v. Board of Regents, 385 U.S. 589, 606–607, 87 S.Ct. 675, 17 L.Ed.2d 629 (1967); Shelton v. Tucker, 364 U.S. 479, 488, 81 S.Ct. 247, 5 L.Ed.2d 231 (1960). Since the First Amendment precludes the government from claiming an interest in public disclosure of the associations of innocent members of Communist-action organizations,[23] Elfbrandt v. Russell, 384 U.S. 11, 17, 86 S.Ct. 1238, 16 L.Ed.2d 231 (1966), the governmental interest to be weighed in this case is nil.[24]

Since § 13(g) (2) of the Subversive Activities Control Act is contrary to the First Amendment, the orders issued in these cases cannot stand. The cases must be remanded to the Subversive Activities Control Board with instructions to dismiss the petitions.

It is so ordered.

FOOTNOTES

[1] Title I of the Internal Security Act of 1950, 64 Stat. 987, *as amended* 50 U.S.C. §§ 781–798 (1964 & Supp. IV, 1969). Unless otherwise indicated, all references are to the Act as amended.

[2] Petitioners have refused to respond to the allegations of membership on the ground that the statute under which proceedings were had is unconstitutional.

[3] We do not, therefore, consider petitioners' other constitutional claims.

[4] If the Board determines that an individual is not a member of a Communist-action organization, it shall issue and serve upon the Attorney General "an order denying the determination sought by his petition." § 13(h) (2).

[5] Petitions for determination that an individual is a member of a Communist-action organization apparently cannot be brought until the organization in question has been determined by the Board to be a Communist-action organization. *See* § 13(a).

[6] Of course, a petitioner in a § 13(b) proceeding could argue that there was no longer a Board order outstanding against an organization of which he was a member.

[7] The limitation of § 13(b) petitions to one per year was contained in the original act and carried over in the 1968 amendments. But it is of some relevance that the House Report on the 1968 amendments indicated substantial concern over delay in Board proceedings. *See* H.R. Rep. No. 733, 90th Cong., 1st Sess. 10 (1967).

[8] An organization may, of course, reopen the question of its status once per year under § 13(b); this should provide at least some remedy for the organization's members.

[9] Petitioners have directed us to no such material, nor have we been able to unearth any.

[10] The phrase "is a member of a Communist-action organization," appearing in § 13(b) and (g) (2) of the Act.

[11] As originally enacted, § 13(g) (2) spoke of "a Communist-action organization (*including an organization required by final order of the Board to register under* § 7(a))" (emphasis added). 64 Stat. 1000. The italicized phrase is missing from the section as amended in 1968. But the House Report on the amendments describe them as simply "conforming amendments" to bring the Act in line with Albertson v. SACB, 382 U.S. 70, 86 S.Ct. 194, 15 L.Ed.2d 165 (1965). We do not believe that the House intended the radical alteration in Board proceedings sought by petitioners. *See* H.R. Rep. No. 733, 90th Cong., 1st Sess. 23 (1967).

[12] A "basic objective" of the Act is to provide public information concerning Communist activities. *See* H.R. Rep. No. 733, *supra* note 11, at 3. A regular pattern of inconsistent determinations based not on changed circumstances but solely on the particular evidence adduced at different proceedings would hardly advance this objective.

[13] Section 13(g) provides:

"If, after hearing upon a petition filed under subsection (a) of this section the Board determines—

* * * * *

"(2) that an individual is a member of a Communist-action organization it shall make a report in writing in which it shall state its findings as to the facts and shall issue and cause to be served on such individual an order determining such individual to be a member of a Communist-action organization."

All such orders are a matter of public record. § 9(a).

[14] Neither petitioners nor the Board suggests that § 13(g) (2) could be construed so as to apply only to those members of Communist-action organizations who share in the group's illegal aims, and we believe they are correct. United States v. Robel, 389 U.S. 258, 262, 88 S.Ct. 419, 19 L.Ed.2d 508 (1967); Aptheker v. Secretary of State, 378 U.S. 500, 511 n. 9, 515–516, 84 S.Ct. 1659, 12 L.Ed.2d 992 (1964); *see* Killian v. United States, 368 U.S. 231, 82 S.Ct. 302, 7 L.Ed.2d 256 (1961).

[15] It has been elsewhere suggested that Supreme Court cases subsequent to the decision in *Communist Party* have eroded its validity. Note, Civil Disabilities and the First Amendment, 78 Yale L.J. 842 (1969); *see* United States v. Robel, 389 U.S. 258, 88 S.Ct. 419 (1967); Keyishian v. Board of Regents, 385 U.S. 589, 87 S.Ct. 675, 17 L.Ed.2d 629 (1967); Elfbrandt v. Russell, 384 U.S. 11, 86 S.Ct. 1238, 16 L.Ed.2d 321 (1966). In view of the disposition made here, we need express no opinion on this point.

[16] That section has since been repealed Act of January 2, 1968, Pub.L., No. 90–237, § 5, 81 Stat. 766.

[17] The Court in *Communist Party* phrased the issue as follows:

"The Communist Party would have us hold that the First Amendment prohibits Congress from requiring the registration and filing of information, including membership lists, by organizations substantially dominated or controlled by the foreign powers controlling the world Communist movement and which operate primarily to advance the objectives of that movement: the overthrow of existing government by any means necessary and the establishment in its place of a Communist totalitarian dictatorship." 367 U.S. at 88–89, 81 S.Ct. at 1406.

It pointed out that "our consideration of any other provisions than those of § 7, requiring Communist-action organizations to register and file a registration statement, could in no way affect our decision in the present case." *Id.* at 77, 81 S.Ct. at 1400.

[18] *See also* United States v. Robel, 389 U.S. 258, 268 n. 20, 88 S.Ct. 419, 426 (1967), where the Supreme Court explicitly rejected any attempt at "balancing" in dealing with § 5 of the Act:

"It has been suggested that this case should be decided by "balancing" the governmental interests expressed in § 5(a)(1)(D) against the First Amendment rights asserted by the appellee. This we decline to do. We recognize that both interests are substantial, but we deem it inappropriate for this Court to label one as being more important or substantial than the other. * * *"

Petitioners suggest that this footnote implies that the approval of "balancing" in *Communist Party, see* 367 U.S. at 91, 81 S.Ct. 1357, has since been withdrawn. But the Court once again resorted to a balancing test in United States v. O'Brien, 391 U.S. 367, 377, 88 S.Ct. 1673, 20 L.Ed.2d 672 (1968). It appears, then, that balancing may be appropriate when a statute is directed at constitutionally unprotected conduct, and infringes upon protected conduct only as an unavoidable side effect of an otherwise unexceptionable purpose. But where, as in *Robel,* "the operative fact upon which [the statute] depends is the exercise of [a right] protected by the provisions of the First Amendment," 389 U.S. at 263, 88 S.Ct. at 423, the First Amendment precludes a resort to "balancing."

[19] The Board relies upon Adler v. Board of Education, 342 U.S. 485, 494–495, 72 S.Ct. 380, 96 L.Ed. 517, 27 A.L.R.2d 472 (1952), for the contrary proposition. But the Supreme Court in Keyishian v. Board of Regents, 385 U.S. 589, 595, 87 S.Ct. 675, 679, 17 L.Ed.2d 629 (1967) pointed out that "pertinent constitutional doctrines have since rejected the premises" of that decision.

[20] There is no direct evidence in the record in this case as to the degree of harassment that one named as a member of the Communist Party may suffer as a result. But although it is true that the Supreme Court has in some cases relied solely on record evidence to establish such a possibility, *e.g.,* Shelton v. Tucker, 364 U.S. 479, 486 n. 7, 81 S.Ct. 247, 5 L.Ed. 231 (1960), Bates v. Little Rock, 361 U.S. 516, 520–522, 80 S.Ct. 412, 4 L.Ed.2d 430 (1960), NAACP v. Alabama, 357 U.S. 449, 462, 78 S.Ct. 1163 (1958), it was willing to state in *Communist Party* that "the public opprobrium and obloquy which may attach to an individual listed with the Attorney General as a member of a Commuunist-action organization is no less considerable than that * * * in *N.A.A.C.P.* and *Bates.*" 367 U.S. at 102, 81 S.Ct. at 1413. And in American Communications Ass'n v. Douds, 339 U.S. 382, 402, 70 S.Ct. 674, 686, 94 L. Ed. 925 (1950), the Court noted:

"Under some circumstances, indirect 'discouragements' undoubtedly have the same coercive effect * * * as imprisonment * * *. A requirement that adherents of particular religious faiths or political parties wear identifying arm-bands, for example, is obviously of this nature."

[21] "Against the impediments which particular governmental regulation causes to entire freedom of individual action, there must be weighed the value to the public of the ends which the regulation may achieve." 367 U.S. at 91, 81 S.Ct. at 1407.

[22] This difference was used in *Communist Party* to distinguish Shelton v. Tucker, 364 U.S. 479, 81 S.Ct. 247, 5 L.Ed.2d 231 (1960). *See* 367 U.S. at 92–93, 81 S.Ct. 1357.

[23] We are not dealing here with a legislative investigation the primary purpose of which is to inform Congress with respect to matters properly within its concern. In such cases, some disclosure to the public may be justified as a necessary incident of disclosure to Congress. *Cf.* Watkins v. United States, 354 U.S. 178, 187, 77 S.Ct. 1173, 1 L.Ed.2d 1273 (1967); United States v. Rumely, 345 U.S. 41, 56–58,

73 S.Ct. 543, 97 L.Ed. 770 (1953) (concurring opinion).

[24] In the *Communist Party* case, the Court sustained the disclosure provisions of § 7 of the original Act because "the mask" of anonymity which [the] organization's members wear serves * * * [to enable] them to cover over a foreign-directed conspiracy, infiltrate into other groups, and enlist the support of persons who would not, if the truth were revealed, lend their support." 367 U.S. at 102–103, 81 S.Ct. at 1414. In other words, the government's interest in disclosure was considered to be its interest in disclosure of the names of guilty members of the Party, *i.e.*, those who shared the purposes found by the Court not to be constitutionally protected. But, as pointed out above, there was in that case no practicable way of distinguishing between innocent and guilty members, and a refusal to consider the public interest in disclosure of the guilty members would have meant that the interest could not have been protected at all. *See* 367 U.S. at 88–89, 81 S.Ct. 1357.

The PRESIDING OFFICER. Who yields time?

Mr. McCLELLAN. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 5 minutes.

Mr. McCLELLAN. Mr. President, this issue is not new. It has been raised before. The Senate has resolved it on two previous occasions. On October 11, 1967, the same issue was raised. We should bear in mind that at that time it was raised under the previous administration.

The previous administration refused or declined to assign any work to this board. For what reason, I do not know, unless it took the view that the Senator takes here today, that it was a waste of funds and a waste of effort and was not justified.

The present administration proposes to use the board. As I said, the issue has been here twice before at a time when the board had nothing to do.

The Senate, on October 11, 1967, rejected an amendment to this bill by the distinguished Senator from Delaware to eliminate this item and rejected it by a vote of 54 to 36.

Thereafter, in the same year, the same Congress on October 23—just 12 days later—rejected an amendment by the Senator from Massachusetts (Mr. BROOKE), to a separate bill, to terminate completely this board. The Senate at that time rejected the Brooke amendment by a vote of 58 to 17.

We now have a new administration, an administration that has promised to use this board, an administration that is using it. It has already referred two cases to it. The board is now working on those cases.

I am advised, although I do not have it in writing—I just took their word for it—that other cases are being processed in the Justice Department which will likely go to the Board.

It is said that this Board cannot do anything. Let me point out what is involved here. If there were ever a time in the history of this Nation when there were movements within the country that are subversive to the principles of our Government to its very foundation, if there were ever a time when there were organizations, militant and extreme organizations, in this country whose purpose and design and objectives are to bring about a revolution and overthrow the Government, if there were ever a time when there has been so much bombing, rioting, and subversive activities in this country, so far as I know now is that time.

This would be a pretty present, I think, for the Senate now to present to those forces at a time when the Board, in effect, has been reactivated by this administration. We would be saying in effect to the Board, "You cannot do it any longer." That would be a pretty present to present to those forces and those elements that are on the rise in America today, whose activities are being accentuated and increased.

It would be a bad time to say, "You are free. You are not going to be investigated by the Department of Justice or by the Subversive Activities Control Board."

Mr. President, I think it would be a terrible mistake. I do not want to do it. I do not know how much the Board can do. But I do know what we are proposing to do. We might save $400,000, but at the same time we would permit organizations like the two whose cases have been referred to the Subversive Activities Control Board to continue their activities.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter dated August 10, 1970, from the Chairman of the Board, John W. Mahan. We also have testimony in the RECORD, I believe.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SUBVERSIVE ACTIVITIES CONTROL BOARD,
Washington, D.C., August 10, 1970.

Hon. JOHN L. MCCLELLAN,
Chairman, Subcommittee of the Committee on Appropriations, Departments of State, Justice, and Commerce, the Judiciary and Related Agencies, U.S. Senate, Washington, D.C.

DEAR SENATOR MCCLELLAN: Following my testimony before your Subcommittee on June 24, 1970, the Attorney General on July 14, 1970, filed petitions before the Subversive Activities Control Board alleging that certain groups were Communist-front organizations.

These groups are the Young Workers Liberation League alleged to be a Marxist-Leninist youth organization created and controlled by the Communist Party, and the Center for Marxist Education alleged to be a training center for Communist Party members and receiving financial aid and other support from the Communist Party.

On August 5, 1970, the attorney for the respondents filed with this Board answers denying the allegations and motions to dismiss the petitions.

The Board's Rules of Procedure provide that a reply to a written motion shall be filed within seven days after the date of service thereof and it is expected the Attorney General will reply to these pleadings. Upon receipt of the reply these motions will be set for hearing by the Board at an early date.

The Young Workers Liberation League is asserted to have local chapters functioning in several of the large cities of the United States and if it should be the determination of the Board to overrule the motion of the respondents it would be expected that extensive hearings by this Board will take place in these large cities where the organizations are functioning.

I enclose with this letter copies of the petitions, the motions and answers and the press release of July 14, 1970, by the Attorney General.

Sincerely,

JOHN W. MAHAN,
Chairman.

Mr. McCLELLAN. Mr. President, I do not agree that we should say, now that the Board has been reactivated by the present administration:

We are cutting you off. We are not worried about what is going on in America. Let the extremists have their day. Let them go on and undermine the Government. We will cut off all power to investigate and will cut off all money and abolish the board and let them go free.

Although this Board may not be what it should be because it has been handicapped by the courts, it is true, we propose in the report that the Senate Judiciary Committee review the legislation with a view to amending and strengthening it, if that can be done, or with a view of determining whether the Board should be abolished.

Mr. President, I submit that this ought to be done legislatively. This would be the wrong way to do it in an appropriation bill. We have a Judiciary Committee which is the appropriate legislative committee that is empowered to act. If Congress wants to repeal this act, that is the way to proceed.

Mr. HRUSKA. Mr. President, will the Senator yield me 3 minutes?

Mr. McCLELLAN. Mr. President, I yield 3 minutes to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 3 minutes.

Mr. HRUSKA. Mr. President, I rise to oppose the amendment and support the position expressed by the Senator from Arkansas.

After thorough consideration, this Congress did decide that it would continue the life of this Board. That was done 3 years ago in October of this year. The continuation of the Board was conditional, on the referral of additional cases to it. They were, and proceedings were had.

Two cases were recently referred to the Commission. One of them has to do with the Young Workers Liberation League. The other has to do with the Center for Marxist Education. These cases are pending and proceedings are in process.

Mr. President, if a change is to be made, it should be made by legislating amendments to the act which created this Board. It should not be done by the type of amendment now pending before the Senate.

The committee considered the matter at length and included this language at the bottom of page 35 of the report:

The committee recommends that the Senate Committee on the Judiciary give consideration to reviewing the operation of this Board and its present powers in view of recent court decisions.

The amendment should be rejected and the matter referred for consideration in the fashion suggested in the report.

Mr. GRIFFIN. Mr. President, will the distinguished Senator yield?

Mr. McCELLAN. Mr. President, I yield

2 minutes to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 2 minutes.

Mr. GRIFFIN. Mr. President, in 1967 when a previous vote was taken, I voted for an amendment similar to the one that is now pending. I voted in that way, not because I did not favor the Board and not because I saw no reason for its existence or for its activities, but because the Board had not received anything to do and there were no prospects at that time that it could be given anything. I find the situation to be different now. The Board has been assigned work and we have the assurance of the administration that it will be assigned more work.

Certainly, there is plenty of work for such an investigative body to do, in addition to such work as the appropriate committees of Congress can do.

Therefore, I think it is in order to reject this amendment and to support the appropriation recommended by the committee.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield 2 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 2 minutes.

Mr. THURMOND. Mr. President, I rise to support the appropriation for the Subversive Activities Control Board. As a member of the Senate Internal Security Subcommittee, I have long followed the problems of the SACB, and I am aware both of its accomplishments and its potential. I am also aware of the obstacles which the courts have placed before the work of the Board through no fault of its own.

J. Edgar Hoover has testified that Communist Party leaders boasted that if they could repeal the Subversive Activities Control Act and destroy the Board, they could recruit 50,000 members a year.

For 20 years the Communist Party, its fronts and its fellow travelers have been trying to destroy the Board and rescind the law creating it. The fact of the matter is that the Communist Party and its fronts have spent thousands and thousands of dollars fighting this act in the courts; that the courts, including the Supreme Court, have reviewed it thoroughly and upheld the Board's authority to hold hearings and issue reports on Communist-action organizations, Communist-front organizations, and Communist-infiltrated groups.

Let me give an example. Back in 1949 the party established another youth front called the Labor Youth League—LYL. In April 1953, the Attorney General petitioned the Subversive Activities Control Board to hold hearings on this group for the purpose of finding it a Communist front. The Board held hearings in 1953 and 1954 and issued its report finding the group a Communist front in 1955.

The LYL then experienced a decline. Two years later, in February 1957, it called a special convention for the purpose of dissolving itself. Its own official summary of the convention proceedings read in part as follows:

A large number of the delegates spoke of the attacks against the LYL by the McCarran Act (Subversive Activities Control Act) as a major factor in preventing the growth of the organization because it intimidated youth and restricted their joining.

This demonstrates the effectiveness and utility of the board. Now let me show you the kind of work that awaits the board.

At the end of March of this year, a Soviet newspaper reported that there had been formed in the United States, a new Communist youth organization, the Young Communist Workers Liberation League—YCWLL—which, it said, would serve as "a principal ally and a reserve of the Communist Party U.S.A." The Soviet newspaper hailed this development as "a great victory and achievement" for communism and one which would have "an enormous effect on the development of a revolutionary youth movement in the U.S.A."

This was a reference to the founding convention of the YCWLL at the Sherman Hotel in Chicago early in February this year, as the successor to the DuBois Clubs.

This is just one example of the kind of material which the board has the authority to work on, if the cases are submitted by the Justice Department. It must be remembered that the board was originally set up to deal with Communist-controlled organizations. It was only recently, 8 years after the first individual membership cases were submitted to the board, that the courts found a defect in the membership provision in the act. I believe that this defect could be cured by amending the act, and the Judiciary Committee currently has such legislation on the agenda for immediate action. Although the courts have ruled out part of the board's activities, much of its mandate remains intact.

To put the case in a nutshell, the board today has all the powers that were utilized during the first dozen years of its experience to undercut Communist operations effectively.

Furthermore, I am informed by the Attorney General that he has plans to give the Board new and expanded duties, and that these plans should be forthcoming shortly. The Board should receive appropriations so that it will be prepared for these new duties.

Mr. President, the Board was created by an act of Congress. That act is still in force. As recently as 1967, there were extensive hearings in the House, and debate in both Houses, on a bill to strengthen the Board and the law creating it. The result was the passage of that bill by a large majority in both Houses. Congress, in other words, after thorough debate determined just 3 years ago that the Board should be retained and strengthened. I believe that the evidence today demonstrates that the need for the Board is as great as it has been at any time in the past 20 years, and I hope that the Senate will approve its appropriation.

Mr. PROXMIRE. Mr. President, I yield 4 minutes to the Senator from Delaware.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. WILLIAMS of Delaware. Mr. President, I support this amendent. In 1967 I offered a similar amendment to abolish this Board. For many years Board members have been doing nothing but drawing salaries and they have had no work assigned to them

The fact that two cases have now been assigned to them means nothing because the Department of Justice will still have $1.120 billion in order to administer and enforce the laws of this country, and certainly that is enough money.

This $400,000, which is being used just to pay a group of what in effect are "political drones," will not serve any useful purpose, as far as I can see.

I am just as much opposed to subversive activities in this country as anyone else, but this appropriation serves no useful purpose. But we should remember the taxpayers need to have some protection and to retain this group of individuals on the payroll, as we have for the past 4 or 5 years, individuals who are doing absolutely nothing, is a complete waste of taxpayers' money.

This amendment should be agreed to; and if and when the administration decides they need this group and legislation is passed which would confer on them duties which must be carried out we could then appropriate the money for their salaries.

For 5 years we have been appropriating the money in the hope that at some time someone would assign them a job. This agency should have been abolished 5 years ago. Subversive activities can affect taxpayers as well as some of our philosophy in Government.

Mr. PROXMIRE. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for 2 minutes.

Mr. PROXMIRE. Mr. President, it has been said that the previous administration did not give this board anything to do. That is not the case. They gave them seven cases to investigate. But the Board found they could not act because the Supreme Court said it was in violation of the first amendment of the Constitution. No matter how many cases this Attorney General and the administration send them, it is going to be the same answer until we either amend the Constitution or change the law.

It may make some Senators feel better to be able to say to constituents, "We dislike Communism so we decided to appropriate $400,000 to combat Communism, but this is not the way to do it. This is firing blank ammunition.

The statement has been made that we should investigate the Communist Party. Of course, we should. As the Senator from Delaware has pointed out, we have appropriated over $1 billion for the Department of Justice, and we have provided a great deal of money for the FBI.

One would think that we were proposing to abolish the FBI. It is the FBI which investigates and makes findings, and the Attorney General has the responsibility for prosecuting those who violate our laws. If our laws are not effective we should pass new laws. But to appropriate money for a Board which has shown over and over again it cannot act, and with respect to which the Supreme Court said in April that although

we change the act it is still in violation of the Constitution, is an exercise in complete and total futility.

Mr. President, this does not fool anyone. Conservative newspapers in this country have overwhelmingly called for the abolishment of this Board. One would think that people are saying we have to have the Subversive Activities Control Board to do the job. The number of editorials I have seen in my office from conservative newspapers is very substantial. I do not know of any competent constitutional lawyer who says we should continue to appropriate money for this Board which the Supreme Court found to be unconstitutional.

I would agree with the Senator from Arkansas that the Communist Party, of course, represents a threat to this Nation. We should do whatever it takes to bring it under control, and to do that we need legislation and the legislation could come first.

For us to appropriate money, hoping this Board after 20 years of doing nothing can find something to do, it seems to me is a superficial political act which does not do the job.

Mr. McCLELLAN. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. McCLELLAN. Mr. President, I do not know about this being an exercise in political futility. I think it is an exercise in political activity to counteract the subversive political activity of Communist-front organizations in this country; but if that has political overtones I accept them and I am glad to be on this side of the issue.

I have checked on this matter and there are two cases under active consideration. I understood there were nine cases down there when they started.

As I said awhile ago, this issue is not new. This amendment was offered before the full Committee on Appropriations and the full Committee on Appropriations voted it down 14 to 1. I hope the committee vote will be sustained.

If this should be stopped the right way to do it is by legislation, and I suggest to my friends who are so bitterly opposed to the Board, to introduce legislation to abolish it.

Let it be processed by the appropriate legislative committees. Let us have hearings. Maybe the board ought to be abolished. But this is the wrong way to do it. This body has decided that heretofore. The Senator talks about the Justice Department having appropriations of millions of dollars. The department cannot use that money for this purpose unless it is authorized to pay the board out of funds which it has. The purpose of this appropriation is to pay the board.

It is my opinion—and I believe the opinion is shared by probably every Member of this body—that Communist-front organizations are proliferating in this country today as never before. We ought to have investigations made by this tribunal or some other one which is empowered to investigate. I cannot help believing that the Constitution, properly interpreted, will permit this Government to protect itself against its enemies, both external and internal. If present law is not adequate, the course to pursue is by legislation, not by denying the appropriation. I hope that the Appropriations Committee will be sustained and that this appropriation will be allowed.

Mr. PROXMIRE. Mr. President, the opponents of the amendment have not given one single bit of evidence that if we appropriate these funds, the Board can act, in view of the Boorda decision. That decision simply handcuffed the Board to prevent it from action.

Mr. McCLELLAN. Mr. President, will the Senator yield on that particular point, so as to get the matter straight?

Mr. PROXMIRE. I yield.

Mr. McCLELLAN. The Boorda decision deal with individuals. The Board still has authority to deal with organizations. Apparently that has not been denied them. That is the purpose of having the organizations referred to the Board.

Mr. PROXMIRE. Of course, it is possible for the Board now to publicize the organizations that are subversive, but that is about as empty and meaningless an action, in my view, as any I can conceive of. We know that those groups are subversive. The effective thing is to identify individuals, and that cannot be done.

Mr. McCLELLAN. Would the Senator agree that the Board has power to make judicial findings that such organizations are subversive, after hearings, after they have had their day in court? Does the Senator agree that the Board has that power?

Mr. PROXMIRE. I would not deny that; but that is of no value to us.

Mr. President, may I point out that this body decided, by a vote of 74 to 2 in 1967, to abolish the Board if it had nothing to do. After 1 year, it is true that the Board can now cite an organization as subversive, but in my view such a citation accomplishes virtually nothing. The whole thrust of the effort has been to identify individuals as subversives, and unless we amend the law, that cannot be done. That is why I say if the law is not right, and if the Senator from Arkansas, the Senator from Nebraska, I, and other Senators agree that this law is not adequate, that it will not do the job that should be done, we ought to pass a law that will do the job before, I repeat before, we provide funds.

Mr. GOODELL. Mr. President, the Senate Appropriations Committee, following the lead of the House, and in accordance with the request of the administration, has recommended an appropriation of $401,400 for the activities of the Subversive Activities Control Board—SACB—for fiscal year 1971.

It is my belief that the SACB should not be funded at all, and I am, therefore, cosponsoring an amendment to strike from the appropriations bill before us the appropriation recommended for it.

In a letter of July 29 to the distinguished Senator from Arkansas (Mr. McCLELLAN), chairman of the Appropriations Subcommittee on State, Justice, Commerce, the Judiciary and Related Agencies, I urged the subcommittee to delete the $401,400 which the House had approved for the SACB. I noted then that—

> The list of the Board's accomplishments is brief. A series of court decisions has rendered the Board virtually powerless, and has left it with practically no job to do. In the twenty years of the Board's existence, a total of only 66 petitions have been filed for determination of individual membership in the Communist Party. Only one organization has been determined to be a Communist-action organization—the Communist Party of the United States—and that determination took ten years of litigation to reach.

The validity of the assumptions underlying the establishment of the SACB are open to serious question, and arguably inconsistent with the fundamental concepts of civil liberty upon which the Constitution is based.

Even among its supporters, moreover, there has been widespread recognition of the Board's lusterless performance and lack of effect upon Communist subversion in this country.

The American Civil Liberties Union has rightly described the Subversive Activties Control Act as the emasculated remnants of McCarthyite legislation adopted in the 1950's, legislation violative of first amendment rights of free speech and association.

At a time when funds are desperately needed for education, for manpower training, for anticrime efforts, and a host of other programs, the allocation of 1 penny for the activities of an ineffective body based upon antilibertarian premises would be a manifestation of that same inversion of priorities which has resulted in the expenditure of billions abroad while domestic programs are underfunded here.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin. On this question the yeas and nays have been ordered, and the clerk will call the roll.

Mr. McCLELLAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. McCLELLAN. A "yea" vote for the amendment to strike the item from the bill. A "nay" vote is to sustain the Appropriations Committee and keep the item in the bill. Is that correct?

The PRESIDING OFFICER. That is the understanding of the Chair.

Mr. McCLELLAN. I just wanted to make that clear.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota

(Mr. McCARTHY), the Senator from Montana (Mr. METCALF), the Senator from New Mexico (Mr. MONTOYA), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Rhode Island (Mr. PASTORE) is absent because of the death of a friend.

I further announce that, if present and voting, the Senator from Alaska (Mr. GRAVEL) would vote "yea."

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PASTORE) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from New Hampshire (Mr. COTTON), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Ohio (Mr. SAXBE), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Tennessee (Mr. BAKER) and the Senator from Maine (Mrs. SMITH) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), and the Senator from Maine (Mrs. SMITH) would each vote "nay."

The result was announced—yeas 28, nays 44, as follows:

[No. 267 Leg.]

YEAS—28

Bayh	Harris	Moss
Boggs	Hart	Muskie
Brooke	Hatfield	Nelson
Case	Hughes	Packwood
Church	Javits	Pell
Cranston	Jordan, Idaho	Proxmire
Dominick	Mathias	Ribicoff
Eagleton	McGee	Williams, Del.
Fulbright	McGovern	
Goodell	Mondale	

NAYS—44

Allen	Fannin	Miller
Allott	Fong	Percy
Anderson	Griffin	Prouty
Bellmon	Gurney	Randolph
Bennett	Hansen	Russell
Bible	Hartke	Schweiker
Burdick	Holland	Smith, Ill.
Byrd, Va.	Hollings	Sparkman
Byrd, W. Va.	Hruska	Spong
Cook	Jordan, N.C.	Stennis
Cooper	Long	Talmadge
Curtis	Magnuson	Thurmond
Eastland	Mansfield	Tower
Ellender	McClellan	Young, N. Dak.
Ervin	McIntyre	

NOT VOTING—28

Aiken	Jackson	Scott
Baker	Kennedy	Smith, Maine
Cannon	McCarthy	Stevens
Cotton	Metcalf	Symington
Dodd	Montoya	Tydings
Dole	Mundt	Williams, N.J.
Goldwater	Murphy	Yarborough
Gore	Pastore	Young, Ohio
Gravel	Pearson	
Inouye	Saxbe	

So Mr. PROXMIRE's amendment was rejected.

Mr. HRUSKA. I move to reconsider the vote by which the vote was rejected.

Mr. GRIFFIN and Mr. McCLELLAN moved to lay the motion on the table.

The motion to lay on the table was agreed.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. JAVITS. Mr. President, I think I can explain this situation in a few minutes. On the committee amendment with relation to the International Labor Organization, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, what has happened is the following: The ILO is an organization to which we have belonged for four decades. It originally came out of the League of Nations. I think probably it is the only or one of the very few survivor organizations.

Mr. President, this has never really been challenged. It has been an accepted membership of the United States, in which we have gone on from year to year. A very distinguished and well known American named David Morse was for many years—I think 20 years—the Director General; and the appropriations for our membership, running in the area of $7 million a year, went unquestioned. Now what has happened is that there is a new Secretary General.

The House of Representatives, after voting the money as was normally done—this time the appropriation is $7.5 million—then held a special hearing, at the request of George Meany, the president of AFL–CIO, and a gentleman named Edwin Neilan, who is the American employer representative to the ILO, as this is an organization to which we send both employer and employee representatives; and the subcommittee in the other body decided that they would like to see this appropriation cancelled out.

So, apparently, they communicated with the Senate subcommittee, which thereupon is proposing—and that is the amendment I am contesting—to strike out the sum of $3,758,875 which is in the bill as it came from the House and which is the dues we owe to the ILO for the remainder of this year. If that is stricken out, it will mean, for practical purposes, that the ILO will have been cut off from support by the United States. Though it only strikes half the amount, for all practical purposes, it refuses to pay our dues in the organization. The issue is, Shall we do that or not?

Mr. President, this matter broke very suddenly. Apparently, it was not known at all that this would be done by the committee. This has been considered a routine matter for years. As I understand it, the reason for the feeling on the part of George Meany and Edward Neilan is that a new Director General of the ILO has been appointed, Gordon Jenks, a British subject, and that he has appointed as one of his deputies a Soviet citizen. This, apparently, has so disturbed the employer representative, Mr. Neilan, and the labor representative as to induce them to make known their opposition in the other body, and the other body could do nothing about it. It sent word over here and apparently the committee did it. I think this is a very unfortunate development and an unwise idea, for many reasons. But the prime reason is that it works against our own interests.

For a modest sum of money we are jeopardizing a serious international proposition. The United States is bound as a matter of law to pay the assessments for the ILO duly made upon it. If we want to denounce it or pull out of it, that is our privilege, but we are in there and we are bound to pay. We are bound by law to pay the assessment. This has been held in an opinion by the International Court of Justice, that an assessment duly made by the United Nations, or by any such organization, is legally binding upon its members. Both the French and the Soviet Union are defying the United Nations on this issue, as they have refused to pay any part of the assessment levied upon them for peacekeeping, either in the Middle East or in the Congo, and we would be joining them if we rejected this assessment.

Mr. President, this seems to be what is involved and is an extremely unwise idea on the part of the United States at a time when it is in enough difficulties with the United Nations as it is, when the United Nations undoubtedly must be restructed. Nevertheless, it represents the only existing organization which is available to us as an international forum for discussion and debate. It has shown in many instances some capability for peacekeeping or reconciling situations in the world, like that in New Guinea, and Indonesia, where there was danger to the world of a conflagration. The United Nations is now right in the middle of the negotiations on the Middle East, which we consider to be a dangerous and serious situation. So I think it is a very unhappy, unwise, and unfortunate thing to do at this particular juncture on the part of ourselves who are the greatest power on this earth and who are looking and are still looking, and I think with justice, to the United Nations as an instrument which can be made constantly more effective in terms of peacekeeping.

I do not look at the United Nations through rose-colored glasses. I know its deficiencies. I know its difficulties. Right now, it depends on, as John Calhoun once said, concurrent majorities. So that we have to have the Soviet Union and the United States agree before we can agree on anything. In the General Assembly we have to have the great rank and file of the Asian and African nations agree before we can agree on anything. But, nonetheless, it carries some critically important responsibilities and work in the world. It is the forum to which nations can repair when they get into real difficulty. It is the place where the United States and the Soviet Union meet each other and, with other nations, work out differences. So that it is too useful and important an instrument for international peace to be dismantled. Yet by ourselves, doing what this amendment would seek to do—to wit, refusing to honor our own dues-paying obligations to a given organization, we would be contributing further to weakening that organization, to emasculating and discrediting it, by joining those powers—to wit, the Soviet Union and France, which have heretofore defied the United Nations on the issue of paying assessments

to the organization to which they belong. This is very unwise.

As to the merits, the International Labor Organization is an instrument which seeks to keep decent labor standards in the world. It is responsible for many conventions which are proposed to the nations for agreement. Mostly we have adhered to conventions which deal with shipping and the fate of seamen. There are five such conventions in force proposed by the ILO. We have ratified two which are not yet in force, also respecting seamen; and we have also approved in the Senate, but not yet ratified, three others, making a total of 10 conventions.

I will agree that that output is not particularly impressive, but I have been a Senate delegate to the ILO on occasion, and so have many other Senators, as I am the ranking member on the Committee on Labor and Public Welfare, and also because, incidentally, I happen to be a member of both the Foreign Relations and Labor and Public Welfare Committees. We have checked with the Parliamentarian and have found that there is jurisdiction over the ILO by the Committee on Labor and Public Welfare concerning matters which relate to its general recommendations, and so forth. But when it comes to treaty conventions, they go to the Foreign Relations Committee. I happen to serve on both committees. Hence, I have taken an interest in this matter of the ILO, and my own observations are that this is the one place where we do have the opportunity to raise the labor standards of the world.

This is critically important to us in trade as well, because of the way the world operates in terms of the rank and file of all mankind. Employers and employees attend. The Soviet Union attends. There is no place where we can confront the alleged employers and employees of the Soviet Union or their representatives. It has been a tremendously useful instrument of education and propaganda, if you will, Mr. President, insofar as the ideas of basic humane labor and the basic concepts of labor organizations and of collective bargaining are concerned. It has had, in my own experience, great usefulness in that.

For many years a close friend of mine was a man named J. David Zellerbach. He ultimately became our gifted Ambassador to Italy. He began his public career as an employer representative at the ILO and rendered magnificent service to the United States and to the true cause of the common man, although he was a great industrialist himself, head of the Crown Zellerbach Corp. In that particular capacity, I learned a great deal about the ILO through him, which makes me feel that it is a useful instrument.

If we are going to adopt the principle that from now on we are not going to support any organization that takes a Russian national on its staff, that is a one-sided and myopic point of view. We want to find some way to get along with the Russians. We want the Russians to know how we work. We want the United Nations to have a more powerful influence over the world.

In the United Nations Secretariat itself, we have never objected to two deputies there, or to other Soviet nationals that have worked there. For 20 years we had an American there as head of the ILO. We may again. Now it happens to be an Englishman, perhaps with different ideas. We should have learned by now that we do not accomplish anything by going off and sulking if things are not going the way we want them to. If we do not like them, then we should try to change them. What we propose to do here is to go off and sulk and say that we will not pay our dues because we do not like what is going on.

Mr. President, I do not believe that is the American way.

Mr. GRIFFIN. Mr. President, the Senator from New York has very well stated the case, but I do want to indicate my association with his point of view and indicate further my hope that his position will prevail.

Surely the ultimate goal is to try to establish some kind of respect for law, particularly among the nations. If we are to disregard our obligations, particularly in the United Nations and its affiliates, we would have little basis for expecting other nations to observe and adhere to their obligations.

We were one of the moving parties in taking the case to the Court of International Justice when the Soviet Union refused to pay its assessments for the peacekeeping functions of the United Nations. Now, by following adoption of the committee amendment, we would be doing precisely what we have accused the Soviets of doing.

The Senator from New York has stated the case so well that it seems to me, unless we want to adopt a resolution of some kind to get out of the ILO, we would have no choice, on principle, other than to take the position the Senator from New York has asked the Senate to take.

Mr. JAVITS. Mr. President, I am extremely grateful to my good friend from Michigan for his intercession here. I might point out, too, that the administration appeared and asked for this appropriation and, so far as I know, they adhered to that position. I have no reason to suppose otherwise.

Let me read a section of the Constitution of the International Labor Organization that relates to withdrawal, section 5 of article I of the constitution:

5. No Member of the International Labour Organisation may withdraw from the Organisation without giving notice of its intention so to do to the Director-General of the International Labour Office. Such notice shall take effect two years after the date of its reception by the Director-General, subject to the Member having at that time fulfilled all financial obligations arising out of its membership. When a Member has ratified any international labour Convention, such withdrawal shall not affect the continued validity for the period provided for in the Convention of all obligations arising thereunder or relating thereto.

It seems clear to me, therefore, that the honorable and decent thing to do would be for any Senator so minded to introduce a resolution here calling for our withdrawal from the International Labor Organization.

I have little doubt that if such a resolution were passed by Congress, the President would honor it. We could make it a joint resolution which would require the President's signature. That would take us out of it.

I do not think that staying in and refusing to pay our dues is consonant with the integrity and the good faith of the United States or the value to our country of international organizations for peace like the ILO.

I hope very much, therefore, that the Senate would vote against the committee amendment which changes this bill by striking out the amounts I have described.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. FANNIN. Mr. President, I do not like to disagree with my colleagues who have spoken in favor of this action.

I had the opportunity to attend the ILO 1 year. I listened for days to condemnations of the United States of America. The meeting was oriented toward that point of view. In fact, Communist spokesmen condemned the United States. We were called imperialists, invaders, and murderers. For a long length of time during almost every day, we had to listen to these condemnations.

I commend George Meany, the president of the AFL–CIO, and Mr. Ed Neilan. Mr. Neilan was at the ILO meeting I attended and I have great respect for him.

I cannot understand why we should foster a program so adverse to our country.

I bring this out because there were many delegates and observers from other countries that listened to this tripe and to the condemnation of our Nation. I know that they could not understand the position the United States had taken. In many instances they were being misled by the Communists.

At that time a Communist was elected to be the chief elective officer. I thought that was a step that indicated the direction the ILO was going.

I feel that it would be wrong for us to continue to foster a program with the ILO.

I realize what is involved here insofar as the United Nations is concerned. But I realize what is happening so far as the other countries and their representatives listening to condemnation of our country is concerned.

I think it is a sad commentary on our country when we have to put up with that kind of action.

Mr. JAVITS. Mr. President, I think it would be sadder if the other delegates had to listen to what they have to say without our being there to refute it.

I think if Mr. Neilan is up to his usual performance, he can answer the charges very eloquently as well as the labor delegates and the public delegates who are there.

I would much rather be there and answer the charges than to let them go by default because we had pulled out.

That is my reason for taking this action. We have to face up to this thing as our delegates do every day in the United Nations.

We had some extraordinarily gifted answers when Henry Cabot Lodge was

there, without meaning disrespect to Mr. Yost, who is there now.

I remember that Henry Cabot Lodge made monkeys of the Communist delegates. He made them look foolish. He answered them off the cuff in a most excellent manner.

I do not think we should have any fear of these accusations. We would get them anyway. But instead of having them go over worldwide radio and press releases, we would be there to answer them.

Mr. FANNIN. Mr. President, I would point out to the Senator from New York that condemnations were made after every speech made by our delegates. I would say that there would be much less likelihood of that being done if we were not taking part in that particular type of activity.

I witnessed five speeches at the conference I attended. I think that the Senator will agree that while I was there this action took place.

I was ashamed not to be able to respond. However, under the circumstances we could not respond to the accusations being made. Certainly they had control of the conference. They were in control to the extent that we did not have an opportunity to answer, as the Senator has indicated should be done.

When the cards are stacked against us, it is pretty hard to come up with an answer.

Mr. JAVITS. I have been there, and I found no dearth of opportunity to reply. If there are more of them than there are of us, then we are not being persuasive enough. We are ducking the question.

I submit that the debate will go on whether we are there or not. The accusations will be made, except that we will not be there to face the issues, and they will have additional points to make which is what I want to deprive them of.

This is an obligation that we solemnly undertook, and we ourselves said that this was the way to run any international organization. Then, we propose to walk out.

Mr. FANNIN. Mr. President, do we not pay more than any other country?

Mr. JAVITS. We pay 25 percent. We probably pay more than any other country. However, we have a gross national product which is three times that of the Soviet Union.

Mr. FANNIN. But the Soviet Union claims that they are wealthier than any other nation. However, when it comes to paying dues, they do not say so.

I was disgusted with the situation. We were not in a position to do anything about it. I do not see how we can do anything when we do not have control.

Mr. JAVITS. We would have as much control as anybody, and I think we have for years.

If the Senator had wanted an opportunity to speak there, it could have been had, because I think that opportunity is available to delegates from the United States.

I see no reason why the Senator could not be a Senate delegate.

We should not merely walk out. And I hope very much that we do not.

Mr. MILLER. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. MILLER. Mr. President, might I ask the Senator from New York what is the net effect of this committee amendment. Is it that we would withdraw from membership in the ILO?

Mr. JAVITS. For practical purposes. We would not withdraw. It is like not paying the bill. We would still owe it.

We would still have to withdraw formally and the indebtedness for dues would accumulate against us even if we gave notice.

That is the advisory opinion of the International Court of Justice on this very issue.

Mr. MILLER. Mr. President, is the Senator saying that the amount provided in the bill, according to the committee, is supposed to cover past membership dues?

Mr. JAVITS. No. We owe $7.5 million for current dues. The committee amendment would appropriate half of that to pay for the first 6 months and would appropriate nothing for the second 6 months.

Mr. MILLER. Under those circumstances, would that not be effective in persuading our representatives to withdraw our membership from the ILO?

Mr. JAVITS. No, because we cannot withdraw for 2 years. I do not see that that would help us.

Mr. MILLER. It would seem to me that if the money is not there and the Congress has, in effect, stated that we should not be involved in the ILO, we would withdraw.

Mr. JAVITS. I do not know that the President will withdraw. The President may feel this would be very unwise and that he would do better with the next Congress; but our indebtedness would accumulate just the same. That is the opinion of the International Court of Justice, which we sought.

Mr. MILLER. Mr. President, will the Senator yield briefly?

Mr. JAVITS I yield.

Mr. MILLER. The Senator knows that over the years I have made considerable protest over the fact that some of the countries, like the Soviet Union and France, have been very seriously delinquent in the payment of their dues and assessment to the United Nations. This matter came to a head about 3 or 4 years ago. Under the charter of the United Nations, where a nation is more than 2 years in arrears in assessments and payments, it is supposed to lose its vote. But unfortunately the U.S. Representative—and I am sure acting on orders from the White House—decided not to press that point, and we still find the Soviet Union and France voting in the United Nations, contrary to the charter.

I suggest to the Senator that the amount of money which is involved, which might technically become an arrearage for the United States, would be a very, very small amount and would not put us in the same category as the Soviet Union and France because, as I recall, there is a percentage involved in determining whether or not a nation is more than 2 years in arrears. So I do not think we will have that problem for several years, even if this is not paid.

If I thought we had the problem, I believe the Senator's point about falling into the same category as the Soviet Union and France would be well taken, but I suggest the point is not likely to occur—certainly in the next year or two and by that time we would have the opportunity to reassess the situation and decide whether or not we wished to withdraw.

Mr. JAVITS. I think the Senator is confusing the remedy with the debt. The debt persists. We have contracted to pay up to 25 percent of the expenses of this organization. There are different remedies in different organizations in the United Nations. The limit is to cut off the vote. For reasons our President thought proper he did not see fit to invoke that penalty against France and the Soviet Union, even though the courts decided against them. We had more at stake than was involved in that situation; but the point is we are affirming that point and we are keeping that point and this is a strong position for us to be in and it is not worth doing what is implied by the Senator and jeopardizing that position on our part in terms of the U.N., by taking this position in connection with the ILO. But we are doing it with our eyes open, of course.

It is the old question that one faces as a lawyer: are you going to stand by the contract and sue for the debt, or repudiate the contract. In this case I think we are not wise to repudiate the contract.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. FANNIN. Is it not true that other amounts are involved? I recall that we discussed the amount of money involved in the technical assistance program. As I recall we furnish about 41 percent. Is that the figure for that program?

Mr. JAVITS. I do not have those figures in front of me. Last year's budget of the ILO was $22 million, of which we paid $5.6 million, which is 25 percent. There must be $1 million or $2 million here for other matters but I will say to the Senator that based on my knowledge of this situation, this is something we agreed to pay.

Mr. FANNIN. As I recall we were paying about 41 percent of the cost of the technical assistance program. I do not object to that, if we had 41 percent of the vote on what would be done with those funds. I recall there was some objection by some of our members with respect to the basis for which that money was being utilized. We were not getting credit for the 41 percent. Others in charge were getting credit in that particular year. It happened that Communist countries were in control. We were getting little for the 41 percent.

Mr. JAVITS. That is optional with us. We do not have to go into any of the technical assistance programs involved, but apparently we thought we would get a lot more out of it. Otherwise, I assume we would not have gone into it. The figures on that element of the work are marginal. In these international organizations we are bound to run into these situations. It is not a monolithic situation. We have to decide what we will do directly and what we will do through the United Nations and what we will do through the International Labor Organization, taking all factors into consideration. But in this instance we have

undertaken the commitment and the assessment having been made we intend to repudiate it and I think that is unwise in the interest of our country, and that is what I am arguing.

Mr. FANNIN. I do not remember the exact figures, but I recall it was much more than $2 million. Quite a vast sum of money was involved, but I do not have the figures at this moment. I think it is important to consider we did not have control as to how our money was being spent.

Mr. JAVITS. If we were improvident, the House committee would not have voted $2 million, but they did. They voted on the whole thing. But it backtracked, when it received the testimony of Messrs. Meany and Neilan, relating to this matter of appointing as deputy to Jenks a citizen of the Soviet Union. We must assume that was the reason, and not justification of the figure.

Therefore, I have made the point whether the speech made by Meany and Neilan should influence us to repudiate that.

Mr. FANNIN. I would say to the Senator if this had been the only case involving a Communist to be the chief executive of the organization I do not think there would be so much concern, but I know this happened before. In fact, it happened in the last 5 years. As I recall, and I would not want to be held to this, either two or three times a Communist has been chief executive.

Mr. JAVITS. The Senator referred to "chief executive." There is a Director General of this organization. Is that the office?

Mr. FANNIN. That is correct. The Director General. I do not have the information before me. I hope the Senator will bear with me.

Mr. JAVITS. I do. I will answer the Senator. As I understand the situation, David Morse, an American, and the remotest thing from a Communist or Communist sympathizer, for two decades—I went to his 20th anniversary celebration—was Director General of the International Labor Organization.

The new man is named Jenks, an Englishman. I do not think the Senator is raising a question about him. He has taken on as a deputy a Soviet citizen. I do not think he would be called a chief executive. Perhaps he is the deputy for administration. I do not know. But I do not think it would be fair to call him a chief executive officer. The Senator will correct me if I am wrong but no such question could be raised.

Mr. FANNIN. I will say to the Senator that as I recall in 1966 the AFL–CIO had members in attendance but upon the election at that time of the Communists—I do not say the official in control was the chief executive—they walked out of the ILO on that occasion. I think the Senator recalls that. There was a great deal of condemnation of the ILO at that time by the labor organizations. The Senator talked about the gentleman who served for so many years. I think that was prior to 1965.

Mr. JAVITS. No, he just retired in the last year. Mr. Morse was there in 1966. He was Director General.

Mr. FANNIN. As I recall, he was not the one that supervised the meeting.

Mr. JAVITS. He must have. He was Director General. He has been there for all these years. I have a dim recollection of some such controversy involving the American trade movement as represented by the AFL–CIO; but let us remember—and I yield to no one in my respect for the organization—that the AFL–CIO represents only between 16 and 18 million workers out of a total work force of 70 million, and it can be wrong about a lot of things, as the Senator has pointed out on many occasions. It may well be wrong about this one, and I think it is.

Mr. FANNIN. Mr. Neilan was a representative and was associated with the U.S. Chamber of Commerce. That organization did not leave it, but I think it was in sympathy with the action taken by Mr. George Meany, of the AFL–CIO.

I look back at the number of years that this has been in controversy, and I regret that action was not taken before this.

The United States is a member of the ILO supposedly because of the opportunity to obtain support of our foreign policy. The questions are:

Are we benefiting or damaging our relationship with the other countries of the world, especially those new emerging nations such as those from Africa?

Are we accomplishing our foreign policy objectives through the ILO commensurate with the extent of our expenditures and the effort involved?

The Communists are using the plenary session as a forum for selling socialism to the many new member nations uninformed about the free countries of the world. This is not abiding by the concept of the ILO's precepts of free workers, free employers and representative government. The United States has four delegate votes—the African nations alone have 140 votes.

The true objectives of the Communists are to disrupt and confuse and they are certainly not interested in the stated objectives of the ILO since their goals are diametrically opposed in ideology and principles to the constitution and by-laws of the ILO.

Mr. JAVITS. It has taken the Appropriations Committee a long time to come to this judgment. As I said to the Senate, we have to decide what, as a Nation, is best for us, with full respect to the opinion of Mr. Meany and Mr. Neilan.

Mr. President, I yield the floor.

UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, would the Senator from New York agree to a time limitation of a half hour, with 10 minutes to the Senator from New York and 20 minutes to the Senator from Arkansas?

Mr. JAVITS. Yes; or a half hour to the Senator from Arkansas and 10 minutes to me, whatever the Senator wishes.

Mr. McCLELLAN. Make it 30 minutes, and I will try to get through before then.

Mr. HRUSKA. Mr. President, would it not be well to have that time limitation effective at the conclusion of the remarks of the Senator from Arkansas?

Mr. JAVITS. Then the time would have to be equally divided.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there be a time limit of 10 minutes for the Senator from New York and 30 minutes for the Senator from Arkansas.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COOK. Mr. President, in regard to the remarks by the distinguished Senator from New York, I think it is important to have two things put into the RECORD, and I would hope the Senator from Arkansas would not mind my putting them into the RECORD. The first is the contributions statement as of December 31, 1969, for the calendar years 1965 through 1969 to the International Labor Organization.

It shows that at the present time, through 1969, the arrearage for all countries is $5,497,154, and that the arrearage of countries prior to 1965 presently stands at $702,714.

Relative to some of the questions that were asked by the distinguished Senator from Iowa, I would like to read article 13, paragraph 4, of the ILO constitution into the RECORD, it reads as follows:

> A Member of the Organization which is in arrears in the payment of its financial contribution to the Organization shall have no vote in the Conference, in the Governing Body, in any committee, or in the elections of members of the Governing Body, if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceeding two full years: Provided the conference—

And this is important—

> may by a two-thirds majority of the votes cast by the delegates present permit such a Member to vote if it is satisfied that the failure to pay is due to conditions beyond the control of the Member.

I might say that there are presently 11 countries that, as of December 31, 1969, were without voting rights because of their financial arrearages. Loss of vote, as I said, is automatic when the arrearage equals or exceeds the amount of the contributions due from it for the preceding 2 full years. These countries still sit on the council, and still participate in the activities of the council, but do not vote because their arrearage is in excess of 2 years.

I think it is also important in this regard that we have in the RECORD the International Labor Organization scale of assessments for the calendar year 1969. In regard to the remarks of the Senator from Arizona (Mr. FANNIN), it shows that the United States pays $6,653,184—this is as of calendar year 1969—and the next highest nation to us is the U.S.S.R., with $2,661,274.

I can only say that this does not take us out of the organization in any way, shape, or form.

If there is a degree of displeasure on the part of the United States, obviously it has 2 full years in which to make it up. If it could in any way express itself to the conference by way of withholding a contribution, it still is not out of the organization until its arrearage equals 2 full years of its contributions.

So the idea that, somehow or other, by not paying a percentage of its dues in this calendar year it repudiates a treaty

is not correct, because there are countries on this list that have not paid their assessments since 1965. They are still members of the ILO. They are in arrearage and will, if they so continue be able to retain their membership.

I can only say that if this country has a serious complaint that it cannot rectify by way of debate at this time, at least it might express its will by temporarily withholding funds, if it is its desire. The next Senate may make up the difference or withhold a portion of its payment, or if it is the desire of the next session of Congress that the money not be paid, it may well be the desire of the Congress that it no longer be a member of the International Labor Organization.

I ask unanimous consent that the two papers that I referred to be printed in the RECORD as a part of my remarks.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

INTERNATIONAL LABOR ORGANIZATION—CONTRIBUTIONS STATEMENT AS OF DEC. 31, 1969 FOR THE CALENDAR YEARS 1965-69[1]

SUMMARY

Calendar year	Total due	Amount received	Percent received	Balance due
1965	$18,684,347	$18,429,662	98.64	$254,685
1966	20,337,871	20,134,772	99.01	203,099
1967	22,472,938	22,145,605	98.54	327,333
1968	24,836,091	23,936,727	96.38	899,364
1969	26,612,739	22,800,066	85.67	3,812,673

UNCOLLECTED CONTRIBUTIONS

Country	Calendar year— 1965	1966	1967	1968	1969	Total
Afghanistan					$1,382	$1,382
Albania[2]	$22,421	$24,405	$15,731			62,557

Total	254,685	203,099	327,333	899,364	3,812,673	5,497,154

[1] Total due for years prior to calendar year 1965: Albania $14,667; Bolivia $33,595; China $243,463; Haiti $40,403; Paraguay $244,293; and South Africa $126,193 or a total of $702,714.

[2] Ceased membership May 8, 1967.

[3] Denotes member States which on Dec. 31, 1969 were without voting rights because of their financial arrearages. Loss of vote is automatic when the arrears equals or exceeds the amount due for the preceding 2 full years, according to art. 13, par. 4 of the ILO constitution, as follows: "A Member of the Organization which is in arrears in the payment of its financial contribution to the Organization shall have no vote in the Conference, in the Governing Body, in any committee, or in the elections of members of the Governing Body, if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years: Provided the Conference may by a two-thirds majority of the votes cast by the delegates present permit such a Member to vote if it is satisfied that the failure to pay is due to conditions beyond the control of the Member."

[4] Ceased membership Nov. 3, 1966.

[5] Payments totaling $1,665,588.00 were consummated January and July 1970 from fiscal year 1970 appropriations.

Mr. McCLELLAN. Mr. President, I yield myself 8 minutes.

At the outset I would like to say that the Senate Appropriations Committee considered an amendment on this same item and, by a vote of 21 to 2, rejected the amendment to insert this appropriation in the bill.

This issue has arisen by reason of the fact that Mr. George Meany, president of the American Federation of Labor-CIO, after the House took action and approved the full amount of the budget, advised Mr. ROONEY that this appropriation should not be made. Thereafter I think he appeared voluntarily before the committee—the House Appropriations Committee held a hearing on this after they had reported the bill, and while the bill was over here in the Senate—and testified opposing this appropriation.

It does appear to me that if the head of this great labor organization in the United States, who has been in attendance at all of these meetings, or many of them, and has observed the working of the ILO, comes back to the Congress of the United States and says the United States is getting no benefit from it, that it is a propaganda machine, and that today it is not serving the purpose for which it was created, a man who is dedicated to the best interests of labor, not only in America, but throughout the world, who comes and makes that plea to Congress not to waste the American taxpayers' money any more, that ought to carry a great deal of weight. It is very persuasive to me.

I would like to read into the RECORD some of the things Mr. Meany said about it, and to insert other portions of his testimony into the RECORD.

Mr. Meany describes this organization, on page 48 of the House report of his testimony. He says:

What has happened since the Soviets came into the ILO—

Russia did not come in at the beginning, Senators will remember—

is that the ILO become a sounding board more and more each year for political discussions. Those of us who have attended ILO meetings in the last few years have been subjected to the indignity of listening to speaker after speaker on the resolutions committee denouncing the United States of America. This has become a forum for Russian political propaganda, and there is no effort made by the Office of the ILO to stop this.

Mr. Meany continues:

As a sample of the attitude of the Office of the ILO toward the Soviet Union here is an article written this April in the International Labour Review, which is the official publication of the ILO.

The article is written under the title of "Lenin and Social Progress." Listen, Mr. President:

As a sample of the attitude of the Office of the ILO toward the Soviet Union here is an article written this April in the International Labour Review, which is the official publication of the ILO. The article is written under the title of Lenin and Social Progress. The article pleads for revolution in the developing countries and holds up the Soviet form of revolution as a model and the best road to social progress, and it portrays Lenin as the great benefactor of mankind, and nowhere in the article does it indicate that Lenin was the head of this proletarian dictatorship which was set up in Russia in 1920 and that he was the author of the Red terror and the oppression against the people of the Soviet Union. This is not mentioned in this article.

I ask unanimous consent to have printed in the RECORD the article to which Mr. Meany referred, entitled "Lenin and Social Progress," written by E. Pletnev and R. Kossolapov, and published in the International Labour Review of April 1970.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LENIN AND SOCIAL PROGRESS

(E. Pletnev [1] and R. Kossolapov [2])

Drawing his material from the storehouse of history, the writer Stefan Zweig composed an enchanting tale about the "luminous hours" in the story of mankind, when great men were vouchsafed special illumination or inspiration, or took action of decisive importance for the further history of the human race. Judged by the extent and profundity of the influence it has exerted on the fate of mankind, the life of Vladimir Ilitch Ulyanov (Lenin) is one long series of such decisive moments. His name is familiar to countless millions of people. His teachings may be rejected; they cannot be ignored. The arguments to which his name, ideas and work have given rise have gone on unceasingly—as is evident with the approach of the celebrations which will be held to mark the hundredth anniversary of his birth on April 22, 1970.

Lenin continues to live on in his ideas, as put into practice by generations of his disciples. The corpus of theory left by him remains at the centre of the 20th century's ideological contentions. Lenin, in fact, occupies a unique place among the social thinkers of mankind.

From time immemorial, the world's profoundest minds had been exercised by the search for some way to bring about a happy society. They were able to offer nothing but dreams—however brilliant—utopias or prophecy. The first thinker to offer a scientific forecast of the future, based on an exhaustive scrutiny of the facts, and to accompany it with illuminating theoretical reflections—the first man to provide a convincing account of the laws by which contemporary society is governed—was Karl Marx.

Lenin considered himself a disciple of Marx, and like him devoted his life to the search for ways and means whereby mankind might be freed from poverty, oppression and suffering. He brought the whole force of a powerful intellect to bear on the task of "conceiving the social revolution as a living phenomenon," as he put it. His intellectual legacy is a demonstration—on philosophical, economic, and sociological grounds—that mankind can, and indeed must, take the socialist road. Hundreds of millions of people in all parts of the world have found, in his ideas, an answer to the burning questions of the age. A whole revolutionary epoch is bound up with Lenin and his activities. It is distinguished from all others in that socialism became a matter of action instead of a question of theory. It was Lenin, the great thinker and orator, who led the process whereby socialism was translated from the language of ideas into the language of mass action.

We may agree or not with Lenin's conception of socialism. But nobody can deny the close connection between his theories and his policies—policies still being developed by the Party and State he created. The very fact that these ideas are no less active today in changing the lives of millions of people, and constitute a mine which is still being quarried, gives Lenin's ideological legacy a place all its own in the world's treasury of social thinking.

Lenin's vision of social progress is inseparably bound up with an assertion of the need for a Socialist reconstruction of society. Recently, for example, there has been a tendency to judge a country's general progress by industrial and technological criteria. The technical level is, of course, an important factor. But a country highly developed technically may not necessarily be equally highly developed in its social institutions. This criterion by itself, therefore, provides no answer to the questions—for what purposes, and in whose interests, are advanced technological procedures being used? To what extent does modern technology insure the full employment of the labor force available?

Very frequently, too, output is taken as the principal yardstick for measuring social progress. But here again, output alone, and even output per head, does not tell us how the national wealth is apportioned, and what needs—and whose needs—are met.

Finally, it is sometimes argued that social progress is to be assessed by the degree to which people abide by the law. But once again we may legitimately ask: by what procedures and by whom has legislation been enacted, and in whose interest is it that the law should be observed?

Lenin devoted an entire lifetime to promoting the interests of the working class because he considered it the principal actor in history, by reference to which alone social progress can be assessed. What counts above all is the position actually occupied by the working masses within society.

After the successful October revolution the world was divided into two camps, each with its own system for regulating the relations between its members. For historical reasons the system of private enterprise continued in force for the time being in the countries most highly developed industrially. But in other, relatively less developed countries the masses seized the reins of power, did away with exploitation, and deliberately set about the task of regulating social relationships by means of planning of production. It may be that to some extent they were less free of the constraints of Nature but, in a social sense, they were infinitely freer—a convincing proof that progress cannot be measured by the criterion of technological advance alone. The need for a more fundamental explanation became apparent. It finally became clear that the degree of technical development attained was no more than a measure of the mastery of natural forces achieved by the society concerned; it could not be used to assess social development. Hence such a criterion can be, at best, an indirect indication of the freedom enjoyed by the individual.

We are entitled to talk of individual freedom only when man is not only free from

Footnotes at end of article.

the thrall of natural law but has achieved mastery over the laws governing the development of society. He is free only when he has tamed the forces which mold society; only when society exists first and foremost to promote the physical, cultural, esthetic, moral and political development of its individual members.

Lenin's preoccupation with social progress is borne out by the way in which he launched—and having launched, defended—the principle of peaceful coexistence of countries with different social systems. This is no accident. A moment's thought shows that a steady extension of the rights and privileges enjoyed by the workers, and improvement of both labor legislation and social policy can best come about in the favorable atmosphere of peaceful coexistence, when countries develop their relations in practical matters. Lenin stated a number of times that there was no reason why a Socialist country should not have unlimited relations on practical matters with the capitalist countries.

Lenin's conception of peaceful coexistence presupposes competition between two very different systems in economic, social, scientific and cultural affairs, and on a struggle between ideas. Lenin attached high value to a policy of peace as an essential prerequisite of all-around progress (and, we might add, of fruitful activity by the ILO)—a very different thing from policies of armaments and war, leading to the uprooting of whole peoples, the destruction of millions of human lives, the collapse of production, economic bankruptcy, and moral and cultural decay.

A country's social policy, its social and labor legislation, provide an excellent pointer to the degree of social progress achieved. In the last resort, social progress is to be measured by the extent to which the workers themselves can profit from the fruits of their labor. But in judging how far they can profit today from the fruits of earlier labor, we cannot leave out of account the general policy of the state. For example, if the government of country A devotes a proportion of the country's wealth to waging war on the people of country B, it will be depriving its own people of some of the fruits of their labor. No matter how wealthy country A may be, its social policy cannot be considered progressive.

LENIN OF NEW POSSIBILITIES OF SOCIAL PROGRESS

From the end of the 18th century, it became natural to regard radical social changes in terms of the French Revolution, and the Russian Bolsheviks, beginning with Lenin, were also for a time regarded as Jacobin extremists.

However, the tradition thus established lost its point with the October Revolution of 1917. "I am becoming more and more convinced," wrote the poet Alexander Bloch, a contemporary of Lenin, in 1920, "that the comparison is inadequate. To judge today's events by this criterion is to show excessive caution, even pusillanimity. It is becoming ever more apparent that the times we are living in represent, not an epoch of transition, but a new era."

This was the judgment of an eyewitness, and history has more than confirmed its justice. The Russian Revolution was incomparably more far-reaching and radical than any of its predecessors.

During the early years of the Soviet regime, the social system introduced by Lenin was looked on by many people (even by many who called themselves Socialists) as the bastard child, as it were, of history. The reason usually given was that industrially, socially, and culturally, Russia lagged behind Europe and North America, and hence was not yet ripe for socialism. There were at least two flaws in this analysis.

Firstly, it made no allowance for the fact that in the 20th century, among countries unequally developed, the working class and the working-class movement in any particular country may well be ripe for socialism, even though capitalism in the country concerned may be at a relatively early stage of development.

At the beginning of the century Russia was, economically speaking, infinitely less advanced than England, Germany, or the United States. Nevertheless, as the historian Mikahil Pokrovsky—a party comrade of Lenin—pointed out, the concentration of the working class (and hence the scope for organization of the working class in huge enterprises) was three times greater in Russia than in Germany, and was not less than in any country of Europe, and perhaps of the world.

The critics of Lenin's experiment were also seriously at fault in that, although circumstances had radically changed, they were still obsessed with the lesson learned from other revolutions.

Even today it is sometimes asserted that the materialist interpretation of history has somehow been controverted by the October Revolution, indeed by Lenin himself. It is argued that economics does not determine politics but that politics may have a decisive influence on economics. This mistaken argument is the result of tranposing what was characteristic of all previous social systems, including the capitalist one, to a period of transition from capitalism to socialism.

Any presocial social system was of course the product of economic developments within the country concerned. When the feudal system was collapsing, the bourgeoisie's potentialities for revolution, in England, America, and France, remained confined to those particular countries.

In today's capitalist society there is a worldwide market, and the position is vastly different. Today, as Lenin put it [3], developed capitalism has entangled countries in a closely woven mesh of trade relations, with the result that the antagonisms between international capital and the international working-class movement are more evident than ever before.

Experience shows that in this day and age the possibilities of revolution must be assessed with an eye not only to the condition of the economy in any particular country but also to the forces of production as they exist throughout the world. Whence Lenin's classic conclusion: "To the extent that large-scale worldwide industry exists, a direct transition to socialism is undoubtedly possible." [4]

It is obvious that in any country in which this transition to socialism is taking place there must be a certain minimum level of technological development, a certain minimum as regards production of goods, market organization, and communications. But, as the experience acquired by our own and other lands has shown, a country can catch up after the revolution.

Thanks to Lenin, a purely local, national approach to such matters is, it is now recognized, much too narrow. The tendency today, in assessing the possibility of revolution, is to consider conditions in the capitalist system as it exits throughout the world. The approach, in other words, is an international one.

Taking the world as a whole, economics determines politics, though in the local conditions of a particular country politics may for a time take precedence and direct and speed up economic development. By showing that this is now the only tenable view, Lenin powerfully contributed to our understanding of the way in which social progress is achieved.

Why should this be so? This question can best be answered by quoting the example of countries which have rid themselves of their dependence on colonialist powers and moved from precapitalism to socialism without any intermediate capitalist phase.

Is it conceivable, for example, that before the October Revolution a country as backward as Mongolia used to be could have set out to organize itself on socialist lines, relying entirely on its own resources? The answer, clearly, is no. Mongolia was one or two stages behind its neighbors, or the equivalent of several hundred years of social development.

We now know that this tremendous advance was accomplished thanks to the association of Mongolia (a member of the ILO) with the Soviet Union. It is impossible to calculate the vast savings in human lives, effort, physical, and mental resources, compared with what would have been needed for the stormy passage through feudalism and capitalism.

Clearly, the social relations obtaining within the country itself were far less important in the process than international relations of a new kind. The two factors interacted and were combined in a unique way to render a direct transition to socialism possible. This had never occurred before. Other peoples have remained arrested at an early stage of their development (or have been held back by colonialism); the gulf separating them from socialism cannot, under capitalism be closed. It can, however, be bridged by a system of economic, political, ideological, and cultural links with the developed socialist countries and by making use of the experiene acquired by them in their own transition to socialism.

Lenin showed in theory, and the October Revolution bore him out, that any country, no matter what degree of economic development it may have attained, can make the change to the new socialist order. In some countries the relationship between the forces of progress and reaction, and the position occupied by the particular country in the clash between the two worldwide ideologies, have turned out to be the decisive factors determining when the transition is to be made, and not the country's own productive forces (the latter's role could temporarily be taken over by more highly developed international productive forces). This was a revolution not only for the contemporary world but also in the normal tempo of social progress.

This was, in a sense, a reorganization of history. A clearer idea of what it involved can be obtained from Lenin's note "On our Revolution."

His political adversary Sukhanov held the view that a Socialist revolution in Russia was premature, and that it ran counter to the laws of social development. Lenin counters this by denouncing a "slavish imitation of the past," and the fear "of departing from the example set by Germany."

"You say," he writes, "that a certain level of civilization is needed for the building of socialism. Well and good. But what was there to prevent us from laying the foundations, by expelling the landowners and Russian capitalists, for example, and then beginning the move toward socialism? Where it is laid down that such changes in the normal processes of history are inadmissible or impossible?" [5]

Abandoning the language of polemics for something more orthodox, we get the following picture.

The "normal" process of historical development (this is more or less how Sukhanov's teacher Kautsky saw it) began with the development of the forces of production (comprising the labor force, tools and equipment,

Footnotes at end of article.

and techniques). Then there came changes in technology and in the organization of production, as well as in the division of labor between people. Thereafter, as occurred in the changeover from communal production to a slave-owning society, from this to feudalism to capitalism, there were changes in the ownership of the means of production. Lastly, these changes were crowned by an ideological and political revolution.

Did the October Revolution indicate any departure from the customary scheme of things? No, if we consider merely the overall development of the forces of production, both national and international. Yes, most emphatically, if we consider the situation in each of the countries beginning to build a socialist society.

In what did the change consist? First, there was a change in the part played by the State. The government of a socialist country did not—as had occurred everywhere else—merely set the seal of approval on changes which had already taken place in the machinery of production; it itself initiated these changes, and helped to carry them through.

Second, although there were in Russia industries which technically and because of the way they were organized, were ripe for reorganization on socialist lines, there existed at the same time a host of one-man undertakings which had nothing in common with socialism, either technically, or organizationally, or by the nature of their economic relations. As a result of these factors the role of the new form of ownership changed. Thanks to systematic support from a government of peasants and workers, and from the more advanced industries already nationalized, this new form of ownership could emerge in areas where the technical prerequisites for its existence did not, strictly speaking, exist.

This is what happened, for example, during the early years of agricultural collectivization in the Soviet Union, when the primitive means of production (there were no others) owned by individual peasants were nationalized. Here the form of ownership came first, creating a state of affairs propitious to the emergence of productive forces. Since then, this has also been the experience of many other countries.

According to the normal scheme of things, the phase of public ownership would represent the third stage in development; it thus, in fact, became the first. By its very nature, public ownership, once introduced in the countryside, led to a development of its own technical and organizational foundations.

This foreshortening, as it were, of the processes of development had one immediate consequence: a multiplication of the possible forms which progressive social development might take. In practical, political terms this implied a widening of the sphere in which the revolutionary party and the revolutionary masses were free to take the initiative.

Lenin's solution to the problem of social progress can be understood only if we bear in mind what, in modern jargon, we might call the "optimization of social systems". This expression can, of course, be differently interpreted. For example, modern capitalism, based as it is on a mixture of state ownership and monopoly control, is likewise subject to a process of optimization for the sake of bigger profits. Socialism, on the other hand, claiming as it does to represent an alternative to capitalism, is designed to insure satisfaction of the scientifically determined interests of the main mass of working people.

Lenin taught that the aim of socialism—its very essence—lay in the transfer of the means of production to national ownership, and in the replacement of capitalism by an economy planned in the national interest. It was incorrect, he felt, to say (as did the Russian social democrat George Plekhanov) that socialism was the planned organization of society's production process to meet the needs both of society as a whole and of its individual members. Lenin considered this too narrow a definition since trusts might be claimed to provide such an organization. "It would be better to say: '. . . on behalf of society as a whole' (since this both covers the idea of planning and indicates the agency responsible for doing it), and not only for the satisfaction of the needs of the members of society but also to insure the maximum possible welfare, and the free all-round development, of each and every member."[6]

Lenin, and those who were to succeed him, thought of socialism as a social system that seeks deliberately to improve itself with a view to meeting the workers' growing needs, both material and spiritual, in accordance with the laws governing social development, and making use of the resources available to society.

It would be vain to expect the passage from capitalism to this form of social organization to be automatic, or to imagine that it can be brought about by a lengthy process of reform. The barest acquaintance with socialism will suffice to show that it presupposes a qualitative change in the aims of production, a different organization of the economy and of all other aspects of the life of society. Most important of all, it presupposes a society organized to serve the interests of another class of person; no longer the private owner, whose interests must necessarily clash with those of the persons he employs, but the worker, who has acceded to co-ownership of the property of society. To bring about such a state of affairs demands nothing less than a revolution. It betokens a change in the protagonists involved.

The masses, and no longer a privileged caste, now occupy the forefront of the stage. It will be for each country to choose its own road (and the road may be hard) to this consummation.

Lenin, in fact, found a way of enlisting the scattered energies of many millions of individuals, hitherto condemned by capitalism to a dreary, unsatisfying round of mindless toil, in the cause of social progress. His concept of socialist competition is the natural fruit of a state of affairs, brought about by socialism, in which use can be made of the energies, freely made available for political, social and other purposes, by free workers, themselves imbued with a high sense of their obligation to work, individually and collectively, for the welfare of society at large.

"The workers and peasants," wrote Lenin in the early months of the Revolution, "are still 'timid'; they have not yet become accustomed to the idea that they are now the ruling class; they are not resolute enough. The Revolution could not at one stroke instill these qualities into millions and millions of people who all their lives had been compelled by want and hunger to work under the threat of the stick. But the revolution of October 1917 is strong, viable and invincible because it awakens these qualities, breaks down the old impediments, removes the wornout shackles, and leads the working people on the road of the independent creation of a new life."[7]

Despite every obstacle put in its way by opponents, socialism has been progressing for half a century—a convincing proof of the extraordinary capacity for progress inherent in the working masses. Theirs are the hands which are now guiding the ship of State in the world's second great power, and in many other countries besides, resolutely toward the future. And their strength is increasing.

HOW LENIN'S IDEAS ARE EMBODIED IN SOVIET SOCIAL POLICIES

From Lenin's idea of progress arose an entire policy and program of social and labor legislation. He himself took the view that the Soviet regime had no more important task than to put this program into effect.

The October Revolution marked a very clear divide between a state of affairs in which the working class was powerless, and one in which it assumed governmental authority. *Before resolution*, the working class has to fight for its rights, step by step and inch by inch, wringing concessions from the opposing class forces. Clearly, it will be a very long time before anything is achieved by such methods and even then, the results will be extraordinarily circumscribed. *After resolution*, possession of the reins of power at once enables the workers to affirm their rights and to buttress them with all the safeguards which governmental authority can offer.

Lenin derived the basic contents of his party's social policy from the historic mission of socialism: "Let us make all people workers." This was proclaimed in article 18 of the first Soviet Constitution (1918) in the form: "He who does not work, neither shall he eat." Lenin considered that the most effective way of implementing this principle was to establish control by the workers themselves over the measurement of labour and consumption. He used to say that such a system was more effective than all the laws passed by the French Revolutionary Convention and its guillotine.[8]

By decreeing that work was an obligation for all, the Soviet social legislation created circumstances in which social parasitism and unemployment could be eradicated and the right to work guaranteed.

At the same time, on Lenin's initiative, a series of measures were drafted on the improvement of working conditions, starting on the fifth day of the October Revolution: an eight-hour working day was introduced by decree on November 11, 1917.[9] Ten years later, a manifesto issued by the Central Executive Committee of the USSR announced that a 7-hour day was to be introduced, and this was done between 1928 and 1931.

Simultaneously, the Soviet system of social security was developed. This included a system of unemployment allowances (maintained until the social evil of unemployment was eradicated early in the 1930s), benefits for temporary incapacity, pensions for invalidity, old age, paid holidays, etc. In this fashion, the country of the Soviets became, in the early days of the Revolution, the most progressive country in the world in regard to the principles proclaimed and the changes brought about in social and labour relations. This exerted a powerful influence on the struggle of the working class and on social legislation in many other countries.

These social innovations have to be seen against an international background which between the two world wars was becoming steadily more sombre. With the growing menace of invasion, every hour was precious, and in 1940 the 48-hour week was reintroduced. Plans to develop and improve the social security system had to wait.

It should not be forgotten that out of the half-century during which the Soviet regime has been in existence, some 20 years have been spent either fighting the wars imposed on us, or in ridding ourselves of their disastrous consequences. Nevertheless, the gross social product in 1968 was 36 times larger than it had been in 1913, while the national income was 40 times as great. The indices for 1960 are 7.1 and 7.5 times larger, respec-

Footnotes at end of article.

tively, than those for 1940.[10] As production and efficiency increase, so can the Soviet Union concentrate its efforts on the improvement of social and labour relations.

With the remarkable growth of the economy and national income, it became possible to improve the economic and social condition of the workers and to carry out a whole programme of social action, which has been especially intensive in the last decade and a half.

Thus, a law was adopted to reduce hours of work to six and seven a day, and the five-day working week was introduced. As a result, the average length of the standard working week for adult workers in industry is 40.7 hours. At present, in fact, the working week of wage earners and salaried employees is 39.4 hours.[11] It may not be amiss to recall in this connection that, of the forty ILO Conventions ratified by the Soviet Government, the first was that on the 40-hour working week. Since 1956 the system of hiring and wages, collective agreements and settlement of labour disputes has been continuously improved. By legislation enacted in 1956 and 1964, the pensions system was overhauled.

The decisions taken by the September 1967 plenary meeting of the Central Committee of the Communist Party of the U.S.S.R. were of special significance, being later developed in a series of laws and ordinances dealing with the improvement of living conditions. An ordinance of the Central Committee of the Party and the Council of Ministers, and decrees issued by the Presidium of the USSR Supreme Soviet provide for increased minimum wage and salary rates, reduction of taxes, the introduction of supplementary pay and advantages for those working in certain parts of the country, and an improved pensions system.

In social matters, it is government policy to bring about a general improvement in the standard of living of all working people, with special reference to conditions in the key industries and key areas of the country. The minimum wage has again been raised, with the result that the ratio between the minimum and the average wage improved from 1:2.9 in 1958 to 1:1.8 in 1968.[12] Scheduled wage rates for machine operators in the metal and engineering industries were increased by 15 percent, while wage increases have also been granted in those branches of the textile industry in which work processes have been intensified. Special action has been taken to make geographical mobility of labor more effective and to make life easier for workers moving to new areas (e.g. by increasing the wage differential for persons working in the Far North and Far East).

Lenin considered the health of the nation as an index of the growth of the national wealth. This concern for the health of the nation is still very much alive today, as is eloquently shown by the basic principles for health legislation adopted by the Seventh Session of the Supreme Soviet in December 1969. This new law lays down the following principle in article 1: "Soviet legislation regulates social relations in the field of health protection for the population with a view to ensuring the harmonious development of physical and mental powers, good health, a high level of fitness for work and a long active working life for citizens; the prevention of disease and lowering of morbidity, further reduction of invalidity and a lowering of mortality rates; elimination of factors and conditions which harmfully affect the health of the citizens."[13] Provision is made for a comprehensive system of standards regulating the organization and responsibilities of health bodies, medical and pharmaceutical activities, public health measures, and so forth.

Lenin used to say that the position of women in a society was the clearest indication of its social progress. In this spirit the leaders of the country are taking action to ease working and living conditions for women. The principle of equal pay for equal work is in operation, and heavy jobs on which women must not be employed have been officially listed. Maternity leave with pay has been increased to 112 days (56 before and 56 after childbirth). Part V of the law on basic principles for health legislation is entirely devoted to the protection which the State extends to mothers and children.

A third congress of collective farmers in Moscow toward the end of November 1969 adopted resolutions that represent a new step forward in improving remuneration, working conditions, leisure time and social security for tens of millions of people. The Model Statutes for Collective Farms, adopted by the congress, lay down that the cash proceeds from the sale of produce or from other sources are to be used by the farm "first and foremost, for paying the collective farmers for their work . . ." (article 38).

Part VIII of these statutes provides for a nation wide social security system for collective farmers. Article 39 reads: "In accordance with the legislation in force, members of collective farms shall receive old-age, invalidity and survivors' pensions, while women shall in addition be eligible for pregnancy and confinement grants—the cost to be borne by a centralised Union Collective Farmers' Social Security Fund." Article 40 further lays down that this centralised fund, constituted by contributions from all agricultural cooperatives, shall provide allowances for members during temporary incapacity, free passes for sanatoria and rest homes, and other services.

If it be acknowledged that social policy must be designed first and foremost for the benefit of the worker and for the satisfaction of his needs, then a point at which enough will have been done can never be reached, since needs (of all kinds, and not for material things alone), once satisfied, give rise to fresh, more complex and varied requirements. But at any particular time further progress up the ladder will be brought to a stop by the resources available, themselves the fruit of the economic development the country has managed to achieve. The national income is the only source from which money for the above aims can be derived. Hence the need to speed up the rate of increase of the national income by developing the material and technical resources of society.

The truth of this thesis that increased expenditure on social needs depends on the growth of national income can be seen from the figures of total "personal consumption of the population of the U.S.S.R." (i.e. total of personal incomes) and of advantages for the working people provided from the resources available for "social consumption" (free medical care, free education and training for improving qualifications, allowances, pensions, study grants, paid regular leave, free passes or reduced rates for sanatoria and rest homes, and so on).

The rapid increase that has taken place since 1960 in the amounts for social benefits is striking. The chairman of the Gosplan observed at the seventh session of the Soviet parliament that the total figure had risen to 59,000 million rubles in 1969, and would exceed 63,000 million rubles in 1970.[15]

In Lenin's view the prospects of growth in the national wealth, gross product, and national income mainly depend on a steady increase in productivity. The whole subsequent development of the Soviet economy shows how true this is. Soviet economists have calculated that the national income rose from 4,170 million rubles in 1917 to 238,000 million in 1967, of which 227,600 million was attributable to growth in productivity.[16] All in all, there has been an annual growth in productivity over the last 50 years of at least 6–7 percent.[17]

But how is this high rate to be maintained or even increased? Lenin considered that the key to this problem was to be found in the application of technical and scientific innovations to the production process and in improving the workers' education and skills. Experience has proved his forecast correct. The well-known Soviet labor economist, Strumilin, has calculated that of the overall growth of productivity of social labor (227,600 million rubles from 1917 to 1967), 43,400 million rubles came from investments in new techniques, and 184,200 million were attributable to achievements in science and education.

TOTAL PERSONAL CONSUMPTION AND TOTAL SOCIAL BENEFITS IN THE U.S.S.R. 1960 AND 1965–68

[In thousand million rubles]

Item	1960	1965	1966	1967	1968
Personal consumption (total)	93.9	124.9	133.2	144.0	155.1
Social payments and services (total)	27.3	41.9	45.5	49.4	55.1
Per head of population (rubles)	127.0	182.0	195.0	209.0	232.0

It is thus no accident that the Government spends a large proportion of its resources in the field of education. In so doing, it is acting in accordance with the law discovered by Marx, namely that priority must be given to developing the means of production, a law which (unexpectedly for some Marxists) imperiously demands concentration of effort on those areas of the national economy which form the worker's personality. Here the principal aim of economic policy is at one with the basic aim of social policy: to develop a new kind of wage or salary earner, with a comprehensive grounding in modern scientific knowledge, as a means of stimulating increased productivity, rendering working conditions more humane, and furthering human social and cultural development.

Lenin's social program can be summed up by saying that the worker is at once the artisan and the criterion of progress.

Mr. McCLELLAN. Mr. President, Mr. Meany goes on to say:

This annual conference is used as a sounding board for Soviet propaganda against the United States, as I say. The Resolutions Committee is now, and for some years has been, engaged in political discussions which are completely outside the competence of the ILO. In fact, the ILO rapidly is becoming a political organization, and I don't think that we need another political organization. We have a political organization worldwide, the United Nations, in which our country holds membership.

The Soviet group is demanding that the whole structure be changed. When this organization was set up there was automatic membership on the governing body to the top industrial countries of the world on the theory that these were the countries which would have to make a contribution if we were to improve the standards of life in the so-called backward countries of the world.

The Soviets want to eliminate that. They want to eliminate the selection of ILO officials by the governing body where this automatic membership prevails, and they want to throw them into the general assembly of the ILO on the basis of one nation—one vote, which means that the United States of America would be on a par with Kenya, Togo, and any of these newly emerging nations. This, of course, is further evidence of the Soviet desire to gain control of the ILO completely. They certainly have tremendous influence.

The United States of America today is in a minority position in the ILO. The Soviets' propaganda has been quite effective with some of the newly emerging nations. To give you an indication of the double standard, under the ILO procedure, when any national member of the ILO feels that he should have representation on the staff by putting employees in, the rule has always been that they submit a list of candidates for any particular spot with their qualifications. Then they are looked over and the ILO office makes the decision.

The Russians never have accepted that. They have the special privilege of submitting one candidate for any position to which they aspire, and there is no right of the Office to question the capability of that particular candidate.

Mr. McCLELLAN. Under the next title, he says:

In this instance, Mr. Jenks, who just has been elected as the Director General of the ILO, announced that he was going to appoint a Russian representative. He made it quite clear that he was going to follow the usual procedure of getting only one candidate, and that candidate would be appointed.

Mr. Meany points out here how the United States and other countries are discriminated against. They have to submit a number of candidates, and then let the President of the ILO make the selection. But Russia refuses to do it. She is getting preferred treatment. She only has to submit one, and that one, whoever he is, is selected and appointed.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield.

Mr. HOLLAND. The statement shows that not only does our country have to submit a list to the Director General, but that if he does not approve anyone on that list, he can select someone on his own as representative of the United States, not selected by our country.

Mr. McCLELLAN. The Senator is correct. That is not the way we ought to permit the United States to be treated. We will never command worldwide respect from other countries, and certainly not from the Soviet Union, as long as we let them bully us like that, and then have us foot the bill. I am not going for it. It ought to be stopped.

Mr. Meany says further, Mr. President:

I will tell you the basis of Mr. Jenks' strategy or approach. It is that if the ILO wants the Soviet Union to remain in membership we have got to accept them on the basis they represent themselves and the ILO has nothing to say about it. If the United States of America objects, then he raises the question—does the United States of America want the U.S.S.R. to maintain membership, to continue its membership in the ILO, and if we do want them to continue their membership in the ILO then we must accept them the way they want to be accepted, on the basis of this double standard.

Mr. President, I do not know why we should submit ourselves to double standards just because Russia says she wants it that way. As the distinguished Senator from Kentucky pointed out, we are paying 25 percent of all of the cost. And, Mr. President, they have some 1,700 or 1,800 employees in that organization. Although we pay 25 percent of the cost, we have only 4 percent-plus of American personnel. We are getting a good rooking over there, and it is time to stop it.

We are not withdrawing from the organization, but we are saying to that organization and to Russia and the Communist bloc countries, "We are going to be treated equally, or we are not going to pay."

What else do you want us to say? Do you want us to surrender to that kind of international bullying? Of course that is what it is. Let us stop it. Let us stand on our American character and principle, and demand that which is right, no more and no less.

Mr. HRUSKA. Mr. President, will the Senator yield me 2 minutes?

Mr. McCLELLAN. Mr. President, I yield 2 minutes to the distinguished Senator from Nebraska.

Mr. HRUSKA. Mr. President, this matter had been very carefully and thoroughly considered by the full Appropriations Committee. The consideration and the study of the committee were given to the additional testimony of the International Labor Organization at hearings that were held by the Appropriations Subcommittee in the other body on this subject. The date of the hearing was July 31, 1970. After a thorough study and thorough discussion and debate of this point, the committee decided by a vote of 21 to 2 in favor of the amendment which is now being debated.

It is my hope that this amendment will be agreed to and that it will be fully and very decidedly favored by the vote to be taken shortly by this body.

Mr. HOLLAND. Mr. President, will the Senator yield me 2 minutes?

Mr. McCLELLAN. I yield 2 minutes to the Senator from Florida.

Mr. HOLLAND. Mr. President, I hope that the action of the committee, carefully taken, will be sustained.

Senators will note on page 5 of the report of the committee that this action by no means presents itself as a removal or withdrawal of this country from the ILO. Our committee well knew that we had no such authority, but we felt that we should not longer proceed to pay a major portion of the expenses of this organization, which had turned itself into one that was so un-American as to bring upon it the diatribes—and they were truly stated here by Mr. Meany in his testimony.

If Senators will look at the committee report, they will find these words:

The committee recommends that the proper legislative committee review the continued participation of the United States in this organization.

Mr. President, this was nothing but a premonitory warning of the committee to show that we resented the kind of treatment being given to our country, that we believed the statements made by the leader of organized labor and by other business representatives who made exactly the same report to us, and that we felt it would be a very weak thing for us to continue to recommend a major appropriation to this organization without showing any resentment and without indicating that our country might, when the proper legislative committee studied the matter, decide that this country had no further business continuing in this organization. But this action today is not such final action and does not pretend so to be. It is a warning as to how this country feels.

Mr. McCELLAN. Mr. President, earlier I mentioned 4 percent. As of June 30, 1970, the ILO professional staff subject to international recruitment totaled 607, of whom 60 were Americans. The professional staff totaled 1,377, of whom 21 were Americans. All other staff, which includes technical assistance personnel in the field, totaled 1,088, of whom 62 were Americans.

With this money, we are paying substantially 25 percent of the cost of this organization. Mr. Meany says:

If we cut this money out, it would mean that a certain percentage, at least several hundred of these employees, would be under the direct supervision and domination of this man, and I can tell you from long experience that he will use that position to make each and every employee a communist agent—

We are paying for it—

whether he wants to be or not. They do not fool around.

They don't acquire power that they put on the back burner.

They use it. To us this would mean it would be disaster for the ILO, and if this happens it presents to us the clear question of whether or not we want to pay the price that is exacted from us to maintain the ILO with the Soviet Union having these special privileges as a member of the oragnization.

That, of course, Mr. Chairman, puts the matter squarely in the hands of the Congress and this committee—whether we are so anx-

ious to keep the Soviet Union in the ILO that we are willing to pay this price of accepting the double standard in which they have a preferential members—and which Mr. Jenks indicates he is going to continue.

That is the issue.

I heard arguments in this Chamber earlier on another issue to the effect that people did not have much to do and therefore we could save $400,000. Nine times that amount is involved here. They were doing no harm, if they had nothing to do. Here we are spending this money doing harm to ourselves. We are financing propaganda that is highly detrimental to the United States, and we are accepting the indignity of a double standard and are told to like it. I do not like it, and I am not going to vote one dime to continue that kind of practice, that kind of mistreatment of my government and of my country, in an organization dedicated in this respect to helping laboring people all over the world, when a great leader of organization in America denounces it and says that it no longer helps labor but has become a propaganda machine against the ideals and principles for which America stands.

I will not vote for it.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. McCLELLAN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 14 minutes remaining.

Mr. McCLELLAN. I yield 5 minutes to the distinguished Senator from Colorado.

Mr. ALLOTT. Mr. President, I rise in support of the position of the chairman of the subcommittee on this matter. Every word he has spoken is true.

I, personally, first became involved in this matter in 1962, when I was a delegate to the United Nations, under the appointment of President Kennedy. I saw many of the questions that are raised in the hearings here—I saw them arising at that time. I saw them occurring in the United Nations. I raised the questions, the questions that are raised here; but, unfortunately, there were few who felt that way at that time.

I am happy that Mr. Meany and the AFL–CIO have seen this matter in this light. On page 4 of the hearing, Mr. Meany said:

Oh, yes. They were in it—

That is, the ILO—

When it was part of the League of Nations. However, they applied in 1953, but applied with reservations—that certain sections of the constitution should not apply to the Soviet Union. For instance, ILO decisions are appealable to the World Court at the Hague, and the Soviets said they could not accept that. So the ILO said they could not accept the Soviets into membership.

A year later, however, the Soviets decided that they would accept membership in the ILO and pledge themselves to abide by the constitution.

When they came in they came in, of course, with delegates supposedly representing employers and delegates supposedly representing workers. Delegations were accepted on that basis even though everybody in attendance at ILO conferences knew there was no such thing as private employers in the Soviet Union, and there was no such thing as free trade unions in the normal sense in the Soviet Union. Of course, this is still true.

In the Soviet Union they have what they call trade unions but actually these so-called trade unions are agencies of government.

Later in the same hearing, he points out and introduces into the record a statement by Prof. Vela M. Carlos of Catholic University at Quito, Ecuador. In that statement, he says this:

Location and characteristics of the problem: Theoretically, neither employers "nor workers" organizations exist. The government is the sole employer. And unions, under the dictatorship of the proletariat, are either agencies of the government or the government itself.

Then I think we should pay particular attention to the words of Mr. Neilan on page 67. He said:

I would hope, sir, you might look at the UNDP, UNESCO, UNIDO, because they are using a lot of their funds to promote Communist doctrine via the ILO as the executing agency because the ILO gets $16 to $20 million a year from these agencies for special projects, a great number of which are held within the Soviet Union or satellite bloc and to which no one is invited except developing countries, to allow them to pursue this propaganda at home.

He continues, later:

Unfortunately, we have not been in a position to go against this doctrine they have been espousing so that many of the developing nations now have accepted this more or less as a fact, that Uncle Sam is just foolish enough to let us have all the money, we can do pretty much as we please. This has been particularly evident this last year when they persuaded the Arabs and Africans to lead in a fight, and they got the South Americans in on it, to take away from the 10 states of chief industrial importance their rights with respect to amendments to the ILO Constitution. And this effort has been concerted. They have also proposed to the office that when this item comes up next June that the committee to consider it should be an open committee, that is, stacked by the Russians and their friends, all of whom will apply for membership on it.

Mr. President, I am very happy that this matter has been crystallized by the leader of the greatest and biggest trade union organization in the country, because those of us who have been to some of the conferences in the past know that the idealistic concepts under which the ILO was organized and formulated no longer exists, that they have, in fact, become merely propaganda boards for the Russians and their satellites.

It was for this reason, with full knowledge, as the Senator from Florida said, that we cannot withdraw by this committee action from the ILO, that I supported the position of the committee to strike these funds from this particular bill. I sincerely hope that that certainly is struck because I do not believe we can continue to be so foolish as we have been in the past in these many organizations which have merely become tools of the Soviets in which they use them solely for the propagation of Communist doctrine and solely for the purposes of solidifying the Communist and emerging nations against us.

Mr. President, I yield back to the Senator any time I have and thank him very much for yielding to me.

Mr. JAVITS. Mr. President, I yield 3 minutes to the Senator from Kentucky (Mr. COOPER).

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 3 minutes.

Mr. COOPER. Mr. President, I am not acquainted with the specific facts which have brought this matter into issue but, as I understand it, it is a question of whether the United States shall pay its dues to the ILO, an organization of the United Nations.

I have listened to the argument that the United States and other members are subjected to Soviet propaganda in the ILO. I have no doubt that this organization, as are other subsidiary organizations of the United Nations, is used as a sounding board by the Soviet Union for propaganda purposes.

I have served four times as a delegate to the United Nations, in the fifth, the sixth, the seventh sessions, and again 2 years ago.

In every one of those sessions, one had to listen in committee and in the General Assembly, to the propaganda of Soviet delegates and to many false statements about the United States. But it was recognized as such by most members of the United Nations. As the Senator from New York has said, the United States and its delegates have the opportunity to answer in the ILO, and to speak affirmatively of our policies before its members. It is a matter of pride that U.S. delegates answer with facts and with argument, and do not attempt to match the policies of the Soviet Union.

Two years ago, when I happened to be a member, the Soviet Union had the hypocrisy to attempt to lay down a definition of aggression when only a few months before it had invaded Czechoslovakia.

I had the opportunity to call that to the attention of the committee and the General Assembly. A great strength of the United States which stands out against the propaganda of the Soviets, in the United Nations and in the ILO is the fact that the United States lives up to its obligations, and it pays its debts.

I would hate to see the Senate today enter upon a course of repudiation of its due, to the detriment of this great country.

I support the position of the Senator from New York.

Mr. JAVITS. I am very grateful to my colleague from Kentucky.

Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER (Mr. PELL). The Senator from New York is recognized for 2 minutes.

Mr. JAVITS. Mr. President, every argument we have heard can be equally directed to pulling out of the United Nations and every agency of the United Nations. We are denounced at every one of them. But we also denounce the Soviet Union at every one of them. Let that not be forgotten. If we should go further, and I should be a delegate to the United Nations this year, I assure my colleagues that I shall not be sparing in my criticism, nor will any other Senate delegate.

It is interesting to me that the document submitted by the Senator from Kentucky (Mr. COOPER) itself is the best argument why we should defeat the committee amendment, because it shows that the Soviet Union is not in default in

terms of its dues to the ILO. On the contrary, it is up to date.

Indeed, it is the United States that is in some technical default, that is, to the extent of most of the $5 million because we operate at the end of 1970 instead of 1969.

But what is being agued for is that we should be like Afghanistan, Bolivia, Burundi, Cuba, the Dominican Republic, and other countries. That would be our company, Mr. President, as to those who do not pay their bills. I think that that would be the worst thing for the United States to do, to cut and run like that.

Now, Mr. President, it has been said by one of the speakers to sustain the committee's position that this is a warning that we would be making.

Mr. President, I believe that it would be abdication we would be making, that the United States of America refuses to pay an honest debt for dues. Because it cannot stand the gaff, the United States is abdicating its responsibility as a leading Nation in the world, because it is afraid to face criticism.

Well, Mr. President, we are not afraid to face criticism in this country regardless of what happens on this vote. I will say that myself, although I am on the other side, no matter what happens on the vote. We know the temper of America. But what concerns me is the principle we are adopting. This is a big principle in international law. If we are going to fight the battle for freedom in the world, we must do it in every forum that is open to us.

Have we grown tired and discouraged? Is it that we do not want to take a beating anymore? Do we want to quit?

The Senator from Arkansas (Mr. McCLELLAN) said a great thing when we had this colloquy about the amendment. He said:

> I may be a little older than you, but I am ready to stand up and fight.

That is my argument.

Mr. McCLELLAN. I am going to fight on the basis of facts. I am not going to let them bully me.

Mr. JAVITS. I do not believe we are going to let the Russians bully us. Russia has its way of trying to make a dent in the international scene. We have ours. I am not for abdicating our place upon that scene, or our power or our influence in respect to it. When a great Nation like ours refuses to pay its dues to an organization to which it belongs, it is abdicating, not protesting.

Thus, I believe that the Senate should express itself before we take any such step as this which will be harmful to us.

Mr. CASE. Mr. President, will the Senator from New York yield?

Mr. JAVITS. Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. PELL). Three minutes remain to the Senator from New York, and 9 minutes to the Senator from Arkansas.

Mr. JAVITS. I yield 2 minutes to the Senator from New Jersey.

The PRESIDING OFFICER. The Senator from New Jersey is recognized for 2 minutes.

Mr. CASE. I shall not get into the substantive question which has been so well covered by the Senator from New York and underscored by the Senator from Kentucky.

But I do want to tell the distinguished Senator from New York, to his face, that he has performed in eloquent fashion this afternoon and has rendered a very great public service to the Senate and the country.

Mr. JAVITS. I thank the Senator from New Jersey. Will he yield back the remainder of his time?

Mr. CASE. I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I think we have just 1½ minutes remaining.

Mr. McCLELLAN. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 2 minutes.

Mr. McCLELLAN. I want merely to call attention to the fact that I have not heard a suggestion yet from anyone as to how we can correct the mistreatment, the discrimination that is being imposed on us, and imposed on us so insultingly—as Mr. Meany said, "an insult to our Nation." I have not heard one suggestion of how we could stop that. We talk about fighting. What do we fight? Do we fight the wind and keep pouring in money and keep talking?

They will understand what we mean when we cut off this money from some campaigns.

As long as we talk about believing in right and that this organization ought to go on and that we should let Russia dominate it while we foot most of the bill, we will continue to get this treatment.

We are not withdrawing. We are simply saying. "Until you straighten out and give us an equal voice with Russia in your treatment of us, we will not pay the money."

We have 2 years and they have 2 years in which to make up their minds about whether they are going to give us proper treatment and put this on the right track and respect America for what she is.

They have 2 years, and we have 2 years in which to decide whether we want to get out.

Until we do something affirmatively and let them know it and let the rest of the nations know from whom they are getting most of the money, we are going to continue to get the treatment we are getting now.

It is an abomination in my judgment in relationships between nations dedicated to one purpose and one high objective.

We do not have any right to be treated that way. We are not meeting our responsibility to America. We are not defending our country or defending her as she should be defended, as we supinely pour this money in there and take this sort of treatment from Russia or anyone else.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield 1 minute to the Senator from Nebraska.

Mr. HRUSKA. Mr. President, it has been suggested that we, by this action, would be cutting and running. I can think of no one who is running. We are cutting, but it is better to cut in this instance than to pay and to be forced to accept the humiliation and the inequality which we are suffering.

Mr. McCLELLAN. Mr. President, it is a lot better not to pay than to pay and get cut. Talk about cutting and running, we are getting cut when we pay. We are cutting our own throats.

Mr. HRUSKA. Mr. President, in his testimony, Mr. Neilan testified, speaking to the chairman of the House subcommittee:

> I would hope, sir, you might look at the UNDP, UNESCO, UNIDO, because they are using a lot of the funds to promote Communist doctrine via the ILO as the executing agency because the ILO gets $16 to $20 million a year from these agencies for special projects, a great number of which are held within the Soviet Union or satellite bloc and to which no one is invited except developing countries to allow them to pursue this propaganda at home.

When we cut, we are not cutting and running. We are cutting and fighting. That is a lot better than paying and being forced to accept the humiliation, the inequity, the actual damage and degradation we have faced.

Mr. JAVITS. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from New York is recognized for 1 minute.

Mr. JAVITS. Mr. President, the atmosphere in which we would be legislating if we sustained this position is evidenced by a colloquy between Mr. ROONEY and Mr. Meany on page 59 of the House subcommittee hearings.

It reads as follows:

> Mr. ROONEY. Mr. Jenks must be made to realize that he would be better off to lose the 10 percent, the Soviet Union contribution than the 25 percent contribution of the United States of America.
>
> Mr. MEANY. Except that he just doesn't believe the United States will act.
>
> Mr. ROONEY. Well, let's show him.

We talk about bullying, and we run out of international organizations because we do not like what they do. This is the way to dismember the world. If we follow this principle, we will belong to nothing. We will be attacked in this revolutionary world. The Russians will belong to nothing.

I say that this is a bad precedent and I hope that the committee amendment is rejected.

Mr. McCLELLAN. Mr. President, I note from the hearings that Mr. Meany is supported in his position by Mr. Ed Neilan, a delegate to the ILO for a number of years. His testimony is in the hearings.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter I received today from Mr. William B. Macomber, Jr., Deputy Under Secretary of State for Administration.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPUTY UNDER SECRETARY OF STATE FOR ADMINISTRATION,
Washington, August 24, 1970.

Hon. JOHN L. MCCLELLAN,
Chairman, Subcommittee on Appropriations, U.S. Senate.

DEAR MR. CHAIRMAN: The Senate Committee on Appropriations has recommended a cut in the appropriation of the Department of State which would result in the United States not meeting its financial obligations under the Constitution of the International Labor Organization.

Serious legal consequences will follow on non-payment of the United States assessments if such a recommendation is adopted. The Constitution of the I.L.O. was approved by the Congress by Joint Resolution on June 30, 1948, and consequently has the effect of a treaty. Article 13 of the Constitution empowers the General Conference of the I.L.O. to create legally binding financial obligations on Member States by levying assessments for the expenses of the I.L.O. Paragraph 3 of Article 13 states:

"The expenses of the International Labour Organisation shall be borne by the Members in accordance with the arrangements in force in virtue of paragraph 1 or paragraph 2(c) of this article."

It is therefore clear that the United States has undertaken an international legal duty to pay the share of the budget that has been voted by the I.L.O. General Conference and that we would be in violation of that obligation if we did not pay our full assessment.

As you know, the United States has always stood at the forefront of those who have insisted on the necessity of nations to fulfill their legal duty to pay obligatory dues in international organizations. And principally at the urging of the United States, the International Court of Justice made a ruling in the 1962 United Nations Assessments Case favorable to our position.

Non-payment of our dues to the I.L.O. would, of course, lead to the question being raised again in the International Court of Justice.

Moreover, aside from broader foreign policy implications, failure to pay our obligatory assessment would seriously weaken the ability of the United States to exert influence within the organization.

Yours sincerely,
WILLIAM B. MACOMBER, JR.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Mr. President, a vote "nay" is a vote to restore the House figure.

The PRESIDING OFFICER. The Senator is correct.

Mr. JAVITS. And a vote "yea" is a vote to reduce the House figure by the amendment made by the Senate committee.

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLELLAN. Mr. President, a vote "yea" is a vote to sustain the committee.

The PRESIDING OFFICER. The Senator is correct.

All time having expired, the question is on agreeing to the committee amendment on page 5, line 13. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Missouri (Mr. EAGLETON), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from South Dakota Mr. MCGOVERN), the Senator from Montana (Mr. METCALF), the Senator from New Mexico (Mr. MONTOYA), the Senator from Georgia (Mr. RUSSELL), the Senator from Virginia (Mr. SPONG), the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I also announce the Senator from Rhodes Island (Mr. PASTORE) is absent because of the death of a friend.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) and the Senator from Washington (Mr. JACKSON) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from New Hampshire (Mr. COTTON), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Ohio (Mr. SAXBE), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Tennessee (Mr. BAKER) and the Senator from Maine (Mrs. SMITH) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), and the Senator from Maine (Mrs. SMITH) would each vote "yea."

The result was announced—yeas 49, nays 22, as follows:

[No. 268 Leg.]

YEAS—49

Allen	Fannin	Moss
Allott	Gurney	Muskie
Anderson	Hansen	Percy
Bayh	Hart	Prouty
Bellmon	Hartke	Proxmire
Bennett	Holland	Schweiker
Bible	Hollings	Smith, Ill.
Boggs	Hruska	Sparkman
Burdick	Jordan, N.C.	Stennis
Byrd, Va.	Jordan, Idaho	Talmadge
Byrd, W. Va.	Long	Thurmond
Cook	Magnuson	Tower
Curtis	Mansfield	Tydings
Dominick	McClellan	Williams, Del.
Eastland	McGee	Young, N. Dak.
Ellender	McIntyre	
Ervin	Miller	

NAYS—22

Brooke	Griffin	Nelson
Case	Harris	Packwood
Church	Hatfield	Pell
Cooper	Hughes	Randolph
Cranston	Javits	Ribicoff
Fong	Mathias	Yarborough
Fulbright	McCarthy	
Goodell	Mondale	

NOT VOTING—29

Aiken	Inouye	Russell
Baker	Jackson	Saxbe
Cannon	Kennedy	Scott
Cotton	McGovern	Smith, Maine
Dodd	Metcalf	Spong
Dole	Montoya	Stevens
Eagleton	Mundt	Symington
Goldwater	Murphy	Williams, N.J.
Gore	Pastore	Young, Ohio
Gravel	Pearson	

So the committee amendment was agreed to, as follows:

On page 5, line 13, after the word "Congress," strike out "$144,611,000" and insert "$140,911,000".

Mr. HRUSKA. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLELLAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOODELL. Mr. President, I send an amendment to the desk, which I ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

It is proposed by the Senator from New York, on page 19, line 20, to strike out "$22,350,000" and insert in lieu thereof "$26,155,000."

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. GOODELL. I yield.

Mr. MANSFIELD. Would it be possible to arrive at a time limitation on the pending amendment?

Mr. GOODELL. Yes.

I ask for the yeas and nays first.

The yeas and nays were ordered.

Mr. MANSFIELD. How much time would the Senator suggest?

Mr. GOODELL. I would be satisfied with 15 minutes on my side. I want equal time with the chairman.

UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the time on the pending amendment be limited to 30 minutes, to be divided equally between the distinguished Senator from New York (Mr. GOODELL) and the chairman of the subcommittee, the distinguished Senator from Arkansas (Mr. MCCLELLAN).

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, for the information of the Senate, could we ascertain how many Senators will be offering amendments?

Mr. HART. Mr. President, I intend to offer an amendment. I am not sure there will be a vote on it. It will be subject to a point of order.

Mr. JAVITS. Mr. President, I am considering offering an amendment. I may not offer it.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. GOODELL. Mr. President, I shall be quite brief. This is a simple and direct amendment.

ORDER OF BUSINESS

Mr. STENNIS. Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. GOODELL. I am delighted to yield.

Mr. MANSFIELD. Mr. President, would the Senator allow the Senator from Mississippi to proceed for 5 minutes on a very important senatorial matter, without any of the time being taken out of the time allotted to him?

Mr. GOODELL. Yes.

PRIVATE LEASED AUTOMOBILES

Mr. STENNIS. Mr. President, it has come to the attention of the Select Committee on Standards and Conduct that certain Senators and a Senate officer personally have leased an automobile from an automobile manufacturing company under special and favorable terms. At a recent meeting attended by all of the members, the committee received a report from its staff of the facts and circumstances of these leasing arrangements and decided that the matter was within the committee's responsibility. The committee was of a single mind in its views and conclusions which are presented by me as the chairman of the committee in this summary report to the Senate.

Under a promotional program of many years' standing, for purposes of display or visibility of their automobile products, the automobile companies have been leasing cars directly to well-known athletes, professional entertainers, and other prominent persons. More recently the program has included Senators, although one company has limited participation to the more senior Members.

From the facts available to us on the comparative costs of leasing identical automobiles under the same conditions of maintenance, insurance, and other factors, it appears that the price paid by a Senator is considerably less than that which would have to be paid by the ordinary person making the same type of lease.

Our committee found no evidence to suggest that these leases with Senators were a means for the automobile companies to exercise improper influence. Nor did we find any indication that the automobile companies or their representatives received any favorite treatment from Senators or assistants to Senators because of the favorable lease terms. Individual Members of the Senate who held leases talked very freely with committee members about the entire matter. We are confident that no favoritism either was given to or expected by the automobile companies.

The committee found that these leasing arrangements violated no law nor any Senate rule.

In the course of its inquiry the committee also found that one of the automobile companies made agreements with certain committees of the Senate for the leasing of automobiles for the personal use of certain members of those committees. The Senator who received the cars paid the price of the lease. No appropriated funds whatever were used for such payments.

The committee concluded unanimously that the reduced amounts paid by Senators and the Senate officer for automobiles which they privately leased were a favor which was not generally available to ordinary persons. But for the fact that they were Senators and a Senate officer, they probably would not have been offered such terms.

In addition, the practice of the one company of making an agreement directly with a Senate committee for the leasing of cars for the private use of Senators clearly is improper. A Senate committee by itself does not have the authority to make such a contract, which in our opinion is void and unenforcible. Although these lease agreements do not bind the Senate or any of its committees, we believe this practice by the committees should be terminated at once.

After carefully considering the benefits and the implications of the leasing of cars to Senators, our committee makes the following advisory recommendation for the guidance of the various Senators involved: Existing private leases of automobiles to Senators at favorable rates should be terminated at or before the end of the current model year. These leases should not be renewed. In making private agreements in the future for the leasing of automobiles, Senators should not accept any favorable terms and conditions that are available to them only as Senators.

That report is signed by the Senator from Utah (Mr. BENNETT), the Senator from Kentucky (Mr. COOPER), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Idaho (Mr. JORDAN), the Senator from Georgia (Mr. TALMADGE), and its chairman, the Senator from Mississippi (Mr. STENNIS).

Mr. President, the Senator from Utah (Mr. BENNETT) is present. He is the vice chairman of the committee. He may have some remarks to make.

Mr. BENNETT. Mr. President, I have nothing to add to the statement of the committee, which has been carefully worked out and which, I think, represents a solution of this problem which is eminently fair.

The committee observes, and perhaps the RECORD should show, that there are certain lease arrangements which have been properly authorized by the Senate for the service of some of its senior officers, including the President pro tempore, the majority leader, the minority leader, and the Vice President; and these are not involved in the matter we have been discussing. We are discussing here only those automobiles which have been made available on a leased basis at a greatly reduced price to Members of the Senate as individuals, and not as officers of the Senate.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. MANSFIELD. Are those the only ones officially approved by the Senate, the ones the Senator has just mentioned?

Mr. BENNETT. As far as I know.

Mr. STENNIS. Mr. President, I thank the Senator from New York for yielding.

DEPARTMENTS OF STATE, JUSTICE, AND COMMERCE, AND THE JUDICIARY APPROPRIATIONS, 1971

The Senate continued with the consideration of the bill (H.R. 17575) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1971, and for other purposes.

Mr. GOODELL. Mr. President, the Senate Appropriations Committee has recommended the appropriation of $22,350,000.

Mr. BYRD of West Virginia. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. How much time does the Senator from New York yield himself?

Mr. GOODELL. Ten minutes.

The Senate Appropriations Committee has recommended the appropriation of $22,350,000 for buildings and expenses at the Federal Bureau of Prisons. That figure is $550,000 more than the House approved, with the increment going toward the design of a specialized medical facility at Butner, N.C.

It was my feeling that the Bureau ought to be allocated $26,155,000 as a minimum for buildings and facilities for fiscal year 1971. I therefore submit this amendment, which is approximately $3.8 million over the Appropriations Committee amount; and, incidentally, it is less than the budgeted amount.

The Senate committee and the House committee have both stricken three major facilities requested by the Bureau of Prisons, which would total about $3.8 million in cost. On August 5, I wrote to the distinguished Senator from Arkansas (Mr. MCCLELLAN), the chairman of the subcommittee, recommending an increment of $4.3 million in the buildings and facilities appropriation. I noted that the President had originally requested $27,350,000 total, and that the Bureau was appealing for the additional $4,355,000 after the House action.

I commend the subcommittee for having recommended $550,000 more than the House figure. That $550,000 is to go for the planning and design of a medical facility at Butner, N.C. That facility could serve as a model psychiatric study, research, and treatment center, giving special attention to the causes and prevention of violent and aggressive behavior and drawing upon the resources of several nearby major universities. No such facility now exists in the United States, and no model exists for the utilization of psychiatric services in the correctional facility setting.

As recent events in New York have demonstrated, there is clearly a need for such a model. The Butner center could provide it, and I, therefore, recommended in my August 5 letter to Senator MCCLELLAN that it be funded. I am grateful to the subcommittee for having responded to my suggestion.

Recently we had a crisis in the New York City prisons involving the Tombs, a correctional facility to detain individuals before trial. Such detention is a very major problem across the country, at the State and local levels. As those events in New York have demonstrated, there is a need for the Federal Government to take the leadership here. I have proposed an amendment, which is being considered in committee, to the LEA Act, which would provide a Federal grant-in-aid program for States building rehabilitation facilities. But here there is no opportunity to present such a major program.

There were three other facilities which I recommended that the subcommittee fund, and which it decided should not receive appropriations. It is these three facilities which I propose to fund under

my amendment, which would add $3,805,000 for Bureau of Prisons facilities.

The first $100,000 of the increment is to go to design a metropolitan correctional center in San Francisco, Calif. This would be a facility for Federal prisoners, aimed at relieving the severely overcrowded confinement facilities in San Francisco, an area where there are no State or local plans for prison construction. The center would incorporate community treatment programs, services to probationers and parolees, and diagnostic services to courts in the area.

The second and largest facility that has been deleted involves $2,055,000 requested by the Bureau to design correctional facilities for women, to be located in the western part of the United States. The number of female prisoners in the Federal prison system is rising each year, and existing facilities for women are pitifully inadequate. The proposed center will be a model facility designed to meet the program needs of women offenders, through training and diagnostic procedures in ways not presently possible in existing traditional institutions.

The third item deleted by the committee involves $650,000 requested to design a metropolitan correctional center in the Baltimore, Md. area. Similar to the San Francisco center, this project would provide a detention facility for unsentenced and sentenced Federal prisoners, and will include community treatment, probation and parole services. Like the other three, this facility will be a model and demonstration center.

These three facilities are deemed to be of the highest priority by the Federal Bureau of Prisons, and their costs have been calculated as part of a 10-year budget plan currently being drawn up by the Bureau at the request of the President. Certainly, the need for these projects is pressing, and I join with the Federal Bureau of Prisons in asking that you restore $3,805,000 to the Bureau's appropriation.

Mr. President, we have a correctional crisis in this country. The Federal Government must take the lead. Certainly we must provide model facilities for the treatment of Federal prisoners. And I think we have even a greater responsibility, which we will debate in this body later, with reference to State and local facilities and the rehabilitation of prisoners, in an effective war on crime.

Mr. President, about 70 percent of the serious crimes in this country are committed by repeaters, recidivists; and we have literally one of the worst prison systems in the western world in terms of rehabilitation. We simply are not providing the money.

Recently an example came to my attention at Rikers Island, New York City, where they had reduced the recidivist rate from 70 percent to 23 percent through the use of a manpower development and training grant, training the inmates in skills they could use when they got out, and be assimilated into the economic system.

That grant was cut off; so now the recidivist rate is back up to 70 percent.

This is a poor way to fight crime. Providing an adequate prison system is critical in the war on crime, not to mention the humane requirements of providing adequate, decent facilities for those who have been convicted, and for their rehabilitation.

Mr. President, this is a simple amendment. It is within the budget. I know not why the committee deleted it, except that I know there are great fiscal pressures that have been brought to bear on all of us.

I think it is poor economy to cut this kind of money out of the program of the Bureau of Prisons, and I hope we can agree to restore it.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. McCLELLAN. Mr. President, I yield 3 minutes to the distinguished Senator from Nebraska.

Mr. HRUSKA. Mr. President, the Senator from New York is to be commended for proposing this amendment, and demonstrating thereby his great interest in the matter of prisons and correctional facilities. He has an understanding of the problem which is very real.

He was also instrumental, I might say, in the securing of that part of the budget for those three institutions included in the bill by the other body. That total included $15 million for the New York detention headquarters, where very grave and serious conditions prevail today. I have interested myself, for a number of years now, in trying to get this step taken. Now it has finally been taken by the House. The same is true as to the West Coast Youth Center, for which a total of $2,055,000 was allowed by the other body, and then $500,000 for the second correctional center.

Four items remain in the budget for this purpose. One was the Butner facility, to which reference has been made, and the other three are in the pending amendment—namely, a correctional center for San Francisco, facilities for women in the western area, and a metropolitan correction center for Federal prisoners within the area around Washington.

In considering the appeal of the Department of Justice for those four items, the Appropriations Committee requested a statement of priority as among those four. The statement of priority led off with the item from Butner, N.C., the medical facility, and that was discussed earlier in this debate. However, when it came to the remainder of them, it was felt that a total of five of these facilities being allowed in the bill would be a reasonable allowance for this year for the purpose of construction.

Another element that led us to delete from the budget request the three facilities that are included in the pending amendment was this: Sites for those facilities have not yet been selected. There will be plenty of time to allow moneys for site acquisition and design in each of these instances after a little more specific information will be available.

A third factor was this: In the authorization bill for the Law Enforcement Assistance Administration is an allowance presently of 25 percent of the overall allowance for it, for the purpose of title E in that authorization, and that has to do with prison reform, which includes the construction of facilities on a matching basis.

It was felt that those three reasons would be sufficient to warrant the elimination for the time being of the three items included in this amendment.

I want to concur most fully and enthusiastically with the conclusions of the Senator from New York that these three facilities are direly needed and are badly needed, and action should have been taken some time ago on them. But we feel that for the three reasons stated, they should not be included in the budget and in the appropriation bill at this time.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. HRUSKA. I yield.

Mr. McCLELLAN. Of the three, I do not think anyone questions the need, but they do not even have the sites for them as yet, do they?

Mr. HRUSKA. That is correct.

Mr. McCLELLAN. In one place, they do not even know in what State they are going to locate it—just somewhere in the Midwest. I do not think anybody is going to oppose an appropriation whenever they say that they have the site and are ready to go. But I see no point in putting the money in here now. They put in the top priority. They have five of the eight facilities they requested in this bill. They do not have sites for the other three, and as to one of them, they do not even know in what State they are going to locate it.

We have supplemental appropriation bills coming along all the time, and the minute they get a site and say they are ready to start planning—I do not think they can plan it very well before they have a site—I do not think anyone will hesitate to appropriate the money for their needs. We have been pretty generous. We gave them what they said was the top priority.

Mr. HRUSKA. By way of further information on this, of the four items that were in the budget and not approved by the House, Butner was the only one in which a site existed and was approved. It had been donated by the State of North Carolina for that purpose.

Mr. McCLELLAN. They are ready to go.

Mr. HRUSKA. And they are ready to go.

It seemed to the committee that there was a differentiation between that item and the other three for which sites were not yet selected.

Mr. President, I reserve the remainder of my time.

Mr. GOODELL. Mr. President, I appreciate the assurances of the Senator from Arkansas and the Senator from Nebraska. They are interested in these facilities and they think they are important. I think the best way to indicate our feeling on this subject is to put the money in the budget, to put the money in the appropriations bill now.

The administration has budgeted these items. We want them to move forward now. If we delete the money for them, the planning inevitably will be held

back. We may be here next year with still no sites chosen.

I am certain they can move forward very quickly in site acquisition and construction if we put the money there. They have budgeted it. The Bureau of Prisons wants them. I do not think the Bureau of Prisons conceives that there is any problem in proceeding with construction of these facilities and with finding an appropriate site. As a matter of fact, I think that part of the problem here is that we keep going back and forth. The Bureau of Prisons wants assurances that they are going to get the money and that they can go ahead; and Congress says, "No, we're not going to put the money in until sites are chosen, until you have your full plans."

This is a very critical problem in our country, acknowledged and understood perhaps best of all by the chairman and the ranking minority member of this committee.

I think we should go forward now and let the administration know that we support their request; let the Bureau of Prisons know that we support their request, and that we will give them the money necessary to meet this problem and start having an enlightened rehabilitation program, some new model centers which will be of great use for our State and local prison authorities, and get it moving now, instead of quibbling back and forth about who has to come forward first with a plan and site acquisition or with appropriations.

I would urge, with all due deference to my esteemed colleagues, that the Senate move now to appropriate this money. That is the way we will begin to get action and get it very quickly.

Mr. President, I am prepared to yield back the remainder of my time.

Mr. HRUSKA. Mr. President, with respect to the realization of the need for these facilities, I think we could go far beyond the great need for present facilities not only in the Federal system but also in the State system. In fact, the chairman of the subcommittee and the ranking minority member are so aware of this situation that we have taken pains to include in the law enforcement assistance administration bill very generous sums for this purpose—25 percent of the entire budget—the exact amount of which I do not remember. I would think that there would be a minimum of, say, $100 million to $150 million for that purpose statewide. So we do know what the situation actually is.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. HRUSKA. I yield.

Mr. GOODELL. I appreciate what the Senator has said, and I strongly agree with the need for grants in aid through the Law Enforcement Assistance Act. I commend the Senator for his action, and I commend the subcommittee in that respect. Those are grants to the States. We are talking about the prime Federal responsibility with Federal prisons.

Mr. HRUSKA. That is correct.

Mr. GOODELL. We do have a situation in which we are contracting out, I think, some 30 of the female prison inmates to States. In many cases, the States and localities do not have adequate facilities and the Federal Government does not have adequate facilities to take care of the youthful offenders who are lumped together with the others.

Mr. HRUSKA. If the Senator will permit me, I will make this statement. The reason for the reference to the law enforcement assistance administration authorization bill is to point to the awareness of the problem on the part of the chairman and the ranking minority member of this subcommittee.

As to the item being in the budget, I would gladly concede that that would be a most persuasive and irrefutable argument if we followed it as closely and strictly when the committee came out with an amount that was over the budget. But that does not happen. Time and again, this body has been guilty of going over that budget. I would think that a transgression under the budget would be put up with quite cheerfully, and it would be only a fraction of the great amounts that have been over the budget.

We are grateful for the budget including these items as submitted by the President. On the other hand, we have never abdicated our own independent judgment in the premises. We appreciate the recommendation, but we do feel that we should exercise this independent judgment; and in this case we are asking this body to approve the action and the judgment of the Appropriations Committee.

It is our hope that the amendment will be rejected.

Mr. McCLELLAN. Mr. President, I yield back the remainder of my time.

Mr. GOODELL. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. PELL). All time on the amendment is now yielded back.

The question is on agreeing to the amendment of the Senator from New York (Mr. GOODELL).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Missouri (Mr. EAGLETON), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from South Dakota (Mr. McGOVERN), the Senator from Montana (Mr. METCALF), the Senator from New Mexico (Mr. MONTOYA), the Senator from Georgia (Mr. RUSSELL), the Senator from Virginia (Mr. SPONG), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Rhode Island (Mr. PASTORE) is absent because of the death of a friend.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from New Hampshire (Mr. COTTON), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Ohio (Mr. SAXBE), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Tennessee (Mr. BAKER) and the Senator from Maine (Mrs. SMITH) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Maryland (Mr. MATHIAS) is detained on official business.

If present and voting, the Senator from South Dakota (Mr. MUNDT) and the Senator from Maine (Mrs. SMITH) would each vote "nay."

On this vote, the Senator from Maryland (Mr. MATHIAS) is paired with the Senator from Kansas (Mr. PEARSON). If present and voting, the Senator from Maryland would vote "yea" and the Senator from Kansas would vote "nay."

The result was announced—yeas 27, nays 41, as follows:

[No. 269 Leg.]

YEAS—27

Bayh	Hart	Moss
Brooke	Hartke	Muskie
Burdick	Hatfield	Nelson
Case	Hughes	Packwood
Cooper	Javits	Percy

Eagleton	Montoya	Symington
Goldwater	Mundt	Williams, N.J.
Gore	Murphy	Yarborough
Gravel	Pastore	Young, Ohio
Hollings	Pearson	

So Mr. GOODELL's amendment was rejected.

Mr. HRUSKA. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR ADJOURNMENT TO 8:30 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 8:30 tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CHURCH TOMORROW MORNING

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senator from Idaho (Mr. CHURCH) be recognized for not to exceed 15 minutes sometime in that period between 8:30 and 9 a.m. when the time starts running.

Mr. McCLELLAN. Mr. President, can committees meet tomorrow?

Mr. MANSFIELD. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENTS OF STATE, JUSTICE, AND COMMERCE, AND THE JUDICIARY APPROPRIATIONS, 1971

The Senate continued with the consideration of the bill (H.R. 17575) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1971, and for other purposes.

Mr. HART. Mr. President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The Senate will be in order. The Chair cannot hear the Senator from Michigan. The Senate will be in order.

Mr. HART. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. HART) proposes an amendment as follows:

On page 20, line 10, strike out "$480,000,000" and insert in lieu thereof "$1,000,000,000".

Mr. President, the amendment would add $520 million to the funds appropriated for the Law Enforcement Assistance Administration, the main Federal program in the fight against crime.

The cities of the Nation, testifying through the voices of several mayors, including the mayor of the city of Detroit, have urged that at least $1 billion be appropriated for this program in fiscal year 1971. But the administration's budget request was less than one-half that amount, some $480 million. The House appropriated that amount, and the Senate Appropriations Committee also reflects the Senate Appropriations Committee adoption of that budget request figure.

Mr. President, at this time the Subcommittee on Criminal Laws of the Committee on the Judiciary, under the able chairmanship of the Senator from Arkansas who is handling the pending bill, is reviewing amendments to the Safe Streets Act, which presently includes no authorization for the Law Enforcement Assistance Administration for fiscal year 1971 or subsequent years. I have already submitted an amendment to that act providing for a $1 billion authorization in fiscal year 1971 and for greater funding in subsequent years.

I recognize that the amendment I have called up may be subject to a point of order since the Senate has not yet passed an authorization for the act for fiscal year 1971. However, I introduce the amendment now to focus attention on the need to increase the appropriations for this vital program. I would hope that the Senate would accept this amendment to demonstrate support for an increase in the authorization of the Law Enforcement Assistance Administration to $1 billion.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HART. I yield.

Mr. MANSFIELD. Mr. President, the bill contains $480 million for assistance to local law enforcement agencies. This amounts to about $2.40 for every man, woman, and child in America.

The $2.40 per person for local law enforcement assistance is not enough. Crime is too great a problem to be dealt with in such meager fashion. When we consider some of the other millions, tens of millions, hundreds of millions, and billions that are spent for other subjects that are not nearly so pressing, one begins to wonder.

The Senate has demonstrated its commitment to fighting crime by passing virtually every major crime proposal introduced with one exception, and that was held up at the request of the administration. It has done so under the leadership of the distinguished Senator from Arkansas, the manager of the pending bill.

The Senate could do as much by allocating a sufficient portion of this Nation's resources to this most pressing of all problems.

I commend the Senator from Michigan for offering the amendment. He has brought into clear focus the priorities question here involved. Although his amendment, as he says, is subject to a point of order, by offering it, in my opinion, the distinguished Senator from Michigan (Mr. HART) has performed an outstanding service.

Mr. HART. Mr. President, I am very grateful for the comment of the distinguished Senator from Montana, our majority leader. It makes more likely the pospect that before this session adjourns sine die we will, indeed—to be a little crude about it—put our money where our speeches have been. We have all been making magnificent speeches about crime, but they do not seem to intimidate the criminal. If this war is to be won, it will have to be won as all wars are won, with not only plans and work, but also with money.

There is not a citizen in our country who would quarrel with the suggestion of the distinguished majority leader that $2.50 is not a very massive commitment per head in the elimination of crime.

Mr. President, the Nation faces a crime crisis and we all know it. In the past 7 years the Nation's population has gone up 10 percent but the crime rate has gone up 88 percent.

We have all made hundreds of brave speeches about the need to fight crime but the speeches do not seem to be intimidating many criminals.

Crime continues as the Nation's prime concern. But that concern is hardly reflected in the appropriation measures that we are contemplating.

The administration request is, in my view, totally inadequate in light of the tremendous threat crime poses.

Everyone agrees that our present system of criminal justice—our courts, prosecutors' offices, police, and prisons—is badly strained under the enormity of the challenge and needs help fast—lots of it.

Yet while we spend about $85 billion to protect our national interests from foreign threat around the globe, we spend a total of about $6 billion—at the Federal, State, and local levels combined—on our entire law enforcement and criminal justice effort.

With substantially increased funding, the present distribution of funds by the State to all localities could continue at about the present levels, while additional money would be available for expanded crash programs in critical areas such as improved police response time, court reform, drug control, and juvenile rehabilitation.

Rehabilitating addicts, diverting juveniles from the criminal system, streamlining court calendars—all are areas where concentrated efforts could have a dramatic impact—and where money for more and better trained personnel is the major hurdle.

Mr. President, the Violence Commission called for a doubling of our present investment in criminal justice and law enforcement, as rapidly as it could be wisely planned and utilized. I think we can come close to that goal and use the money soundly now.

Doubling the administration's request for LEAA funds for fiscal 1971 would add less than one-quarter of 1 percent to our Federal budget. Surely that is not too much to spend on what is probably the No. 1 concern of millions of Americans.

The reason people cannot walk on the street at night with any measure of security is not because of something planned by Mao Tse-tung, the Politburo, nor any power in or out of Cambodia, but steps we have failed to take in the neighborhood to make our commitment consistent with our responsibilities. This amendment would seek to do that.

Mr. President, I hope the amendment is agreed to.

Mr. McCLELLAN. Mr. President, I join the distinguished majority leader in commending the Senator for evidencing tremendous interest, which has been maintained throughout the years in law enforcement, and in focusing attention on the item that is in this bill, which is the full amount of the budget request granted by the House and concurred in by the Senate. But there is no legislative authorization for any additional funds. Legislative authorization is pending. It is now before the Committee on the Judiciary and before the Subcommittee on

Criminal Laws and Procedures, of which the distinguished Senator from Michigan is a most able member.

This bill has been processed, hearings have been held, and we have processed that bill to the point where we had the first meeting this morning of the subcommittee to mark up the bill. We hope to resume our work on the bill in the morning and succeed in marking it up and have it reported to the full committee.

I have no doubt that the bill will reach the full committee and I am sure of full Senate action at this session of Congress. I suggest we should proceed in an orderly parliamentary way under the rules of the Senate.

If there was a great emergency and the Senate was prepared to act and could not get legislative authorization through, we might disregard the rules of the Senate and proceed in this fashion; but I think we would be establishing a precedent we do not want to follow and a precedent we would not want to get in the habit of following unless there were a real emergency.

Since this measure is in process and action is imminent, I think we should proceed in that fashion.

Regretfully I have to raise the point of order under rule XVI against this amendment.

In addition, I want to say that we all know the crime situation. As the Senator said, we have done a lot of talking about it; now we have to do a lot of acting about it. But I point out that money alone is not going to solve the problem. Money is crucial in the battle against crime, but until we get the machinery organized so the money can be spent effectively and efficiently, it is not going to solve the crime problem. We are working hand in hand here to get the proper legislative remedy before this body with the authorization to carry on this program.

My recollection is the administration suggested probably $750 million, then $1 billion next year, and $1.5 billion the next year, but those amounts are not binding on Congress. We are going to work it out and bring it to the floor of the Senate and let the Senate work its will.

Mr. President, I suggest the amendment is out of order.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield to the Senator from Nebraska.

Mr. HRUSKA. Mr. President, I subscribe to the statement of the Senator from Arkansas. We often are confronted with the thought that we should put our money where our talk is. The idea of trying to solve our problems with talk does not work. We have here, in connection with the Law Enforcement Assistance Administration, a plan in which the appropriation of money is made primarily pursuant to a State plan. Until that plan is approved, and approved on the basis of being something calculated to improve the present law enforcement picture in the respective States, there is a limitation on what they can do by way of improving present law enforcement procedures. It is in progress and will be achieved soon.

Hence, the authorization is in the neighborhood of $650 million for the current fiscal year, to be augmented the following year to $1 billion, and $1 billion plus in a few fiscal years. I support the statement of the Senator from Arkansas that we cannot think simply in terms of appropriating money because we say that crime is bad and money is needed. We need money but it must be spent expeditiously and efficiently. I hope that is the way the Senate proceeds.

I am glad the Senator from Arkansas is raising the point of order at this time so we can consider it properly.

The PRESIDING OFFICER (Mr. HUGHES). A point of order has been raised. The funds proposed in this amendment are not authorized by law nor are there budget estimates therefor. Therefore, the Chair, under rule XVI, paragraph 1, sustains the point of order.

The bill is open to further amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. JAVITS. Mr. President, I send to the desk an amendment on behalf of myself, the Senator from Wisconsin (Mr. NELSON), and the Senator from New Hampshire (Mr. McINTYRE), and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows: On page 46, line 20, strike "$5,000,000," and insert in lieu thereof: "$6,000,000," and on lines 22 and 23, strike "$18,950,000" and insert in lieu thereof: "$19,950,000".

Mr. JAVITS. Mr. President, I can explain this amendment very briefly. The amendment deals with the provision of the bill relating to expenses for technical and management assistance to be given to small businessmen in the general entrepreneur class to enable them to take advantages of other programs the SBA has, including the possibility of participating in Government procurement.

The Administrator of SBA made a most profound plea for $5 million rather than the $1 million contained in my amendment and states that he has on hand "over 200 proposals exceeding $15 million from management and technical assistance organizations that have the capability to render significant assistance in carrying out the program envisioned under section 406."

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Administrator of the Small Business Administration.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SMALL BUSINESS ADMINISTRATION,
Washington, D.C., May 19, 1970.

Hon. JOHN L. McCLELLAN,
Chairman, Subcommittee on Departments of State, Justice, Commerce, the Judiciary and Related Agencies, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR McCLELLAN: The Departments of State, Justice, Commerce, the Judiciary and Related Agencies Appropriations Bill for FY 1971 as passed by the House of Representatives on May 14, 1970, provides a direct appropriation of $18,950,000 and transfer authority of not to exceed $53,100,000 from the revolving funds for salaries and expenses of the Small Business Administration. The Bill also provides $1,340,000 for insufficiences arising out of the participation sales authorized in the 1968 Act and a capital appropriation of $200,000,000 for the Business Loan and Investment Fund.

The amount approved for the direct appropriation for salaries and expenses represents a reduction of $5,150,000 from our request. Of this reduction, $5,000,000 is from the funds requested to carry out the provisions of Section 406 of the Economic Opportunity Act of 1964 as amended. The balance of the reduction reflects the elimination of the funds requested for research contracts. In addition, the request for capital for the Business Loan and Investment Fund was reduced from $242 million to $200 million.

After careful review of the reductions, we feel that we can accept the House action without impairing our commitments to the small business community with the exception of the reduction of $5,000,000 in funds required to carry out the provisions of Section 406 of the Economic Opportunity Act of 1964 as amended.

The $5,000,000 allowed by the House will allow us to continue only the same program level which we now have for FY 1970. However, this program level is not sufficient to meet the increasing requirements of assistance to the socially and economically disadvantaged as provided in Section 406. Some of the pressures that make it imperative for us to extend our program of assistance under this act are as follows:

1. The increasing number of economic opportunity loans in our portfolio and the continuous escalation of requests for technical and management assistance.

2. The need for professional management assistance for new minority firms obtaining government contracts under Section 8a of the Small Business Act. We project a $100,000,000 procurement program under this authority and professional management assistance is so basic to these new minority firms that if it is not available on a timely basis, the concept of developing new self-supporting minority owned productive facilities could fail.

3. The need to strengthen our construction task force so that we may provide the necessary kind of assistance to minority contractors in overcoming the barriers that have prevented minority contractors from full participation in the construction industry.

4. And finally, these funds are necessary as a catalyst to encourage the private sector to greater efforts in the area of support and assistance to the socially and economically disadvantaged, as demonstrated in our FY 1969 and 1970 programs.

We now have on hand over 200 proposals exceeding $15,000,000 from management and technical assistance organizations that have the capability to render significant assistance in carrying out the program envisioned under Section 406. We, therefore, earnestly request the restoration of the $5,000,000 that was reduced by the House to the full $10,000,000 as requested in order to carry out the programs contained in the enclosed justification.

My staff and I will be glad to discuss our entire budget estimates and our appeal on this item at the convenience of the Committee.

Sincerely,

HILARY SANDOVAL, Jr.,
Administrator.

Small Business Administration—salaries and expenses

1971 estimate:	
Direct appropriation	$24,100,000
Transfer from the revolving fund	(53,100,000)

1971 House allowance:
Direct appropriation..... 18,950,000
Transfer from the revolving fund ..... (53,100,000)
House reduction:
Direct appropriation..... 5,150,000
Restoration requested:
Direct appropriation..... 5,000,000

AMENDMENTS REQUESTED

Page 45 line 20 strike "$5,000,000" and insert "$10,000,000" an increase of $5,000,000 to restore the budget estimate for the section 406 activities. Page 45 lines 22, 23, strike "$18,950,000" and insert "$23,950,000" an increase of $5,000,000 to restore the budget estimate.

HOUSE REPORT (P. 24)

Salaries and Expenses. "The Committee recommends a direct appropriation of $18,950,000 together with transfer authority of not to exceed $53,100,000 from the revolving fund for the necessary salaries and expenses of the Small Business Administration."

"The Committee has included in the bill $5,000,000 the same amount as for the current fiscal year, to carry out the provisions of section 406 of the Economic Opportunity Act of 1964, as amended. The funds requested for research have not been approved."

JUSTIFICATION OF AMENDMENT

The Small Business Administration recommends full restoration of the $5,000,000 reduction made by the House of Representatives in the funds available to carry out the provisions of Section 406 of the Economic Opportunity Act of 1964, as amended. The total $10,000,000 which was requested for FY 1971 is necessary to carry out the following program:

1. *Professional Management and Technical Assistance Services—$2,500,000.*—Experience to date has demonstrated that many disadvantaged minority enterprises lack management training and experience. In many cases this need is critical to their survival and in almost all it severely limits progress to success. Under Section 406 of the Economic Opportunity Act, funds will be utilized to provide: (1) Business preplanning, (2) Basic management planning assistance, and (3) Post-contract assistance.

Funds for business preplanning will be utilized to identify the economic areas where expansion is needed to supply growing present and future requirements. In performing the basic market research studies on specific products, minority firms will come into a growing market, not an over-saturated one, the chances of survival will be maximized by minimizing the competition which arises in overcompetitive areas. This basic preplanning is required by new firms or organizations contemplating business entry.

It is anticipated that about 70 of the minority manufacturers assisted in FY 1971 will need business preplanning at a cost of $1,500,000.

Under the Basic Management Planning Assistance concept, funds will be used to employ professional management planning for new minority firms seeking 8(a) assistance. These plans will set forth the requirements and objectives for the new firm for an initial period. They will identify the ultimate products to be manufactured and sold in commercial markets with predictions of sale. Complete financial, facility manpower and related requirements will be set forth to produce needed products at competitive prices so as to attain stable commercial market objectives and independence from Government support and aid.

Post Contract Assistance is needed to assure that the firms successfully carry out their obligations (on time and with an acceptable product) and adhere to the long range basic management plan. Management concerns will on a contractual basis provide professional and technical assistance and education to the new firm. Experience to date shows that this is critically needed where the management and supervision are minority members and lack the experience and knowledge normally occasioned by previous participation. We estimate $1,000,000 is required for Basic Management Planning and Post Contractual Assistance.

2. *Local Assistance Organization—$4,000,000.*—There is a growing social conscientiousness among community leaders, professional and business organizations, educational institutions, trade associations, civic groups and public and private action groups, of their responsibility for participating in efforts to raise social and economic levels in depressed areas.

While the capability and experience of these diverse organizations varies considerably, most of the effective groups afford a surprising pliancy in both breadth and depth, and exhibit a firm grasp of the problems in their localities.

In 1971, it is anticipated that most of the target areas in which Operation Business Mainstream expects to operate will request assistance of some nature from one or more participating community organizations. To meet this anticipated demand, SBA will evaluate specific proposals from established organizations that can demonstrate their ability to relate to the local problems and work toward one or more of the goals set by SBA as essential to the success of the Minority Enterprise program.

3. *Construction Task Force—$1,000,000.*—Under this contract authority, special emphasis will be given to removing barriers that tend to prevent minority contractors from full participation in the construction industry. Units (called ACT teams) will be established and funded in 1971 in 25 target cities to help minority contractors find contract proposals within their area of competence, estimate and submit bids, solve bonding problems, etc.

4. *Market Research and Feasibility Studies, Group Management Training and Individual Counseling—$2,500,000.*—Under its regular MA program, SBA will evaluate the management strengths and weaknesses, and a management assistance plan will be developed to correct weaknesses for most minority-owned business loan applicants. Much of the required assistance will be supplied through the on-going MA program. For those situations where the depth and duration of assistance, or the location of the case preclude service under the normal program, the Agency will turn to the professional consulting community.

The Agency, and other organizations participating, need a great deal more information than is now available in order to distinguish and identify those businesses that, in view of national, regional, and local economic patters, offer the greatest likelihood for successful operation. Feasibility, market and economic research studies will be contracted for by which the Agency will pursue its objective of identifying specific business opportunities in target areas.

STATEMENT OF HILARY SANDOVAL, JR., ADMINISTRATOR, SMALL BUSINESS ADMINISTRATION, BEFORE THE SUBCOMMITTEE ON DEPARTMENTS OF STATE, JUSTICE, COMMERCE, THE JUDICIARY, AND RELATED AGENCIES, U.S. SENATE

INTRODUCTION

Mr. Chairman and members of the committee, it is a pleasure to appear before you today to discuss the Small Business Administration's budget estimate for FY 1971.

BUDGET ESTIMATE FISCAL YEAR 1971

Our budget request for FY 1971 is for $77.2 million, salaries and expenses, small business administration, a capital appropriation of $242 million for the business loan and investment fund and an appropriation of $1,340,000 for payment of participation sales insufficiencies. Included in the $77.2 million for salaries and expenses is $24.1 million direct appropriation and authority to transfer $53.1 million from the revolving funds. Of the $24.1 million direct appropriation, $10 million is requested to carry out the provisions of section 406 of the Economic Opportunity Act and $150,000 for research contracts.

HOUSE ACTION

The House bill provides for a direct appropriation of $18,950,000 and transfer authority of $53.1 million for salaries and expenses. It provides $200 million capital appropriation for the business loan and investment fund and $1,340,000 for participation sales insufficiencies. The House bill specifically provided $5 million for section 406 activities, a reduction of $5 million from our request and denied the $150,000,000 for research contracts. As stated in my letter of May 19, 1970, we are accepting the House action with the exception of the reduction in funds required to carry out the provisions of section 406 of the Economic Opportunity Act. We are appealing for a full restoration of this reduction back to the $10,000,000 contained in our original estimate.

HIGHLIGHTS OF FISCAL YEAR 1971 ESTIMATES

Before addressing myself to our specific appeal, I would like very briefly to touch upon some of the highlights of our budget estimates for fiscal year 1971.

PROCUREMENT AND MANAGEMENT ASSISTANCE

The major effort in PMA in 1971 will be the continued expansion of the 8(a) contracting program. It is not enough to simply award a contract to the minority business, there must be comprehensive planning done to assure that the business does have a reasonable chance for survival and, at some future time, will be able to take its place in the competitive market with no longer a need for preferential government contract treatment. This is the type of program being developed—the coordination of all of the resources available to the agency—procurement, technical and management assistance, financing, the involvement of private industry—every effort is being made to insure the success of the venture.

In FY 1971, there is an estimated 10 percent increase in the management assistance workload in order to provide the counseling, training and other assistance required by the small businessman. This will be accomplished through increased reliance on the talents volunteered by the private sector.

FINANCIAL ASSISTANCE

In the financial assistance area, for the lending programs, 7(a), and EOL, there is a projected increase of 32 percent. Although this increase is based, in part, on the continued emphasis on the utilization of the private sector, there is an increase of 49 percent in the SBA direct and immediate participation dollars available for these programs. It is projected that through improvements in organization, and in utilization of manpower as well as increased employee productivity, the program can be accomplished with a reduction in manpower of about 1 percent from 1970.

INVESTMENT ASSISTANCE PROGRAM

Under the Investment Assistance Program, the emphasis in 1971 will continue to be on the provision of venture capital to the disadvantaged small businessman. This is being accomplished through the licensing of SBIC's that are wholly dedicated to providing the capital otherwise not available to this group. These are organized under sponsorship of a large corporation or other organization with the required expertise in business management. SBA investments in 1971 in the MESBIC's will be $20 million, an increase of $5 million over 1970.

As you know, in FY 1970, the Congress directed that the administration provide $70

million in direct funding for the small business investment companies. The administration has made the $70 million available for fiscal year 1970 with $15 million of this total to be provided to MESBIC's. In fiscal year 1971, we have planned a $35 million direct lending program and a $30 million guarantee lending program to continue assistance to the SBIC's.

MINORITY ENTERPRISE

This program represents a twofold effort to develop and expand entrepreneurial and management opportunities in selected rural and inner city areas. The first phase is that carried on by our own staff. The coordination, the advisory and outreach services to the minority communities and the administration of technical and management assistance program authorized by section 406 of the Economic Opportunity Act—the second facet of the program provides for the augmentation of our basic assistance efforts through the use of grants and contractual programs offered by the private sector. The estimate for 1971 contains $10 million for this purpose, an increase of $5 million over 1970. The House bill reduces this item by $5 million back to the same amount as provided FY 1970.

APPEAL

Gentlemen, we just do not believe that the level of $5 million is sufficient to meet the increasing demands for assistanse to the socially and economically disadvantaged that is necessary to carry out the intent of section 406. This program actually commenced in SBA in FY 1969 when we approved $1.7 million in grants and contracts using funds transferred from the Office of Economic Opportunity. In FY 1970 the Congress provided SBA $5 million to continue and expand the program commenced in 1969. The responsiveness of management and technical assistance organiaztions, mostly nonprofit, to participate in the program has been just tremendous. We now have on hand over 200 proposals exceeding $15 million from organizations that have the capabilities to render significant assistance to active and potential small businessmen that have been socially or economically disadvantaged. We are receiving more proposals every day.

In FY 1971 we had planned, in addition to providing professional management and technical assistance to the increasing number of disadvantaged borrowers and applicants under SBA loan programs, to extend Section 406 assistance to other disadvantaged groups that are seriously in need of this type of assistance. For instance, we plan to extend our assistance to the disadvantaged firms obtaining Government contracts under Section 8(a) of the Small Business Act, and to minority contractors who have been prevented from full participation in the construction industry because of barriers that have been difficult if not impossible to overcome.

For FY 1971 under our 8(a) program, we are expecting a procurement program that will exceed $100 million. Through use of Section 406 funds, we will strive to assist these companies to become self-sufficient so that they do not have to depend upon Government contracts for their continued existence and so that they can take their rightful place in the commercial markets. As I previously stated, there is also an urgent need to assist minority contractors to participate fully in the construction industry. In 1971 we plan the establishment of units in 25 target cities to help minority contractors to locate contract proposals within their area of competence, to estimate and submit bids and to overcome existing bonding problems in the industry.

These are just two of the specific areas where we plan to use Section 406 funds in 1971. There are other areas which are outlined in our justification, such as: The Small Business Apprenticeship Training program. local assistance organizations, market research and feasibility studies and training and counseling of the disadvantaged small businessmen. Our experience has clearly shown us that this help is critically needed. Particularly where the management and supervision are minority members and lack the experience and knowledge so necessary to make a success of their venture.

Mr. Chairman, we honestly believe that $10 million is a minimal amount for us to carry out the type of assistance to the disadvantaged which was intended by the Congress when they considered Section 406 of the Economic Opportunity Act. We earnestly appeal for a restoration of the $5,000,000 that was reduced by the House.

This completes my prepared statement. We will be pleased to answer any questions you or the committee may have.

Mr. JAVITS. I have consulted with all parties in interest, including the distinguished chairman of the Small Business Committee (Mr. BIBLE), of which I am the ranking minority member, and with the manager of the bill, the Senator from Arkansas (Mr. MCCLELLAN). They have been kind enough to say that they will take an amendment for an additional $1 million.

I have also consulted with the Senator from Nebraska (Mr. HRUSKA). I think, considering the temper of the Senate, that desirable as is the case—I think they could really make a case for $5 million—they should be accommodated. That is the attitude of the manager of the bill and the chairman of the Small Business Committee. So I have agreed to introduce this as amendment.

Mr. McINTYRE. Mr. President, will the Senator yield

Mr. JAVITS. I yield to the Senator from New Hampshire.

Mr. McINTYRE. Mr. President as a member of the Select Committee on Small Business, I support the distinguished Senator from New York on this amendment.

The management assistance functions of the Small Business Administration under section 406 of the Economic Opportunity Act are perhaps more important than the funds available for loans and guarantees to minority small businesses. How on earth can we propose to turn over funds to businessmen who, almost by definition, have no prior business experience, and then expect them to manage their business without help?

This year, the Small Business Administration requested $10 million for this assistance program. The committee reduced this to $5 million. I believe that SBA ought to be granted at least another $1 million.

I cannot think of a better investment for the Federal Government than funds used to help train a new generation of minority businessmen who will be able, in the future, to help sustain themselves and their communities in prosperity without any future need for Government help.

I hope that the amendemnt of the Senator from New York will be accepted.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. PERCY. Mr. President, the rate of return on this investment will be exceedingly high. It will be a catalyst that will release the volunteer energy of organizations throughout the community and labor organizations that are anxious to help. I fully support the amendment.

Mr. JAVITS. Mr. President, I yield the floor.

Mr. McCLELLAN. Mr. President, I have consulted with other members of the Appropriations Committee. In view of the lateness of the hour and also due to the merit that is in this proposal, I have concluded to accept the amendment and take it to conference.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. JAVITS. Mr. President, before the Chair puts the question——

The PRESIDING OFFICER. The Senator from Arkansas has not yielded the floor.

Mr. McCLELLAN. I thought we were going to vote.

Mr. JAVITS. Mr. President, will the Senator yield to me?

Mr. McCLELLAN. I yield.

Mr. JAVITS. Mr. President, in the report appears the statement:

> The committee wishes to point out that the following language, contained in the House bill and recommended by the committee, is not authorized * * *

And then goes on to set out the particular section we are amending.

This matter has been covered by a budget estimate of $10 million. Therefore, as I understand it, the ruling is that this is, in effect, an authorized amount and that amount will apply both to the $5 million and the $6 million, which is well within the budget estimate.

Will the Chair tell me whether I am correct?

The PRESIDING OFFICER. Any amendment proposing funds within the budget estimate would be in order.

Mr. JAVITS. I thank my colleague.

The PRESIDING OFFICER. My question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MAGNUSON. Mr. President, the Senator from Washington and the Commerce Committee have had a long-abiding interest in a nuclear merchant marine. As a result, we built what everyone knows as the *Savannah*. The nuclear ship *Savannah* has been operating now for some years quite successfully. It has cost about twice as much to operate as a normal ship in merchant marine activities would cost but has accomplished a great deal in research. It has been used as a training ground for engineering crews. Instead of having one engineering crew, they have 4-hour watches and 4-hour shifts, and as a result a great number of Americans have been trained to handle nuclear power, whether it be a powerplant, ship, or whatever it may be.

Two years ago the administration wanted to lay up the *Savannah*. In the House and the Senate we were successful in ascertaining the figure of what it would cost to lay it up, $9 million, and instead we put funds for its continued operation back in the bill. It has been running the same way during the last year. Now again they would like to lay it up. It will cost about $1,700,000, con-

servatively, for the initial phase of laying the ship up.

Second, we have been able to achieve agreements with many countries in the world allowing this ship to land, which is sometimes difficult, due to insurance and other matters.

If we lay it up, I am afraid we will set back the prospects of what everybody knows is the beginning of a nuclear powered merchant marine.

So the House amended the bill again to allow the ship to continue operating.

Unfortunately, I could not attend the subcommittee hearings. I am not a member of the subcommittee. But they decided to go along and take it out of the bill.

I am not going to offer an amendment tonight, because of the lateness of the hour, but I want to express this feeling to the chairman, as a member of the full committee. The total cost of the lay-up would be $9 million. Continued operation would cost $4 million next year and $3.4 million thereafter.

The Senator from Delaware (Mr. BOGGS) nods his head. In other words, we ascertained that it will cost more to lay it up than to run it.

So I am going to tell the manager of the bill, and I hope he will bear with me because we were all busy with other appropriation bills, that in the conference the Senator from Washington is going to make a very serious attempt to accept the House figure.

Mr. McCLELLAN. Mr. President, I do not believe I need to reply to that statement. The reason for the Senate committee's action is stated in the report.

Mr. MAGNUSON. I am sure that if we had had an opportunity to come before the committee, the committee would have put it in the bill. No one paid attention.

Mr. McCLELLAN. Mr. President, it was a question of economics. We are told it was not economic. By taking it out, there would be $2,300,000 left in the bill to do other research. It sounds good. I do not know whether it is so or not.

Mr. MAGNUSON. I think we can make a good case when it goes before the conference.

We would be getting the benefit of nuclear training. I am afraid we would never get the agreements with other nations again in these days of competition in the merchant marine. I am sure the committee would have taken another look at it.

I shall try to work it out in conference. I wanted to serve notice on the Senator from Arkansas.

Mr. GOODELL. Mr. President, I want to commend the committee for providing funds for the Equal Employment Opportunity Commission in the amount of $19 million, increasing the amount from $14 million provided by the House. It is a critical provision. I trust the conferees will fight hard for the amount provided by the commitee, since it is of such vital importance.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that a letter to me from FBI Director J. Edgar Hoover, dated August 17, 1970, regarding the need for additional funds to reactivate the processing of non-Federal applicant fingerprints be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE, FEDERAL BUREAU OF INVESTIGATION,
Washington, D.C., August 17, 1970.

Hon. JOHN L. McCLELLAN,
U.S. Senate,
Washington, D.C.

MY DEAR MR. CHAIRMAN: Reference is made to prior correspondence and conversations with you relative to providing the FBI additional funds and personnel to reinstitute the processing of non-Federal applicant fingerprints. Justification material has been furnished you for the record in support of our need for the amount of $2,750,000 and 400 full-year employees for the fiscal year 1971 to handle the reinsitution of this program.

While the basis for the need of the funds and personnel mentioned above was predicated on the thought that it would be possible to reinstitute this program July 1, 1970, notification as to the date as to when this program can be reinstituted will, of course, depend on the action taken by the Congress with regard to this matter. None the less I would like to urge your support and consideration when action is taken by your Subcommittee to permit the allowance of the funds of $2,750,000 and the 400 additional full-year employees inasmuch as it will no doubt be necessary to utilize trained personnel on an overtime basis to process the backlog of these types of fingerprints which the contributors have continued to take but are holding in abeyance for submission for processing on notification from us that this program has been reinstituted.

As you know these fingerprints involve applicants and registrants for real estate licensees, gun permit holders, school teachers, school janitors, salesmen, cab drivers, race track and casino employees, bartenders and night club entertainers. The submission of these fingerprints by contributors will result in a substantial increase in our fingerprint receipts and the impact will be such that in order to keep arrest fingerprint searchers current and handle these non-Federal applicant fingerprints as rapidly as possible, it will be necessary to work our fingerprint technicians on an overtime basis to eliminate the log jam which will occur. As a consequence of this situation we will require the full $2,750,000 requested for the fiscal year 1971.

I thought you would like to have the benefit of the above observations in connection with the consideration your Committee will give this matter in the near future.

Sincerely yours,

J. EDGAR HOOVER.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that a statement by the distinguished Republican leader, Senator SCOTT of Pennsylvania, be inserted in the RECORD at this point.

There being no objection, Senator SCOTT's statement was ordered to be printed in the RECORD, as follows:

THE U.S. TRAVEL SERVICE

Mr. SCOTT. Mr. President, I am pleased to express my support for the U.S. Travel Service's fiscal year 1971 appropriations in the amount of $4.5 million. This amount is $2 million less than the budget request, but is the same as the appropriation for the current fiscal year.

As we await final word from President Nixon that Philadelphia has been selected as the site for the Nation's Bicentennial Observance in 1976, we should also make every effort to support one of the Bicentennial's biggest boosters, the U.S. Travel Service. Operating within the Department of Commerce, the Travel Service is charged with encouraging national efforts to increase foreign travel to the United States. As a sponsor of the legislation creating the Travel Service back in 1961, I have seen some of the solid economic benefits which have accrued since that time. First, our balance of payments has improved, but not yet to the point at which I am satisfied. For every two tourist dollars leaving the United States, only $1 returns. Surely, we must improve this situation. Second, foreign travel to the United States has increased more than 188 per cent since 1961. This is due, in no small part, to the creativity and energy of the U.S. Travel Service. Congress must do its part to provide the Travel Service with the funds it needs to continue an effective operation.

At this point, I wish to point out that legislation is still pending before Congress which would, if finally passed, authorize appropriations of $15 million for the Travel Service for each of the next 3 fiscal years. Once this measure reaches the President for approval, I might suggest that the Travel Service play an even more helpful hand by pushing for higher funding levels during the coming years so that more attention could be paid to Pennsylvania in its preparation for the Bicentennial celebration in 1976. For my part, I will be glad to support additional funds for this much-needed effort.

The Nation's bicentennial period is fast approaching. Beginning in 1976, Philadelphia alone is expected to attract more than 50 million visitors who are then expected to spend about $1 billion. Considering what we have done so far to promote tourism, this represents a tremendous return on our original investment in the U.S. Travel Service. Consequently, I believe we must cooperate fully with the Travel Service by not only providing it with the tools to do even a better job, but also with the funds necessary to encourage more foreign citizens to visit the United States.

Mr. BIBLE. Mr. President, it was my privilege as a member of the Committee on Appropriations to support an addition of $2.7 million to the Federal Bureau of Investigation budget. These extra funds are based on the Justice Department's estimate of supplemental moneys needed to reinstate the full fingerprint identification service of the FBI to local and State governments, a service the FBI felt had to be curtailed starting last May 15 because of budget stringencies.

Many Senators are aware, I am sure, of the problems that have been created in their own States by the reduction of this service. It has been clearly demonstrated that State and local governments rely heavily on the FBI's fingerprint repository. Criminal background checks on a wide variety of applicants for jobs and gun permits—checks that are required by local laws—are essential in the screening of prospective employees or permittees. These are persons who will be holding positions of public trust or who will be working in sensitive areas—schoolteachers, local government workers, cab drivers, bartenders, race track and casino employees, and the like.

Justice Department spokesmen testified before our committee that the volume of requests for background checks has increased dramatically. Yet it is a burden State and local government cannot handle without Federal assistance.

The added funds will be used primarily to employ 400 additional clerical workers, according to justifications supplied by the Department. Our committee has been assured the FBI will gear up to re-

sume the full identification service immediately after these necessary funds are approved by Congress.

I think it is essential that this approval be forthcoming as quickly as possible. The pinch is already being felt, since the curtailment has now been in effect for more than 3 months. In my own State, which relies heavily on FBI cooperation in the scrutiny and control of legal gaming and in the careful screening of those interested or employed in gaming and night club entertainment, the cutback has already created a serious logjam, not only for State gaming control authorities but also for county and city law enforcement.

The Senate, I am sure, will recognize the importance of this additional appropriation. I hope the House will follow up with the earliest possible approval so that the service can be resumed with little delay.

FUNDS FOR LOWER RIO GRANDE FLOOD CONTROL PROJECT

Mr. YARBOROUGH. Mr. President, I wish to express my gratitude and that of the over 400,000 people who live in the Lower Rio Grande Valley area of Texas to the Senate Appropriations Committee for including $3.8 million in the State, Justice, and Commerce appropriations bill, H.R. 17575, for repairs and improvements to the Lower Rio Grande flood control project.

This project, which was first authorized in 1935, provides flood protection to one of this Nation's richest agricultural areas. The Lower Rio Grande Valley contains approximately 800,000 acres of irrigated farmland which produces crops of cotton, vegetables, and citrus fruit which exceed $150 million in value each year.

In addition to protecting the vital farm economy of this area, the Lower Rio Grande flood control project affords flood protection to the ever increasing farm and urban population of the area. At present, 12 cities—Mission, McAllen, Pharr, San Juan, Alamo, Donna, Weslaco, Mercedes, Harlingen, San Benito, Hidalgo and Brownsville—are located along the banks of the Rio Grande and its floodway.

In 1967, Hurricane Beulah struck the Lower Rio Grande Valley, causing flooding which caused approximately $12 million in property damage and left thousands of people homeless in both Texas and Mexico. After this terrible experience, it was apparent that the Lower Rio Grande flood control project needed to be repaired and improved so that it could accommodate floods of this magnitude in the future. The estimated cause of this work is over $19 million and the plan calls for it to be done over a 4-year period. The Johnson administration's budget for fiscal year 1970 requested $3,600,000 for the initial work on these improvements; however, with the change in administrations, these important funds were deleted.

The Senate Subcommittee on State, Justice and Commerce Appropriations, under the able leadership of its distinguished chairman, Senator MCCLELLAN, responded to my request last year for funds for this project and included $1,500,000 in its version of this appropriations bill. Unfortunately, despite Senate approval of these important funds, the House would not agree to accept the Senate's action; therefore, these funds were lost in conference.

I am very much pleased that this year's budget included $3.8 million for the Lower Rio Grande flood control project and that the House and the Senate Appropriations Committees have agreed to provide these funds so that progress can be made this year. I commend the distinguished Senator from Arkansas (Mr. MCCLELLAN) for the outstanding work that his subcommittee did on the bill. I urge all Senators to give their full support.

The PRESIDING OFFICER. If there be no further amendment to be offered, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. HUGHES). The bill having been read the third time, the question is, Shall it pass?

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Missouri (Mr. EAGLETON), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Minnesota (Mr. MCCARTHY), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Montana (Mr. METCALF), the Senator from New Mexico (Mr. MONTOYA), the Senator from Georgia (Mr. RUSSELL), the Senator from Virginia (Mr. SPONG), are necessarily absent.

I further announce that the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), the Senator from Ohio (Mr. YOUNG), are necessarily absent.

I also announce that the Senator from Rhode Island (Mr. PASTORE), is absent because of the death of a friend.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), the Senator from Missouri (Mr. EAGLETON), the Senator from Alaska (Mr. GRAVEL), the Senator from Washington (Mr. JACKSON), the Senator from New Mexico (Mr. MONTOYA), the Senator from Rhode Island (Mr. PASTORE), the Senator from Virginia (Mr. SPONG), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from New Hampshire (Mr. COTTON), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Ohio (Mr. SAXBE), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Illinois (Mr. SMITH), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Tennessee (Mr. BAKER) and the Senator from Maine (Mrs. SMITH) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Utah (Mr. BENNETT), and the Senator from Maryland (Mr. MATHIAS), are detained on official business.

If present and voting, the Senator from Utah (Mr. BENNETT), the Senator from Kansas (Mr. DOLE), the Senator from Maryland (Mr. MATHIAS), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Alaska (Mr. STEVENS), would each vote "yea."

The result was announced—yeas 64, nays 1, as follows:

[No. 270 Leg.]

YEAS—64

Allott	Fulbright	Mondale
Anderson	Goodell	Moss
Bayh	Griffin	Muskie
Bellmon	Gurney	Nelson

Gore	Murphy	Yarborough
Gravel	Pastore	Young, Ohio
Inouye	Pearson	

So the bill (H.R. 17575) was passed.

Mr. HRUSKA. Mr. President, I move

to reconsider the vote by which the bill was passed.

Mr. McCLELLAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLELLAN. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. McCLELLAN, Mr. ELLENDER, Mr. PASTORE, Mr. FULBRIGHT, Mrs. SMITH of Maine, Mr. HRUSKA, and Mr. CASE conferees on the part of the Senate.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that tomorrow morning, at the conclusion of the remarks by the able Senator from Idaho (Mr. CHURCH), there be a period for the transaction of routine morning business, with statements therein limited to 3 minutes, and that the period for the transaction of routine morning business end not later than 9 a.m. tomorrow, at which time the unfinished business then be laid before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. This is with the understanding that there will be no call of the calendar with respect to unobjected to items on the calendar tomorrow morning.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

Mr. BYRD of West Virginia. Mr. President, what is the pending business?

The PRESIDING OFFICER. Without objection, the Chair lays before the Senate the unfinished business, which will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

UNANIMOUS-CONSENT AGREEMENT

Mr. BYRD of West Virginia. Mr. President, it is my understanding that the able Senator from Wisconsin (Mr. PROXMIRE) has an amendment dealing with the C–5A and that he will call this amendment up at one time or another, hopefully, not too far in the future. After having discussed this amendment with the able Senator from Wisconsin and the manager of the bill, the chairman of the committee, the Senator from Mississippi (Mr. STENNIS), and the able senior Senator from Georgia (Mr. RUSSELL) and the able junior Senator from Georgia (Mr. TALMADGE), it appears to be agreeable among those principal parties that this amendment could be limited to 3 hours, with the time to be equally divided between the offeror of the amendment, Senator PROXMIRE, and the manager of the bill, Senator STENNIS.

Therefore, I propose this in the form of a unanimous-consent request: At such time as the Senator from Wisconsin (Mr. PROXMIRE) calls up the amendment dealing with the C–5A, I ask unanimous consent that the time on the amendment be limited to 3 hours, to be equally divided and controlled between the offerer of the amendment, Senator PROXMIRE, and the manager of the bill, Senator STENNIS, and that any amendments thereto be limited to 30 minutes, to be equally divided between the offerer of the amendment and the manager of the bill, if he is opposed to the amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BYRD of West Virginia. Mr. President, what is the pending question?

The PRESIDING OFFICER. The pending question is on agreeing to the amendment of the Senator from Oregon (Mr. HATFIELD).

ADJOURNMENT UNTIL 8:30 A.M. TOMORROW

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 8:30 a.m. tomorrow.

The motion was agreed to; and (at 6 o'clock and 56 minutes p.m.) the Senate adjourned until tomorrow, Tuesday, August 25, 1970, at 8:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 24, 1970:

The following-named officers of the Marine Corps for temporary appointment to the grade of colonel:

James W. Abraham
Billy M. Adrian
James R. Aichele
Harry L. Alderman
Peter F. Armstrong
James M. Bannan
Roger H. Barnard
Richard S. Barry
George L. Bartlett
Arnold E. Bench
Lee R. Bendell
Darrel E. Bjorklund
Rollin Q. Blakeslee
Louis A. Bonin
Frank L. Bourne, Jr.
Eugene R. Brady
Thomas E. Bulger
Robert N. Burhans
John J. Cahill
Richard E. Campbell
Robert J. Chadwick
Clement C. Chamberlain
Byron T. Chen
Charles G. Cooper
Harry O. Cowing, Jr.
William S. Daniels
John K. Davis
Hillmer F. Deatley
Birchard B. Dewitt
Frank L. Dixon, Jr.
Lawrence R. Dorsa
Joshua W. Dorsey III
Edward J. Driscoll, Jr.
Jimmie W. Duncan
Cecil G. Dunnagan
Theodore S. Eschholz
Donald L. Evans, Jr.
James E. Fegley
Mark P. Fennessy
Paul R. Fields
Charles R. Figard
William B. Fleming
Herbert L. Fogarty
Kenneth S. Foley
Eugene D. Foxworth, Jr.
Joseph J. Gambardella
Jesse L. Gibney, Jr.
Carlton D. Goodiel, Jr.
John E. Greenwood
William R. Grubaugh
Robert E. Gruenler
John R. Hansford
Elwin B. Hart
William M. Herrin, Jr.
Henry Hoppe III
William K. Horn
George W. Houck
Dwight E. Howard
Robert E. Howard, Jr.
David J. Hunter
Robert E. Hunter, Jr.
David J. Hytrek
Corbin J. Johnson
Charles M. Jones, Jr.
Don L. Keller
William D. Kent
Edwin C. King
Elliott R. Laine, Jr.
James W. Laseter
Frederick D. Leder
Carl R. Lundquist
Dean C. Macho
William R. Maloney
Jerry F. Mathis
Bain McClintock
William G. McCool
Norman B. McCary
Donald N. McKeon
Joseph V. McLernan
Paul G. McMahon
Alexander P. McMillan
Edward J. Megarr
David G. Mehargue
Richard D. Mickelson
William R. Miller, Jr.
Anthony A. Monti
Ira L. Morgan, Jr.
Roddey B. Moss
Ross L. Mulford
Joseph Nastasi
Albert O. Nelson
George L. Newton
Paul W. Niesen
James R. O'Mara
William K. Parcell
John W. Parchen
Reagan L. Preis
Vincent J. Pross, Jr.
Heman J. Redfield III
David M. Ridderhof
Kenneth L. Robinson, Jr.
William K. Rockey
Earl F. Roth, Jr.

Otto I. Svenson, Jr.
Oral R. Swigart, Jr.
Aubrey W. Talbert, Jr.
John M. Terry, Jr.
Francis H. Thurston
Edward A. Timmes
Rodolfo L. Trevino
George F. Tubley
Robert J. Tunnell, Jr.
James S. Turner
David M. Twomey
Hiel L. Vancampen
Wendell N. Vest
Hal W. Vincent
Robert A. Walker
Ralph D. Wallace
Charles A. Webster
Thomas B. White, Jr.
William V. White
Gary Wilder
Paul E. Wilson
James W. Wood
Arnold G. Ziegler

CONFIRMATIONS

Executive nominations confirmed by the Senate August 24, 1970:

DEPARTMENT OF COMMERCE

William Robert McLellan, of California, to be an Assistant Secretary of Commerce.

FEDERAL TRADE COMMISSION

Miles W. Kirkpatrick, of Pennsylvania, to be a Federal Trade Commissioner for the unexpired term of 7 years from September 26, 1969.

IN THE ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION

The nominations beginning Edward M. Gelb, to be lieutenant, and ending Stephen L. Wood, to be ensign, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 7, 1970.

EXTENSIONS OF REMARKS

DELAWARE'S ANSWER TO THE CHALLENGE OF SOLID WASTE

HON. J. CALEB BOGGS

OF DELAWARE

IN THE SENATE OF THE UNITED STATES

Monday, August 24, 1970

Mr. BOGGS. Mr. President, earlier this month, I was honored to participate in a briefing that was held to discuss the State of Delaware's plan to construct the Nation's most modern and effective solid waste recycling plant.

This plant, when it is operating 2 years from now, will each day take 500 tons of municipal refuse and 70 tons of sewage sludge and produce reusable minerals, compost, and other products. This is a process that will save the land, and it will provide industry with a new source of raw materials.

The plan that led to the approval of the plant is in large measure due to the foresight of State Representative Robert J. Berndt. Representative Berndt headed a Governor's committee to examine Delaware's solid wastes problems. The committee, after a careful and exhaustive examination of the problem, concluded that such a recycling plant was not only feasible but necessary.

Representative Berndt made some opening remarks at the briefing, remarks in which he discussed the broad problems of solid waste management and the factors leading to approval of the Delaware plan.

To allow Senators and the Nation an opportunity to understand more fully the progressive effort to meet the solid waste challenge in Delaware, I ask unanimous consent that Representative Berndt's remarks be printed in the Extensions of Remarks.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE SOLID WASTE PROBLEM IN DELAWARE

In March of 1969, the Delaware Senate adopted a resolution entitled "Relating to the study of Solid Waste Disposal in Delaware and the appointment of a committee with respect thereto." There followed a few whereas clauses and then it called for the Governor to appoint a committee of seven persons, a senator from each party, a representative from each party and three at-large citizens.

I was a freshman representative and held no committee chairmanship. In fact, it could be said that I was not contributing much of anything to the general good of the General Assembly. For these and probably a few other reasons, I was asked to chair the committee to study the solid waste problem.

Since my reading list includes "Chemical and Engineering News" and the "Journal of Environmental Science and Technology," I had some idea of the magnitude of the solid waste problem. Also, my home produces garbage and other solid waste so like every other citizen, I was already an expert. A truck called a compactor comes to my house twice every week (almost), picks up my refuse, drives down the street, turns the corner and the problem is solved. Well, anyway, I grudgingly accepted the honor of the chairmanship.

During May and June we met with the directors of the Division of Environmental Health who have responsibility for solid waste in our state and reviewed their findings on the subject. They had prepared an inventory of all the states' dumps and landfills. They knew how much of what was generated and where it went. Also, they had a feel for the immediate future. John Bryson of the Water and Air Resources Commission sat in with us and offered advice and sympathy. Some of us visited landfills and sewage plants and we discussed the problem with many who had a concern with solid waste.

Dr. Daiber, director of the U of D Marine Biology Laboratory, told me that he would not look with favor on any ideas to use the river front, the marshes or wetlands for dumping grounds.

The Division of Physical Health, under Dr. Floyd Hudson and Donald Harmeson, had contracted with John Bivens Associates, a Delaware planning and consulting firm, to make a state-wide solid waste plan with some funds available through a Federal grant from the Bureau of Solid Waste in H.E.W.

This study revealed the foreboding evil that lies ahead for Delaware if we do not plan carefully and act wisely.

By the year 2000 we will require a thousand acres per year just to dispose of our solid wastes. That does not mean very much to the large states, but to little Delaware, 1000 acres is a good chunk of our whole state.

Much of our lower county has a water table only 4 to 8 feet below the land surface. This means a sanitary landfill would only be a couple of feet deep if it were to be provided with proper cover. If we bury it deeper we are right in the water table which would pollute wells and streams. In much of the state, the soil is poor for drainage. The clay in the northern part of the state would isolate little pockets of putrefying garbage. It would just sit there and ferment. The same soil could not be used for effective cover since it would bake out and crack to leave openings for rodents and vermin. Also, oxygen could get in and cause nasty dump fires. The State is dotted with lakes and ponds, and streams crisscross everywhere. These, along with our marshes and wetlands, should *not* be used for landfill operations. Forests cover much of our state, but they help clean up our air by converting CO_2 back to oxygen: also, forests provide recreational areas and we would be indeed short-sighted if we were to cut down a forest just to provide a landfill area. Urban areas sprawl the full length of our State and these too obviously must be eliminated as landfills. Delaware has no canyons and precious few quarries. There is not one mine of any size in which we could hide garbage. Bivens Assoc. plotted all these parameters on a series of transparent overlays. When one looked at the resulting plots it became evident that before many years passed, prime land would have to be dug up for landfills unless a miracle appeared.

The recently concluded General Assembly passed legislation which directed the counties to provide for the State by next April a comprehensive plan for the collection, transfer and disposal of solid waste. It provides a carrot to inspire action—"money". The State will put up a three-quarter matching fund if the county puts up one quarter. If the county just sits there and does nothing, the bill provides that the State plan for the county. We hope the counties attempt to master their own destiny. It would be better for all concerned if good plans were laid and crisis did not motivate occupants of public office.

Somehow it does not seem glamorous to public office holders to spend public funds on garbage and other solid wastes.

Down through the centuries there have been many efforts to dispose of solid waste. The simplest way was just throw it out the front door or out a window. When the immediate environs became unbearable the occupant of the igloo, tent, hut, pueblo, cabin or what have you, just picked up and moved on to virgin territory. The cities and townspeople carted the rubble and refuse to the edge of town and dropped it. Of course, in times past the amount per person did not amount to very much, just some worn out sandals or old tattered and torn garments, perhaps bones of animals, shells of nuts and eggs, pits from fruits, human and animal waste, and perhaps some unrepairable seats and couches. Then there was burial at sea, which was seldom final since tides frequently brought it back to shore. More recently we have turned to incineration; that is a procedure whereby we take what we have down here and throw it up in the air and hope it comes down some other place. Incineration still leaves a residue and contributes to air pollution and, worse still, it destroys valuable resources. We have been encouraged to go the incineration route. At great expense we could install antipollution devices and perhaps some heat could be used to generate steam and in turn electricity. Much of our solid waste is wet, especially sludge from our sewage disposal plant and fresh garbage from residual areas. Fossil fuels would have to be consumed to support combustion of much of our solid wastes. Our power and light company is looking forward to atomic power plants and the breeder reactor is not too far in the future. When that day comes, eletcric power will be essentially free and the major cost will be in the distribution of power. 1970, it would seem, is not a good time to invest in expensive incinerators, even if some heat could be turned to our advantage for a short time. Efforts to compress solid waste into building blocks did not meet with success in Japan the first time around when the blocks emitted methane gas as the organic putrescible waste decomposed. I am sure this effort is not dead and sometime in the near future a good brick or block will become available for some uses.

All of these efforts only nibble at the fringes of the problem. Senator Muskie of Maine and Senator Boggs of Delaware have taken the position that solution to the total problem will and must come from reclamation of all solid wastes. Society cannot continue dissipating the world's natural resources. There is an end to our oil and other natural fuels. We cannot continue despoilment of our forests just to make paper pulp. The ores in our mines are of lower and lower grade. We send men, at ever greater expense and peril into the bowels of the earth to bring out ever poorer grades of ore. We scourge the face of our country with ever wider, deeper and more ugly strip mines for other minerals. These never to be found again resources are carried into the market place where men bid for their utility. We all enjoy the use of the fine finished products but does it make sense to bury at sea or on land when we have tired of the pleasure these material things give? They include the automobile and watches, the cans on the shelf, the rake in the garage, the paint on the house and locks on the doors, the coins in our pockets and the pipes in our furnace. Think on it for a moment and you will realize we are talking of every manmade thing around us. Everything in every home is potential solid waste, the rug on the floor and

floor under the rug, the windows, the walls the doors and the roof. Almost every building in every city will be torn down and removed to somewhere and a new and more modern city will rise in its place. Some time in the future every building in Wilmington, Atlanta, Denver and Dallas will come tumbling down to make way for the new. What will we do with the old? Where will it go?

We build elaborate facilities to bring into our cities all the needs, wants and luxuries of mankind. Airline terminals, railroad terminals, truck terminals, shipping terminals and so on. We go to great pains and expense to build exciting outlets for all these human needs and wants such as supermarkets, warehouses, department stores, and shopping malls. Then when we have tired of or consumed all these items such as the banana, the fifth of Scotch or Bourbon, the child's balloon, the broken toaster and the worn out watch or mattress somehow we forget or don't see the need to provide adequate arrangements for the final and useful disposal of the items.

All over the world we have been sending a Peace Corps to tell them "Wake up, Wake up, come with us into the 20th century. Get a plow and tractor, buy a refrigerator for your food, build hospitals and schools with modern facilities like plumbing, electric lights and air conditioning."

Well, that is all fine. But what happens when these teeming millions or billions of people bid with us in the marketplace on paper pulp for books, on copper for electrical items, on steel for street cars and rails and ships. Just on the surface it would appear that there isn't going to be enough to go around, especially if we dump these items into the sea when we have tired of them or bury them in an old mine shaft or quarry or canyon or consume them in an incinerator. We could make all these resources go farther if we learned to recycle or reclaim as much as is possible.

Some of us were despairing of the distressing dimensions of the depressing problem. We were considering the solution of the problem in terms of sanitary landfills, shredding, baling, transfer stations, barge and sea disposal, incineration.

Then one day there came a knock, knock, knocking at our door. It was like the Man from Glad. Hercules, Inc. came forth and made an interesting proposal. Sometime back, a thorough search had been conducted by Hercules of all the literature on the subject of solid waste. Reports from the Government-sponsored research, from industrial and university research coupled with Hercules' research on their own problems revealed that almost every facet of the problem had come under attack. There were reports of successful efforts in many areas. The Bureau of Mines was doing pretty well with old tires. Fairfield had demonstrated a good composting operation. Some good grinders and shredders had been developed. Magnetic belts for pulling out ferrous wastes were a reality. The mining industry had developed and put into use equipment such as rod and cage mills, stoners, vibrating screens, pneumatic classifiers, palletizers, dryers and conveyor belts.

It remained for Hercules, Inc. to put it into one package; that is, line it all up and make a plant out of the available information. They found some weak links and put their research efforts into the weak places. They felt they were ready to go.

An operation of this sort will generate many products; so much work went into a market survey. It was believed by Hercules and still is that markets exist for nearly all the products. A very important aspect of market creation for these off-beat products will be the preparation of each item in a form desired by the potential buyer.

A common error is to make a product and say to a buyer, "come and get it". This error can be overcome by asking the potential buyer, "how do you want the product?" Then produce it to fill his need.

The proposal was submitted to the Governors' Committee on Science and Technology. A Subcommittee considered the feasibility of the project and reported that it looked acceptable at first light. They added that it should be compared with other processes.

The proposal was submitted to Governor Peterson. He was enthusiastic and said let's ask for a comparison and see how the Hercules process stands up with competition. An advertisement went into the *Wall Street Journal's* national edition which solicited sources having technical and management capabilities to design, construct and operate a materials recovery and recycling plant for processing 500 tons of solid waste per day. Respondents were asked to submit their capabilities and qualifications covering the following categories. (A) Brief description of technical approach. (B) Skill and qualifications of professional staff. (C) Previous experience. We were interested in clients for whom similar work had been performed and also a description of similar projects.

Nine proposals were submitted to us. Four of these proposals held promise of doing a near-total reclamation or recovery. The four were invited to make full proposals on a broadened definition of solid waste which included the standard H.E.W. analysis of a typical domestic solid refuse and to this we added rubber tires and 70 tons of sewage sludge containing about 70% water.

Two companies decided to pass up the invitation on the second "go round", and a third made a valiant effort to cope with the problem.

The Committee felt the Hercules proposal was the more complete one and to comment on the differences might be taken as a criticism of the other company so no comment will be made other than to say the second best in the country probably has a bright future in solid waste. Perhaps we can still use some of their talent in Delaware.

In the closing days of the General Assembly an appropriation was authorized to provide one million dollars for the design and planning of a solid waste reclamation plant in Delaware. At the bill signing in Governor Peterson's office, we announced that the prime contractor would be Hercules, Inc. Negotiations have begun between the interested parties which include New Castle County, the City of Wilmington, the State of Delaware and Hercules Inc. Once these negotiations have been completed we contemplate making an application to H.E.W. for a federal grant to assist in the construction phase.

The engineering drawings or the architects' design for our plant should be finished about the end of the first quarter in 1971. Construction will be completed about 15 to 18 months later and operations will start at about the third quarter of 1972.

The plant will be expandable to 1000 tons per day, which is our goal by 1975. It sounds like real optimism, but we are looking forward to the day when we have built and are operating a second plant in the middle county and a third plant in the southern county.

We are going to make some mistakes; we are going to curse the night we made our decision to proceed. There will be times that we will feel like jumping off a bridge or some tall building, but if we inspire other states to accept the challenge and they can capitalize on our errors and build a better plant, the whole thing will be worth every minute and every cent and every drop of sweat that has been given to the effort.

It is strange indeed that a little Delaware Senate resolution started a chain of events that brought all of us together tonight. None of us know what lies in the future for this project, but surely, if we can work together cooperatively (each giving something of himself), we are going to solve one of the nation's toughest challenges—the solid waste problem.

ECONOMICS AND DEFENSE SPENDING

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CULVER. Mr. Speaker, President Nixon in his budget for fiscal year 1971 proposed to spend almost $70 billion on military activities. This is almost as much as he proposed for all the other Government programs combined.

While it is obvious that national defense is one of the most important of our national concerns, evidence has been growing that a significant part of that $70 billion would be saved through increased efficiency and tighter planning. Especially in times of inflation, economic uncertainty, and growing domestic needs it is imperative that every Federal dollar be spent wisely.

Congress has an important role to play in assuring that the military budget is adequate for national security, but it is often hampered by insufficient information about the complex defense systems and the details of Pentagon strategic planning. The Congress will be greatly aided in its analysis of military programs by the recent report on military spending issued by the Members of Congress for Peace Through Law.

The MCPL, of which I am a member, is composed of Members of both the House and the Senate and of both political parties. The report, which represents many man-hours of work by its military spending committee, presents an analysis of the major military expenditures and their impact on the American military posture. It also presents possible alternatives through which the same goals can be attained more cheaply.

Those individuals who donated so much of their time to this project are to be particularly thanked for their contribution to informed legislative action and Government efficiency.

In addition to detailed analyses of the various specific weapons systems, the report contains a short summary and two general recommendations, which I insert in the RECORD at this time:

ECONOMICS AND DEFENSE SPENDING

SUMMARY

Both the real and monetary costs of defense are unknown because of Pentagon secrecy, underreporting, and underestimating. The "true cost" is still greater even than the unknown monetary costs because of the sacrifice of private and social spending, which would ultimately create greater economic growth and more jobs. Further incalculable costs include the disruption of the social fabric and the imbalances in our foreign policy between military and civilian goals. But we can calculate that 70 per cent of the world's arms expenditures are made by the U.S. and the U.S.S.R., with the U.S.

leading both in the total real cost in purchasing power equivalent and in real cost per capita.

Excessive defense spending causes severe economic distortions, most notably a persistent and intractable inflation. This phenomenon (1) impairs efficiency in the economy by changing the measuring rod of costs, (2) impairs work incentives and alters the savings/consumption patterns, (3) creates a demand for harsh counter-measures (e.g., direct controls), (4) lessens confidence of the citizenry in government and the economic system, and (5) distorts crucial sectors and creates imbalances.

Of major significance too is the fact that military spending is not only the major cause of inflation but is itself a major victim in terms of increasing the costs of its own operations. The Indochina war and our continued role in it is a major contributor to the inflationary problem in particular sectors of our economy.

There has been a good bit written about how the Federal government might spend any "peace dividend" resulting from either a winding down of the Vietnam War or a major breakthrough the arms limitation. Other possibilities for the dividend, of course, are tax or debt reduction. Some mix of all of these elements—federal expenditures, tax cuts, and debt management—might well be best as the tools of fiscal policy are brought to bear in the aftermath of a cutback in defense spending.

The size of the cutback—and of any peace dividend—is fraught with uncertainties. The Defense Department categorizes Vietnam costs under the broader budget item of "cost of Southeast Asia conflict." The two methods of cost-accounting are: (1) "incremental cost" method and (2) "full" or "prorated cost" method. Depending on the method used, costs for Vietnam war spending in FY 1969 range from $17 billion to $32 billion.

A $3 billion "peace dividend" is reflected in the new FY 1971 Defense budget. The $3 billion is what is left from a $5.2 billion saving in this year's budget over last year's after subtracting for the Administration's planned military spending increases.

Congress has a significant role to play in forging a larger "peace dividend". But Congress has been hampered in carrying out this responsibility by deceptive practices in presenting the Defense budget.

The cost of war spending in Vietnam has been underestimated by successive Administrations. This practice has postponed the existence of a "peace dividend" and rendered virtually impossible attempts by Congress at realistic decision-making for a healthy economy. The problem has been further complicated by conflicting Congressional testimony from various witnesses within successive Administrations.

In any case, increases in military spending have undermined budgetary savings. A look at the new FY 1971 Defense budget shows a whittling down of the "peace dividend" to $3 billion and even this sum is threatened by such trends as:

1. Continued U.S. fighting in Southeast Asia;

2. Increases in military aid to Southeast Asian countries;

3. Delays in troop withdrawals (the Administration has already announced that no withdrawals are planned before July, indicating that the average monthly withdrawal rate will be disrupted);

4. Cost overruns in on-going and newly acquired weapons systems.

The conclusion is clear that increased expenditures on "arms and security" have long since reached the point of diminishing returns by even the most conservative measure of costs incurred against benefits received.

RECOMMENDATIONS

Congress can be better equipped to discipline defense spending when the following steps are taken:

1. *A Presidential Report on Military Expenditures and the Economy*—to be delivered annually on July 1, the beginning of the new Fiscal Year, to a Joint Session of Congress and the American people. Such a message would include past and up-dated war costs, based on one method of cost-accounting. It should provide a uniform basis for cost citation; clarification of differing war cost figures over the years; description of the impact of military spending on the economy with relevant indicators; and prescriptions.

Such a Report would lead to a common understanding of war costs and eliminate the confusion that has resulted from the past war-cost options approach. The latter has created an expectation-achievement gap regarding the "peace dividend." For example, when Secretary Laird announced that Vietnam war spending would be $17 billion by the end of FY 1970, many expected a "peace dividend" of $15 billion based on a reduction from the "full cost" figure of $32 billion (FY 1969). Laird, in effect, was estimating only a possible $6 billion "peace dividend" based on a reduction from the "incremental cost" figure of $23 billion (FY 1969) or $11 billion (ext. FY 1971).

The Report would also help steer a realistic course between the extremes of pessimism and of optimism over the "peace dividend." Already within the Administration we have heard conflicting outlooks. For Daniel Moynihan, "the peace dividend turned out to be evanescent, like the morning clouds around San Clemente." (Press Conference, August 25, 1969). For Arthur Burns, formerly the President's economic advisor, if the war ended immediately, as much as $8 billion would be available for "civilian" programs. (Speech, National Governors' Conference, September 1, 1969).

Congress as a whole simply must be presented with a uniform basis of war cost and with basic data on the impact of military spending on the economy—if it is to have a meaningful decision-making role in economic policy, including economic conversion from a war-time to a peace-time economy; and if it is to change spending priorities.

2. *A "Pentagon Dividend"* can be gained by cutting out wasteful weapons spending. The Defense Department itself has a responsibility to weed out excess and waste in military spending. When the Pentagon fails to weed out unnecessary programs, Congress must take on this responsibility itself or saving from reduced war spending will be devoured by wasteful weapons spending. Preventing the peace dollar-drain-to-defense is the best way to release funds for new priorities.

A COAT OF MANY COLORS

HON. ROBERT P. GRIFFIN

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES

Monday, August 24, 1970

Mr. GRIFFIN. Mr. President, recently Michigan's Elly Peterson, assistant chairman of the Republican National Committee, addressed the National Association of Colored Women's Clubs in Atlantic City. Her speech is one of the finest I have ever read; it is one that every American ought to read.

I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

A COAT OF MANY COLORS

(By Elly Peterson)

I'm looking right now at a group that for 75 years has given the Black woman a better world. Your motto describes the National Association of Colored Women's Clubs better than I ever could: "Lifting as we climb." For three quarters of a century, you have worked peacefully and effectively to improve the environment of the Black woman. Your seven-point program is one of education, legislation, and cooperation. Each program offers another opportunity. The girl's program touches those troubled years from 12 to 17 and helps the girl to become a woman. The young adult training helps that woman to be a full, productive member of society. You also reach out to the woman who is at home, in industry, to the woman who is seeking her heritage. And, yet there is still a concern for national and international problems. You are truly Black power!

Yet, there is still more to be done: by Republicans, by Democrats, by Blacks, and by Whites. Our job won't be over until there is no need for a White to reassure a Black that he cares . . . until there is no longer a need for speeches like this. Our job is over when people judge each other by accomplishments and not by color or religion or occupation.

And, I'll tell you I'm not totally satisfied with what this Administration is doing to help Blacks achieve these goals. Before the reporters run out of the room and label me another critic of the Nixon Administration, let me also say, I was even *less* satisfied with the previous administration's attempts at civil rights. I *won't* be satisfied until universal equality belongs to all our citizens. I want every American to have the opportunity for a decent job, an education, and a healthy place to live. Those are equal rights. The opportunity for them should never be denied any human being. Whether or not he takes advantage of that opportunity is not my concern—that's human or divine will and out of my hands.

But giving him that opportunity is within my jurisdiction and is also my responsibility and that of the Republican Party. It is more our responsibility than other political group's because it was my party, through its sponsoring of the 15th Amendment, that first gave the Negro his right to vote. And, it was Black Republican lawyers who put together the Brown v. Topeka case that resulted in the Supreme Court ordering the desegregation of all schools. Today, one of those same lawyers, John Scott, is a part of the Nixon team. We must fulfill those initial commitments by working towards full equality.

And, I resent those people who say we are not—those critics who accuse this Administration of being anti-Black and those who cry "Southern Strategy" at our every policy decision.

WORKING TOWARDS FULL EQUALITY

It is the Nixon Administration which has named more Blacks—65% more—to policy-making positions than any other Administration.

It is this Administration which inaugurated the Philadelphia Plan which is opening up the high-paid construction field to minority and Black workers on a large scale. And, it doesn't stop with the Philadelphia Plan. Now, there's a Washington Plan that goes even further. It affects 11 unions instead of five and requires a goal of 35 percent Blacks instead of 20. The contracts of all Federal contractors, even those on non-Federal jobs, must follow this plan.

We have worked with 44 branches of the NAACP in 19 states by giving Federal assistance, through the Department of Housing

and Urban Development, for the sponsorship of 8,900 housing developments valued at 1.5 billion dollars.

We have been accused of being soft on segregation. Yet, the number of Black public school students in the desegregated school systems in the 11 Southern states will have increased from 164,000 at the end of the 1968–1969 school year to well over one million at the start of this year's school term. The President has proposed 1.5 billion dollars to aid the process of desegregation.

It was the Nixon Administration which pulled together all the different and conflicting minority business programs and created the Office of Minority Business Enterprise in the Department of Commerce. The results of that move read like this: during the nine-month period ending March of this year, the Small Business Administration has approved 910 more minority loans with a total of 31.3 more million dollars than it did during the same period last year.

There have been other proposals which help Blacks, like the Family Assistance Plan, but the ones I've just mentioned were designed especially for Blacks by an Administration some would have you believe doesn't care. But, that doesn't mean we can stop now.

EQUALITY BUT NOT SUPERIORITY

Our goal is equality, but not superiority. I look for a day when we can dislike someone of a different color and not feel guilty about it. Sometimes, we are overprotective and cocktail party humanitarians will gush that all Blacks are their friends. That's ridiculous. I shouldn't expect to like all Blacks as I don't like all Whites. But civil rights is such a sensitive area that too many of us are afraid to be honest about our feelings. I know that Blacks deeply resent being hated because they are Black. I should think you would also dislike being liked because of your color and not your personality. I look for a day when Black and White neighborhood women can share koffee klatches and gossip indiscriminately about friends in either race without the cry of racist being hurled.

We can't just wait for that day. We must work for it and convince others to work with us. We can achieve a better world for Black Americans by a number of means—through legislation, through education, through cooperation, and, some say, through violence. Frankly, no matter how worthwhile the end—and nothing to me is as important as equal rights—using violence as a means is never justified. That leaves me the alternatives of legislation, education and cooperation. Legislation alone will not do it—we have seen too often how people can interpret the law to read their way. But, I am confident that legislation if backed by cooperation and education can give us this better world.

And, one of your own members was just as confident. Your first president, Dr. Mary Church Terrell, devoted her life to helping Black women in these three ways. At the age of 87, she led a campaign that ended with the Supreme Court outlawing segregation in all Washington eating places. And, at 90 won another victory resulting in the end of discrimination in most Washington movie theatres. Her life is an example of getting a job done through legislation, cooperation, and education.

In my own state of Michigan, Blacks and Whites are cooperating together to benefit the residents of the inner city. We have established an Action Center in the heart of Detroit's ghetto and together we are working to better life there. We serve as a complaint center and investigate the need of the community—looking into everything from abandoned cars and broken street lights to discrimination of an insurance company. This idea has spread to Connecticut and Kansas, and there too the two races are working together and getting results that benefit everyone.

A SENSE OF IDENTITY

It's these unpublicized efforts that lead to harmony, not the screaming and bloody riots that foul our television screens and spill out abusive language and violence into our living rooms. Extremism and militancy, whether in the form of the clenched fist salute of a Black Panther or a hooded Klansman, lead only to anarchy. Violence leads only to destruction. Yet, the Panther and the Klansman are far more glamorous and appealing to youth than our sedate gestures. I can understand that to the ghetto child the Black Panther is a hero—he is an authority figure and he gets action. I can also understand that to the poor White dirt farmer the Ku Klux Klan is just as exciting—it gives him a sense of identity and importance. Both organizations are a dramatic way of expressing an opinion. Their fault is that membership in each is selective and discriminatory, their goal is superiority, and their means are destructive.

I ask all Americans to not look at the men dressed entirely in Black or totally in White but to follow instead the example of a man who wore a coat of many colors, Dr. Martin Luther King. Let us walk in his footsteps—they tread many miles to make ours a better world. Using his thoughts and guidance, let's head for that better time which he described, when he said: "This will be the day when all God's children will be able to sing with new meaning: 'My Country 'tis of thee, sweet land of Liberty, of thee I sing. Land where my Fathers died, land of the Pilgrim's pride. Let Freedom ring!' "

CONGRESSMAN RHODES' QUESTIONNAIRE

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. RHODES. Mr. Speaker, I am sending out a questionnaire to my 212,000 constituents in the First District of Arizona. I am most anxious to have the opinions of my constituents on these questions which cover some of the most important issues facing our Nation.

I shall report to the Congress the results of this poll as soon as they are available.

The questionnaire follows:

QUESTIONNAIRE

1. Do you favor cutting of federal loans and grants to students convicted of campus disorders?

2. When students stage a strike on a college campus, do you think the non-striking students have a right to continue attending classes?

3. Do you agree with recent proposals to have a volunteer Army with more career incentives, and abolition of the draft except in time of war?

4. In general, do you favor the way President Nixon has conducted his Administration?

5. Should balancing the Federal budget to reduce the cost of living be given priority over greater spending on Government programs?

6. Do you think strikes should be outlawed, and a labor court established to be the final voice in labor-management disputes?

7. Do you think the United States should try to maintain the balance of power in the Middle East by providing military equipment to Israel when necessary?

8. Do you favor:

(a) Legislation that would allow police officers with a warrant to enter private premises without knocking if they think evidence would otherwise be destroyed or their lives endangered?

(b) Legislation that would permit a criminal defendant to be kept in "preventive detention" if his record indicates that he may commit another crime if he were set free on bond?

9. What do you feel is the most important problem facing the United States today?

(a) Air and water pollution.
(b) Crime and violence.
(c) The Vietnam War.
(d) Inflation (rise in the cost of living).
(e) Middle East crisis.
(f) Others.

A CONCERNED CITIZEN SPEAKS OUT ON SOUTHEAST ASIA

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CRANE. Mr. Speaker, during the days that followed the President's decision to invade certain privileged sanctuaries in Cambodia, there was a great deal of attention, much of it hysterical, focused on various elements of the American citizenry which opposed the President's decision.

Unfortunately, not much attention was paid to those individuals who supported him, and who asked that sanity and reason prevail. One of those who did dare to speak up, on the campus, was a prominent Chicago area citizen, Mr. Gerald Gidwitz. Mr. Gidwitz not only states his case very persuasively on the major international issues of the day, but he also was willing to face the faculty of an Ivy university virtually singlehanded in defending the President's policy. So that all of the readers of the RECORD can have the benefit of Mr. Gidwitz's thoughts, I am inserting his open letter at this time:

CHICAGO, ILL.,
May 26, 1970.

DEAR FELLOW-CITIZEN: Prior to World War II the Western democracies, with no move to defend themselves, watched one aggressive military government in Asia take over Manchuria; a second in Europe expand into North Africa with the conquest of Ethiopia; a third absorb Latvia, Lithuania and Estonia; and a fourth move into the Ruhr, Rhineland, Austria and Czechoslovakia. Indeed, Czechoslovakia died for "peace in our time." When Poland was divided between two of the aggressive militants, England realized that if it made no move its treaties would be valueless and its word would be believed nowhere. Content to watch from the sidelines the warm-up in Spain and the conquest of millions in Europe, we, also, made no move either to insure freedom for others or to protect ourselves.

Hitler, in *Mein Kampf*, outlined his intended conquests and in public utterances, repeatedly, acclaimed the "final solution" for the Jews and the "1000 Year Reich." Mussolini announced his plans and Japan proceeded with its "co-prosperity sphere." None of the dictators dared attack until they were sure that their victims could not defend themselves. Pearl Harbor triggered a two-year buildup that was required before we could become effective.

Today our new generation, who apparently do not study history, politics, or even current events, want to follow the disastrous policies of the 1930's.

Today the Communist countries tell us

that Communism will conquer Democracy. We listen, but we do not believe. Latvia, Estonia, Lithuania are still in Russia's hands. All the Balkans except Greece are under Communist domination. The uprising in Poland and East Germany were put down with Soviet troops; bloody Hungary is but a memory; even the recent conquest of Czechoslovakia has apparently made no impression.

Today Russia has a stranglehold on Europe's oil, with literally hundreds of bases available all over North Africa. Cuba sits athwart the entrance to the Caribbean and the Panama Canal, pumping its poison into Latin America.

The forces of evil are again on the move in Asia. Some of our citizens seem to want us to abandon our Allies and to ignore the march of the dictators just as was done by the democracies in the 1930's.

We forget that we are still negotiating in Korea and in Paris. We ignore the Communist demands for surrender in Asia as a bargaining ploy. We don't want to believe that demand for our piecemeal surrender all over the world is a non-negotiable unwavering goal.

We know that many well-meaning doctors, clergymen and others, who are not students of history or power politics, are deluded into believing that a one-sided desire for peace will produce it—even though our experience teaches us otherwise.

We hear foolish cries for unilateral disarmament because our good-hearted people substitute hope for observation and study, and ignore the evil they see.

We know that SDS on the campuses is an outgrowth of Communist front organizations. We know that the SDS claimed 250 to 300 chapters on college campuses last Fall. We know that turmoil exists on over 250 campuses today. We know the Communists are past masters at the use of "fronts" and "committees" to hide the identities. We know they are past masters of propaganda and at involving the innocent and the gullible to create impressions of mass support. We watched last year's warm-up at dozens of colleges and read in our papers that we were promised much more this year in spite of all that—we are surprised at the turmoil in the campuses.

What kind of people are we that permit the radical inspired riots on the campus to determine our foreign policy?

What kind of people are we that denounce a Democrat President when he finds, when he is in office, that military preparedness at home and defense or our Allies abroad is the only safe course for us?

What kind of people are we that denounce a Republican President (who follows him) when he finds the same military and political conditions and finds he too—for our safety—must follow the same course?

What kind of people are we that act as if our President is a militarist, an imperialist—or just plain daft?

What kind of people are we that listen to the Communist propaganda—either direct from Moscow or Peking, or second-hand from our own radicals—and select all the denunciation to believe and ignore all the threats against us?

What kind of people are we that send our sons abroad to fight for peace in Asia so we won't have to fight for it in America—then tie their hands with ground rules on bombing the enemy in Haiphong, Hanoi, North Vietnam, and across the border in Cambodia?

Perhaps if we learned that we are engaged in a combined propaganda war, political war, economic war and military war—an orchestrated assault on us and our institutions—we could begin to understand and begin to defend ourselves.

Perhaps we would not fall for the other side's propaganda and properly address ourselves to the "third world." Perhaps we would take political action. Perhaps, instead of helping our enemies with trade and the construction of automobile and truck manufacturing plants—and other plants that have been built by the dozen to help our enemies—we would insist on peace and order first.

Perhaps if we can win the propaganda war, the political war and the economic war, we won't have to fight a military war.

We should rally behind our President. He has the responsibility, the desire and the knowledge to do what is best for this country. Let us support him in Asia and perhaps we won't have to fight in Latin America.

Those who ignore history may have to relive it—and some of it has been pretty horendous.

Write your Senator and Represenatives—and President Nixon now!

Sincerely yours,

GERALD GIDWITZ.

CONGRESSMAN FULTON OF PENNSYLVANIA SPEAKS

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. FULTON of Pennsylvania. Mr. Speaker, it is a pleasure to place in the CONGRESSIONAL RECORD the letter which I have sent to the outstanding residents and officials of my congressional district advising them of current projects, as well as the schedule for the rest of the second session of this 91st Congress. In addition, I have asked for recommendations and suggestions for final legislative action to assist me in making the necessary judgments when the House of Representatives reconvenes after Labor Day.

The letter follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C.

To My Good Friends:

We are now well along in the Second Session of the current 91st Congress. We will be reconvening after Labor Day recess on Wednesday, 9 September 1970, to finish the Session. There is still major legislation to be completed by the House after action by the United States Senate.

I am therefore writing to you to let you know that I will be glad to have your recommendations and suggestions for final legislative action, before the Second Session of this 91st Congress adjourns prior to General Election on Tuesday, 3 November 1970, which this year is both a State and National election.

I am now on the job in Washington and back in good health for some time. To the present date, I find that I have the best attendance record for the current year 1970 of any of the four United States Congressmen in Allegheny County. I believe you will be interested in the attendance figures for 1970 as follows:

Jim Fulton (161 Record Votes—17 missed), 89.4%.

Bob Corbett (161 Record Votes—23 missed), 85.7%.

Joseph Gaydos (161 Record Votes—44 missed), 72.6%.

William Moorhead (161 Record Votes—45 missed), 72%.

During the Congressional official recess, I have been working in my Pittsburgh office this year, instead of taking vacation. I am helping our local communities on their mountainous garbage, trash, and solid waste disposal problems in order to obtain competitive bidding to keep down prices, which for many families have doubled in a year.

I am working on the important water supply and sewage projects for our Boros and Townships, & Chartiers Valley Flood Control, and Saw Mill Run Flood Control & Clean Up project. Also, we are checking the 1970 US Census figures for our Congressional District. If you have anyone in your family or know anybody who has not been counted, let me hear immediately at my Pittsburgh office, in order to notify US Census Bureau before 1 September deadline.

I will be glad to help on obtaining absentee ballots and military ballots. Please write me or telephone our Pittsburgh office (644–2876) with the names and addresses of any voters in your district who plan to be out of town on Election Day. Give us name, & home address of anyone in the US Military Service. We will be glad to see that forms for absentee or military ballots are sent to these people.

Count on my full cooperation and assistance.

Cordially,

JIM FULTON.

P.S.—So you personally will be among the first to know of my current work, I am sending you this letter which I am later sending to our Congressional District.

JIM.

Sent as an added service to our District (*not* printed at Government expense.)

JIM.

DON FALK—"A MAN OF ACTION AND COMMUNITY INVOLVEMENT"

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. DON H. CLAUSEN. Mr. Speaker, I have just been advised of the untimely passing of one of my closest friends, Mr. Don Falk of Eureka, Calif. This outstanding attorney, at 51 years of age, the son of Harry Falk, Sr., was a member of one of Humboldt County's most respected families.

While he distinguished himself in the family of legal scholars, Don Falk also will be remembered by his countless friends and business associates as a man who worked day and night for his community and his beloved Humboldt County.

There were literally hundreds of community activities that Don Falk became involved in. He always knew where the action was and what was required to "keep things moving." In the words of Don O'Kane and more recently Mike Johnston of the Humboldt Times-Standard newspaper:

If Don Falk doesn't know about it, it just isn't happening.

I have never known a man, with the capacity for knowing what was going on as did Don Falk. He knew the forest products industry and its impact on our economy like a book. And, speaking of books, his brother, Harry, Jr., wrote a masterpiece, a book on timber law. Talent is in abundance in this illustrious family.

Don was a trusted counselor and adviser on many matters that affected our redwood region. His insight, judgment, and depth of knowledge will be missed tremendously by those of us who counted on him so much in the past.

For many years, Don served as chairman of the transportation committee for the combined Eureka Chamber of Commerce and the Humboldt Board of Trade. Many of my colleagues in the House of Representatives, will remember the decision, by the FAA, to close some 42 flight service stations a few years ago. Among them, was the Arcata Flight Service Station in my congressional district.

In order to properly illustrate my description of Don Falk as "a man of action," I need only recall his efforts during this one instance and, I might add, this is only one of many.

It was obvious, at the outset, that we, a small segment of our Nation's population, were going to have to unite and consolidate our efforts to "take on Uncle Sam" in opposition to a decision made by one of its agencies. Along with Dave Zebo, aviation director, Don Falk and I developed the strategy and format for a local meeting to support our cause to "Save the Arcata Flight Service Station" from closure.

The successful results of this effort are now history, but the magnitude of their importance will long be remembered by local people because it was during and after the "big flood of 1964" that our position in defense of retaining the flight service station, really came into prominence. With the harbor closed by debris, all roads north, east, and south unusable due to extensive bridge damage, it was air transportation access and, in particular the landing aids, the approach, navigation and communications systems of the Acrata Flight Service Station, that proved to be the necessary equipment required to maintain contact with the outside world at this critical time in our history.

In attempting to eulogize a close friend, it is difficult to single out the most significant or most representative example of an outstanding man's many contributions to his community for the benefit of his fellow man.

This confrontation with Uncle Sam, however, will always come to mind when I think of and remember Don Falk. He was a fighter for his clients, his community, and those causes he believed in. Our success and rewards for fighting for what was right will stand as a monument to his tenacity, thoroughness, and objectivity.

Transportation—Land, sea and air access to Humboldt County holds the key to our future development.

These were and are the words that shall ring forever in my ears because they came from the lips of my close and trusted friend, Don Falk.

As an aviator, and as a member of the Roads, Rivers, and Harbors Subcommittees in the House of Representatives, I shall do everything within my power to carry on in fulfilling Don Falk's dreams and objectives. It is my hope that the decade of the 1970's will see full realizations of the ultimate in benefits for the friends and neighbors of Don Falk, the man who literally gave his life to his country.

To his family and friends, let me say, "Don lived his life, performed his duties and did his deeds as he wanted to do them." What more can we expect of any man? He gave his full measure of devotion to all that was constructive and beneficial to those he served—his contributions were many.

CONGRESS MUST HELP MIGRANT WORKERS

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. PHILBIN. Mr. Speaker, the status and condition of migrant workers is giving increasing numbers of Americans deepest concern that some of us in the Congress have felt for some time.

Recent disclosures before a committee of the other body indicated the dire plight of the lowly people and their families, who earn their barest living by moving from place to place and are engaged in work that appears to have little relevance so far as wages, hours and conditions of work go to the high standards that obtain generally in American industries for similar-type labor.

The Congress has had considerable discussion about the problems of the migrants in the past, and it is unfortunate that there has been such a long delay in developing some feasible, adequate program for this proverty-stricken group that would give them the same rights that prevail among most American workers. But I think our continued efforts are beginning to show results.

Congress has known for some time of the pathetic conditions of lower pay and miserable status that prevails among some of these workers, and it is high time that some suitable, affirmative program is developed here in the Congress that will bring relief and do justice to migrant workers and their families throughout the country, who so urgently need our assistance, according to the testimony, among others, of the distinguished president of the Coca-Cola Co., who has special reason to know, since his great company employs many of them, and is willing to help improve the conditions of the migrants.

Let Congress tarry no longer in correcting the pitiable conditions affecting many of the migrant workers.

It is not only a question of pay, though that is important. It is the conditions of their work which are reported to be in many instances unsanitary, dirty, filthy, disease-ridden, disgraceful, and that is really a serious reflection on the public conscience of the Nation.

Congress must act at once. There can be no delay. The welfare and health of these workers and their families are being worsened until depravity, utter poverty, and hopelessness prevails in many instances reported. Let us act now to rescue these poor people from the hell they live in. Now, now—I urge. Surely we will not delay. I plead for action with all my heart.

OUTLOOK FOR THE DEVELOPING COUNTRIES

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. BINGHAM. Mr. Speaker, Mr. James P. Grant, president of the Overseas Development Council, presented a paper in June at the meeting of international members of the Stanford Research Institute in which he makes some most interesting predictions about the future of the developing areas of the world. Mr. Grant is one of only a few men with the requisite experience and understanding to engage in such bold "crystal ball gazing." He served with the U.N. Relief and Rehabilitation Administration—1946 to 1947—and the Sino-American Joint Commission on Rural Reconstruction—1948 to 1950. He has served with distinction in a number of posts with U.S. aid programs, including a stint as Assistant Administrator of the Agency for International Development. He was Deputy Assistant Secretary of State for Near East and South Asian Affairs from 1962 to 1964.

I want particularly to draw Mr. Grant's assessment of the importance of ample export markets for the developing world to the attention of my fellow Members of Congress. The wave of indiscriminate protectionism we are currently experiencing, as reflected in the legislation recently reported by the House Ways and Means Committee, is certain to close off major markets for exports to the United States. Mr. Grant's paper should serve as a sharp reminder of the serious consequences for the developing nations of such protectionism.

I am certain, also, that Mr. Grant's predictions that unemployment will surpass the food crisis as the most important problem facing the developing nations, and that Latin America is likely to be the most explosive region in the developing world in the 1970's, will be of intense interest to many readers of the RECORD. I commend Mr. Grant and the Overseas Development Council for this excellent article, which follows:

ECONOMIC AND BUSINESS OUTLOOK FOR THE DEVELOPING COUNTRIES IN THE 1970'S: TRENDS AND ISSUES

(By James P. Grant, president, Overseas Development Council, Stanford Research Institute, international members meeting, June 21 to 24, 1970)

I. BASIC TRENDS

The recent British elections were a lesson in humility for pollsters and pundits alike. They show that making predictions is always a chancy business, even in highly-stable, highly-developed countries. How much more chancy, therefore, is the business of predicting events a decade hence in countries of the

developing world stretching from East Asia to Africa to Latin America.

Despite these cautionary words, however, it is still possible to see some major trends and issues that will be important in the developing world during the 1970's; and it is possible to discuss their general implications.

Rate of economic growth

There are a number of factors that are of major importance. First among these is the rate of economic growth, with its major implications for world trade, markets and development. During the 1960's the national product of the developing countries grew at an unprecedented rate, averaging five percent annually. In the 1970's a still higher average growth rate—six percent or better—is likely, and the national product of all the non-Communist developing countries taken together should increase from slightly over $300 billion in 1970 to some $600 billion in 1980. (This will be roughly comparable to America's GNP ten years ago and Western Europe's today.) Yet will even this unprecedented rate of growth be adequate to meet developing country needs in the 1970's?

Even more important, will today's optimistic projections of developing world growth rates be realized at all? A favorable answer to this question depends to a great extent on the developed countries. They must maintain the forward momentum of their trade and assistance, which are essential for progress in the developing world. Our role and responsibility are clear.

Of course, these richer countries have much to gain from high growth rates in the developing countries. Indeed, the poorer two-thirds of the world should become a major market in the 1970's—even though it will still be greatly overshadowed by the major developed areas of Europe, North America and Japan, with their present GNP of over $1,800 billion.

Population explosion and unemployment

Second, there is the population explosion, and the employment crisis that is following hard on its heels. During the 1970's, the non-Communist developing world will add some 500 million new consumers, although most of them will have low incomes. This growth will be equal to the combined population of Africa and Latin America in 1960. But even more important, there will be about 170 million additional entrants to the working age population—50 percent more than in the 1960's, when there was a worldwide growth in unemployment despite a five percent growth in output.

This prospect is changing the nature of our basic concern. During the 1960's, the major development crisis centered on the problem of feeding the rapidly expanding populations of the developing countries. Then, we began to push back the spectre of world famine through the agricultural breakthrough known as the Green Revolution. There is still much to be done before we can rightly say that famine is conquered; but in the 1970's we must also act to remedy the crippling social effects of the unemployment explosion in the developing world.

The baby boom of the 1950's is now beginning to have a startling impact on the number of new entrants to the Latin American work force, and will begin doing the same in most of Asia later in the 1970's. These new entrants will soon increase the labor force in their respective continents by some three percent annually; and they will bring pressure to bear on these developing societies that will be far more intense than any ever faced by today's developed countries, whose labor forces have rarely increased by as much as one percent annually. How can these new workers earn the money to buy the food that is now increasingly available? How can the jobs be found that will entitle them—in the absence of sophisticated welfare schemes—to share in the benefits of general economic growth? How can they become active members of society instead of a potential threat to it?

Unfortunately, the problem will get worse before it gets better. There is still no end in sight to the population explosion, and, for about 20 years after it does end, the labor force will grow accordingly. But there is room for hope: the present rate of population increase may begin to decline slowly on a worldwide basis by the end of the decade. Yet a rapid, large-scale decline will depend both on new technological breakthroughs and the motivation to limit family size that comes with modernization and economic growth. It is important—and chilling—to note that so far in history no major area or country has achieved a large-scale breakthrough in reducing its birth rate without rapid economic growth.

Rural development

Third, there will be new emphasis during the 1970's on problems of agriculture and rural development. Until the mid-1960's, development efforts focused on processes of industrialization and the needs of urban areas in the developing countries. In most of them, the larger part of the population that remained in peasant agriculture contributed very little to the increase in national output and constituted a drag on the growth rate. In the 1970's, however, the wholesale introduction of modern practices into agriculture, combined with the political need to keep much of the work force in agriculture to cope with the unemployment explosion, will cause developing countries to pay increased attention to the goal of increasing production and employment in rural areas.

Entirely new dynamics will appear in the farm economy of most of the developing world. Agricultural production may rise to an unprecedented rate of four percent annually during the 1970's—a rate never achieved over a comparable period by any major part of the developed world prior to World War II. And there will be profound effects on the demand for agricultural inputs, the marketing of greatly increased production, and patterns of international trade.

Regional trends

Fourth, there are a number of trends that will affect individual regions of the developing world during the 1970's. East Asia, for example, is likely to have the most rapid percentage growth in GNP and trade ever experienced by such a large continental-sized population mass—350 million people. This might prove true even if Japan were excluded from the region for statistical purposes: in 1969, after all, collective exports of Korea, Taiwan, Hong Kong, Singapore, and Malaysia totaled nearly $7 billion, and they could be in the $15 to $20 billion range by 1980. At the same time, Japanese involvement in these East Asian countries in terms of trade, investment and aid is likely to increase many-fold. How can this vastly increased, and potentially health, involvement of Japan take place without a major political backlash in the region? How can it take place without producing commercial hostility in other developed countries?

For its part, Latin America could be the most explosive region in the 1970's; therefore, its development prospects will be least predictable. Just as South Asia was the center of the food crisis in the 1970's, Latin America will be the center of the employment crisis in the 1970's. Unfortunately, of all the major areas of continental and subcontinental size, it is the least prepared to cope with this problem. Half the population already lives in unstable urban environments, and in the rural areas, where half the land is held by only one percent of the families, conditions are not conducive to producing either high rural employment or social stability.

Trade

Fifth, there will be real trade problems during the 1970's. In recent years, the trade of the less developed countries has grown faster than ever before—by some five percent per year in volume. But this is still not enough. It must now grow by an average of six percent annually if GNP is to grow by a like amount. The developing countries will also make much heavier demands for a root-and-branch rationalization of world trade and production in order to help meet soaring employment needs. Very likely, this will produce a confrontation between the have and have-not nations on the issue of the increationgly protectionist policies that many of the former are adopting towards the products of both agriculture and industry.

If the rich countries are wise, they will help avoid this confrontation. How? One important measure would be for them to adjust their domestic economies to accommodate to—and even take advantage of—a revolutionary change: namely, the rapid and recent trend towards internationalization of production, in which many countries contribute directly to the manufacture of a single industrial product. This development has been most notable so far in the electronics industry, with major components for products of American companies being manufactured in such diverse areas as Mexico, Korea, Taiwan, Hong Kong, Singapore and Indonesia. It could become a major "engine" for accelerating both the industrializing process and the increase of exports by many developing countries.

Foreign aid

Sixth, the pattern of international development aid has changed considerably. This is particularly so of the role played by the United States, which for many years was the mainstay of development efforts. Today, we in America are faltering badly in our development assistance efforts just as most other developed countries are preparing to increase theirs substantially.

For the first time since the start of the cooperative global development effort in 1961, U.S. net official assistance to the developing countries will drop below $3 billion in 1971—a figure well below all objective assessments of the United States' fair share. Meanwhile, governmental assistance from other developed countries, only $2 billion annually in 1961, should pass the $4 billion mark in 1971 and, at the same time, be made available on terms that on average are equal to or better than those applying to U.S. assistance.

The gross flow of aid and private investment to the developing world must increase substantially during the 1970's, just to maintain the present net flow. This is particularly true because of the service payments made by developing countries on private and public debt owed to the developed countries are likely to increase from the present annual rate of $5 billion to an annual rate of $10 billion by 1975.

Because of the other trends that are increasing the need for a major development effort, it is indispensable for the United States to revitalize her approach to the developing countries within the next three or four years. Only in this way can the unique cooperative global assistance effort of the 1960's be saved from atrophy or collapse. And if it does collapse, we can then expect a confrontation between the poor and the rich nations that will become increasingly embittered. At the same time, the United States, in contrast to Western Europe and Japan, with their more progressive approach to aid, will find herself increasingly frozen out of developing world trade and, to a lesser extent, frozen out of investment opportunities in much of Asia and Africa.

Internal unrest

Finally, the 1970's hold out the danger of a confrontation between the rich and the poor that goes beyond the familiar gap between developed and developing nations. This is the growing gap between rich and poor *within* many developing countries, made clear by Latin American experience. The 1960's demonstrated that rapid economic growth is possible in most parts of the developing world; although this did not necessarily mean improvement in the standard of living for many of their peoples. Furthermore, the population explosion means that even a continuation of that decade's five percent growth rate will not be adequate to prevent a large and growing group of unemployed and dispossessed people in most developing countries.

The developed countries cannot afford to ignore these internal problems; indeed businessmen engaged in countries facing the threat of mass unemployment will find that their activities are jeopardized increasingly by civil unrest and the resentment that is natural in situations of mass poverty and discontent.

In viewing the program of the developing world during the 1970's, businessmen, in particular, should look at several key barometers including:

1. The ability of individual developing countries to cope with internal pressures for progress and social justice. Failure to cope with these problems will lead to strong moves for reform, at the least, or to more toppling of governments. The latter events will frequently be followed by a move to the right, leading in turn to internal turmoil fomented by the left—as has been symbolized recently by the kidnapings in Guatemala and Brazil. Alternatively, there could be a move to the nationalistic left, as has happened in Peru, with subsequent harassment of outside investors;

2. The extent to which the rich nations and poor nations are able to conduct their relations at the governmental level on the basis of cooperation instead of confrontation. If there is a cooperative world effort on trade and aid, the political atmosphere in the developing world will be far more likely to aid settlement of the inevitable problems that will arise between foreign investors and governments. But if confrontation is the pattern of relations, then in many developing countries the prospects of foreign investment will be bleak, indeed; and

3. The degree to which foreign corporations are willing to play a role that contributes to the progress of developing countries. During the 1970's, these countries will place a particularly high premium on foreign investments which promise to provide significant added employment. If the developed countries encourage—or at least permit—the current trend toward the internationalizing of production that is by nature labor-intensive, the image of foreign investment should be enhanced. But the image can be expected to deteriorate if the developed countries halt or reverse this trend. This would leave the field of foreign investment almost exclusively to firms that are either engaged in resource extraction or interested in developing-country manufacturing primarily for purposes of retaining or penetrating markets in the developing country in which the plant is located. Firms owning overseas mineral resources are particularly likely to suffer when there are confrontations that pit rich against poor, whether they take place within or between countries. The growing world demand for mineral resources and competition for them among developed countries will make it easier for the developing countries to play off developed countries' firms against each other and to dispose of production from expropriated properties.

II. DISCUSSION

Growth of output in the developing countries

Several major factors make it likely that the developing countries as a whole will have a growth rate in the 1970s that is even higher than their unprecendented annual average of five percent during the 1960s. There are two that are most important: first, the breakthroughs in modern agriculture made in the late 1960's by many peasant farmers from one end of Asia to the other; second, the prospect that the proportion of such farmers will increase substantially in the 1970s. As noted earlier, agricultural production could rise to the unprecedented rate of four percent annually during this decade.

New high-yielding varieties of cereals, notably wheat and rice, have spread across many countries of Asia at a rate exceeding even the recordbreaking spread of hybrid corn across the United States in the 1950s. The expansion in Asia has progressed as follows:

(Total acres in production)

1964–65	200
1965–66	37,000
1966–67	4,800,000
1967–68	20,000,000
1968–69	34,000,000
1969–70	+40,000,000

If replacement of local varieties with high-yielding seeds has raised output by half a ton per acre—a conservative assumption—then the more than 40 million acres planted in 1969–70 will have expanded the Asian food supply by 20 million tons, which is more than $2 billion worth of grain.

This agricultural revolution also has important implications for international as well as domestic business and manufacturing. Not only do the new varieties require greatly increased use of agricultural inputs, such as fertilizers and pesticides; but they also have been profitable enough to provide significant income in the rural areas for increased investment and purchase of consumer goods.

This rapid modernization of peasant agriculture, particularly in Asia and North Africa, can be expected to continue unabated in the first half of this decade. It will provide both a rapidly growing rural market for industrial goods and lower-cost production of agicultual commodities for mass consumption.

Will this momentum continue into the late 1970's? The answer to this question will depend largely on the ability of the Asian countries to shift land that is no longer required to produce rice and wheat for domestic consumption into one of two alternative uses: either production of foodstuffs for export, or production of alternative crops, such as feedgrains, to meet a rising domestic demand for protein. In the Philippines, for example, 30 to 40 percent of the land now in rice production will probably no longer be needed to meet domestic rice needs by the mid-1970s. Therefore, the use of this acreage and its farmers in effective ways will be vital to the economic and political progress of the Philippiness during the late 1970's.

Prospects such as this one point up a significant fact: that the aid, trade, and investment policies of the industrialized countries toward the developing world will play a vital part in the rate of expansion and future course of the Green Revolution. For one thing, many countries depend on aid financing and on the expansion of indigenous production by multinational corporations in order to obtain the fertilizer that they must have to grow the new high-yielding crop varieties.

For another thing, the increasing number of developing countries in Asia that have a rice surplus available for export find themselves to be dependent on the rice policies of the developed countries, notably Japan and the United States. The United States, the largest rice exporter (by virtue of subsidies because its production costs are well above the world price), is beginning to hold a sizable portion of its rice acreage out of production; it will probably hold back more in the future because of reduced Asian demands for rice imports. Japan, however, is the only country in a position to avert a major collapse of the world rice market in the 1970's, since it is the only large high-income country that consumes rice as her staple food. With an internal support price of $420 per ton—nearly triple the world market price—Japan may be the most flagrant violator of the law of comparative advantage of any cereal producing country. Not only is Japan no longer an importer of rice but it, like the United States, is also now subsidizing its export, thereby seriously depressing prices in the world market and reducing the market for those exports upon which many developing countries depend for their living.

Finally, achieving a high rate of economic growth will require a continuation of the rapid expansion of world trade that marked the past two decades. At the same time, there will have to be a satisfactory resolution of major trade issues, including the need for the developing countries to gain increased access to developed country markets; a decision by the industrial nations to end their discriminatory treatment of the LDC's; and the development of regional markets among the developing countries. Unfortunately for them, however, their growth and prosperity is still not essential to that of the developed countries. Yet, by the same token, a slowing down of growth in the developed countries would have a deleterious effect on the LDC's. A worldwide recession would not only reduce greatly the market for developing-country goods, but it would also affect seriously the willingness of the industrialized countries to extend large amounts of aid. Fortunately, a continued rapid growth in world trade during the 1970's seems likely.

The employment crisis

The growth rate of the developing world is also likely to increase because of the rapid expansion of its labor force. This prospect could have some beneficial effects, leading to a growth in the number of productive individuals in the labor force and, in turn, to an increase in output. Unfortunately, however, unemployment probably will still be on the upswing, as the number of working-age individuals continues to outpace the availability of jobs.

Until recently, there has been a tendency to regard unemployment in the poor countries merely as symptomatic of underdevelopment. But during the last decade, unempolyment rose in the developing world as a whole, even though growth itself expanded rapidly in many LDC's. In most of them at the present time, between ten and twenty percent of the entire male labor force is either openly unemployed or so underused or poorly used that there is little difference. This problem is most acute in urban areas, and is particularly serious in Latin America, where the urban population has grown twice as fast as the number of urban jobs. Indeed, since 1950, the unemployment rate on that continent has about doubled.

There have been a number of recent assessments, notedly by David Morse, Director General of the International Labor Organization; by Robert McNamara of the World Bank; and by Raul Prebisch of the Inter-American Development Bank. They all conclude that unemployment will probably become far worse as the children produced by the population explosion which started in the 1950's swells the labor force of the 1970's. New entrants to the labor force in this decade will be some 50 percent greater than in the past. In some areas, particularly in Latin America where the population explosion started earlier, the increase will be even

higher. There the population of working age will increase from some 153 million in 1970 to over 200 million by 1980, an increase of nearly three percent annually.

Meanwhile, in India the work force may increase from 210 million in 1970 to 273 million by the end of the decade. In the first week of the decade alone, over 100 thousand more new workers appeared for jobs than older workers stepped aside to make room for them; and each week for the next ten years the number will be higher, until in the decade's last week, the net addition of workers to the Indian economy will be about 140 thousand.

In comparison with previous experience, these projections seem even more pessimistic. In particular, the developing countries face a far more serious employment problem than did the presently developed countries during their comparable period of industrialization. The work forces of the latter grew by less than one percent—usually by only 0.5 percent or so, compared to the current annual increase of 2.5 percent to 3 percent in the LDC's. In addition, the technology of 50 and 75 years ago was far more labor-intensive than that being introduced into developing nations today, and therefore was better able to absorb new workers.

There are also grave social implications of this massive unemployment. The unemployment problem can further distort the already wide gap between the rich and the poor within developing countries themselves. The earth's food supply may be sufficient to feed everyone, but there will be many people who do not have the income needed to pay for a share of it.

Many countries in the 1970's will have unemployment on a scale comparable to, or exceeding, the levels in the Western nations during the worst years of the Depression. But unlike our experience in the 1930's, there will be a sizeable group in the developing countries whose standard of living will be rising rapidly while unemployment is increasing, thereby sharpening the contrast between those for whom the system is working and those for whom it is not.

The cities will become politically explosive, as we have seen recently in Ceylon, with idle hands reaching out to tear down the economic systems which leave them without opportunity to make their own lives liveable. And with even stronger reason, growing unemployment will lead to much greater stresses between the developing world and both the industrialized countries and their great corporations.

For these and other reasons, it is now evident that the employment problem threatens to become unmanageable in the 1970's unless leaders of developed and developing countries alike pay high-level political attention to them, even more than was required to begin coping with the world food crisis in the 1960's.

What to do about unemployment?

Some economists have begun to address this problem seriously; and a number of major economic research centers have made unemployment in the developing countries a principal subject of their research in the past two years. Out of their work there is already beginning to emerge some tentative approaches to solving the problem.

To begin with, there is a conventional approach that ties employment in with economic growth. Accordingly, there should be a greatly stepped-up growth rate, particularly in the industrial sector. This emphasis on industrial growth derives from the fact that at a point in the modernization of the agricultural sector, employment in that sector will begin to fall rapidly. This is a traditional sequence; thus, agricultural employment in the U.S. is now less than the eight million people currently attending American universities! Of course, we were able to adjust to this shift through our increase in industrial jobs.

How does this need for industrial growth work out in actual figures? Here are some statistics from a new economic model designed to estimate the rate that gross domestic product (GDP) must increase in a country in order for all the *increase* in the size of its labor force to be absorbed in nonagricultural jobs. In this model the growth in GDP does not take account of a decrease in employment on the land, nor would it help elminate the existing backlog of under-employment and unemployment:

	Per capita income	Rate of annual population growth (percent)	Required annual rate of GDP growth (percent)
Typical Asian country	$100	2.5	10.2
Typical Latin American country	300	3.1	9.3
Typical African country	100	2.7	11.0

These are striking estimates of GDP growth required in the developing countries; and they become even more so when compared with the experience of developed countries. The United Kingdom, for example, reached the point at which all the increase of the labor force could be absorbed in nonagricultural jobs with a GDP growth rate that was only just over two percent annually; and the U.S. reached the same point while achieving a growth rate of only three percent per year.

It is this type of analysis which led Raul Prebisch to call in his recent report for a growth rate in Latin America of at least *eight percent* annually. But would attaining even this target—a very ambitious one—be enough? Some economists are skeptical that the employment problem can be solved merely by expanding the growth rate to exceptionally high—some would say astronomically high—levels. It is, of course, true that at some point growth rates will have to rise as, in turn, will levels of imports and exports.

Yet there undoubtedly will also need to be major new innovations before the employment issue will be well in hand, just as the high-yielding "miracle seeds" had to be developed before we could begin to make progress in meeting the food problem during the late 1960's. Nor can we expect that a single new innovation will be able to do for unemployment what the seeds are doing to end hunger. There is no "miracle" social or economic policy to cope with unemployment.

Innovations

There are three areas of innovation which stand out, in addition to the basic long term need to stem the rapid increase in population. First, there must be more labor-intensive production. Since the ratio of labor supply to capital supply is greater in developing countries than in the developed world, it is clear that the former should use more labor intensive techniques, at least in the short run. Unfortunately, few countries or corporations in any part of the world have yet approached this problem seriously. In fact, the vast research facilities of the industrialized countries and the multi-national corporations are devoted largely to finding more capital-intensive ways of displacing high-cost labor. Nowhere is there the research capability to address the problem. Again, the breakthroughs in agriculture did not occur until the major U.S. foundations spent millions of dollars to tackle that problem in a specific and concentrated way.

Second, the LDC's must continue trying to take advantage of the low cost of their labor force as part of a new process of international production; and the developed countries must permit them to capitalize on this comparative advantage. Historically, most developing countries have increased their exports either by selling primary products in which they had a comparative advantage, or by selling industrial goods which they produced initially for their domestic markets. But in recent years, low cost labor in certain countries has come to be increasingly treated as a valuable resource in its own right, and multinational corporations have worked effectively with these countries to utilize this resource. The U.S. electronics industry, as noted earlier, has reacted to tough foreign competition by moving much of the labor-intensive part of its production overseas to countries like Taiwan, Hong Kong, South Korea, and Mexico. The fruits of these labors are then re-imported for assembly in the United States.

This is the beginning of a new movement towards production that is truly rationalized, but not just between different companies in separate countries; production is also being rationalized within individual companies which make separate components of their own products in different countries in order to take advantage themselves of the law of comparative advantage. Not surprisingly, this nascent innovation is being met with loud outcries from some in the American labor movement who see U.S. jobs going abroad. There will of course be adjustment problems in the U.S., as we use our comparative advantage to remain competitive in world markets. Properly managed, rather than decreasing the number of jobs in the U.S., this will ensure that our technological advances continue to create additional employment at home in sophistical industries. Indeed, if we are to react to competitive pressures by adopting protectionist policies, the number of jobs at home and our general standard of living would both be affected adversely. Parenthetically, it should be noted that many developing countries, with their emphasis on import substitution without regard to cost and on over-valued exchange rates, have seriously reduced their capacity to take advantage in international trade of the low cost of their labor force.

Third—and possibly the most promising way to ease the unemployment problem—it is possible to increase the use of labor through broad constitutional and organizational changes in agriculture. The problem can be stated simply: How can rural areas be made more attractive, thereby helping to slow the overflow of migrants to the cities? We are just beginning to realize that adopting an integrated approach to the development of rural areas can make it possible for countries to have a substantial beneficial impact on both growth and employment.

Obviously, this increase in rural production would generate broader-based purchasing power. But even better, the character of rural demand itself can contribute to development. In these areas it tends to be different from urban middle-class and upper-class demand of the type prevalent in Latin America, by focusing on goods with a lower foreign exchange component which are both more labor intensive and more easily produced in smaller towns. An increase in the production of basic foodstuffs also permits major programs for expanding the work force in both urban and rural areas without the heavy inflationary or foreign exchange pressures which were inevitable with a more stagnant agriculture. This is because most of the increased income of workers at the bottom of the wage scale goes for increased consumption of food.

However, special measures will be required if this focus on rural production is to make a significant contribution to providing employment. In Taiwan, for example, where there is a seven acre limit on farms, the agricultural breakthrough has been far more labor-intensive than that in the In-

dian Punjab, where the size of farms is unrestricted and the larger ones make use of large scale mechanization.

In Taiwan, these land limitations have induced the successful farmer to be increasingly innovative with his small acreage; whereas in the Punjab, a farmer who has been successful with one innovation has tended instead to take advantage of it by buying more backward and labor-intensive farms. This means that Punjabi farms of over 100 acres have more than doubled in size on average in recent years; and, as a result, the successful farm in Taiwan is not only far more labor-intensive, but is also much more productive in terms of yields per acre. This is a strong argument for those policies collectively known as land reform.

In addition, labor-intensive public works projects tend to be far more productive and profitable in rural areas where there are rapidly increasing crop yields. These increasing yields add greatly to the returns from investment in farm-to-market roads and small scale irrigation projects. Indeed, the combination of increased yields and labor-intensive social systems has been a feature of the broadly-based economic breakthroughs achieved by Japan, Taiwan, and South Korea.

The private sector

These three innovations may help ease the problems of employment in the developing world. But the coming crisis also has many implications for international private investment and for the multinational corporation. In the first place, the developing countries will place an increasingly high premium on foreign investments which promise to be labor-intensive or which in other ways provide significant employment. Furthermore, there should be major new sales opportunities for corporations making both consumer and producer goods for which there is high demand in rapidly-growing rural areas.

But at the same time, the prospect of increasing unemployment bodes ill for the political stability of these countries. This is particularly true in Latin America, because the economies and societies of those nations generally are not structurally prepared to deal readily with the problem.

Needless to say, such a climate of uncertainty and potential civil strife is not the best one for business and trade. Indeed, this problem clearly establishes a link between Western concern for the unemployment problem in the developing countries and the future of our commercial relations with them. In addition, the unemployment crisis will lead the developing countries to increase their pressure on the industrialized nations to open markets. This question is now upon us, as we are discussing with the OECD the best means for extending preferences to the products of the LDC's. We will either meet this problem successfully now; or we will see it—and all of our business relations with the developing world—get much worse later.

Special regional trends

Massive studies could be—and are being—written on the problems facing each of the world's regions during the 1970's. For example, Raul Prebisch has just completed an outstanding analysis of Latin America for the Inter-American Development Bank. And early this fall the Asian Development Bank will conclude its study of Asian development. But for this discussion, it is necessary to limit our concern to a few regional factors that warrant special emphasis.

East Asia

East Asia is no going through an extremely dynamic period of economic change. Its economic growth currently exeeds that of any other group of developing countries and is likely to continue to do so during the 1970's, unless there is a catastrophic military and political collapse in Indo-China, with repercussions throughout Southeast Asia.

This region of more than 350 million people is today heavily dominated by the dynamics of Japan's extrordinary growth. But the Japanese "economic miracle" is not alone in explaining the region's great strides forward: many other East Asian countries—including Taiwan, Korea, Hong Kong, Singapore, and Malaysia—have also followed economic policies designed to maximize their growth opportunities.

Unfortunately, this pattern has not been repeated everywhere. Indonesia and, to a lesser extent, the Philippines are the slow developers in East Asia. However, the impetus behind the region's growth are so great that these countries should achieve progress at or above the world average during the 1970's, even if management of their resources is only moderately good.

Still, by the end of the decade Japan's role in the region will be even more pronounced than it is today—possibly by a factor of ten. Will this explosion of Japanese activity in East and Southeast Asia involve some form of partnership with the developing and developed countries? Or will it be largely a unilateral intervention, with the United States lessening its interest in the economy of the area at the same time it disengages militarily, thereby leading to a form of Japanese-dominated "co-prosperity sphere?" If the latter proves to be the case, we can expect active resentment of Japan by developing countries that is similar to, but even greater than, Latin American resentment of U.S. dominance. And in that case we can expect the United States and other developed nations to play a lesser role in the region's economy.

These stronger Japanese ties to the East Asian countries will develop in many forms. To begin with, Japanese official aid will probably double to more than $1 billion annually within the next several years, and more than double again before the end of the decade. At present, Japan's policy is to focus aid overwhelmingly in the East Asian countries; to resist large-scale expansion of aid in South Asia, Africa, and Latin America; and to relate aid to commercial interests wherever feasible.

Second, during the 1970's, there will be a large-scale expansion of Japanese trade within the region. This will derive in part from the expected increase in Japanese GNP from its present $200 billion to $500–800 billion by 1980. As a result, Japan's trade should increase by more than the same percentage as she becomes increasingly dependent for economic growth on outside raw materials, and elects to focus an increasing proportion of her new investment on labor-intensive production overseas for her own industries.

Third, the decade should also see a radical change in Japanese overseas investment policy. Until recently, Japan—like Germany—was slow to invest abroad. Thus, her overseas assets are still less than $2 billion—an insignificant amount compared to Britain's $20 billion and the United States' $70 billion. But this policy can be expected to change rapidly in the 1970's, leading to a vast increase in investments, particularly in East Asia.

Over the next few years, the American economic relationship with East Asia will be very much at issue. In the first place, all indications are that American military involvement in Asia, with its consequent economic implications, will be reduced significantly throughout the area from Korea to Thailand. As part of the same American caution in the area, we may also see growing opinion in the U.S. that the greatly increased availability of Japanese aid justifies a drastic reduction—perhaps even virtual elimination—of American aid to Indonesia, the Philippines, Vietnam, and the other Southeast Asian countries. At the same time as such a withdrawal of military and economic assistance, it is likely that there will be increased U.S. protectionism against East Asian manufactured goods; and, if so, then Japan will have an overwhelming domination of East Asia by sheer force of circumstance. In turn, this development would have major political implications for the relationship between East Asian countries and Japan; and it would mean that, relatively speaking, the American economic role would be reduced in what may be the world's most dynamic region during this decade. It is clear that the United States, Japan, and other Asian states would suffer alike.

Conversely, if the United States, Canada, and Australia adopt an active and cooperative approach to East Asian development needs—in cooperation with Japan—political tensions in the area will be greatly reduced, and the participation of these non-Asian countries in the rapid growth of East Asia will be significantly increased. To this end, active U.S. support of the Asian Development Bank will strengthen its ability to lead multinational consortia for Southeast Asian countries; and it will increase the likelihood that Japan will channel large amounts of her aid through the Asian Development Bank, instead of relying primarily on bilateral means.

Finally, it is important to note that the East Asian developing countries are in the best position of all to capitalize now on preferences extended to manufactured goods. They will, therefore, have most to gain if the industrialized countries introduce some form of general tariff preferences on behalf of the developing world.

Latin America

In Latin America, there are reasonably good prospects that at least a moderate expansion of output will be continued during the 1970's. Overall Latin American production has increased from $53 billion in 1950 to $86.5 billion in 1960 and to some $130 billion today, and should exceed $200 billion by 1980. Output today represents an average per capita product of $510; this compares favorably with Africa ($118 per capita), Asia ($110 per capita), and even with Southern Europe ($473 per capita)—the last three at 196' figures.

However, these figures do not reflect the serious structural imbalance in Latin American development. To a greater extent than in other major regions of the world, there is a growing gap between the modernized, successful part of developing society in Latin America, and the sizeable part that does not benefit from progress. For example, a higher proportion of Latin America's population is either unemployed or severely under-employed, and a larger proportion of its population is in the more politically-volatile urban areas; about 50 percent, as compared with 2(percent on average for the LDC's as a whole. Latin America also has more serious rural social problems, and fewer people own a higher proportion of the land than in any other developing areas.

What will this mean for Latin America? Will it be able to cope with its historic failure to incorporate the broad mass of its people into the pattern of economic and social progress? This is the key challenge facing that continent during the 1970's. If the Latin American nations fail to meet this challenge, there will be an enormous build-up of internal political pressures, and governments can be expected to use xenophobic nationalism and hostility to the outside world as a way of maintaining internal control. The wave of additional entrants into the labor market will make it even more difficult than before to meet this challenge; but they will also make vastly more urgent the need for major structural reform.

In his recent report, Raul Prebisch correctly noted the need for extraordinary measures: according to his analysis, there must be an 8 percent growth rate by the end of the decade and a comparable rate of growth in exports. Furthermore, an important phase of Latin America's economic growth, during which internal production has been substituted increasingly for imports, frequently despite higher cost, has now reached its limit; and with existing trade patterns the maximum feasible growth in Latin American exports will be less than four percent—or only half of the 8 percent required. To achieve the needed expansion of exports will require a major increase in the access that Latin American countries have to developed country markets—notably those in the United States. And it will also require a truly major expansion in trade among the Latin American countries themselves—an expansion that can be accomplished only through some major form of regional economic integration.

Trade

A number of trends will make this issue of trade far more important to the developing countries in the coming decade than it was in the last. Perhaps most important, they must increase their exports significantly, in order to help finance the higher growth rates that, in turn, are needed to meet the demand for vast increases in employment.

Second, the practice of substituting new indigenous production for an increasing range of imports has already been overdone in many developing countries; the emphasis must shift to exports. As Raul Prebisch correctly pointed out in his report, import substitution will have a much smaller role to play during the 1970's in accelerating the process of industrialization and in reducing LDC needs for foreign exchange. These countries must place their emphasis on selling more, rather than on importing less.

Third, many countries will come of age during the 1970's as exporters of both agricultural and manufactured products. In agriculture, the technological revolution that is now sweeping many developing countries will create surplus production capacity; and this capacity must be directed to new markets either within the developing countries themselves or abroad. Otherwise, these countries will have no hope of avoiding locally distressed areas—Appalachias of the LDC's.

The developing countries are also beginning to enter the field of manufactures. For one thing, despite inefficiencies that frequently occur in attempts to substitute domestic production for imports, this practice has enabled several developing countries to create labor-intensive industrial facilities which are competitive internationally. A handful of East Asian countries—such as Taiwan, Hong Kong, Korea, and Singapore—will no longer be able to make production of manufactured goods by LDC's their almost exclusive preserve. For one thing, the growing tendency of multinational corporations to internationalize their production will make available more outside capability to help developing countries increase their manufactured exports. Indeed, these opportunities will come searching for outlets in the developing countries.

Protectionism and Preferences

These forces stimulating greatly increased exports by the developing countries will, of course, come into sharp conflict with trends toward agricultural and industrial protectionism in the developed countries. This is particularly true of many agricultural products, in which the LDC's enjoy a comparative advantage. There are strong political pressures in the rich countries to prolong protection of their own inefficient agriculture and industry which no longer have a comparative advantage. And there is a special threat posed by the Common Agricultural Policy of the Common Market—a threat that will become far worse if the United Kingdom joins the EEC without there being a major revision in this policy.

In recent years, we have also seen rising agricultural protectionism in Japan; and now we are seeing American labor leadership shift toward protectionism in response, in considerable part, to the efforts of multinational corporations to internationalize their production.

It is ironic that the Kennedy Round of trade negotiations has reduced the barriers to the import of goods that are of types manufactured by the industrial nations, but not to goods of the types generally produced by the developing countries. In effect, this amounts to discrimination against LDC manufacturers which are seeking access to developed country markets.

As pointed out recently by Arthur Lewis, the tariff structure in force today in the developed countries leads them in effect to charge twice as much duty on the goods they import from the developing world than on the goods they import from one another. In addition, imports from the developing countries are much more heavily restricted by quotas. This strikes many observers as particularly discriminatory, since, according to 1965 figures, exports of light manufactured goods by the LDC's to the developed countries were only ten percent of the same category of exports of the developed countries to one another. Not surprisingly, Arthur Lewis was reminded of the Biblical saying, that from him who hath not shall be taken away even that which he hath.

Discussions on preferences for developing countries are now taking place in Europe between the Common Market and the United States. Their fate is still in doubt, owing to concern in Europe about the trade bill currently pending before the Congress. And if an agreement does emerge, it must secure parliamentary ratification, which is by no means certain in the United States. Furthermore, the developed world must reach more far reaching accommodation with the LDC's if the trading needs of the latter are to be met.

And such an effort will not begin in serious form until the developed nations—particularly the United States—reassess the importance of relations between the poor, but growing, two-thirds of the world, and the increasingly rich, but shrinking, one-third; nor will this effort take place until the developed countries have thought through their trade policies on a worldwide basis, as part of a total approach to restructuring long-term relations between the developed and developing nations. Unfortunately, these assessments will probably not take place until perhaps the middle of the decade, and almost certainly not until after the Vietnam War is concluded.

Finally, during the 1970's we should see the development of major regional trading arrangements between the developing countries, as Prebisch and Pearson have both advocated. Such regional arrangements will be important both in contributing to increased trade between developing countries, and in symbolizing for all that developing countries themselves take serious this crisis problem of the 1970's.

Development cooperation

The foregoing discussion points up a central fact: that there must be more common effort to solve these problems of the developing world. Fortunately, today, most of the developing countries and the industrial nations are prepared to work together for a major expansion of the cooperative approach to international development which the United States began 20 years ago. Partly as a result, the push and shove of unilateral U.S. leadership is no longer required, nor is it even acceptable. But for the effort to succeed, the United States must not abandon its role now; indeed, it must provide its fair share of cooperative participation and leadership. And at present, the future character of this participation and leadership is at issue, both within the Government and in public attitudes.

American attitudes towards developing countries, as well as our relations with them, reflect the end of an era in which our entire foreign policy was largely dominated by Cold War preoccupations. Today, we are at the beginning of a new era—one whose outlines are still only faintly defined. There are many conflicting trends. On the one hand, in our daily concerns we Americans are far more intimately involved with the developing countries than we were ten years ago. East Asia, for example, has become America's fastest growing trading partner. Indeed, despite the extraordinary increases in cereal production made possible by the Green Revolution, Asia has become the United States' largest market for agricultural products. International tourism has also increased manyfold, leading many North Americans to visit their Latin American neighbors, and hundreds of thousands to visit Asia each year.

On the other hand, during the last several years, the United States has reduced its foreign policy interest in the progress of these countries. Today, for example, any community meeting or university seminar that directed its attention to the problems of some particular nation—such as India or Colombia—would tend to attract fewer participants and much less general interest than would have been true a decade ago. Throughout the United States, centers dedicated to the study of developing countries are having difficulty in gaining support from private funds, foundation grants, or other private sources.

U.S. development assistance has also been dwindling, both in absolute terms and relative to the success of our economy. Seven years ago, the U.S. provided in net amount about $3.6 billion in foreign economic aid—roughly six-tenths of one percent of our GNP. But in 1970 the U.S. aid contribution will be only about $3 billion—only three-tenths of one percent of an economy that is much richer. And in the next two years, the actual flow of U.S. aid will probably decline even further on the basis of decisions that the Government has already taken.

This decrease in America's concern with transferring resources to the developing world has come at a particularly critical time. It is certainly apparent to all that the gap between the rich nations and the poor nations, measured in terms of per capita income, is growing wider rather than narrower. Of course, it may be that personal income is a misleading measure of personal fulfillment; but it is certainly a factor of some importance. Today, the incomes of the poorest third of the world are still less than $100 per capita, and may not reach $250 before the year 2000. At the same time, the United States has increased its GNP per capita from $2,000 to more than $4,000 in the past 20 years, and will approach $10,000 by the end of this century. As a result, the progressive reduction of U.S. aid to the developing world at this time seems to many thoughtful people to be an unfortunate and inappropriate trend that must be reversed.

Fortunately, there is at least one more trend in attitudes prevailing in industrialized states that gives firm ground for hope. Almost everywhere, there is an extraordinary increase in public concern about the global problems of over-population, hunger, and pollution of the enivronment. These issues do attract intensely interested and active people to meetings throughout the nation And in the corporate world, especially, there is a striking increase in pragmatic interest about the world community, demonstrated by many developments, including the new emphasis placed on the internationalizing of production.

There is great potential here for U.S. action and a major contribution that we could make. Even more, we could broaden our concern with domestic problems of poverty and urbanization to embrace the similar needs of developing countries; and thereby help to overcome the stumbling block of the decreasing popularity of assistance to those outside our geographical borders.

The new concern for common problems that is evident in the developed world indicates a growing awareness that the world is becoming increasingly interdependent—in ways and to an extent that is still not fully understood. But one things does seem clear: that mankind must address its pressing problems together, or not at all; and it must search for common answers. Most important, we must stabilize overall global population growth if we are to preserve our life-sustaining ecosystems into the next century. And we must address ourselves to other problems on a common basis, including the need to take those steps—in trade, aid, and technology—that will help to stem the rising tide of unemployment in the developing countries.

In short, technology is reshaping the world in which we live, much more rapidly than the policies of the developed countries yet reflect. And it is increasing the need for common action on a host of fronts. Indeed unless the industrialized countries, and particularly the United States, make themselves more responsive to changed circumstances—and do so together—they will surely suffer in ways that are still only dimly seen.

Recommendations of Peterson Task Force

In this regard, the Report of President Nixon's Task Force on Foreign Aid, chaired by Rudolph Peterson, takes on particular importance. If implemented, its principal recommendations would carry in a long way toward meeting the problems described above.

As the Report recognizes, the long-term interests of developed and developing nations alike will require us to separate the management of development assistance from that of security assistance; as we have learned to our cost, the latter has too often in the past been allowed to dominate the former.

Furthermore, the successes of the past 20 years have created an opportunity, as well as a pressing need, for us to create a framework of cooperative development that is truly international. In order to lessen the danger that there will be bilateral intervention in the affairs of developing countries, there must be stronger multilateral financing institutions; and also greater international decision-making on bilateral programs. The Report proposes the creation of a development bank for capital loans; a development institution for research and certain types of technical assistance; and a corporation to support private investment activities. If long-term funding is provided for these new institutions, we should be able to use funds more efficiently, and gain broader participation in the process of international development.

Finally, the Report recommends the creation of an International Development Council in the White House, similar to the National Security Council and the Domestic Affairs Council. In so doing, the Report recognizes the need for coordinating the U.S. development tools of trade, aid, and investment with respect both to the international community and to the developing countries themselves.

The President has yet to act on the Peterson Task Force Report, although he has given many indications that he is impressed with its scope and depth. In any event, Congressional action will not take place until 1971.

Early renewal of U.S. development effort

Today, we in the United States have three unique opportunities which we may miss and never recover unless we return soon to the development effort with a better and expanded program of trade, aid, and investment—a program that is adapted to the new needs of a global community faced with increasing interdependence.

First, we have the example of other developed nations. At present, many of them are willing to play a much larger role in a cooperative development effort than we are. Their net official aid contributions have risen from $2.3 billion in the early 1960's to an estimated $3.7 billion this year—$700 million more than the declining U.S. effort. And this gap will widen further over the next several years as these other countries continue to increase their contributions rapidly toward the $5 billion level. But we cannot really expect this upward trend of aid contributions from other countries to continue for more than a few years if the United States, as the world's richest country, does not do its share.

Second, the poor countries are now willing to cooperate actively, with each other and with the industrial nations, in a global development effort. But their willingness will fade if we permit the emergence of a basic confrontation between rich and poor nations while reducing our development effort. With our help, such confrontations may not prove serious; without it—as is happening in our cities—we will find that a failure to help only increase hostility in the developing world. In this sense, it is better not to embark on a program of help than to abandon it half-way through. In addition, it would undoubtedly be far more difficult to reestablish a cooperative development effort at a later time.

Third, the developing countries have built up considerable momentum toward solving their many and difficult problems. But if this momentum is lost, we will all find it much more difficult to meet the pressing challenges facing these countries—challenges of unemployment, population control, and food production.

Finally, we in the United States need to take a new and critical look at the world in which we are living. We are no longer the only major power in the world, whose influence—if not dominance—is assured wherever we choose to act. But at the same time, we are no longer insulated from the problems that beset regions of the world that were once remote from our concerns.

Meanwhile, the methods of power and influence are also changing. The effectiveness of military power is declining; there are strong challenges within our society to the morality of a foreign policy of widespread intervention in the affairs of other states; and economic and social factors in relations among states and peoples have increased to unprecedented levels of importance.

Today, we have an urgent need to develop new concepts of foreign policy that account for these and other new trends in relations among men; we must broaden our understanding of the "national interest"; and we must begin the difficult task of re-educating opinion, among leaders and peoples alike, to the dynamics of the world's changing circumstances.

We also have new responsibilities towards the developing world in securing our own long-term self-interest, by preventing further use of unwise and unproductive methods of dealing with other nations. And we have a responsibility to promote the good of all mankind upon which the prosperity and happiness of each of us increasingly depends.

If we are to achieve these goals, we must broaden our concept of development to encompass all means that together can form an integrated approach to the developing regions of the world. These include aid, trade, investment, education, the role of the multinational corporation, social progress, political development, the use of multilateral agencies, arms control, and the automatic transfer of resources. We must also plan for years in advance; we must relate our development effort in one part of the world to that in all other parts; and we must, above all, approach the problems and opportunities of the future with a new understanding and commitment—as suggested by the words "partnership in development."

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

How long?

SENATE—*Tuesday, August 25, 1970*

The Senate met at 8:30 a.m., and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, whose Son was the way, the truth, and the life, we pause this morning hour to open our hearts to Thy presence. Let every victory this day be the victory of truth over falsehood, and righteousness over unrighteousness. May we be quick to commend, slow to condemn, swift to affirm, slow to deny. Spare us from rancor and bitterness but indwell us with grace and charity.

In the long hours before us be Thou our strength. In weariness refresh us; in tense moments relax us; in success keep us humble, in failure make us magnanimous. In all things help us to persevere in righteousness. When evening comes, give us a good conscience and a blessed rest.

Hear us in these our prayers, and in all those deeper prayers that never take the form of words.

Through Jesus Christ our Lord. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will read a communication from the President pro tempore of the Senate (Mr. RUSSELL).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 25, 1970.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. BURDICK thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Monday, August 24, 1970, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Pursuant to previous order, the Chair recognizes the Senator from Idaho (Mr. CHURCH) for 15 minutes.

THE SPANISH-AMERICAN AGREEMENT: THE STORY OF A DOUBLE EVENT

Mr. CHURCH. Mr. President, in the course of historical change, certain patterns often repeat themselves. Yet, when the same event occurs in two different countries simultaneously, it is newsworthy. Here is the story of such a double event.

The United States and Spain entered into an agreement of friendship and cooperation on August 6, 1970. Both governments did this by executive action; the text of the agreement was not made public until after it had been signed.

In both countries, leading citizens protested the manner by which this event took place. Ironically, in both Washington and Madrid, attempts were made to explore the impending agreement publicly before it became binding. Neither government, however, was willing to submit to this process. Each government chose, instead, to deal exclusively with the other, ignoring all objections.

Since the signing of the 1953 defense agreement between the United States and Spain, the latter has received more than $1.3 billion in American military and economic aid. In return, the United States received rights to establish certain military facilities in Spain. Expiration of this agreement was due this fall. The reasons why the Nixon administration desired to extend this base arrangement with the Franco government, made public on the day the new agreement was signed, are contained in a statement by Under Secretary of State U. Alexis Johnson. I ask unanimous consent to insert this statement in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF U. ALEXIS JOHNSON, UNDER SECRETARY FOR POLITICAL AFFAIRS, DEPARTMENT OF STATE, TO SENATE FOREIGN RELATIONS COMMITTEE REGARDING AGREEMENT OF FRIENDSHIP AND COOPERATION WITH SPAIN, AUGUST 6, 1970

In accordance with the discussion that Deputy Secretary of Defense Packard and I had with the Committee on July 24, I am submitting the following unclassified statement in amplification of our testimony on the reasons the Administration is entering into an Agreement of Friendship and Cooperation with the Government of Spain and why it is felt that this should be done in the form of an Executive Agreement.

In 1953, after obtaining the concurrence of the Senate leaders, including the leaders of the Foreign Relations Committee, an Agreement was signed with Spain known as the 1953 Defense Agreement, pursuant to which the United States Government was granted rights to establish and maintain certain military facilities in Spain. For its part the United States Government undertook in the 1953 Agreement "the support of Spanish defense efforts for agreed purposes to provide military end-item assistance to Spain." The United States Government obligations were thus limited to providing military equipment, and no defense commitment was given to Spain, either in the Agreement or otherwise.

During the Kennedy Administration in 1963, the Defense Agreement with Spain was extended five years, to September 26, 1968, and on the occasion of the extension representatives of the two Governments signed a Joint Declaration.

Upon the expiration of the five-year extension in 1968, the United States Government and Spain began negotiations, at the request of Spain, of a new agreement. Ultimately, it was decided, on June 20, 1969, to extend the former Agreement just two years, until September 26, 1970, which extension was calculated to provide both sides adequate time to negotiate and conclude the new agreement.

During these 17 years of friendly cooperation under the 1953 Agreement the United States Government has been permitted to establish and maintain in Spain three joint-use air bases and one joint-use naval base, including associated support facilities. Our total original investment in these facilities is approximately $400 million. Our present force strength in Spain is approximately 10,000 military personnel. These bases have supported important missions of SAC, MAC, Air Defense, antisubmarine warfare units, Sixth Fleet supply and, most significantly, our Polaris Submarine force. During this period we have made grant military assistance available to Spain. All of these activities and expenditures were specifically authorized and funded by the Congress after appropriate study, hearing and debate.

The Administration has most carefully considered the question of whether or not to seek to continue maintaining these facilities in Spain, and after thorough review by all authorities concerned, particularly the Department of Defense and the Department of State, the President decided that we should do so. The Committee was informed of this decision and the general outlines we envisaged for the new Agreement by Deputy Secretary Packard and myself at a hearing on April 22, 1970. These negotiations have now been concluded successfully.

The broad compass of U.S. operating facilities, which will continue to be made available to us by Spain under this new Agreement, continues to be important in (a) maintaining our general deterrent posture in the Mediterranean area, (b) providing the infrastructure to support our forces deployed in Europe and the Mediterranean, and (c) contributing to our worldwide strategic and tactical mobility. The facilities in Spain contribute to our deterrent strength, particularly by providing maximum coverage for our Polaris-equipped submarines. Thus all of our facilities in Spain are defensive and deterrent in nature and will contribute to the maintenance of peace and avoidance of conflict.

Our overall Mediterranean security posture would be considerably degraded were these bases not available. Although it is possible to conceive of alternative locations for some of the functions presently performed in Spain, in some cases political considerations would make relocation difficult or impossible, and in event any such relocation would be very expensive. Many of the relocations would not be adequate substitutes. Our Polaris Fleet ballistic missile alert coverage would be lessened. Our staging facilities to support our forces in the event of a crisis would also be reduced. These are just two examples.

Most importantly, however, some of the facilities are not replaceable elsewhere. The geographic location of Spain obviously cannot be duplicated, especially the favorable terrain and weather conditions for aerial weapons training required to keep our European air defense forces in a high state of readiness, and the privilege of overflight is important. Since we have been deprived of our former bases in other areas, this factor of geography has taken on increased significance.

In short, we think that our strategic posture, and tactical strength and logistic capabilities make it important that we continue to maintain military facilities in Spain.

However, both Spain and the United States Government realize that times have changed significantly since 1953, and that true friendship and international peace must rest on the foundations of cooperation which go far beyond strictly military base agreements. Therefore, the Agreement which has been negotiated covers a number of areas of cooperation, including education, science, cultural exchange and many others, in addition to military cooperation. We believe that in the coming decade such a broad agreement will provide a firmer base for the development of our bilateral relations with Spain.

The question has been raised as to whether the proposed Agreement of Friendship and Cooperation contains a commitment by the United States to defend Spain and if it does, whether it should be submitted to the Senate for its advice and consent to ratification. I entirely agree that were the proposed Agreement of Friendship and Cooperation to contain such a commitment as, for example, is contained in the North Atlantic Treaty, the Southeast Asia Collective Defense Treaty, or the Security Treaty with New Zealand and Australia, or our various bilateral mutual defense treaties, the Agreement should be submitted to the Senate for its advice and consent to ratification. However, as I have stated, the proposed agreement contains no such commitment.

I suggest that the Agreement be viewed as a whole. The Preamble and Chapter I basically are introductory. The rest of the Agreement provides for U.S.-Spain cooperation in seven areas as follows:

Education and Cultural Cooperation (Chapter II).

Scientific and Technical Cooperation (Chapter III).

Cooperation on Environmental and Urban Development Problems (Chapter IV).

Agricultural Cooperation (Chapter V).
Economic Cooperation (Chapter VI).
Cooperation with Respect to Public Information (Chapter VII).
Cooperation for Defense (Chapter VIII).

Chapters II through VII cover areas, such as Fulbright Educational Exchanges, which are, as they traditionally have been, the subject of Executive Agreements rather than treaties. In fact, four of these six chapters cover subjects on which Spain and the United States have already existing Executive Agreements. In addition, all of the pertinent operative clauses of the Agreement, in both its nonmilitary and military aspects, expressly provide that all obligations arising thereunder are subject to the availability of appropriated funds. I would hope the Committee would welcome our plans to cooperate, within the framework of the new Agreement, in such a valuable program to the Spanish people as the comprehensive Spanish education reform law, to be put in effect shortly.

I understand that the Committee's chief concern centers around the preambular language in Chapter VIII (Cooperation for Defense) and Article 30, which state as follows:

"The Governments of the United States and Spain are in agreement in considering that the threat to peace is the greatest problem faced by the modern world, and that it requires that both Governments remain viligant and continue to develop their ability to defend themselves against such a threat. Consequently, both Governments, within the framework of their constitutional processes, and to the extent feasible and appropriate, will make compatible their respective defense policies in areas of mutual interest, and will grant each other reciprocal defense support as follows:

"*Article 30.*—Each Government will support the defense system of the other and make such contributions as are deemed necessary and appropriate to achieve the greatest possible effectiveness of those systems to meet possible contingencies, subject to the terms and conditions set forth hereinafter."

It should be noted at this point that "the terms and conditions" referred to in Article 30 provide only that the United States will make available to Spain military equipment and training and help in modernizing Spanish defense industries and for its part Spain will authorize the United States to use and maintain certain military facilities in Spain, as set forth in Articles 31 and 32:

"*Article 31.*—The Government of the United States agrees to support Spanish defense efforts, as necessary and appropriate, by contributing to the modernization of Spanish defense industries, as well as granting military assistance to Spain, in accordance with applicable agreements. This support will be conditioned by the priorities and limitations created by the international commitments of the United States and the exigencies of the international situation and will be subject to the appropriation of funds by the Congress, whenever the case so requires, and to United States legislation.

"*Article 32.*—The Government of Spain, subject to Spanish constitutional provisions and legislation in force, will authorize the Government of the United States to use and maintain for military purposes certain facilities in Spanish military installations agreed upon by the two Governments. . . ."

As I have noted, the Agreement thus contains no language such as is found in our bilateral and multilateral mutual defense treaties. It is not provided that an armed attack against one party shall be considered an attack against the other, such as the North Atlantic Treaty and the Rio Pact provide, or that such an attack would be dangerous to the "peace and safety" of the United States or that the United States "would act to meet the common danger in accordance with its constitutional processes" as provided in our other mutual defense treaties.

In recognition of the concern expressed by some members of this Committee, the 1963 Joint Declaration language has been dropped. The Joint Declaration itself lapses upon the entry into force of the new Agreement.

Our approach to the problem of the defense of Europe has been collective and multilateral, not bilateral, and we have always viewed Spanish entry into the North Atlantic Treaty Organization, when that should prove possible, as the preferred solution for the defense of all of Western Europe, including Spain. Indeed, the Spanish Government shares this view.

I also want to note that the stationing of U.S. forces in Spain does not constitute a commitment as defined by the Senate in the National Commitments Resolution. The Agreement we have negotiated does not require "the use of the armed forces of the United States on foreign territory". I also suggest that the conclusion of this Agreement as an Executive Agreement, rather than as a treaty, makes it even clearer that no commitment is involved.

In summary, the Administration is convinced that the conclusion of this Executive Agreement will contribute to broadening and bettering our relations with the people of Spain. Finally, the agreement of the Spanish Government to permit us to continue to maintain our military facilities in Spain also well serves our security interests.

Mr. CHURCH. Mr. President, the reasons why the Government of Spain sought to extend the arrangement with the United States are officially set forth in the joint statement of Spanish Foreign Minister Senor Gregorio Lopez Bravo and U.S. Secretary of State William Rogers, while other interpretations appear in an editorial in the Madrid newspaper, Arriba, entitled "The Spanish Position," as well as in Associated Press and Christian Science Monitor dispatches from Madrid, the latter headlined "Madrid Sees Bases Deal as NATO 'In'." I ask unanimous consent that these four documents be inserted in the RECORD at this point.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

SIGNING OF AGREEMENT OF FRIENDSHIP AND COOPERATION BETWEEN THE UNITED STATES OF AMERICA AND SPAIN

JOINT STATEMENT

The Spanish Foreign Minister, Gregorio Lopez Bravo, and Secretary of State William P. Rogers today signed an Agreement of Friendship and Cooperation. This Agreement, which replaces the Defense Agreement of 1953 and extensions thereof, initiates a new era in partnership between the United States and Spain.

The new accord comprehends various fields of existing cooperation between the two countries. Among them are education, agriculture, environment, space, science and technology, as well as defense.

Such an agreement reflects the manner in which cooperation between the two countries has come to include new dimensions since the early 1950's. At that time, it was a matter of urgency to establish the joint-use bases in Spain to strengthen the defensive capability of the West. Under the new agreement, the United States will be permitted to use certain Spanish military facilities, which are still of great importance in Western defense. The United States will undertake to assist Spain in strengthening its own defense system.

In addition, the new agreement also takes into account the many nonmilitary fields in which both countries now have close mutual interest. An example of such an area is space; Spanish tracking stations, manned by personnel from both countries, have played an important role in the Apollo flights. The field of educational exchanges, having already become a fruitful area of cooperation, promises to assume an even greater importance with the adoption of an extensive educational reform program by the Government of Spain.

Both Governments intend this agreement, the text of which is being made public, to promote the well-being and progress of their peoples and, moreover, to make a positive contribution to world peace in accordance with the purposes and principles of the Charter of the United Nations.

THE SPANISH POSITION

The new Agreement on Friendship and Cooperation, which was recently signed by the governments of Spain and the United States, represents a clarification of the Spanish position in the larger framework of the Western strategy. First, because there are fundamental changes in the terms of U.S.-Spanish relations in the sphere of defense, as Sr. López Bravo pointed out in his statements. Second, because from this perspective of equal relations on which the spirit and letter of the agreement is based, Spain accepts the commitment which today the defense of the Western civilization demands of nations. Our Minister of Foreign Affairs said that the risks inherent in our defensive association with the United States have probably been exaggerated. "Today," he pointed out, "it appears to be unlikely that the big powers will resort to total war. But if it happens, Spain cannot avoid getting involved, inasmuch as she is the southwestern flank of Europe and offers a direct and advantageous road to the heart of our continent." This means that the point in question is to recognize the real Spanish position within the West and to strengthen this position as much as possible.

But, in addition, Spain and the Spaniards are very well aware of the fact that our epoch will not allow us to shun commitments, efforts and necessary contributions. In this respect our Minister has likewise been specific: "The common defense of a civilization and of certain values requires that each party commit itself to make its own contribution. The government understands that the part Spain has to fulfill and which it receives in exchange is equally reflected in the projects of the Agreement." Therefore, the point in question is not to reduce commitments and turn down assistance but, as is natural, to carry out both on a basis of equity and just proportion. We all know that the defense of Western civilization, the preservation of peace and its strengthening are precious values which, consequently, require a certain price. What the Agreement now concluded has brought about is that this price is equally and sensibly shared on the basis of a firm friendship.

SPAIN SAYS U.S. BASES ACCORD LINKS HER TO NATO

MADRID, August 8.—Foreign Minister Gregorio Lopez Bravo said today that the new United States-Spanish bases agreement linked Spain militarily with the North Atlantic Treaty Organization.

"The new agreement binds us to NATO through the system of security of air space with its alert system," he said, on his arrival in Madrid from the United States.

The agreement, signed this week in Washington, continues American military bases in Spain for another five years. The pact incorporates the Spanish air force into the United States-installed air alert system covering Spain, which will eventually be turned over to Spanish control. This system is tied to the North Atlantic alliance, United States military men say.

Spain is not a member of the alliance. Entry repeatedly has been opposed by Scandinavian and other members. The United States has supported entry since 1955, and

regularly has briefed the Spanish military after meetings of the alliance.

Asked whether Spain still had an interest in joining the Atlantic organization, Mr. López Bravo replied that this would have to be evaluated on a political, military and economic basis. He noted that "the entry of Spain into NATO would obligate us to double the present defense budget."

Mr. López Bravo said the question "merits permanent attention" but it would involve shuffling the budget.

Noting that Gen. Andrew Goodpaster, commander in chief of the United States forces in Europe, also was military adviser on the new joint Spanish-American committee set up by the accords, he said Spain's new link with the Atlantic alliance was also of a "personal type."

The Foreign Minister declined to put a price tag on the new agreements. They have been estimated in the United States to involve $300-million to $400-million in aid and military hardware.

"Friendship and cooperation cannot be measured in figures," Mr. López Bravo said.

MADRID SEES BASES DEAL AS NATO "IN"

(By Richard Mowrer)

MADRID.—Jamming its foot in NATO's back door, the United States is helping Spain to squeeze in.

This is how the new Spanish-American bases deal looks to observers here.

It is also the view of General Franco's Foreign Affairs Minister, Gregorio Lopez Bravo, who said on his return from Washington: "The agreement brings us closer to NATO."

Because of Spain's authoritarian regime, several countries in the North Atlantic Treaty Organization, notably Norway and Denmark, have stubbornly opposed Spanish admittance. But the new bases deal with America circumvents Spain's exclusion in two ways:

1. The U.S. is to provide Spain with an air-defense warning system on a par with that of the NATO countries, which will interlock with theirs, at least in the Mediterranean area. Madrid will meet one-third of the $50 million cost of the new, advanced system.

2. A joint committee on defense matters is to be set up. The significant thing here is that one of its four members will be the U.S. commander in chief of the European command, who is also NATO's supreme commander. Gen. Andrew J. Goodpaster presently holds the job.

THIRD STRAND INVOLVED

The other members of the committee will be the Spanish Minister of Foreign Affairs and the American Ambassador in Madrid, Robert C. Hill, as cochairmen, and the chief of the Spanish high general staff, Gen. Manuel Diez Alegria.

Spain's tie-in with NATO has a third strand: recognition that it is "necessary and appropriate" that cooperation for defense should "form a part of the security arrangements for the Atlantic and Mediterranean areas," establishing "liaison . . . with the security arrangements for those areas." (Art. 35.)

The foot-in-door approach is as far as Spain wants to go at this time. As Mr. Lopez Bravo points out: "Membership in NATO would oblige us to double our defense budget, now $628 million."

The Foreign Affairs Minister sees the new agreement as a "political" achievement for long-ostracized Franco Spain, which it undoubtedly is. Earlier this year the regime, after eight years' trying, breached the Common Market wall by signing a six-year preferential-trade agreement with the Six, another success. Integration with Europe economically, politically, and militarily is a key objective of Spain's present government, ideological differences notwithstanding.

COMMITMENT TO WEST

The new bases deal with America means that Spain is unequivocally committed to the defense of the West and accepts the responsibilities involved. Dabbling in neutralism, such as occurred in 1968 when Fernando María Castiella was in charge of foreign policy, is out. It would seem that the idea of a Mediterranean pact linking together the riparian states against "outsiders" has been jettisoned for good.

The growing threat of Soviet dominance in the Mediterranean has served to dispel these mirages. It is accepted as a fact by the Spanish military that a big war involving Europe would not bypass Spain, neutral or not. This country's location at the entrance to the Mediterranean is too strategic.

An important component of the new agreement is the understanding, expressed by Mr. López Bravo, that Spain will be in a position now to "regulate the activities" of the U.S. armed forces stationed in Spain. This apparently means control of U.S. military operations originating from Spanish soil.

Up to now, according to Mr. López Bravo, U.S. forces here have been obliged only to inform Spain of their intentions. The new arrangement in Spain's favor is sure to put to the test the mutual understanding on which military cooperation will depend in the next five years.

MATERIAL LISTED

Spain has come out of the negotiations very well indeed. The Spanish armed forces are to acquire from the U.S. 36 secondhand Phantom jets, more than 100 tanks and halftracks, 25 helicopters, heavy artillery, two KC–130 and six C–130 transport planes, and a variety of other equipment.

The Spanish Navy will be given, technically on loan, two conventional submarines, five destroyers, four minesweepers, three landing craft, a munitions ship, and an oil tanker.

The U.S. will help modernize the Spanish arms industry and train Spanish military personnel. The 485-mile fuel pipeline built across Spain by the U.S. will be handed over to the Spanish. The U.S. will thereby lose a source of revenue estimated at $1 million a year.

The new agreement is a package containing many nonmilitary items. The United States is to give aid for Spanish educational reform and agricultural development, cooperate in fields of scientific and technological development, and help with environmental and urban development problems. Trade relations between the two countries and U.S. economic investments in Spain will receive special attention.

The cost burden for America of the new agreement, in terms of dollars and cents, has not been spelled out here, but estimates mentioned in the U.S. fluctuate between $200 million and $400 million spread over five years.

Mr. CHURCH. Mr. President, before the new agreement was signed, however, the Committee on Foreign Relations strongly felt that it should be submitted to the Senate in the form of a treaty. It was the desire of committee members to explore the language and ramifications of the agreement thoroughly. We wanted to question administration witnesses, along with other authorities, as to the merits of the many important items contained in the proposal, and to probe in depth the interpretation placed by the Executive on certain ambiguous passages. The Washington Post made this point strongly in an editorial on August 12:

The basic situation is that the administration, in order to gain continued use of military bases of questionable worth, entered secretly into a five-year pact to provide Spain with an arms-and-aid package worth hundreds of millions of dollars and with some kind of a security guarantee as well. What kind of guarantee? Was it necessary? Was the price right? These are precisely the questions the Senate wanted to ask and the administration chose to duck.

Had the procedure we requested been followed, the committee would have been examining the precise meaning of the new agreement, in accordance with our constitutional responsibilities.

To this end, it was suggested, within the committee, that a sense-of-the-Senate resolution be introduced, asking that the agreement with Spain be submitted in the form of a treaty. But action on that resolution was postponed, because Under Secretary of State U. Alexis Johnson was scheduled to appear before the committee on Friday, July 24, to discuss the terms of the agreement. It was felt proper to delay action on the suggested resolution as a matter of courtesy to the Department of State.

The committee met as scheduled in executive session with Under Secretary Johnson and Deputy Secretary of Defense David Packard. At that time, the chairman of the committee, Senator FULBRIGHT, asked Secretaries Johnson and Packard to consult with their principals and to determine whether they would submit the agreement in the form of a treaty, or, if not, whether they would at least discuss the terms of the agreement in public prior to signing it. They agreed to do so.

On the following Tuesday, July 28, the committee was informed that the agreement, which was to have been signed on Thursday, July 30, would be delayed.

Nothing further was heard on this subject until the chairman was informed on Tuesday, August 4, that the agreement would be signed as an executive agreement 2 days later, on August 6.

I have given this short chronology in order to make the point that the Committee on Foreign Relations delayed action on a resolution not only as a matter of courtesy to the Department of State, but also in the hope that the Congress and the American people would know of the agreement's contents before it became binding. Yet, as the Washington Post pointed out:

So uncertain was the administration of its case . . . that it refused to make it publicly. The agreement commits each country to "support the defense system of the other"—language so vague it cries out for the kind of amplification only a Senate hearing could produce. The agreement also creates a joint defense committee whose American member is the supreme commander of NATO—again, an arrangement that raises any number of delicate questions about the obligations of the United States.

Nevertheless, without prior disclosure of its contents, our Secretary of State, Mr. William Rogers, and the Spanish Foreign Minister, Senor Lopez Bravo, sat down on August 6 and signed the new executive agreement into effect between the two countries.

I ask unanimous consent that editorials from the Washington Post and the Rexburg, Idaho, Standard, plus analytical reports by William C. Selover of the Christian Science Monitor and James Doyle of the Washington Evening Star be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 12, 1970]

A CHALLENGE TO THE SENATE OVER SPAIN

The matter of extending American base rights in Spain would not have become the bitter Executive-Legislative issue that it is had not the administration used trickery to slip the extension through. To be sure, its trickery was successful, at least in the short run. The State Department did fake the Senate out badly, refusing to testify publicly and candidly, throwing Mr. Fulbright off balance with an allegation that he was leaking confidential information to the press, and then rushing through the signing of an "executive agreement" before it could either be discussed publicly or specifically approved by the Senate in terms of a treaty. In the longer run, however, the administration—to say nothing of the country—may regret the clever little coup, if not for some contingency that may arise over Spain, then surely for its impairment of Senate-administration trust.

The basic situation is that the administration, in order to gain continued use of military bases of questionable worth, entered secretly into a five-year pact to provide Spain with an arms-and-aid package worth hundreds of millions of dollars and with some kind of a security guarantee as well. What kind of guarantee? Was it necessary? Was the price right? These were precisely the questions the Senate wanted to ask and the administration chose to duck. By grating contrast, even as it was refusing to submit this highly important measure for Senate consideration, it was submitting an American-Mexican treaty for—wow—"Recovery of Returned or Stolen Archeological, Historical and Cultural Property."

The administration contends, of course, that the extension agreement contains no "commitment" to Spain's defense such as would justify embodying in treaty form. Perhaps. So uncertain was the administration of its case, however, that it refused to make it publicly. The agreement commits each country to "support the defense system of the other"—language so vague it cries out for the kind of amplification only a Senate hearing could produce. The agreement also creates a joint defense committee whose American member is the supreme commander of NATO—again, an arrangement that raises any number of delicate questions about the obligations of the United States. It is no comfort to learn some Spaniards believe that in effect Washington will be paying Spain—handsomely—to receive a NATO security guarantee, one that the Franco regime could not hope to receive directly at NATO's hands and one that it would have to pay for if it did. Can there be a more alarming signal on this agreement than that Mendel Rivers congratulated the State Department for making it?

Senator Fulbright has now called upon the State Department to testify on the agreement before the Foreign Relations Committee. He reserves the possibility of undertaking to amend the pending defense procurement bill so as to cut off funds for implementing the agreement. He can scarcely do less and maintain any pretense of recovering for the Senate its constitutional function of approving or disapproving foreign commitments which have a vital bearing on war and peace.

[From the Rexburg (Idaho), Standard, Aug. 11, 1970]

THE AGREEMENT WITH SPAIN

There are strong arguments on both sides of the running controversy over presidential and senatorial power in the conduct of foreign affairs. Neither the administration or Chairman Fulbright and other members of the Senate Foreign Relations Committee have all truth by the tail in this many-faceted dispute.

Having noted this, we come down on the side of Fulbright and like-thinkers in the matter of the new military agreement with Spain. This extends for five years the U.S. right to air and naval bases in that country, in return for loans and grants which may total as much as 400 million dollars.

Such an arrangement, we believe, should have been made in the form of a treaty requiring the advice and consent of the Senate. It is not palatable that, instead, the extension is embodied in a mere executive agreement on the basis of prolonged negotations in which the Senate played no part.

The administration maintains that no stated or implied commitment to defend Spain against attack is involved, and that therefore the agreement need not be in treaty form. This may be so, but the assurance is not wholly convincing. We think it significant that members of the Foreign Relations Committee have doubts on this point and others.

Sen. Frank Church of Idaho, for example, said he spoke for a majority of the committee in remarking, "I don't approve of secret deals with the Franco government, particularly of the kind that could involve us in a war." He further said, "I think the committee, the Senate and the people of the United States are entitled to know what this agreement is all about" and added: "Without question it (the executive agreement) deals with a prolonged involvement in Spain of such importance that it ought to be the subject of a treaty."

The administration has not made a convincing case to the contrary. Now that the executive agreement has taken effect, perhaps the Senate will not be able to do anything about it. At very least, however, the administration should respond to the Foreign Relations Committee's promised demand that it "explain, in public and on the record, what the agreement involves."

Someone's figured that the U.S. population is shifting westward at the average rate of 58 feet a day. There just doesn't seem to be anything stable and certain about life anymore.

[From the Christian Science Monitor, Aug. 8, 1970]

SENATORS ASSAIL SPANISH ACCORD

(By William C. Selover)

WASHINGTON.—In a hurry-up ceremony here at the State Department, the United States and Spain have finally sealed an accord for a five-year extension of a 17-year old military pact allowing the continued use of Spanish bases by American forces.

It was immediately denounced by a member of the Senate Foreign Relations Committee as an attempted "end run around the Senate."

This statement by Sen. Frank Church (D) of Idaho, signals a new round of controversy in the deteriorating relationship between the White House and the Senate committee.

Earlier, Sen. J. William Fulbright charged that the then-secret agreement would cost the American taxpayers some $400 million. Administration spokesmen denied that it would cost that much. While officials would not put a price tag on the agreement they suggested that the Fulbright figure was more than twice the anticipated cost.

But the cost is not the crux of the controversy which is expected to heat up here in the coming weeks when the Senate committee holds hearings on the new accord.

APPROVAL DEMANDED

The real heart of the matter is whether or not the administration by "executive agreement," can make the kind of military commitment which the accord implies.

Senator Fulbright had demanded that the agreement be made in treaty form and submitted to the Senate for approval.

Secretary of State William P. Rogers refused to do this and moved to sign the accord with Spanish Foreign Minister Gregorio Lopéz Bravo earlier than scheduled.

Both men on signing the document said the agreement "initiates a new era in partnership" between the two countries.

Senator Fulbright said he resents the fact that the Senate is being "presented with a fait accompli."

The chairman of the Foreign Relations Committee has introduced an amendment in the Senate to forbid spending under the new accord until it is presented in treaty form for Senate approval.

VEHICLE FOR HEARINGS

While such an amendment has doubtful chances of approval by the full Senate, it will be used as a vehicle for public hearings on the Spanish bases agreement.

Administration officials argue that the pact does not constitute a military commitment, and they insist that the expensive concessions made to Spain were essential to getting the agreement—an agreement made all the more important with the current buildup of Soviet forces in the Mediterranean.

The Spanish bases agreement, renewed continuously since 1953, was due to expire in September.

The agreement permits the continued American use of air bases at Torejon and Zaragoza and of a Polaris submarine base at Rota.

In return, the United States makes available to Spain:

Some $125 million credit to purchase from 18 to 36 F–4 Phantom jets at a discount rate.

Five destroyers, two submarines, six landing craft, a tanker, and several other vessels.

Grants and credits to purchase 102 armored combat cars, 50 halftracks, 16 naval helicopters and a quantity of artillery. Also included will be equipment for the manufacture of ammunition and arms.

Senator Fulbright, who released these details in a Senate speech was accused of having violated confidential trusts.

Mr. Fulbright countered by saying that, ironically, all of this information was public knowledge in Spain, discussed openly in Spanish newspapers. He said the information he supplied was drawn from these sources. The State Department did not dispute the information.

METHOD QUESTIONED

Senator Fulbright admitted that "because of the security classification attached to this information . . . I find it necessary to discuss the details of the agreement not as presented in secret to the committee, but in terms of information published in the press from sources in Madrid. . . ."

Mr. Fulbright considers it a "strange irony" that "these things are handled fairly openly in Spain, a country which has a government that bears little resemblance to a democracy, and in an opposite, closed manner here in this country."

Under Spanish law, the Senator pointed out, implying further irony, the Spanish-base agreement must be approved by the Madrid legislative body, the Cortes.

Aside from the manner in which the administration has entered the agreement, Senator Fulbright takes exception to the amount of aid provided in return.

"Spain is not involved in a war," he says. "I do not know of any serious threat to Spain . . . I have heard of nothing that would indicate the slightest threat to Spain at this time."

SENATORS CONCERNED

More important than that, Senator Fulbright and members of his committee are concerned that the new agreement, like the one it supersedes, will be taken by Spain to imply a military commitment. "It is an open secret," said Mr. Fulbright, "that between the United States and Spain, the executive departments have considered the 1953 agreement a de facto military treaty."

In 1968, the then chairman of the Joint Chiefs of Staff, Gen. Earle G. Wheeler, in secret discussions made this "understanding" clear:

"By the presence of United States forces in Spain," said General Wheeler, "the United States gives Spain a far more visible and credible security guarantee than any written document."

The earlier wording stated that a threat to either country "would be a matter of common concern to both countries." Senator Fulbright, and apparently much of Spanish officialdom (as well as the United States military) considered this a military commitment.

WORDING CITED

The 1970 agreement drops this wording, but in its place makes the same kind of supportive statements, interpreted in Spain, according to reports from Spanish sources, as a strengthened document. The new language inclues statements indicating the U.S. accord signifies "support for the defense system of Spain."

State Department sources say the decision not to submit the agreement to the Senate as a treaty was taken so as not to imply a larger military commitment to Spain than was intended.

Meanwhile, the Senate was surprised when the final release of the text of the accord, made available only after it was signed, showed an indirect link with NATO because of the new consultation process allowed under the pact.

This new agreement creates a joint United States-Spanish defense committee, which would include the NATO supreme commander.

The agreement also states that the two countries would cooperate on "security arrangements for the Atlantic and Mediterranean areas." They would "endeavor to work out by common accord the liaison" needed for that cooperation.

NATO allies, particularly Norway and Denmark, are expected to raise serious questions about such an arrangement.

In any case, the scene now shifts to the Senate Foreign Relations hearing rooms, where the administration is expected to come under sharp questioning over the manner in which the accord was reached, the extent of commitment, and the unprecedented costs involved.

[From the Washington Evening Star, Aug. 5, 1970]

SENATORS PERSIST IN FIGHT FOR FOREIGN POLICY ROLE

(By James Doyle)

A year ago the Senate Foreign Relations Committee announced it would conduct a series of "country-by-country hearings" on U.S. commitments abroad.

The aim, Sen. Stuart Symington said at the time, was "to present the American people with as much detail as security will permit" on the subject of how we get committed to entangling alliances.

The hearings proceeded smoothly at first. They were held in executive session so that all concerned could speak freely and in detail, as the committee members insisted, about U.S. arrangements with foreign powers.

The Central Intelligence Agency witnesses were allowed to come and go without being identified, and their testimony was kept secret in its entirety.

MUCH DELETED

But when it came time to release the remainder of the testimony on various countries, the State Department took a broad view of what is in the national security.

In the case of Laos, for instance, the government deleted much testimony about the cost and techniques of our support for regular and irregular Laotian forces, matters which were being discussed fully in the press through the dispatches of American correspondents in Vientiane.

Committee Counsel Walter H. Pincus alluded to some of these deleted areas of testimony in a letter to Symington when the cleansed transcript was released.

"Though the possibility exists that this information might be embarrassing either to past administrations, present government officials or to other governments, this does not, per se, imply harm to our national security and therefore automatically necessitate deletion," Pincus said.

The real effect he noted, was to deny the public information needed to judge the government's actions, and a cavalier disregard for Congress.

FULLER RECORD

It may not be possible to evaluate the government's performance fully in the case of the Laos hearings, because the information remains secret. But in the most recent case, concerning American commitments to Spain, the record is fuller.

For more than a week the controlled press in Spain has been debating the merits of the pending new agreement between that country and the United States on the use of military bases there.

The Spanish legislative body, the Cortes, has been briefed on the agreement by Spain's foreign minister. And American correspondents in Madrid have supplied to the American press some of the details of how many jet fighters and other military items Spain will receive in return for a renewal of the air base leases.

But the State Department has refused to comment on the subject and has indirectly criticized Sen. J. William Fulbright, D–Ark., for using the reports from Spain to call for public disclosure of the arrangement.

WAIT FOR COMPLETION?

"We understand the rules of the committee require confidentiality of executive sessions," a State Department spokesman has said. "We intend to respect that and therefore believe it would be most inappropriate to have a public discussion of this matter at this time."

But the rules of the committee were adopted because the State Department would have refused to tender the information at all in public session. And if this is not a proper time for a public discussion of a pending military agreement, the critics ask, must the country wait until the agreement is concluded and it is too late for reaction to have an effect?

The Constitution gave Congress a full role in the formulation of foreign policy, but the executive branch has denied Congress the information to perform its role, Fulbright and fellow critics maintain.

Why, Fulbright asks, does Spain, "a country at war with no one whose territory borders on two allies," need 36 Phantom jets, five destroyers, two submarines, four minesweepers, three landing craft and unnumbered helicopters, tanks and armored personnel carriers?

One reason he suggests is so the Franco dictatorship can be secure against a future internal crisis. That is also an effect of similar aid to Greece and South Vietnam.

The State Department's refusal to discuss the pending U.S. agreement with Spain may begin a new chapter in the Senate's effort to restrain the power of the executive and to prevent presidential wars.

Fulbright has proposed a prohibition of funds to support it unless the administration submits it to the Senate for approval as a treaty—the State Department said yesterday it will not—or proves that there are none of the normal treaty obligations involved.

COMMITMENTS RESOLUTION

It is another consequence of a little-noticed resolution that passed the Senate in 1969, the "National Commitments Resolution" that took note of Congress's constitutional role of passing judgment on the war-making activities of the United States.

The spirit of that resolution has since produced repeal of the Tonkin Gulf Resolution and majority votes in the Senate to deprive the executive of spending money for further incursions in Cambodia, Laos and Thailand.

The President can still depend on the House to support his requests for funds in the various military spending bills.

But the Foreign Relations Committee is slowly peeling back the information lid and the State Department's latest example of secrecy could backfire and blow the lid altogether.

Mr. CHURCH. The mutual congratulations had hardly subsided, however, when there was brought to my attention the fact that, ironically, a group of prominent Spanish citizens had felt similar misgivings about the agreement, and had wanted to do in Spain what we had sought to do here. The New York Times of August 11, 1970, reported "growing opposition in Spain to a renewal of an agreement under which the United States uses two air bases and the submarine station at Rota."

The article stated:

In an unusual action, eighty deputies in the Spanish Cortes issued a statement complaining that Foreign Minister Lopez Bravo was concealing some of the facts about the draft agreement.

I ask unanimous consent that the New York Times report, plus a dispatch from Madrid by Richard Mowrer, be inserted in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 6, 1970]

MULTIPLE BLUNDER ON SPAIN

The Nixon Administration will compound old errors and commit ominous new ones by signing today in non-treaty form the so-called "Agreement of Friendship and Cooperation Between the United States and Spain." It is obvious in the first place that the signing was advanced because of growing opposition on Capitol Hill to the form and content of the agreement.

Such a hurry-up tactic can only widen the already dangerous gulf between the executive and legislative branches about the role of the Congress, especially the Senate, in the making of commitments with other countries that involve—or could involve—the American armed forces.

This shabby behavior is not the most important Administration blunder, however. The fact is that this agreement contains vague language, deliberately fashioned to mean whatever either signatory wishes to claim for home consumption.

What is the United States taking on with a commitment to "support the defense system" of Spain or to make its defense policies "compatible" with those of Generalissimo Franco? Even after lengthy explanations by State and Defense Department officials, some members of the Senate Foreign Relations Committee do not know.

Most Spanish newspapers interpret this

language as hardening the American commitment over that contained in previous agreements, dating from 1953, that a threat to either country would be "a matter of common concern." The Administration will doubtless argue the opposite. But memories of executive actions taken under the Gulf of Tonkin Resolution will make many Americans—in and out of Congress—hard to convince.

It is also evident that there is growing opposition in Spain to a renewal of an agreement under which the United States uses two air bases and the submarine station at Rota. In an unusual action, eighty deputies in the Spanish Cortes issued a statement complaining that Foreign Minister López Bravo was concealing some of the facts about the draft agreement.

The political cost to the United States of even this shadowy pact with the regime of an aging relic of the Fascist period will be high. If the Administration believes the value of the bases offsets that political cost—as well as the financial cost of equipping Spain with F–4 Phantom jet fighter-bombers—the right course would have been to put its draft into clear language and submit it to the Senate in the form of a treaty.

[From the Christian Science Monitor, Aug. 8, 1970]

UNITED STATES RETAINS VITAL BASES IN NEW MADRID ACCORD

(By Richard Mowrer)

MADRID.—A key piece in the West's defense complex is cemented in place for another five years.

After two years of tough bargaining, a new Spanish bases deal, in the form of an executive agreement, was signed in Washington Aug. 6.

It means that the United States military presence in this country, in the form of Air Force and Navy contingents, will continue to operate from Spanish territory. Their chief objective will be to keep close tabs on the growing threat of Soviet dominance in the Mediterranean.

The negotiations, broken off several times, have been arduous. Spain has long felt that, since the United States is using military and strategic facilities here as part of its overall defense system, the United States should agree to come to Spain's defense in case of need.

On the American side the mood has been, since Vietnam, to steer clear wherever possible from involvement in foreign conflicts. Spain has had to settle for a fairly innocuous "security declaration" to the effect, according to the version reported here, that "each government will support the defense system of the other."

SOVEREIGNTY REEMPHASIZED

Up to now the American-built bases in Spain have been defined as "joint bases." Now the "Spanishness" and total Spanish sovereignty over the installation used by the Americans is reemphasized.

This presumably is largely as an exercise in semantics aimed at Spanish opinion, for in the previous agreements Spanish sovereignty over the bases already has been stressed in a variety of ways.

No American flag has ever flown over the bases and the overall base commander is always a Spanish officer.

Presumably, redefined Spanish sovereignty over the bases will not interfere with the American's operational freedom. Otherwise the bases would be purposeless.

Again for Spain in the new agreement is the civilian workers employed by the American military will be subject to Spanish labor legislation. Another is that American military personnel violating Spanish law will be judged by Spanish courts.

According to available information, Spain will receive a substantial amount of arms, including 36 Phantom jets and warships—largely secondhand to keep costs down. Export-Import Bank credits, reportedly $125 million over five years, will enable Spain to purchase tanks, halftracks, artillery, and helicopters.

The American-built Spanish bases complex consists of three air bases and Rota, the largest U.S. Navy installation in Europe. In addition there are lesser facilities for fueling, a protective radar system, communications relay stations, a 500-mile fuel pipeline.

Rota is an advanced base for Polaris submarines, a resupply point for the Sixth Fleet. It possesses an important naval communications center. Its antisubmarine warfare operations and shipping surveillance extend as far east as Crete.

DIVERSIFIED FACILITIES

One of the air bases, at Moron, has been inactivated. Zaragoza is used as a base for Air Force units in need of gunnery training, now that Wheelus field in Libya is no longer available. The third base at Torrejon is headquarters of the U.S. 16th Air Force.

A feature of the last phase of the negotiations leading up to the new agreement is that for the first time the Spanish Government briefed, in closed session, Spain's Parliament, the Cortes.

Opinion on the value of a continuing military relationship with the United States is divided. Some Spaniards say it bolsters the regime. Others (not in the government) point out that it was the bases deal with America that brought Spain out of isolation in the 1950's, opening the country to a liberalization trend evident in various spheres today.

There was a time when the Spanish Government seemed to be toying with the idea of going neutralist. But it is clear that Spain's military, who have the last say on the country's most important issues, wanted the new agreement even if it isn't all they wished.

Spain is allied to no other country. And even though this isn't a full alliance, it is seen as better than none.

Mr. CHURCH. In both countries, then, there was a serious movement to secure advance disclosure of the agreement the two Governments had negotiated behind closed doors.

In May of this year, Secretary of State Rogers visited Madrid. While there, an attempt was made to deliver to him a letter, signed by 120 prominent citizens of Spain, raising questions about the impending agreement. Signers included such distinguished Spaniards as Prof. Enrique Tierino Galvan, Carlos Zayas, Jose Maria de Areilza, Antonio Canellas Balcellis, Joaquin Ruiz-Gimenez, and Joaquin Satrustegui. An effort was made by the group to see Secretary Rogers, but the attempt was blocked by local security officials under orders from the Spanish foreign office. However, the letter was delivered to a member of the official party accompanying Secretary Rogers, and receipt of the letter was acknowledged over the signature of an Assistant Secretary of State. According to my information, the letter itself has been read by Mr. Rogers.

There is nothing inflammatory about the letter's contents. It is written in an educated style and tone. The cosigners suggested that the Spanish people be given an opportunity to discuss the purpose and need of the base-lease agreement—a request that differed little from that being made in the United States. In addition, the letter tactfully suggests that individual rights in Spain are somewhat less than fully developed. I ask unanimous consent to insert at this point the translated text of the letter and a list of the signers.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

(NOTE.—Given to Mr. William C. Rogers, Secretary of State of the United States of America, and to Mr. Gregorio Lopez Bravo, Minister of Spanish Foreign Office)

MADRID, MAY 1970.

(1) Highly qualified and representative sectors of Spanish public opinion cannot agree, assuming that U.S. bases in Spain are indispensable for western defense, that the Pacts concerning them, should be renewed in whatever manner, without the consent of the Spanish people.

The consent of the Spanish people is an indispensable condition, in our opinion, for any bases agreement to be legitimate, and to remain a legal act for the future. Nor can we agree to a renewal, unless the U.S. obligates itself effectively, and with the approval of its Senate, to repel automatically any aggression undertaken against us, by any country or bloc, because of the existence of the bases in Spanish territory.

(2) If Spain were part of NATO, as are other countries in Europe with American bases, there would be no doubt about the obligation of defense on the part of the U.S. and the armies of NATO, into which the Spanish armed forces would be integrated at all levels. But the obstacle to joining NATO, as with the Common Market, is that our political institutions would have to meet the following requirements:

(a) The adoption of effective guaranties of individual and group rights, including those of different regions; and the granting of a broad amnesty for political prisoners.

(b) The establishment of universal suffrage—free, secret, and direct—on the municipal, regional, and national level.

(c) The recognition of political parties to act as a channel for ideological differences, within legal limits.

(d) The existence of a freely elected Parliament which legislates in accord with public opinion, and which controls the work of the government.

(e) Free trade unions so that employees and workers can defend their respective interests.

(3) The present rulers have repeatedly and publicly recognized that conditions in the world and in Spain, as well as the strategy of the great powers, have changed substantially since 1953. Before such evidence, the democratic opposition, identifying itself with the country's wishes that Spain cease to be in a position of inferiority with respect to her national security, finds no excuse to justify delay in democratic evolution. Such an evolution, aside from its intrinsic benefits, would, by putting us on a level with the political institutions of the West, provide us with the fundamental benefit of being able not to participate in pacts or agreements which, by their nature, could becloud our prestige and which would, in any event, increase the risk of attack without at the same time covering adequately our national defense needs.

LIST OF SIGNERS

Miguel Angel Aguilar Tremoya; José Alonso Pérez; Josep Andreu Abelló; José María de Areilza, Conde de Motrico; Germán de Argumosa; Juan Artal; José Barbosa; Josep Benet Morell; Oscar Bernat; Cristóbal Cáliz Almirón; Jacinto Candelas; Antonio Cañellas Balcells; Jaime Carner Suñol; Gregorio Carrión; Jaume Casanovas Artigas; Xavier Castellá Andreu; Miguel Cid Cebrián.

Mr. CHURCH. The outcome for the letter's signers, I must report, was a harsh and costly one. The Franco government has imposed substantial fines, issuing decrees which, in effect, declare the signers guilty of contempt of the Government. The Minister of the Interior has ordered payments in amounts ranging from the equivalent of $360 to $1,420. Delivery of the letter to Secretary Rogers, according to these decrees, "prejudices the standing and the authority of the state in Spain."

I ask unanimous consent, Mr. President, that one of the decrees, in its English translation, issued to one of the signers, whose name I have stricken, be inserted into the RECORD at this point, along with a list of the names of those who have thus far been fined, together with the amounts of the fines in each individual case.

There being no objection, the decree and lists were ordered to be printed in the RECORD, as follows:

[Translation (Spanish)]

DECREE

In exercise of the powers conferred on me by Articles 18 and 19 of Law 45/1959 of July 30 (Law on Public Order), I have decided to impose, and I do impose, a penalty of Fifty Thousand pesetas on ——— ——— born in Barcelona on October 4, 1923, son of Mariano and Antonia, married, a lawyer, domiciled at Calle Muntaner 348, principal bis, second floor, Barcelona, as included in section 1) in conjunction with f) of Article 2 of the aforementioned Law on Public Order, because, taking advantage of the official visit which on the 28th and 29th of May the United States Secretary of State, made to the Government, Mr. Rogers was sent a document, in which his name appears and in which the policy maintained by both Governments is protested—a document which, because of its tone, context, and manner of presentation, necessarily prejudices the standing and the Authority of the State in Spain as well as in other countries, whereby he contributes to disturbing the coexistence of public order and community peace and to supporting covertly the spirit of disorder and subversion against the Public Authority [Government].

A period of grace of fifteen business days is allowed for payment, with remedy to be resorted to as provided by Article 21 of the sanctioning Law.

To be served as prescribed.

MADRID, *June 15, 1970.*

TOMAS GARICANO,
The Minister of the Interior.

Translated by Elizabeth Hanunian, Library of Congress.

STATEMENT OF FINES

(Other signers have not yet been served)

FINES OF 100,000 PESETAS

1. José Mc de Areilza.
2. Joaquín Satrústegui.
3. Enrique Tierno Galván

FINES OF 75,000 PESETAS

1. José Andreu Abelló.
2. Jaime Miralles.
3. Raúl Morodo.
4. Javier Muguerza.
5. Dionisio Ridruejo
6. Ramón Rubial.

Mr. CHURCH. The group so penalized, being prominent enough to fight back, has asked for legal advice and assistance from several legal groups in Spain, including the Madrid and Barcelona Bar Associations, the Barcelona Academy of Jurisprudence and Legislation, the Judicial Research Group of Madrid, and the Royal Academy of Moral and Political Sciences of Madrid, as well as international organizations which focus on the protection of human rights. In one of these appeals, it is contended that the letter to Secretary Rogers was lawful.

In a State governed by the rule of law—

The document asserts—

the citizen cannot be denied the right to disagree with the political acts of the Government—

Even those—

decisions that affect the country's security.

The appeal continues:

Moreover, when the decision of the Government is in the stage of discussion and the process of formation of the will of the Executive has not been brought to completion, as in the case under consideration, the [letter] does not impugn a definite act of the Government; it indicates the dangers and inconveniences that a definite decision, if it were to be adopted, on the question relative to the bases would bring about. It definitely tries to avoid a possible error of the Government.

There is also expressed in this revealing document the same fear which was shared, on the American side, by many Senators. Thus—

The renewal of the Bases—made by means of agreement or treaty—obviously implies, or may imply, a transfer of sovoreignty to the United States of America . . . In this case the country has a right to be informed, and the Spanish citizens have a right to expose not only the juridical, but also the social dangers that may be derived from an agreement so signed.

I ask unanimous consent to insert here in the RECORD a translation of this draft appeal to the Minister of the Interior to annul the decrees issued against the signers of the letter to Secretary of State Rogers.

There being no objection, the appeal was ordered to be printed in the RECORD, as follows:

APPEAL

Your honor:

——— states with due respect:

1. That he has been served the decision pronounced by Your Honor on the 15th of June, by virtue of which the fine of ——— pesetas, as comprised in section 1) in conjunction with f) of Article 2 of the Law on Public Order, because of being signer of the Note transmitted to The Honorable Gregorio López Bravo, Spanish Minister of Foreign Affairs and The Honorable William C. Rogers, United States Secretary of State.

2. And under protection of the provisions of Article 21 of the said Law on Public Order and other concordant provisions, resorts, by means of the present document, to the remedy of petition to Your Honor against the penalizing decision, and subsidiary of appeal before the Council of Ministers, based

on the elements that he states in the succeeding, showing that the decision appealed, on infringing the legal code, by undue application to the act punished of section 1) in conjunction with f) of Article 2 of the Law mentioned, falls under the provisions of Art. 48–1 of the current Law on Administrative Procedure, and should, therefore, be annulled.

3. The decision appealed affirms that the said Note "because of its tone, context, and manner of presentation, necessarily prejudices the standing and the authority of the State in Spain as well as in foreign countries, he contributes to disturbing the coexistence of the public order and community peace and to supporting covertly the spirit of disorder and subversion against the Public Authority [Government]".

4. In view thereof, the undersigned denies categorically that the text of the Note referred to may be interpreted in the sense that is attributed to it by the decision being appealed.

5. In the first place, the error that was made in the decision quoted by confusing "the standing and the authority of the State" with the political action of the Government should be pointed out. The Note in no way calls into question the standing or the authority of the State, but it expresses an opinion in respect to a concrete question—the possible agreement on the United States bases in Spain—and points up the dangers and inconveniences that, for the sake of the interest of Spain and the security of the Spaniards, have to be taken into account before that agreement, not yet set up or concretized, is concluded.

It is neither the standing nor the authority of the State to which the text of the Note refers, but the administration of the government of the State. In it, the rulers are furnished with opinions and elements of opinion which, skillfully or not, only show the honorable purpose of those who signed it to contribute to serving the interests of the country better.

6. What has been brought in the Note to the attention of its two addressees—the Spanish Minister of Foreign Affairs and the U.S. Secretary of State—is perfectly lawful; it lays open the fact that could have been published, since the Press Act in Article 2 declares the lawfulness of criticism of the political and administrative action when, in doing so, the institutions and persons are duly respected, as is rigorously done in the said Note, and no less in its "tone", "context", and "manner of presentation" all of which meet the strictest standards of respect that could be demanded and which hardly could affect the reputation nor the authority of the State.

7. If it is evident that in a State governed by the rule of law the citizen cannot be denied the right to disagree with the political acts of the Government, it is obvious that some government decisions that affect the country's security cannot be excepted from this rule. Moreover, when the decision of the Government is in the stage of discussion and the process of formation of the will of the Executive has not been brought to completion as in the case under consideration, the Note does not impugn a definite act of the Government; it indicates the dangers and inconveniences that a definite decision, if it were to be adopted, on the question relative to the Bases would bring about. It definitively tries to avoid a possible error of the Government. And the infallibility of governments is dogma only under dictatorial or totalitarian systems.

8. Upon indication of the maximum importance lodged in the question, the Note advocates that, if the American Bases in our country are indispensable to the defense of the West, the renewal of the treaties to which they refer may not be given without the consent of the Spanish people; a reasonable and just aspiration when the security of the Spanish people may be endangered, in line with which it will be opportune to recall that the Honorable Camilo Alonso Vega, then Minister of the Interior, said, in presenting to the Cortes the proposal that today is law, that "the Law on Public Order is the Magna Charta of social harmony [community peace] because it confirms the saying that what is good for the people is the highest law [salus populi suprema lex]".

9. In the Note the desire is expressed that the Spanish Army be integrated into the NATO Armies [Forces], thus falling in line with the big Western defense organizations, whereby the public order and community peace can hardly be impaired. These disappear sometimes when the countries are informed belatedly or poorly of governmental decisions that essentially concern them. But the citizens who put forward their observations and manifest their concern contribute to peace, stimulate community peace in every sense, and favor the establishment of one of the other when they are lacking.

10. At the same time, the petitioner [appellant] points out that Article 12 of the Statute Law of the Spaniards establishes, unequivocally, that "every Spaniard is held to express his ideas freely so long as they are not contrary to the order and form prescribed by the fundamental principles of the State". In this case, the Note sent simultaneously to Messrs. Rogers and Lopez Bravo falls within this juridically recognized freedom, and furthermore: it is a legal [lawful] criticism in the presence of a possible illegality [unlawful act] of the Government.

In effect, the renewal of the Bases—made by means of agreement or treaty—obviously implies, or may imply, a transfer of sovereignty to the United States of America. The wording of the two legal provisions—Point 4 of the Law of Principles of the Movement of 1958, and Article 2, Section 1, of the Organic Law of the State of 1967, especially this second fundamental legal norm, deny clearly and definitely the possibility of delegating or ceding sovereignty. It is evident that at the time the Conventions were signed in 1953, such provisions had not been promulgated, but that in 1970 an agreement or treaty in which cession or [sic] sovereignty is indicated cannot be signed. In this case the country has a right to be informed, and the Spanish citizens have a right to expose not only the juridical, but also the social dangers that may be derived from an agreement so signed.

In this manner the Note achieves two legal ends: one, to exercise the right to disagree with the procedure and the merits of a governmental political act, a legal [lawful] disagreement that at no time was clandestine and that in no case attempts to subvert the social order, to excuse violence, or to disturb the public order. It is evident that sections f) and i) of Article 2 of the Law on Public Order must be interpreted restrictively, otherwise any disagreement, as minimum as it might be with respect to the present Government would be impossible. Two, to anticipate—by demanding adequate information—a possible unconstitutionality of a governmental act as the signing of the agreements would be, by which the legal provision established in the aforementioned Art. 2, sec. 1, of the Organic Law of the State could be violated.

11. Not to coincide with the opinion or the criterion of a Government is not to embrace subversion; by no means. In that the countries of Western Europe, in which big sectors of public opinion oppose the policy of their Governments, are protected by a form of government based on the rule of law that guarantees them, and making use of some channels of expression and activity that permit and make possible, the mutual reciprocal influence between the different sectors of public opinion, which is one of the essential characteristics of any genuinely democratic system. It equally occurs in the United States where the polemics and the public mass demonstrations against the foreign policy of the Administration, in cases of declared war as in Vietnam, are in evidence, without the Government thereby feeling its security threatened.

12. There is nothing in the Note that would tend toward subversion. It simply contains useful elements for a serene dialog which, categorically alien to any violence, evoids the delay of an evolution toward democracy that our genuine integration into the Institutions of the European Community may make possible, because of which it is necessary to say literally:

"(a) Introduction of effective guarantees of individual and collective rights, including those of the political minority groups, and, consequently, the granting of full amnesty to persons arrested and imprisoned for political reasons.

"(b) Establishment of universal—free, direct, and secret—suffrage at the municipal, regional, and national level.

"(c) Recognition of political practices so that the ideological differences may be channeled within the limitations imposed by Law.

"(d) Existence of a Parliament freely elected by the country so that it may legislate in keeping with public opinion and check on the work of the Government.

"(e) Freedom of association in unions so that employers and workers may freely defend their respective interests."

13. In addition to the reasons stated, there are others that are sufficiently well known and that show even more clearly the lawfulness of what is said in the Note:

(A) In the national press so many opinions have been brought out in opposition to the extension [of the agreements] on the United States Bases in Spain without an effective and concrete guarantee of efficacious protection that their listing would be interminable. Authoritative publicists and politicians and strategists have expressed themselves in that sense. Suffice it to cite, as an example, the article published by José de Yanguas Messia in *ABC* of June 20 under the title "The Bases", in which reference is made to the opinions of Alberto Martín Artajo, General Martínez Campos, Fernando María Castiella, and others. The statements contained in the article alluded to, in opposition to the United States Bases in Spain, are no less categorical than the text of the Note to which this appeal refers.

(B) If what has been stated up to here would be little [not enough] to prove the lawfulness of the act penalized, the opinion of some member of the government itself can be invoked, who publicly affirmed that texts such as the Note under reference may be produced and signed in our country, and now. The Honorable Gonzalo Fernández de la Mora, Minister of Public Works, stated in an interview entitled "Statement at the Open Grave of the Most Brilliant Thinker of the Regime" that in Spain we are at liberty, among other things, "to deliver documents to a foreign Minister". Those statements were published in *Nuevo Diario* on June 14, and later reproduced in other national newspapers, therefore, seventeen days after the Note involved was delivered to its addresses, and, precisely, the evening before Your Honor pronounced the decision being impugned here. To be sure, the imposition of this penalty does not seem to be perfectly congruent with that clear statement by the Minister of Public Works, since it would obviously be contrary to all logic to interpret this statement of Mr. Fernández de la Mora's in the sense of affirming the merely physical

possibility of delivering the document or Note concerned.

(C) Furthermore, on the occasion of the recent official visit to Spain of the Minister of Foreign Affairs of the Federal Republic of Germany, Mr. Walter Scheel, as picked up by the entire press and other broadcasting media, the following Note was delivered to him:

Memorandum sent on April 24, 1970, to the Minister of Foreign Affairs of the Federal Republic of Germany, Mr. Scheel, with a letter signed by Messrs. Jose Maria de Areilza, Joaquin Ruiz-Gimenez, Joaquin Satrustegui, and Enrique Tierno Galvan, in which the viewpoints expressed during the interview held at the German Embassy on the 23rd at 9:15 a.m., are summarized.

(1) Very authoritative and representative sectors of Spanish public opinion are convinced that the development and the economic and political stability of our country largely depend on our relations with Europe going to be developed inside its Community Institutions.

(2) The basic difficulty is that, in order to do this, the political Institutions of our country would have to meet the following conditions:

(a) Introduction of effective guarantees of individual and collective rights, including those of the political minority groups, and, consequently, the granting of full amnesty to persons arrested and imprisoned for political reasons.

(b) Establishment of universal—free, direct, and secret—suffrage at the municipal, regional, and national level.

(c) Recognition of political parties so that the ideological differences may be channeled within the limitations imposed by law.

(d) Existence of a Parliament freely elected by the country so that it may legislate in keeping with public opinion and check on the work of the Government.

(e) Freedom of association in unions so that employers and workers may freely defend their respective interests.

(3) The democratic opposition identified with the country in its desire for political and social change, proves daily that, in spite of the promises of change made by the present régime, there is no progress in the order of things to justify the democratic language sometimes used by them. At the same time, recent statements of some of them openly contradict the said language.

(4) Similarly, the democratic opposition feels that, as to what the representatives of the major democratic countries are doing, is that they recognize the real and effective fact of the existence of sectors in Spain ideologically corresponding to the present currents of European political thinking and to the big parties that are representing them, alternatingly in the power [government].

(5) The criterion reflected in the four preceding sections coincides substantially with the democratic demands contained in the document addressed on December 23, 1969, by a group of Spaniards to the President of our Government—demands that merited a public statement of support signed by one hundred and three Deputies of the German Federal Parliament".

We beg to ask Your Honor what the reason is for the inconsistency of no penalty of any kind having been imposed on this document that was much more widely disseminated and that expressed the identical political thinking as the Note sent to Mr. Rogers because of which the penalty being appealed was pronounced.

14. In the decision being appealed it is stated, finally, that the Note to which this appeal refers contributes to "supporting covertly the spirit of disorder and subversion against the Public Authority [Government]." By sound logical interpretation, it is equivalent to affirming that there exists in our country, and at present, though it may be only latent, a spirit of disorder and subversion which, not existing, might hardly be supported. And the only possible conclusion is that the opposite is true of that which is constantly affirmed by all members of the Government, that peace is prevailing in Spain.

15. The preceding statements prove the justification of the present appeal being taken under advisement, without prejudice to the opinion of the Distinguished Bar Associations of Madrid and Barcelona, of the Royal Academy of Moral and Political Sciences of Madrid, of the Academy of Jurisprudence and Legislation of Barcelona, of the Juridicial Research Group of Madrid, and of other international Organizations specialized in the protection of human rights, who we are sure will confirm the thesis of the appellant.

By virtue thereof,

Your Honor is requested to consider the recourse of petition [appeal] filed against the decision, etc [closing statement in appeals]

Date ———.

To the honorable Minister of the Interior, Madrid.

Translated by Elizabeth Hanunian.

Mr. CHURCH. Mr. President, it is ironic that, in both countries, the Executive authority insisted on both negotiating the new agreement and putting it into effect, without benefit of public discussion or prior disclosure; also that in both countries an attempt was made to explore publicly the full implications of the agreement, but, in each case, the effort was ignored, neither government being willing to submit to such an open process.

In Spain, those who called for the inspection of the agreement before it was signed were punished.

Following the signing, the Senate Foreign Relations Committee still felt that the terms of the agreement needed to be clarified in public. Accordingly, the committee pressed the State Department for hearings, and these have now been agreed to. Under Secretary of State U. Alexis Johnson will appear and explain—perhaps "translate" would be a better word—the meaning of the agreement tomorrow, August 26. He will be questioned by the committee for 1 hour in executive session, followed by a 2-hour open hearing.

I ask unanimous consent, Mr. President, that several newspaper articles and editorials regarding the United States-Spanish agreement, a reprint of a Senate speech by Senator FULBRIGHT, and the agreement itself be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 24, 1969]

THE BASES ISSUE SEEN FROM SPAIN

(By Ward Just)

No noncommunist country in Europe has been so isolated from what we are pleased to call the Free World than Spain. Barred from NATO, barred from the Common Market, reviled by liberals everywhere for the endurance of the Franco regime, Spain continues to look inward. Spasms of political reformation are followed by suppressions. The Spanish anarchists at heart, plot long in cafes while the economy inches forward, the middle class grows, and memories of the war recede. She accommodates 19 million tourists a year (not a misprint), yet remains on the outside looking in—a condition which pleases many Spanish. Habitually distrustful of outsiders, Spain is now making her own evaluation of the four obsolete and obsolescent bases she leases to the United States. The lease, it seems, is not a one-way street.

In Congress and in the American press, the debate has centered around the Pentagon's role in negotiating the renewal. A secondary question has been the matter of alliance: do the bases, either in fact or in theory, commit the United States to Spain's defense? If they do, Senator Fulbright and others are arguing, then there ought to be a treaty. Treaties, as all the world must know, are ratified by the Senate. And no one here loves General Franco.

The quid pro quo most often mentioned is $150 million or so in military hardware, distributed to Madrid over the next five years in exchange for the leases. It is an old business, the "lease," for it requires the Spanish flag to fly over the bases and in language quite vague commits the United States to consult with the Franco regime if the bases are ever used. In fact, in the Lebanese crisis in 1958 and the Cuban missile crisis in 1962, the bases were "activated" with no prior notice to Madrid. That, according to a Spanish official here.

The core of the opposition to the bases (there are three Air Force bases, and one Naval base) here rests on two points: the first is that they are not militarily essential, either to the defense of Europe or the defense of the U.S., and the second is that they have the effect of propping up the Franco regime, now in its thirtieth year and bound to yield sometime soon. All this has had an extremely interesting effect in Madrid, which has its own split between liberal civilians and conservative generals. There is also something known as Spanish pride, which one trifles with at peril.

"We must not accept a 'dictat,'" said one recent editorial in *Ya*, a Madrid daily which reflects General Franco pretty much as Ronald Zeigler reflects President Nixon. "Anything but that, including the complete termination of the agreements renewed in 1963. Those agreements—as they were stipulated—have become too burdensome for us. Long range nuclear missiles have radically changed the situation from what it was when the agreements were subscribed. An alliance on equal grounds may be appetizing, but not the posture of an acolyte. We will not become a satellite country."

Going further: "Without adequate counter-measures against the dangers involved"—and here *Ya* means a signed treaty—"we believe that Spain should not renew the agreements with the United States. Analyzing the pros and cons of 15 years of 'agreements,' Spain has derived from them less advantages—many less—than the other side."

That last is arguable, since the bases have been at least one factor in the one-plus billion dollars in aid that has gone from the United States to Spain since 1950. But, as Spanish here put it, what kind of arrangement is it when the United States can rent land on which to emplace its weapons. Either there is a mutual security arrangement or there is not. As a Spanish Embassy official here puts it, it is 'inadmissible" to lease the bases without regard "for the risks the arrangements would entail for Spain." Quite correct. It is not enough, as the Pentagon argues, that the mere presence of American troops is an effective guarantee. If that is the intent, then there ought to be a treaty. "The 'era of rentals' has ended," *Ya* said, a bit pretentiously but accurately enough.

There is probably no regime in the world that provokes such passion as that of General Franco. He is something of a relic, with his civil guards and his censored press, something of a sore thumb on the manicured hand of Europe, and no matter that his regime differs not a whit from some of the most eminent of America's allies. The Spanish Civil War, one of the great confused ideological struggles of all time, is still the

benchmark of good guys versus bad for a good many people, here as in Europe. A number of Western observers in Spain have argued that the American presence, symbolized by the bases, has been helpful in nudging the regime from right to center. It is argued that the modest liberalization that has occurred is the result of American influence, and part of it the personal contact between the American military and the Spanish. Perhaps. It is a plausible argument.

With some heat, Spanish officials here and in Madrid categorically reject the notion that the bases, or the 10,000 Americans which now reside on them, would ever be used in the event of internal disorders in Spain. "Gratuitiously offensive," is the way one Spanish official here put it, "and detrimental to Spanish sovereignty."

One recalls the 1936 Spanish war, which became a laboratory for experimentation by the Soviet Union and Nazi Germany, among other nations. The test for the bases ought to be their use to the United States. If they are found to have no use, then they should be abandoned. If they are found to be essential to American or European security, then they should be negotiated, and the negotiations should be in the context of a treaty. But the Senate ought to look very carefully at the implications of a treaty now with Spain, as the Franco era draws to a close with no certain successor. If any people in the world have the right to work out their own affairs without interference it is the Spanish. It did not happen that way the last time.

[From the St. Louis Post-Dispatch, June 27, 1970]

U.S. MILITARY PRESENCE IN SPAIN TO CONTINUE

(By Richard Mowrer)

MADRID, June 26.—Spanish acceptance of a five-year extension of the United States military presence in this country is a certainty. New accords should be ready for signing in July.

Negotiations have been slow because of the wide range and complexity of the new accords rather because of any holding back by either party. There is determination by both sides to reach agreement.

The quickening pace of Soviet military involvement in the Mediterranean and along the rimland of northern Africa is contributing to this resolve. So are the storm clouds gathering over Spanish Sahara, in the shape of a co-ordinated threat by Morocco, Mauretania and Algeria to "liberate" the phosphate-rich territory.

Spain has no alliance with anybody and therefore is reluctant to scrap what it has: defense agreements with the United States.

These are not a military alliance in the full sense of the term, which is what Spain would like. However, since 1953 the agreements have helped Spain build up and modernize its armed forces; and although the United States is not bound to come to Spain's aid in the event of foreign aggression, it is committed to protecting the joint military installations in Spain.

The bases deal signed in Madrid in 1953 was renewed in 1963 for five years. In 1969 protracted negotiations for a further five-year extension broke down when the Spaniards set an unacceptable price in terms of military aid and political commitment. A two-year extension finally was agreed on, based on payment to Spain of $50,000,000 plus $35,000,000 in credits pending new negotiations.

This spring the talks got off to a fresh start with a new team on each side: a Republican administration in Washington and a new foreign affairs minister, Gregorio Lopez Bravo, in Madrid. There was better preparation all around, with Washington showing deeper understanding of the importance of the personal approach when dealing with Spaniards. In Madrid there was awareness of the American mood, shaped by Vietnam, regarding foreign entanglements.

On the American side, it is felt that Spain's strategic importance has soared because of the growing Russian menace in the Middle East and the Mediterranean, France's defection from the North Atlantic Treaty Organization in 1966, and now the loss of Wheelus air base in Libya because of the take-over of the country by a military junta.

Availability of Spanish air space is regarded by the United States Air Force as essential to the continuing support of U.S. commitments in the Mediterranean basin as far east as Turkey. A communications complex in Spain is part of a world-wide system on which Polaris submarines, including those stationed in the Mediterranean, depend. With Wheelus gone, the Air Force has switched to Spain for the fair weather gunnery practice its units in Europe require.

On the Spanish side there is underlying resentment that, whereas the accords with America tie Spain to the West's defense, Spain continues to be denied membership in NATO and a full-fledged military alliance with the United States.

Another sore point is the imposition by the United States of limits on the use of war materiel sold or lent to Spain. These curbs are a serious handicap to military planning for contingencies such as trouble in Spanish Sahara. This is why Spain recently has turned to France for the purchase of 30 Mirage fighters and 50 AMX tanks and is negotiating with West Germany for 200 Leopard tanks.

Nonetheless, negotations over weaponry appear to have broken out of deadlock. The army and navy components of the new agreements are settled. What the Spanish army will get is not divulged, but it is known that the navy will obtain six or eight U.S. destroyers and two conventional submarines, on loan The Spanish Air Force is dickering for the acquisition of Phantom jets.

Spain has given up demanding a U.S. military commitment in terms of a treaty. However, a joint declaration on security faintly reminiscent of one made in 1963 is expected. The declaration of 1963 said that a threat to either country would be a matter of common concern and each country would "take such action as it may consider appropriate within the framework of its constitutional processes."

Denied a firm military alliance, Spain is seeking a formula that would make the joint Spanish-American facilities in Spain—three air bases and the big naval station at Rota—by definition 100 percent Spanish.

There does not appear to be any intention on Spain's part of interfering with the operation of the bases by the American forces assigned to them as part of the defense of the West. However, the Spanish negotiators do attach importance to a new formula that would stress the Spaniards' sovereignty in their own land.

How to reconcile American operational requirements with a new, tighter definition of Spanish sovereignty over the base is a problem. But the negotiators do not regard it as unsurmountable.

In their slow progress, the current talks do not reflect discord so much as a lot of hard work. They include proposal for American cooperation and assistance in such nonmilitary realms as education, scientific research, agricultural development and economic investment.

According to estimates, the entire package deal will cost the United States between $200,000,000 and $300,000,00, spread over five years. Two years ago military aid totaling a billion dollars had been mentioned. Spain this time has avoided putting a dollar sign on everything.

[From the New York Times, July 28, 1970]

VAGUE PLEDGE TO FRANCO

After the long and divisive debates about the legal and constitutional bases for United States military actions in Indochina, the last thing the Nixon Administration ought to be considering is another vague overseas defense commitment. It appears ready, however, to sign a pledge to "support the defense system" of Spain in return for continued use of air and naval bases there.

Some members of the Senate Foreign Relations Committee say they are not clear, even after briefings from high-ranking State and Defense Deparmtent officials, just what would be involved in such a commitment. Neither are we. Nor is it clear exactly what is meant by the pledge that "both Governments will make compatible their defense policies"—more language from the draft agreement expected to be signed in a few weeks.

On one interpretation, the pledge of support for Spain's defense system could be considered stronger than the statement in all Spanish-American military agreements since 1953 that an attack on either country would be a "matter of common concern." In any case, before the agreement is signed, the Foreign Relations Committee ought to insist on clarification of its meaning and consider whether such a commitment should not be made in the form of a treaty, subject to Senate approval.

In fact, Congress should go further and raise the question whether the long-run interests of the United States are served by any renewal of military arrangements with the regime of Generalissimo Franco, now 77 and facing increasing opposition. A group of 120 members of this opposition argued in a petition to Secretary of State Rogers in May that it was unwise for this country to sign this kind of agreement with a regime that made such decisions without consulting its people.

Many among these opponents may be influential in future Spanish governments. Congress should weigh their arguments against the short-run military advantages of the bases in Spain while there is still time to reconsider the agreement with the Franco regime.

[From the New York Post, Aug. 6, 1970]

FRANCO AND FRIENDS

Illustrating the attraction that dictatorship seems to hold for the shapers of U.S. foreign policy, the Nixon Administration today is signing a lavish military agreement with the law and order regime of Generalissimo Franco in Spain.

The deal apparently works this way: the Spanish get 36 used F–4 Phantom jet fighter-bombers, five destroyers, two submarines and four minesweepers, plus other vessels and Army equipment. In return, we get to keep three bases in Spain which we don't need plus the peril of being vaguely committed to a country whose government is abhorrent to democracy.

Chairman Fulbright (D–Ark.) of the Senate Foreign Relations Committee exposed and unsuccessfully protested the deal, eliciting official reactions that simply confirmed his arguments. The State Department complained he was releasing privileged information and Senate Minority Leader Scott (R-Pa.) warned against statements that "would greatly offend the people of Spain." What about the many Spaniards longing for freedom to whom the Franco regime and its U.S. supporters in high places have just given arrogant offense?

UNITED STATES TO GIVE SPAIN ARMS

(By Gene Oishi)

WASHINGTON, August 6.—Despite Senate objections, the State Department formally agreed today to provide Spain with about

$200 million worth of military equipment, in addition to 16 naval ships, in exchange for allowing the United States military to maintain bases in the country.

The five-year agreement was signed today by Gregorio Lopez Bravo, the Spanish foreign minister, and William P. Rogers, Secretary of State. In a joint statement, they said that the new agreement—which extends the 1953 U.S.-Spanish defense agreement—"initiates a new era in partnership between the United States and Spain.

The signing widened the rift between the administration and the Senate Foreign Relations Committee, particularly its chairman, Senator J. William Fulbright (D., Ark.), who has insisted that the agreement be submitted to the Senate as a treaty.

CROSS EXAMINATION

After a meeting of the committee this morning, Senator Frank Church (D., Idaho), one of its members, said that the panel has decided to hold a public hearing so that administration officials could be cross-examined on what the agreement actually means.

The State Department, meanwhile, made the text of the agreement public, and U. Alexis Johnson, under secretary of state for political affairs, sent a letter to the Foreign Relations Committee, saying that the agreement does not constitute a commitment on the part of the United States to go to the defense of Spain if it is attacked.

The agreement states that the two governments recognize "that the security and integrity of each of the two countries continues to be a matter of concern to the other." It also contains such phrases as "each government will support the defense system of the other" and "the government of the United States agrees to support the Spanish defense efforts."

U.S. LIMITS

Mr. Johnson, however, said that the U.S. commitment is limited to providing Spain with military equipment and training and to helping Spain modernize its defense industries.

Under the agreement, the United States will continue to have the use of air bases in Torrejon, Zaragoza and Moron and a naval base at Rota.

In exchange, the United States will provide Spain with $120 million worth of credits to buy 36 used F–4C Phantom fighter-bombers, 2 KC–130 tankers, used for in-flight refueling, 3 P–3 antisubmarine patrol planes, 8 helicopters, and 6 C–130 transport planes.

The United States, in addition, would give Spain $21 million worth of land weapons, including 54 M48 tanks, 66 howitzers, 60 armored personnel carriers, 16 helicopters and a dozen 175mm. guns.

LOAN 16 SHIPS

The agreement also provides that during the next five years, the United States will lend 16 naval ships to Spain, including 2 submarines and 5 destroyers. These ships are currently in active service in the U.S. Navy, but are scheduled to be deactivated within the next five years.

Other benefits Spain would receive under the agreement include $1 million a year in military training, a U.S. contribution of $35 million for modernizing a joint aircraft control and warning system, an unspecified amount of machine tools for making munitions and the Rota-Zaragoza pipeline, built by the United States at a cost of $25 million.

Administration officials could give no precise dollar figure on the benefits Spain will receive under the agreement, and the $200 million figure is only a rough approximation. The value of naval ships—which originally cost $88 million—is not included in the figure, nor is the residual value of the bases, which the United States agreed to relinquish when the agreement terminates.

The original cost of the bases was estimated at $400 million and administration officials estimated their residual value as $100 million.

FULBRIGHT ESTIMATE

Senator Fulbright, after studying the agreement, earlier estimated its cost to the United States as $400 million over the five-year period.

In addition to defense provisions, the agreement covers numerous other fields, including education, agriculture, environment, space and science and technology.

The agreement also calls for an increase of $3 million in fiscal 1971 for non military programs, primarily for providing more Fulbright scholarships to Spanish students and scholars to study in the United States.

NIXON-SENATE FEUD SEEN: UNITED STATES, SPAIN SIGN AIR BASES AGREEMENT

(By Ronald Sarro)

The United States and Spain have signed a five-year, defense-oriented "executive agreement" described by diplomats as a "positive contribution" to world peace, but fueling a major political war between the Senate and the Nixon administration.

The agreement extends U.S. rights to use three air bases and a navy base in Spain, which houses key U.S. air, sea and defense installations, while providing millions of dollars in military aid to the Franco government.

As Secretary of State William P. Rogers and Spanish Foreign Minister Gregorio Lopez Bravo signed the pact at the State Department late yesterday, it was described by a key senator as "an end run around the Senate."

The Senate Foreign Relations Committee, supporting its chairman J. William Fulbright of Arkansas, has insisted the agreement be submitted as a treaty, requiring Senate ratification, and demanded public discussion of its provisions and explanations of why the "executive agreement" route was used.

Sen. Frank Church, D-Idaho, speaking after the committee met on the matter, said, "I don't approve of secret dealings with the Franco Government." He said most members of the committee want the agreement reviewed publicly.

"There is no question but that the administration is trying to pull an end run around the Senate and we cannot permit this," Church said. All treaties must be ratified by two-thirds of the Senate, while executive agreements require no congressional action.

U.S. officials acknowledged that the arrangement with Spain is this nation's only executive agreement covering mutual defense considerations. Other defense-type agreements are covered by treaties. There are at least two other executive agreements with nations.

During negotiations on the agreement, the United States is said to have made clear to the Spanish government that the agreement did not include a commitment for the defense of Spain.

Undersecretary of State U. Alexis Johnson, addressing Senate concern over language in the defense section of the agreement, said it "contains no language such as is found in our bilateral and multilateral defense treaties."

"It is not provided that an armed attack against one party shall be considered an attack against the other," said Johnson. He said that if there were bilateral mutual defense commitments, a treaty should be submitted to the Senate.

"However, as I have stated before, the proposed agreement contains no such commitment," Johnson said.

Fulbright has contended that the agreement would cost the United States, directly and indirectly, about $400 million over the five years. Based on an explanation of the agreement, costs were difficult to pin down because of varying ways they can be summed up.

The Senate Foreign Relations Committee said it would hold public hearings on the agreement, at which its provisions and justifications for an "agreement" over a "treaty" would be discussed.

Last night, Fulbright sent a letter to Rogers asking that a representative of the State Department appear before the committee to discuss the agreement. The committee hearings could start in a week or two.

The new agreement becomes effective Sept. 26 after an old pact, first negotiated in 1953 and renewed and modified periodically since then, expires. Since the chief diplomats for both the United States and Spain have signed the agreement, there apparently is little the Senate can do about it.

"Once an executive agreement goes into effect, I don't know how we can recall it as an amendment to a bill," Senate Democratic Leader Mike Mansfield commented. Fulbright has sponsored such an amendment to the defense authorization bill.

KEY PROVISIONS

Under terms of the five-year agreement, the United States agrees to:

Loan 16 naval war ships, which would get as they are deactivated by the U.S. Navy. Officials said the ships, some built in World War II, cost $88 million when new. Congress must approve the loan of 2 submarines and 5 destroyers included.

Apply $120 million in Export-Import Bank credit to allow Spain to buy 36 used F4C Phantom fighter-bombers for $55 million as they are phased out of U.S. operation, and allow application of the balance of the credit to the purchase of 13 new airplanes or helicopters and command network equipment, as Spain chooses to purchase them.

Seek congressional approval to pay $35 million of the cost of a $50 million aircraft control and warning system in Spain, which the United States expects it will use 70 percent of the time. Spain would pay the balance.

Ask Congress to approve military grants totaling $25 million over the five years, including $21 million in new and used tanks, howitzers, armored vehicles, helicopters and big guns, and including $4 million to train the Spanish to operate U.S. equipment.

Establish a joint committee of defense composed of the foreign minister of Spain and the U.S. ambassador to Spain, with permanent headquarters in Madrid and with responsibilities including preparation and presentation of "an annual plan to facilitate making compatible their respective defense policies in areas of mutual interest" under the agreement.

Relinquish to Spain the Rota-Zaragoza pipeline, built by the United States at an original cost of $25 million, but used by it only 25 percent of the time. The United States would retain rights to use the line free of charge. The United States is giving up $5 million in profits from Spanish companies who would have paid for use of the line over the agreement's five years.

Relinquish all rights to claims against the Spanish government for residual value of permanent structures, which the United States built in Spain at a cost of $400 million over the years, because anticipation of such collections from other nations is unrealistic, according to officials.

Make available to Spain machine tools for munitions manufacturing. Details must still be worked out.

Major expansion of cultural exchanges, joint research particularly in civilian use of atomic energy and space, advanced training of Spanish professors particularly in science, and expanded joint ventures and cooperation in other areas ranging from the environment to television.

Funds up to $3 million in new commit-

ments for non-military projects in fiscal year 1971, with the added annual funding for the balance of the five-year agreement to be worked out as projects are proposed.

The bases that the United States will continue to use are Torrejob Air Base, Zaragoza Air Base, Moron Air Base, and Rota Naval Base. Use of the petroleum pipeline and storage also are covered, as well as communications and navigational facilities. The U.S. has 10,000 personnel stationed in Spain.

NEW PACT WITH UNITED STATES GIVES SPAIN INDIRECT NATO TIE

(By Murrey Marder)

The United States and Spain signed a new, broad, military and "friendship" accord yesterday that gives Spain a back-door link to the North Atlantic Treaty Organization.

Spain, despite energetic support by the United States, has been barred from NATO membership because of opposition to the regime of Generalissimo Francisco Franco, with Denmark and Norway as the most vocal opponents.

Publication of the new five-year accord, signed as a presidential agreement rather than a treaty that requires Senate consent, revealed that Spain now has gained an indirect "tie-in" to NATO, through the United States.

The linkage to NATO defense planning did not emerge earlier in the hot dispute between the Senate Foreign Relations Committee and the State Department over the current accord.

Under the accord, a joint U.S.-Spanish defense committee would be created, which would include the commander-in-chief of the United States European Command. This title is the "American hat" worn by NATO's supreme commander, currently Gen. Andrew J. Goodpaster.

Secondly, the agreement specifies that the two nations will cooperate on "security arrangements for the Atlantic and Mediterranean areas" and "endeavor to work out by common accord the liaison" necessary for that purpose. How NATO reacts to that remains to be seen.

Secretary of State William P. Rogers and Spanish Foreign Minister Gregorio Lopez Bravo hailed the multiple accord they signed yesterday, saying it "initiates a new era in partnership" between the two nations.

Sen. Frank Church (D-Idaho) assailed the agreement as an "end run around the Senate," adding: "I don't approve of secret deals with the Franco government, particularly of the kind that could involve us in war."

Since the United States first gained base rights in Spain in 1953, all extensions have been executive agreements. But the Indochina warfare has aroused Senate sensitivities about all U.S. defense accords.

The Senate Foreign Relation Committee, led by Chairman J. William Fulbright (D-Ark), is trying to make the Nixon administration submit the pact to the "advise and consent" procedure required for a treaty. The committee agreed yesterday to press for an open hearing as well as another closed hearing.

Church, speaking for the committee, said: "It is the strong feeling of a large majority of the committee that an agreement of this kind should have been the subject of a formal treaty, that hearings should have been held, that it should have been fully debated in the Senate and ratification voted on in the normal manner.

"There is no question but what the administration is trying to pull an end run around the Senate and we just can't permit that."

Fulbright has claimed that in addition to extending the use of base facilities in Spain for U.S. forces, the "direct and indirect" costs of the agreement in American military equipment and credits amount to "near $400 million over five years."

U.S. officials insist the cost is nowhere near that sum—but they decline to state any total of their own. They say the costs cannot be added up now for a five-year term.

Among the acknowledged costs and U.S. credits, however, are $120 million in Export-Import loans for Spain to purchase 36 F-4C Phantom fighter-bombers and other aircraft; $35 million in U.S. funds to modernize Spain's aircraft control and warning network; $25 million over five years for military equipment and training grants; the loan of 16 U.S. warships and naval auxiliaries; a grant of "excess" U.S. Army machine tools; a relinquishing of $5 million in U.S. profits on operating a pipeline; perhaps $15 million over five years for educational exchanges and other projects. In addition, Spain eventually will acquire the U.S. bases now in use, built at a cost of about $400 million.

The critical issue in the dispute with the Senate, however, has been whether the new agreement represents a new U.S. security "commitment."

The United States now has more than 10,000 military personnel in Spain.

There is no "commitment by the United States to defend Spain" in the current agreement, Under Secretary of State U. Alexis Johnson said yesterday. The accord, he said "contains no language such as is found in our bilateral and multilateral mutual defense treaties," nor does it violate the commitments resolution passed by the Senate last year.

The administration contends that the language tieing the United States to Spain's defense has been diluted from earlier agreements with Spain. The new language is indeed murkier, but the organizational structure of the U.S.-Spanish defense relationship is now admittedly stronger.

The accord says:

"Each government will support the defense system of the other and make such contributions as are deemed necessary and appropriate to achieve the greatest possible effectiveness of those systems to meet possible contingencies, subject to the terms and conditions set forth hereinafter."

But Senate critics insist the structure of the agreement converts it into "a de facto military treaty."

The accord signed yesterday is officially labeled an "Agreement of Friendship and Cooperation." It contains sections on educational, cultural, scientific, technical and agricultural cooperation, plus defense, which is the real centerpiece.

Under Secretary Johnson emphasized the strategic value of retaining U.S. air bases at Torrejon, Zaragoza and the standby Moron Air Base, and most importantly of all, the Rota naval base, which, he said, provides "maximum coverage for our Polaris-equipped submarines."

The newly admitted "tie-in" to NATO, via the United States, was acknowledged by officials on a background basis to newsmen. But the long-range intent to provide Spain with direct membership in NATO was publicly reiterated.

Said Johnson: ". . . We have always viewed Spanish entry into the North Atlantic Treaty Organization, when that should prove possible, as the preferred solution for the defense of all of Western Europe, including Spain. Indeed, the Spanish government shares this view."

[From the New York Times, Aug. 9, 1970]

DISSENT OVER U.S. ACCORD WITH SPAIN

(By John W. Finney)

WASHINGTON.—While Senator J. W. Fulbright fumed on Capitol Hill, Secretary of State William P. Rogers and Spanish Foreign Minister Gregorio Lopez Bravo sat down smilingly at a table on the eighth floor of the State Department last week to sign an agreement giving the United States another five year lease on air and naval bases in Spain.

In the testy, almost hostile relationship developing between two presumably co-equal and hopefully cooperative branches of the Government, the State Department had scored a diplomatic coup against the Senate Foreign Relations Committee and its chairman, Senator Fulbright. On Monday Senator Fulbright had stood up on the Senate floor to announce that he would seek through a legislative rider to the military procurement bill to force the Executive branch to submit the agreement as a treaty to the Senate. On the same day the two Governments decided to sign the long document, drafted as an executive agreement not requiring Congressional approval, on Thursday before Senator Fulbright could mount his legislative attack.

FULBRIGHT UPSTAGED

But aside from upstaging Senator Fulbright, which more and more seems to be the deliberate intent of the White House, the Administration also may have established an important constitutional point, namely how impotent Congress can be in checking the power of the Executive branch to enter into foreign commitments without Congressional consent.

With considerable support from within the Foreign Relations Committee, Senator Fulbright had made the new Spanish agreement into a test case in the constitutional struggle between the Executive branch and the Senate over their respective foreign policy making powers.

Senator Fulbright's objection was not so much with the cost of the agreement, although the renewal of the lease will be expensive for the United States.

Rather, his objection was that the Executive branch should not be permitted to enter into an arrangement which could eventually lead to American defense of a foreign government without first obtaining Congresssional authorization. In the case of Spain, he contended, that was precisely what the Administration was attempting to do by entering into an agreement that was not made public until after it had been signed and gone into effect.

EARLIER RESOLUTION

The principle enunciated by Senator Fulbright was one that the Senate Foreign Relations Committee has been seeking to establish ever since the Senate more than a year ago passed the National Commitments Resolution calling upon the Executive branch not to enter into foreign commitments—defined to mean the use of American troops in foreign hostilities—without obtaining affirmative approval of Congress. That had been followed by the amendment last year to the Defense Appropriations Act prohibiting the Administration from committing American ground troops to Laos or Thailand. And then this year there was the Cooper-Church amendment limiting the President's authority to engage in military actions in Cambodia.

With his objections to the Spanish agreement, Senator Fulbright was attempting to carry this principle a step further by applying it in a prospective, preventive sense to a peacetime arrangement. If there was one lesson to be learned from Vietnam, he observed, it is that "a commitment today which requires the spending of money and results in the stationing of our troops on foreign soil contains the prospect that sometime in the future it might require the spending of American lives." The Spanish agreement, therefore, he argued, was a test case of whether the Senate intended to enforce and the Executive branch to observe the spirit of the National Commitments Resolution.

Whether the Spanish agreement contains a military commitment is a matter of varying interpretation between the State Department and the Senate Foreign Relations Com-

mittee and perhaps even between the United States and Spanish Governments. In conditional terms, the United States agrees to "support the defense system" of Spain.

In a statement to the Senate Foreign Relations Committee last week U. Alexis Johnson, Under Secretary of State for Political Affairs, contended that the Spanish agreement entailed no commitments comparable to those provided in various mutual defense treaties or as contemplated under the Senate definitions of the National Commitment Resolution. To skeptical Senators, his wording was significant, for Mr. Johnson, on behalf of the State Department, was not stating categorically, at least for the public record, that the agreement contained no commitments at all to the Spanish Government.

All that was intended with these words about supporting the defense system of Spain, Mr. Johnson explained, was that the United States would help modernize the Spanish armed forces and munitions industry. Then to drive home his point that no commitment was intended, Mr. Johnson said that was why the Administration had chosen an Executive agreement rather than a treaty which might have given the impression that formal commitments were involved.

SEMANTICS

But it is just this sort of semantics that has made members of the Senate Foreign Relations Committee skeptical about the way the State Department gets the country entangled with foreign nations. An Executive agreement can be as comprehensive and as binding as a treaty, as President Roosevelt demonstrated in entering into the destroyers-for-bases deal by Executive treaty with Britain. The choice of whether to enter into a treaty or Executive agreement lies with the Executive branch and one probable reason that a treaty was eschewed in the Spanish agreement was that things might have been said in Senate debate on a treaty that would have offended the sensitive Spanish Government.

But in this constitutional struggle, the Spanish agreement demonstrates that the initiative and thus the power still rests with the Executive branch. Now that the Executive agreement is signed, the Senate has been confronted with a *fait accompli*, which is not likely to be reversed by, say, any Fulbright amendment.

Still the Foreign Relations Committee did not come away completely empty-handed in the Spanish affair. If the constitutional balance is to be redressed, it probably will not be by neat legislative boundaries laid down by Congress but by political pressure and criticism that forces the Executive branch to reconsider and sometimes to retreat.

In some ways that is what happened in the drafting of the new Spanish agreement. By its objections, the Senate Foreign Relations Committee forced the Administration to drop the 1963 language which the Spaniards wanted retained. And by its resistance, the committee undoubtedly helped the Administration to reduce the leasing price from the original $1-billion figure set by the Spanish Government.

[From the CONGRESSIONAL RECORD, July 31, 1970]

SPANISH BASES

Mr. FULBRIGHT. Mr. President, this morning's New York Times published a news dispatch by Richard Eder date-lined Madrid. This account reports that the Spanish base agreement was submitted to the Foreign Relations Commission of the Spanish Cortes.

I do not believe it has been finally signed by our Government, but the substance of it has been agreed upon. A copy of the agreement was discussed informally before an executive meeting of the Committee on Foreign Relations last week relating to a renewal and extension of the Spanish bases agreement.

The lease for these bases was originally made in 1953, and extended in 1963. Now, we come to an extension of 5 years, involving a great many new undertakings.

There are two or three things about this news account I wish to call to the attention of Senators. The news account reports the agreement has been submitted to the Foreign Relations Commission of the Spanish Cortes. As Senators know, the Cortes is something less than independent; and it certainly is not as independent as the Senate and Congress. Yet the agreement has been submitted to them for their approval. As far as I know they do not have the same constitutional provision we have with regard to consent of the Senate to a treaty.

The point I make is that this is a very important treaty. The news account outlines some of its provisions. There is reference to credits of $125 million, plus an outright grant of $20 million. I thought it was $25 million but the article states $20 million in cash, I believe each year. There is also reference to the sale of a number of F–4 phantom jets. This account does not purport to give all the details but apparently they have the right to buy 36 phantom jets for many millions of dollars. Their worth is estimated at more than $100 million.

The article states that "a squadron of 25 new F–4–E's, the only model still in production, would be about $110 million to $120 million. The ones being sold and offered to Spain are used F–4 jets and are certainly operable.

The point I make is that this type of agreement should be submitted to the Senate in the form of a treaty. I have asked our State Department to submit it as a treaty. They have not finally decided one way or the other, although the reluctance to make a decision would indicate that they do not intend to submit it as a treaty. Among other reasons they allege they are afraid it might be delayed in the Senate. I could not guarantee it will not be, but I can guarantee it will receive the immediate attention of the committee; and the committee will be given the opportunity to vote on it, and I see no occasion for any delay.

This is not the kind of matter that is normally subjected to delaying tactics, and on this occasion I again urge the administration to submit this agreement to the Senate for its approval. It is not only the material things which are involved such as the money and the planes; it is the significance of the treaty as a security undertaking. In other words, are we to understand from this treaty that the United States obligates itself to come to the assistance of Spain in case of difficulty? This is tied in precisely with the commitments resolution which this body adopted last year. It is relevant to much of the debate with regard to the current bill for military procurement.

The Senator from Mississippi, the Senator from Arizona (Mr. GOLDWATER) and others have said that if we are ever to make any reduction in our military establishment we must tailor our agreements and our obligations to fit those reductions. With that principle I agree. Here is an example where there is an opportunity for the Senate to tailor these obligations, but it is denied by the procedure followed by the Executive. The Senate is to be denied the opportunity to pass on the nature of this agreement and whether or not it is in our interest to make it.

Even in Spain there is a difference of opinion as to the full effect of the language of the agreement.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that I may proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, I will read a part of the language in the article:

"Although much of the Spanish press has commented on what it terms the meager amount of aid being offered by the United States, most have reported that the American commitment to defend Spain . . ."

I emphasize those words "to defend Spain."

"Has been increased from the terms of the 1963 joint statement, which declared that 'a threat of either country would be a matter of common concern.'

"Some sources familiar with negotiations take the opposite view. A phrase referring to United States agreement to 'support the defense system of Spain' does not necessarily involve anything more, they say, than the furnishing of equipment and technical assistance."

Mr. President, that illustrates clearly the differences of view here. What is the purpose of hearings before the committee and debate on the floor of the Senate but to determine what it does mean? One of the secretaries or assistant secretaries could come before the committee and say, "In our opinion this is not a security agreement," or "In our opinion it does not mean we go to their assistance, and send arms in support." On the other hand some people will say, "Look at the language." Here is what it states: "We have to go to their assistance."

We were confronted with the same type thing in connection with the Gulf of Tonkin. Secretary of State Rusk said, in effect, "The purpose of this is to prevent a wider war or any war." The President himself in the White House said, in effect, "If you do this it will show unity. There will never be a war. The North Vietnamese will never challenge this great country. All we have to do is to show unity, get behind the President, and there will not be any war." That is the purport of what he said. Look at the hearings and look at what the Secretary of State said before the Committee on Foreign Relations:

"If you quickly pass this and show unity the North Vietnamese will not challenge the United States. We are too powerful. This is the way to bring this unfortunate conflict to a close."

In this case the likely development would be that in case of trouble in the future we will be confronted with the statement that we agreed to support the defense system of Spain, and that it is clear what the language means. It would be said that we have the commitment and it is our duty to send the men and the money.

This Spanish agreement is a classic example of how to enlarge the commitments of this country by secret agreements and executive agreements without the approval of Congress.

I close with this thought. It is the responsibility of the Senate, and I think it is the duty of the Senate under the Constitution, to insist that agreements of this kind which may result in the creation of an obligations to go to the defense of a foreign country with men, money, and arms, be passed upon by the Senate. I do not assert that this agreement should be turned down or that it is improvident; I have my reservations about it but I say without question it is the responsibility of the Senate to exercise its duty and its responsibility in examining it and to come to an understanding, at least the majority of this body, as to what it means, the significance of the kind of undertaking that is being negotiated in the agreement and whether to approve it or disapprove it.

I do not see how any other course could be acceptable to the Senate. To proceed to this kind of commitment on the basis of an executive agreement, in secret, without any approval of the Congress, would I think be

unconstitutional. I grant that the decision as to where one draws the line between executive agreements and treaties is not a clear one, but I think this is so far on the side of an important engagement that there is no question about it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. I hope the administration will send it up as a treaty.

Mr. JAVITS. Mr. President, if the Senator from Arkansas would bear with me a moment, I wanted to ask him to yield, and I wanted the floor in my own right also, I would like to make a comment on what he has said now.

As a member of the Foreign Relations Committee, I believe the Senator from Arkansas is right about the fact that because it might be uncomfortable to a dictatorship, to wit, Franco Spain, is no reason why we should not bring this up rather than make a deal with a dictatorship relating to bases. The Senator is right when he says that if our society is to mean what it says, we have to be straight and honorable and courageous enough to face whether the people have confidence in the executive and support him or not.

Personally, much as I disapprove of the Franco dictatorship, I would like to take a look at such an executive agreement or treaty objectively, and would vote for it, even if I had to hold my breath, if I were convinced that it was in the interest of the security of the world and of the United States.

The difficulty is that officials of the administration have been in to see me—and I am sure others—to challenge the assertion that this is a commitment. However, we would have to look at the front and back of the agreement to determine whether this is the same, more or less, in order to make a determination whether or not this does represent a commitment. If it did, there is no question of the fact that it ought to be a treaty.

I have two suggestions to make. The first is that I think the Secretary of State himself, in the name of the President, ought to state authoritatively what view the United States will take if there is trouble, if it is not a commitment, they still have to come back to us. If it is a commitment, then there should be a treaty.

The other suggestion is that if we are going to get into an area something like an undeclared war—because it is unwise to make a declaration of war because the way of the world indicates it would bring many obligations and responsibilities into it that we may not like or want—therefore, others, like myself, are trying to determine how to handle the question of the powers of the President and the war powers of Congress.

Perhaps a new technique would be that if we have only the advise and consent role, without the treaty, it is not enough for us and the Foreign Relations Committee to be consulted; perhaps it may be necessary to invoke——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. Mr. President, I ask unanimous consent to proceed for 7 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Perhaps we ought to invoke a closed door meeting of the Senate so that at least, if the administration chooses not to submit this matter as a treaty, the Senate knows everything we know and the Senate is acquainted with the commitment the administration has undertaken, in the way it will interpret the words of the bond, and what interpretation we have made, and what we know, and the text of the agreement. Then, it seems to me, the function of the Senate will have been served notwithstanding the choice of the administration not to submit to the Senate a treaty.

In short, to summarize, I think we are entitled to assurance from the highest levels of government that our Government will in no way construe this as a commitment, no matter what we may think about it, if it chooses not to submit it as a treaty. Otherwise we should insist it should be so submitted.

This is a major matter. It is not a little base in some small place or some interim arrangement that could be taken care of by some small agreement. At least Senators ought to know what is in it and what the agreement is. It should be submitted as a treaty so we know what it means as a commitment by the United States.

Mr. FULBRIGHT. May I repeat it—I do not think there is any excuse not to submit it for approval as a treaty. May I also point out that I have no serious misgiving about Mr. Franco. When we look at all the countries we are doing business with, to me Spain is a more civilized and liberal dictatorship than the one in South Vietnam, if we want to make comparisons. We are making great sacrifices to help South Vietnam. I have never heard of anything like the Con Son Prison in Spain. As a matter of fact, I think the Spanish people have made great progress. They do not have a democracy such as we have and prefer. It is a dictatorship, but it is a relatively progressive one and has brought substantial benefits to the Spanish people. It is more humane and considerate of people than the Greek dictatorship.

I am sympathetic to the Spanish people, and I do not feel any animosity at all toward the Franco government although I do not advocate or approve of that system for others. I think, in light of their circumstances of the dreadful civil war they have done rather well, in recent years. In any case it is their affair how they run their country. It is our affair how we treat them and whether or not we have a security treaty with them.

But coming back to the matter of the treaty, I do not think it is satisfactory to simply leave it without any publicity without the American people knowing what is in the agreement officially. This agreement is made by men temporarily in the executive branch. They all are temporary, and Secretaries will succeed other Secretaries, just as Secretary Rusk succeeded Secretary Dulles. Secretary Rusk took quite a different view of the SEATO Treaty than Secretary Dulles did, but at the critical time Secretary Rusk and his administration were in control.

However, to follow the Senator's suggestion, that would be better than nothing. I would also like to have it very clearly on the record what the Spanish Government thinks about it, because it is quite clear that in Spain there is a division as to whether or not this is a commitment for us to come to their defense. If they will make it very clear and public that "we think there is nothing in the agreement that would require us to go to their defense," that would fortify our own understanding and then there would be no excuse for them or any one to come back and say, "Look, we are in trouble. Send us 100,000 men."

I think there are well over 10,000 U.S. Military people in Spain now, and it is a very expensive operation. There are many things not mentioned in the article that are involved in the overall agreement. It is a very important one. I hope the Senator from New York will use his influence on this administration to persuade them that, in their interest, in the Senate's interest, and in the interest of the country, they ought to have an above-board treaty agreement, with full debate and understanding as to what we are getting into.

It has much to do with the bill we are debating, and the extent of our military establishment. If we keep on accumulating commitments around the world of this kind, there is utterly no hope of bringing the military appropriation under control.

Mr. JAVITS. Mr. President, I thank my chairman very much for this expression, which I think in itself will be a very helpful contribution to what he and I are both trying to accomplish.

AGREEMENT OF FRIENDSHIP AND COOPERATION BETWEEN THE UNITED STATES OF AMERICA AND SPAIN

The Governments of the United States of America and Spain,

Conscious of the desires of their respective peoples for peace, security and the maintenance of their independence, and

Recognizing that the security and integrity of each of the two countries continues to be a matter of concern to the other, and

Inspired by the purposes and principles of the Charter of the United Nations, and

Desiring to reaffirm and to further the friendship between their peoples, in the spirit of the Treaty of Friendship and General Relations signed at Madrid July 3, 1902, and

Desiring to establish on a more comprehensive basis the cooperation between the two Governments, which has been fostered by such friendship, so that both Governments, through mutual exchanges and support, may promote the well-being and progress of their peoples, enabling them to meet effectively the challenges of the modern world,

Have agreed as follows:

CHAPTER I

General cooperation

Article 1. The Governments of the United States and Spain will continue their close cooperation and intimate working relationship, including regular mutual consultation by their Foreign Ministers, other members of the Governments, or their representatives, on all matters of common concern or interest, as deemed desirable by the two Governments.

Article 2. Such cooperation and relationship will be developed in those areas in which they have heretofore existed; in new areas deemd by the two Governments to require their urgent mutual attention, as specifically provided hereinafter; and in those other areas which the two Governments may consider appropriate in the future.

CHAPTER II

Educational and cultural cooperation

Article 3. In recognition of the importance of the cultural achievements of both countries, and in order to strengthen even more the friendship and understanding that traditionally have existed between their peoples, the Governments of the United States and Spain agree to expand their present exchanges in the educational and cultural fields, in number as well as in scope, subject to the constitutional processes and legislative requirements of the two countries.

Article 4. The expansion of these exchanges will involve teachers, research experts, scientists, scholars and students, and will extend into all branches of learning, especially natural and applied sciences, economics, and the language and culture of the two countries. In the field of arts and letters authors and artists and the reciprocal dissemination of their works.

Article 5. Both Governments recognize the importance of the Fulbright-Hays program to promote educational and cultural exchanges between the two countries, and therefore they consider it desirable to expand the responsibilities of the Commission for Cultural Exchange between the United States of America and Spain established by the Agreement of October 16, 1958, and renewed by the Agreement of March 18, 1964. The Spanish Government reaffirms its decision to contribute regularly to the financing of the Fulbright-Hays program.

Article 6. In its desire to cooperate with the Spanish Government in the expansion of the Spanish educational system and Spanish scientific and technical development, the Government of the United States, subject to United States legislation and the appropriation of funds by the Congress, will assist Spain in research, development, and advanced training of professors and other teaching personnel, particularly in the scientific disciplines, and training of new professors and other teaching personnel, and will provide documents, equipment, and materials for research laboratories and libraries as appropriate in the new Spanish universities and other centers of higher learning.

Article 7. In order to accomplish the goals of Article 6, the Government of the United States will consider with the greatest interest the specific programs that Spain presents to it in the fields mentioned in Article 6, and will cooperate in such programs, lending such assistance as the United States may provide subject to United States legislation and the appropriation of funds by the Congress. To the extent necessary and appropriate, these matters will be the subject of special agreements between the appropriate authorities of the two Governments.

Article 8. The two Governments consider it a matter of special interest to increase the knowledge of their respective languages in the two countries, by encouraging the activities of institutions and organizations that engage in the teaching of Spanish and the dissemination of Spanish culture in the United States, and at the same time encouraging the activities of institutions and organizations in Spain that carry on similar work with respect to the language and culture of the United States.

CHAPTER III

Scientific and technical cooperation

Article 9. Since science and technology are increasingly important for the development of a country, the Governments of the United States and Spain recognize that scientific and technical cooperation will be of great value in advancing the bonds of friendship, the state of the sciences and the resolution of the problems they share in common. Both Governments also recognize the desirability of devoting special attention to cooperation in the exchange of the results of scientific and technical research for their mutual economic and social benefits.

Article 10. Both Governments will undertake a broad program of scientific and technical cooperation for peaceful purposes.

Article 11. The cooperation between the two Governments will be based essentially on the following principles:

(a) Selection of specific scientific and technical sectors of major interest and yield.

(b) Preparation of plans for collaboration between research centers of the two countries.

(c) Programs for sending to Spain American professors and researchers of established reputation to cooperate in the advanced training of scientific and technological researchers.

(d) The establishment of appropriate channels for putting into operation, developing and supervising specific programs of scientific and technical cooperation.

Article 12. For the purposes of this Chapter, the two Governments consider the following areas, among others, to be of special interest:

(a) Civil uses of atomic energy, in accordance with the agreement of August 16, 1957, as amended.

(b) The exploration and use of space, including intercontinental experiments with satellite communications, in accordance with the exchange of notes of September 18, 1964, and January 26, 1965; spaceship tracking stations and operations, in accordance wtih the exchange of notes of April 14, 1966; and the measurement of winds and temperatures at high altitudes, in accordance with the exchange of notes of April 14, 1966.

(c) Marine sciences, including joint biological, physical and ecological projects to improve and increase the oceanic resources and their use.

(d) Medical and biological sciences, industrial technology, electronics and the social sciences.

Article 13. Any obligations arising pursuant to this Chapter shall be subject to the constitutional processes and legislative requirements of the respective countries.

CHAPTER IV

Cooperation on environmental and urban development problems

Article 14. The Governments of the United States and Spain recognize that among the principal problems with which their peoples are faced are the dangers to which man is exposed by the deterioration of his environment. Both Governments agree on the need to give urgent attention to such problems and they will begin consultations in order to determine how to coordinate their mutual efforts for their solution.

Article 15. Cooperation for the purposes stated in the foregoing Article will be effected through the exchange of information, the development of teaching and research centers, the training of personnel in specialized institutions, the sending of experts, and the supply of material for carrying out projects of common interest.

Article 16. The fields in which cooperation will be developed will be as follows:

(a) The fight against pollution in all its forms, especially in the atmosphere, in waters and in the soil;

(b) Ecology and wildlife conservation;

(c) Urban and regional planning, including urban renewal and improvement, traffic control, reduction of noise, and protection of the landscape.

CHAPTER V

Agricultural cooperation

Article 17. The Governments of the United States and Spain recognize that the agricultural sector is of great mutual interest and that it may hold opportunities for exchange of knowledge and assistance; therefore the two Governments agree to study expanding their cooperation in this field.

Article 18. For the purpose of developing the cooperation referred to in the preceding Article, both parties will study the harmonization of standards and common agricultural sanitation provisions; the possibility of carrying out transactions in agricultural surpluses under a system of concessional sales for social of charitable purposes; the preparation of joint plans for teacher training, not only in the classic agricultural disciplines (e.g. agronomy, zootechny, genetics, soil science, horticulture, agricultural engineering) but also in the more modern branches (e.g. food technology, marketing of farm products, rural economics and sociology, forest management); the feasibility of exchange of university professors and agricultural researchers of both countries; scholarships for graduates in agricultural sciences; and the exchange of information on scientific and technical progress in agriculture.

Article 19. In the cooperation between the two Governments, special attention will be given to the Spanish programs of rural management, irrigation, reforestation, and the development of the livestock industry.

Article 20. The two Governments will undertake to exchange their tecnhical knowledge and experience acquired in the sectors named in the preceding Article, whenever possible, including information on the economic aspects of the agricultural market, and to that end they will promote the exchange of technicians and experts in the preparation and execution of such programs.

CHAPTER VI

Economic cooperation

The Governments of the United States and Spain, desiring to maintain and expand their present cooperation, have examined the situation of their economies in the world context and have reaffirmed their determination to advance and develop their economic relations, and to that end they have agreed as follows:

Article 21. The two Governments reaffirm their determination to expand their trade relations, and consequently they will seek to avoid, insofar as possible and to the extent allowed by their respective economic situations and the development of their balances of payments, measures that effect restrictions on the flow of their reciprocal trade, in accordance with the provisions of the General Agreement on Tariffs and Trade.

Article 22. The two Governments consider it desirable to have a normal flow of United States direct investments in Spain, and to that end they will adopt, provided the United States balance of payments so permits, the necessary measures for encouraging the development of such investments. A similar criterion shall be applied, insofar as circumstances permit, to reducing restrictions imposed by the United States for balance of payments reasons on the purchase of foreign securities, including Spanish securities, by United States citizens in the United States.

Article 23. The two Governments recognize that the loans granted by the Export-Import Bank of the United States have been an important stimulus for the purchase of United States capital goods by Spanish enterprises. Consequently, they will continue in the future to facilitate and give maximum attention to the development of these financial relations.

Article 24. The Government of Spain reiterates its objectives of achieving by progressive steps its full integration in the European Community. The Government of the United States declares its sympathetic understanding of Spain's objectives of full integration. The two Governments agree to consult with each other and to keep in close contact in seeking to arrive at mutually satisfactory solutions for any problems of principle or procedure as may arise for either of them in this connection.

Article 25. The two Governments will exchange information on the negotiations now in progress for the establishment of a generalized system of preferences in favor of developing countries.

Article 26. The two Governments reaffirm their interest in continunig the consultations of the Joint Spanish-United States Economic Committee created in 1968, maintaining the competence and terms of reference vested in it in the exchange of notes of July 15, 1968, for the examination of financial and other economic matters of mutual interest. The Committee will meet alternatively in Washington and Madrid at mutually convenient times, under the chairmanship of representatives of appropriate level designated by their respective Governments.

CHAPTER VII

Cooperation with respect to public information

Article 27. The Governments of the United States and Spain recognize the value and significance that have been attained in present times by the information media, and they reaffirm their interest in strengthening their cooperation in this field.

Article 28. In order that public opinion in their respective countries may develop a better mutual understanding, both Governments will encourage by all means at their disposal the exchange of radio and television programs, will mutually assist their respective information media, and will prepare an

effective long-range plan for exchange in all fields of information dissemination.

Article 29. The two Governments reaffirm their desire to continue and to expand the exchange of their respective official publications.

CHAPTER VIII

Cooperation for defense

The Governments of the United States and Spain are in agreement in considering that the threat to peace is the greatest problem faced by the modern world, and that it requires that both Governments remain vigilant and continue to develop their ability to defend themselves against such a threat. Consequently, both Governments, within the framework of their constitutional processes, and to the extent feasible and appropriate, will make compatible their respective defense policies in areas of mutual interests, and will grant each other reciprocal defense support as follows:

Article 30. Each Government will support the defense system of the other and make such contributions as are deemed necessary and appropriate to achieve the greatest possible effectiveness of those systems to meet possible contingencies, subject to the terms and conditions set forth hereinafter.

Article 31. The Government of the United States agrees to support Spanish defense efforts, as necessary and appropriate, by contributing to the modernization of Spanish defense industries, as well as granting military assistance to Spain, in accordance with applicable agreements. This support will be conditioned by the priorities and limitations created by the international commitments of the United States and the exigencies of the international situation and will be subject to the appropriation of funds by the Congress, whenever the case so requires, and to the United States legislation.

Article 32. The Government of Spain, subject to Spanish constitutional provisions and legislation in force, will authorize the Government of the United States to use and maintain for military purposes certain facilities in Spanish military installations agreed upon by the two Governments. Any major construction that may be necessary for the exercise of this use shall be subject to agreement between the two Governments in the Joint Committee created in Article 36 of this Chapter. The United States is further authorized to station and house the civilian and military personnel necessary for such use; to provide for their security, discipline, and welfare; to store and guard provisions, supplies, equipment and materiel; and to maintain the services necessary for such purposes. The exercise of the functions authorized herein shall be subject to such express terms and technical conditions as the two Governments may agree upon.

Article 33

(a) The Government of Spain assumes the obligation of adopting the security measures necessary for the exercise of the functions authorized in Article 32. The United States may exercise the necessary supervision and protection of its personnel, equipment and materiel.

(b) The above-mentioned use by the Government of the United States of facilities in Spanish military installations will be free of all taxes, charges and encumbrances. The Government of Spain will retain free of all charges the ownership of all permanent works constructed for the purpose of this Agreement.

(c) The Government of the United States may remove at any time nonpermanent constructions installed at its expense, as well as its personnel, property, equipment and materiel. However, any substantial removal prior to the expiration of this Agreement will be the subject of prior consultation of the two Governments in the Joint Committee. In the event that any such removal would bring about adverse security consequences, the two Governments will consult immediately in order to adopt appropriate measures.

(d) Whenever the Government of the United States relinquishes a facility authorized in this Chapter, either prior to or as a result of the expiration of the five or ten year period specified in Article 38, the Government of the United States shall not be obligated to leave such facility in the same state and condition it was in prior to its utilization by the Government of the United States, or to compensate Spain for not having returned it in such state, but shall leave the land and permanent constructions thereon in serviceable condition for use by Spanish authorities, provided that the Government of the United States shall incur no additional expense thereby.

(e) In normal circumstances any substantial increase in the personnel or military equipment of the United States in Spain, or any substantial increase in the use by the United States of facilities in Spanish military installations regulated by this Agreement, will be the subject of prior consultation in the Joint Committee and agreed upon between the two Governments through diplomatic channels.

Article 34. In the case of external threat or attack against the security of the West, the time and manner of the use by the United States of the facilities referred to in this Chapter to meet such threat or attack will be the subject of urgent consultations between the two Governments, and will be resolved by mutual agreement in light of the situation created. Such urgent consultations shall take place in the Joint Committee, but when the imminence of the danger so requires, the two Governments will establish direct contact in order to resolve the matter jointly. Each Government retains, however, the inherent right of self-defense.

Article 35. Both Governments consider it necessary and appropriate that the cooperation for defense regulated by this Chapter form a part of the security arrangements for the Atlantic and Mediterranean areas, and to that end they will endeavor to work out by common accord the liaison deemed advisable with the security arrangements for those areas.

Article 36. In order to establish the necessary coordination between the two Governments and to ensure greater effectiveness of the reciprocal defense support granted by the two Governments to each other, the Governments of the United States and Spain agree to establish a Joint Committee on defense matters. The Joint Committee will be the organ in which the two Governments normally will consult with each other and resolve matters that may arise in connection with the reciprocal defense support referred to in this Chapter. The Joint Committee will be organized and will function as specified in the Annex to this Agreement.

Article 37. The two Governments will determine by common accord, through an exchange of notes on this date, the facilities referred to in Article 32 of this Chapter, as well as the United States force levels in Spain and the assistance programs referred to in Article 31 of this Chapter. Thereafter any change in the number or extent of such facilities will be negotiated in the Joint Committee and agreed upon between the two Governments through an exchange of notes.

CHAPTER IX

Final provisions

Article 38. This Agreement shall enter into force on September 26, 1970, and will remain in force for five years, whereupon it may be extended, if both Governments agree, for another five years.

Article 39. In order to facilitate the withdrawal of the personnel, property, equipment and material of the Government of the United States located in Spain pursuant to Chapter VIII of this Agreement, a period of one year, during which the withdrawal must be completed, is provided. Such withdrawal shall be commenced immediately upon the expiration of the five year initial period, or, if the Agreement is extended, upon the expiration of the five year extension period. During the withdrawal period above mentioned, not to exceed one year, all of the rights, privileges and obligations deriving from Chapter VIII of this Agreement shall remain in force as long as United States troops remain in Spain.

Article 40. The entry into force of this Agreement will in no way affect the validity or terms of any agreement existing between the Governments of the United States and Spain, with the exception of the Defense Agreement between the United States and Spain, dated September 26, 1953, and its supplementary agreements which shall thereupon be superseded.

Done at Washington in duplicate, in the English and Spanish languages, each of which shall be equally authentic, this ——— day of ———, 1970.

For the Government of the United States of America:

For the Government of Spain:

ANNEX

1. The Joint Committee established in Article 36 of Chapter VIII of the Agreement of Friendship and Cooperation Between the United States of America and Spain signed on ——— will be composed of the Foreign Minister of Spain and the United States Ambassador to Spain as Co-Chairman, with the Chief of the Spanish High General Staff and the Commander-in-Chief, United States European Command as their military advisers.

2. The Joint Committee will be permanent throughout the term of the aforesaid Agreement and shall be organized so as to function on a continuous basis.

3. The Joint Committee shall have its headquarters in Madrid, but may hold meetings in other places at the request of either of the two Governments, such places to be determined by mutual agreement.

4. A permanent Secretariat of the Joint Committee shall be established, composed of two members representing each of the two Governments, who shall be charged with the daily handling of routine matters and the preparation of these matters which must be submitted to the Joint Committee for consideration.

5. The Joint Committee will establish such subcommittees as may be appropriate for the discharge of its responsibilities.

6. Subordinate to the Joint Committee, as a Subcommittee thereof, there will be a Joint Air Control and Coordination Center, to maintain and operate a system of warning for air space defense, to assist in the regulation of air traffic, and to provide a means for coordination of the actions of the U.S. and Spanish forces. The details of the organization and initial tasks of the Joint Air Control and Coordination Center will be determined by the Joint Committee with two months following the entry into force of this Agreement.

7. The Joint Committee will be assisted by the civilian and military personnel necessary for the fulfillment of its purposes.

8. The Joint Committee shall report to the two Governments on its activities on a monthly basis, and in all cases when the importance of the matter so indicates.

9. The Joint Committee shall prepare and present to both Governments an annual plan to facilitate making compatible their respective defense policies in areas of mutual interest pursuant to the Chapter VIII of the aforesaid Agreement.

10. The Government of Spain will provide adequate premise for the Joint Committee. The Co-Chairmen shall determine personnel and administrative needs and arrange for the preservation of the Joint Committee's records and archives.

DEPARTMENT OF STATE,
Washington, D.C., August 6, 1970.

His Excellency GREGORIO LOPEZ BRAVO,
Minister of Foreign Affairs of Spain.

EXCELLENCY: I have the honor to refer to the Agreement of Friendship and Cooperation between the United States of America and Spain signed today, August 6, 1970. In accordance with Article 37 of the Agreement, I wish to advise you that the intentions of my Government regarding military assistance for Spain, pursuant to Article 31 of the Agreement, which I understand are acceptable to the Government of Spain, are as follows:

(a) The United States Government is prepared to assist the Government of Spain to apply Export-Import Bank credits to the purchase of the following equipment:

36 F-4C Phantom fighter bomber aircraft including necessary accessories and ground equipment for 36 aircraft.

2 KC-130 aircraft.

3 P-3 aircraft.

4 SH-3D helicopters.

4 Huey Cobra helicopters.

6 C-130 A or B aircraft.

Equipment for the territorial command net of Spanish Army.

(b) The Government of the United States will seek to obtain from Congress the necessary funds for the following purposes:

(1) Coverage of 70% of the cost, which is not expected to exceed a total of $50 million, of modernizing and semi-automating the existing aircraft control and warning network in Spain.

(2) Training of Spanish personnel to operate and maintain the United States origin military equipment acquired by Spain.

(3) Military equipment for land forces:

1 battalion of M48 tanks (54).

2 battalions and 2 batteries of 105 MM Howitzer M108 (48).

1 battalion of 155 MM Howitzer M108 (18).

1 battalion Armored Personnel Carriers.

49 M113 Armored Personnel Carriers.

4 M106 Mortar Carriers.

7 M577 Command Post Carriers.

16 Muey UH-1H helicopters.

1 battalion of 175 MM Guns M107 (12).

(c) The Government of the United States intends to loan to the Government of Spain the following vessels, subject, where necessary, to obtaining authorizing legislation:

[Type, quantity, and class of ship]

Submarines, 2, Gupy 1A and 11A.

Destroyers, 5, Various: English, Sumner, Lavalette, Lloyd Thomas.

Ocean Minesweepers, 4, Aggressive.

Landing Ships, 3 LST, Chelan County.

Auxiliaries, 1 ammunition ship, Wrangell; 1 oiler, Cimarron.

(d) The Government of the United States is prepared to make available to Spain machine tools appropriate for use in the manufacture of munitions, subject to specific agreements with the Government of Spain.

(e) The Government of the United States is prepared to relinquish to Spain the Rota-Zaragoza pipeline, subject to the provisions of a procedural annex.

(f) The Government of the United States relinquishes any and all claims against the Government of Spain for the residual value of the permanent structures constructed under the Defense Agreement between the United States of America and Spain signed September 26, 1953.

I further wish to advise you that it is the understanding of my Government that the United States of America, subject to Spanish Constitutional provisions and legislation in force, is authorized to use and maintain for military purposes with the appropriate military personnel the facilities in or connected with the following Spanish military installations:

Torrejon Air Base.

Zaragoza Air Base.

Moron Air Base (standby).

Rota Naval Base.

Cadiz-Zaragoza petroleum pipeline and pumping facilities.

Petroleum and other storage facilities.

Communications and navigational network support facilities.

I should appreciate your confirmation of the foregoing understandings on behalf of the Government of Spain.

Accept, Excellency, the assurances of my highest consideration.

———— ————,
Secretary of State of the United States of America.

DEPARTMENT OF STATE,
Washington.

His Excellency GREGORIO LOPEZ BRAVO,
Minister of Foreign Affairs of Spain.

EXCELLENCY: I have the honor to refer to the Agreement of Friendship and Cooperation Between the United States of America and Spain concluded on this date.

I should like to confirm our understanding that, in the event the Agreement in Implementation of Chapter VIII of the Agreement is not concluded by September 26, 1970, then the two Governments will be guided by the following considerations in implementing Chapter VIII of the Agreement during the period from September 26, 1970, to the date on which such Agreement in Implementation is concluded:

1. Effect will be given to those separate sections, articles and procedural annexes of the proposed Agreement in Implementation which have been initialed as approved by the authorized representatives of the United States and Spain as of September 26, 1970. Effect will be given to those sections, articles and procedural annexes which are initialed thereafter and prior to the conclusion of the full Agreement in Implementation as of the date on which they are initialed.

2. With respect to the matters covered by those separate sections, articles, and annexes not yet initialed as of September 26, 1970, the Government of Spain will continue to safeguard, consistent with prevailing practices and within the spirit and letter of Chapter VIII of the Agreement, the rights, privileges and immunities of the Government of the United States until such time as the new sections, articles and procedural annexes are initialed.

I should like to propose that, if agreeable to your Government, this note, together with your reply, shall constitute an agreement between our two Governments relating to the implementation of the Agreement, with effect from September 26, 1970.

Accept, Excellency, the assurances of my highest consideration.

———— ————,
Secretary of State of the United States of America.

DRAFT SPANISH REPLY NOTE

His Excellency WILLIAM P. ROGERS,
Secretary of State of the United States of America.

EXCELLENCY: I have the honor to refer to your note of this date which reads as follows:

I wish to confirm to you on behalf of the Government of Spain the understandings expressed in your note.

Accept, Excellency, the assurances of my highest consideration.

———— ————,
Minister of Foreign Affairs of Spain.

WASHINGTON, D.C.,
August 6, 1970.

His Excellency GREGORIO LOPEZ BRAVO,
Minister of Foreigns Affairs of Spain.

DEAR MR. MINISTER: During the Fiscal Year 1971, the United States Government would be prepared to fund up to $3 million of such non-military projects as may be agreed upon pursuant to the Agreement of Friendship and Cooperation signed between the United States and Spain on this date.

Additionally, the Commission for Educational Exchange between the United States and Spain (Fulbright Commission) is now devoting its efforts to educational reform. Apart from the above mentioned $3 million, the Department of State expects to increase its contribuiton to the Commission this year, thus enhancing its capacity to contribute to the fulfillment of the Spanish educational plan.

Sincerely yours,

WILLIAM P. ROGERS.

WASHINGTON, D.C.,
August 6, 1970.

His Excellency GREGORIO LOPEZ BRAVO,
Minister of Foreigns Affairs of Spain.

DEAR MR. MINISTER: During the term of the new Agreement of Friendship and Cooperation Between the United States of America and Spain, signed on behalf of our two Governments on this date, the Government of the United States is prepared to contribute to the funding of various non-military projects as are specifically agreed upon pursuant to the spirit and letter of the Agreement, subject, when necessary, to Congressional authorization and to the availability of funds.

It is understood that the Executive Branch of the United States Government assumes an obligation to seek any necessary appropriations from the Congress for funding of such agreed non-military projects above described.

Sincerely yours,

WILLIAM P. ROGERS.

THE MISSION TO MEXICO

Mr. MANSFIELD. Mr. President, I rise at this time to congratulate President Nixon upon his successful mission to Mexico last week. During the course of that mission, he discussed with President Gustavo Diaz-Ordaz certain matters of mutual interest and concern.

It appears that, at long last, a permanent agreement has been reached which will determine on a basis of finality the border between Mexico and the United States as represented by the Rio Grande River. This could mark an end to a century-old dispute which has caused several questions to arise because of shifts in the course of the river. The one dealing with the Chamizal was settled several years ago.

Some progress seems to have been made toward the settlement of the Colorado River salinity problem, although it is far from completed at the present time. The issue is still alive. There is a recognition that the Colorado River does pose a problem to Mexico as it flows into that country's territory from the United States. Certain activities undertaken in the southern part of the United States create the problem of salinity, and this causes a loss in crops of the Mexican farmers.

It is noteworthy that accompanying the President on this trip was the Attorney General of the United States, John Mitchell, who met with his counterpart in the Mexican Government. Together with the two Presidents they discussed the traffic in marihuana and narcotics. Because of this frank and open discussion, a better understanding was achieved and better methods were considered to cope with the drug traffic, which seems to be most difficult to eradicate. Possibly out of this effort will come an alleviation of the situation which has existed for so many years.

Mexico is to be congratulated on its

attempts to try to stop the illegal flow. Both countries and both chiefs of state are to be congratulated for seeking to arrive at a reasonable settlement, to that through cooperation this vexing problem may be solved.

It is good that Presidents of Mexico and the United States, traditionally, make it a point to visit one another. I am delighted that out of these missions to Mexico, these personal, diplomatic missions, so much has been accomplished, and that an era of good feeling is the norm at the present time, as it has been for some years, between the two republics.

So again I congratulate the President for undertaking this mission in personal diplomacy.

I ask unanimous consent to have printed at this point in the RECORD an editorial published in the New York Times of today entitled "Useful Mission to Mexico."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

USEFUL MISSION TO MEXICO

If all Presidential trips abroad could accomplish as much in short order as Mr. Nixon's 28-hour visit to Mexico, the case for personal diplomacy at the highest level would would be unanswerable. Actually, the ground had been laboriously prepared for the agreement designed to resolve remaining boundary disputes between the United States and Mexico and to set up machinery for heading off such quarrels in the future.

The basic climate had been created through earlier resolution of the century-old dispute over the Chamizal area on the Rio Grande between El Paso, Texas, and Ciudad Juarez. Negotiations for the Chamizal Convention were launched by Presidents Kennedy and Lopez Mateos in 1962 and brought to fruition by President Johnson and Diaz Ordaz in 1967.

These bits of recent history are recalled not to diminish the accomplishment of President Nixon and Diaz Ordaz at Puerto Vallarta, but to point up the invaluable continuity that has been built up for amicable relations between the two countries in recent years. That continuity was endangered last year when Washington embarked on "Operation intercept," a drive to halt the flow of marijuana and narcotics from Mexico.

Fortunately, the Administration soon abandoned this ham-handed venture and the two Governments agreed to replace it with "Operation Cooperation," under which Mexico promised to intensify the efforts to curb production and export of narcotics. In the improved climate, Attorney General John Mitchell accompanied Mr. Nixon to Puerto Vallarta and agreed on new measures of cooperation against the drug traffic.

Finally, Mr. Nixon has made what Mr. Diaz Ordaz calls a "constructive" proposal for improving the agreement involving distribution of the waters of the lower Colorado river. If a new agreement satisfactory to both sides can be reached by the time the old one expires in November, Mr. Nixon will have even more cause to be pleased with his personal diplomacy south of the Rio Grande.

RAILROADS REQUEST INCREASE IN FREIGHT RATES

Mr. MANSFIELD. Mr. President, I note in the Montana press that the eastern and western railroads once again propose to raise freight rates, this time by 15 percent, in addition to the 6 percent and 5 percent increases granted earlier.

I do not know where this is going to stop. The Presiding Officer, the distinguished Senator from North Dakota (Mr. BURDICK), is just as much interested in this problem as am I. This is outrageous—the railroads asking for a 15-percent across-the-board increase in their freight rates. It means that Montana, which has been referred to by Prof. Richard J. McKennon, of Montana State University, as the "land of the long haul," may well be called the "land of the light haul," because we just cannot assume this extra burden.

What this amounts to in the State of Montana is a petition—of course, it applies to other States as well—a petition for a 15-percent increase in freight rates across the board. What it means is that this rate increase, in addition to the perennial boxcar shortage, will make it most difficult for Montana farmers to ship their wheat and feed grains. It means that, in desperation, Montana farmers in the so-called triangle area and elsewhere in the State are grouping together and buying trucks in which to ship their wheat to ports along the Columbia River.

The net result of all this is that it will be more difficult for the small wheat rancher to survive; not to mention the fact that if this rate increase is allowed, it will cost the State of Montana $25.8 million. We do not have that kind of money to spend out there. Our farmers are entitled to a little more in the way of protection than they have been getting.

When we consider the fact that we have had an extensive rise in freight rates, when we have a very difficult boxcar shortage, and when we have so far to haul our grain, I think it is time for the ICC to step in and do something, rather than, as is its custom, just give in to these demands month after month, year after year.

Again I repeat my belief that the ICC should be abolished and its function transferred to the Department of Transportation, where I am sure, under the excellent leadership of Secretary John Volpe, something will be done to bring relief to the farmers of Montana, the Dakotas, and other States, and this spiraling cost factor alleviated, if not done away with.

Mr. BURDICK. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BYRD of West Virginia). Does the Senator from Montana yield to the Senator from North Dakota?

Mr. MANSFIELD. I yield to the distinguished Senator from North Dakota.

Mr. BURDICK. I commend the able Senator from Montana for bringing before this body a most important question. The distinguished Senator has outlined the increases that have taken place in the past 2 or 3 years. He has enumerated the cost-price squeeze that is upon the farmers of our region and has pointed out that they just cannot bear another freight rate increase at this time.

I wonder whether the Senator has calculated what this means in returns to the farmer. I have been advised by several elevator managers representing farmers in my State that a 15-percent increase on top of the other increases would mean an additional 6 cents a bushel loss in the price of grain.

Mr. MANSFIELD. I think the Senator is being conservative in his estimate. I think the figure is more than 6 cents—at least in Montana. This is just another burden placed on the shoulders of the farmer, whose costs are increasing and whose prices are not keeping pace but, as a matter of fact, insofar as wheat is concerned, are fluctuating up and down—mostly down.

Mr. BURDICK. Whatever the rate increase is, it would certainly reflect itself in a very serious loss at this time.

I share the Senator's great concern. I hope that by some means we can get a denial of this freight rate request as soon as possible, and I will join with the Senator to do all we can to accomplish this end.

Mr. MANSFIELD. I thank the distinguished Senator.

May I say that I have been in contact with the chairman of the Committee on Commerce, the Senator from Washington (Mr. MAGNUSON), whose State also will be affected. He has indicated an interest and a desire to do something.

May I point out that, according to George Lackman, the Commissioner of Agriculture for the State of Montana, the following may be of note:

When the 15 percent proposal is included with the other increases, the direct effect on grain growers, including wheat and barley growers, would total $12.9 million annually. Using the theory of Montana State University economists, each $1 change results in an overall $2 effect on the State's economy.

So I am hopeful that the ICC will get this message and that the Committee on Commerce, under the chairmanship of the distinguished Senator from Washington, will undertake hearings on this and related matters, to the end that the situation can be faced up to and that the matter of an increase in freight rates will be brought to a halt.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The ACTING PRESIDENT pro tempore (Mr. BURDICK). Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the transaction of routine morning business.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Leonard, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Acting President pro tempore (Mr. BURDICK) laid before the Senate a message from the President of the United States submitting the nomination of Thomas W. Moore, of Connecticut, to be a member of the Board of Directors of the Corporation for Public Broadcasting, which was referred to the Committee on Commerce.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore (Mr. BURDICK) laid before the Senate the following letters, which were referred as indicated:

REPORT OF EXPORT-IMPORT BANK OF THE UNITED STATES

A letter from the Secretary, Export-Import Bank of the United States, transmitting, pursuant to law, a report of activities of the Bank during the quarter ended June 30, 1970 (with an accompanying report); to the Committee on Banking and Currency.

PUBLICATIONS OF THE FEDERAL POWER COMMISSION

A letter from the Chairman, Federal Power Commission, transmitting, for the information of the Senate, a copy of the following recently-issued publications:

Hydroelectric Plant Construction Costs and Annual Production Expenses, 1968; and

Part III of The 1970 National Power Survey (containing previously published regional advisory committee reports); to the Committee on Commerce.

PROPOSED LEGISLATION TO PROVIDE FOR PAYMENT OF MEDICAL, HOSPITAL, AND SURGICAL BILLS OF CERTAIN DISABLED RETIRED POLICEMEN AND FIREMEN

A letter from the Assistant to the Commissioner, Executive Office, government of the District of Columbia, transmitting a draft of proposed legislation to provide for payment of medical or surgical services or hospital treatment of certain disabled former members of the Metropolitan Police Department, the Fire Department of the District of Columbia, the U.S. Park Police force, the Executive Protective Service, and the U.S. Secret Service Division, and for other purposes (with an accompanying paper); to the Committee on the District of Columbia.

REPORT OF THE SECRETARY OF THE SENATE

A letter from the Secretary of the Senate, transmitting, pursuant to law, a report on the receipts and expenditures of the Senate for the period January 1, 1970, through June 30, 1970 (with an accompanying report); which was ordered to be printed and to lie on the table.

REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the providing of rent-free space in Government-owned buildings to the Office of the Comptroller of the Currency, Department of the Treasury, dated August 24, 1970 (with an accompanying report); to the Committee on Government Operations.

REPORT OF THE U.S. GOVERNMENT COMPTROLLER FOR THE VIRGIN ISLANDS

A letter from the Acting Secretary of the Interior, transmitting, pursuant to law, the annual report of the U.S. Government comptroller for the Virgin Islands for the fiscal year ended June 30, 1969 (with an accompanying report); to the Committee on Interior and Insular Affairs.

REPORT ON APPLICATION FOR LOAN FOR THE GRAHAM-CURTIS PROJECT OF SAFFORD, ARIZ.

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, on a loan application for the Graham-Curtis project, of Safford, Ariz., in the amount of $1,762,000; to the Committee on Interior and Insular Affairs.

PROPOSED LEGISLATION TO PROVIDE THAT THE FEDERAL GOVERNMENT SHALL ASSUME THE RISKS OF ITS FIDELITY LOSSES

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to provide that the Federal Governemnt shall assume the risks of its fidelity losses (with an accompanying paper); to the Committee on Post Office and Civil Service.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the ACTING PRESIDENT pro tempore (Mr. BURDICK):

Two resolutions adopted by board of directors of the National Association of Counties, Washington, D.C., praying for the enactment of legislation to create a revenue sharing trust fund for State and local governments; and welfare reform legislation providing fiscal relief to States and counties; to the Committee on Finance.

A letter, in the nature of a petition, from Mrs. Mary Redden, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Mr. and Mrs. Charles Ziegler, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Velma Blucher, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Miss Jessie Parker, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Mr. and Mrs. Anthony Armeni, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue-sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Miss Betty Rogers, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue-sharing; to the Committee on Finance.

A letter, in the nature of a petition, from Mrs. Mary Blucher, of Youngstown, Ohio, praying for the enactment of legislation relating to revenue-sharing; to the Committee on Finance.

A joint resolution adopted by the Congress of Micronesia, relating to principles and legal rights of Micronesia; to the Committee on Interior and Insular Affairs.

A petition of the Association for Grand Jury Action, Inc., praying for a redress of grievances; to the Committee on the Judiciary.

BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. ALLEN:

S. 4287. A bill to provide that the U.S. Senators and the Members of the House of Representatives concerned with any plan or other recommendation relating to school desegregation prepared by any officer or employee or agent of the Department of Health, Education, and Welfare for submission to any U.S. court or any public agency of a state be furnished a copy of such plan or other recommendation, and for other purposes; to the Committee on Labor and Public Welfare.

(The remarks of Mr. ALLEN when he introduced the bill appear below under the appropriate heading.)

By Mr. GOODELL:

S. 4288. A bill to authorize assistance under the section 236, rent supplement, and public housing programs for dormitory-type housing for low-income single persons; to the Committee on Banking and Currency.

(The remarks of Mr. GOODELL when he introduced the bill appear below under the appropriate heading.)

By Mr. MOSS:

S. 4289. A bill for the relief of Mrs. Kwi Dong Park; to the Committee on the Judiciary.

By Mr. BYRD of West Virginia (for Mr. MAGNUSON) (by request):

S. 4290. A bill to amend section 14 of the Natural Gas Act; to the Committee on Commerce.

(The remarks of Mr. BYRD of West Virginia when he introduced the bill appear below under the appropriate heading.)

By Mr. COOK:

S.J. Res. 232. Joint resolution to establish "National Good Grooming Week"; to the Committee on the Judiciary.

(The remarks of Mr. COOK when the introduced the joint resolution appear below under the appropriate heading.)

S. 4287—INTRODUCTION OF A BILL RELATING TO PLANS OR RECOMMENDATIONS IN THE MATTER OF SCHOOL DESEGREGATION

Mr. ALLEN. Mr. President, I introduce for appropriate reference a very short bill to which few can take exception. I ask unanimous consent that the bill be printed at this point in the RECORD for purpose of comment thereon.

The PRESIDING OFFICER (Mr. FANNIN). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4287), to provide that the U.S. Senators and the Members of the House of Representatives concerned with any plan or other recommendation relating to school desegregation prepared by any officer or employee or agent of the Department of Health, Education, and Welfare for submission to any U.S. court or any public agency of a State be furnished a copy of such plan or other recommendation, and for other purposes, introduced by Mr. ALLEN, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 4287

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no plan or recommendation or modification of an existing plan or recommendation prepared by any officer or employee or agent of the Department of Health, Education and Welfare concerning the desegregation of the schools of any local educational agency within any State shall be furnished to any Court of the United States, any public agency of a State, or any political subdivision of such State, unless a copy of such plan, recommendation or modification has been submitted to the United States Sena-

tors of that State and to the Members of the House of Representatives from the Congressional Districts in which the schools of such local educational agency are located. Any such copy shall contain a statement that the plan, recommendation or modification does not effectively exclude any student or teacher from any school of the local educational agency because of race, or color, and shall be attested to under oath or affirmation by the Secretary of Health, Education and Welfare or his designee.

Mr. ALLEN. Mr. President, it will be seen that the bill merely requires the Department of Health, Education, and Welfare to submit a copy of desegregation plans, recommendations or modification of existing plans or recommendations prepared under auspices of the Department to the Senators and Representatives of the respective States and congressional districts in which the schools affected by such plans are located.

Ordinarily, Mr. President, it would seem that Senators and Representatives are entitled to copies of such plans as a matter of courtesy. Instead, experience has demonstrated that the Department of Health, Education, and Welfare is reluctant to disclose such plans, recommendations or modification prior to submission for consideration and implementation by Federal judges or by local school boards.

Yet, Mr. President, the citizens of the State and congressional districts involved look to us for relief from what appears to them to be grossly unreasonable and sometimes unlawful plans imposed upon the schools and schoolchildren affected by those plans.

The primary purpose for reviewing such plans before they are submitted for implementation is to determine whether or not the actions contemplated are consistent with laws of Congress and decisions of the U.S. Supreme Court.

It is my sincere judgment that many plans prepared by the Department of Health, Education, and Welfare and submitted for implementation by Federal district courts are unreasonable, irrational, contrary to laws of Congress, and without authority under any specific ruling of the U.S. Supreme Court.

For this reason the bill provides that copies of such plans or recommendations contain a statement affirming that such plans or recommendations do not go beyond what is required by the U.S. Supreme Court.

It is a fact, Mr. President, that school plans and recommendations have been prepared by agents of the Department of Health, Education, and Welfare and submitted to Federal district courts for implementation which are without authority of statutory law and which go beyond anything which the Supreme Court of the United States has required.

Mr. President, we recall extended debates on the merits of the Whitten amendments, the provisions of which limited the Department of Health, Education, and Welfare in the matter of requiring busing. We recall that liberal forces in the Senate were successful in attaching an amendment to the Whitten amendment expressed in the term "except as required by the Constitution."

The implication in the exception was that the Department of Health, Education, and Welfare should be limited in its plans and actions unless such plans and actions were authorized by Supreme Court decisions.

In this connection, Mr. President, in Northcross and others against Board of Education of the Memphis, Tenn., City Schools and others, decided March 9, 1970, Chief Justice Burger made this special point, when he said:

As soon as possible, however, we ought to resolve some of the basic practical problems when they are appropriately presented including whether, as a constitutional matter, any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a constitutional matter; and to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court.

Mr. President, some of the school plans prepared by the Department of Health, Education, and Welfare and submitted for implementation by Federal district courts in Alabama treat all of these questions as having been already decided by the Supreme Court. For practical purposes of desegregation of schools the Department of Health, Education, and Welfare and the U.S. Attorney General have constituted themselves a Supreme Court in all matters affecting desegregation of public schools.

They have decided as a matter of constitutional law that racial balance must be achieved in certain schools in the South although the Supreme Court has not said so and the administrative rulings in this regard are not uniformly applied.

Then, too, the Department has decided on its own initiative to what extent school districts and zones must be altered as a constitutional matter. Yet, the Supreme Court has not so decided.

Furthermore, the Department of Health, Education, and Welfare has determined to what extent transportation may or must be provided by the separate local school boards.

Surely, Mr. President, those Senators who were so insistent on compliance with constitutional standards in opposing limitations on the Department of Health, Education, and Welfare will recognize that the Department has acted not as required by the Constitution but as dictated by its own notions.

On the other hand, where the Supreme Court has spoken authoritatively on a particular subject, the Department of Health, Education, and Welfare and the U.S. Attorney General utterly disregard the mandate of the Court.

Let me quote further from Chief Justice Burger who said:

The suggestion that the Court has not defined a unitary school system is not supportable. In Alexander v. Holmes County Board of Education, 396 U.S. 19 (1969), we stated, albeit perhaps too cryptically, that a unitary system was one "within which no person is to be effectively excluded from any school because of race or color."

In the face of this definition, the Department of Health, Education, and Welfare continues to submit desegregation plans which violate this rule in that such plans are designed to effectively exclude literally thousands of schoolchildren from public schools for no other reason than that of race or color.

In some instances the Department of HEW excludes both white and black children from attending public schools in their neighborhoods in order to achieve racial balance and without regard to the will or wishes of the parents and without regard to the health, safety, morals, and general welfare of the children, and without regard to the will, wishes, and authoritative opinion of local school authorities and without regard to the Supreme Court definition of a unitary school system.

In addition, the Department willfully and wantonly redraws school district boundaries and school attendance zones and recommends transportation of children long distances from their homes for no other reason than the race and color of the children involved.

Mr. President, U.S. Senators and U.S. Representatives elected by the people have a right to know beforehand whether school plans prepared by Federal agents and agencies of the Federal Government conform to the law of the land. The evidence is conclusive that the law is being violated.

Mr. President, it is my judgment that every U.S. Senator has a vital interest in the passage of this bill. The plans, the processes, and the procedures now being applied in the Southern States are precisely the plans, processes, and procedures which will be soon applied in all sections of the Nation.

The de facto-de jure distinction is a fabrication of special pleaders in the Department of Health, Education, and Welfare. It will not hold up.

Let me assure Senators that arbitrary and unlawful procedures if permitted to go unchallenged in the South will be the same arbitrary procedures applied in your States. The people of your State will demand explanations and relief no less than the people of Alabama and the South demand explanations and relief.

We ask only that as elected representatives of the people we be informed of the plans, recommendations, and modifications of such which the Department of Health, Education, and Welfare intends to ask Federal courts to implement.

Who can reasonably object to such a request?

S. 4288—INTRODUCTION OF A BILL TO PROVIDE SINGLE ROOM OCCUPANCY HOUSING

Mr. GOODELL. Mr. President, the rooming house poor are among the most forgotten urban citizens. Like the lepers of old, they have become the modern day "untouchables."

In city after city across the Nation single persons who are not a part of any family unit, colonize in the deteriorating areas, and cluster in furnished, single rooms. In the language of urbanology, the members of this group are referred to as "single room occupants" or SRO's. In other quarters, they are cruelly de-

rided as "bums" suited only for skid row areas such as the Bowery in New York.

Whatever the label, these people live in a society which has ignored their unique personal and social needs. As a result, the SRO has been cast out to lead a life of misery and loneliness.

The SRO population is a varied one. In part, it is composed of students and young working people. For this group, single rooms are temporary living arrangements until better incomes enable better housing or until they find permanent lodgings. The aged comprise another part of the SRO population. Although Federal housing legislation and public policy provide housing for the elderly, the lack of adequate elderly housing construction has often made the SRO unit the only housing choice.

The hard-core SRO's however are neither young nor old. They are usually individuals between the ages of 30 and 60. Many are black, the majority are male. Some are employed in low-paying marginal jobs and simply have no alternative housing they can afford. Most are unemployed, however, due to a multitude of disabling physical or psychiatric problems or both. A study of five SRO buildings in New York City revealed that 75 percent of the tenants had chronic diseases or disabilities such as tuberculosis, cirrhosis of the liver, heart conditions, diabetes, blindness, or some form of mental illness. At least one-half of the tenantry was composed of alcoholics and many were hustlers, prostitutes, or narcotics addicts.

SRO's suffer from a unique loneliness and alienation which preempts any community identity. This condition has been called the "disease of non attachment". It is described best by Selma Fraiberg, a University of Michigan psychology professor:

> The life histories of these people . . . reveal no single significant human relationship. The narrative of their lives reads like a vagrant journey with chance encounters and transient partnerships. Since no partner is valued, any one partner can be exchanged for any other; in absence of love, there is no pain in loss. Indeed, the other striking characteristics of such people is their impoverished emotional range. There is no joy, no grief, no guilt, and no remorse.

This personality condition, therefore, makes SRO's unable to relate easily to the society through work, marriage, or child-rearing.

The SRO population is made up largely of recirculating dischargees from medical, psychiatric, or penal institutions. With no means to provide an improved living environment, they return to or become part of the SRO colony. The colony is void of intermediate social and medical services. There, the dischargees lose the benefit of any rehabilitative services received in the institution. Because of the lack of medical services, in addition, illnesses contracted often remain untreated.

These are people most costly to society and yet most difficult to plan for within a community because of the high density of pathology, combined with economic dependency, lack of skills and education, and racial discrimination. Facing such difficulty, society has chosen to ignore the untouchables.

For example, presently there exists no Federal housing program to aid SRO's. Existing SRO housing, which is makeshift at best, is unsuited to meet the special needs and disabilities of the tenants. In addition, most SRO housing is substandard. In New York City, for example, of the 100,000 SRO units, over 50 percent are substandard.

Functionally, an SRO is an impersonalized magnification of an old-fashioned "Mrs. Murphy's rooming house" for single persons. These homes were run by owner-occupants who rented out their few spare rooms to boarders for extra income. At the same time, the landlord insisted on and maintained personal standards of decorum and cleanliness for their home. By contrast, the number of units in a large SRO is usually around 100 and the management lives off the premises.

By and large, the SRO housing, which includes rooming houses, transient hotels, and group residences, was never designed for its present function. In some instances, the buildings were originally respectable, middle-class hotels. As the area began to deteriorate, the clientele was drawn off to other hotels. In order to maintain a stream of income, the owners began renting rooms, on a regular basis, to SRO's. With the invasion of the SRO, the remaining respectable clientele was quickly driven off.

More usually, the SRO buildings are converted apartment houses. With makeshift alterations, the character of the building is changed from one that caters to the moderate-income family to one that houses the roominghouse poor. The owners will leave the apartment door open and put locks on each of the individual rooms within the apartment, except for the commonly shared kitchen and bath. The former apartment can house between six and nine SRO's at a rate of $10 to $30 per week per room which is often 30 to 40 percent of the tenant's income.

The conversion produces cramped, poorly lit accommodations with little furniture and few amenities. The increased number of people results in heavy stress on the building's utilities and physical structure which means more repairs. Building violations increase and elementary housekeeping service becomes difficult.

It is not hard to imagine what will become the state of a bathroom or kitchen used by six or eight persons, none of whom has the responsibility for keeping it clean while most of them must lack the motivation to care. Likewise, food preparation is severely limited in a common kitchen where people must take turns cooking and where an unlocked refrigerator door is a temptation to steal food left behind. As a result of these conditions, food preparation, which mainly consists of inexpensive meals such as potatoes, beans, and rice, is sporadic and hunger and malnutrition is widespread. Additionally the lack of adequate kitchen facilities causes residents to spend a disproportionate amount of their income on food.

Because doors to the rooms were never intended to be barriers to the public, they serve no protective purpose. Privacy becomes a luxury and theft becomes commonplace.

The process of deterioration, caused in part by tenant apathy and carelessness, is matched by landlord and management indifference. It is also accompanied by the economics of this real estate which requires minimal investment and maximum return.

Maintenance services are almost nonexistent. The hallways and lobbies are strewn with trash, and rats and roaches are commonplace. Seldom does the management designate anyone for maintaining order or cleanliness in the building. This attitude does not provide an incentive to SRO tenants to keep their rooms clean and tidy.

In order to maintain a full house, management of SRO buildings often establish so-called wide-open buildings. In such places, no prospective tenant is screened or refused. The most corrupt are, therefore, permitted to join and infect an already disabled tenantry. Moreover, no internal order is enforced among tenants by the management. Tenants have no protection from exposure to violent and criminal fellow occupants.

Since management has not provided any custodial care or supervision of the tenants, ill and dying occupants have been reported to remain in their rooms for days—unaided and unobserved. Furthermore, there is no adequate space available within the converted SRO buildings in which to locate and pursue service programs to help the occupants with therapeutic and rehabilitative efforts.

There is also evidence to show that there is some management complicity in SRO crime. Occasionally, there is mutual cooperation between managers and tenants engaged in illegal activities such as prostitution and narcotics peddling. In other cases, management itself will sell wine and alcohol to resident alcoholics at inflated prices.

The immediate SRO environment has a deteriorating influence on the tenants. In addition, however, there is a recurrent process of deterioration in the area and community surrounding SRO buildings.

SRO tenants, addicted to alcohol and narcotics, must commit crimes to support their habits. The high crime rates of the areas, involving petty theft, robberies and stickups make the neighborhood hazardous. Moreover, emotional disturbances within the SRO community produce an atmosphere ridden with tension. Inevitably these elements produce an unsafe neighborhood. Neighbors react adversely to the sight of SRO's and often unpleasant street encounters make living in the area wholly undesirable.

The socially productive neighbors begin to move out as SRO tenants increase in number. There follows a rapid deterioration of the area, as some buildings become abandoned and become inhabited by evicted SRO's and other vagrants. Gradually, in most cases, the areas become slated for urban renewal. The renewal activities cause the exodus of the SRO's to nearby areas where the same cycle of blight and deterioration continues.

Improvement of the SRO housing would clearly seem to be in the best in-

terests of the tenants and the surrounding neighborhoods. More importantly, serious efforts to reeducate and rehabilitate SRO's could make this group more socially productive.

The lack of adequate standard SRO housing is a primary need. The Federal Government does not provide financial assistance for such housing. Previously, housing assistance for low-income families and the elderly has been based on the concept that all children deserve a proper physical environment in which to grow up and that elderly parents are entitled to some comfort in their declining years. The SRO is, of course, in neither category and cannot be classified along with the others as "worthy poor."

This archaic attitude which has prevented governmental action must no longer inhibit assistance to provide SRO housing. Billions of dollars in Federal funds have been spent for urban renewal projects and all too often the result has been the exodus of SRO occupants from one area to another, carrying with it the seeds of slum, blight, and neighborhood deterioration. Without correcting the conditions under which SRO's live, they will continue to infect urban neighborhoods which will ultimately result in continuing expenditure of Federal and local funds for urban renewal.

The bill I introduce today would provide much needed housing assistance for single room occupants. It would amend the section 236 rental assistance program, the rent supplement program and the public housing program to permit the construction of dormitory-type housing and the rehabilitation of existing structures, for low-income, single persons. Maximum feasible use would be made of shared facilities such as common dining areas, community kitchens, and common baths.

Adequate design and occupancy standards shall be set by HUD for any housing constructed or rehabilitated under the authority of this bill. These standards shall reflect the recommendations of the Secretary of Health, Education, and Welfare as to the appropriate design and facilities for dormitory-type housing and they shall insure the highest quality of housing for SRO's.

The management of SRO housing is critical to its success. For that reason, provisions in my bill provide that maintenance costs be included within the total project cost allowed by the Federal Government. In determining the eligible mortgage limits in section 236, the fair market rental for the rent supplement program, and the amount of annual Federal contribution for public housing, management services shall be eligible for inclusion whether they are performed by the private developer or public housing agency responsible for the construction of the project, or if they are performed by contract with a private management firm. Moreover, an additional authorization of $5 million has been requested for management and tenant services in section 236 projects.

Clearly, responsible management will not be able to cure the complex problems of the SRO. It can, however, create a more healthy physical environment for these tenants. With proper funding, it can also attempt to provide guidance and counsel for SRO's with respect to budgeting income or gaining employment. It can provide mechanisms to insure tenant security. An imaginative staff could also provide a daily meal service for a minimum fee to insure the much-needed nutritional diet for tenants.

By these and other methods it is possible that an energetic management program could be created to instill a community feeling—and a more healthy emotional environment—for SRO tenants who have isolated themselves from any outside contact.

In order to insure that a disproportionate amount of funds will not be used for SRO housing I have included a provision that not more than 10 percent of the aggregate of funds from section 236 units and public housing be used for SRO units.

Finally, because the concept of dormitory housing is new to Federal housing programs, the Secretary of the Department of Housing and Urban Development is authorized to conduct several demonstration projects, in coordination with advice from the Secretary of HEW, in order to develop standards for the design, construction, and management of this housing including projections of the cost savings that may result from the use of common facilities.

I believe that this housing is long past due. I believe it deserves the support of my colleagues, if not for the sake of the SRO occupants themselves, then for the benefit of the larger urban community in which millions of people, including the SRO's, exist.

I ask unanimous consent that the full text of my bill, S. 4288, be printed in the RECORD.

The PRESIDING OFFICER (Mr. FANNIN). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4288) to authorize assistance under the section 236, rent supplement, and public housing programs for dormitory-type housing for low-income single persons; introduced by Mr. GOODELL, was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

S. 4288

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO SECTION 236 OF THE NATIONAL HOUSING ACT

SEC. 1. (a) Section 236 (j) (5) (C) of the National Housing Act is amended to read as follows:

"(C) be designed primarily for use as (i) a rental project to be occupied by lower income families or by elderly or handicapped families: *Provided*, That lower income persons who are less than sixty-two years of age shall be eligible for occupancy in such a project, but not more than 10 per centum of the dwelling units in a project, other than dormitory-type rental housing, shall be available for occupancy by such persons, or (ii) dormitory-type rental housing to be occupied by lower income single individuals, particularly those who have been displaced (within the meaning given that term by the last paragraph of section 221(f)): *Provided*, That not more than 10 per centum of the total amount of interest reduction payments authorized to be made after June 30, 1970 shall be made with respect to single persons less than 62 years of age occupying dormitory-type rental housing; *Provided further*, That in the planning and construction of housing designed for such occupancy maximum feasible use shall be made of common baths, community kitchens, common dining areas, and other shared facilities, with the construction being undertaken in an economical manner and the project not being of elaborate or extravagant design or materials, and the Secretary may by regulation modify the requirements specified in subsection (d) (3) of section 221 to the extent appropriate to reflect the cost of providing and managing such shared facilities and any savings realized through the use of such facilities. New housing, including existing housing to be substantially rehabilitated for dormitory-type accommodations, shall conform to adequate design and occupancy standards and shall reflect the recommendations of the Secretary of Health, Education and Welfare as to the appropriate design and facilities for such housing."

(b) Section 236(k) of such Act is amended—

(1) by striking out "and" the first place it appears; and

(2) by inserting before the period the following: "; the term 'dormitory-type housing' means newly constructed or existing housing which undergoes major rehabilitation or other existing housing providing dwelling accommodations for single individuals of low income, making maximum feasible use of common baths, community kitchens, common dining areas and other shared facilities".

(c) Section 236(g) of such Act is amended by striking out "charges. Such" and inserting in lieu thereof the following: "charges; except, that in the case of dormitory-type housing, the owner may utilize such excess rental charges to the extent required to meet the costs of adequate management and tenant services, including the operation of common facilities, whether such services are performed directly through his own staff or by contract with a qualified private manager. Subject to the exception set forth in the preceding sentence, such".

(d) Section 236(1)(1) of such Act is amended by adding at the end thereof a new sentence as follows: "In addition to the foregoing authorization, there is authorized to be appropriated, to remain available until expended, not to exceed $5,000,000 to be utilized by the Secretary to assist owners of dormitory-type housing to cover any management costs not covered by basic rental charges, or by excess rental charges available pursuant to subsection (g).

RENT SUPPLEMENTS

SEC. 2. (a) Section 101 of the Housing and Urban Development Act of 1965 is amended by adding at the end thereof a new subsection as follows:

"(k) Nothing in this section shall be construed as preventing payments to a housing owner with respect to property which provides through new construction or the substantial rehabilitation of existing structures dormitory-type rental accommodations for single individuals who are qualified tenants, and which makes maximum feasible use of common baths, community kitchens, common dining areas, and other shared facilities. In determining the fair market rental for dwelling units in such property under subsection (d) and the cost of operation of such property under subsection (e)(4), the

Secretary shall take into account the cost of providing and managing such shared facilities and any savings realized through the use of such facilities."

(b) Section 101 (j)(1)(D) of such Act is amended by inserting after "limitation" the following: "does not apply to dormitory-type housing so financed and in the case of other property so financed such limitation".

PUBLIC HOUSING

SEC. 3. (a) Section 2 of the Housing Act of 1937 is amended by adding at the end thereof a new paragraph as follows:

"(15) The term 'dormitory-type housing' means low-rent housing consisting of newly constructed or existing housing which undergoes major rehabilitation or other existing housing providing dwelling accommodations for single individuals of low income, making maximum feasible use of common baths, community kitchens, common dining areas and other shared facilities."

(b)(1) The second sentence of section 2(2) of such Act is amended by inserting "(A)" after "includes" where it first appears, by striking out "and includes" and inserting in lieu thereof "(B)", and by inserting before the period at the end thereof the following: ', and (C) an eligible single nonelderly person".

(2) Section 10(e) of such Act is amended by inserting before the period at the end of the last proviso the following: ": *Provided further*, That not more than 10 per centum of the annual contributions contracted to be made in any fiscal year commencing after June 30, 1970, shall be made with respect to dormitory-type housing".

(c) The third sentence of section 10(b) of such Act is amended by inserting after "or other appropriate factors" the following: ", including, in the case of dormitory-type housing, the cost of providing adequate management and tenant services (including the operation of common facilities), whether such services are performed directly by the public housing agency or by contract".

(d) Section 15(5) of such Act is amended—

(1) by inserting "(A)" after "exceed" the first place it appears;

(2) by inserting before the period at the end of the first sentence the following: ", and (B), in the case of dormitory-type housing, the cost of providing and managing shared facilities taking into account any savings realized through the use of such facilities"; and

(3) by inserting after the second sentence the following: "Newly constructed or substantially rehabilitated dormitory-type housing shall conform to adequate design and occupancy standards and shall reflect the recommendations of the Secretary of Health, Education, and Welfare as to the appropriate design and the facilities in connection therewith."

(e) Section 23 of such Act is amended—

(1) by inserting after "existing structure" in subsection (a)(3) the following: "(including appropriate facilities in dormitory-type housing)"; and

(2) by inserting before the semicolon at the end of subsection (d)(4) the following: ": *Provided*, That in determining the standards for management services required in connection with dormitory-type housing full consideration shall be given to the special requirements related to management of common facilities and tenant services".

DORMITORY TYPE HOUSING DEMONSTRATION PROJECTS

SEC. 4. (a) In order to assist in the development of standards for the design, construction, and management of dormitory-type housing facilities, including any cost savings that may result from the use of common baths, community kitchens, common dining areas and other shared facilities, the Secretary of Housing and Urban Development is authorized to undertake demonstrations in connection with the initial developments of dormitory-type housing, in sufficient number to represent an adequate testing to establish standards for site and structure design, construction standards, and management arrangements, including tenant services required or desirable in such housing. In carrying out these demonstrations, existing design, construction, and management requirements shall not be applicable. The Secretary shall seek the advice of the Secretary of Health, Education, and Welfare in the formulation and testing of these demonstrations. The Secretary may enter into contracts, agreements, or financial undertakings with local housing authorities, Federally-insured mortgages, or other persons as he deems necessary or desirable to carry out the purposes of this section. The Secretary may make such investigation and analyses of data and publish and distribute such reports, as he determines to be necessary or desirable to assure the most beneficial use of the data and information to be acquired as a result of these demonstrations.

S. 4290—INTRODUCTION OF A BILL TO AMEND SECTION 14 OF THE NATURAL GAS ACT

Mr. BYRD of West Virginia. Mr. President, on behalf of the Senator from Washington (Mr. MAGNUSON), I introduce, for appropriate reference, a bill to amend section 14 of the Natural Gas Act. I ask unanimous consent that a statement, prepared by Mr. MAGNUSON, be printed in the RECORD, together with the text of the bill and a letter of transmittal.

The PRESIDING OFFICER (Mr. HUGHES). The bill will be received and appropriately referred; and, without objection, the bill, statement, and letter will be printed in the RECORD.

The bill (S. 4290) to amend section 14 of the Natural Gas Act, introduced by Mr. BYRD of West Virginia (for Mr. MAGNUSON), was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 4290

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 14 of the Natural Gas Act, as amended (15 U.S. 717m), is amended by adding two new subsections as follows:

"(i) The Commission is further authorized and directed to conduct studies of the production, gathering, storage, transportation, distribution, and sale of natural or artificial gas, however produced, throughout the United States and its possessions whether or not otherwise subject to the jurisdiction of the Commission, including the production, gathering, storage, transportation, distribution, and sale of natural or artificial gas by any agency, authority, or instrumentality of the United States, or of any State or municipality or political subdivision of a State. It shall, so far as practicable, secure and keep current information regarding the ownership, operation, management, and control of all facilities for such production, gathering, storage, transportation, distribution, and sale, the total estimated natural gas reserves of fields or reservoirs and the current utilization of natural gas and the relationship between the two; the cost of production, gathering, storage, transportation, distribution, and sale; the rates, charges, and contracts in respect to the sale of natural gas and its service to residential, rural, commercial, and industrial consumers, and other purchasers by private and public agencies; and the relation of any and all such facts to the development of conservation, industry, commerce, and the national defense. The Commission shall report to Congress and may publish and make available as provided by subsection (a) the results of studies made under authority of this subsection.

"(j) The Commission in making studies, investigations and reports under this section shall utilize, insofar as practicable, the services, studies, reports, information, and continuing investigational programs of existing departments, bureaus, offices, agencies, and other entities of the United States, of the respective States and of the natural gas industry. Nothing in this section shall be construed as modifying, reassigning, or otherwise affecting the investigating and reporting activities, duties, powers, and functions of any other department, bureau, office, or agency in the Federal Government."

The statement of Mr. MAGNUSON is as follows:

INTRODUCTORY STATEMENT OF WARREN G. MAGNUSON

Mr. President, I would like to introduce, for appropriate reference, a bill to amend Section 14 of the Natural Gas Act to assign the Federal Power Commission broadened responsibility to gather information concerning the natural gas industry and to publish compilations of such information for the benefit of the Congress, consumers, responsible government agencies, investors and the industry.

The letter, ordered to be printed in the RECORD, is as follows:

FEDERAL POWER COMMISSION,
Washington, August 17, 1970.

Hon. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith for the consideration of the appropriate committee are twenty copies of a draft bill to amend section 14 of the Natural Gas Act to assign the Federal Power Commission broadened responsibility to gather information concerning the natural gas industry and to publish compilations of such information for the benefit of Congress, consumers, responsible government agencies, investors, and the industry. The amendment would be comparable to existing provisions of the Federal Power Act.

The natural gas industry supplies approximately one-third of the nation's total energy requirements. The continued prosperity of this vital industry will depend on progress in the industry itself, conscientious public regulation, and an informed public.

By section 311 of the Federal Power Act the Congress has authorized the Commission to secure information from electric utilities and to publish such data on a regular basis; and today statistics published by the Federal Power Commission facilitate the appraisal of rates and practices of electirc distribution utilities. Both gas and electric utilities are excused from the industrial censuses, apparently on the theory that the Commission's regular statistical programs fully cover the field. But the Congress has not yet provided a parallel sustained program of public information on the gas distribution utilities, even though these gas utilities are increasingly engaged in competition with the electric utilities.

At present the Commission may secure reports from natural gas companies subject to its jurisdiction and may also investigate to determine whether any person has violated the Natural Gas Act (or is about to violate

the Act) or to obtain information to serve as a basis for legislative recommendations to the Congress. Although about two-thirds of the natural gas used in this country enters interstate commerce, and consequently comes under FPC jurisdiction for a time, the ultimate distribution of the gas is generally by companies not subject to FPC jurisdiction.

Congress has concluded, in section 1(a) of the Natural Gas Act, that "the business of transporting and selling natural gas for ultimate distribution to the public is affected with a public interest" and has provided for Federal regulation of interstate transportation and sales for resale to complement and support state regulation of the ultimate sales to consumers. In view of the Federal regulatory commitment to assure just and reasonable rates to the distribution companies, we believe that Congress and the public are entitled to comprehensive information concerning the ultimate distribution of gas.

Determinations entrusted to the Commission significantly affect gas supply and requirements. We believe that increased access to comprehensive data would permit more readily to evaluate the implications of matters coming before us for decision and would, thereby, serve the interests of both the regulated industry and the public.

The bill would not expand the regulatory responsibility of the Commission. It is intended solely to enhance the Commission's ability to gather and publish information. Although some gas industry statistics are now collected by a variety of private and Government agencies for limited purposes and, in most cases, on a voluntary basis, no Government body is responsible for securing and publishing statistics on all phases of the gas industry from producing well to burner tip. The bill would direct the Commission to use all available data sources in the Federal Government, the States and the natural gas industry before the Commission seeks information from individual companies but the bill would improve upon the information now available to satisfy public needs. For example, the bill would strengthen the public's right to authoritative and impartial information in areas such as:

(1) Data on the retail price of gas in all parts of the country, comparable to data in the Commission's publication of "Typical Electric Bills" for cities over 2,500 population. Apart from summary data for two dozen larger metropolitan areas, no agency publishes data comparable to "Typical Electric Bills." Such information would help the consumer spotlight out-of-line prices and stimulate companies to improve performance.

(2) Annual summaries of financial and operating information of individual gas companies comparable to data on interstate gas pipeline and electric companies the Commission now publishes. This would be of particular aid to the investing public. No agency now publishes such summaries. The bill would not expand the Commission authority to collect and publish financial and operating information concerning diversified activities of natural gas producers not directly related to the production and sale of natural gas.

With better data the Commission would also be able to exercise its regulatory powers more efficiently. For example, the Commission may need a study of the retail market beyond its regulatory jurisdiction in order to decide whether to approve a proposed jurisdictional pipeline project. It now requires natural gas pipeline transmission companies to submit evidence on their proposed markets with certificate applications. The Commission must, in turn, evaluate such evidence and initiate studies in each particular case. This ad hoc procedure may delay completion of the case, and could be streamlined if the Commission were empowered to collect data on retail markets on a broad continuing basis.

Industry associations are undertaking substantial improvements in their data systems, but further information would be useful to our Commission, to State commissions, to defense agencies for use in planning for emergencies, and to Congress to keep informed on the state of the natural gas industry. Thus at present, no authoritative source collects and publishes gas reserves for each of the major gas fields and reservoirs. At least two States (California and Mississippi) publish such details but most producing States do not. Some associations and private parties publish certain conglomerate data, undifferentiated, however, as to field or reservoir and without full disclosure of the source of accuracy of the basic information. The bill would direct the Commission to secure data on gas reserves on a field or reservoir, rather than company basis, in order to protect certain confidential industry information.

The natural gas industry, as a part of a private market economy, would itself operate more efficiently with more accurate and more comprehensive data. The bill would provide a means whereby information now in the possession of individual members of the natural gas industry but inaccessible to the public would be gathered by a single agency and made generally available.

We envision no difficulty in compliance by, or undue hardship upon, those who would be expected to report. The bill minimizes any reporting burden on individual companies by directing the use of all available government and industry information sources.

The Bureau of the Budget advises that enactment of the proposed bill would be consistent with the Administration's objectives.

Sincerely,

JOHN N. NASSIKAS,
Chairman.

SENATE JOINT RESOLUTION 232—INTRODUCTION OF A JOINT RESOLUTION TO ESTABLISH "NATIONAL GOOD GROOMING WEEK"

Mr. COOK. Mr. President, the more than 38,000 drycleaners in America are proud of their role as one of the active forces that help Americans maintain their status as the best groomed people in the world.

Representatives of the drycleaning industry are located in every community in the United States, and employ over 300,000 persons.

Thanks to this industry, Americans may go to work, to school, to church, or to social gatherings in clean freshly pressed garments composed of a variety of materials and styles.

The national association of this industry maintains research facilities and schools which insure that the Nation's drycleaners will be able to service whatever new styles and materials that the American public might wish to wear. They also maintain liaison with the garment manufacturing industry to insure that new fashions will be serviceable.

Last year Americans spent over $2⅓ billion on drycleaning. This figure shows that U.S. citizens are still very much concerned about their appearance and grooming, despite indications to the contrary.

Therefore, America's drycleaners, acting as representative small businessmen serving citizens in virtually every community, urge that a joint resolution be passed designating the period of November 16 through November 22, 1970, as "Good Grooming Week." During this period the drycleaning industry may be joined by all business and community groups who wish to emphasize the importance of good grooming in a joint effort to promote the virtues of this desirable character trait throughout our Nation.

I hope that all my colleagues will join with me in supporting the joint resolution that I introduced which is so necessarily desired by the drycleaning industry as a tribute to all Americans who recognize the importance of good grooming habits in their everyday life, and in doing so, convey a most favorable impression of the American poeple to the rest of the world.

The PRESIDING OFFICER (Mr. FANNIN). The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 232) to establish "National Good Grooming Week," introduced by Mr. COOK, was received, read twice by its title, and referred to the Committee on the Judiciary.

ADDITIONAL COSPONSORS OF BILLS

S. 4080 AND S. 4081

Mr. ERVIN. Mr. President, during the debate on the conference report of the District of Columbia crime bill, a number of Senators asked to be listed as cosponsors of the alternative bills, S. 4080 and S. 4081, which I and other opponents of the conference bill had introduced. In order to make the record complete, I ask that the Senators from Washington (Mr. JACKSON and Mr. MAGNUSON) and the Senator from Minnesota (Mr. MONDALE) be added as cosponsors. All of the cosponsors of S. 4080 and S. 4081 are also cosponsors of amendments numbered 776 and 777, to H.R. 914, which are identical in language to the two bills.

S. 4080 is designed to reorganize the courts of the District of Columbia, improve the District of Columbia Bail Agency, authorize a District of Columbia Public Defender Agency, allow the District of Columbia to participate in the Interstate Compact on Juveniles, and for other purposes. S. 4081 is designed to revise the laws of the District of Columbia relating to criminal law and procedure, and to extend the life of the Commission on Revision of Criminal Laws, and for other purposes.

ADDITIONAL COSPONSOR OF A JOINT RESOLUTION

SENATE JOINT RESOLUTION 229

At the request of the Senator from Oklahoma (Mr. HARRIS), the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of the joint resolution (S.J. Res. 229) to establish National Good Grooming Week.

SENATE RESOLUTION 455—SUBMISSION OF A RESOLUTION DESIGNATING JANUARY 22 AS UKRAINIAN INDEPENDENCE DAY

Mr. SCHWEIKER. Mr. President, I submit a resolution which authorizes and requests the President to issue a proclamation designating January 22 of each year as Ukrainian Independence Day, and inviting the people of the United States to observe that day with appropriate ceremonies.

I am pleased that the following Senators are joining me as cosponsors of this resolution: the Senator from North Dakota (Mr. BURDICK), the Senator from Connecticut (Mr. DODD), the Senator from Kansas (Mr. DOLE), the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Oregon (Mr. PACKWOOD), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Pennsylvania (Mr. SCOTT), the Senator from South Carolina (Mr. THURMOND), and the Senator from New Jersey (Mr. WILLIAMS).

The valiant Ukrainian people have struggled to obtain their independence for hundreds of years and even now, 48 years after their successful attempt declare their country a republic, they persist in their efforts to establish their independence. The Ukrainians dreamed of independence over long centuries of domination and after many years of struggle, their hopes were realized on January 22, 1918, when they proclaimed their national independence.

Unfortunately, this dream of independence lasted for only a short period. By 1920, Red army troops, following the precedents set by the czars, overran and enslaved the Ukraine. The young republic disappeared as quickly as it had been born only 2 years earlier. The country was incorporated into the Soviet Union and even today remains subjugated by the U.S.S.R. Forty-eight years later, millions of Ukrainians are prisoners in their own homeland, virtually isolated from the free world. Nevertheless, the indomitable yearning for freedom remains alive in the hearts and minds of these spirited people.

Let us in the free world honor these valiant people by observing each year the anniversary of their independence day with the hope that they will once again regain their independence, freedom, and national dignity.

The PRESIDING OFFICER (Mr. THURMOND). The resolution will be received and appropriately referred.

The resolution (S. Res. 455), which reads as follows, was referred to the Committee on the Judiciary:

S. RES. 455

Whereas Ukraine, with a population of forty-seven million, is the largest non-Russian nation both in the Union of Soviet Socialist Republics and in Eastern Europe; and

Whereas this nation occupies a significant geographic and economic position in the context of Eurasia, with prominent dimensions toward central Asia, the Caucasus, the Middle East, and central Europe; and

Whereas this second largest Slavic people, with a national history extending back to the ninth centry, has made substantial contributions to world culture and today possesses immense potentialities and promise for further universal cultural advancement; and

Whereas, in partial recognition of these cultural contributions toward civilization and peace, the Eighty-sixth Congress of these United States of America passed the Shevchenko Memorial resolution, leading to the erection of a statute of Taras Shevchenko, the poet of Ukraine, on public grounds in our Nation's capital; and

Whereas the critical importance of this non-Russian nation in world affairs has been obliquely reflected in the original charter membership of the U.S.S.R.; that is, the Ukranian Soviet Socialist Republic, in the United Nations; and

Whereas the contemporary status of Ukraine has been reflected in the Captive Nations Week Resolution passed by the Eighty-sixth Congress in July 1959, and signed by President Dwight D. Eisenhower into Public Law 86-90; and

Whereas for the past two decades the Congress, Governors of our major States, and mayors in our largest cities have consistently observed the indomitable spirit of independence and creative assertions of the Ukrainian people; and

Whereas the independent Ukrainian National Republic, which was established by democratic, popular vote and national self-determination on January 22, 1918, was one of the first to proclaim freedom for its people in the area of the traditional Russian Empire: Now, therefore, be it

Resolved, That the President is authorized and requested to issue a proclamation designating January 22 of each year (the anniversary of the proclamation which declared Ukraine to be a free and independent republic) as Ukrainian Independence Day, and inviting the people of the United States to observe such day with appropriate ceremonies.

SENATE RESOLUTION 456—SUBMISSION OF A RESOLUTION TO PROVIDE FOR AN INVESTIGATION RELATING TO THE INTRODUCTION OF CERTAIN PRIVATE RELIEF BILLS

Mr. WILLIAMS of Delaware submitted a resolution (S. Res. 456) to provide for an investigation by the Committee on the Judiciary with respect to the practices of private persons in fixing fees charged for procuring the introduction into Congress of certain private relief bills benefiting aliens, which was referred to the Committee on the Judiciary.

(The remarks of Mr. WILLIAMS of Delaware when he submitted the resolution appear later in the RECORD under the appropriate heading.)

SENATE RESOLUTION 457—SUBMISSION OF A RESOLUTION AUTHORIZING THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO CONDUCT A STUDY AND INVESTIGATION CONCERNING THE SHORTAGE OF COAL EXISTING IN THE UNITED STATES

Mr. COOPER (for himself, Mr. RANDOLPH, Mr. BAKER, Mr. BYRD of West Virginia, Mr. COOK, Mr. JORDAN of North Carolina, Mr. SPONG, Mr. SPARKMAN, Mr. SCOTT, Mr. THURMOND, Mr. GRIFFIN, and Mr. MAGNUSON) submitted a resolution (S. Res. 457) authorizing the Committee on Interior and Insular Affairs to conduct a study and investigation concerning the shortage of coal existing in the United States, which was referred to the Committee on Interior and Insular Affairs.

(The remarks of Mr. COOPER when he submitted the resolution appear later in the RECORD under the appropriate heading.)

FOREIGN ASSISTANCE APPROPRIATIONS BILL, 1971—AMENDMENT

AMENDMENT NO. 859

Mr. GOLDWATER submitted an amendment, intended to be proposed by him, to the bill (H.R. 17867) making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1971, and for other purposes, which was referred to the Committee on Appropriations and ordered to be printed.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES—AMENDMENT

AMENDMENT NO. 860

Mr. PERCY submitted an amendment, intended to be proposed by him, to the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 861

Mr. PROXMIRE (for himself, Mr. MATHIAS, Mr. CRANSTON, Mr. EAGLETON, Mr. GOODELL, Mr. HART, Mr. HARTKE, Mr. HATFIELD, Mr. MCGOVERN, Mr. NELSON, and Mr. SAXBE) submitted an amendment, intended to be proposed by them, jointly, to House bill 17123, supra, which was ordered to lie on the table and to be printed.

(The remarks of Mr. PROXMIRE when he submitted the amendment appear later in the RECORD under the appropriate heading.)

NOTICE OF HEARINGS ON SENATE JOINT RESOLUTION 231, A JOINT RESOLUTION PROPOSING AN AMENDMENT TO THE CONSTITUTION OF THE UNITED STATES TO ABOLISH UNFAIR LEGAL DISCRIMINATION AGAINST WOMEN WITHOUT ROBBING THEM OF NECESSARY LEGAL PROTECTION

Mr. ERVIN. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice of public hearings to be held on September 9, 10, and 11, 1970, by the full committee on Senate Joint Resolution 231, a joint resolution proposing an amendment to the Constitution of the United States to abolish unfair legal discrimination against women without robbing them of necessary legal protection.

Persons desiring to appear and give testimony with respect to this proposed legislation should notify the staff of the committee as soon as possible.

The hearings will commence at 10 a.m. on September 9, 10, and 11 in the main Judiciary Committee Room, 2228 New Senate Office Building.

NOTICE OF HEARINGS ON HOUSE JOINT RESOLUTION 264, A JOINT RESOLUTION PROPOSING AN AMENDMENT TO THE CONSTITUTION OF THE UNITED STATES RELATIVE TO EQUAL RIGHTS FOR MEN AND WOMEN

Mr. ERVIN. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice of public hearings to be held on September 9, 10, and 11, 1970, by the full committee on House Joint Resolution 264, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women.

Persons desiring to appear and give testimony with respect to this proposed legislation should notify the staff of the committee as soon as possible.

The hearings will commence at 10 a.m. on September 9, 10, and 11 in the main Judiciary Committee Room, 2228 New Senate Office Building.

ADDITIONAL STATEMENTS OF SENATORS

AID TO NURSING SCHOOLS—1971 HEALTH MANPOWER APPROPRIATIONS

Mr. HATFIELD. Mr. President, I share a great concern with many others in the Nation about the manpower shortages that exist in this country within the medical profession. That concern is increased when projected needs for nurses and physicians are growing faster than our attempts to meet those needs. I would like to address my comments today to the needs that exist in the field of nursing.

The Public Health Service estimates that the Nation must produce 81,000 professional nurses annually by 1974 if it is to meet the demands generated by present population growth rates. The Public Health Service also estimates that annual production of practical nurses must reach 60,000 by the same time. This past year 42,169 graduate nurses and 34,864 practical nurses completed their schooling. This means that our annual production of nurses must nearly double in the next 5 years.

With health services in short supply and demand for those services increasing, we must act to solve this crisis. The physician and the nurse are the key figures in the health team and neither can function properly without the other. The fact that some segments of our society are going without adequate care calls for meeting this challenge with an adequate solution.

In order to meet the demand for more nurses, the Senate should support all levels of nurse education. This education is offered through three types of programs across the country.

The baccalaureate degree program is a 4-year university-oriented education. This program is presently graduating the smallest number of students. There are 254 such programs and they graduated 8,381 students this past year. The majority of students in this program go into administrative or teaching services.

The associate degree program is the fastest growing of the three programs. There are presently 390 of these programs with many more expected and planned if there is enough money available to allow them to spread. This is a 2-year course established on the community college level. In 1969, these schools graduated 8,701 students. This type of school affords the most hope in meeting the demanded increase for the future.

The third and largest program in nursing education is the diploma school. These schools, which are also known as hospital schools, graduated 25,114 students last year. This was about 60 percent of all students graduated. There are presently 695 of these programs in operation.

All three of these programs need assistance if they are to live up to the needs they must meet. The whole nursing profession is dependent upon the development of each of these programs simultaneously. The diploma school is presently the biggest producer of bedside nurses so important to direct patient care. The associate program is important for two reasons: First of all it also is training bedside nurses and, as this type of program multiplies, it someday will be the largest producer of this type of nurse. In addition, it provides a background for additional training in the baccalaureate program. The baccalaureate program is esssential because it must produce the leadership and teachers necessary to expand the other two programs. The associate and diploma programs are necessary because it is they which must fulfill the actual manpower needs. Therefore, we cannot point to one of these programs as more important than the others because the nursing programs are intradependent and equally important. All three must be given assistance in order to provide an efficient increase in numbers.

Each of these programs is at present in some kind of financial need. The associate and baccalaureate programs need funds in order to expand and improve their services. The diploma schools are the only ones which need money immediately simply in order to continue operating. These institutions are going hundreds of thousands of dollars in debt each year because they are receiving only fractional public support. Their needs lie in the area of administrative costs. The present law under which diploma schools should receive aid is the 1968 Health Manpower Act.

In section II of this act, money is provided for institutional support. The amount authorized for institutional support is $40,000,000. In the act, institutional support is divided into two categories; special projects and institutional grants. According to this law, $15,000,000 must be allocated to special projects before any of the remaining authorization can be used for institutional support. I recognize the need and intent of special projects as necessary for growth and improvement, but some institutions need to receive some institutional grants in order to simply carry on the normal costs of operation. This certainly must happen before they can expand or improve. The administration's original request for this coming year in the area of special projects is $11,000,000. This means that no money is available for institutional grants which the diploma schools need in order to continue to operate.

In 1966 there were 821 diploma schools in this country. Today there are 695. Last year 35 of these schools had to close. It is true that in the course of time, these schools may fade out as the largest producer of nurses and be replaced by the addition of large numbers of associate programs. However, in order to meet the needs of the next 5 years, it is imperative that these schools continue to operate. The past and present closures of these schools has been predicated upon a lack of money for operational costs. I think these facts in themselves explain why it is necessary for the Congress to do all in its power to increase Federal aid to nursing schools at this particular time.

Just as it is necessary for the diploma schools to receive aid, it is also necessary for the other two types of programs. This is true because it is a prerequisite in order for them to fulfill their obligation to provide the administrative and teaching leadership necessary for the expansion of all phases of nursing education. The area of traineeships for professional nurses is one of vital need in this type of preparation. Under the 1968 act, $19,000,000 was authorized for this purpose. The administration's request is $10,470,000. It is clear that the need exists here also.

Mr. President, as I have stated so many times before, I think that the money we should be using in programs such as aid to nursing schools is being squandered on the war in Southeast Asia. I am dismayed by the apparent imbalance in our national priorities.

The war in Vietnam is costing us about $46,000,000 a day to carry on. When we compare this to the administration's request of $64,587,000 for aid to nursing, we find that the total year's expenditures for aid to nursing is equal to about one and a half days of Vietnam. Just a week's worth of the monies being spent in Vietnam would provide the nursing profession with the necessary money to begin meeting the tremendous increase that is required of them.

Mr. President, we must turn our attention to the present need in health manpower training and support for our nursing schools. While these institutions are in an apparent period of growth and transition, their current needs must be supported.

I ask unanimous consent that an illustrative table of the current situation concerning these funds be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL FUNDS FOR NURSING—FISCAL YEAR 1971

	Authorization	Administration request
1. Construction grants to schools of nursing	$35,000,000	$8,000,000
2. Scholarships	(1)	17,000,000
3. Loans	21,000,000	9,610,000
4. Special project grants for improvement in nurse training	40,000,000	11,000,000
5. Institutional grants		(2)
6. Traineeships for professional nurses	19,000,000	10,740,000
7. Special fellowships in nurse research	(3)	650,000
8. Research training	(3)	700,000
9. Research grants	(3)	2,455,000
10. Direct operations	(3)	4,702,000

[1] No specific authorization.
[2] None.
[3] Not available.

Mr. HATFIELD. Mr. President, I hope that Senators in whose States institutions now are facing these problems, will take heed and appropriate the funds so vital to meeting the health manpower crisis of the Nation.

WHAT IS TRUE PATRIOTISM?

Mr. YOUNG of Ohio. Mr. President, tragedies such as the murders at Kent State University and Jackson State College have contributed to a depressing climate of fear in which all of us live. Fear brings repression. Evidence of this is the recently enacted District of Columbia crime bill with such blatantly unconstitutional provisions as "no-knock" entry and "pretrial detention" authorizing the imprisonment of an accused for 60 days without trial. These sinister threats to our Bill of Rights are frequently perpetrated under the patriotic cloak of anticommunism.

Regardless of the actions and attitude of extremist splinter groups such as Young Americans for Freedom, and the Liberty Lobby and "Birchsaps," patriotism is not a matter of fear. True patriotism is the love of country and of ideals, the love of liberty of man and of mind. It was for this that the colonial patriots fought and won the War for Independence. Their outrage over the original proposed Constitution as drafted by 55 men in Philadelphia resulted in the drafting and adopting of the first 10 amendments to that Constitution which we are proud to term our Bill of Rights.

MIDEAST PROPOSALS QUESTIONED

Mr. GRIFFIN. Mr. President, an editorial published in today's New York Times concerning the Arab-Israel conflict should be of particular interest to the Senate. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 25, 1970]

FULBRIGHT ON THE MIDEAST

No Senator has more conspicuously urged United States disengagement in Southeast Asia than J. W. Fulbright. That stand, plus his influence as chairman of the Senate Foreign Relations Committee, has focused world attention on Mr. Fulbright's surprise proposals for settling the Arab-Israeli conflict in the Middle East.

The central element in his plan is that this country back up a Mideast peace—negotiated or imposed—by a military guarantee to safeguard Israel's independence within the borders it had before the six-day war of June 1967. The proffer of such a guarantee is doubly startling in the light of Senator Fulbright's long coolness to Zionism and his continuing doubt that the Mideast is an area of vital American concern.

All these factors entitle the Fulbright proposal to recognition as an effort to be constructive in an area where ingrained mistrust constitutes a major handicap to any settlement. That mistrust would be intractable enough if it were confined to relations between the Arabs and the Israelis, but it is made worse by the area's emergence as a cockpit in the cold war and by the slack respect all nations now have for the police powers of the United Nations Security Council.

The unfortunate aspect of the Senator's proposals is that they may undermine, rather than facilitate, the peace talks getting under way today at the U.N. The goal of these talks is to arrive at an agreement to which both the Arabs and the Israelis will voluntarily subscribe. Mr. Fulbright all but rules out that possibility and moves on to the next step of a settlement "imposed" by the Security Council—another way of saying, by the United States and the Soviet Union.

Even though the Senator stresses that he would welcome a similar imposed peace in Southeast Asia, the impact of the Mideast talks is likely to be a heightened reluctance on the part of the Egyptians and the Jordanians ever to get into the same room with the Israelis, much less to agree on peace terms. For Israel, the Fulbright plan entails a virtual advance renunciation of any hope for negotiating more defensible borders and thus reducing the danger of future clashes. All the skill put by Secretary of State Rogers into permitting some basis for flexibility on this point could be erased by the Fulbright insistence on restoration of the old boundaries.

The task that faces Ambassador Jarring in carrying the forthcoming negotiations to success is incredibly difficult at best. Unquestionably, he will need much help from Washington and Moscow in keeping the talks from collapsing. The near-disaster that attended Egyptian movement of Soviet missiles into the zone just west of the Suez Canal on the night of the standstill cease-fire was evidence of how tenuous the whole undertaking is. At this stage the most useful service anyone in Washington, Moscow or other capitals can provide is to back up the Jarring mission.

NEW CHANCE TO DISCUSS PRISONER PROBLEM

Mr. GURNEY. Mr. President, the chief Communist negotiator at the Paris talks has decided to return to the conference table. This is heartening news in at least one respect. It will give our Ambassador, Mr. Bruce, a chance to discuss directly with their top man a problem whose solution is essential to any final and proper settlement of the Vietnam war. I refer to the prisoners of war being held by the North Vietnamese.

If there is any indication that the Communists are willing to negotiate seriously this is one area in which they can demonstrate their sincerity. It requires of them no giving up of anything. It does not involve the loss of face. It does not involve the loss of territory nor the abandoning of any political position.

The Communists can discuss the prisoner situation, and can at least agree to abide by the Geneva accords dealing with such prisoners. They are signatories to that Geneva convention.

The bare minimum treatment involves adequate housing, adequate food, proper medical treatment and the right of prisoners to communicate with their families. A first step by the Communists could well be to provide our Government with an accurate and complete list of the men being held.

This is an opportunity for progress. We must make all possible efforts ourselves to help that progress.

ADDRESS BY MAX RAFFERTY

Mr. ALLEN. Mr. President, Dr. Max Rafferty, superintendent of public instruction of the State of California recently addressed the summer graduating class at Troy State University at Troy, Ala.

Dr. Ralph Adams, president of Troy State University is one of the diminishing number of education leaders in the Nation conscious of a responsibility to provide students the benefits of more than liberal and radical points of view on subjects vital to the interest and general welfare of our Nation and with the courage to present also a conservative point of view.

Mr. President, Dr. Rafferty has been described in the inimicable language of Tom Johnson, editor of the Montgomery, Ala., Independent as, "an individualist who challenges stupidity wherever he finds it and he is finding more than he can stomach in his own profession."

Mr. President, Dr. Rafferty is a conservative and opposes the conditioning of students as the primary function of education and warns of its dangers. In this connection, Mr. President, I recall the words of Arnold Toynbee who warns:

> The objective of conditioning is to deny human beings permanently of their capacity to think and to will, and since this is the capacity to make us human . . . (it) is an attempt to destroy human nature itself.

Mr. President, in view of the relevance of Dr. Rafferty's address and in view of the unmistakable and proliferating trend toward conditioning of American youth and adults, I commend the address to thoughtful consideration of Members of the Senate and the public in general. I ask unanimous consent that the address by Dr. Rafferty be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE FIGHT FOR INDIVIDUALISM

(By Max Rafferty, Superintendent of Public Instruction, State of California)

I am not here to address you as a group. I don't know how to talk to associations or cliques or herds of humanity. In fact, I don't much like groups—any groups. I'd be a washout as a political boss or a backstage manipulator of masses of human beings.

But I'm incorrigibly fond of John and Mary and Joe and Jane. I'll talk to them for hours, although I promise I won't do that to you today. The most fun I have in life is meeting *persons*—not *people*—talking with them and listening to them, getting to know them. I'm an educator, you know, and old Socrates, the original organizer of our union, found out a long time ago that the best way both to teach

and to learn was to get into a conversation with *persons*. So, if you don't mind, this is not going to be either a speech or a lecture today—just a dialogue between individuals—you and me—and the topic will be: "What's Going to Happen to Us Individuals?"

First of all, let's look at what happened to some other residents of the planet who decided quite some time ago that individualism might be for the birds, but is most certainly not for the bees.

A beehive, you know, is a comfortable place. It's warm, safe, and stocked with delicious food. Its inhabitants are disciplined, cooperative, and seemingly happy. They labor unceasingly in highly specialized but relatively pleasant jobs for the greater good of the hive. In return, they are cared for by the insect equivalent of the Welfare State from the cradle to the grave, or maybe it would be more accurate to say from egg to bird's craw, under the circumstances. They are perfectly adjusted to their environment. They are born, they eat, they reproduce, they die. It's pretty hard for the observer to find any difference at all in the way most bees look and act.

Such is the life of the social insect, and such it has been, unvarying and unchanging, for about 50 million years. There's just one slight disadvantage connected with this seemingly fool-proof system: the disappearance of the individual.

Any baby bee which, touched perhaps by some random cosmic ray, showed the slightest sign of becoming an insect Moses, Newton or Leonardo da Vinci would ring alarm bells all over the hive and alert the guardians of the elaborate structure to perform the insect equivalent of mercy killing upon the unfortunate mutation. In justice to our ancient friends the bees, it should be pointed out too that they would take equally drastic preventive action against any larval Hitler, Stalin, or Genghis Khan.

They have thus achieved the delicate balance sought for by all advanced cultures. It's an efficient, highly developed society, operating for the good of all. It's completely materialistic, absolutely equalitarian, and 100% deadly to the individual who happens to be slightly different. It has found, apparently, that the individual is more trouble than he is worth, especially when vast population masses have to be provided for.

I submit that the bees, who are our seniors on this planet by a good many millions of years have arrived at this evidently final stage of their development through the pressure of strong evolutionary forces acting upon billions of individuals. It's my further contention that similar forces acting upon the rapidly multiplying hordes of our own species will tend to produce similar results. For good measure and for what it may be worth, I'll throw in my own theory that too many of us educators are currently helping those evolutionary forces along to the very best of our ability, unfortunately.

The individual should be, and until a few years ago always had been, the be-all and the end-all of my profession. This country was founded by individualists, some of them pretty rugged. The schools stressed the virtues of individualism, and the churches concerned themselves with the saving of individual souls.

Not any more. Progressive Education has helped change all this.

The great dogma of Group Adaptation forms the cornerstone of 20th century educational theory. As laid down by the disciples of John Dewey who, paradoxically enough, professed to abhor all dogma, the only eternal verity is that of constant change and flux.

All values are relative. All truths are mutable. All standards are variable. What's good today may be evil tomorrow, and vice-versa.

So the only thing worth teaching to young people is the ability to adjust to their environment—to be easily, comfortably, happily accepted by their peer group. This is what the Life Adjustment boys really believe. This is what they teach the children. And this is precisely what's wrong with the country.

Let's see how the steady increase in the millions of our population, combined with Progessive Education's glorification of the *group* at the expense of the *individual* have affected two important segments of the American people.

First, let's look at our college students. You're all familiar, I'm sure, with the recent demonstrations and current unrest at the University of California. As a member of the University's Board of Regents, it's been one of my jobs the past few months to try to bring order out of chaos in this complicated and thankless situation. Things now are at least temporarily under control, but in working with young people it's not enough merely to uphold authority and to put down threats to law and order, necessary though this is. There is something more on the Berkeley campus than just the antics of the bearded exhibitionists and the cynical opportunism of the hardcore activists who sparked the illegal activities there. There is in addition a very real if somewhat incoherent grievance on the part of a great number of sincere and sober students with which all of us citizens of this state should concern ourselves.

This grievance is loss of identity—erosion of self-respect—increasing inability to identify as an individual with an institution numbering more than 27 thousand souls. This student feeling may be described as a kind of creeping facelessness—a loss of both individuality and individualism in a university which of necessity concerns itself more and more with great problems of research and with projects vital to the national interest, whereas once it was engaged almost exclusively in instructing young people and providing them with the intellectual tools which over the centuries have proved indispensable in the pursuit of truth.

One college undergraduate wrote me recently as follows: "I'm photographed, inoculated, taped, carded, and filed. I have a parking pass and a library pass and a lab pass. I sit in a lecture class with 600 others, and I'm Number 327. The professor's lecture is piped in electronically; I never see him. The multiple-choice tests I take are corrected and graded automatically. I engage in group activities, group health services, and group recreation. But I came to college to find *myself*—to learn how to become a *person*. Instead, I've become a *number*."

I can tell by your faces that this troubles you. "This is no good," you are saying to yourselves. And you're right. But don't bother looking around to find the "somebody" responsible. That "somebody" is you.

Why *should* you be surprised at such a letter? What else could you expect? Didn't you permit and even condone over the years an educational way of thinking in our public schools which downgraded competition, upgraded togetherness, stressed the supremacy of the group over the individual, and generally preached the overriding importance of "life adjustment" as compared to individual mastery of essential fundamentals?

No wonder our colleges are turning into huge factories. When people are conditioned from early childhood to believe that adjustment to one's environment is the supreme goal of life—when they are taught day after day that acceptance by the group is more important than the development of the individual's own abilities—when they are grouped by social age down in the grades and always passed through the school with their peers regardless of whether or not they are able to meet any standards of performance—when all these things have been going on for 20 years and more with your active or passive consent—how else can you expect our colleges and universities to deal with the products of such a system of education?

They have been conditioned to conform. They have been trained to cooperate. They have been educated to adjust. In another generation, they should be ready for the hive—and they will be, unless we change our ways. The kids feel this unconsciously. It's time we realized it consciously. I'm not at all surprised that a lot of our students are protesting. The sad thing about it isn't the fact of the protest, but the fact that it's been taken over and exploited by certain cold-eyed outfits interested in nothing about the University of California except the opportunity to stir up trouble and to create chaos there.

Here then is the way the trend toward the hive is affecting one element of our population. Let's turn to another element—our racial minorities.

I happen to be a member of one of the most discriminated-against groups ever to emigrate to this continent. For centuries, the Irish had been dispossessed and jailed and starved and slaughtered in their own land by an alien usurper. A hundred years ago, after a frightful famine had killed off a large percentage of the total population of their little island, the survivors disembarked upon these shores, hungry, illiterate, ragged, unclean, unwelcome. They sought bare survival, and for two generations that was all they found.

Almost immediately, the signs went up: "No Irish allowed;" "No Irish need apply;" "We do not rent to Irish." Business careers were closed to them. The learned professions were barred to them. Their accent was mocked. Their customs were burlesqued in cartoons and on the stage. The men were called "Micks" and "Paddies," and were allowed only to lay bricks and carry hods, or a little later to leave their bones under almost every cross-tie of the great Union Pacific Railroad, as it fought its long way westward across the continent. Their women were derisively nicknamed "Biddies" and were grudgingly permitted to serve as laundresses, cooks, and house maids in the homes of the rich. No band of immigrants ever had it tougher.

Yet within five decades, the Irish had broken out of the ghettoes and had merged with the general American landscape. Irish names appeared on the roster of every profession and calling. Some of them became wealthy; more of them remained poor; but in neither case was it the result of their Irishness. Within another fifty years, one of them had become president.

How was it done? Not by any special talent or intelligence which the Irish happened to possess. It was just that they managed to get America finally to treat them as *individuals* instead of as members of a *group*. They persuaded their own children to think of themselves, and their fellow Americans to think of them too as men and women—tall, short, fat, thin, homely, handsome, stupid, smart—just like the rest of us.

Now mark this, and mark it well. Had the Irish been conditioned as children to think of themselves primarily as members of a national or religious *group*, or even as members of a broader, blander "peer group," they would have stayed in that group indefinitely. Had they been sold a bill of goods about "adjustment to environment" being the main goal both of education and of life itself, they would have adjusted to those dirty, cheerless ghettoes and to those backbreaking, menial jobs, and they would still be working at them today. Had they been told that mastery of subject matter was less important than "democratic sharing," they would never have learned enough to convince their fellow Americans of their ability to get things done. Had they been taught that competition was

evil, they would have stayed as low men on the national totem pole, kept there by those who could compete better than they could.

What I'm trying to say is that during the historical period when the Irish were breaking out of the permanent minority group category, our school system was stressing basic education, the dignity of the individual, and the importance of organized, disciplined, and systematic mastery of subject matter by each pupil. During this same period of time, the Negroes and the Mexican-Americans—presently our greatest ethnic minorities—were in most states and in most cases not getting any education at all. In more recent years, and under universal compulsory education, they began for the first time to be enrolled in schools in large numbers. But it was during those same recent years that the "life adjustment," "Progressive Education" cult took over those same schools, lock, stock, and barrel, and started preaching the gospel of group-ism at any cost.

Group-ism is not what our racial minorities need. They've had too much of that already. When you react to stimuli only as a member of a group—when you find your self-respect and self-fulfillment only as a member of a group—when you vote only as a member of a group—then you are just asking to be treated according to the lowest common denominator of that same group whatever it is. You abdicate your right to be treated as an individual in favor of the right to be treated as just one more cog in the machine, one more faceless figure in the crowd, one more bee in the hive.

But you're not a bee, and nobody has the right to regard you or any other American as simply another member of a certain swarm. A century ago, my people all had the same accent, and wore the same costume, and had the same religion. There was a great temptation, as a result of this for other Americans to regard them as "all alike" and to label them accordingly and to deal with them in the mass instead of as separate, living, breathing human beings, each with a different personality and a different immortal soul.

It's greatly to the credit of this country that we have successfully overcome in the past the temptation to fragment our country into Irish-Americans or German-Americans or any other kind of "special" Americans. Such terminology did exist for a time, but happily the climate, the tradition, the genius of our people have been uncongenial in the long run to most attempts to lure us onto the fatal path of hyphenated Americanism. The last two relics of this ancient error—the terms "Negro-American" and "Mexican-American"—must now be subjected to the same influences which wiped out the terms "Irish-American" and "German-American."

If I were a member of a current racial minority in this year 1970, I would do these things:

1. As a parent, I would insist upon an educational philosophy in my local schools which emphasized the importance of the individual rather than the desirability of ingroupness—which taught each child to use the wonderful, glittering, sharpedged sword of subject matter to gain success—which took my youngster where it found him and taught him to read so well and to spell so well and to speak and write English so well that he would be superior to the graduates of other schools as an *individual*, not as a member of any group.

2. As a breadwinner, I would continually upgrade my own capabilities and potentialities in the occupation of my choice by taking advantage of adult education night school classes, and college extension courses wherever and whenever I could find them. If I couldn't read very well, I'd take remedial reading. If I spoke bad English, I'd study good English. If I needed some special skill to enable me to get a better job and to earn more money, you can bet I'd find a school that offered it, and I'd sign up for it.

3. As a voter, I would join a political party which treated me as an individual, not as a member of a voting bloc. I would support better laws for all, and I would resent efforts to use me as a racial minority member in order to perpetuate any person or party in power. I would resist with my ballot any attempt to discriminate against me because of my race, whether by the government, by industry, or by organized labor.

Here, then, is a formula for the future: Press for recognition *as a person*, and qualify yourself to be worthy of such recognition. Get out from under the dead hand of uniformity. Fight against statism and group-ism. Be an American first, and work to build a land in which the opportunity of each individual will be limited only by the measure of the man and by the luck of the draw. This way lies equality for all and special favoritism for none, and no American can ask for more than this. Nothing more is really necessary; nothing less will do.

Above all, let's resolve together never to surrender to the sheer weight of numbers. Just because mankind is breeding in a terrifying explosion of population, let s not sit back in our several groups and wait numbly for inevitable tragedy. It may well be that the great contribution which America has yet to make in its cycle of universal history is the solution to this crucial problem: the survival of the individual, precious and unique, in a world of constantly multiplying billions. Surely in the hammering out of a mighty issue such as this, there is a vital role for each American to play—college student or racial minority member, educator or non-educator, businessman or trade unionist—a role which each of us must act out and add to until the time comes for us to leave the stage to those who will come after us.

For tomorrow will come, in one way or another. Make no mistake. It's up to us as individual citizens of the country which is at once the hope and the envy of the human race to determine whether in the onsurging and billowing wave of the future, mankind will hear the laughter and the shouting of free men, or the murmuring of innumerable bees.

FOREIGN FISHING OFF PACIFIC NORTHWEST COAST

Mr. PACKWOOD. Mr. President, the problem of foreign fishing off the coasts of our Pacific Northwest States has reached crisis proportions. I regularly receive letters or telegrams from Oregonians who complain about foreign vessels which are engaged in fishing off the Oregon coast.

The fact that foreign ships are fishing within the U.S. fishing zone presents a tremendous threat to the American fishing industry. Action must be taken now if we are to avoid the destruction of a vital part of our marine environment.

In response to this threat, I have cosponsored with the Senator from Alaska (Mr. STEVENS) a bill—S. 3492—which strengthens the penalties for illegal fishing in a territorial water in the contiguous fishing zone of the United States. This legislation would increase the fine which is payable upon conviction from "not more than $10,000" to "not more than $50,000."

This step seemed to be essential if we were to avoid the intolerable invasion of our territorial waters by foreign fishing fleets.

In recent months, our concern has been focused on salmon fishing by South Korean vessels in the Eastern Bering Sea. The officials of the United States and the Republic of Korea had reached an agreement that South Korean ships would not engage in salmon fishing within the limit of 175 degree west longitude. Despite the solemn assurances of the Koreans, on June 22, 1970, two Coast Guard cutters observed South Korean vessels fishing for salmon within the agreed limit. The two fishing companies involved caught an estimated 400,000 to 600,000 salmon.

In order to express to the South Korean Government the magnitude of our concern, I have cosponsored with Senator STEVENS an amendment to the Military Sales Act which would prohibit assistance to the Republic of Korea unless the President determines that no nationals of the Republic of Korea are fishing salmon east of the line 175 degrees west longitude. On June 30, 1970, the Senate passed by voice vote this amendment after modifying it to read "economic assistance."

The officials of the United States and the Republic of Korea have worked long and hard to establish a fine relationship between our two countries. Admittedly, the amendment which I have cosponsored with Senator STEVENS represents harsh action. I firmly believe, however, that severe measures must be taken if we are to avoid the intolerable incursions by foreign vessels into our waters of the North Pacific.

I am fearful that if appropriate action is not taken, serious international political implications will result. Despite international treaties for the conservation of salmon and halibut, the North Pacific fisheries situation has been greatly complicated over the past several years by the advent of fleets of large Soviet and Japanese trawlers.

Foreign fishing off the coasts of our Pacific Northwest States must not be allowed to continue. It is time that we finally recognize that in our oceans we have valuable natural resources which are being harvested at an unacceptable rate.

What I find most appalling is that when Oregon fishermen report foreign intrusions into our waters, they generally receive an inadequate response from the officials involved. The situation has become so serious that Congressman DELLENBACK organized hearings regarding this problem in Coos Bay, Oreg., earlier this week. I applaud Representative DELLENBACK for his efforts and am deeply disappointed that responsibilities in Washington made it impossible for me to participate.

It has become apparent in recent months that Congress must provide the leadership if we are to assure that foreign fishing will not be allowed to continue off the Oregon coast.

The action taken by the Department of State has been clearly inadequate. A tentative commitment has been made for

United States and South Korean officials to meet in Seoul this fall. I believe it is essential that we receive a formal, written commitment from the South Koreans that they will no longer allow their ships to fish for salmon in the territorial waters of the United States.

Until such a formal agreement is reached, I will assume that additional congressional action will be needed to assure that foreign vessels will not be fishing off our coast.

There are three more stringent measures which could be taken if necessary:

First. The United States could cut off all aid, military or otherwise, to the Republic of Korea.

Second. The United States could extend its fishing zone in the waters of the North Pacific.

Third. The United States and the Republic of Korea could reach an agreement that our Coast Guard will assist the South Koreans in the enforcement of their own laws.

Unless the Federal Government assumes its proper leadership role, I intend to make certain that the U.S. Senate does not ignore its responsibility in this vital area.

Mr. President, I ask unanimous consent to have printed in the RECORD an article on this subject, written by Stan Federman and published in The Oregonian of August 19, 1970.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANGRY FISHERMEN CRY "SELLOUT" AS UNITED STATES OVERLOOKS RUSSIA'S VIOLATION OF TREATY

(By Stan Federman)

NORTH BEND.—Unhappy West Coast fishermen Tuesday charged United States officials with "selling them out" by giving away offshore fishing rights to Russia and other nations through unworkable international treaties.

The irate fishermen, some 350 strong, packed the Southwest Oregon Community College auditorium to protest recent Soviet Fleet violations of America's 12-mile limit.

They urged an extension of the limit to 200 miles—and demanded the U.S. Coast Guard strictly enforce the current restrictions.

The fishermen scorned proposed new international treaty plans as a "waste of time." And they insisted their problem was not with foreign fleets as much as it was with the American government.

Fisherman after fisherman told of harassment by Soviet vessels off the west coast.

Many Oregon and California spokesmen were bitter at Coast Guard delays in answering their calls about Soviet violations of the 12-mile limit. They called for more funds for better Coast Guard equipment, particularly a major increase in CG patrol planes and ships.

Most witnesses asked for "action now" against the Russians. They warned that many U.S. fishermen were going broke for lack of markets—and several species of fish were fast disappearing from North Pacific waters because of foreign encroachments.

The comments came at a special informational meeting called by Oregon Rep. John Dellenback, a member of the House Fisheries Committee. Dellenback called the meeting in order to discuss fully the entire Russian fishing problem.

DATA SUPPORTS BILLS

The session was attended by Rep. Donald Clausen, R-Calif., and several federal officials from the Coast Guard and U.S. Bureau of Commercial Fisheries.

Both Dellenback and Clausen collected numerous data and exhibits during the all-day session, many of which detailed alleged Soviet fishing violations. They promised to use them to help push two Clausen-sponsored bills aimed at enforcing and extending the present U.S. jurisdictional limit.

Among the exhibits was a series of Russian fishing nets taken by U.S. fishermen, some allegedly within the 12-mile limit. Most of the Soviet nets' mesh was of a tiny size, the type which Oregon fishermen claim are wiping out schools of immature fish.

The chief speaker for the day was Donald L. McKernan, special assistant for fisheries and wildlife for the U.S. secretary of state. He has been chief U.S. negotiator in past treaty-making with the Russians.

McKernan said the United States has worked out international fishery conflicts in the past and he felt it could again. But he admitted the Russians had committed violations of past treaties.

He said the job of preserving the nation's fisheries was no longer just one of conservation but of giving "economic preference" to small coastal fishermen in all future international agreements.

NO STAND TAKEN

The top-ranking U.S. official said the State Department has taken no stand on the fishermen's controversial proposal to extend the 12-mile limit to 200 miles.

But he warned that this might have grave consequences and could result in other nations ignoring present conservation practices on the high seas. It also might take 10 to 15 years to conclude, he added, as two-thirds of the nations involved would have to approve it.

McKernan pointed out the limit violations discussed at the Tuesday session work both ways. He noted many American fishermen were violating the limit in both Mexican and South American fishing waters.

He called for restraint on the Russian problem and said "the U.S. can no longer send gunboats into any nation to back up our treaties."

McKernan drew hoots and catcalls from the crowd when he said he didn't think the Russians were taking any substantial amounts of salmon from North Pacific waters.

Bill Hill, executive secretary of the Humboldt County Fisheries Association of California, and other fishermen representatives cited numerous incidents in recent months in which huge catches of salmon had been spotted aboard Soviet vessels.

Jack Azevedo, a Ft. Bragg, Calif., grocer, who has helped raise an $8,000 reward "kitty" for the capture of any Red trawler found fishing illegally, charged that past treaties were "unilateral giveaways" of the right of American citizens.

"If Russia breaks a treaty, Congress should abrogate it immediately."

James Weaver, Republican Dellenback's Democratic opponent in this fall's fourth congressional district race, said, "economic preference wasn't enough."

"Our fishermen want the Russians to leave the fish alone off our shores so that they can earn their daily living," Weaver said.

Gene Bailey, president of Coos Bay Local 12, of the International Longshoreman's and Warehouseman's Union, said it was about time the United States used armed Navy ships to enforce the 12-mile limit.

"But most of all we need support from Congress—and not just lip service because this is a campaign year."

John Brown, president of the All-Coast Fisheries Association of Coos Bay, said Oregon fishermen were afraid that the Tuesday meeting would result only in talk again and no action.

"We have reached a point now, in any discussion of the Russian problems, where we simply don't expect any help anymore from our own government," he said.

COAST TO COAST ON CRUTCHES

Mr. DOLE. Mr. President, an extremely enthusiastic and dedicated young polio victim, David Ryder, treked the 3,000 mile breadth of the Nation on crutches in an effort to publicize the tremendous success of horseback riding therapy for the physically disabled.

The English youth, who 5 years ago could barely move across a room, made this walk to prove the benefits of horseback riding for the handicapped and to seek support for handicapped riders.

Davids 27-miles-a-day, 6-days-a-week, 3-mile-an-hour average vividly demonstrates the value of this therapy. He hopes the thick calluses on his hands will serves as a symbol of encouragement to the handicapped.

David Ryder does not want to become a national hero. He wants the handicapped children of this country to experience the benefits of riding therapy.

An article covering David's journey and goal appeared in the Battle Creek, Mich., Enquirer and News of August 19, 1970. I invite attention to this young man's commendable accomplishments and urge Senators to take note of his endeavors.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COAST TO COAST ON CRUTCHES!—HE WALKED SO HANDICAPPED MIGHT RIDE

(By Helen Hatton)

The great, thickened calluses almost covering both palms of David Ryder's sensitive, watchmaker hands, tell a story of determination and triumph over odds that would seem insurmountable.

And the 22-year-old English youth—a guest for two weeks at the Cheff Foundation Center near Augusta—hopes they will be a symbol of encouragement for the handicapped everywhere.

David, who five years ago could scarcely get across a room by himself, has just completed a 3,000-mile walk from Los Angeles, Calif., to New York City on crutches, one leg in a caliper.

The calluses, that for weeks were ever-enlarging blisters, are mute testimony to the effort of his four-and-a-half month walk across the desert, mountains, plains and through cities and villages.

Being flown back to the riding therapy center here for a two-week finale to his U.S. visit, is most appropriate.

David made his arduous walk to publicize the benefits of riding therapy. It's a story well known in England, where some 90 clubs offer riding for the handicapped, but the Cheff Foundation is the first in the nation. The director, Mrs. Lida McCowan, received her training at England's first and best known Riding Centre for the Handicapped in Chigwell, Essex. Its director, John Davies, has visited here several times.

No more enthusiastic booster could have been found. A polio victim at 2, David has been crippled for as long as he can remember. At 17, after attending a trade school for the handicapped, he settled down to what he imagined would be his lifelong work, the

sedentary job of watchmaker. Getting across a room was as much effort as he could sustain.

A school friend's suggestion that he try riding therapy at Chigwell, opened a whole new world for David.

His first time on a horse was at once frightening—yet exhilerating, as he moved about freely.

"Horseback riding gives a physical and mental lift to the handicapped that you can't imagine," David explains. "It shows that their disability doesn't mean they must lead a life of seclusion and restriction or continue to feel sorry for themselves."

With each week's ride and exercising, he could feel his muscles strengthening and in six months he was able to walk the mile and a half from the railroad station to the arena.

Two years ago he tried his first long distance walk—from Brighton to London, in a fund-raising drive for the Chigwell School.

"That 54 miles nearly killed me," he recalls, but it obviously didn't discourage him.

Last summer he walked the length of England, "858 and three-quarter miles," in 52 days—a feat that garnered $6,000 for handicapped riders and won him a kiss from Elizabeth Taylor—and a watch from her and Richard Burton that he always wears. He was named one of Great Britain's Men of the Year, received a diploma from the Duke of Norfolk, met Prime Minister Harold Wilson and U.S. astronauts Neil Armstrong, Buzz Aldrin and Michael Collins.

Thus inspired, he determined to tackle the U.S. And this time, half of the donations received would go to the recently formed North American Riding for the Handicapped Association.

For months he trained stringently, walking until he could manage 20 to 25 miles a day, the pace he wanted to maintain in his U.S. trek. Meantime, John A. Davies, chief instructor at the Chigwell Centre and author of "The Reins of Life," made arrangements to accompany his young pupil. Davies, his wife and brother-in-law, Michael McGarry, followed behind in a gray van that served as home for the four travelers.

Avoiding the super highways until just before crossing into New York City, David really saw the country and got to know people in his slow-paced travel through every kind of weather. Snow in the mountains during the early part of his journey really wasn't as bad as the high humidity and heat and some of the spectacular lightning storms that were a revelation to the Britisher accustomed to gentle rains.

The worst moment of the trip came when he almost tripped over a rattlesnake and set some sort of unofficial record of crutch running in his get-away. The best thing was seeing the Grand Canyon.

Never once as he plodded along, did he really consider quitting—but there were days of depression when "I wondered why the H—— I was doing it. Then I'd meet someone whose handicapped child or relative had been encouraged by my story—and it made all worth while."

In his 3,000 miles, he talked on his favorite subject to hundreds of people, turned down dozens of offers of a lift, wore out 72 sets of crutch tips and had his heavy-soled boots (he has four pairs) resoled and repaired 20 times.

His spirits were high as he crossed the great span of the George Washington Bridge into New York City. On these last few miles of his long journey, he had been assured, he would have a motorcycle escort to the city hall, where he would be greeted by President Nixon with all the attendant ceremony.

But there was no escort to meet him.

He did receive a key to the city from the vice mayor, but the audience he'd hoped for that would publicize riding therapy was missing. Worse still, he found only $700 in donations had been sent to the David Ryder Trust Fund at the European-American Bank and Trust Co., 52 Wall St., New York, N.Y.

"That isn't enough to begin to pay expenses," he admitted here gloomily, "let alone provide money for handicapped riders." And he borrowed $5,000 to make the trip!

He's certain funds will continue to be sent to the trust fund. He was to tell his story on an area television show this afternoon and he's scheduled to speak to the Battle Creek Rotary Club next Monday and the Augusta Rotary Club the following Thursday.

He made his walk that others might ride—and he has faith they will.

MARK TRICE

Mr. BAKER. Mr. President, it is a genuine personal pleasure for me to join with my colleagues in honoring Mark Trice for 50 years of service to Congress and to the American people. Although I have been a Member of the Senate for little more than 3 years, Mark has been Secretary to the Minority for all of that time, and he has been of inestimable help to me and to my staff.

Mark has none of the self-importance and officiousness that sometimes characterizes persons in positions of great responsibility. His manner is easy and always efficient. He is friend as well as adviser to Members of the Senate.

I know that the late Senator Dirksen held Mark in the highest personal and professional esteem, speaking often of the central role that Mark plays in the operation of the Senate.

I look forward to continued service with Mark in this body.

HERBICIDE PROGRAM IN VIETNAM

Mr. McINTYRE. Mr. President, the primary justification of our herbicide program in Vietnam is the contribution it makes to a saving of American and allied lives.

This point was very forcefully presented last December by Rear Adm. William E. Lemos in testimony before the Subcommittee on National Security Policy and Scientific Developments of the House Committee on Foreign Affairs.

I believe that Admiral Lemos' testimony would provide useful background information for the upcoming debate on the Nelson-Goodell herbicides amendment. I ask unanimous consent that relevant portions of it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY REAR ADM. WILLIAM E. LEMOS
HERBICIDES

Turning now to the use of herbicides in Vietnam, one of the most difficult problems of military operations in South Vietnam is the inability to observe the enemy in the dense forest and jungle. Defoliating herbicides introduced in 1962 are capable of producing a significant improvement in vertical and horizontal visibility in the type of jungle found in South Vietnam. As viewed by an aerial observer, it is often impossible to see through the canopy to detect VC or NVA operations. In 6 to 8 weeks, after spraying with a herbicide, the observer will have good observation through the canopy. For ground observation, defoliation is highly effective in improving horizontal visibility.

The Herbicide Program in terms of effects produced has required an unusually small investment of military effort. The entire program has been accomplished with an average of about 17 C–123 spray aircraft and several smaller helicopter sprayers plus some improvised ground spray equipment.

Herbicide operations are conducted under a program directed by the Government of South Vietnam. Requests for these operations generally originate at the district or provincial level and are submitted through territorial administration command channels. The herbicide spray plan, includes as a minimum the area requested to be treated with herbicide, the public information, civil affairs and intelligence annexes, along with a statement by the province chief that he will see that just and legal claims are paid for any accidental damage. The ARVN corps commanders and their US corps senior advisors have been delegated authority to approve small scale defoliation by ground-based spray and by helicopters. All requests for crop destruction and larger scale defoliation by C–123 aircraft are forwarded to the Vietnamese Joint General Staff. Upon approval of the request by the Chief of Joint General Staff it is forwarded to the MACV staff for final review.

The MACV staff position is developed as the result of coordination with CORDS (Civil Operations and Revolutionary Development Support), USAID, and political representatives at each level where they exist. An aerial reconnaissance is conducted as the next step to ensure that all populated areas and friendly crops have been excluded from the target area. Having determined from this aerial survey and an analysis of the military worth that the project is a valid herbicide target, the project is forwarded to the U.S. Ambassador and COMUSMACV for approval. The Ambassador personally approves all C–123 defoliation projects and all enemy crop destruction projects.

Some specific uses of herbicides are:

1. *Defoliation of Base Perimeters.*—A portion of the small scale ground based or the helicopter spray missions are used in improving the defense of base camps and fire bases. Herbicides are a great help in keeping down the growth of high jungle grass, bushes and weeds which will grow in cleared areas near these camps. This clearance opens fields of fire and affords observation for outposts to prevent surprise attack and as such is truly a life-saving measure for our forces and our allies. Without the use of herbicides around our fire bases, adequate defense is difficult and in many places impossible.

2. *Defoliation of Lines of Communication.*—There are many instances of ambush sites being defoliated for better aerial observation and improved visibility along roads and trails. In 1967 there were also many requests for defoliation of VC tax collection points. In otherwise friendly territory there were points along well travelled routes where the enemy could hide under cover and intercept travellers to demand taxes. Defoliation along these roads was very effective in opening these areas so that they can be seen from observation aircraft, and with few exceptions these roads were opened to free travel. The use of aircraft to spray alongside lines of communication proved valuable in clearing these areas and preventing costly ambush of army convoys with resulting friendly casualties.

3. *Defoliation of Infiltration Routes.*—Areas used by the enemy for routes of approach, resupply or movement are targets for herbicide spray. Probably the most valuable use of herbicides for defoliation is to permit aerial observation in such areas. This is particularly true in areas near the border so that we can detect movement of enemy units and their resupply.

4. *Defoliation of Enemy Base Camps.*—We

know from prisoners of war and from observation that the enemy will move from areas that have been sprayed. Therefore, enemy base camps or unit headquarters are sprayed in order to make him move to avoid exposing himself to aerial observation. If he does move back in while the area is still defoliated, he will be observed and can be engaged.

5. *Crop Destruction.*—Crops in areas remote from the friendly population and known to belong to the enemy and which cannot be captured by ground operations are sometimes sprayed. Such targets are carefully selected so as to attack only those crops known to be grown by or for the VC or NVA. The authorization to attack crops in specific areas has been made by the U.S. Embassy, Saigon, MACV and South Vietnamese Government.

Frequent reviews have been conducted of the Herbicide Program. The most recent one was personally directed and reviewed by COMUSMACV in October 1968 to assure himself that the program was militarily effective. Prior to that, the U.S. Ambassador had directed a review which looked at the political and economic aspects of the program. The Embassy report was released in August 1968. The crop destruction program was also reviewed by the CINCPAC Scientific Advisor in December 1967. Each of these reports concluded that the program should be continued.

The requests for defoliation and crop destruction have always exceeded our capability to spray. The requirement continues although a tapering off should develop if enemy activity subsides. A recent review by MACV indicated that operations for 1970 will be less than in 1969. In addition, Rome plows are replacing defoliation for clearing along many lines of communication.

With regard to the recent publicity of the herbicide agent, 2,4,5–T, which is a component of orange, a herbicide mixture, the Bionetics Research Laboratories conducted a study of the carcinogenic, teratogenic and mutagenic activity of selected pesticides and industrial chemicals for the National Cancer Institute during the period 1965-1968. The study indicated that a large dose of 2,4,5–T, administered orally to specific strains of mice during the central portion of the gestation period produced abnormal fetuses.

However, on 29 December 1969, Dr. Dubridge, Science Advisor to the President, stated, "It seems improbable that any person could receive harmful amounts of this chemical from any of the existing uses of 2,4,5–T."

Nevertheless, Deputy Secretary of Defense David Packard has issued instructions to the Joint Chiefs of Staff to reemphasize the already-existing policy that 2,4,5–T be utilized only in areas remote from existing policy that 2,4,5–T be utilized only in areas remote from population.

When the American Embassy conducted the political and economic review of the herbicide program, it requested that a disinterested expert be sent from the United States to assess any ecological consequences of the program. Dr. Fred Tschirley, Agricultural Research Service, Department of Agriculture, was sent over in March 1968 for a one-month period. Arrangements were made which permitted him to fly over any area of Vietnam he wished to inspect plus on-the-ground visits to any safe area. He concluded that the defoliant program had caused some ecological changes. Although single treatment on semideciduous forest would cause inconsequential changes, repeated treatments could kill enough trees to permit invasion of many sites by bamboo. The presence of bamboo would then retard regeneration of the forest.

The Army supports the need for a more detailed investigation of the ecological effects of herbicides used in Vietnam. Such an investigation should be conducted in coordination with other interested agencies. In order to get such a study started, a research and development project entitled "Ecological Effects of the Military Use of Herbicides in Vietnam" is being initiated. This study would continue into the post-hostilities phase.

In the final analysis the sole purpose of the herbicide program is to protect friendly forces and conserve manpower. The following examples should demonstrate the success of the defoliation effort in Vietnam:

1. Major defoliation has been accomplished in War Zone C. Prior to defoliation, 7 brigades were necessary to main US/GVN presence. During 1967, after defoliation only 3 brigades were required.

2. The Commander of Naval Forces in Vietnam in a report to General Abrams stated: "As you know, a major concern is the vegetation along the main shipping channel. Your continuing efforts under difficult and hazardous flying conditions, in keeping this area and the adjacent inland areas devoid of vegetation have contributed considerably in denying the protective cover from which to ambush the slow-moving merchant ships and US Navy craft."

3. In 1968, the Commanding General of the First Field Force reported: "Defoliation has been effective in enhancing the success of allied combat operations. Herbicide operations using C–123 aircraft, helicopters, truck mounted and hand sprayers have become an integral part of the II CTZ operations against VC/NVA. The operations are normally limited to areas under VC/NVA control remote from population centers. The defoliation program has resulted in the reduction of enemy concealment and permitted increased use of supply routes by friendly units. Aerial surveillance of enemy areas has improved and less security forces are required to control areas of responsibility. An overall result of the herbicide program has been to increase friendly security and to assist in returning civilians to GVN control."

4. The US Commander in the III CTZ related: "Herbicide operations have contributed significantly to allied combat operations in the III Corps. Defoliation is an important adjunct to target acquisition. Aerial photographs can often be taken from which interpreters can 'see the ground' in areas that previously were obscured. Defoliation also aids visual reconnaissance. USAF FAC's (forward air controllers) and US Army aerial observers have discovered entire VC base camps in defoliated areas that had previously been overlooked."

5. In the south in the IV CTZ, C–123 herbicide operations are limited. This is because of the vast areas of valuable crops which are not to be destroyed, even though they may be in enemy hands. Therefore, the commander of the IV Corps area in presenting his evaluation cited the value of helicopter operations as follows: "A significant helicopter defoliation mission was conducted in the vicinity of SADEC in August 1968. The target area consisted of 3 main canals which converged and formed a strong VC base. The dense vegetation permitted visibility of only 10–15 meters horizontally and nil vertically. The area was sprayed with approximately 735 gallons of herbicide white and over 90 percent of the area was defoliated. As the result of the defoliation, an ARVN battalion was able to remain overnight in the area for the first time in five years. Many enemy bunkers were open to observation. Since the defoliation, the VC presence has decreased to the point that only RF/PF forces are now necessary for local security."

6. As a part of the 1968 evaluation report of herbicide operations, the US Senior Advisor in the IV Corps Tactical Zone area reported: "A section of National Highway 4 in Phong Dinh Province was the site for a defoliation operation on 24 June 1968. Since January 1968, a series of ambushes was conducted against SVN convoys and troop movements. Because of the total inability of ground troops to keep the area clear of VC, this area was sprayed using 685 gallons of herbicide White. The target area was primarily coconut palm and banana trees that had been abandoned by their owners for several years. During the period of abandonment the vegetation had become so dense that convoy security elements were not able to see more than five meters into the underbrush and had to rely on reconaissance by fire to discover the hidden enemy. This method of protection had proven ineffective. Three RF/PF companies with US advisors were used to secure the target for the helicopter operation in addition to an armored cavalry troop. Since the defoliation mission was completed, convoys have used the highway 2 or 3 times a week without attack or harassment. Only one RF platform has remained in the area to provide local security to the hamlet and highway."

7. In certain instances, we know the VC have been forced to divert tactical units from combat missions to food-procurement operations and food-transportation tasks, attesting to the effectiveness of the crop destruction program. In local areas where extensive crop destruction missions were conducted, VC/NVA defections to GVN increased as a result of low moral resulting principally from food shortages.

The most highly valued item of equipment to field commanders in Vietnam is the helicopter. There was some question when the helicopter spray equipment was first procured whether field commanders would divert the use of helicopters from combat operations for herbicide spray operations. The very fact that the commanders have used their helicopter spray equipment to the fullest and have asked for more is certainly proof that herbicide operations have been helpful in protecting the American soldier and contributing to successful accomplishment of the ground combat mission.

CONCLUSION

Gentlemen, we have presented to you in as complete and candid a manner as possible the life-saving usage that we have made of riot control agents and herbicides in South Vietnam and the policies under which this usage has taken place. We believe this usage has been wise and has been accomplished with restraint. The result is that our forces have been better able to accomplish their mission with significantly reduced U.S. and Vietnamese casualties.

CULEBRA

Mr. PACKWOOD. Mr. President, I invite the attention of the Senate to the Navy shelling and bombing of the inhabited island of Culebra, part of the Commonwealth of Puerto Rico. I have learned of the situation from the fine series of articles in the Armed Forces Journal, and through the efforts of many of my distinguished colleagues. I have read the report of the House Armed Services Subcommittee on Real Estate, approving the Navy plan to lease an additional third of the 7,000-acre island of Culebra. I am not convinced that no satisfactory alternatives are available to the Navy. I do not want to see the Nation operating as the Washington Post editorialized:

Even though the Navy finds Culebra a convenient area for its training operations, we cannot afford as a Nation to get into the posture of putting bombs ahead of people.

The Navy has been operating on Culebra for about 35 years, with the degree of training sharply increasing in the last 3 years. I fear that the Navy has been basically insensitive to the increasing opposition of the U.S. citizens occupying Culebra. Fisherman have had to adjust to changing bombing schedules, flights in and out of the island have to be cleared with the Navy, recreation and wildlife are limited due to expanded operations—Culebrans are prisoners on their own island. I suggest more investigation into the possible application of artificially constructed islands. It is my understanding that the distinguished Senator from Washington (Mr. JACKSON) intends to pursue this matter through his Armed Services Subcommittee on Military Construction. I hope his efforts to find an equitable solution will be successful. If not, I am prepared, unless the Navy position is substantially stronger than I believe it to be, to support the amendment offered by the distinguished Senator from New York (Mr. GOODELL) to block the Navy from continued shelling of Culebra. I understand that this one issue has united all political groups in Puerto Rico. It has given the independent party—those wishing to see Puerto Rico completely independent from the United States—fuel for their cause.

I ask unanimous consent to have printed in the RECORD letters I have received from Ramon Feliciano, Mayor of Culebra, and Rafael Hernandez Colon, President of the Senate of Puerto Rico. As a basic matter of regard for human life, it is imperative that the Navy devise an alternative to the continued shelling of Culebra.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMONWEALTH OF PUERTO RICO, SENATE,
San Juan, Puerto Rico, August 13, 1970.

Hon. ROBERT W. PACKWOOD,
U.S. Senate, Capitol Building, Washington, D.C.

DEAR SENATOR: You are undoubtedly aware of the growing concern in Puerto Rico regarding the Navy's shelling and bombing of the inhabited island of Culebra, which is part of the Commonwealth of Puerto Rico. This has now produced a human and political problem of considerable gravity on which I wish to solicit your help.

Senator Henry M. Jackson is trying to find a satisfactory solution within his Armed Services Sub-Committee and Senators Goodell and Cranston have introduced an amendment to the Military Procurement Authorization Act (HR 17123) which would preclude the use of funds provided therein for shelling or bombardment of Culebra and its adjacent cays.

I urge, that you back Senator Jackson in his efforts and that you vote for the Goodell-Cranston amendment if this proves to be the only means of ending the naval shelling.

Puerto Ricans are unanimous in believing that the situation has become intolerable and that the shelling should stop, not only in the interest of the Culebrans but also in the interest of continued warm relations with the United States. Moreover, there is considerable evidence that superior alternative sites which are all uninhabited are available for sub-shelling which would obviate such a serious human and political problem.

As the Washington Post editorializes "even though the Navy finds Culebra a convenient area for its training operations, we cannot afford as a nation to get into the posture of putting bombs ahead of people".

Sincerely yours,
RAFAEL HERNÁNDEZ COLÓN,
President of the Senate.

GOBIERNO MUNICIPAL DE CULEBRA,
Culebra, Puerto Rico, August 13, 1970.

Senator ROBERT W. PACKWOOD
Senate Office Building, Washington, D.C.

DEAR SENATOR PACKWOOD: Senators Goodell and Cranston are offering an amendment to the Military Procurement Bill which would end Navy's use of our small island as a practice target area prohibiting the further expenditure funds for that purpose.

The conditions imposed on our lives and the restriction of our ability to develop our resources which have resulted from the Navy's practice have received wide attention in the press. Both the New York Times and the Washington Post, have published editorials pointing out the injustice suffered by our people and asking the Navy to find some other place to test its weapons. The influential magazine, Armed Forces Journal, investigated the situation in detail and, in the first of a series of articles (May 23, 1970), concluded: "Our hearts are with the United States Navy, but not Culebra. Not now. Our biases, our opinions have shifted from the Navy's side to the Culebran's as we tracked down and checked out the story on these pages."

I am writing to you to ask your support to bring justice to our people. I hope that as you become aware of the facts in the case that you will support the Goodell-Cranston Amendment to the Military Bill.

If you require further information, please do not hesitate to call upon me. The firm Covington and Burling in Washington is representing the municipality of Culebra on pro bono publico basis without fee. Mr. Richard D. Copaken of that firm will be glad to supply any information which you might require if it is more convenient for you to reach him than it is for you to call me.

Thanking you for your consideration, I remain

Sincerely,
RAMON FELICIANO,
Mayor of Culebra.

TRIBUTE TO SENATOR HANSEN

Mr. ALLOTT. Mr. President, the able Senator from Wyoming (Mr. HANSEN) has been recognized by many of us in the Senate for his knowledge and understanding of the oil and gas industry and the importance of those energy fuels to the economic well-being and national security of our Nation.

The Wyoming State Tribune of Cheyenne also recognized the part my good friend CLIFF HANSEN has played in the interest of U.S. self-sufficiency in its principal source of energy.

In a recent editorial, that newspaper paid a fitting tribute to Senator HANSEN for the part he has played in resolving that controversy.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HANSEN HELPED CARRY THE DAY

While many members of Congress, governors and other public officials have played an important role in beating back an effort to change the 11-year-old oil import quota system to a tariff plan, to the detriment of both the consuming public as well as the domestic oil industry, perhaps no one individual has been so outstanding in leading the opposition to this idea as Sen. Cliff Hansen of Wyoming.

A great deal of the credit for the White House announcement this week that the U.S. would continue with the oil import quota plan instead of adopting a tariff as had been recommended by the President's Task Force on Oil Imports must go to the Wyoming Republican whose determination, zeal and energy have projected him to the forefront as a champion of the oil quota system.

As he noted yesterday in a letter to President Nixon with regard to one aspect of this controversy, the Wyoming Republican has repeatedly warned of the possibly disastrous consequences of a policy that would increase the dependence of this country on foreign oil particularly from the Middle East, to the consequent endangering of the domestic petroleum industry.

Some idea of the problem that faced the oil states and their spokesmen such as Senators Hansen of Wyoming, Henry Bellmon of Oklahoma and John Tower of Texas may be gathered from a speech delivered on the Senate floor on Aug. 3 by Sen. Thomas J. McIntyre, D., N.H., attacking the oil import program.

In the past, Senator Hansen has pointed out the somewhat incongruous position of New England lawmakers who continue to seek greater protection for their manufactured goods yet oppose the same sort of protection for products that are not indigenous to their constituencies, as with textiles and shoes.

In his Aug. 3 speech, McIntyre deplored the failure of the public to be fully informed of the issues of the oil import program vs. a tariff system, and charged that the domestic oil industry enjoyed a $1 million a day subsidy; and he concluded: "What is truly incredible, however, is not that advocates of the oil industry's position, with personal and financial ties to the oil community, hold government positions and are active in setting oil policy—but that the rest of us have accepted this situation and have bought their bill of goods for years when it was so obviously and outrageously contrary to the public interest."

Next day Hansen who was not present when McIntyre made his speech, was on his feet in the Senate with a reply which not only rejected McIntyre's charges but provided an excellent capsule argument for continuation of oil import quotas:

Said the Wyoming senator: "First, I would like to assure the senator from New Hampshire that I am not one of those oil industry advocates 'with personal and financial ties to the oil community.' Second, I regret that he bought this 'bill of goods' for so many years when it was actually a bargain, but now that the bargain rates have been sucked into the Middle East caldron, he would have us paying more for imported oil than our own.

"I own no oil stock, no oil or gas royalty, nor any interest in any oil and gas company," said Hansen. "I do, however, consider it in the public interest to do what I can to see that this country never has to submit to foreign blackmail for the oil and gas that provides three-fourths of our energy requirements and without which all transportation and most industry would come to a grinding halt."

Hansen recounted the circumstances of the 1967 Arab-Israeli war when the Arab nations halted all oil shipments to the West, the Middle East developments that have created

a worldwide tanker shortage, and the recent sharp increase in prices for foreign domestic crude oil now making it more expensive than U.S.-produced oil.

Hansen pointed out that in addition to the current $4.25 to $4.55 per barrel price for foreign oil as delivered to East Coast ports, a tariff of $1.35 per barrel as advocated by the proponents of the tariff plan would raise the price for foreign oil to $5.60 a barrel compared with a delivered price of $3.80 for oil produced in this country.

"But this is not all," said Hansen in his Aug. 4 speech. "A critical natural gas shortage is now imminent in the Northeast and imports of liquified natural gas, at more than double the cost of domestic gas, would add another $6 billion to consumer costs."

This would further heighten the domestic energy crisis by discouraging U.S. exploration for oil and gas reserves which are needed not only now, but will be at some time in the future, possibly in greater degree, and could prove critical in time of international crisis when foreign petroleum sources are cut off and denied to this country.

Senator Hansen and his fellow oil state colleagues apparently have won the battle, at least for the time being and credit is due their diligence and perseverance in carrying the day against formidable odds.

TRIBUTE TO ROY CHUGG

Mr. BENNETT. Mr. President, I wish to take a moment today to pay tribute to Mr. Roy Chugg of Providence, Utah. When Mr. Chugg was a young man, his feet were severely frostbitten while he was out feeding cattle, and he lost much of the circulation in them. Later they were frozen again and he eventually had to have both legs amputated at the hips.

Well, what do you do when a thing like that happens to you? This is the way Mr. Chugg answered that question:

I had to quit farming and was about down and out, but I told myself "You can't just quit—you have to earn a living."

With the help of D. Ivo Eames of Bountiful, Mr. Chugg got a loan of $150 through the Utah office of the Farmers' Home Administration with which he purchased the tools, equipment, and materials to build a small shop which he uses to tie high-quality flies for fishing on the fine trout streams of Utah.

An expert fisherman all his life, Mr. Chugg had no trouble developing his new occupation, soon had the loan paid back, and is now supporting himself and getting along very well.

This story was recently featured in the Deseret News of June 5, 1970. I was impressed by the determination and initiative displayed by the way Mr. Chugg rebounded from his earlier misfortunes to lead a very useful and active life and support himself in an occupation he undoubtedly enjoys very much.

The article in the Deseret News also mentions that the small loan he received came through the economy opportunity loans program of the FHA and that Utahans have the best repayment record of the Western States in this program. This prompted State FHA Director Clarence A. Anderson to respond:

Utah's people work hard and pay their debts.

Mr. President, it is a real privilege as the senior Senator from Utah to take this opportunity to pay tribute to Mr. Chugg in particular and to Utahans in general for their record in demonstrating to the rest of the Nation the dignity of work.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FLY-TYING EXPERT AIMS TO PLEASE—PEOPLE AND FISH

(By Jan Padfield)

PROVIDENCE, CACHE COUNTY.—"That would scare a fish right out of the pond," said Roy Chugg as he tied a fancy blue and pink fly. "People go for pretty flies—fish don't care. So I decorate some more than others and try to please everybody."

Edward LeRoy Chugg, 68, fishing expert, lives alone here and does a flourishing business tying dry flies and repairing reels and poles, although he only recently began this enterprise. "I had to quit farming and was about down and out, but I told myself 'You can't just quit . . . you have to earn a living,'" he said, recalling the years following amputation of both legs at the hips—one in 1958, and the other in 1963.

"I tried several things, including box makbuy the lumber. Finally, I even had to accept ing, but couldn't even get ahead enough to a little welfare.

"Nothing worked out well until three years ago a fellow named Eames came along and offered encouragement, and, after considerable investigation, financial help. After learning I was a lifetime fisherman he suggested I might tie flies.

"My friend in Melville, Lee Jessup, said he'd give me a few lessons. My eyesight was good for the close work, but I didn't think I'd ever be able to tie the little ones.

"It was lucky for me when Ivo Eames came along," he said. (D. Ivo Eames, Bountiful, is chief of operating loans for the Utah office of Farmers Home Administration, a branch of the Department of Agriculture. Eames said that agency made Chugg a $150 loan to buy carpentry tools, lumber and equipment to tie flies.)

"The community can point with pride to Roy Chugg. He rapidly developed a skill for tying high quality flies. His loan was repaid in full. He feels very independent and does not want nor need to borrow more money," Eames said.

Keeping house for himself is not too difficult, and Roy uses the large kitchen of his old rock home as a workshop area. His son works in Ogden, but returns home most weekends and enjoys dad's cooking. A daughter, living in Pocatello, helps him with the most difficult housecleaning.

Roy plants a big garden every spring and cares for it himself, weeding, watering and hoeing. In a small pasture behind his home is a small herd of sheep from which he sells wool to the local wool pool. Difficult tasks are quite ordinary for him. Recently he got up on a tall shed and mended the roof.

But fishing is Roy's chief interest. "These flies have to be just so. Fish are better educated than they used to be . . . especially the natives and German Browns. If there's too much hair they just let the fly go by . . . fish like the body of the fly . . . and the hackle, made of chicken feathers, helps float it," he explained.

A different size feather is needed for every size hook, and the color must be just right . . . black, dirty-white, grey, brown, red. These are made mostly from chicken neck feathers.

"One fellow wanted $4 just for the neck of a dead chicken," he snorted indigantly. Usually people dont' want the neck of the chicken. I'll raise my own before I'll pay that price."

So he raised about 50 chicks, sold the hens and killed the roosters, preserving the necks by rubbing them with salt. He also imports peacock feathers from Minnesota.

"Black gnat," "blue quill," "green cricket," "renegade," "muddler," and "sandy mite" (made from deer hair) are just a few of the new and successful flies he has invented, mostly for trout fishing. Many friends take him fishing to try out the flies. "Once we got two limits, all with one fly," he smiled.

"A dry fly man is a real artist. They won't take corn and cheese as bait because only 'Rainbows' go for that stuff," he said.

Roy can't fish streams anymore, but spends a lot of time at lakes and reservoirs. "It gets in your blood and you're more addicted than a booze hound," he confesses. Many college students from nearby Utah State University stop by for advice and chatter.

One pretty girl is a regular at picking up Roy for a day of of angling. "She hates taking fish off the line, but I say "If you're going to fish, don't bring them to me to get off the hook," he said.

A loyal "Aggie" fan, he has rarely missed a home basketball game in the past decade. "They're mighty nice to me and always have my place saved by the score-keepers table."

His problems began when Roy was 15 and out feeding cattle. His feet were frostbitten and much of the circulation lost. A frisky horse stepped on one foot and infection followed. Later, while working on construction of Bushnell General Army Hospital (now Intermountain Indian School) at Brigham City, his feet were frozen again. Eventually amputation was necessary.

"I get along fine now. I have a few dollars ahead. My biggest problem is getting someplace to spend my money," he joked.

Clarence A. Anderson, state director, FHA, said Economic Opportunity Loans enable low income rural people to establish small enterprises. These funds also cover farming, buying sheep or cattle and cooperatives that provides services, supplies or facilities to rural people, made through a nationwide county office system.

Loans up to $3,500 can be made to buy tools for men with carpentry or mechanical skills, to purchase sewing machines and other equipment for seamstresses, and hundreds of other small family enterprises, Anderson said.

Utah's total is 448 loans totaling $942,730 since the Economic Opportunity Act of 1964 was passed, and her repayment record is better than all other Western states. "Utah's people work hard and pay their debts," Anderson said.

AGED HAVE TRANSPORTATION WOES

Mr. WILLIAMS of New Jersey. Mr. President, at hearings held by the Senate Committee on Aging, of which I am chairman, witnesses have told us that the elderly have two overriding problems.

First, of course, is inadequate income in retirement, intensified by rapidly rising medical costs.

And the second concern is that older Americans cannot find suitable transportation at prices they can afford.

The problem is so severe that millions of elderly persons—whether they live in congested cities or sparsely populated rural areas—are trapped within walking distance of their homes or apartments.

This not only accentuates the isolation of the aged, but it also denies them urgently needed services through forced immobility.

Earlier this month, I introduced with bipartisan support S. 4246, the Older Americans Transportation Services Development Act. This bill would authorize a special emphasis program on transpor-

tation research and demonstration for the aged.

For elderly persons, enactment of this legislation could provide an effective means to counteract isolation, which often leads to loneliness, despair and even death.

Moreover, an excellent article by Ted Schuchat documents with compelling evidence the severity of the transportation problem for the elderly. In addition, it provides persuasive reasons for prompt and favorable consideration of the Older Americans Transportation Services Development Act.

Mr. President, I commend this article to the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AGED HAVE TRANSPORT WOES

(By Theodor Schuchat)

"It has been said that the United States is the only country in the world that consults its teen-agers on world affairs and tells its older persons to go out and play."

Constance Midkiff, director of the Paterson municipal Office on Aging, amused Senators with this observation at a Committee session last year.

"Even if the older citizen accepted this admonition," she said, "he cannot afford the expense of getting to the playground." Thus, she wittily pointed out the crucial importance to senior citizens.

It is the third largest item in the average retired couple's budget, according to the United States Bureau of Labor Statistics. Only food and shelter account for more than spending for transportation, which takes nearly nine cents of every retirement dollar.

"When a person is old and perhaps weakened by pain and illness, transportation will not be used unless it is convenient and unless it is reasonably priced. And that is, too often, not the case today," Senator Harrrison A. Williams, Jr., D-NJ, said recently.

For most older people, transportation means a public bus or transit system, since only 15 percent have drivers' licenses. Yet mass transit systems are deteriorating in most communities and even disappearing in many rural areas.

"We have no public transportation system in the State of Maine that is worth a hoot," the state health commissioner once told the Senate Special Committee on Aging. "For all practical purposes, we have no public transportation system."

"The problem is so severe that millions of elderly Americans—whether they live in the heart of urban areas or in remote rural reaches—may be said to live under house arrest," Senator Williams said. "In fact, the U.S. Commissioner of Aging recently said that too many elderly live in what amounts to solitary confinement.

"They have no way to reach destinations that are vital to them—their physicians and clinics, their friends and family, their Social Security offices, their churches and senior centers, and parks and public buildings meant to serve them as well as younger people," he continued.

Senator Williams is both chairman of the Senate Special Committee on Aging and author of the Urban Mass Transportation Act of 1964. He combined these two interests at a recent meeting on transportation problems of older people sponsored by the U.S. Administration on Aging, the U.S. Department of Transportation, and the U.S. Department of Housing and Urban Development.

There the Senator called for assessment of the off-hour, reduced fares now offered to older people in 34 cities. "There is reason to believe that ridership has actually increased in New York City since a reduced fare plan went into effect," he said, "and there is reason to believe that bus companies could actually increase revenues with such plans elsewhere."

Availability and cost are not the only problems faced by the senior citizen who wants to get across town to a clinic or a recreational program.

"The older person often would rather stay at home than undergo the sometimes monumental task of reading, decoding, deciphering, and comprehending a bus, train, or transit timetable," Louis A. Gelwicks told the conference on transportation and the aging.

Older people also suffer from lack of sheltered seating while awaiting their bus, awkward stairs, few places to hold, jolting stops and starts, and surly faretakers. So serious are these problems that a report to the U.S. Department of Transportation has called for specialized transit systems for the aged and handicapped in every city of 100,000 population or greater.

"Senior Citizens A-Go-Go" has become part of the life of six counties in western Idaho. This project provides transportation with two used buses. In Prince Georges County, Maryland, six buses driven by retired drivers carry oldsters to and from their golden age clubs.

At Massachusetts Institute of Technology, the "Dial-A-Bus" idea is being developed. People needing transportation would call on the telephone, and a small bus would come to their door. Routing would be arranged by computer.

Very much interested in the Dial-A-Bus concept, Senator Williams has asked the Urban Mass Transit Administration to spend a reasonable and proper share of its research money on this and other projects that could be significant for the elderly, the disabled, and many others.

SALUTE TO THE HAWAII ISLANDERS

Mr. FONG. Mr. President, I am proud today to pay tribute to the professional baseball team in my home State, the Hawaii Islanders, which over the weekend clinched the Pacific Coast League Southern Division pennant for the first time in its history.

A national magazine—Sports Illustrated—this week described our Islanders as "the best show in town"; and this description is supported by the fact that some 400,000 fans turned out this year to watch our excellent Triple A ball club.

Even without a pennant-winning team, our attendance is high compared with our mainland opponents in the PCL. Last season, more than 300,000 spectators went to the ball park in Honolulu to cheer on their favorite team.

For this reason, all the credit for this season's outstanding performance cannot go to the team and its management. In saying this, I do not intend to minimize their great feat, and I do congratulate each and every one of these athletes on their achievement.

But I want to commend, also, the loyal fans who have, over the past decade, supported the Hawaii Islanders, win or lose, and who now must share some of the credit for cheering the 1970 team victory in the PCL Southern Division.

TWO SIDES OF THE CONSUMER COIN

Mr. MOSS. Mr. President, one of the most persuasive voices in America today is the voice of the consumer. Men and women who for years have been frustrated about shoddy goods and unfulfilled contracts and meaningless warranties, and raised their voices in protest only to have them bounce against seemingly brick walls, have suddenly found themselves being listened to very carefully both in Washington and in the head offices of industry. In fact, in my role as chairman of the Senate Consumer Subcommittee, I devote a good deal of time myself to listening to the buying public and trying to see that they get a fair deal.

But how about the businessman? He has a side too. Does he not deserve equal time to tell his side of the story?

Take the grocer, for example. He puts up with a great deal from a certain class of customer—the tomato pincher, the cherry eaters, the candy bar snatchers, to mention a few. Every customer who insists that his grocer give him value received for every penny he spends might well ask himself, "Do I help to keep down expenses for him, so that he can keep his prices low for me?"

The question is very well put in a column written by Ray Nelson and published in the Logan, Utah, Herald Journal. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CRITICISM GOES BOTH WAYS

(By Ray Nelson)

Consumer protection is not an entirely one-sided coin.

The lily-white role in which literally hundreds of consumer protection bills place the consumer overlooks one vitally important area where consumers have only themselves to blame for what they feel are higher than necessary prices in markets.

A staff writer for a major daily newspaper comes up with a summary of some of the offensive practices of bargain-hunting consumers that can only be described as irresponsible.

These practices cause loss to the merchants that must be paid for by all customers.

Among the offenses mentioned, of course, are the women who pinch fruit to see if it is ripe. As one consumer expert comments, "If the fruit is ripe, it becomes ruined, and if not yet ripe, it will be bruised."

Another observation of the expert: "Men love to stand by the produce counter eating grapes or other loose fruits while their wives shop. Also, you see people pick up candy bars, unwrap them and eat them, rationalizing that if they're going to spend $20 on groceries, the store owes it to them."

Two thirds of all cherries are eaten before they reach the check-out stand. Bottles accidentally knocked off a shelf, eggs broken as the cartons are carelessly opened, lettuce leaves lost when a customer sorts the bin looking for the best head, and soft drinks consumed in the store are but a few of the "inconsiderations" of consumers when they go into markets.

Often shoppers leave frozen food items where they thaw if they happen to change their mind about purchasing them.

"Anyone familiar with the narrow margin

on which modern, high-volume, low markup retail distribution operates can understand why the irresponsibility of consumers can result in higher prices," commented one market manager.

Supermarkets operate on a margin of a cent or less per dollar of sales. And the necessary foods take less of the consumers' disposable dollar than ever before.

PROTECTION OF NEW YORK POSTAL UNIONS

Mr. GOODELL. Mr. President, I wish to clarify, as a matter of legislative history, the intent of the Senate as embodied in H.R. 17070, the Postal Reorganization and Salary Adjustment Act of 1970, with regard to the question of collective bargaining rights for postal unions which do not now have national exclusive recognition rights.

On August 3, in the course of explicating to the Senate the conference report on H.R. 17070, the distinguished chairman of the Post Office and Civil Service Committee of this body (Mr. McGEE) made the following comments on that question:

On collective bargaining, the Senate receded to the House so that postal unions which are not craft units will have at least the opportunity, subject to recognition procedures by the National Labor Relations Board, to compete for recognition. In the transitional bargaining phase this year, only the unions having national exclusive recognition will be the bargaining agent. That transitional contract will not interfere with the National Labor Relations Board's ultimate determination for another bargaining unit if it determines that is the right thing to do.—CONGRESSIONAL RECORD, p. 26954.

On August 6, Representative UDALL, a distinguished member of the House Post Office and Civil Service Committee, explained the conference's resolution of that question to House Members as follows:

While the Senate has provisions in its bill to allow only national craft recognition, the House allowed the National Labor Relations Board to decide the appropriate unit. In the conference, the House version prevailed. Some have interpreted this to mean that we believe the NLRB should decide on local units as appropriate units for purposes of collective bargaining. Nothing could be more mistaken. What the conferees meant is that the NLRB should apply those guidelines normally applied in the private sector and decide the appropriate unit on that basis. They should not look to the fact that the House prevailed in this area as any indicator of preference for national or local units, craft or otherwise.—CONGRESSIONAL RECORD, p. 27604.

When the phrase "national exclusive" was stricken from page 281, lines 8 and 9, of the Senate version of the postal reorganization bill—S. 3842—it was made clear that the intent of the Senate in taking that action was to preserve the option of allowing unions without national exclusive recognition to retain collective bargaining rights under the new Postal Reorganization Act. The distinguished Senator from Iowa (Mr. MILLER) explicitly made the point on June 30 that the amendment adopted by the Senate left open the option of allowing such independent New York unions as the National Postal Union—NPU—and the National Alliance of Postal Employees—NAPE—the right to bargain under the new act—CONGRESSIONAL RECORD, page 22332.

The distinguished chairman of the Senate Post Office and Civil Service Committee (Mr. McGEE) concurred in Mr. MILLER's point that the intent of the Senate, as Mr. McGEE noted—CONGRESSIONAL RECORD, page 22332—was that Congress not preempt the decision on which unions should be allowed to bargain. That decision was to be left to the National Labor Relations Board—NLRB—for adjudication.

Those who fought on June 30 to insure that unions such as the NPU and the NAPE, which do not now have national exclusive recognition rights, may win certification to collectively bargain under the new act, have won a victory in conference. The House version has prevailed on the question, with the result that the NLRB may permit nonnational and noncraft unions to gain recognition for collective bargaining purposes.

During the transitional bargaining period this year, however, only those unions which have national exclusive recognition rights will be permitted to become bargaining agents for postal employees.

Let it be clear that it is the intent of this Congress, reflected in passage of the conference report on H.R. 17070, that nonnational and noncraft unions shall be able, after the transitional bargaining period, to compete for recognition as bargaining agents.

Let it be clear that it is not the intent of Congress to permit, in any contract negotiated by the new postal corporation during the transitional bargaining period, the inclusion of any provision which would have the effect of providing those unions which do now have national exclusive recognition rights with any advantage over those which do not, with the result of effectively freezing the latter unions out of the bargaining process indefinitely.

It is the intent of Congress that bargaining during the transitional bargaining phase be conducted in such a way that upon conclusion of the transitional period nonnational and noncraft unions, such as the NPU and the NAPE, will be able to compete for recognition as a bargaining agent for postal employees upon an equal footing with those national unions which have been permitted to bargain during that period.

INVASION OF CZECHOSLOVAKIA

Mr. WILLIAMS of New Jersey. Mr. President, August 21 marked the second anniversary of the violent and unjustifiable invasion of Czechoslovakia by Soviet troops. The attack on the Czech people was a shock to the free countries of the world.

In early 1968, a new regime, headed by Alexander Dubcek, was succeeding in easing the tensions within the country. Although communism was being reformed and not replaced, the Czech people was a shock to the free countries of leges shared by those of free societies. With censorship eliminated, the field of literature progressed rapidly; a peace with the church ended religious persecution; and legal reforms prohibited unjust treatment of individuals.

However, the progress of the new Czech society displeased and concerned neighboring Communist countries. Following several meetings of top party leaders, a decision to stop the Czech movement was made. On the night of August 20–21, 1968, 200,000 Soviet troops, combined with military units from five other Communist bloc countries, crossed the Czech border to suppress the people of Czechoslovakia.

But these attacked patriots were determined to withstand this aggression, a resistance that cost the lives of five Czechs and wounded nearly 300. A total of 600,000 Red troops was the final force needed to seize control of this nation.

Mr. President, 2 years after this deplorable act of violence upon Czechoslovakia, the economic and social welfare advances have been halted and the people, once again, have been forced to accept limited rights and privileges.

The courageous efforts of the Czech people to achieve self-determination must never be forgotten. The determination of a people to accomplish basic social and economic reforms cannot be suppressed.

ADDITIONAL SUPPORT FOR THE GENOCIDE CONVENTION II

Mr. PROXMIRE. Mr. President, yesterday I placed in the RECORD the text of three letters from religious and humanitarian organizations who support the ratification of the genocide convention. Today I should like to have printed in the RECORD a partial list of the organizations which presently support ratification. The groups listed represent many different interests and yet all of them are united in their abhorrence of genocide.

I believe that the time for Senate action is long overdue.

There is widespread support for ratification of the treaty. We cannot ignore the desires of these groups. I ask unanimous consent that the list of organizations who have written to the Committee on Foreign Relations in support of the convention be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

PARTIAL LIST OF ORGANIZATIONS FILING STATEMENTS FOR THE SENATE FOREIGN RELATIONS SUBCOMMITTEE ON THE GENOCIDE CONVENTION

Ad Hoc Committee on the Human Rights and Genocide Treaties.
American Association of University Women (Marin County, Calif.).
American Baptist Convention.
American Civil Liberties Union.
American Ethical Union.
American Jewish Committee.
American Jewish Congress.
B'nai B'rith Women.
Industrial Union Department, AFL–CIO.
Jewish Labor Committee.
Joint Washington Office for Social Concern.
League of Women Voters.
National Catholic Conference for Interracial Justice.
National Conference of Christians and Jews.

National Council of Jewish Women.
National Federation of Temple Sisterhoods.
Protestant Episcopal Diocese of Massachusetts.
Ukrainian Congress Committee of America.
United Methodist Church.
United Nations Association—USA (National and Capital Area Division).
University of Denver.
Workmen's Circle.
Young Women's Christian Association.

TERMINATION OF THE WAR IN VIETNAM

Mr. GORE. Mr. President, I have earnestly hoped for peace in Vietnam. Time after time I have spoken against widening either the war or our commitments. At the time of the invasion of Cambodia, I expressed the view that we would by this action acquire a new dependency—the Lon Nol government, which would be a second millstone around our neck. Unfortunately, this seems to be materializing now.

Even so, I cannot yet bring myself to vote for an extreme, though perhaps thoroughly constitutional, means of stopping the war. This was first proposed by the Senator from New York (Mr. GOODELL) last year. I spoke against his amendment at that time. I am still of this opinion, though developments since have been temptingly persuasive.

In a book of which I am the author, I wrote some 2 months ago, as follows:

Each and every bill making appropriations for the war has had my support. I have drawn a clear distinction between support of our troops in Vietnam, on the one hand, and approval of the policies that got us into a land war in Asia and that have repeatedly widened and escalated that war, on the other hand. For the most part, the fighting men are there not by choice but in duty to their country and by order of military authority. They deserve the best of weapons, munitions, equipment, medical supplies, food—everything they need—to execute their orders with the least possible danger to themselves. Up to 1970, almost every member of the House and Senate shared this feeling. Congress did, in 1969, limit authorization for use of funds to expand the war into Laos and Thailand. Except for this, an invasion of Laos may have already occurred. There is no explanation, really, as to why Congress did not at that time include Cambodia in this prohibition, except that the likelihood of expansion of the war into Cambodia seems not to have then occurred to anyone.

Congress unquestionably has the constitutional power—the power of the purse—to stop the war by withholding appropriations. This would be an unusual, an extreme, use of constitutional powers by the Legislative Branch to restrain the actions of the Executive; no less extreme, of course, than the Presidential usurpation of the war-making power in the case of the Cambodian invasion. Would this be wise? More and more Senators are now considering such a course of action. For my part, I have been very reluctant to do so. It would be better, needless to say, if the President could be persuaded to alter his course of actions, thus avoiding a constitutional crisis, a kind of crisis which our Founding Fathers could not have foreseen—more than 2,000,000 men sent into the longest war in our history without a declaration of war or specific approval of the people or their elected representatives.

Then in an executive session of the Foreign Relations Committee on August 19, I made the following comment:

Mr. Chairman, I think the Congress has the power to terminate a war by using the power of the purse. It would be unprecedented to do so. It would be an extreme use of a constitutional power. I haven't been able thus far to bring myself to that point of action. I must admit that I am considering doing so because of the extreme usurpation of power by the President and the apparent determination to continue the war.

My idea of a proper termination of the war is a negotiated settlement. It seems to me that neither Vietnamization, which is a phased withdrawal tied to the maintenance of the Thieu regime in power, nor a forced timetable withdrawal, as contained in the McGovern–Hatfield amendment, may be compatible with a negotiated settlement.

I notice one of the stipulations here is to secure the release of prisoners of war. Mr. Chairman, the release of the prisoners of war will be achieved, in my opinion, by negotiated settlement, not by "Vietnamization," not by a phased withdrawal, not by forced withdrawal, I mean withdrawal brought about by the withholding of funds. So we have some incongruous proposals here.

I spoke against the Goodell Resolution when it was introduced. I still doubt the advisability of such action.

I feel, basically, that the McGovern-Hatfield amendment is incompatible with the kind of negotiated settlement that I would like to see. And I will go one step farther. In my humble opinion, the best, perhaps the only chance for the survival of democratic processes in South Vietnam, is not through the maintenance of the Thieu-Ky regime in power or perhaps the toppling of that regime by withdrawal of appropriations, but rather through the utilization of our presence while we are there to persuade a coalescing of the factors and personalities, diverse sects, into a compromise regime in which democratic processes just might have some slim chance of survival.

I don't think they have any chance of survival at all under Thieu and Ky. They don't believe in them. And I doubt they have any chance of survival if they are toppled by our precipitous withdrawal.

What I think is the desirable course, and I have preached and preached and preached this, is the use of our presence and forces while we are there to persuade a settlement and then invite Thieu and Ky to come along if they wish to, or if they don't wish to, then let them go it alone as they can.

There is a better way. That better way is to persuade the President to make the utmost effort for a negotiated settlement. Fortunately, President Nixon has now sent a top-ranking diplomat to the Paris peace conference to "renew," as he said, efforts at a negotiated peace. I never have thought we should have relaxed our efforts for a negotiated peace. At any rate, since the President has now taken this commendable step, I think it is the better part of wisdom to refrain from an extreme use of the constitutional power of the purse which the McGovern-Hatfield amendment proposes. I am, therefore, unable to vote for it at this time.

I make this statement today because I may not be able to be here when the vote on the amendment is cast, what with the uncertainity of the time of the vote and the pressures of a political campaign in my State.

I would like to read certain excerpts from a speech I made in the Senate on May 1, 1970, the day following the invasion of Cambodia. They are as follows:

Inevitably this action will constitute an extension of the U.S. commitment to include the entire area of Cambodia and the support of the government recently established there.

Thus, in some respects the decision to extend military aid to Cambodia may be more revealing as to the purpose of the entire action than is the decision to commit combat troops in the restricted sanctuary areas.

Each action up the escalation ladder has in turn been used as a basis for a deeper and deeper commitment. In this way we found ourselves little by little ensnared in a quagmire from which we have been unable to extricate ourselves, and into which we now plunge more deeply.

If we pursue the course upon which we have apparently embarked, Premier Lon Nol will be a second millstone around our neck. Perhaps not as heavy as President Thieu—God forbid—but equally difficult to dislodge.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The ACTING PRESIDENT pro tempore. Under the previous order, the Chair lays before the Senate the unfinished business, which the clerk will state.

The legislative clerk read as follows:

H.R. 17123, to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. MANSFIELD. Mr. President, with the permission of the distinguished Senator from Missisippi (Mr. STENNIS), and the distinguished Senator from Oregon (Mr. HATFIELD), I should like to suggest a brief quorum call with the time to be taken equally out of both sides.

The ACTING PRESIDENT pro tempore. Under the previous order, the pending business is limited to 6 hours on the amendment of the Senator from Oregon (Mr. HATFIELD). Without objection, a quorum will be called and the time will be equally divided between both sides. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PASTORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. PASTORE. May I have 2 minutes?

Mr. HATFIELD. I am happy to yield 2 minutes to the Senator from Rhode Island.

PERSONAL STATEMENT

Mr. PASTORE. Mr. President, I am very happy that the Chairman of the Select Committee on Standards and Conduct is in the Chamber.

A story appeared under the UPI this morning in a Providence newspaper, including the name of PASTORE as one of the men who has a leased car. This is a deliberate lie, let alone an inaccuracy.

This UPI story not only appears in the Providence Journal but it will be received by every radio and television station in my State of Rhode Island.

My name has never been connected with this. I have never, in all my life, leased an automobile and I never intend to lease an automobile.

Every automobile I have, I have bought with my own money and I have bought it in the State of Rhode Island.

It strikes me that the press should inquire before it prints stories of this kind. I do not know where they got it. I do not know whether they got it from the Ethics Committee, or where they ever got it. But I want not only a retraction, I also want an apology from anyone responsible for that story. I hope that they will give me the decency to print every word I have said here today.

Mr. STENNIS. Mr. President, if the Senator will yield. I can very promptly reply. I have not heard the name of the Senator from Rhode Island mentioned in all of this inquiry in any of our meetings, by any staff member, as being in any way connected with anything concerning the leases, much less having one of his own.

I cannot understand why his name ever got tied to this.

Mr. PASTORE. My name was mentioned in the story today. It strikes me that someone should have picked up a telephone and asked PASTORE if it was true.

Mr. STENNIS. I will cooperate fully with the Senator insofar as I can in finding out about this matter. But, certainly, the Senator's name has never been before our committee. I have never heard it mentioned by anyone in connection with this entire matter.

Mr. PASTORE. My hope is that the UPI will have the decency not only to retract the story but also to give me an apology and to print every word I have said here today.

Mr. STENNIS. I am in total sympathy with the Senator.

Mr. PASTORE. Anyone who touches upon my integrity has to answer.

Mr. STENNIS. Mr. President, I ask unanimous consent that the time consumed by the Senator from Rhode Island not be charged to either side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STENNIS. The Senator from Rhode Island certainly had a right to speak on this subject.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the Hatfield-Goldwater amendment (S. 844). Who yields time?

Mr. HATFIELD. Mr. President I yield myself 15 minutes.

The ACTING PRESIDENT pro tempore. The Senator from Oregon is recognized for 15 minutes.

Mr. HATFIELD. Mr. President, last week the distinguished Senator from Missouri raised some questions regarding the implementation of the recommendations of the President's Commission on an All-Volunteer Armed Force which at the time I said deserved thorough answers.

I should like at this time to speak to those points which were raised because they incorporate most of the objections concerning an all volunteer military. It seems to me that the best way to launch our debate today would be for me to directly meet the questions raised by those who do not support the proposition incorporated in the amendment.

The first question is one which has been raised by other Senators, the Senator from Colorado (Mr. ALLOTT) and the Senator from Massachusetts (Mr. KENNEDY), concerning the maximum budgetary cost of the amendment for fiscal 1971. It would be about $2.4 billion in the cost factor, which is oftentimes raised as to what will it cost to implement an all-volunteer military.

I should like to preface my statistical data with a common observation which has been made frequently, and which bears reiteration, that the voluntary military will not cost 1 penny more than what we are paying now in one way or another; simply that we will send to the general taxpayer the cost of national defense.

Those who raise these questions about increased cost should bear in mind that they are being met today; but as to who is meeting the additional cost, I would say that it is being thrust upon the shoulders of our fighting men. That statement is made on the basis of comparable pay between civilian and military personnel. Therefore, it is accurate to say that a volunteer military will not cost any more money but, instead of requiring the serviceman to subsidize his service, because of lack of comparable pay, we tend to be misled into believing that, somehow, this is not a cost factor that is usually computed.

Milton Freedman is one of the distinguished economists of our day. He is from the University of Chicago, and has advised candidates for President as well as Presidents. He is a man who has given great care and thought to computing this kind of cost comparison, generally speaking. He has stated that the cost factors, whether direct or hidden, must be considered in the overalll cost of national defense.

When we look at the budgetary aspect of cost, as we must do here in Congress, there is no question that there will be some transition and some budgetary changes.

But let me point out again that there is a cost factor which is oftentimes neglected, so far as consideration of comparative costs are concerned, and that is the cost we now pay or that we are charged with due to inefficiency.

We are subsidizing an inefficient system. Whatever our philosophy about the draft versus a voluntary military may be, let us face the fact that a draft system is more costly because of the high rate of turnover.

One cannot run any kind of an organization, least of all the military organization, with 93 percent to 95 percent turnover. That is what we have today among the draftees. When we have that kind of turnover, we are paying out an awful lot of the taxpayers' money for training purposes. About the time the recruit or draftee is proficient enough to respond to his various assignments in an efficient way, he is gone. He is through with the service and someone else has come in to start the training program all over again.

So we are paying a great sum of money today for a highly inefficient and uneconomic system, whereas in a voluntary system where we would have a group of people who are not coerced into service but are motivated to do service for the military requirements of their country, we have first of all the motivation factor. This would certainly be far more efficient than the coercive system we now have.

These are intangibles. We cannot put a dollar sign on them. In the case of the draft, it is costing today approximately $4 billion to the American taxpayer. Putting it in another way, we are paying today for a conscription system something that is higher than we would estimate, passed on the Gates Commission report, that an all-volunteer system would cost—$3.2 billion.

The specific pay increases within the amendment would provide for $2.68 billion. This is about a 50-percent increase among the enlisted personnel, for the first term enlistees. It would be in itself, I think, money well invested because we would have higher accountability for the kind of service for those motivated to volunteer.

With regard to a proficiency pay increase, we feel there must be greater stimulus for those within the service to increase their proficiency and advance up the ladder of achievement.

We would provide proficiency pay of $210 million and a Reserve pay increase of $150 million. Any system of volunteerism must be accompanied by a strong Reserve program. We believe very definitely that a Reserve program does need beefing up as far as those presently committed and involved and those who might be attracted to the Reserve program. Special situations certainly will involve high professional skills as the medical corps. We have included $120 million for that in the recruiting program.

We must assume that any new system must be properly funded to get the results anticipated. We indicate an $80 million support figure for the purpose of improving recruiting and also for ROTC increase and other miscellaneous expenses.

When we compute the Federal income tax and the net budgetary increase,

the net budgetary increase for fiscal year 1970 drops down to about $2.7 billion.

It must be pointed out that the basic pay increase represents the cost that the enlistees are now paying. I want to make it clear that this is a cost which the taxpayer should be paying.

We must also recognize that the amendment would redistribute the cost of the service the military man is rendering his country from his shoulders to those of the general taxpayer. Furthermore, if this amendment is passed and salaries and other incentives increased, an all-volunteer military will result with net savings of over $1 billion within 3 years.

We do not only suggest here or state here that the voluntary system will be balanced out by the cost of the draft system we now have in effect, but within 3 years it will cost less than the conscription system we now have.

Those savings will come about through a reduced number of personnel, equipment, and facilities required for training purposes because of the high rate of turnover we now have among draftees.

It will also prove more economical through a better system of handling machinery, instruments, weaponry, and all other such material, and this was borne out earlier by the Cordiner report issued under President Eisenhower.

Let me say that not only would this balance out in the overall cost budget figure this year, but that within a period of 3 years it would save at least $1 billion of the taxpayers' money.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. HATFIELD. I yield myself an additional 10 minutes.

The ACTING PRESIDENT pro tempore. The Senator from Oregon is recognized for an additional 10 minutes.

Mr. HATFIELD. Mr. President, we not only consider here the cost factor within the present year, but we must look ahead and see what the savings would prove to be under an all-volunteer system.

The second question raised by the Senator from Missouri was: "Would a Volunteer Army increase the already substantial power and influence of the military on American life?"

This question has been raised many times in the past.

I think the most important and quickest way to refute this concern, or at least to alleviate this concern, in the minds of many anxious and dedicated people is to state that we have over 170 years of American history to prove that we were able to establish an all-volunteer Army without the threat of military coup d'etats or whatever course might be taken by the military to affect the American life.

We have to realize that the real influence of the military on American life would be asserted by civilian personnel. The President of the United States is the Commander in Chief. He is a civilian. The head of the Navy, Army, and Air Force are civilians and no admiral or no general, no matter how many stars he might have on his collar, would have authority over civilians.

There is concern today about the influence of the military on our economy. But that is another subject. By and large we are talking about enlisted personnel when talking about the draft system.

The Senator from Missouri next raised the question of what effect would a precipitous institution of an all-volunteer armed forces have on our involvement in Southeast Asia.

In the amendment we have as cosponsors those who are proponents and those who are opponents of our present involvement in Southeast Asia. We have many supporters of an all-volunteer system, including those who represent the military system itself.

I do not think from the political point of view or from the policy point of view that there would be any impact whatever.

The creation of an all-volunteer armed force as envisioned in this amendment would not be precipitous, nor would it affect our Vietnam policy.

All this amendment does is to raise the pay, particularly in the lower enlisted ranks, making the pay comparable to civilian pay.

I do not know what kind of impact that could have upon the policy of the military in Southeast Asia.

This pay increase would result in an increase in volunteer enlistments, reducing the draft calls to zero well before June 30, 1971—the expiration of the Selective Service Act. Consequently, the Selective Service Act will not have to be extended next year.

I would like to repeat that this amendment does not obligate Congress to vote on the draft next year. It merely provides pay and incentive increases to military men and provides for a smoother transition into a volunteer system if the 92d Congress decides not to extend the Selective Service Act next year.

I would like to have the attention of the chairman of the Committee on Armed Services at this point. I want to make amply clear that this amendment does not commit this Congress to an action on the selective service extension issue, which will take place by June 30, 1971. This does not repeal the Selective Service Act, and it has no effect on what the 92d Congress would do, except to provide the 92d Congress with the data and information necessary to prove the validity of the position of those of us who contend for an all-volunteer service.

I want to make clear that this does not commit Congress on the question of selective service extension.

Mr. STENNIS. Mr. President, will the Senator yield briefly at that point?

Mr. HATFIELD. I am happy to yield.

Mr. STENNIS. With great deference to the Senator, to me it looks as if that is an argument that is true, but as a practical matter, if we should adopt this amendment now and it becomes law, as certain as night follows day that would preclude, as a practical matter, the extension of the Selective Service Act beyond June 30, 1971. We would just meet ourselves coming back, in a head-on collision.

I thank the Senator for yielding.

Mr. HATFIELD. Mr. President, if the Senator will yield briefly for a response, I wish to say that I appreciate the concern the Senator has expressed in maintaining adequate personnel in meeting all of our requirements. The Senator certainly gave outstanding leadership in providing us with weapons systems and personnel to man them for our national defense.

But I would like to ask the Senator if he would not agree that the provisions of this amendment, which would merely increase the pay level, hopefully in the eyes of the sponsors of the amendment, would be sufficient incentive to create the volunteers who would sign up to serve in the military; but the amendment does not commit this Congress to action on the Selective Service System.

Mr. STENNIS. Under our system, that is correct as an abstract proposition or theoretical proposition; but I am talking about the practicalities of the matter. I think we would have jumped the gun and anticipated the question of continued selective service, and have formed a new policy.

Frankly, with all deference, I think it would bring about such chaos, confusion, and utter lack of workability so quickly that we would have to reenact the Selective Service Act as an emergency measure of some kind. But I think this closes the door on selective service renewal next year.

I think there would be a deterioration of the Army rapidly if we stopped using selective service. I think if this were agreed to and the Selective Service Act remained in effect until June 30, 1971, we would have a very violent reaction from the men being drafted and their parents. That is the practical effect. I will speak more on that later, but I believe that is the way it would work.

Mr. HATFIELD. Does the Senator agree to the concept of a voluntary system at some appropriate time? Is the question one of timing, or is the Senator basically opposed to the concept of an all-volunteer system?

Mr. STENNIS. I have said many times I am open to full conviction; fully open to full conviction; and I look forward to the concept becoming practical some time. I think it may take several years. I cannot think of it being tried while we still have a shooting war going on. I will give my detailed reasons for my position.

Mr. HATFIELD. I thank the Senator for his direct responses to my comments and questions.

Mr. President, the point I wish to make is that this amendment does not obligate the Senate to an action on the question of selective service, but rather it does provide, hopefully, for the kind of incentives which would make it possible for the administration to carry out its stated purpose of trying to reduce the draft cost to zero by June 30, 1971.

I submit if the Senate does not take action at this time to provide additional incentives it would become increasingly difficult for the administration to accomplish this particular purpose.

Mr. President, the fourth point made by the Senator from Missouri was the suggestion that a more thorough examination of alternatives to an all-volunteer armed force should be made.

There are four alternatives to a totally volunteer system.

First, we could have no conscripts and no volunteers; we would have no military.

Second, we could have universal military training. The first problem encountered by such a system would be economic. It would give the military more men than could be productively employed. If we assume the present eligibility standards, more than 2 million noncareer persons would be serving in the Armed Forces at any one time. Mr. President, 2.2 million men turn 19 years of age each year and only 8 percent of them are presently being drafted. Not only would universal military training be prohibitively expensive, but also it would contravene our long history of individual liberty, be socially dysfunctional and highly unjust.

The third alternative to an all-volunteer armed force is a mixed force of conscripts and volunteers, the system we have today. In terms of economics, we know that we are losing over $4 billion annually because of conscription. In terms of equity it is internally inconsistent applying different standards to young men in the draft pool. In terms of justice it forces some men to serve and not others.

The fourth alternative to voluntarism is universal national service. This system would entail the employment of 8 million individuals, 4 million if women are excluded, if 2 years of service were assumed. Assuming a conservative annual cost of between $4,000 and $5,000 for each participant, compulsory national service would have an annual budgetary cost of between $16 and $40 billion.

Excluding the abolition of the Armed Forces, which I do not believe that any Senator is proposing, all of the alternatives to an all-volunteer armed force violate the primary value of our society, individual freedom. They all would cost this country dearly not only in terms of money, but in terms of social costs, particularly among our youth. They vary from one another only in degree and are diametrically opposed to the values which have made this country strong.

The fifth and last point raised by the distinguished Senator from Missouri (Mr. EAGLETON) was the question of practicality: "What," as the Senator stated, "is really gained?"

An all-volunteer military as envisioned by the cosponsors of this amendment would have several advantages over any other method of manpower procurement.

First-term enlistee pay would be comparable to what they would be earning in civilian life.

Our country would be saving money within 3 years—savings of at least $5 billion annually.

Our Armed Forces would be more efficient, and in time of crisis the Reserves would be better prepared to supply any immediate or sudden manpower; and continued registration would insure the implementation of a draft if conscription were deemed to be necessary to meet a national emergency.

To reinstitute the draft, however, would need the joint resolution of the House and Senate, which would put the constitutional responsibility of manpower procurement for our military where it rightfully belongs. The President would no longer have unlimited manpower resources immediately at his command so that Congress would have to share the responsibility of committing large numbers of troops to any war, declared or undeclared.

Besides returning to an equitable basis of pay for military personnel, increasing the efficiency of our military organization, restoring to Congress its proper role in making war, and saving our country billions of dollars, the establishment of an all-volunteer military would abolish a major source of alientation and polarization within our society—the draft.

Mr. President, how much time do I have left?

The ACTING PRESIDENT pro tempore. The Senator has 1 more minute of his allotted time.

Mr. HATFIELD. I have some detailed pay tables here at my desk. We, in the amendment, did not try to spell out all of the details in this type of proposal because we felt there should be a degree of flexibility. We set only guidelines in the amendment, leaving to the military branches the responsibility of spelling out the actual details of pay. If information is desired on the details, we have details that we will be happy to make available to our colleagues.

Mr. GOLDWATER. Mr. President, will the Senator yield me 20 minutes?

Mr. HATFIELD. I yield 20 minutes to the distinguished Senator from Arizona, and the major cosponsor of our amendment.

ENDING THE DRAFT

Mr. GOLDWATER. Mr. President, conservatives have long been outspoken about their opposition to forced military service. In 1940, the late Senator Robert A. Taft declared in this Chamber that:

> The draft is far more typical of totalitarian nations than of democratic nations. The theory behind it leads directly to totalitarianism. It is absolutely opposed to the principles of individual liberty which have always been considered a part of American democracy. . . . The principle of a compulsory draft is basically wrong.

In April of 1964, the basic spirit of these words was restated by the well-known pundit of conservatism, Mr. William F. Buckley. As he expressed it:

> The not so very long-term objective should be to eliminate the draft in favor of a professional army of volunteers, who would greatly increase the efficiency of the armed services and relieve the civil population of an experience, which, insofar as it is unrelated to true necessity, is debasing, and an unnecessary—and therefore inexcusable—encroachment on individual freedom.

The Republic platform for 1964 echoed this belief by pledging to replace the draft "as soon as possible by a voluntary system, offering real career incentives." I might say I am proud to have had a hand in drafting this position.

Now, in 1970, we hear new declarations along the same line. One of the most convincing and profound statements that I have seen in the long time that I have advocated this goal, was made just 4 months ago. I would ask Senators to listen and judge this for themselves. How could our position possibly be set forth with more meaning than in the following words?

This is quoting now:

> The preservation of a free society depends upon the willingness of its beneficiaries to bear the burden of its defense—and the willingness of government to guarantee the freedom of the individual.
>
> With an end to the draft, we will demonstrate to the world the responsiveness of republican government—and our continuing commitment to the maximum freedom for the individual, enshrined in our earliest traditions and founding documents. By upholding the cause of freedom without conscription we will have demonstrated in one more area the superiority of a society based upon belief in the dignity of man over a society based on the supremacy of the State.

These are not the words of BARRY GOLDWATER, although I endorse them 100 percent. They convey the deepest reason for conservative support of the voluntary military concept—human freedom. The freedom of each citizen to live his own life. And to do this as he may choose, free of dictate by the central Government.

No; these were not the comments of myself or of any other Member of this Chamber. They are the avowed principles of the President of the United States. President Nixon himself uttered these strong sentiments in the message which he sent to Congress on April 23 of this year, in response to the findings made by the Gates Commission.

So, if anyone claims the President does not support the voluntary military approach, he has not heard that comment of the President. What more eloquent words could be chosen to express his conviction?

But, this is not all. The President had more to say on the subject of the Commission's unanimous conclusion that an all-volunteer force is desirable. Speaking right to this point, President Nixon said:

> We all know the unfairness of the present system, no matter how just we try to make it.
>
> After careful consideration of the factors involved, I support the basic conclusion of the Commission. I agree that we should move now toward ending the draft.

Now, is what the President said. Not next year. Now.

Well, that is exactly what we are about. We are seeking to lay the foundation upon which the voluntary system can be erected. Many people seem to be under the false premise that our amendment would wipe out the draft, here and now. They wonder how our needs in Vietnam can be met. And they ask what will happen in case of a national emergency.

Well, right off, I want to make it clear that our amendment does not abolish the draft. What it seeks to do is to implement the steps that the Gates report said should be taken so that the country could have a fair test of whether or not the voluntary system will work.

The draft will continue under our amendment just the same as it does under existing law. The Selective Service Act now provides that the draft will ex-

pire on June 30 of 1971 and our proposal will not change that in any respect.

We can cross that bridge when we come to it. Rather, what we are undertaking to do now is to put into effect the indispensable steps that the Gates report—and commonsense—tell us are needed in order that military service might be made attractive enough to be put back on an all-volunteer status.

The true story about the voluntary military amendment is that it will significantly improve the conditions of military service. It will provide immediately upon its enactment for a 50-percent increase in the value of basic pay for first-term enlistees and 28 percent for first-term officers. The increase for those in second term runs to about 9 percent.

In addition, it will provide that the Secretary of Defense shall put into effect, as soon as possible, several other features which will make military life more rewarding. For example, proficiency pay should be accelerated for high quality personnel. Military men should acquire vested rights to retirement benefits after 5 years of service. And the Government should provide a better survivor annuity program for military retirees.

Mr. President, these changes are needed whether or not we move to an all-volunteer army. The hidden tax which is imposed on Americans who are valiantly serving their country should be removed even if we do not end the draft. The idea of regarding military personnel as some kind of feudal slaves who can be expected to labor at half of what the civilian market will pay is unworthy of a modern, civilized nation.

That is why, to my mind, the pay increases and other benefits provided by the amendment are the guts of our whole proposal. These steps are crying out to be done, from a sense of equity alone, so that military service can be transformed into a rewarding and important profession.

In essence, this is what we will be really voting on. We will be deciding whether or not we will give all military personnel, both conscripts and enlistees, officers and career members, equitable and proper service conditions. We will be announcing to several millions of active duty forces, and Reserve forces, and retired servicemen, whether or not all the rhetoric about moral support and backing for our Armed Forces is to go the way of the scrap heap when it comes time for action, instead of lipservice. What we who are sponsoring this amendment are urging is that the promises we have heard about removing the inequities of military life and about moving toward the goal of ending forced conscription shall not be forgotten and kicked aside the way the military retirees recomputation plan has been.

Mr. President, there comes a time for action; a time when words will no longer suffice. Well, I believe the time is at hand for the volunteer military proposal. Why not give it a chance? Why not announce it to be our goal that we shall return to the voluntary system which has worked so well in our Nation throughout the greater part of our history? Why not put into effect the improvements that we recommend and see whether or not this will attract an adequate number of volunteers so that the involuntary draft can be put to an end?

Mr. President, I would like to repeat that our plan does not abolish the draft at this time. Rather it is our belief that the institution of the pay and benefit increases that we have suggested will cause conditions to improve sufficiently so the draft can be allowed to expire next year. But we all realize that we must wait until then before we can decide that question.

Another point that I wish to emphasize about our amendment is that it does provide for a standby draft that can be used in time of emergency. Consequently, if the draft does end next year, as it will unless we decide to renew it, the registration of all young men will continue. Thus, there will be a ready pool of young men who could be conscripted if the draft should ever have to be reinstated.

Of course, in the event of a national emergency, the National Guard and Ready Reserves should provide forces on the spot. These men are trained and should be ready to go. And, similar to what it does in the case of the Regular forces, our amendment will increase the pay and benefits for Reserve service. The Gates report makes the firm conclusion that the Reserves, too, can be maintained on an all-volunteer basis. The pay recommendations of the Gates Commission will increase the hourly rates of drill pay in the first year of service by an average of 90 percent. Even at 4 years of service, the report calls for a 20 percent boost in drill pay. Our amendment would implement these recommendations. With these increases in effect, I am confident that Reserve enlistments will be large enough to maintain an all-volunteer Reserve force at any level of strength needed to meet our national security.

Also, I might mention that the money for these increases has been included in the overall estimate arrived at by the Gates Commission as to how much it will cost to maintain a completely voluntary military. I might mention that if there is any area of disagreement which I have with the Gates report, it is that the budget figures are too high. I think that the Gates Commission came up with an extremely conservative estimate when it found that this plan would cost $3.2 billion in the transition years and $2.1 billion after the voluntary force is fully operational.

Now, to my mind, this estimate is far too high. In fact, I might say, Mr. President, that what really got me interested in a voluntary force, outside of the rights that are involved, was serving during periods of active duty with the Air Force, both in the Pentagon and out in the field, and realizing the tremendous waste that the Air Force alone went through each year as we would watch first-term enlistees or draftees drop out to go home, after having had spent on their education in electronics, engineering, hydraulics, engine care, and so forth, from $85,000 up to $250,000 in training. If these men drop out, somebody has to fill that slot, and the estimate I developed was that it would save the Air Force alone about $1 billion a year if we could have men that we could keep in these positions.

But let us assume that the Gates report is correct. Let us take the figure of $3.2 billion, which will be spread over the 1971 fiscal year, and ask where it will come from. I can tell you where it is coming from right now. It is being taken out of the hide of each man and woman serving in the Armed Forces—that is who is paying it. It is a tax in kind; a tax which is not evenly distributed over the country at large. It is laid right on the backs of the millions of individuals who are valiantly serving their Nation in our military forces.

These Americans are shouldering the burden for all of us and they are getting paid about half of what their civilian counterparts are receiving. Most of these persons are volunteers to begin with. In fact, over 2 million men and women who are presently serving in the Armed Forces are true volunteers. They have either reenlisted after their first term was up or they enlisted in spite of, not because of, the draft and inequitable conditions of service.

Are we to slap the whole burden of taxation on those patriotic citizens who are serving in the military? Are we to demand that they pick up the tab for the $3.2 billion that it would take, at the most, to put the military on a fully volunteer status?

To get an understanding of the sacrifices the Government is asking of our servicemen, let me quote from the April statement of President Nixon. The President said:

> The starting pay of an enlisted man in our Armed Forces is—taking the latest raise into account—less than $1,500 a year. This is less that half of the minimum wage in the private sector.

The President went on to say:

> Even with special allowances, some married enlisted men have been forced to go on welfare to support their families.

The President is correct. As I recall, the Associated Press released a study last fall which charged that several thousands of servicemen have been forced to put their families on welfare because their military salaries and allowances cannot keep up with rising living costs. In fact, there may be as many as 1 million servicemen who currently receive less than the poverty level indicated for a family of four under the administration's family assistance plan which is now pending in the Senate Committee on Finance.

Mr. President, how long will we allow these conditions to exist? How long will it be before this country demonstrates by action, instead of words, that it recognizes that military service is an honorable and important profession for which a person should be paid a proper salary?

How much longer will it take for us to see that right now the predominant number of men and women who are serving in the military have freely volunteered for duty out of a devotion to their coun-

try and a desire to contribute to the well-being and protection of their nation?

Mr. President, right now in Vietnam draftees constitute only 12 percent of our total strength. Even in the case of the Army, draftees represent less than 40 percent out of a total of 290,000 men. By May of next year, when President Nixon has announced that all ground combat missions will be turned over to the South Vietnamese, the number of American combat-skilled soldiers who are needed in Vietnam will fall significantly.

As a result I am willing to predict that the Army will not have to rely upon draftees to fill its needs after June of 1971. I would remind Senators that draftees will continue to enter the ranks of our Armed Forces up to July of next year. Some of those men will be assigned to Vietnam. Other men will remain in Vietnam because they are continuing to serve out their term of duty there. In addition, there will unquestionably be a boost in enlistments because of the pay and benefit reforms that our amendment would generate.

In other words, I believe it is realistic to say that if the volunteer military amendment is approved, there will be no need to extend the draft in 1971.

In closing, Mr. President, I would remind Senators that we are speaking today not only of the human right which is involved. We are also talking about providing the needed salary increases and benefits improvements that will demonstrate our support for the dedicated Americans who are serving their nation in our military forces. In doing this we will be setting the stage for a test of whether or not the draft can be allowed to expire next year. Thereby, we can provide comparability to our servicemen, and at the same time restore America to the best traditions of its own history and of a free society.

Mr. President, that concludes my early remarks on this important day. However, I have been reading in this week's issue of Newsweek a most interesting column written by a man whom I consider to be more than just expert in this military field, Mr. Stewart Alsop. He points out some interesting information. I do not intend to read the entire article, though I shall ask unanimous consent to have it printed in the RECORD at the end of my remarks.

But he says, for example, to back up what I have been feeling all along:

> By next May, there will be only about 220,000 Army men left in Vietnam, and of these only about 30,000 will be in the maneuver battalions which supply the guts of the Army's combat power. To sustain these ground-combat troops will require replacements on the order of only 1,800 to 2,200 a month.

I agree almost completely with Mr. Alsop's figures.

However, I feel that the number of replacements that will be needed by that time can be made by volunteers who will be induced to stay in the service because of the pay and benefits improvements that the Hatfield-Goldwater and other amendments provide.

But there is a disturbing statement in this column that I call to the attention of Senators. I have not heard it discussed yet. I know it is not exactly proper to discuss what the Court might do. But Alsop points out:

> Soon, probably before Christmas, the Supreme Court is to rule on the question: should a man be granted conscientious objector status if he can prove that he objects not to war in general but to this particular war?

I think all of us have forgotten that the Court does have such a case coming up before it. If this happens, whether we still have the draft or not, the Director of Selective Service, Mr. Tarr, sees the immediate collapse of the Selective Service System.

I can certainly sympathize with and understand the concern of the distinguished chairman, the Senator from Mississippi (Mr. STENNIS); and I, too, would have liked to have held long, intensive hearings on this subject; but we have had proposed legislation before this body for 2 years, and there has not been a hearing on it.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. GOLDWATER. Will the Senator yield me an additional 5 minutes?

Mr. HATFIELD. I yield 5 additional minutes to the Senator.

Mr. GOLDWATER. I think the Defense Department has been very derelict in not sending over specific suggestions in this whole field. I know they are working on it. But the draft right now is in terrible shape. If the Court says that a man can be let off his duty because he objects to this particular war, not war in general, as he has to today, I can see the two biggest States, New York and California, completely failing in their draft calls; and this, in effect, would put an end to the draft, whether it is July 1 of next year or December 31 of this year.

Mr. HATFIELD. Mr. President, will the Senator yield at this point for a question?

Mr. GOLDWATER. I yield.

Mr. HATFIELD. The Senator has brought up a very vital point which seems to be bothering a number of our colleagues, and that is the question as to whether or not enactment of this amendment at this time would preclude or shut off the possibility of holding hearings on the question of selective service versus voluntary service. Would not the Senator agree that this has nothing to do with the possibility of the Armed Services Committee going ahead and holding hearings on this very important subject, which ultimately must be held before we can take action June 30, 1971?

Mr. GOLDWATER. I agree completely with the Senator from Oregon. In fact, the distinguished Senator from Mississippi has stated at least three times that the hearings will be held. Knowing him as I do, I know that when he says something, it gets done. The hearings might even be held later this fall, if we can get through with this bill.

Mr. HATFIELD. The amendment would not stop any such program.

Mr. GOLDWATER. This amendment would not stop hearings. This amendment has no bearing on the draft. Both of us agree that this is good merchandising. If we are going to try to keep in the armed services people whose time is coming up next spring, we had better tell them now, "This is what we are going to offer you young people. If you will stay in, we will make it this much more interesting for you. We will make your life a better one in the services." But if we wait until next July 1, no matter what we do, if we vote the draft up or down, there will be no more reason for a man to stay in the services than there is today.

It is true that by that time we would expect to have had full hearings, and possibly, if this amendment is not agreed to, to have proposed legislation before this body. I think it is more advantageous to have it now, so that the people in the military can be making up their minds as to whether or not they will stay in.

The draft today is so bad and the situation involved in the draft system is so bad that I will not be surprised if by the first of the year we will have to have emergency legislation either to do something such as we are suggesting or something else to replace the present draft system. It is not functioning.

We find that Joe Namath can get out of serving because he has a trick knee. I am not finding fault with Mr. Namath. He does have bad knees. But many other people have bad knees and other things wrong with them. It is not difficult today to duck the draft. In fact, the Director of Selective Service, Mr. Tarr, says that 70 percent of those called beat the draft on physical, mental, or other grounds, while in rural areas the rate is less than 30 percent.

So the draft has not been fair; it is not fair today. If we had no other argument—if we forgot the argument on the rights of the individual, on the freedom of the individual, on the benefits to the individual—the very fact that we find it possible to get around the draft, where it is unfair to young men whose fathers do not have positions that enable them to exert influence upon draft boards, I think it is very unfair.

So I hope that this amendment is agreed to in the Senate and in the other body and becomes law, so that by late spring we will know whether we have to continue with the draft or will be able to recall it.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. HATFIELD. On the point of unfairness of the present draft system, which the Senator appropriately emphasizes this morning, how would the Senator from Arizona respond to the argument that the all-volunteer service would end up being a poor man's Army or a black man's Army, fighting for the rich people of the country or for those who are not in the military?

Mr. GOLDWATER. I imagine that argument has been used clear back to the days of Genghis Khan. The truth of the matter is that this has never been borne out. In looking at the historic armies of the world, we find that being a soldier was a gentleman's game. The common man could not be a soldier. He could get

in to shine the armor, sharpen the spears and swords, and so forth. But our armies, before they were conscripted armies, were always staffed by people, I would say, of above the average level.

I have heard the argument used that we would wind up with nothing but poor children and nothing but blacks. I do not buy this at all. The first service I had was with a black regiment, and I am very proud of that fact. They were all volunteers, and of the very highest type. Out of the group I served with came the first Negro general, and his son became the highest ranking Negro general in the services. They were very high type people.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. I yield 2 more minutes.

Would not the Senator agree that the Nation as a whole has a commitment to all our citizens to provide equality of education and job opportunity; that there need not be the feeling that only the military can give a poor man or a black man a chance to get ahead; that if he feels that that is the only place he has now to get ahead, let us give praise to the military program rather than criticism, and point the criticism for that situation, if it exists in that young person's life, to the economic and political institutions of this country which have denied him those opportunities, rather than to blame the military upon providing him with the same opportunity?

Mr. GOLDWATER. I could not agree more with the Senator.

We hear a great deal of debate in this Chamber about taking care of the underprivileged. I am not opposed to that. But in our amendment we are talking about people who are more underprivileged than the underprivileged, who make half of what we say the poverty level is for a family of four. We find an unknown number—perhaps a million or more—on relief, because the enlisted man and the young officer just cannot hack it on the present pay levels or the present level of benefits.

So I would like some of my colleagues who bleed so copiously for the underprivileged to participate in or listen to this debate so that they might say, "We want to take care of the man who is taking care of us."

Mr. HATFIELD. I would add to the Senator's accurate statements that we have today over 20,000 military personnel on welfare.

Mr. GOLDWATER. That is correct.

Mr. HATFIELD. In uniform they receive the miserly pay that the military now provides, and because of that they are now receiving welfare.

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the RECORD the article entitled "The Dreadful System," written by Stewart Alsop.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DREADFUL SYSTEM

(By Stewart Alsop)

WASHINGTON.—This country's whole system of military recruitment—not just the draft, but the whole system—is in a dreadful mess. The mess is so dreadful that the system could simply collapse within the fairly near future.

One symptom of the mess is the dashing of one of President Nixon's fondest hopes—to announce, preferably before November, that no more draftees will be sent to fight in Vietnam after the present phase of Vietnamization is completed next spring.

This has seemed a very reasonable hope. By next May, there will be only about 220,000 Army men left in Vietnam, and of these only about 30,000 will be in the maneuver battalions which supply the guts of the Army's combat power. To sustain these ground-combat troops will require replacements on the order of only 1,800 to 2,200 a month.

The Army can fill the noncombat jobs in Vietnam with non-draftees. But the Pentagon's defense experts have concluded that there is simply no way to get the necessary fighting men without the draft, since only about 800 men a month volunteer for what the Army calls "combat skills." So the other 1,000-plus infantry replacements will have to be conscripts.

The situation recalls Ben Franklin's famous syllogism: "For want of a nail the shoe was lost; for want of a shoe the horse was lost; for want of a horse, the rider was lost." For want of a thousand or so volunteers, in a nation of 200 million-plus, the hated draft must continue, and men must be conscripted and sent to a hated war against their will, at enormous cost in domestic dissension and the alienation of the young. For want of a nail, the rider was lost.

FACTS

Consider what these facts say about the state of the U.S. Army, the state of the draft, and the state of the nation. There has never been an army in history with such a top-heavy proportion of staff, logistics, supply men, and other bureaucrats-in-uniform and so low a proportion of fighting men. Moreover, the fighting men, instead of being right at the top of the pecking order, where they ought to be in any army, are right at the bottom. The "grunts"—the infantrymen who carry the brunt of all fighting—are the armed services' equivalent of George Orwell's proles.

In any other army, great efforts are made to build the self-respect of the combat units—handsome "walking-out" uniforms are provided to bedazzle the ladies, fighting men in elite units are encouraged to consider themselves the best soldiers on earth. The bureaucrats-in-uniform who run the U.S. Army go out of their way to underline the prole-like status of the unfortunate grunts, making life as boring as possible for them, and reducing them to the faceless status of numbers spewed out by an IBM machine.

GRUNTS

In such circumstances, who wants to be a grunt? The answer, of course, is that almost nobody wants to be a grunt. This is not just because being a grunt is dangerous—being a helicopter pilot is the most dangerous job in Vietnam, yet there are more volunteers for helicopter training than there are places to fill. It is because this country's whole dreadful system of military recruitment is carefully designed to ensure that the fighting men—the grunts—remain at the bottom of the pecking order.

The draft is the principal instrument to this end. The Navy and Air Force recruit young men by saying to them, in effect: "Volunteer for us—if you don't, you may end up as a grunt." The Army frantically counters by saying, in effect: "No, no, you don't have to be a grunt—enlist first, and we'll give you a nice, safe job."

It is hard to imagine a more morale-destroying system of recruitment. It largely accounts for the extravagant noncombat-combat ratio in the services, for it puts a premium on finding the maximum number of noncombat jobs for enlistees. Moreover, it ensures that any ground-combat capability is wholly dependent on continuation of the draft—which supplies the grunts—and it thus ensures that the draft must continue.

But will the draft continue? The question is a serious one, which has been seriously asked by Curtis Tarr, the able new director of Selective Service. Soon, probably before Christmas, the Supreme Court is to rule on the question: should a man be granted conscientious-objector status if he can prove that he objects not to war in general but to this particular war? If the Court rules in the affirmative, Tarr says, he does not see how the present draft system can be made to function at all.

Already, it is functioning very badly. The draft-resistance movement is growing, and the rate of illegal induction refusals and simple no-shows is steadily increasing. There are plenty of legal ways to beat the draft, of course. The Supreme Court recently provided a big loophole when it ruled that a man may be excused from service on essentially philosophical grounds. As Tarr points out, a boy may spend his senior year writing a thesis proving his philosophical objections to war, and how is a board of local citizens to dispute him?

There are many other ways for the sophisticated to duck the draft. After all, Joe Namath beat the draft with a trick knee, so why not Junior? In some affluent areas, according to Tarr, 70 per cent of those called beat the draft on physical, mental or other grounds, while in rural areas the rate is less than 30 per cent.

PRESTIGE

Thus has the "democratic" draft system become a deeply corrupting class system. As for the state of the nation, it is only necessary to point out that the prestige of the uniform has never been lower, and that a great many young men will do just about anything to avoid becoming fighting soldiers in the service of their country.

In this situation, it seems certain that our dreadful system of military recruitment will be changed simply because it has to be changed. A race may even develop between the President and Congress to end the draft, whatever the manpower experts say—the President has repeatedly promised to do so, and in Congress a move to let the draft authorization expire next June has the support of such diverse figures as Senators Goldwater and McGovern.

There should be no mistake about what ending the draft will mean. It will mean that the U.S. Army will become, in a time of danger, a mere bureaucratic shell, an almost gruntless army, hardly capable of fighting its way into a nunnery. This is an awful risk, but perhaps the risk ought to be taken, so that the whole dreadful system can be ended, and a fresh start made.

Mr. BYRD of West Virginia. Mr. President, will the Senator from Mississippi yield me 2 minutes?

Mr. STENNIS. I yield 2 minutes to the Senator from West Virginia.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 a.m. tomorrow.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to

authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

UNANIMOUS-CONSENT AGREEMENT

Mr. BYRD of West Virginia. Mr. President, I am about to propound a unanimous consent request which has been discussed with the principles involved.

I ask unanimous consent that amendment No. 784, of the Senator from Wisconsin (Mr. NELSON), be laid before the Senate tonight and made the pending business for tomorrow; that immediately after the disposition of the reading of the Journal on tomorrow, there being no call of the calendar, time on the amendment be limited to 3 hours, to be equally divided between the author of the amendment and the manager of the bill; and that any amendment thereto, if there be any, be limited to 30 minutes, with the time to be equally divided between the author of the amendment and the Senator from Wisconsin (Mr. NELSON), if he is opposed to the amendment; and if he is not so opposed, then the time in opposition to be under the control of the manager of the bill.

Mr. President, I also ask unanimous consent that immediately following the vote on amendment No. 784 of the Senator from Wisconsin (Mr. NELSON), amendment No. 853, of the Senator from Wisconsin (Mr. PROXMIRE), be laid before the Senate and made the pending order of business on tomorrow. An agreement has already been reached with respect to time and the control thereof on the amendment of Senator PROXMIRE, which deals with the C–5A.

Mr. GRIFFIN. Did the Senator say an agreement has been reached, but that no formal agreement has been entered?

Mr. BYRD of West Virginia. Yes; an agreement as to time was reached yesterday, with 3 hours allowed on the amendment, the time to be equally divided, and any amendment thereto would be allotted 30 minutes, with the time to be equally divided.

Mr. GRIFFIN. I thank the Senator from West Virginia.

Mr. BYRD of West Virginia. It now becomes a matter of sandwiching in the amendment.

So, presumably, under this arrangement, Mr. President, amendment No. 853 by the Senator from Wisconsin (Mr. PROXMIRE) dealing with the C–5A would probably be laid before the Senate circa 12:30 p.m. tomorrow.

Mr. President, I also ask unanimous consent that immediately following the vote on amendment No. 853, of the Senator from Wisconsin (Mr. PROXMIRE), amendment No. 609, to be offered by the Senator from South Dakota (Mr. MCGOVERN), the so-called end the war amendment, be then laid before the Senate and made the pending business.

Mr. HATFIELD. Has this matter been discussed with the Senator from South Dakota?

Mr. BYRD of West Virginia. Yes.

Mr. HATFIELD. Is this done with his agreement?

Mr. BYRD of West Virginia. Yes. I have discussed it with him by telephone within the past 15 minutes.

Mr. HATFIELD. That this amendment would be laid before the Senate beginning tomorrow?

Mr. BYRD of West Virginia. Yes; immediately following the vote on Mr. PROXMIRE's amendment, No. 853.

Mr. HATFIELD. Has there been any discussion of a time?

Mr. BYRD of West Virginia. There has been no agreement as to time; only an agreement among the principals—the manager of the bill and the author of the amendment, the Senator from South Dakota—with respect to the sequence in which the various amendments would be laid before the Senate; but no agreement as to time on that particular amendment, No. 609.

Mr. HATFIELD. I thank the Senator from West Virginia.

Mr. BYRD of West Virginia. The Senator from Oregon (Mr. HATFIELD) is the coauthor of the amendment. I state for the record.

Mr. President, has this unanimous-consent request been agreed to?

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. BYRD of West Virginia. I thank the Senator from Mississippi for yielding to me.

The unanimous-consent agreement, subsequently reduced to writing, is as follows:

Ordered, That following the approval of the Journal on Wednesday, August 26, 1970 the time on the Nelson amendment (No. 784) to H.R. 17123, the military procurement authorization act, be limited to 3 hours, to be equally divided and controlled by the sponsor of the amendment and the Senator from Mississippi (Mr. Stennis), and that the time on any amendment thereto be limited to 30 minutes, to be equally divided and controlled by the sponsor and the Senator from Wisconsin (Mr. Nelson).

Provided, That in the event that Senator Nelson is in favor of the amendment the time in opposition is to be controlled by the Majority Leader or his designee.

Provided further, That following the disposition of amendment No. 784, the Senate proceed to consider the Proxmire C–5A amendment (No. 853) with the time to be limited to 3 hours, to be equally divided and controlled by the sponsor and the Senator from Mississippi (Mr. Stennis) and that the time on any amendment thereto be limited to 30 minutes, to be equally divided and controlled by the sponsor and the Senator from Wisconsin (Mr. Proxmire).

Provided, That in the event that Senator Proxmire is in favor of the amendment, the time in opposition is to be controlled by the Majority Leader or his designee.

Provided further, That following the disposition of amendment No. 853, the McGovern-Hatfield amendment to end the war be laid before the Senate and made the pending business.

Mr. STENNIS. Mr. President, what is the pending question now before the Senate?

The ACTING PRESIDENT pro tempore. Amendment No. 844.

Mr. STENNIS. How much time do I have remaining under the time agreement?

The ACTING PRESIDENT pro tempore. 172 minutes.

Mr. STENNIS. I thank the Chair.

Mr. President, I yield myself 20 minutes.

The ACTING PRESIDENT pro tempore. The Senator from Mississippi is recognized for 20 minutes.

Mr. STENNIS. Mr. President, we have an unusual situation in the Senate this morning. I am not trying to assess blame. No one is to blame. We have a situation here where time has been allotted with reference to one of the most far-reaching questions that has or will come before the Senate this year.

Permission has been granted for Senate committees to meet today, of course this takes many Senators to those meetings. They therefore cannot be in the Chamber at the same time. It seems fruitless for those of us most vitally interested, concerned, and active on this question, merely to stand here and talk to ourselves, or to each other, back and forth. A vote will come before the time for the CONGRESSIONAL RECORD to be printed, so that there is no value in speaking matters into the RECORD which will not be read until tomorrow by Senators or their staff members.

So, that is the situation. I say that for no other reason than that Senators who have come to the Chamber to listen to this debate will at least understand why so many chairs are vacant, and that it is not the fault of Senators who cannot be here. They are on duty somewhere else in the Capitol in connection with the business of the Senate.

Mr. President, I do not know yet what amendments, if any, to the amendment will be offered. I would inform the Senate if I knew. Various amendments are being discussed. I have already discussed the main points of the bill rather fully. I think we are just going up the hill and down again, as I say, talking to each other.

Let me review, for the purposes of reiteration, so that perhaps I can refer to it again today for the benefit of other Senators, when they come into the Chamber. It is well known, of course, that we have had a busy year in the Armed Services Committee on the military procurement bill. It has had growing importance and is becoming a kind of hang-on or catch-all bill to have anything related to the military.

We have had a very busy year, and all Members have participated splendidly in our deliberations in the Senate Armed Services Committee. We had long hearings and were 2 or 3 weeks in writing up the bill. No one proposed that the volunteer army be put in the military procurement bill.

The committee is certainly not a fault in not passing on the matter. It was not brought up. No one suggested putting it in the bill or having it as a proposal or part of the hearings. The President of the United States was not asking for it. No one was asking for anything to be done.

There was some talk about a volunteer army. But now we come in with this

far-reaching matter in the Senate and seek to put it on a procurement bill that involves tanks, planes, and guns—a bill that does not deal primarily with personnel at all. We propose to do it without any hearings and without any suggestions and without the position of the President of the United States and without any budget estimate. We propose to do it without anything that is ordinarily considered as a sound foundation for the passage of important legislation.

I have said in a way that this proposal is like a picked chicken in the rain. I can change that now to say that it is like a picked chicken in a hail storm with no place to go. It cannot get any protection from the White House. They are against it. It cannot get any protection from the Pentagon. They are against it. It cannot get any protection from the committee. The subject has never been brought up.

I have some good friends on the floor, and I am inclined to be on their side on almost anything. But in the ordinary terms of legislation, this is an illegitimate child just wandering around the Chamber. No one in the ordinary channels of legislation on this matter is willing to admit the fatherhood, much less the motherhood.

President Nixon gave the idea great respectability by recommending it 2 years ago in keeping with his orderly mind and his response to duty and making recommendations. I am not here this morning particularly to defend the President of the United States. I do not think he needs any defense. However, he ought to be supported by my friends on the minority side. He is the man who recommended the plan at one time. But he never recommended anything like this amendment on this authorization of appropriations bill.

Unmistakably he let his position be known. Even though the matter has respectable sponsors on the Senate floor, it is not wearing the clothes ordinarily approved by the legislative body.

Nevertheless, I have had in mind all the time—and I repeat now—that just as soon as we can see the light of day, I very definitely plan to hold, and we shall hold, hearings in our committee. As a practical matter they will be dual hearings. They will be on the concept of the volunteer Army and also the matter of continuing the Selective Service Act beyond its regular expiration date of June 30, 1971.

We are going to hold hearings where all ideas will have a chance to be heard. I do not promise that all the noisemakers, paraders, and objecters will have a chance to be heard. But everyone from the President of the United States down will have a chance to present his ideas on these two propositions. And from that table we propose to bring to the floor some time as early as we can—this will be in 1971—a sound, firm recommendation representing the majority vote of that committee and with a report thereon giving the reasons, with also minority views if desired, and with authenticated testimony in presentable form to back up the majority and minority. Then, subject to the leadership will, that would come to the floor of the Senate.

In preparation for those things, a great deal of work has already been done.

I wanted to start hearings on the Selective Service proposition this calendar year. However, we had no Director. When we did get a Director, he was an excellent one. But as I related the other day, time was running. We were not able to get to those hearings. In the future I have in mind starting these hearings to which I have been referring sometime in this calendar year if possible so as to get some of the preliminaries behind us.

I believe that it is so important that perhaps it ought to be a full committee hearing. I hope that we will have good attendance. I know that we will if the Senators can work out their time problems.

I do not deserve any credit for wanting those things. This is a vital matter. I have never been carried away with the idea that we had to do something because someone wanted it done or otherwise the goblins or the Communists would get us.

I have not closed my mind to the fact that we are the single most powerful Nation in the entire free world that is capable of coping with some of the problems in the free world. To that extent, I suppose that one could say I am an internationalist. But I am not an all-out internationalist.

I do not claim any credit for it, but I was opposed from the beginning—and said so many times—to putting our military men in South Vietnam.

I was opposed to going in, and I am opposed to being run out now. If that doctrine prevails, we will have to have someone stand up and back our flag.

I think we had better remember now as we approach this thing that this war is not over. We have 406,000 men in South Vietnam or Indochina now. They are American men in American military uniform. That does not sound like the war is over.

I am going to quote figures today to show where the battle losses occur and what percentage of the load the riflemen carry.

As long as this war is going on, I think our honor is at stake. We are not going to get men for $160 a month in extra pay to volunteer to become riflemen and to go into those jungles. I do not think that we will. That is no reflection on anybody.

This is one of the loads of citizenship that we have to carry. It is one of the loads of a free nation in the free world that we have to carry. We have to do this, and I am not in favor of our being chased out or run out.

Those are matters we are going to have to look in the face in these hearings. I know it would be nice to say, "Let us end the draft; let us end the war; let us live in more ideal rosy circumstances." It would be nice if we could say that, but I do not think we can afford to. I think any nation that has tried it in the past has paid for it with the greatest of consequences.

Now, getting down to this proposition here about who is backing this amendment. There is another place that my chicken cannot take refuge. It cannot get any comfort out of the Budget Bureau. The Budget Bureau does not have one single figure to back up this amendment. There is a matter that is small that I shall mention in a moment that goes into the picture of personnel pay. But this amendment is naked as a jaybird, as far as any budget estimate is concerned.

The lowest estimate for this amendment by responsible people that I know of is $4.3 billion. I have a breakdown of that figure. This is the Department of Defense estimate. I have a breakdown I will be glad to show anyone. That is the figure.

Our resourceful friend from Oregon said, "We are going to save money." That is not what the budget planners and the President think when they are trying to plan the 1972 budget. I know they are having an awfully hard time; and they have not found the place to put this $4.3 billion. We have had this bill before us. The committee has reduced it $1.3 billion. I think that was our duty, and I stand behind every dime of it.

We are going to have an amendment tomorrow sometime to reduce it further by billions of dollars, but at least that amendment will be based upon data.

Now, an amendment is offered and it is stated, "Let us put it up to $4.3 billion." That is a 22-percent increase in the bill, and they do not have even one figure from the Bureau of the Budget to back it up, no recommendation, not even an estimate, nothing.

They say, "Put it on anyway. Pay for it out of the deficit." I read where the President is expecting a greater deficit than he thought; so we are to pay for it out of the deficit. We know the trouble about planning the budget is reduced income. Individuals and corporations do not pay taxes on income they do not have. The same is true of wages and salaries that one does not make; taxes are not paid on that. That is another reason. The President said that. He gave that as one of his reasons.

This is no ordinary letter sent in the last few days; and this is not an ordinary statement he made in April of 1970 about this volunteer Army matter; and it is not just chatter that the Secretary of Defense sent over here in his letter about this amendment. I put those documents in the RECORD and we shall return to that.

Except as an ideal and a goal to be thinking about and talking about, and planning for sometime in the future after this shooting stops I see no rhyme or reason to take up this matter now, but we should carry it over for consideration in the orderly way. Just as certain as night follows day, unless some prayed-for-miracle happens to end the war between now and June 30, 1971, we are going to have to renew the Selective Service Act. I believe when the time comes to vote on it almost all Senators would vote to renew it.

Let us not argue that this amendment has nothing to do with the enactment of Selective Service legislation. To agree

to this amendment would mean the abandonment of the Selective Service System and, instead, to substitute another system. On a far-reaching matter like that, men do not march up the hill one month and a few weeks later march down the hill, back and forth. We do not have a President who could ever lead this Nation under an uncertain situation such as that would bring about.

The PRESIDING OFFICER. The time of the Senator is expired.

Mr. STENNIS. Mr. President, I yield myself 5 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 additional minutes.

Mr. STENNIS. Mr. President, I have the amendment before me. Section 603 on page 3 reads:

SEC. 603. If at any time after the termination of induction of persons into the Armed Forces under the Military Selective Service Act of 1967 the President determines that the military manpower needs of the Nation are not being adequately met through a voluntary system and that conscription is necessary for the national security, he shall promptly notify the Congress of such determination, and of the facts upon which such determination is based, and submit to the Congress such recommendations for legislation as he deems necessary and desirable to provide for the involuntary induction of persons into the Armed Forces.

My point is, with all deference, these are just words. The President has already sent us the message on this very subject. It is contained in his letter of August 21; and that is: Do not pass this amendment now; it has to be considered along with all these other subjects, and one of those matters is the extension of the Selective Service Act.

So we are getting the cart before the horse. It seems to me, in the face of what the President has said, we would look ridiculous to pass a bill calling on the President to tell us how he feels about something a few months later.

Mr. President, I will move on now. I want to move to another matter. We might just as well get down to something that is not very pleasant to talk about, but it is really where the problem lies.

PROBLEM OF ARMY COMBAT PERSONNEL

Another fact I wish to repeat for the record relates to the concept of attempting to attract men to the fighting elements of the Army without the use of the draft and on the basis of increased pay. Mr. President, in fiscal year 1970—we are in fiscal year 1971, now—16 percent of all Army personnel in Vietnam—about 48,000 men—were riflemen. These are the men who carry the guns in their hands, whose lives are constantly at stake, and who take the brunt of every attack. This group, even though constituting only 16 percent of the total Army, took 54 percent of all the casualties. If we include all of the infantry skills including those who handle the mortars and who help out with the tanks, this group constitutes 22 percent of all those in Vietnam in fiscal year 1970 and this entire group took 67 percent of all the casualties.

In other words, they are just a fraction over 20 percent of the group, but they took a fraction over two-thirds of all the casualties.

Under this amendment, assuming these riflemen I have referred to are in pay grade E–2—that is the rank of a corporal—the increase would go from $138 to $298 per month in basic pay, or an increase of $160, amounting to an increase of 116 percent.

The question that each Member of the Senate must ask himself on this bill is whether an increase of $160 a month would cause a young man to volunteer for the army, to go to Vietnam as a rifleman, with all the risks and duties it entails.

Mr. President, I think there are other statistics right along this line, but these are illustrative figures on the point. I do not think there is any doubt about what the answer is. This increase in pay, while the shooting war still is going on, is not going to draw the necessary men to fill those posts. It is not a matter of arithmetic; it is just a matter of commonsense.

That is why I say we should not enact something that would create confusion, uncertainty, and an impossible situation for the Government. It is inexcusable that we do that when every authoritative source that is available is asking us not to.

Mr. President, I yield the floor.

Mr. HATFIELD. Mr. President, I yield myself 10 minutes.

I appreciate very much this discussion, even though there are not a goodly number of our colleagues present.

I never cease to be utterly impressed by the courtesies and the manner of the chairman of our Armed Services Committee, but this morning I will have to respectfully disagree when he indicates that, somehow, there is an illegitimate chicken running around here in the form of an amendment. It is neither illegitimate nor it is a chicken. I am sorry that we have not been able to see the parentage and the great heritage of what we have here, which is really the American eagle. I say it is the American eagle because the concept that is incorporated in the amendment is as American as over 170 years of our history. This is not new. It is not something that came out of an egg somewhere in a barnyard.

This is a concept that was very carefully considered by our Founding Fathers, and for over 170 years of our history the concept of voluntarism in the military services of our Nation has been the policy. So the parentage, if one wants to identify the parentage of this amendment, is not only the history of this Nation as great evidence of its lineage, and a very distinguished and fine heritage, but it also has the support of 25 Senators and it has a Presidential commission, the Gates Commission, also as parentage. It is not just some idea that has been popped here to surprise Senators, but, it is, rather, one long involved with our history.

With all due regard to the Senator from Mississippi, I know he is a very busy man. I know of no man in the Senate who carries more responsibilities on major committees and, day by day and hour by hour, performs those duties in such an able manner. Therefore, I can appreciate the tremendous demands upon his time. But I would also remind the Senate that the proposal for a volunteer service was introduced by me in 1967. It went to the Senate Armed Services Committee at that time. Another bill was introduced, with the same concept, early in the 1969 session.

I would like to quote from the March 12, 1970, CONGRESSIONAL RECORD with respect to the idea of holding hearings in the Armed Services Committee, and I quote the chairman of the committee, who said at that time:

Mr. President, I should like to announce that the Senate Committee on Armed Services will begin hearings very soon after we reconvene following the Easter recess on the Selective Service System.

* * * * *

I would emphasize, Mr. President, that the committee will not complete action on the procurement authorization legislation prior to the Selective Service hearings.

I would note that it would be necessary to resume committee action on the procurement authorization legislation following the Selective Service hearings and to some extent, hearings on each will continue for a time.

Then, further, I wish to quote from the March 13, 1970, CONGRESSIONAL RECORD. At that time the distinguished Senator from Massachusetts (Mr. KENNEDY) said:

Senator STENNIS, agreeing with me that these issues merit full consideration, has assured me that Dr. Handler and Professor Tukey will be invited to make their presentation when the Senate Armed Services Committee begins its hearings on draft legislation early in April. Since this committee will be considering a number of pieces of draft legislation at this time, he and I felt that this would provide the most appropriate way of studying the lottery in its fuller context.

I only mention this as a part of the record to show that we have had the proposal for an all-volunteer service before this very committee now for some 3 years. We have had indications of hearings, which have not been held. I know there is good reason for it, but I only want to indicate this as a part of the overall record.

Now I want to respond to comments made about those men in Vietnam today, especially the infantry riflemen. The Senator from Mississippi very appropriately states the fact that 16 percent of the men in Vietnam are riflemen. I would like to add another statistic. Eighty-eight percent of those riflemen in Vietnam today are draftees. I repeat, 88 percent of them are draftees, and they are today fighting in Vietnam on substandard pay.

Therefore, whether we agree with the draft system or a voluntary system, the very fact that the Armed Services Committee chairman brings to our attention the fact that 16 percent of those men in Vietnam are riflemen—and I am sure he agrees with the statistic given me by the Pentagon that 88 percent are draftees—argues for the fact that they should at least receive adequate pay, that they should receive comparable pay.

When the President assures us that we will have all our combat men out of Vietnam a year from now, this gives us the assurance that the 88 percent of the infantry riflemen who are draftees will be out of Vietnam, or at least a goodly number of them. We are not going to change the draft law until at least June 1971, so we are not doing anything that is going

to have any kind of impact on the Vietnam war problem at this time by merely enacting a comparable pay program.

I would say the argument used this morning by the chairman of the Armed Services Committee is an argument in behalf of the amendment; that if we are sending this number of draftees to Vietnam to be riflemen, at least we ought to give them comparable pay.

I should like to respond, too, Mr. President, that we have here a letter from the White House that the Senator has presented to the Senate, addressed to Senator STENNIS under date of August 21, and in this letter there are stated four reasons as to why the White House has been quoted as not supporting this amendment at this time. First:

> There can be no certainty that the proposed changes in pay and incentives will attract sufficient volunteers to permit cancellation of the draft on June 30, 1971, as implied in Amendment 765.

The amendment referred to is really the earlier number of the amendment we now have before us, so it is the same amendment.

Mr. President, what we are doing is providing a time schedule. We are providing a time period which will not obligate this Congress or the next Congress to cancel the draft, but merely provide Congress with adequate information; and I believe it is therefore necessary to enable Congress to make a decision as to whether to extend the draft. We would provide a period during which we can test a pay incentive and pay increase program, as to whether or not they will attract volunteers.

As its second point, the letter says:

> It would enact into law a large number of personnel policy changes without knowledge of either their effectiveness or comparative costs with quite possibly more efficient alternative proposals.

Mr. President, this does not really face up to the facts, because this point, I think, definitely tends to mislead the casual reader.

First of all, let me say, a number of the proposals in our amendment are already in action in the Defense Department, and what we are doing is urging them on and providing the funds so they can move into a greater degree of experience in these programs. This amendment makes recommendations to the Secretary of Defense; it does not legislate specific programs which must be implemented. It does on the pay scale, but beyond the pay scale it merely sets guidelines.

As its third reason, the letter says:

> It would add several billions of unplanned increased costs to the fiscal year 1971 budget.

Again, I think we have provided the Senate, certainly, with much information to the effect that it would save us money rather than cost us money. It would save us money through the more efficient system; the figure that is quoted is $2.3 billion, not $4 billion, and we know that the draft today is costing us nearly $4 billion. So, by supplanting the draft, winding it down in the sense of eventually supplanting it with volunteers, we would be balancing the lesser cost against the greater.

As its fourth point, the White House letter says:

> And, provide no opportunity for the Armed Services Committees to hear the views of the Department of Defense or other interested witnesses.

Mr. President, hearings will be held. I believe the Senator from Mississippi when he says hearings will be held on the Selective Service System, and hearings are apparently going to be held on this subject.

Passing this amendment would not preclude that at all. The amendment provides for pay increases, making basic pay comparable with the income the enlistee would earn in civilian life, and that is all it does in that sense. So consequently, this would not hamper the Armed Services Committee from going ahead and holding hearings on the question of selective service extension or a volunteer system. But it would give to the Armed Services Committee material and experience that they do not now have, the Defense Department does not have, and no one else has. So that is why the proponents of the amendment feel that it is an orderly transition and a legitimate action that is requested this morning on the part of the sponsors; and I am sure that, as we look carefully into these matters, we will find that the effect on Vietnam would not be obvious, and would not even be subtle. It would only provide for more adequate pay for those who are risking their lives in actual war, and the budgetary cost would not increase.

Therefore, we feel that it is a responsible action that we are requesting at this time.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. BAYH). The time of the Senator from Oregon has expired.

Who yields time?

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time for the quorum call be taken equally from both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CHURCH TOMORROW VACATED

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the special order entered yesterday, under which the able Senator from Idaho (Mr. CHURCH) was to have been recognized tomorrow morning, be vacated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be equally divided between both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARRIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

PRIVILEGE OF THE FLOOR

Mr. HARRIS. Mr. President, I ask unanimous consent that, during the consideration of the pending amendment, Mr. Frank Levy, a member of my staff, may be permitted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRIS. Mr. President, I suggest the absence of a quorum.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the time consumed for the quorum be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield 15 minutes to the distinguished Senator from Ohio (Mr. YOUNG).

The PRESIDING OFFICER. The Senator from Ohio is recognized for 15 minutes.

Mr. YOUNG of Ohio. Mr. President, it will give me great pleasure, later today, to vote in favor of the pending amendment.

Conscription, except in time of grave national emergency, or in a period where Congress has declared war, is an abomination. It is an atrocity that should not be tolerated in a country such as ours.

In recent years we have witnessed the un-American spectacle of the youngsters of our country being conscripted and then, after 4 months of basic training, being sent to Vietnam to fight that undeclared, immoral, and unpopular war—the most unpopular war in which our Nation has ever engaged.

Those boys are being sent to Vietnam at the same time we have in West Germany 300,000 career men of our Armed Forces—the best trained soldiers in the world—enjoying the good life in the West German Republic. All officers, from the

rank of captain up, never had it so good, with the soldiers, for the most part, living like squaw men with their wives and children. The field grade officers and the general officers enjoy the good life in Europe, skiing in the summertime in Norway and in Switzerland, spending their summers with their wives at the various European resorts, in Spain, and Italy, and sometimes wintering there, at the same time that young American boys are being drafted and sent to Vietnam, when Canada and the United Kingdom have no draft whatsoever.

Peacetime conscription in the United States has, in fact, been a shameful, national albatross. It has disenfranchised and embittered our youth. More than any single institution, it has eclipsed the enthusiasm of the freely given time and talent which built this country in the first place.

Mr. President, the poet, Siegfried Sassoon, in his poem, "On Passing the New Menin Gate," wrote:

Who will remember, passing through this Gate,
The unheroic Dead who fed the guns?
Who shall absolve the foulness of their fate,—
Those doomed, conscripted, unvictorious ones?

These are powerful and appropriate words.

Mr. President, conscription of our youth in time of peace should never be tolerated in this country. During the War Between the States, after it had been raging from April of 1861 until about July 1863, the draft was first instituted. Daniel Webster's prophecy made back many years before came true. He stated:

If the administration has found that it cannot form an army without conscription, it will find, if it ventures on these experiments, that it cannot enforce conscription without an army.

In 1863, in the middle of the War Between the States riots occurred in New York City for 10 days in which 1,000 civilians were killed. They were rioting against being forced to engage in a war that had the support of the people of the North—with the people of all the States south of the Mason-Dixon Line just as enthusiastically supporting their rebellion against the forces of the North.

That should have taught this country a tremendous and severe lesson, but it seems to have been forgotten now.

Conscription was again introduced in World War I. Two hundred fifty thousand young men refused to appear for induction.

Today, no one knows how many young men have gone to Canada or to Europe to evade conscription or participation in this undeclared and unpopular war in Vietnam, which has now been expanded and escalated to include Cambodia, Laos, and Thailand. Young Americans are being killed in all those countries today.

In the entire history of this Republic, there have been only two unpopular wars, one was the war with Mexico which was a declared war. It was a war of aggression on the part of the United States against our neighboring Republic to the south. The other, Vietnam, is a war of aggression that we are now carrying on where the French had the good judgment to get out following Dien Bien Phu. It was not a victory for the Vietminh, the forces of the National Liberation Front at Dien Bien Phu. It was not the overrunning and capture of that post held by 12,000 members of the French Foreign Legion which brought the war to an end. It was that France was being bled white by its involvement in attempting to perpetuate and reestablish its lush colonial Indochinese empire. Finally, those in authority in France determined, as we now know, that they were engaged in an unwinnable war of aggression. Dien Bien Phu was surrendered on May 7, 1954. By September, the French Government had withdrawn the remaining 260,000 of its troops and ended its involvement there.

Now, Mr. President, we first sent to Vietnam 685 military advisers and no combat troops at the time President Eisenhower left the White House.

On the sad day that President John F. Kennedy was assassinated, there were 16,200 military advisers in Vietnam and no combat troops.

Very soon under President Johnson we had more than 500,000 military advisers and combat troops. Since that time, in the little country of Vietnam which is of no importance whatever to the defense of United States and far from our sphere of influence, young American draftees conscripted into our Armed Forces have given their priceless lives in fighting this war of aggression that we are carrying on where the French left off.

Mr. President, there is a general feeling throughout our country, and particularly among the young men that conscription, except in time of grave, national emergency when the Congress has declared war, is an intolerable thing.

I recognize that we need a strong Armed Force in our country. Mr. President, I have served as a private in our Army in time of war and also as an officer. I served for 37 months in World War II, most of that time being in North Africa and Italy.

I am proud of the fact that our Navy is made up of volunteers and, that our Air Force is made up of volunteers. Of course, our Army should be made up entirely of volunteers. We must have a volunteer Army. We must not tolerate the draft.

Conscription does not contribute one whit to the defense of our country. As I have said, it is an albatross around the neck of the military itself.

A very great British military authority, military historian, and critic for the Encyclopaedia Britannica, B. H. Liddell Hart, said:

There is only too much evidence that our temporary adoption of conscription in the last war had a permanent effect harmful to the development of freedom and democracy here. For my own part, I have come to my present conviction of the supreme importance of freedom through the pursuit of efficiency. I believe that freedom is the foundation of efficiency, both national and military. Thus it is a practical folly as well as a spiritual surrender to "go totalitarian" as a result of fighting for existence against the totalitarian States. Cut off the incentive to freely given service, and you dry up the life-source of a free community.

He was speaking of England. However, that applies to the United States as well. It is significant to note that England and Canada have no conscription whatever. There is a saying that experience keeps a dear school, but fools learn in no other. Experience does indeed keep a dear school, as we have learned.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. Mr. President, I yield 5 minutes to the distinguished Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized for an additional 5 minutes.

Mr. YOUNG of Ohio. Mr. President, we must not dry up the life source of the United States of America. We must not risk that. We must return to an all-volunteer Army in our country.

We have had bitter experience now in Southeast Asia. Without doubt our national posture will be strengthened and we Americans can hold our heads higher and our backs straighter when we do away with this abomination of conscription in this period of an undeclared war and go forward by passing this amendment and state that we are determined to have an all-volunteer Army in the United States the same as our Air Force and our Navy.

I hope later today there will be a strong affirmative vote and that this amendment will be agreed to.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. YOUNG of Ohio. Mr. President, I yield to the distinguished Senator from Oregon.

Mr. HATFIELD. Mr. President, I would like to thank the distinguished Senator from Ohio for his remarks this morning on behalf of the amendment.

I would like to have the RECORD show that the gentleman who has just spoken is certainly a man who holds a very distinguished record in war. He served in World War I and also served for 3 years in World War II. He was awarded the Bronze Star and four battle stars.

In Italy he received the commendation of Gen. Mark W. Clark and the Order of the Crown of Italy. Along with such members of the Armed Forces as former Supreme Allied Commander, Gen. Alfred Gruenther, and Gen. Lauris Norstad, who served on the Gates Commission, along with Gen. Thomas Lane, Admiral Tune and Gen. Leroy Anderson, many distinguished military people support the amendment and have stated their belief in this volunteer system. I thank the Senator from Ohio for his contribution this morning.

Mr. YOUNG of Ohio. Mr. President, I thank the great and distinguished senior Senator from Oregon for his very flattering reference to me. He also served in World War II compiling an outstanding record serving with the Navy in the Pacific theater where he participated in the Iwo Jima and Okinawa invasions.

Before being elected U.S. Senator he was Governor for two terms serving his people of Oregon with the greatest industry and dedication. I admire the distinguished Senator from Oregon very much indeed. I am very happy to be a follower and a private in the ranks with

him today. I wish him success in this endeavor.

Mr. HATFIELD. I thank the Senator from Ohio.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Mississippi has 137 minutes remaining.

Mr. STENNIS. Mr. President, I yield 10 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, while I am in sympathy with some of the aims and objectives of the so-called volunteer army amendment, I am, nevertheless, deeply concerned with its basic assumption that in just a few short months we can safely throw out the draft and fill the ranks of our Armed Forces with volunteers.

Therefore, it is not possible for me to share the assurance that America can safely follow such a course at this point in time. This is especially so when one considers the fact that this country has well over one-quarter million men engaged in a war halfway around the world. Also, I question most seriously if anybody can tell us with any degree of exactitude just when conscription can be ended.

The effect of this proposed amendment would be to end the induction authority on July 1, 1971, while providing for continued registration after that date. It is presumed that enough volunteers would come forward during fiscal year 1971 to make it possible to maintain the total force of almost 3.0 million which is currently projected for that date. Of this force the Department of Defense has estimated that 642,000 new personnel will be needed, including 182,000 draftees. The Department has further noted that of the 460,000 volunteers in the total, about half of these will have been motivated to enlist by the draft. Also, of equal importance to this discussion is the subject of the Reserve forces which will need some 110,000 new personnel during fiscal year 1971, 80 percent of whom will join because of the draft.

Those who are sponsoring this amendment are confident that numbers of this magnitude can be attained next summer by offering higher pay and various incentives alone. This view, in light of present world conditions and unpredictable factors here at home, appears an oversimplification at best, and possibly a great deal worse.

Far sounder, in my judgment, is the perspective on this subject offered by the President in his message to the Congress on April 23 of this year, concerning the draft and the development of volunteer military forces.

The President's intention—and he has voiced it frequently—is to abolish the draft by phasing it out in a deliberate fashion rather than accept the obvious risks inherent in a sudden, abrupt cutoff. President Nixon's plan of working to bring draft calls down to zero as a first order of business makes sense, and will provide the experience we need to determine how well the volunteer plan is coming along. Frankly, I personally doubt very much if a sudden abolition of the draft would bring overwhelming numbers of young men flocking to our recruiting stations.

The President believes that eliminating the draft requires an effective and instantly available standby draft authority. This approach certainly appears to be the only safe and sane method by which to deal with this problem. Amendment No. 765, however, would provide a cumbersome and probably unworkable method of reinstituting the draft. The President would have to get new legislation approved by the Congress if he found our national security threatened by manpower shortages in the Armed Forces.

Mr. President, in my opinion this provision in the pending amendment is a grave flaw, and a possible invitation to disaster in extreme circumstances. At the very least we should have a standby draft system for use in the event of an emergency situation.

Further, we must realize the amendment being offered should be considered in the light of the President's own programs to reduce reliance on the draft, to reduce the size of the Armed Forces generally, and to continue the steady progress of bringing American troops home from overseas. Draft calls are being cut these days, not increased. Troop strengths are coming down substantially, not going up. Greater numbers of men are coming home from Vietnam, rather than greater numbers going out.

President Nixon is directing a careful transition in the manning of our Armed Forces, leading this country back to our historic principle of volunteer military service in times short of grave national crisis. His forceful and vigorous program affects all aspects of military life, both for the career soldier and for the volunteer who desires to exchange a period of service for valuable education and training. It includes not only plans for far more attractive pay levels, but a host of other incentives and improvements in the conditions of service designed to make military careers more attractive. All of these plans and actions, in my opinion, point to a sound and orderly process, putting first things first, doing what is possible now while always keeping in sight the ultimate goal.

But, I am of the opinion that the President's program needs and must have more time than the proposed amendment would provide—time to move toward our destination with more assurance that we can reach it. Attainment of that goal is also the motive of the authors of this amendment; it is merely the method on which we disagree.

Already the President has done more to reform the draft, to plan for its ultimate elimination, and to restore America to reliance upon volunteer military forces than any President since World War II.

I propose to vote against the amendment under consideration in favor of providing the fullest support to the efforts of the President to reach much the same goals by a safer and sounder route.

Again, Mr. President, I wish to call attention to the letter from the White House dated August 21, 1970, addressed to the distinguished chairman of the Committee on Armed Services, the Senator from Mississippi (Mr. STENNIS). It is clear in this letter that the President feels it would be unsafe for this amendment to pass. He is our Commander in Chief. Although we are not bound by his recommendations, it seems to me the Senate should give great weight to the recommendations of the Commander in Chief of the Armed Forces on matters of this nature.

Again, I say the President is opposed to this amendment, the Department of Defense is opposed to this amendment, and it would seem that the logical step to follow would be to follow the course outlined by the President, who has in mind accomplishing a goal similar to those who offer the amendment, but to follow the regular process the President has recommended.

I hope the Senate will not agree to the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. HARRIS. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. No amendment is in order except by unanimous consent.

Mr. HARRIS. Mr. President, I ask unanimous consent that the amendment may be considered at this time, and the time used on the amendment equally charged in the consideration of the Hatfield proposal.

The PRESIDING OFFICER. Is there objection?

Mr. HATFIELD. Mr. President. a point of inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATFIELD. Mr. President, I believe the unanimous-consent agreement included 1 hour for each amendment to the amendment, to be equally divided. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. And the amendment of the Senator would have a 1-hour limitation to be equally controlled by the Senator himself and by me, as the author of the amendment. Is that correct?

The PRESIDING OFFICER. The Senator is partially correct. Under the unanimous-consent agreement the amendment would not be in order until the expiration of the time allowed on the Hatfield amendment.

Is there objection?

Mr. HATFIELD. Mr. President, reserving the right to object, I do not believe that was the unanimous-consent agreement. I would like to have the Chair check that unanimous-consent agreement because I do not believe it was required that any amendment to the amendment be offered at the end of the time agreed to in the agreement; namely, the 3 hours on each side. I believe it was agreed that an amendment to the amendment could be offered at any time but that hour would be charged independently of time on the amendment.

The PRESIDING OFFICER. The Chair understands the inquiry of the Senator from Oregon. The Presiding Officer will take a minute or 2 to collect his thoughts.

Mr. HARRIS. Mr. President——

The PRESIDING OFFICER. The

Chair has before it a unanimous consent request by the Senator from Oklahoma that has not yet been agreed to. In his request he asks that the amendment of the Senator from Oklahoma be brought up at this time. Under the prior precedents of the Senate, his amendment, if objected to, could not be considered until the expiration of the full 6 hours on the principal amendment of the Senator from Oregon (Mr. HATFIELD). However, if there is no objection, the amendment of the Senator from Oklahoma can be taken up at this time, and the time used on his amendment would not be charged to the time allocated to the Senator from Mississippi and the Senator from Oregon.

Mr. STENNIS. Mr. President, if the Senator will yield——

The PRESIDING OFFICER. So that the Chair may fully state the issue, let him state that the Senate would vote on the amendment of the Senator from Oklahoma at the expiration of his 1 hour.

That is the request, the Chair takes it, of the Senator from Oklahoma.

Is there objection to the unanimous consent request? The Chair hears none, and it is so ordered.

The clerk will state the amendment of the Senator from Oklahoma to the amendment of the Senator from Oregon.

The legislative clerk proceeded to read the amendment.

Mr. HARRIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15 of amendment 844,, between lines 11 and 12, insert the following:

SEC. —. (a) Notwithstanding any other provision of law, on and after July 1, 1971, the authorized strength of the Armed Forces in members on active duty (other than active duty for training) shall be 2,500,000.

(b) In no case may a new strength level be implemented unless such action is specifically authorized by law. If a new strength level is established and the new level represents an increase, then the new level shall be met through conscription. Conscription instituted pursuant to any emergency shall continue in effect for one year following the date on which conscription is reinstituted to meet any increase in strength level. When conscription is authorized in order to meet such an increase in the authorized strength of the Armed Forces, only persons between the ages of eighteen and twenty-six (as defined in section 16(a) of the Military Selective Service Act of 1967) may be inducted, no occupational or student deferments shall granted, and the selection of persons for induction shall be made on the basis of a random selection system (lottery).

(c) Unless otherwise provided by law, the authorized strength of the Armed Forces may be met after June 30, 1971, only through a voluntary system. Nothing herein shall require that the Armed Forces be maintained at the maximum authorized strength.

(d) As used in this section the term "Armed Forces" means the Army, Navy, Marine Corps, and Air Force.

The PRESIDING OFFICER. There is a period of 1 hour on the amendment, to be equally divided between the Senator from Oklahoma and the Senator from Oregon, unless the Senator from Oregon wishes to accept the amendment.

Mr. HATFIELD. No.

The PRESIDING OFFICER. The Senator from Oregon does not. Therefore, the time is to be equally divided between the Senator from Oklahoma and the Senator from Oregon.

Mr. HARRIS. Mr. President, I yield myself 10 minutes.

Today we continue consideration of a voluntary armed service. As with most important debates, the debate over a volunteer military has its share of oversimplification.

To the casual listener, we are discussing only one issue: to draft or not. To the average observer, there seem to be only two positions a man can hold: for the draft or against.

I believe the question we debate here is more complex than that. Rather than one issue, there are three:

The tax-in-kind now being paid by draftees.

The degree to which Congress should directly and obviously control the size of the armed forces.

The question of which of our youth are to participate in fighting a war.

I do not believe these issues have received the full and separate discussion they deserve. For two reasons, then, I am today offering an amendment to the proposal of the distinguished Senator from Oregon (Mr. HATFIELD) and other Senators.

First, my amendment will add necessary safeguards to the operation of a volunteer armed forces, if there is to be one. Second, discussion of the amendment will, I hope, provide a fuller examination of the three issues I have stated.

I will briefly explain my amendment. Then I will suggest why I am greatly worried by the Hatfield proposal as it now stands.

Under my amendment, Congress would set an explicit upper limit on force size. For 1971–72, that level of active strength would be set at 2.5 million men.

Mr. President, I am not bound rigidly to that force level. I am more interested in the substantive matter of setting a level by Congress which can only be changed by Congress, and which can only be exceeded in times of emergency and in times of war, which would be the reason for the raising of the peacetime level, by resort to the lottery draft.

That level of 2,500,000 men, which would go into effect in July of 1971, is, however, in the middle range of estimates made by the Gates Commission and is in line, as the distinguished Senator from Oregon has previously stated in the debate, with estimates by the Defense Department as to what level they think will be the maximum level at which the armed services will remain by July 1971.

The distinguished Senator from Oregon has stated, as have other Senators, that the Defense Department estimates that the total level will be 2,500,000 or lower by July 1971, at the time this amendment goes into effect. That is why that force level was used in my amendment.

This force size could then only be changed by vote of Congress. If Congress voted to increase the force size, the increase would have to be met through a lottery draft. The eligible pool for the draft would be made up of men ages 18 to 26, with no educational or occupational deferments.

Let me now suggest why I am proposing this amendment. As I mentioned, I believe we are discussing three separate issues: The tax-in-kind on draftees—which has already been discussed in some detail in this debate—congressional control of the size of the Armed Forces—which also has been discussed in this debate—and the question of who should participate in a fighting war—which I do not think has been sufficiently examined here.

I believe Senator HATFIELD's amendment makes a positive contribution in the first of these areas; that is, the hidden tax.

But, aside from the question of whether the Hatfield proposal should be agreed to by the Senate at all, I think that if it is to be approved it can and should be improved in regard to the latter two issues. If it is to become law at all—and that is a question which each Senator can reserve judgment on or decide however his conscience dictates—it ought to become law only in its best possible form. It is to that end that I am introducing this amendment.

I believe there is merit in the argument against the hidden taxes which draftees presently pay by reason of the fact that military wages are below what might be earned otherwise; there is soundness in the position that greater comparability with private industry should be achieved. My proposal would leave this aspect of Senator HATFIELD's amendment unchanged.

But, I also believe that the size of the military should be under more obvious congressional control. I emphasize, not just congressional control as under the budgetary and appropriation process, but under more obvious and visible control, so that each time a decision is made by the Congress as to the size of the standing armed force, the public will know that that serious question is being debated and is to be decided. Therefore, public attention would be focused on that issue and the seriousness of it, and the fact that the decision is one that ought to be made, under our system, by the Congress itself.

One of the purposes of my amendment is to treat the size of the military as an explicit issue. I am pleased to note that the amendment offered by the distinguished Senator from Indiana (Mr. BAYH), agreed to last Friday, will serve that same purpose, with one exception. Under that amendment, the first force sizes to be debated and authorized are for 1972—that is, under the Bayh amendment to the military procurement bill itself. But Senator HATFIELD's proposal is due to take effect under its present terms, in July 1971. By proposing a specific limit of 2.5 million men for 1971, I am suggesting that the operation of a volunteer army should be subject to that kind of public and congressional scrutiny from the very start.

Most basic of all is the question of who

should serve in a fighting war. Since those from lower income backgrounds would be more attracted to military careers by the increased pay than would those of middle- and upper-income backgrounds, would any American wars in the future be fought only by the sons of postmen and policemen, with the sons of lawyers and doctors exempted?

These, it seems to me, are very serious questions which face us in connection with this amendment.

I am certainly conscious of the serious civil liberties questions involved in conscription. I wonder, however, whether the fighting of wars ought not always to require some general sacrifice, evenly distributed throughout the American populace. If wars involve no general sacrifice, would it be easier for us to get into another one in the future?

It is for this reason that my amendment specifies that, if this 2.5-million-man-force size is to be exceeded, it must be exceeded with draftees, coming from a lottery draft without deferments.

Invoking such conscription in the future would, of course, be a major political step for Congress to take. But I believe this is as it should be. Because it is a major step, we would have to debate a request for such an increase with great care. This is precisely the kind of care such a decision deserves.

Beyond the care we focus on the seriousness of the decision, there is a related reason for setting up such a "threshold" decision. It may be that we have come into a new era of nuclear bombs and missile delivery systems when the formal declaration of war by Congress will be less likely to be used as the legal basis for future military action. If this is true—and it seems to me that recent events point in that direction—then the debate on whether or not to invoke the draft would itself serve to protect the right of the people, as the writers of the Constitution intended, to have their representatives in Congress decide the basic issue of war or peace.

Mr. President, the arguments for my amendment, then, boil down to about four, which are somewhat interrelated and overlapping.

First is the question that force size, whatever it is to be—by my amendment it is to be set at 2.5 million—should only be decided by obvious and visible congressional action, on which the public can focus their attention and their influence.

Second, the burden of war, if there is to be a war which would require more in numbers in the armed services above the force level set in peacetime, should be more evenly distributed throughout the populace, so that the sons of all of us are equally liable to have to fight in the war. That argument, it seems to me, is sustained not only by basic fairness—and that is most important—but also because the prospect of sharing evenly the burden of fighting a war, would, it seems to me, prove to be some deterrent against war itself.

Third, by setting the force level at 2.5 million or some such reasonable figure, requiring congressional action to raise it and a draft to supply any increase over such numbers, we would point up the seriousness of any such war decision. The seriousness of that decision would be underscored, and the public would be fully informed of the issue debated and to be decided.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HARRIS. I yield myself 1 additional minute.

Last, this amendment, by setting a force level and requiring congressional action to raise it and a draft to supply increased numbers of men, would to some degree effectuate the constitutional powers of Congress, and, therefore, of the people, to have the issues of war and peace decided only by the people's representatives in Congress.

For these reasons, Mr. President, I submit that if the proposal for a volunteer armed service is to become law, it should only become law in improved form. That is the reason for the amendment I offer to it. I hope my amendment will be adopted.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield myself 5 minutes.

I very reluctantly rise to oppose the amendment of the Senator from Oklahoma, though not because I disagree with much of what the Senator from Oklahoma says, because I wholeheartedly subscribe to many of his premises and to much of the content of his presentation.

But, Mr. President, there are basically two reasons why I believe his proposed amendment to our amendment is not at this time appropriate. One is that last week the distinguished Senator from Indiana (Mr. BAYH) offered an amendment to the bill now pending, H.R. 17123, which on a voice vote was agreed to by the Senate.

Perhaps if the Senator from Oklahoma would care to comment, I may not be clear on this, but according to the wording of the Bayh amendment, which was agreed to, it seems to me it would do exactly the thing that the Senator from Oklahoma seeks to do, and that is to have Congress set a manpower level. The exact figure is not specified in the amendment of the Senator from Indiana, but it does say, beginning on page 2, subparagraph (2):

> Beginning with the fiscal year ending June 30, 1971, the President shall submit to the Congress a written report not later than January 31 of each fiscal year recommending the active duty strength level for each component of the Armed Forces for the next fiscal year and shall include in such report justification for the strength levels recommended and an explanation of the relationship between the personnel strength levels recommended for such fiscal year and the national security policies of the United States in effect at the time.

Unless I am misreading that amendment, it appears to me that it does exactly, as I say, without a specific figure, at least place in the hands of Congress the power to review and to pass on what are the justified, required levels of each component of the Armed Forces. Is that an incorrect reading of the amendment, or is my understanding correct?

Mr. HARRIS. Mr. President, I yield myself 1 minute to respond.

I think there are three differences. First, I do not think the amendment of the Senator from Indiana is as clear as the amendment which I propose, that is, that only Congress can set this upward limit—and that is made very clear in my amendment, that Congress is not just to review, but to decide.

Second, the Bayh amendment, as I understand it, would go into effect in 1972, whereas the proposal which the Senator from Oregon is making would go into effect in 1971. My amendment, therefore, would provide that Congress, from the very first, will set the upward limit on force levels.

Third and most important, we would, as of the time the Senator's proposal would go into effect, set the upward limit at an actual figure, which in my amendment is 2.5 million.

While, as I said in my opening remarks, I think the proposal of the Senator from Indiana goes a long way toward one of the four arguments which I put forth in support of my amendment, it does not go far enough, if the volunteer army is to become a reality.

Mr. HATFIELD. Mr. President, I thank the Senator for his response.

Again referring to the amendment of Senator BAYH, in section 1, on page 1, it provides:

> Beginning with the fiscal year which begins July 1, 1971, and for each fiscal year thereafter, the Congress shall authorize the active duty personnel strength for each component of the Armed Forces; and no funds may be appropriated for any fiscal year beginning on or after such date to or for the use of the active duty personnel of any component of the Armed Forces unless the active duty personnel strength of such component for such fiscal year has been authorized by law.

It appears to me that in both instances we have, either by law or by an annual action of Congress—which in itself constitutes a law—the power vested in the hands of Congress for the troop level or the manpower level. But whether or not the Bayh amendment goes as far and is as specific as the Harris amendment is not necessarily the point with which I would differ with the Senator at this time.

It seems to me that we have two very separate things we are talking about today—two distinct things, yet related. But I feel that it would be inappropriate to try to legislate at this point in the procedure on this amendment to create a pay raise for the present personnel serving in the armed services.

No. 1 is that we have a volunteer system versus a conscription system which should be determined by hearings before a committee.

I agree with the chairman of the Armed Services Committee that there should be hearings, extensive hearings, on the question of whether we maintain a conscriptive system or a voluntary system.

The point is that in the Harris amendment we are attempting to recreate the conscription system to apply a specific time when manpower requirements rise over 2.5 million, as I understand it. I am for removing the conscription system completely from the law books. I am for total abolition. But that is not the question here this morning.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. I yield myself 3 additional minutes.

The question before the Senate is whether or not we will develop a comparable pay scale, and it is not a question of whether we should retain the Selective Service System or not, and it is not a question of whether we should reform the Selective Service System or not. That question must come up before the Committee on Armed Services.

The second point I should like to mention as to why I think this point perhaps is not appropriate at this time is that when we get into the matter of troops levels, this becomes a question that raises many other questions. It is not an easy one to resolve on the floor of the Senate.

I happen to have certain viewpoints on the war in Vietnam, but other sponsors of this amendment have different viewpoints on Vietnam. We have the Pentagon saying, "We don't want to crank down the selective service calls to zero within the year." We have the President saying that he wants all the combat troops out of Vietnam within the year. All sorts of contingencies relate to what our troop level should be.

Therefore, I am not sure that I am in a position to say that 2.5 million should be it at this time. We have the two-and-a-half war versus the one-and-a-half war concept which has not been fully developed as yet. All these things are difficult to decide on the floor of the Senate at this time.

Third, I think it is the power of Congress to raise the military forces of this country, under article I, section 8, of the Constitution, and that no President should have the stand-by power to institute the draft at his determination.

That would be more or less the situation as I interpret it. If it went above 2.5 million, it would be on the books to be reinstituted by some form of foreign policy commitment made by the President.

Mr. HARRIS. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. HARRIS. The Senator has made two points. One point worries me very much. While the Senator says we cannot now decide the force level without hearings, he says that we can, without hearings, adopt his very extensive proposal. That worries me.

Second, and to the Senator's specific question: It is precisely my position that not the President but Congress, not the Defense Department but Congress, should decide the force level. That is why I would write it into this law. If the Senator's proposal is to become law now, we should write the level into the law, and only Congress should be able raise that level, and only by instituting the draft, so that any sacrifice in an emergency or war would fall evenly, or more evenly on all our people.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. HARRIS. I yield myself 1 additional minute, and I yield to the Senator.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the time be equally divided.

The PRESIDING OFFICER. Without objection, the time in this exchange will be equally divided.

Mr. HATFIELD. I ask this of the Senator from Oklahoma: What would trigger the action necessary to increase over the 2.5 million level at the time the draft would be reapplied? This amendment would set a commitment of 2.5 million as a manpower level, but if it had to go over that upon some occasion or for some cause, what would trigger that particular action?

Mr. HARRIS. Subsection (b) of my amendment states it very clearly:

> In no case may a new strength level be implemented unless such action is specifically authorized by law.

So only Congress could change it.

> Nothing herein shall require that the armed forces be maintained at the maximum authorized strength.

In other words, without action of Congress, obviously, the level could be decreased; but if it were to be raised, that would require action of Congress and institution of the draft.

Mr. HATFIELD. The draft, then, would not be on a standby basis, but it would have to be reenacted by Congress at that particular point?

Mr. HARRIS. Under my amendment, it would be the same as under the amendment of the distinguished Senator from Oregon—that is, the draft system would be there, so that if it were needed, it could be put into effect.

Mr. HATFIELD. The registration procedure.

Mr. HARRIS. The machinery and the registration procedure, as is true under the Senator's amendment.

Mr. HATFIELD. I should like to make the record clear that our amendment proposes that only a registration continue after the enactment of this pay raise. If Congress at a future date should abolish the draft—because this amendment does not in itself abolish the draft, as the Senator from Oklahoma understands—it would be my concept, at least, as the author of this amendment, that if Congress saw fit to abolish the draft because we could prove between now and June of 1971 that we had sufficient volunteers coming in so that it would not be necessary to retain the draft, then I would only support the idea that a registration or an inventory type of action continue; that all other parts of the draft—the power to induct, the power to classify, the power to do all that now constitutes a part of the draft—would be totally abolished; and at a time when the Nation needed to develop a great number of new men for military service and the voluntary system was not functioning, and it was necessary for Congress to look at that situation in realistic terms, it would still have to reenact a new draft. The power would not be vested in anybody to automatically retrigger the institution of the draft. I understand that is what the Senator from Oklahoma supports and that that is what his amendment provides.

Mr. HARRIS. I had only the Senator's proposal with which to work. The Senator is saying what his intention might be some time in the future, if everything works out all right. But what we have before us is the proposal by the distinguished Senator from Oregon. At this time I am not prepared to offer a complete substitute for the Senator's proposal. Instead, I have expressed my concerns and worries about some of the aspects of its operation; and I have sought not to replace it with some different system but to try to patch it up a little if it is going to be adopted now. Therefore, I did not go past the words of the amendment to the time the Senator speaks of when he might offer something else to abolish the draft altogether.

I simply worked on what we had to work with, which was the Senator's pending amendment. Therefore, to the extent that the draft would continue under the Senator's present proposal, it would continue under mine, or the machinery would, and therefore could come back into immediate operation, as I think it should if we are going to go into a war that will require more than a peacetime level of armed forces.

Mr. HATFIELD. I am not actually proposing anything at this time for the future but, rather, referring to the exact language of my amendment, which talks about a draft registration.

Why I want to make this very clear at this point is that in the Gates Commission report, upon which the amendment I have offered is based, they use certain phraseology that needs clarification. One phrase they use is "a draft standby." Well, when they use the term "draft standby" they are talking about the very language we are using, and that is draft registration. Now there are others who on the floor even this morning have talked—the Senator from South Carolina (Mr. THURMOND) talked about having the President empowered with a "draft standby" which he can trigger at his own decision, should the necessity arise. I wanted to delineate at this point what the Senator from Oklahoma and I mean, that what we agree on as a "draft standby" and what the Senator from South Carolina (Mr. THURMOND) means when he talks about a "draft standby," we are not talking about the same thing. We mean registration procedure. That is what I want to bring out here, the distinction and the definition of what we are talking about, when we talk about "a draft standby."

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, will the Senator from Oregon yield me 5 minutes?

Mr. HATFIELD. I yield 5 minutes to the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 5 minutes.

Mr. STENNIS. I want to commend the Senator from Oklahoma (Mr. HARRIS) for the work he has done on the problem of personnel. It is a matter I am interested in and concerned about. When the shooting stops in Vietnam, I hope that we can do something about it. I know that is the Senator's prime objective. I think it is well that, since the amendment was coming up, he put in his thoughts on it right here and now. However, I cannot support the amendment. The Senator from Oklahoma knows that. We talked about it a little bit yesterday.

We have a situation here, Mr. Presi-

dent, which I went over this morning, that we are still at war. Like it or not, we are still at war. We still have 406,000 men in Indochina alone. We cannot take them all out, or run out, or bring them all home at once, although some progress is being made along the line of bringing our boys back home. My prediction is that this war is by no means over.

Let us look at the figures. For the period ending June 30, 1971, the official planning now is 2.9 million. I hope that that can be decreased. I am certainly going to work towards that end. That will be a reduction comparable to this: On June 30, 1970, the most recent officially tabulated figures I have, is that the strength was at 3.1 million. As I said, by June 30, 1971, definite plans now are that it will be as low as 2.9 million. I hope that can be improved upon, but I definitely do not believe we can withdraw, that we can just add 400,000 to that—to what was already planned in the cutback—add another 400,000 before July 1.

With reference to the other comparisons, our top strength in the services during this war has been 3.4 million. It has been brought down to 3.1 million and planned by June 30, 1971, as a certainty, to 2.9 million—which I hope we can better. The prewar strength was the very figure the Senator from Oklahoma has in mind—2.5 million.

I believe that, given the time, we can unmistakably reduce it to that figure—I hope below it.

One of the main themes of my thinking with reference to personnel is that we must bring it down, for several reasons: The way to decrease costs is to use the same amount of money on fewer men. We are reducing the cost of weaponry some, but, really, to get into a reduction, it has to be in the manpower field. We must move into that.

It will be a serious mistake, with the war still going on, to adjudicate legislativewise, with a legislative mandate, that this must be the ceiling, even though I hope we can attain it in that time. I hope that the Senator will keep working on it toward that end.

Another thing, Mr. President, the Senator's amendment, even though he may not intend it, as it is worded now, would really, in effect, preclude extension of the Selective Service Act beyond June 30, 1971.

It states on page 2, section C:

Unless otherwise provided by law—

That refers to the Selective Service Act—

the authorized strength of the Armed Forces may be met after June 30, 1971, only through a voluntary system.

Whether the Senator intended that or not, that is an indirect closing of the door, if his amendment is adopted and it becomes law, upon reenactment of the Selective Service System. It is so much my duty, as I see it, to leave that as an open question, to be decided in the ordinary way, along with the measurement of a voluntary army, that I do not believe we should adopt any amendment that casts a cloud or any doubt, or is a prejudgment in any way, of an extension of the Selective Service Act.

Secretary of Defense Laird is a man of responsibility, as of course the President is. I have already referred to the letters which are totally opposed to the idea of the enactment of a volunteer army, even though they support the concept.

I thank the Senator from Oklahoma very much for bringing in his very fine thoughts on this matter, but I hope that his amendment, for the time being, will be rejected.

Mr. HARRIS. Mr. President, will the Senator from Oregon yield?

Mr. HATFIELD. I yield 3 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 3 minutes.

Mr. HARRIS. Mr. President, I think there is serious doubt concerning the proposal of the Senator from Oregon (Mr. HATFIELD). If it is to go into effect at all, is should probably not go into effect prior to the end of American combat troops continuing to fight in Indochina. That is a very serious and separate question, and one which, if the administration timetable carries out, would perhaps be met by the effective date of the amendment, which is July 1971. If my amendment is adopted as a part of the proposal of the Senator from Oregon, I would think that another question, and a very serious one, would then be the question of the effective date and whether it should be tied to the time during which our troops are engaged in significant numbers in active combat in Indochina.

That is a question which quite rightly has been raised by the distinguished Senator from Mississippi. The distinguished Senator from Mississippi also raises the justifiable question which concerns the force level set in the amendment at 2.5 million.

I have already stated that that is a flexible figure in my mind and that I would be willing to talk about the reasonableness of that figure or of 2.9 million or whatever other figure might better be set in this amendment. I do feel if the proposal of the Senator from Oregon is to go into effect at all, that when it does go into effect Congress should have decided what the peacetime level will be.

The distinguished Senator from Mississippi raises a question which indirectly or inadvertently was raised also by the Senator from Oregon, that the level probably cannot be set until the appropriate committees in Congress can hold hearings on what that level should be. But that would still be, under my amendment, within the jurisdiction of Congress to do, prior to the effective date, and thereafter.

In any event, the level could be increased if Congress so decided, by a resort to the draft. Therefore, we would not place ourselves in any different position with regard to force level by my amendment than we are now in.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HARRIS. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for an additional minute.

Mr. HARRIS. Mr. President, I do not believe that the legal question which the Senator from Mississippi raises is a justifiable one. That concerns the language of the amendment and whether the draft is cut off. As a matter of fact, the language which legislative counsel helped to draft by its own terms makes clear that conscription would continue to be used should Congress decide to go above 2.5 million or whatever force level they set as the peacetime level.

Mr. President, aside from that, the distinguished Senator from Mississippi has made it clear to me in private conversation, and has also said on the floor, I believe, that he is going to hold hearings on the matter of the extension of the draft.

I trust at that time that he will go into such matters as educational and occupational deferments, the lottery, and the whole idea of a volunteer army, including the force level and the other serious questions which I have raised.

Mr. STENNIS. The Senator is correct. It will be a hearing from the top to the bottom on all matters involved in the comprehensive Selective Service System and also with respect to the volunteer army concept.

We agreed to an amendment the other day for our committee to set these force levels. That is something I am interested in. I am going to make a special effort in the conference to get that amendment agreed to. That will be a part of the substance of the Senator's amendment. However, that is out of place here. And I say with all due deference to the Senator.

Mr. HARRIS. Mr. President. I appreciate the Senator's comments. At this time I reserve the remainder of my time.

Mr. President, I ask unanimous consent that the vote on my amendment not come until immediately prior to the vote on the Hatfield amendment itself. I have been asked to make that request since some Senators would not be here otherwise, having thought that the first vote would come later today.

Mr. HATFIELD. Mr. President, reserving the right to object, would the Senator yield for a question?

Mr. HARRIS. I yield.

Mr. HATFIELD. Mr. President, would the Senator ask for a record vote? Was that the reason for asking to delay the vote?

Mr. HARRIS. My understanding is that Senators who may want to vote might not be able to be present at this time.

I would like even to reserve the question of a rollcall vote until later. I intend under the orderly procedure to have a vote on the amendment at that time.

We have altered the procedure to allow debate to come at this time by unanimous consent. It is my understanding that the vote would not come until prior to the vote on the Hatfield amendment itself.

The PRESIDING OFFICER. The Chair wishes to point out that if the procedure suggested by the Senator from Oklahoma is adhered to, it could foreclose the offering of any other amendment except by unanimous consent.

Mr. HATFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATFIELD. Mr. President, would the Chair clarify the matter as to the original unanimous-consent request made this morning by the distinguished Senator from Oklahoma when he asked for unanimous consent to bring his amendment up at this time, which did not normally follow the procedures of the Senate.

The PRESIDING OFFICER. The Senator is correct. Also, his unanimous-consent request envisaged that there would be a vote on his amendment at the conclusion of the 1-hour time limitation. The only way to avoid that vote being taken at that time would be by a unanimous-consent request which is now pending and which is objected to.

Mr. GRIFFIN. Mr. President, reserving the right to object, did I understand the statement of the Chair to be that if the request of the Senator from Oklahoma were agreed to, other amendments would be precluded?

The PRESIDING OFFICER. The Senator is correct, unless those amendments offered by Senators received a unanimous-consent agreement that they be considered out of turn.

Mr. GRIFFIN. Mr. President, without going into the merits, I think the rights of other Senators would be prejudiced if I did not object. Therefore, I do object.

The PRESIDING OFFICER. Objection is heard.

Mr. HARRIS. Mr. President, I ask unanimous consent that the Senate agree to exactly the same request as before without prejudicing the rights of other Senators to offer amendments. I asked for my unanimous-consent request as a courtesy to other Senators.

The PRESIDING OFFICER. I take it that the Senator's request is that his amendment not be voted on until immediately prior to the vote on the Hatfield amendment and further he makes a unanimous-consent request that other Senators be permitted to offer amendments if they so desire with the time limitation of 1 hour with the votes to be taken as they occur.

Mr. HARRIS. No. Leaving the present situation, however, it would be with respect to other amendments, I am not saying how they should be, but just the unanimous-consent request that I propose.

Mr. ALLOTT. Mr. President, reserving the right to object, I would like to propose a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ALLOTT. Mr. President, assuming that the unanimous-consent request of the Senator from Oklahoma were granted, would it be necessary then for each successive offerer of an amendment to get unanimous consent to have his amendment voted on just prior to the Hatfield-Goldwater amendment?

The PRESIDING OFFICER. The Chair understands the unanimous-consent request of the Senator from Oklahoma to be, and he takes it to mean that, he asked for a postponement by unanimous consent of a vote on his amendment, which would otherwise have occurred at the expiration of 1 hour, until immediately preceding the vote on the amendment of the Senator from Oregon. Encompassed in his unanimous-consent request also is that other Senators, if they so desire, be permitted to offer their amendments which would be considered under the normal course of business, with a 1-hour time limitation, with the votes to be taken on the amendments, when offered by such Senators, after the expiration of that hour.

Mr. HARRIS. Mr. President, all this is occasioned by some confusion which arose earlier that the amendment would not be offered until the appropriate time in the proposal of the Senator from Oregon. I asked unanimous consent to debate my amendment at this time. It was my understanding that the vote would occur later.

It is now my understanding that without asking unanimous consent the vote would occur now. That was not my understanding and I do not believe it was the understanding of Senators at the time we received consent to bring up my amendment.

Mr. ALLOTT. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ALLOTT. Mr. President, in the event one or two amendments were brought up under the unanimous-consent request just proposed, in what order would they take precedence for voting? To put it another way, my concern is that there might be an amendment offered subsequent which is inconsistent with the present amendment and ought to be offered subsequent to the present amendment, and perhaps voted on subsequent to the present amendment. But that would be impossible without a unanimous-consent request.

The PRESIDING OFFICER. The Senator is correct.

Mr. ALLOTT. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HARRIS. Mr. President, I ask unanimous consent that my amendment may be withdrawn without prejudice to having it offered at a later time.

The PRESIDING OFFICER. The amendment can be withdrawn because the yeas and nays have not been ordered.

Mr. HARRIS. I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Who yields time?

Mr. BROOKE. Mr. President, I ask unanimous consent that I may send to the desk an amendment to amendment 844 to H.R. 17123, and I ask unanimous consent that that amendment may be called up at this time.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Mr. President, reserving the right to object, I wish to ask what the amendment is.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time does the Senator make that request?

Mr. GRIFFIN. I request that the time be taken equally.

The PRESIDING OFFICER. Is there objection? The Chair hears no objection, and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BROOKE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, reserving the right to object to the request of the Senator from Massachusetts—and I do not expect to object—what is the parliamentary situation? Why is it necessary to get unanimous consent for a Senator who wants to call up an amendment or to offer an amendment already submitted? I thought the agreement permitted that, with 1 hour divided each way. I thought that was the original unanimous-consent request the other day.

The PRESIDING OFFICER (Mr. McINTYRE). In answer to the question of the Senator from Mississippi, under the precedents of the Senate, when an amendment is under controlled time, an amendment offered to it is not in order until all of the controlled time under the pending amendment has expired.

Mr. STENNIS. Mr. President, I have no objection to the Senator offering his amendment, but I observe that this could go on ad infinitum; and I would hope no one would offer an amendment of substance that had not been presented already. To me the substance of this amendment is a total surprise, but I do not object.

The PRESIDING OFFICER. Without objection, the Senator from Massachusetts is permitted to offer his amendment, which the clerk will state.

Mr. BROOKE. Mr. President, I send the amendment to the desk and ask that it be stated.

Mr. HATFIELD. Mr. President, who has control of the time?

The PRESIDING OFFICER. The Parliamentarian informs the Chair that time is to be controlled by the Senator from Massachusetts and the Senator from Oregon, if he is opposed to the amendment; and if he is not, by the Senator from Mississippi.

Mr. BROOKE. One hour between the opponent and the proponent.

Mr. HATFIELD. Mr. President, I do not expect to oppose the amendment, so I would not control the time.

Mr. STENNIS. I will oppose the amendment.

The PRESIDING OFFICER. The Senator from Mississippi will have 30 minutes, and the Senator from Massachusetts will have 30 minutes.

The amendment of the Senator from Massachusetts will be stated.

The assistant legislative clerk read as follows:

On page 11 of amendment 844, strike out all after line 6 down to and including line 17 and insert the following:

"(c) The Secretary concerned will accept original enlistments in the Regular Army, Regular Air Force, Regular Marine Corps, or Regular Coast Guard, as the case may be (1) male persons for the duration of their minority or for a period of two years, and (2) of female persons for a period of two years.

The Secretary concerned may accept an extension of an original enlistment in the case of any person for a specified period longer than two years, but not more than four years, where the cost of special education or training to be afforded such person would make a shorter enlistment period impractical."

Mr. BROOKE. Mr. President, I rise to offer an amendment and to support the amendment offered by my distinguished colleagues, the Senator from Oregon (Mr. HATFIELD) and the Senator from Arizona (Mr. GOLDWATER).

I have long been an advocate of a volunteer army. I continue to see no justice and little wisdom in our present system which demands more of one man than it does of another—simply on the basis of chance.

The draft has been referred to as a "patriotic tax." Young men who are drafted, or induced to volunteer because of the draft, are assured of 2 years of low pay, and in many cases exposure to danger, casualties, and death. It is my belief that this tax should be shared—not in its present negative way, where the country loses in overall productivity, but in a positive way where all citizens will bear a share of the cost of providing our Armed Forces with better motivated, better trained, and better compensated servicemen.

Changes which have been made in the Selective Service System within the last year have distributed the element of chance more evenly throughout the range of potential inductees, but these changes have not, on the whole, served to produce a better system.

Opponents of the pending amendment have argued that we will not be able to meet our manpower needs if the Selective Service System is "terminated" under this amendment. They say that the national security will be in jeopardy at a time when our country is still involved in the conflict in Southeast Asia.

This patently is not the case, nor is it the purpose of the amendment as I understand it. The Hatfield-Goldwater amendment specifically provides, in its first operative section, for continued registration in the event that it becomes necessary to continue conscription past the natural expiration date of the 1967 Selective Service Act; that is, past July 1, 1971. In its second operative section the amendment provides that if "the President determines that the military manpower needs of the Nation are not being adequately met through a voluntary system," he "shall submit to the Congress such recommendations for legislation as he deems necessary."

The draft expires on July 1, 1971. If national security requires its continuation beyond that date—and this determination can be made through the course of hearings before the Armed Services Committee in the spring and summer of next year—then I feel certain that the Congress will support its continuation.

Opponents of the pending amendment also argue that the costs of its enactment will be more than the budget can accommodate in the forthcoming fiscal year. Yet at the same time, the Department of Defense proposes that "the more prudent course of action would be to test the effects of pay increases prior to ending the draft." I respectfully suggest, Mr. President, that this is exactly what the pending amendment proposes to do.

The initial budgetary cost of providing an all-volunteer armed force will, of course, be higher than the amount presently budgeted for salaries and benefits in the military service. Cost estimates range from $2 billion to $4 billion per year. But the Gates Commission report, on which this amendment is based, estimates that more than half a billion of this amount would be recouped directly in personal income taxes. Additional millions more would be recovered in the form of increased productivity on the part of men who were not drafted and thereby contributed to society through their regular occupations, and contributed higher taxes as well. More millions would be recovered through the administration of a more efficient military service, with a lower turnover rate and higher motivation on the part of the volunteers. These figures do not appear in budget estimates, but they are essential to a healthy and free economy. And they will help measurably—they may in fact equal—any proposed budget increase.

In the material which has come to my attention, certain administrative problems have been raised as arguments against enactment of the pending legislation without the benefit of full Senate hearings. According to some calculations, strict application of the pay scales contained in the amendment would result in pay inversions between certain ranks. It is my understanding that the Senator from Oregon has now included in the RECORD a detailed pay scale showing his original intent, and making clear that the inversion problem would not occur.

Arguments have also been raised against increased pay for physicians, dentists, and veterinarians, on the ground that higher pay for persons in these categories is not an incentive in attracting volunteers or increasing retention. In my judgment, we will not know until we try, if this particular system will work. But I do know, from correspondence with many of my constituents, that an increased pay scale would be an inducement to lawyers serving in the Armed Forces in the Judge Advocates Corps.

I would like to ask my colleague at this time whether any thought has been given in his amendment to including these professional men—who serve their country well and whose services are increasingly in demand as changes occur in our system of military justice.

Mr. HATFIELD. Mr. President, I shall be happy to reply to my colleague from Massachusetts. On page 7 of our amendment we have a list of special pay for physicians, dentists, and veterinarians, and an increase in special pay for physicians and dentists. We not only believe that will provide better pay, but there is also provided scholarship support in order to induce some to go into the field of the healing arts, medicine in general, in order to provide the kind of manpower for our services that is needed. So we provide for this consideration in our amendment.

Mr. BROOKE. Some question has also been raised as to how the distinction can be made between "hostile fire pay" and "combat pay." It is my understanding that this particular change was originally recommended by the Gates Commission to include within the increased pay scale men serving, for example, in "secure" areas of Vietnam where they nevertheless encounter considerable personal risk. Perhaps, as the Department of Defense argues, the distinction cannot be made; perhaps, therefore, all men sent to hostile areas should receive the same hazardous duty compensations. I would welcome my colleague's comments on this suggestion as well.

Mr. HATFIELD. Mr. President, I am happy to respond to my colleague's question, because this question has been raised frequently not only by those who have been in Vietnam but in other wars as well. I recall in World War II this question was raised frequently by those who received what we called overseas pay, whether or not they were in a tub 3 miles outside the so-called continental limits of the United States or were actually in a war zone.

Of course, all this would be subject to detailed implementation and recommendation by the Secretary of Defense. This is covered under sections 608 and 310, in which we attempt to delineate hostile fire pay, in which a person is actually under fire and is actually in an area which has war activity going on, as contrasted to those who may be in some kind of rear station, supplemental or auxiliary activity which is not in the danger zone.

So we have raised the designated hostile fire pay $200 as contrasted with duty in what is generally called a combat zone.

The Senator will know from his own experience in World War II that the whole Pacific was called a combat zone, but every area of the Pacific was not actually engaged in hostile action or warfare, island by island or area by area.

So we are trying to delineate the distinction between what is actually a war zone, by calling it hostile fire activity as against a place where a man is in no such danger.

It is not always going to be easy to draw the line of delineation, but it is an attempt to make a distinction between a hostile fire area and a so-called war zone. It will be up to the Secretary of Defense to work out the fine points and the definition that will be necessary under the new concept.

Mr. BROOKE. I thank the Senator.

On one final point, Mr. President, I have some questions about the feasibility of determining, at the time a man enlists, whether or what kind of special training he will be given. As I understand it, the pending amendment bases a man's term of enlistment on that factor. Such a requirement would pose many administrative problems, for the determination cannot always be made at the level of the local recruiting office at the time of enlistment.

The amendment which I propose would provide for initial 2-year enlistments—or for the duration of the minority—in all

cases, with the proviso that once enlisted and offered special training or education, an enlistee has the option of accepting such training and simultaneously extending his tour for a specified time, or of rejecting such training and service and serving only his original enlistment period.

I would appreciate the comments of the Senator from Oregon on this proposal.

Mr. HATFIELD. Mr. President, I am very grateful to my colleague and good friend the Senator from Massachusetts (Mr. BROOKE) for providing us with this clarifying language, because I think he actually improves the language of the bill, which was certainly within the intent and the hope of the original sponsors of the amendment, that it would accomplish the objective which the Senator has stated this morning.

I believe the Senator's language is an improvement, and we would, therefore, accept this amendment without any objection, and express appreciation to him for helping us on this particular section, which is a very difficult section to really put down in specific language, based upon a number of reasons, among them the precedent of the armed services, in the past, requiring young men, many times, or inducing them, to sign up for another hitch, as we called it in the Navy, or another tour of duty.

The PRESIDING OFFICER. The time of the Senator from Massachusetts has expired. He has 20 minutes remaining.

Mr. BROOKE. Mr. President, I yield myself 5 additional minutes.

Mr. HATFIELD. That kind of false inducement, or it might be called unfair inducement, would not be as easily accomplished, even if it were within the intent to do so, under this new language. Consequently, we feel that this language improves the amendment, and again express our gratitude to the Senator from Massachusetts for his contribution.

Mr. BROOKE. I thank the Senator from Oregon.

Mr. President, as a member of the Armed Services Committee it is with some reluctance that I advocate the adoption of a procedure which circumvents the committee system. In all honesty, I would have preferred full hearings. I have been urging such hearings for almost a year, and I understand and accept the many factors which have intervened to delay the scheduling of these hearings.

But Mr. President, we have before us a sound amendment, based on the most thorough and intensive study ever made of the Selective Service System. We have an amendment which can accomplish the goal of a volunteer armed service, and will implement the higher pay and benefit scales which we all know our servicemen need and merit. We have an amendment which will not in any way endanger national security, and whose implementation is feasible from an economic and an administrative point of view.

In view of the inequities and injustices of the present system, keeping in mind the undue hardship and personal turmoil which the system has visited on many of our finest young men, I urge the prompt enactment of the pending amendment.

Mr. President, I also urge the prompt enactment of the Hatfield-Goldwater amendment, and I commend my distinguished colleague from Oregon and my distinguished colleague from Arizona for their great service in this very important area.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. THURMOND. I ask unanimous consent that the time be divided equally.

The PRESIDING OFFICER. Is there objection?

Mr. BROOKE. Mr. President, reserving the right to object——

Mr. THURMOND. Mr. President, I withdraw the unanimous-consent request and suggest the absence of a quorum.

The PRESIDING OFFICER. The Parliamentarian states that the Senator cannot do that unless the time is charged to someone or it is agreed by unanimous consent that it not be charged to either side.

Mr. THURMOND. I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. STENNIS. Mr. President, will the Senator yield me 3 minutes for the purpose of asking a question?

Mr. BROOKE. The Senator has 30 minutes, I believe, but I would be pleased to yield.

Mr. STENNIS. Mr. President, I yield myself 5 minutes. I want to engage the Senator from Massachusetts in colloquy.

I address this question to the Senator from Massachusetts: On page 11, line 7, of the Hatfield amendment, the Senator would propose in his amendment to change the word "may" to "will." Is that correct?

Mr. BROOKE. That is correct.

Mr. STENNIS. Line 7 would then read:

The Secretary concerned will accept original enlistments in the regular army . . .

My question is this: The word "will" is a mandate, but does the Senator intend to waive or affect in any way the qualifications of these people who are coming into the services?

Mr. BROOKE. Absolutely not.

Mr. STENNIS. So the mandate of the word "will" and this acceptance has nothing to do with the Secretary's power and discretion with reference to passing on the qualifications of any individual. Is that correct?

Mr. BROOKE. The Senator is correct.

Mr. STENNIS. And the Senator from Massachusetts wants to make firm and clear legislative history that that is the situation.

Mr. BROOKE. That is correct.

Mr. STENNIS. Addressing my question now to line 12, the Senator proposes to add the words "an extension of the original enlistment." The same questions apply there—that this in no way affects the discretion and the power of the Secretary, which is absolute, to pass upon the qualifications of any person or persons in question.

Mr. BROOKE. The Secretary of Defense has sole discretion under the circumstances.

Mr. STENNIS. And this amendment would in no way impair it?

Mr. BROOKE. No, it would not.

Mr. STENNIS. I thank the Senator.

Mr. President, I yield back the unused part of the 5 minutes.

Mr. BROOKE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

Mr. HATFIELD. Mr. President, I should like to modify my amendment at this time to incorporate the language as indicated by the Senator from Massachusetts (Mr. BROOKE) in his amendment.

The PRESIDING OFFICER. The Senator has that right.

The clerk will state the portion of amendment 844 as now modified.

The assistant legislative clerk read as follows: On page 11, line 7, strike out "may" and insert "will."

On page 11, line 12, after the word "accept," insert "an extension of."

The PRESIDING OFFICER. The amendment is so modified.

Mr. BROOKE. Mr. President, I thank the distinguished Senator from Oregon and the distinguished chairman of the Armed Services Committee for the clarification of the powers of the Secretary of Defense under the proposed amendment.

The PRESIDING OFFICER. The amendment has been modified. Time is now running on the Hatfield amendment. Who yields time?

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Mr. President, reserving the right to object, this, of course, will be a brief quorum.

Mr. HATFIELD. A very brief quorum.

Mr. STENNIS. I have no objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GURNEY. Mr. President, will the Senator from Oregon yield to me?

Mr. HATFIELD. I am very happy to yield 15 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized for 15 minutes.

Mr. GURNEY. Mr. President, I support the amendment offered by the distinguished Senator from Oregon (Mr. HATFIELD), calling for the creation of an all-volunteer military.

The present draft system, Mr. President, is universally recognized as inequitable and unfair. We have attempted to cure some of these inequities by the institution of a lottery system, but that measure was really a stopgap. It is certainly better than the old draft but it is still inadequate.

The present system is inefficient: It squanders manpower. We take lawyers, doctors, engineers, professionally trained people out of the labor market for 2 years. The first year is spent in training. The second year is spent preparing to muster them out. We do not take advantage of their educational background—professionally trained people are given menial tasks and put on make-work projects.

Mr. President, in connection with that, my brother-in-law, an able doctor, spent most of his time during World War II inspecting health conditions on ships. Thus, his medical training actually was entirely wasted. That is frequently the case, even today.

The men are not able to go directly to their professional tasks because prospective employers know the draft is hanging over them and are reluctant to invest time and money and training in a man who can, on a moment's notice, be snatched away by the military for a 2-year hitch.

The present system has been responsible for much of the unrest on our campuses.

The present system costs a great deal and returns little benefit to the taxpayer for that expenditure. A volunteer military would be cheaper: People would be easier to recruit.

The present pay in the military, I think we can all agree, is pitifully low. No one joins the Army to get rich but under the Gates Commission proposals, we can at least promise that future volunteer enlistees will receive an adequate income commensurate with their responsibility. The reform of the pay schedules for the military is part and parcel of the plan for an all-volunteer Army. We can and should make the pay in an all-volunteer service sufficient to attract capable men.

One of the very encouraging things about the idea is that it has wide bipartisan support from all sections of the country, from the whole spectrum of political thought. It is, of course, sponsored by Mr. HATFIELD and cosponsored by Mr. GOLDWATER, Mr. STEVENS, Mr. DOLE, Mr. PACKWOOD, Mr. PROXMIRE, Mr. SCHWEIKER, Mr. SCOTT. It is supported by a number of groups, both conservative and liberal.

We have traditionally raised our armies on a voluntary basis. The draft has been a departure from that tradition. As Prof. Milton Friedman of the University of Chicago said recently:

> It is fundamentally incompatible that a society of free men to have a system under which people are compelled to render specific services at penalty of incarceration and of imprisonment than it is perfectly feasible, perfectly possible to hire those services on the open market to get voluntary arrangements that will serve that purpose.

The Gates Commission makes the point that in 1965 there were 1,250,000 men serving in the Armed Forces beyond their first term of service—men who had volunteered notwithstanding the low pay and lack of benefits. That figure does not include first-term enlistments. We estimate that we will need a standing military of 2 to 2½ million men to fill our current and projected military manpower needs. We already have a substantial base. As the Gates Commission report says:

> A fully Volunteer Force of 2.5 million men can be achieved by improving pay and conditions in service sufficiently to induce approximately 75,000 additional young men to enlist each year.

In short, Mr. President, the time has come for this idea; the time for us to act upon it. We should let the present draft law expire at the end of its term in June 1971. We should replace it with a volunteer system. It is practical; it is economically feasible; it is the efficient way to meet our military personnel needs. It is entirely in keeping with our traditions of freedom of choice, freedom from coercion, of free men in the service of freedom.

In the recent past, we have seen a decline in the respect of the public for the military. This is unfortunate and unfair in many ways. A volunteer system, in my view, will revitalize the military, restore much of its tarnished dignity. The military life is an honorable calling. We have it in our power to keep it that way—the volunteer military is the best way to that goal. As my distinguished colleague, the senior Senator from Oregon, said recently:

> Navy Magazine talked about personnel turbulence upon occasion, which they indicated was the single most important problem they faced as a military organization, because of the high rate of turnover they found was part of their problem. I would say today that the prestige of the military is greatly called into question and I think it is unfairly attacked from many quarters. I decry those who use the military as the scapegoat for many of their differences about political issues or political policies. I think one of the things we can do most significantly of all is to restore the military as the rightful arm of the defense of this nation. And to establish it on a voluntary basis. I think by removing one of the most important of all the targets of attack, mainly the draft, we could do the most to reestablish the rightful prestige the military should have in our country. I reject totally those who fear the military eliteism which a so-called professional mercenary army, they like to phrase it, would bring about. I reject that not upon an opinion only but upon the history of this country, upon the Constitution the way this Constitution guarantees our civilian control.

Mr. President, let me finish by saying that everyone, from the administration on down, seems to believe we ought to have a voluntary Army. Very few are in disagreement on this.

The only thing they say is that now is not the time and that we ought to wait until tomorrow, next month, or next year.

I think that if we agree to the pending amendment, we will find out in a hurry whether it will work or not. I think that we will probably investigate the whole situation in depth through the appropriate committees, not only in this body, but also in the other body. I think that we will soon find out whether it will work.

If everyone thinks it is a good idea, then let us get on with the job, institute and implement it, and find out whether it will work.

I think it is fair to say that most of us who had some experience with the Government in the Congress of the United States are often imbued with the idea that Government could be a lot more efficient if it were a lot less laden with numbers and a lot less unwieldy. I suppose that the biggest part of the Government—the Defense Department and the Armed Forces—is subject to that same area of bigness and unwieldiness.

I think that if the abolishment of the draft and the institution of a volunteer Army accomplishes anything, it will make the Department of Defense try to find out how to get along with a volunteer Army. There are all sorts of other advantages, too.

I congratulate my distinguished colleague, the Senator from Oregon, for his authorship of this amendment. I certainly urge the Senate to vote for the amendment. I hope that the amendment is agreed to.

Mr. HATFIELD. Mr. President, I yield 5 minutes to the Senator from Arizona.

AMENDMENT NO. 849

Mr. GOLDWATER. Mr. President, I call up amendment No. 849 proposed by the Senator from California (Mr. MURPHY) and ask that it be made the pending business.

The PRESIDING OFFICER. It requires unanimous consent.

Mr. GOLDWATER. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The legislative clerk read as follows:

> At end of amendment 844, add the following new section:
>
> "SURVIVOR ANNUITY PROGRAM
>
> "SEC. . It is the sense of Congress that the United States should establish as soon as possible, an equitable survivor annuity program for military retirees comparable to the program provided for Federal civilian employees under the civil service retirement system. Congress finds that such an improved annuity plan would be an important and valuable feature that should be incorporated in the voluntary military program established pursuant to this Act."

Mr. GOLDWATER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. Mr. President, would it be in order for me to modify our amendment No. 844 to contain this amendment?

The PRESIDING OFFICER. The Senator from Oregon could modify his amendment so as to accept amendment No. 849.

Mr. GOLDWATER. Mr. President, I ask the Senator from Oregon if he would agree to modify his amendment.

Mr. HATFIELD. Mr. President, I would be very pleased to modify our amendment to incorporate the amendment proposed by the Senator from Arizona (Mr. GOLDWATER) for the Senator from California (Mr. MURPHY). I would also like to have for the RECORD the Senator's presentation on behalf of the amendment.

The PRESIDING OFFICER. Amendment No. 844 is modified by the addition of amendment 849, as previously read.

Mr. HATFIELD. Mr. President, I yield 5 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized for 5 minutes.

Mr. GOLDWATER. Mr. President, it is with a great deal of pleasure that I call amendment No. 849 offered by my good friend, the senior Senator from California (Mr. MURPHY), who is necessarily absent because of official business. As I am a cosponsor of his amendment, he has requested that I call it up for him.

Mr. President, I am particularly pleased to be a cosponsor of this amendment. What it seeks to do is to express the policy of Congress that the United States should establish, as soon as possible, an equitable survivor annuity program for military retirees which is similar to the program provided for civil service employees. The amendment does not at this time propose to fill in the details of this new program. There is a bill pending both in the House and Senate which will do that. In fact, the Senate legislation, which was also introduced by the senior Senator from California, is sponsored by over 20 Senators, including, I am pleased to say, both Senators from Arizona.

The purpose of our amendment is to place Congress on record now in support of the goal of improving the present survivor program for military retirees. The amendment is logically related to the proposal for a voluntary military. In fact, the thought of establishing an all-volunteer, professional military without including an equitable survivor's annuity plan for career military employees is like laying bricks without mortar.

Mr. President, in order to make it absolutely clear that the Secretary of Defense shall add a proper survivor annuity plan to the program of improved benefits that he must develop in moving toward the voluntary military, I urge that the Senate adopt the amendment suggested by the Senator from California.

It is just plain atrocious that, among all other career Federal employees, it is only the military man who cannot leave an adequate annuity for his widow and family. Strangely enough, the military retiree is singled out from all other Government employees and told that none of his retired pay will automatically be passed on to his surviving dependents after he dies. Under present law, the wife of a military retiree who lives after her husband's death will not receive 1 cent of his military retirement income. In contrast, every other Federal employee is guaranteed by law that his surviving spouse will automatically receive 55 percent of his retired pay.

The truly disturbing thing about this is that the serviceman contributes just as much to his retired pay as his civilian counterpart does. It is no secret that the base pay of a serviceman has been reduced by a hidden tax which supports his own retirement. The Hubbell study group recently concluded that this prearranged deduction amounts to 6.5 percent. Therefore, the only difference between the contribution paid by the civilian worker and that paid by the military employee is that the one paid by the civilian is a visible deduction from his salary.

What is more, the Government matches the retirement contribution made by the civil servant. It does not do this in the case of the military man.

Furthermore, the civilian retiree bases his annuity on his full gross income. A serviceman bases his retired pay only on 60 percent of his total military compensation.

Regardless of any bureaucratic gobbledy-gook to the contrary, the plain fact is that in almost every instance the military retiree is simply unable to leave a respectful survivor annuity for his widow and children.

The comment expressed by the Fleet Reserve Association that "a man can serve his entire adult life in the Armed Forces, retire, die shortly thereafter—and leave his widow and children virtually destitute" is all too true.

His survivors could collect social security benefits. But remember that the social security payments will have been separately earned and paid for. And, as everyone knows, social security is merely intended to be a supplement to a worker's retirement income, not a full pension in and of itself. In fact, the Labor Department has calculated that the average retired couple's social security benefits cover less than one-third of the minimum budget needed to finance a decent living standard for that family. So if anyone tells us that the retired serviceman's widow and children can live off of social security, this is like telling them to live off of air.

Also, it is true that the Government has provided a family protection plan. But this plan is so weak that it does not amount to a hill of beans. The Government only pays a very small administrative cost of the program. The result is that the military retiree pays about five times as much as the civilian retiree for an annuity of the same dollar value. The program is so poor that only 15 percent of eligible military men participate in it. On the other hand, over 90 percent of those persons eligible to participate in the civil service survivor program do so. Obviously, the current survivor plan being offered to our servicemen is inadequate and the only remedy is to establish a completely new program. This is exactly what is called for in the amendment introduced by the Senator from California and which I have cosponsored.

Finally, there is a very insignificant survivor payment available from the Veterans' Administration. This widow's pension might go all the way up to a magnificent $74 a month in the case of the surviors of servicemen who die from a nonservice connected disability. Or it may be as low as $17 a month. If the widow is receiving income of more than $2,000 she will be disqualified from receiving any pension at all. And to top it all off, her meager social security benefits will count as income in determining whether or not she qualifies for a VA pension. So if the widow is lucky, and if she does not receive any social security payments, she might receive up to $74 a month from the VA. Compare this, if you will, with the widow of the civilian employee who receives 55 percent of the retired pay her husband was receiving at the time of his death.

Mr. President, it is high time that Congress acted to remove military widows and dependents from the shadow of poverty. The amendment we have offered today will be a solid step in that direction. If our proposal is implemented properly by the Secretary of Defense, who is required to fill in the details of the new survivor plan, it will enable each active duty man, as well as each military retiree, to know that his surviving dependents will be cared for in an honorable and decent way.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. GOLDWATER. I believe I do not have any time remaining.

Mr. HATFIELD. I yield to the Senator from Florida.

Mr. STENNIS. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER. The parliamentary situation is that the Senator from Oregon has 59 minutes remaining and the Senator from Mississippi has 119 minutes remaining. The question is on agreeing to the amendment of the Senator from Oregon as modified.

Mr. STENNIS. Mr. President, I beg the pardon of the Presiding Officer. What has happened with reference to the Murphy amendment as presented by the Senator from Arizona?

The PRESIDING OFFICER. The Senator from Oregon modified his amendment in conformity with the amendment offered by the Senator from Arizona, which was the amendment of the Senator from California.

Several Senators addressed the Chair.

Mr. GURNEY. I think I have been recognized. I believe the Senator from Oregon had yielded to me.

Mr. STENNIS. Mr. President, I wish to be recognized later with reference to the Murphy-Goldwater amendment.

Mr. GURNEY. Mr. President, I wish to associate myself with the amendment offered by the distinguished Senator from California (Mr. MURPHY), and cosponsored by the distinguished Senator from Arizona (Mr. GOLDWATER), which would make it the sense of the Senate to provide annuity benefits to surviving widows of retired military personnel.

It occurs to me this is long overdue. It is grossly unfair that Government employees throughout the U.S. Government should have benefits for surviving

widows with the exception of people in the military. Of all the people employed by the Federal Government it would occur to me that those who serve in the Armed Forces, and certainly their wives, should have annuity benefits, perhaps first and above all others.

This amendment expresses the sense of the Senate that we should come to grips with this matter by proper hearings, implementation, and legislation as soon as possible.

I certainly agree wholeheartedly with the purpose of the amendment which would bring this about.

Mr. President, it is wholly in keeping with the pending Hatfield amendment which is before the Senate in which the sponsors seek to upgrade the military by increasing the pay and making military service more attractive. Certainly a factor that would increase attractiveness of military service, would be to have military personnel know that upon their death their widows would be taken care of. I do hope the Senate agrees to this measure. I yield back whatever time I have remaining.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. GOLDWATER. I would be happy to yield to the Senator, but I do not know what the situation is.

(At this point Mr. STENNIS assumed the chair.)

Mr. HATFIELD. Mr. President, how much time do the two sides have remaining on the amendment?

The PRESIDING OFFICER. The Senator from Oregon has 55 minutes. Senators opposed to the amendment have 119 minutes.

Mr. HATFIELD. Mr. President, may I suggest that some time allocated to the other side be given to the Senator from South Carolina?

Mr. THURMOND. Mr. President, will the Senator from Mississippi yield me 2 minutes?

The PRESIDING OFFICER (Mr. STENNIS). The Senator is glad to yield 2 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, the amendment offered by the distinguished Senator from Arizona, on behalf of himself and the distinguished Senator from California, in my judgment is a good amendment. I think it is fair. I think it is just. I think it is reasonable. I think it is right.

I am sorry he has offered the amendment to the Hatfield amendment, because I cannot support the latter amendment, but I hope the Senator will see fit, if the Hatfield amendment is defeated, to offer the amendment to the bill or in some other form.

It is not right that the wives of military personnel do not get their annuities while the wives of civilian workers do. It is a matter which should have been corrected long ago.

I commend the distinguished Senator from Arizona for offering the proposal, but not to the Hatfield amendment.

Mr. GOLDWATER. I thank the Senator from South Carolina, whose long experience in the military gives him real reason to understand the amendment.

Let me point out, Mr. President, that this amendment is not a bill of particulars. It merely gives instructions to the Secretary of Defense to get along with the job, which is long, long overdue, of changing the retirement regulations under which the military has worked for too long a time. I hope that the amendment, as a part of the Hatfield amendment, will become the law of the land.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER (Mr. THURMOND). Without objection it is so ordered. The absence of a quorum has been suggested, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STENNIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, with reference to the modification of the amendment that the Senator from Oregon has just made concerning the so-called Murphy proposal, as presented by the Senator from Arizona, there must have been some kind of misconception here that I had agreed to that amendment. Not by any means. I do not think the implications of it have been explained or that the costs of it have been explained. Certainly the Senate is entitled to an explanation of the cost, how it will be applied, and what the precedents may be on it.

I knew nothing about this amendment until it was proposed. I believe it was mentioned to me yesterday, but it was not taken up with me. I asked the chief of staff to repair to the committee room and get the necessary figures and facts about it. I am not suggesting anyone has done anything wrong about it. My point is that it ought to have been explained fully, on both sides.

Further, we are in a peculiar situation here in respect to controlled time on amendments. We have a situation in which the author of the pending amendment can alter his own amendment and thereby preclude ordinary legislative consideration of these amendments. I just mention that to say I think we ought to avoid getting boxed in in a manner like that again. It would certainly be my purpose to try to avoid such a situation.

The amendment has already been accepted to this extent. The Senator from Oregon has modified his primary amendment to include these provisions. There is nothing I can do about that now. I just do not want to be bound in any way by its terms. I want to get the facts developed, and I shall be willing to grant whatever justice there is in that situation, as anyone else will, I think. I do know that the cost of retirement benefits in the military is running well over $2 billion a year now, and the cost is heading upward very rapidly. That is a matter that has to be considered along with proposed pay increases, even the one proposed under the one before us.

So I just want the record clear that the amendment was not considered on the floor in the usual way and that I cannot approve it. I conclude my remarks on that subject in that way.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Out of whose time?

Mr. STENNIS. Out of the time of the opposition to the amendment, with the understanding that we can withdraw the quorum call on request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STENNIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, I yield 10 minutes to the Senator from Texas.

Mr. TOWER. Mr. President, I shall vote against the pending Hatfield-Goldwater amendment which would implement the recommendations of the President's Commission on an All-Volunteer Force, commonly referred to as the Gate's Commission.

I take this action with a sense of great reluctance. For many years I have supported the concept of an all-volunteer army. In my opinion, the arguments in favor of moving toward an all-volunteer system far outweigh the arguments against taking such action.

However, whether or not one supports the concept of the volunteer army does not seem to be the most important criteria in considering the pending Goldwater-Hatfield amendment. The support for an all-volunteer system in the Senate seems to be almost unanimous; in fact, in this entire debate I do not believe that more than a handful of Senators have expressed opposition to the volunteer concept.

The questionable aspect of this amendment seems to center around the date of implementation for instituting a volunteer army. On this point I must seriously disagree with the proponents of the amendment and the findings of the Gate's Commission.

I could not agree more with the arguments presented by the distinguished Senator from Arizona (Mr. GOLDWATER) and the distinguished Senator from Oregon (Mr. HATFIELD) with regard to the need to update the pay scale for those Americans who defend this country. It is essential that members of the armed services receive compensation which would compare favorably with that which they would otherwise receive had they remained in the civilian sector. I believe that the chairman of the Armed Services Committee, the able floor manager of this bill (Mr. STENNIS) has, through the course of this debate, made reference to the necessity of removing the inequities of the present pay scale.

While this action must remain one of the main considerations of our debate, I do not believe that it alone will allow us to implement an all-volunteer force at this time. Although I sincerely believe the Gate's Commission has provided a service to all those concerned with this

issue, I must respectfully question its recommendation concerning a July 1, 1971, date of implementation.

The Gate's Commission stated that the armed services contains over 2 million volunteers. This includes personnel that have reenlisted after their normal 2 years of service. In addition, it includes personnel that would have volunteered had they not been drafted. I do not question these figures, even though the Gate's Commission admits they represent only estimates. What I must question is the ability of an all-volunteer force to maintain our current projected needs while the President is attempting to extricate American ground and support troops from Southeast Asia.

Mr. President, the Army is now receiving 500 volunteers a month for infantry duty. The Department of Defense estimates that our current needs for general infantry duty are 3,600 men a month. It seems apparent to me that it is the draft, and the draft alone, which fills this void in infantry manpower.

Mr. President, as a strong believer in the rights of the individual to remain aloof from control by any central government, I will welcome the institution of an all-volunteer force when it becomes feasible. However, under present circumstances, when this Nation is involved in military action which will achieve in my opinion, a lasting peace in Southeast Asia. I must take the view that the institution of an all-volunteer army might jeopardize the overall objectives of the administration. I realize that this is a nonpartisan debate and that many supporters of the administration's policies in Southeast Asia are also proponents of this amendment. I respect the views of my colleagues who have given the Senate an excellent opportunity to study this question. However, I must oppose this amendment for the reasons I have stated above.

Mr. President, the distinguished Chairman of the Armed Services Committee, the Senator from Mississippi (Mr. STENNIS), has already stated that once the Senate finishes business on the Military Procurement bill, the Armed Services Committee will take up the matter of extending the Selective Service Act which expires next year. When the committee holds hearings on Selective Service extension, it will also study the questions involving the transition to an all-volunteer force. As a member of the Armed Services Committee, I look forward to an extensive review of this Nation's overall military manpower needs and the best way to achieve those needs. I am sure that the committee will have the opportunity to hear the views of my two distinguished colleagues, Senator GOLDWATER and Senator HATFIELD, who have so ably argued in favor of this amendment.

In closing, I would like to point out, as so many have done in this debate thus far, that President Nixon is one of the leading supporters of the volunteer army concept. I am convinced that he is implementing policies which will eventually make such a system feasible. After consultation with various officials in the Defense Department, I am convinced that they are both advocating and implementing policies which will make the transition to an all-volunteer system much easier.

I would like to give the administration an opportunity to continue their plans to decrease draft calls and gradually move toward a volunteer system. I believe that this is preferable to the amendment in question and it is for this reason that I urge my colleagues to defeat this amendment.

I might note further, Mr. President, that I think the Senate does very little to improve its image with the general citizenry when it attempts on the Senate floor to draft legislation so sweeping in character and so significant and to offer it to a pending bill as an amendment.

As I have noted earlier, we all subscribe to the concept of a volunteer Army—of, indeed, having all our services filled with volunteers; and I note that the professional military leaders of all the armed services would prefer to have volunteers—professional soldiers, sailors, airmen, marines.

The fact is that we have not yet held hearings on the Gates Commission report. We have not had any opportunity for extensive consideration of the matter that is before the Senate in the form of the Hatfield-Goldwater amendment.

I think we would be less than responsible if, in the course of a few minutes or hours of debate on the Senate floor, we attempted to adopt legislation so significant in character and, indeed, I must say, radical in character.

Therefore, I am very hopeful that this amendment will be laid aside, particularly based on the promise made by the chairman of the Armed Services Committee that the matter will get a full airing before the committee and that we will have an opportunity to actually deliberate on it. This is supposed to be the greatest deliberative body in the world. We cannot deliberate on a major issue of this kind in the course of one day, with a half dozen Senators on the floor.

So I think it is imperative that this matter go back to the committee and that the committee be given the opportunity to consider it.

Mr. STENNIS. Mr. President, will the Senator yield for a question?

Mr. TOWER. I yield to the distinguished Senator from Mississippi.

Mr. STENNIS. I heard some of the Senator's points, although I did not hear all of his statement. I got the full import of his position and some of his reasons.

I refer the Senator to a letter from the White House, dated August 21, 1970. It is signed by Mr. William E. Timmons, assistant to the President. He says that it is written at the direct instruction or request of the President.

The President has come out flatly against the amendment. He is not against its substance. He still is for the goal of a voluntary army, but to enact it now in the form of an amendment, without hearings, without estimates, without any more information, he comes out in this letter which has been placed in the RECORD 2 or 3 days ago in opposition.

Let me read to the Senator one of the four reasons the President gives:

3. It would add several billions of unplanned increased costs to the fiscal year 1971 budget.

That is the budget we are living in today. It already began on July 1, 1970.

Notice that the President said "several billions." Even the President of the United States does not have an estimate as to what it would cost.

Mr. TOWER. But we are setting a date certain now, when we are not certain what the demands and the requirements will be on military manpower a year hence.

Mr. STENNIS. The Senator is so very correct. The statement by Secretary Laird is as strong as the President's. As I said this morning, the amendment, except for its respectable sponsors and other Senators here, has no parallel—no one willing to call it their child, no one to sponsor it except some of the Senators here in the Chamber.

The President is not in favor of it. The Department of Defense is not in favor of it. The Budget Bureau is not in favor of it. They have not even had the opportunity to make an estimate as to what it would cost.

Thus, as the Senator has already stated, we are now considering a proposal, which has sort of grown out of the floor of the Senate, to make a basic change in policy, one, with all due deference, that I do not believe can be carried out. It will do just one thing; namely, create hope in the minds of the mothers and fathers and the young people who are subject to the present situation in selective service.

I commend the Senator from Texas very warmly and strongly for his very fine statement and his position on the amendment.

Let me point out one other thing to the Senator. Whatever the merits of the volunteer army may be, they lie in the future but not during a fighting war which is still going on, with 406,000 men in uniform, fighting a ground war. Plans are being carried out, and rather well, to withdraw those troops. We hope that it will work out, but we are a long way from home base yet.

Mr. TOWER. Actually, the withdrawals amount to maneuverable battalions and their support elements, composed of infantrymen, ground support, artillerymen, and so forth, whatever is necessary to fight a ground war. We do not yet know what will have to be maintained for what period of time in the way of residual logistical air and naval support forces in Vietnam.

We do not know at this time whether we can reasonably project what we can pull out in terms of maneuverable battalions and ground troops. There are still some unknowns involved. Until we advance further toward the time when the projection of 150,000 troops will have been withdrawn next spring, we shall not be able with any reasonable degree of certainty to estimate what our manpower needs will be.

Mr. STENNIS. The Senator is correct. During a war when we have to have the Selective Service Act——

Mr. TOWER. Absolutely.

Mr. STENNIS. And all the rest, to see the war all the way through.

Mr. TOWER. We have had it in every war in the century we have been engaged in.

Mr. STENNIS. So far as total repeal is concerned, while we are fighting a war and it is still going on, with Selective Service in effect, it is unheard of and, to me, almost unthinkable. Anyway, 406,000 are still over there. If we shift into a volunteer army concept now, what about the young fellows who will be drafted between now and June 30, 1971? How are they going to feel about it? How are their parents going to feel about it, if we have switched over to another system but continue to pull them in? The manpower requirements have still got to be met between now and then, in one way or another. How are they going to feel, they are already in the service through the draft?

Mr. TOWER. I would imagine that their morale would not be too high. Another point is the possibility that the enemy could misread our intentions. There has been a considerable effort on the part of many people to deflate the military in this country. There has been a great deal of criticism of the so-called military-industrial complex. It may be interpreted by friend and foe alike as another successful effort on the part of those in responsible positions in this country to weaken the military structure and the defense posture of the United States.

This is the wrong point in time to try to consider a measure of this kind, for so many different reasons—budgetary, lack of knowledge of our manpower requirements and what they will be over the next 2 years, the fact that we have not had a chance to deliberate on it, and the fact that the enemy can misread our intentions. There are so many other factors that this matter should have a full airing before the committee before the Senate acts.

Mr. STENNIS. I thank the Senator again for his fine comments.

I mentioned the point of cost. We have no budget estimate. The President refers to in his letter to the "several billions of unplanned increased costs to the fiscal year 1971 budget."

We do have an estimate, at my request, as to the cost of the amendment, and the total is $4.3 billion. That is itemized. It is a solid, conservative figure. It is the lowest figure I have heard from any source. Other estimates run to about $10 billion to $12 billion per year. Many say $7 billion or $8 billion. The Senator is well informed. We are trying to reduce the bill. The committee already cut $1.3 billion. Yet here is an amendment that comes along without any estimate, no hearings, or anything else, to add $4.3 billion as a certainty.

Now in planning the 1972 budget——

The PRESIDING OFFICER (Mr. CASE). The time of the Senator from Mississippi has expired.

Mr. STENNIS. Mr. President, I yield myself 3 additional minutes.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 3 additional minutes.

Mr. STENNIS. Mr. President, does the Senator wish to comment on that again? The 1972 budget is giving us trouble.

Mr. TOWER. Mr. President, I think in the face of the fact that we had originally anticipated a deficit for the fiscal year of $1.3 billion and that it is now going to be many times over that, it seems to me that the psychological effect of adopting a piece of legislation that is virtually certain to cost at least $4 billion additional itself will have not too salubrious effect on the economy of this country. It will feed the inflationary fires.

I think that the timeliness of the amendment is very bad from so many standpoints, the budgetary standpoint being not the least of them.

Mr. STENNIS. Mr. President, I thank the Senator. We are going to see when the roll is called on this amendment that a great many of those who have been critical of the military and have helped to reduce expenditures will, in all good faith, vote against this amendment. They will vote against it because they know that it is not practical, is not possible, is not workable and that it will be a signal, as the Senator has said, all around the world that we are backing up.

Mr. TOWER. Mr. President, I think one further thing to be noted is that in the face of the current criticism of professional militarism, some of those most critical are now advocating an all-volunteer system. I think we will have to have some time when people stop criticizing and start praising the professional military man and start to give him some reason to feel proud of his profession before we start to consider an all-volunteer force.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STENNIS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Mississippi has 18 minutes remaining.

Mr. STENNIS. Mr. President, I yield 10 minutes to the Senator from Colorado.

The PRESIDING OFFICER. The Senator from Colorado is recognized for 10 minutes.

Mr. DOMINICK. Mr. President, I thank my distinguished chairman.

Mr. STENNIS. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. There will be order in the Senate.

Mr. DOMINICK. Mr. President, along with many other Senators, I have been very, very troubled on what to do about this particular amendment.

I have been troubled because for 5 years I have been talking in favor of our need to get an all-volunteer army as soon as we can.

I have been troubled because I think the draft system, no matter how we operate it, when we are drafting less than all of the people, is necessarily inequitable.

Mr. STENNIS. Mr. President, I do not know where the noise is coming from, but would the Chair try to get quiet in the Chamber so that the Senator can be heard?

The PRESIDING OFFICER. The Senator will suspend for a moment. There seems to be a discussion going on in the left-hand side of the Chamber. It has now gotten quiet. The Senator may proceed.

Mr. DOMINICK. Mr. President, I have been troubled because I think we all know in our hearts that we should not and cannot put in any kind of universal service law without escalating the cost as far as the taxpayer and the Government are concerned beyond anything that is presently even possible.

I have been troubled because, knowing all of these things, at the same time we are faced with a military manpower need which almost undoubtedly, in the present context of world affairs, exceeds our ability to provide this manpower through a voluntary army.

I was very interested the other day in listening and then reading the colloquy between the Senator from Mississippi and my colleague, Senator ALLOTT, in which the Senator from Mississippi pledged himself not only to hold hearings on the draft law, but also to include in those hearings what needs to be done with regard to moving toward a voluntary army.

The thing that impressed me even more was the acceptance on the floor of the Senate the other day of an amendment by which the Armed Services Committee was given the power to hold hearings and to set the maximum manpower limits on each branch and component of the armed services.

It seems to me that this finally presents the crux of the problem. As the Senator from Mississippi so aptly said, his estimate of the cost of the Hatfield-Goldwater amendment at the present time is approximately $4.3 billion. I believe the estimate of the Senator from Oregon was in the neighborhood of 3.8 or 3.2 as manpower levels went down. But we do not know what the necessary manpower levels may be. And this is the issue which creates the greatest problem for me. Until we do know what they should be, we are faced with an Executive decision which says that by the first of next year it will be 2.9 at the minimum. Until we know what world affairs are, and are able to determine whether this manpower level is the right one for each branch of the service, we are faced with the 2.9. That means the $4.3 billion expense which the Senator from Mississippi has been talking about.

I said the other day when I took the floor on this same matter to indicate my own difficulty in resolving the issue posed by the Hatfield amendment, that the main problem we have here is in finding the necessary inducements so that we can maintain the branches of our Armed Services at the levels required in the light of present and anticipated world affairs.

Where, for example, are we going to use infantry in the future? Why is it that we have little or no trouble in getting people to volunteer for the Marines, but we have great difficulty in getting any one to volunteer for the light infantry, even though we know historically

that the Marines by and large have suffered more casualties than the infantry? Where will we need the Marines or light infantry? These are all problems which we on the Armed Services Committee must decide in the light of the amendment which has already been accepted. All of these are problems which are involved in our relationship with the rest of the world. And more importantly, all of them involve the method by which we are going to use armed forces if we have to use them—and I certainly hope not—in future engagements.

It seems to me at this point that with these items of crucial importance to our country, the crux of this issue, as I see it, is that to go forward now with a voluntary army without regard to what these manpower levels may be in the future, or may be required to be, is taking a step at this time which is not practical, which is premature, and which simply does not fit the context of our present relationship around the world.

The President has said, and made it crystal clear in the process of his foreign policy announcements, that he will continue the Vietnamization program; that in an era of negotiation we will have a lower silhouette of American involvement around the world; that we will be reducing our own Armed Forces in Korea; that we are going to reach an arrangement with Japan with regard to Okinawa; and that we are going to continue to support NATO. But I would expect that the method by which it will be supported may well be under review again, particularly in view of the rapid rapprochement between the Soviet Union and Germany.

He has been able successfully to date to obtain a cease-fire in the Mideast and at least a start for negotiations—all items which lead toward a more peaceful decade or two decades for the future; all items which should militate toward the ability of the United States to reduce its own forces for the future. But we do not know that yet and we do not know exactly where new fires may break out. We do not know what is going to happen with respect to Cuba. We do not know what is going to happen eventually in the Middle East. It seems to me that until we have a record based on what the best estimates are from intelligence sources, from the administration, the State Department, and a variety of other people, to accept a volunteer army concept at this point would be premature.

So reluctantly—and I say this very reluctantly because I have been one of the foremost speakers on behalf of a volunteer army—I must oppose this amendment at this time. This is not just because of the expense, but of course, that plays a part; but the expense is variable according to what the manpower requirements may be.

It is my understanding, and I wish to ask the Senator from Mississippi this question, that hearings will be held on both the draft and the volunteer army with almost equal time being given to them, some time toward the end of this session and continuing into the beginning of the next session of Congress.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield the Senator 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. STENNIS. What was the timetable the Senator mentioned?

Mr. DOMINICK. Either this session or the beginning of the next session.

Mr. STENNIS. We definitely expect to start hearings on both the volunteer army concept and the selective service extension some time in the calendar year 1970; and have it a going concern when we come back here in January.

I do not want to put a timetable on that, since some fellows are trying to switch the "majorityship" around here. I do not know how that might come out. We have great plans along that line. That is what we expect to do.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. TOWER. If the majority changes, I think those of us of the present minority would be prepared to make the same commitment.

Mr. STENNIS. Mr. President, I wish to commend the distinguished Senator from Colorado for a very fine statement. He touched a keynote when he said the need was manpower. Manpower—that is what it comes down to; the need for the next 12 months and the next fiscal year beyond this one; the manpower requirements.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMINICK. I thank the distinguished Senator from Mississippi.

Mr. STENNIS. I thank the Senator from Colorado for his very fine statements.

Mr. HATFIELD. Mr. President, I yield 10 minutes to the Senator from Kentucky.

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 10 minutes.

Mr. COOK. Mr. President, I have listened to this debate. Some of it has been rather amusing. We are now talking about what it is going to cost us to pay a man a living wage to be in the military service of his country.

We have had items that the military proposed to us in committee, and the distinguished Senator from Texas and the distinguished Senator from Mississippi wanted additional millions and hundreds of millions of dollars for projects; and yet throughout this country the United States has 12,500 men in the military service who are on the welfare rolls of the respective counties and respective States where they are now assigned.

What kind of man is that corporal down in Camp Polk, La., who is supposed to fight for his country, but who is on the welfare rolls because he does not have enough money for his family and children to live.

As far as military expenditures are concerned, for the first time I heard the Senator from Mississippi and the Senator from Texas say it will cost too much money. I never heard them complain about defense costs before.

Mr. TOWER. Mr. President, will the Senator yield? The Senator mentioned the Senator from Texas and the Senator from Mississippi.

Mr. COOK. Mr. President, I would be delighted to give the Senator an opportunity to respond after I finish my remarks. I have listened to him for the last 10 minutes and I would like to finish my remarks.

The PRESIDING OFFICER. The Senator from Kentucky has been recognized.

Mr. COOK. Mr. President, I think this is what we are really talking about. Yes, it will cost a lot of money, but there is nothing wrong with paying a man a living wage, and we are not doing it.

I would like to raise another subject for the committee, which intends to have hearings. I would like to have them conduct hearings on something I think is very important. We have alliances all over the world. Let us take NATO, for instance, Mr. President. The United States has a draft which requires that every man be drafted, starting at age 18, for 2 years.

Among our NATO alliance friends, West Germany has just entered into a treaty with the U.S.S.R. West Germany drafts its young men at the age of 18 to serve for 18 months. Why should we have thousands of Americans in Germany when Germany will not do as much for its country as the young men of this country are asked to do for it?

The United Kingdom has no conscription at all and it drafts no one, but the United Kingdom is a part of NATO.

Norway is a part of NATO. They draft their young men at the age of 20, and they serve for 12 months. If they go into the Army, Navy, or Air Force they serve for 15 months. Italy is a part of NATO. They draft their young men at the age of 20. If they go into the Navy, they serve for 20 months; and if they go into the Army or Air Force they serve for 15 months.

France drafts its young men at the age of 20 and they serve for 16 months. Denmark drafts its young men at the age of 18 and they serve for 14 to 16 months.

It gets rather difficult to say to young men in the United States, "You have to serve in these countries under a NATO treaty and you are called upon to serve longer and to be in that country longer than the young man who is drafted in that country has to serve and defend his own country."

So I would like the committee, if it will, when it holds hearings in the immediate future, to give serious consideration for this great fantastic country of ours—and that is what it is—to say to its allies, "We are willing to help you, but from now on we are going to insist you do with yours as much as we do with ours, or better." I do not think that is asking too much.

Mr. President, let us look at SEATO and the only real ally we have down there, Australia. Australia drafts its

young men at the age of 20 and they serve for 2 years. In the Philippines they draft their young men at the age of 21 and they serve for 3 years. The United Kingdom again, which is a signatory to the SEATO treaty, has no conscription at all. New Zealand drafts its young men at the age of 20 and they serve for 14 weeks full time—14 weeks—and then they put in 30 days part time for the next 3 years.

It is pretty difficult to have allies like that, Mr. President. It is pretty difficult to say to the young men of this country, "It is your responsibility to serve for 2 years starting at age 18, and you may have to spend those 2 years in New Zealand or you may have to spend those 2 years in Denmark, or even in Iceland—which is a member of NATO with no conscription at all."

We may say these countries are absolutely necessary for our defense, and there is no doubt about that, but we are also defending their countries at the same time and they ought to be willing to put up just as much "stuff" as the Congress of the United States asks of its young men in this country.

I might say that the discussion has been that it is too soon to do this. I wonder what happened to the Doolittle report in 1947, when this was first taken up and when the committee was first appointed. Here it is in 1970 and it was back in 1947 when the recommendation was made. I guess it is about time we got to it. We think it is rather slow.

I want to say that this proposal does not create a voluntary army. Anybody in this body who thinks that if this amendment is adopted it will result in a voluntary army either is talking through his hat, has not read the amendment, or does not understand it, because it depends on what Congress does.

If Congress continues the draft next year, then this does not go into effect. If the Congress decides to continue the draft the year after because it is necessary, then it will not go into effect.

So we are not establishing a volunteer army. We are establishing the machinery and the wherewithall to establish it, because when it is ultimately established, if it is not now, this same thing will have to be done.

We are not saying to anybody that the manpower in the military of the United States is going to be decreased in 1971 because this amendment is adopted. The only way it will be done, of course, is if the Congress of the United States itself fails to extend the draft next year.

So we are not establishing a volunteer army today, and if anybody in the audience or in this Chamber thinks so, then he has not read the amendment.

I get back to say it is amazing that we have been called upon, time after time after time, to continue to put more and more and more into the military, except for one thing: When it comes to paying men in the U.S. Army a living wage, then we are told it costs too much.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. COOK. I yield.

Mr. TOWER. Does the Senator from Kentucky contend that the Senator from Mississippi and the Senator from Texas are opposing a raise in military pay?

Mr. COOK. I can only say that I listened to rather strong language about the fact that it was going to cost over $4 billion; that it could not conceivably be afforded; that it was far more than the budget could stand; that the budget would be put in a deficit—as the Senator from Delaware knows the budget is already in a deficit—that it was absolutely untenable to do so.

Mr. TOWER. Does the Senator make the accusation that the Senator from Texas and the Senator from Mississippi would oppose a military pay raise?

Mr. COOK. I have not any idea unless the Senator——

Mr. TOWER. Long before the Senator from Kentucky came to this body the Senator from Mississippi and the Senator from Texas were fighting for pay increases in the military. We were trying to get a recruit paid as much as a Job Corps enrollee was paid. We have been fighting for raises in military pay for a long time. So I will not accept—indeed, I reject—any suggestion that there is opposition on our part to raising military pay. I would like to raise it higher than is proposed now; but we are trying to jump in here, trying to adopt vast and sweeping reforms in one day, with 10 or 12 Senators on the floor, with no hearings and no consideration——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COOK. Mr. President, may I have 5 minutes more?

Mr. HATFIELD. I yield 5 minutes to the Senator.

Mr. TOWER. Mr. President, will the Senator yield me 2 minutes, on my time, to proceed with the colloquy?

Mr. COOK. I am glad to yield.

Mr. TOWER. Is the Senator from Kentucky aware that nobody is on welfare unless he has dependents? Usually these dependents are acquired after the person comes into service. Usually the reason he is on welfare is that he has been "busted" from perhaps a relatively higher rate to a lower rate.

Is the Senator aware that a recruit or seaman recruit with one dependent, along with pay and subsistence, gets $3,026 a year? That, of course, also includes food and he may have Government-provided housing; that he will have access to the commissary, where he gets things at a lower cost?

Is the Senator aware that a recruit or seaman recruit with three or more dependents—and it is an unlikely situation that a recruit or a seaman recruit would have three or more dependents—receives $3,566 a year?

Is the Senator aware that a sergeant first class or chief petty officer with one or more dependents receives $7,207 a year?

That is not as high as I would like to see the pay. I think it must get much higher if we are going to have a volunteer army, but we cannot afford a $4 billion deficit in the budget right now——

The PRESIDING OFFICER. The time of the Senator from Texas has expired.

Mr. TOWER. Mr. President, I ask unanimous consent to enter in the RECORD the figures from which I have been quoting.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ANNUAL BASIC PAY PLUS QUARTERS, PLUS SUBSISTENCE,[1] BY PAY GRADE, YEARS OF SERVICE AND NUMBER OF DEPENDENTS WITH 20 PERCENT INCREASE IN BASIC PAY FOR ENLISTED UNDER 2 YEARS—1972 BASIC PAY RATES

ENLISTED MEMBERS

Pay grade	Title and number of dependents	Years of service													
		Under 2	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26	Over 30

[1] For enlisted personnel, subsistence includes the commuted ration at $1.39 per day for 365 days.

[2] Excludes personal money allowance of $4,000 for Chief of Staff/CNO, $2,200 for general/admiral, and $500 for Lieutenant General/Vice admiral.

Mr. COOK. Mr. President, I must say that I am delighted to have in the record the statistics that a recruit or a seaman recruit with three children would receive $3,560 a year. I have not any vague idea that any person who has a job that he cannot get out of to find a job somewhere else could make a living on $3,560 a year.

Mr. TOWER. That is with food and lodgings.

Mr. COOK. I doubt that he can do it if he is married, has children, and is living off the base. That might be all right down along the Rio Grande, but it is not sufficient in a place like New York or Chicago. A person might be able to live on $3,026 there and not be in uniform and turn down a better job if it were offered to him.

Mr. TOWER. How many recruits or seaman recruits do we know who have that many children?

Mr. COOK. I am delighted with the fact that the Senator has put the figures in the record, because they substantiate the argument we are making.

Mr. HATFIELD. Mr. President, I yield myself 2 minutes.

I may add one other statistic to those that have been put in the record during the colloquy between the Senator from Kentucky and the Senator from Texas, because I am sure both gentlemen are aware that studies have been made on comparative salaries between people in the military and those in civilian life. The President's Commission on an All-Volunteer Armed Force shows that the average enlistee would earn $5,200 in civilian life, whereas the first-term enlistee receives $3,200 total military compensation, which, I may say for the information of the Senator from Texas, does include room, board, and medical expenses.

Further, I think I should point out, on the question of pay, that while pay increased for men with more than 2 years of service between 1948 and 1969, the pay for men with less than 2 years of service increased 60 percent for the same period.

Using the base figure that was used, over 20,000 in the military service are on welfare. I think that, whether or without children, the fact that we have servicemen today receiving welfare compensation certainly should put the Senate to shame for permitting the situation to continue.

I say again, it did not take us very long to raise our own salaries. It should not take us much longer to consider the conditions under which our fighting men and servicemen should have to live, and therefore take the action necessary under this amendment.

Mr. COOK. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. I yield 2 minutes to the Senator from Kentucky.

Mr. COOK. I do not have the exact figure. We have sent out to get them. I would also like the Senate to have in the record the fact that the bill as it has been passed by the House and sent to the Senate containing the new welfare program has a poverty level at something over $3,700 a year. I think it is somewhere between $3,700 and $4,000 as the established poverty level. I have no idea what action this body will take on that bill, but I think it is important to have on the record what the administration itself has established, through the legislation it has submitted to Congress, as the poverty level in the United States.

I would hope that the Senator might have those figures.

Mr. HATFIELD. We will get the figures. But if those figures, as reported by the Senator from Kentucky, are correct, and I have no doubt that they are, I can only say that would really put every first-term enlistee within the poverty class, because that is the figure the first-term enlistee gets now, $3,200, which would be $500 below the poverty line to which the Senator from Kentucky has referred.

Mr. COOK. By the way, I might suggest to the Senator that if that person who goes into the service for 24 months wants to upgrade himself, he has to wait until there is an opening. He has to wait until there is an opportunity. The matter is decided by his superiors, and if he has a better-paying opportunity somewhere else, it is just tough, is it not?

Mr. HATFIELD. The Senator is correct.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield such time as she may require to the Senator from Maine (Mrs. SMITH).

Mrs. SMITH of Maine. Mr. President, a week ago I wrote the President asking for clarification of his position on the Hatfield-Goldwater amendment. Late Friday afternoon after I had left Washington, his reply was delivered to my office.

His reply, relayed by his assistant, Mr. Timmons, was an unequivocally expressed opposition to the amendment.

Because of his expressed wishes, I shall vote against the amendment.

I now read my letter to him and the answer stating his position.

MY DEAR MR. PRESIDENT: On February 25, 1970, I made what is probably the first speech in the Senate in support of your Gates Commission Report recommending the end of the Draft by July 1, 1971. I did so with some misgiving because of the repeated historical failure of the all-voluntary armed force concept.

But I did it on the basis that it was worth a try, especially with the proviso of the Standby Draft plan recommended by the Gates Commission—and I did it because this is one issue on which I am willing to aside my own inclination and support your position.

In the 1968 campaign you committed yourself to abolition of the Draft. You appointed the Gates Commission after taking office and that Commission earlier this year recommended termination of the Draft.

In my February 25, 1970, Senate speech, I stated that I would proceed on this matter at your pleasure and would introduce such legislation as you desired for me to do when you so notified me.

Senators Hatfield and Goldwater have announced that they will offer their Draft Abolition Amendment to the pending Defense Procurement Bill. I have received a copy of Defense Secretary Laird's letter to Chairman Stennis opposing the Hatfield-Goldwater Amendment.

This leaves me perplexed as to specifically what your desire is. While you are committed to abolition of the Draft and while your Gates Commission has recommended abolition of the Draft, your Defense Secretary now opposes the Hatfield-Goldwater Draft Abolition Amendment.

I shall take whatever position you desire me to take on the Hatfield-Goldwater Amendment. But I simply don't know what that position is. I would deeply appreciate your advising me what position you wish me to take on the Hatfield-Goldwater Amendment as soon as possible.

Sincerely yours,

MARGARET CHASE SMITH,
U.S. Senator.

THE WHITE HOUSE,
Washington, D.C., August 21, 1970.

DEAR SENATOR SMITH: Because of his current absence from the city, the President has asked me to thank you for your letter of August 17th regarding the All Volunteer force concept.

President Nixon especially asked that I again express his appreciation for your speech last February 25th in support of the Gates Commission findings and reiterate his firm intention to reduce the draft calls to zero as soon as this worthwhile goal can be reached within the restraint of fiscal responsibility and consistent with the requirements of national security.

The President sent to Congress, four months ago, legislation to begin to achieve the objectives recommended by the Gates Commission. This measure provides for a 20% pay increase for first term enlisted personnel effective January 1971. The President is hopeful this legislation will be enacted this session of Congress. Additional increases in pay and benefits are currently planned for inclusion in the budget for fiscal year 1972. No date, however, has been set for cancelling induction authority because, as he pointed out in his April Message, no one can predict with precision whether or not or precisely when conscription can be ended. Thus, it would be imprudent to set a date when induction authority can be permitted to lapse. While it can be said that the chances of achieving an all-volunteer force improve as we withdraw from Vietnam and reduce the overall size of the armed forces, only actual experience in attracting volunteers will help determine when we cease drafting men, not a preselected arbitrary date.

Amendment 765 to H.R. 17123 apparently contemplates the termination of the draft on June 30, 1971, and would enact a wide range of personnel actions which, it is claimed, would enable us to maintain the armed forces with volunteers after that date. The President is opposed to this amendment for several reasons. First, we cannot be sure that the proposed changes in pay and incentives will attract enough volunteers to permit cancellation of the draft on June 30 of next year. Second, it would enact a host of personnel policy changes without knowledge of their cost and their effectiveness compared with alternative proposals for attracting more volunteers and retaining career personnel. Finally, it would provide no opportunity for the Armed Services Committees to hear the views of the Department of Defense and other interested witnesses for achieving the all-volunteer force. Of serious consideration also, of course, would be the cost of this amendment which would add approximately $4 billion of unplanned increases to the fiscal 1971 budget.

Please be assured that the All Volunteer Force continues to be the President's objective, but he feels that there is a more effective and responsible way to accomplish

this goal than that proposed by the amendment under question.

With highest regards,

Sincerely,

WILLIAM E. TIMMONS,
Assistant to the President.

PROVISION FOR ALL-VOLUNTEER ARMED FORCES

Mr. McGOVERN. The draft is an aberration in America. With the exception of minor use during the Civil War, there was no recourse to the draft in any American war till World War I; it had never been used without a declaration of war until our first peacetime draft in 1940. The Indochina war finally inspired comprehensive investigation of the rationale and consequences of conscription. The conclusion of all the best efforts in this investigation, particularly the Report of the President's Commission on an All-Volunteer Force, is that the national interest requires that the draft be replaced by adequately paid, all-volunteer armed forces.

The draft is inconsistent with our heritage of freedom. Many of our forefathers came to America to escape compulsory military systems in Europe. They recognized conscription as a denial of freedom.

Conscription was originally allowed in America as the sort of temporary measure which a free people will allow only when the state is in grave and unusual danger. But we have since allowed the draft to become an unexamined ongoing assumption of American life. We now face the cruel irony that a nation created by victims of European military despotism has seen more than 40,000 of its sons flee to avoid American conscription.

We do not presume to force service in vital professions such as medicine and education. Rather, we induce entry by providing adequate incentives, both monetary and nonmonetary. The same must be done with military service. In a free society, an individual is supposed to choose his labor. We are born free. An American child is not born with a contracted obligation to accept military service as his labor. This sense imbued the fathers of our liberties. Daniel Webster argued, during the debate on the proposed War of 1812 draft bill:

> Where is it written in the Constitution, in what article or section is it contained, that you may take children from their parents, and parents from their children, and compel them to fight the battles of any war, in which the folly or wickedness of Government may engage it?

The folly of Vietnam has now made gravely clear the folly of the draft in contemporary America. We are witness to the profound and widespread torment of young men forced to fight a war which they believe is immoral. At Nuremburg the United States participated in sentencing as "war criminals" men who refused to resist unjust war. How, then, can we continue in this time of war to coerce the conscience of America's youth?

In time of peace, as well as time of war, the present conscription system also involves the immorality and injustice of forced labor. And it pays the forced laborer an inadequate and unjust wage. The wage in fact is so low that some military personnel are forced to seek welfare and food stamp assistance.

It has been suggested that the pay provision necessary to encourage an all-volunteer Armed Force would be prohibitively expensive. But the Gates Commission has shown conclusively that such is not the case. The Commission carefully calculated that in order to maintain the present level of troops an additional budgetary expenditure of $3.24 billion would be required in fiscal year 1971. Then, of this amount, $540 million would be returned through income taxes on the increased salaries. Thus, the net cost for the first year of operation would be $2.7 billion.

The increased budgetary costs for the all-volunteer system represent the amounts needed to induce the required number of individuals to leave the civilian labor market and enter the military. These increases equal the "tax" which the present inductees are paying by accepting a pay scale only half as high as they would earn in civilian employment. Low military service pay, in effect, forces the conscript to pay a 51-percent tax on his earning ability, more than three times that of his counterpart in the civilian labor force.

The all-volunteer armed force does, of course, represent an increase in budgetary expenditures. But it does not represent an increase in the total cost to the Nation. Under the present system the costs are being paid by the individuals inducted. Under an all-volunteer system the same costs would be paid by the entire Nation. Under the present system half the costs of first term conscripts are borne by these conscripts. And this tax falls quite unevenly. In the first place only about 8 percent of each new group of 19-year-olds are needed to meet the manpower requirements of the Armed Forces. This means that the remaining individuals for one reason or another escape both military service and the unfair pay scales. And it is now well recognized that individuals with greater social and economic advantages are more likely to escape the draft. Thus the draft not only results in an uneven tax, but in a regressive tax which falls most heavily on those least able to afford it.

A most striking feature of the projected change to a volunteer force is that substantial economic savings will in fact result. Conscripts almost never reenlist. After anywhere from 3 to 12 months of training they serve about 1 additional year only to leave the service. This means tremendous waste. The much greater length of service we could expect from volunteer forces would result in savings of $675 million per year in training costs alone.

If we were to institute an all-volunteer force, we could also expect that by 1980, 45 percent of its members would have 4 or more years' experience, as compared with only 31 percent under present arrangements. Thus a volunteer force will be better trained; and the improved individual capacity could be reflected in lower manpower requirements to meet the same needs.

An all-volunteer force would also make more efficient use of its members. The present salary scale understates the actual cost of supplying an individual soldier. By making salary costs more accurately reflect the real costs, there is every reason to believe that manpower will be used much more efficiently.

By making use of civilian personnel in many positions, it might be possible to save as much as $100 million per year in assorted real costs. For instance, by use of lateral recruitment, that is, recruitment of trained personnel into higher ranks, it is possible to make substantial savings on training.

Finally, the change to a voluntary force would mean significant savings to the economy as a whole. The present system typically places an individual capable of performing an $8,000 job into a $4,000 job. The difference of $4,000 is not only lost to that individual, but is also lost to the American economy. This is illustrative of the thousands of economic dislocations and inefficiencies that are perpetrated by the draft.

An especially pervasive and longstanding objection to an all-volunteer force is the notion that it will tend to create a special military ethos and endanger civilian control of the military. But this fear is belied by the historical evidence. Napoleon rode to power on the backs of a conscript army. He did so right after the French Revolution while "Liberté, Equalité, Fraternité" was the universal cry of his conscripts. On the other hand, our own Nation has traditionally relied on voluntary forces. The same is true of Britain. Yet the United States and Britain have the strongest traditions of civilian control of the military. Or again, consider that the Governments of Greece, Cuba, Spain, and Albania all practice conscription while Canada, India, and New Zealand rely solely on volunteer forces. There is simply no basis in fact for supposing that conscription is more compatible with democratic government and that voluntary armies are more compatible with dictatorship and tyranny.

Furthermore, there is no convincing evidence that all-volunteer armies are themselves more antidemocratic than others. The most compelling point to be made in this regard is that even with a conscript force, the career soldiers are the individuals who are in direct control of the military apparatus. The lowest echelons of the military, under a volunteer or conscript force, characteristically have only marginal effect upon military activity and policy. And after all, the only way we can really insure that the military does not destroy freedom in America is for the Congress and the President to act with courage and intelligence to carry out their constitutional responsibilities to control the military.

A related objection to the volunteer force is that it might encourage, or at least more readily permit, foreign adventures such as that in Vietnam. But the historical evidence is again to the contrary. And Vietnam is the most obvious case in point. If service were indeed voluntary and the men could vote with their feet, Vietnam might have been the war where nobody came. Most important, it must be recognized in regard to the Vietnam war that the existence of the draft was one of the primary preconditions for the commitment of troops without prior debate in the Congress of the wisdom of involvement or the size of troop levels. The troop levels were slowly

raised through executive control over the draft. Under a proper volunteer system which would permit a draft only with the approval of Congress, the increased manpower needed to fight a war could not be secured without explicit congressional action to either reintroduce the draft or expand the incentives to recruit more men. In addition, most of the costs for the operation would be contained in the budget and would be open and explicit rather than being partially disguised as through the present tax in kind paid by conscripts. This is of key importance for civilian control over the military. For the key problem has been congressional approval of military budget requests without understanding what was being approved or why.

Contrary to some of the distortions, the voluntary army that is projected is not to be a "mercenary" force. The term "mercenary" applies to the projected voluntary force no more than the same label applies to the vast majority of our officer corps and all the men who remain in the Armed Forces beyond their first term, who are thereby "volunteers." There is no reason in logic or fact to suppose that the American soldier's love of country will suffer because we pay him a decent wage and let him serve by his own choice rather than as a result of the threat of imprisonment. Coercion and fear do not produce love and respect. They produce bitterness and rebellion. As we have learned all too well from the Vietnam disaster, the draft can be wholly destructive of patriotism.

Concern has also been expressed that a voluntary system will result in a severe overrepresentation by blacks and other minority groups in the Armed Forces. But careful analysis by the Gates Commission indicates that there would be less than a 1 percent difference in the racial composition of an all-volunteer force and a mixed force such as we have at present. Indeed—contrast the inequity of the present system. It is a present injustice that the present system forces a disproportionate number of minority individuals into the army to fight and die in Vietnam. If the pay and the status of a military profession is comparably more attractive to the black man, the proper response is to open all other professions equally to the black man. If we accept the obligation to end racism and injustice in America, there will be no problem of disproportionate black representation in the military.

Conscription cannot, of course, be discussed without the ultimate consideration of our national security. And here the reasons for a voluntary force are especially compelling. There is every reason to believe that national security will be better served by an all-volunteer force. As has already been indicated, such a force will be more highly trained than a conscript force and will have greater experience. Today experience and skill are of utmost and increasing importance to the military service. Mass armies are not likely to be significant elements in our future security; and have become less and less significant in our strategic planning. Consequently, the increased experience and skill to be expected from a volunteer army has never been more desirable nor more important.

Concern has been expressed that the all-volunteer force would not be of very high quality. It is argued that only men who cannot find good jobs in the civilian sector will come into the armed forces, and that these men will most naturally be the men with fewer qualifications. But the Gates Commission has concluded, quite to the contrary, that an all volunter force can be constructed from men who meet a more rigorous requirement than is presently in effect. Furthermore, it must be recognized that even under the present system all but the lowest ranks are filled exclusively from volunteer reenlistments. Through longer tenure and lateral recruitment with proficiency pay, there is every reason to believe that the actual quality of manpower will be significantly improved.

It has been claimed that an all-volunteer arrangement forecloses the flexibility to meet emergencies. But the draft is not a procedure for providing flexibility in emergencies. In terms of responding to crisis, our military strength is dependent upon forces in being, that is, those on active duty and in the Reserves. Under the proposed volunteer system, the Congress would, of course, retain the power to institute a draft should that ever appear necessary. The short period of time required to either activate the draft or provide increased incentives for enlistment is really insignificant considering the several months lag time between induction and preparedness for battle that exists even under the present system. And indeed, I doubt, whether if there were a real emergency, it would be necessary to reactivate the draft. America's young men have always shown their willingness to fight when America is truly in danger.

Some critics of the volunteer force fear that the costs of the all-volunteer force might be taken from other military expenditures, thereby decreasing our defense development and procurement programs. But this is an invidious view which argues that the American people must be tricked into supporting military programs. I say that the health of our democracy depends on decisions made on the basis of complete information and assessment of real costs. The all-volunteer force will facilitate rational military planning since costs will be explicit and greater efficiency of allocation can be made both within the defense budget and between defense expenditures and alternative expenditures.

The evidence and logic support replacement of the draft with an all-volunteer armed forces system. We would have taken this step earlier, I believe, if we had not failed so remarkably for so long to question the wisdom of the draft. The draft is one of the slow, subtle ways in which American freedom can be eroded. Let us grasp the opportunity now before us to end the draft and restore the traditional voluntary system.

Mr. HOLLINGS. Mr. President, I would like to say a few words to explain my opposition to the Goldwater-Hatfield amendment. I believe that a professional, all-volunteer army is neither necessary nor desirable.

No plan is perfect, and doubtless ther are inequities in our present draft sys tem. No two people receive alike whe the wheel of fortune spins. As John K Kennedy once observed, life itself is un fair. Anyone who believes that we ca build an armed force based on 100-per cent fairness to all is, I believe, far to optimistic. To argue that a perfectl equitable system can be created throug an all-volunteer army is dangerous delu sion. The fact is that a volunteer arm is both unfair and impractical.

First, the proposed professional arm would only enhance the inequities of th present draft system. There are thre groups who have suffered most from th deferment standards utilized under th draft system of recent years: the poo the black, and the disadvantaged. I sub mit that these are the same three group which would comprise the overwhelmin bulk of a volunteer army. The educate and the affluent will simply not be repre sented. In effect, the amendment we ar debating today takes the worst feature of the current system and perpetuate them as far down the road as the eye ca see.

Second, an all-volunteer army woul prove inadequate to the demands of full scale warfare. An all-out war would in evitably mean going back to the draf in order to recruit enough men to wag the battle. There would be no time t reestablish classifications and draf board hearings if another war broke out So we would again stand in need of th draft, but we would lack any means t quickly reinstitute it. We cannot afford to be caught again with our guard down That has happened before, and the cos in blood and treasure has always bee high. We are being asked on emotiona grounds, largely opposition to the Indo china war, to rush into a very far-reach ing program without giving it the in depth study it requires.

Third comes the matter of cost. There is no ignoring the fact that a professiona army is going to cost added billions o dollars, probably about $4 billion a year We must take stock of our priorities Can we afford to channel tremendou sums of money into the creation of a professional army when we face so many other calls upon the Treasury? Would i not be better to divert those billions int some other project, such as tackling ou other pressing problems or reducing ou astronomical national debt? I think th answer is obvious.

Fourth, an all-volunteer army woul not represent a cross section of th American people. There will be precious few doctors and scientists and engineers to volunteer for military service. There will be few young men with college back grounds to join the ranks. I have spoken on college campuses in many parts of th country, and in the question-and-answe segment we always get around to th draft. The questioner usually argues vig orously in favor of a volunteer army. My response takes the form of a question How many of those in the audience woul join such an army? Mr. President, th affirmative responses can be counted o the fingers of my two hands. The military establishment needs diversity to give i strength and to preserve our traditions

Without the draft, that diversity will be lacking. An army that represents a cross section of the Nation is essential—the rich and the poor, the formally educated and the deprived, those who like military regimen and those who do not.

Fifth, a professional army in peacetime is out of character for a democratic society. An all-volunteer system would establish a powerfully entrenched military clique that would bode ill for the future. It is true that for much of our history, the United States usually had a volunteer military force. But this is 1970. We have grown up to be the most powerful Nation on earth, with obligations and responsibilities demanding a large standing army. A professional army of a few thousand soldiers is one thing; a professional army of millions of men is quite another. In addition, the civilians in our Government have a difficult enough time today in asserting effective control over the Armed Forces.

The bureaucracy is large and cumbersome, as the military is quite willing to admit. Professionalizing the Army would only add to an already difficult task. I can see no good growing out of a situation creating a professional army of millions of men owing their permanent, or at least semipermanent, allegiance to the military way of life.

Sixth, the draft, for all its faults and limitations, has some positive effects. In an age when patriotism is on the decline, military service can demonstrate to the young the price of freedom and democracy. It can encourage a more profund appreciation of what America is all about. In an age when most of the young are unaccustomed to deprivation and want, it can demonstrate that a secure, affluent life is nobody's right—it is rather a privilege to be won.

Finally, Mr. President, compulsory military service does not make our Republic authoritarian. Many of the proponents of a volunteer army argue that the draft strips individuals of their rights and points the way toward dictatorship. This is nonsense. That this country is supported by a compulsory income tax does not mean that we have become a slave state. Compulsory school attendance does not mean state-enforced indoctrination. Nor does compulsory military service make for totalitarianism. Just as we pool our resources to finance the country and to educate ourselves, so do we come together to defend it in the hours of need. "Ask not what your country can do for you. Ask what you can do for your country." That is a summons we would all do well to remember. People have rights, but they also have obligations. And surely a short stint in the army is small enough price to pay to protect our way of life.

I will therefore cast my vote against the Goldwater-Hatfield amendment. And I urge that in our future deliberations to improve the draft, we accord adequate attention to the far-reaching effects of any changes. The security of our country cannot be sacrificed on the altar of hastily conceived improvisation.

Mr. CASE. Mr. President, the Hatfield-Goldwater amendment to end the draft on June 30, 1971, reflects a commendable and justified concern with the system by which we man our military services.

The present selective service system is unfair and manifestly inequitable. I and many of my colleagues have criticized this system and cosponsored legislation to reform the draft ever since the National Advisory Commission on Selective Service issued its findings in 1967.

The issue before us thus is not whether the present draft system is unjust. It is.

Similarly, the goal of moving toward reduced reliance upon the draft certainly is desirable, and it has my support.

Although I will vote no on this specific amendment, my vote does not represent satisfaction with the present system of selective service.

Rather, I am in agreement with President Nixon's decision to decrease emphasis upon the draft in a systematic and careful manner.

As the first step in this process, the President this year has proposed a 20-percent pay increase for enlisted men with less than 2 years of service, and he has declared his intention to ask for another $2 billion pay increase next year.

These substantial improvements in the compensation of recruits should begin to test the proposition that better pay can attract sufficient volunteers to staff our Armed Forces.

Honest differences still exist even among the experts concerning the practicality and effect of a volunteer Army, not the least of which is the possible development of an officer military elite relatively isolated from the mainstream of American life and enlisted ranks manned even more than they are now by the poor and underprivileged of America.

Although I have the highest respect for these members of the Gates Commission who recommended the end of the draft next June, I believe that even they would admit to less than absolute certainty that these and many other questions have been completely resolved.

The testing process which the President's recommendations would provide therefore is highly appropriate and necessary to the seriousness of this Nation's decision on the future of conscription. It is, I believe, a course of action preferable to the immediate and total abolition of the draft.

I therefore urge that the Armed Services Committee fulfill its pledge of hearings on draft reform this year. Even if the volunteer army amendment is adopted, the draft still will be with us in standby form. I also support and commend to my colleagues the President's proposals to increase the pay of recruits as a first step in testing the feasibility of a volunteer army.

Mr. GRIFFIN. Mr. President, it has been written that there is a season for all things.

With that thought in mind, I would like to offer some comments on the Hatfield-Goldwater amendment which is the pending business before the Senate, and on which, hopefully, we will vote at some point later in the day.

I have a high regard for the sponsors of this amendment, and for those who have joined them as cosponsors. I know their sincerity in what they are proposing cannot be questioned. I know the amendment they have proposed represents their deep conviction of what is best for the country at this particular point of time.

The whole idea of an all-volunteer army is an appealing one, especially so when the draft has come under such attacks and has been the source, real or fancied, of much of the trouble that, unhappily, we have seen in this country in the last 2 or 3 years. Under other circumstances I might find myself convinced of its desirability—and its feasibility—as a means of protecting this Nation's security.

But at this time I cannot do so. I am convinced, on the other hand, this is not the time—this is not the season—to consider a proposal of such magnitude and of such far-reaching consequences.

As much as we all deplore it, we are at war, whether it has been formally declared by the Congress or not. Already it has become the longest and one of the costliest wars in our history. I hope it will end soon but how much longer it will go on, unless we should cut and run, as some have suggested, I do not know.

Under the circumstances, I cannot possibly see how we could move toward an all-volunteer army without jeopardizing our national security. With world conditions as they are, we cannot afford the very serious risks which are involved, in my opinion, in the ultimate results that might occur if this amendment should be adopted at this time.

In his campaign and since President Nixon has talked about his desire to move this country from reliance on the draft to a volunteer army. In his message on the draft on April 23, 1970, the President underscored this in these words:

> From now on, the objective of this administration is to reduce the draft calls to zero, subject to the overriding considerations of national security.

But the President emphasized that the draft could not be brought to an end all at once. It would have to be phased out gradually to insure adequate defense strength at all times.

As we all know, the present selective service law will expire on next July 1, and just as sure as night follows day, we will have to extend this authority.

What disturbs me very much about this pending amendment is the hope implicit in the wording that the draft will be ended on a given date less than a year hence; that no longer will young men be faced with this solemn duty. What a disappointment we may be building up for them.

I know the sponsors of this amendment contend that it does not end the draft or the possibilities of the draft continuing. But what a hue and cry there will be, if we adopt this amendment, when we come to consider an extension of the selective service law. I will come back to this point later on.

One of the things that disturbs me a great deal about this amendment is the section which requires "findings" by the Congress when, in fact, there is no basis for such findings. There have been no hearings on proposals for a volunteer army, no way to evaluate some very

broad generalizations, no way of knowing for sure whether they are workable or not.

Subsection 2 of these findings declares that involuntary service is discriminatory "because it falls upon a relatively small number of the total population." Would not a volunteer system do the same? Who would be the young men who would serve and from what part of our economic life would they come?

Subsection 3 declares with great assurance that—

> The military manpower requirements of the Nation can be adequately met through the effective administration of a voluntary system.

How do we know? What assurances do we have that this is so? Quite assuredly, this is not the President's thinking; he has said most clearly that an extension of the draft will be necessary.

Subsection 4 of the findings declares that—

> A voluntary system should be instituted and given fair test as soon as practicable while providing necessary safeguards in the event that unforeseen circumstances create a need for additional military manpower.

Let us examine, for a moment, what "necessary safeguards" this amendment proposes.

Notwithstanding the expiration of the Selective Service Act next July 1, the amendment proposes continuing registration of young men between the ages of 18 and 26 in order that involuntary induction "may be reinstituted without serious delay in the event the President determines—such action is necessary and legislation authorizing conscription is enacted pursuant to such determination."

In this nuclear age I wonder who can determine what "serious delay" might be? Given the temper of the country on this subject, I wonder what speed there would be in granting the President's request?

Under the terms of this amendment, before there could be involuntary inductions into the armed services after next July 1, the President would have to make a determination that conscription was necessary, notify Congress of this determination and the facts upon which it was based, and submit recommendations for the legislation he deemed necessary.

Giving Congress credit for moving with all deliberate speed on occasions, I wonder if some of the dangers and emergencies which could face us as a Nation would allow time for this. Judging by the speed with which we have been acting on this very important military procurement authorization, I fear, I fear indeed, there just might be serious delays.

In his April message to which I referred, the President said that as we move away from reliance on the draft "we must make provisions to establish a standby draft system that can be used in case of emergency."

The procedures outlined in this amendment are, I submit, a far cry from what the President had in mind.

Under this proposal we are considering, where would be the standby draft? We would have a great pool of registrants but we would not have the instant machinery for calling them into service if the need should arise.

And who can say in this day and time when the need will arise, where it will spring up, and under what circumstances? Would those who would destroy this country and what it stands for in a troubled world give us the time of enacting a new conscription law?

Until the concept of a volunteer Armed Force has been tried and tested, until we know very much more than we know today, I believe we would be undermining this country's defensive strength and running needlessly grave risks if we should adopt the proposal we are considering here. As much as I might wish, I just cannot accept the extravagantly hopeful premises on which this proposal seems to be based.

There is another thing about this proposal that bothers me a great deal and this is the violence it would seem to do to fiscal responsibility at a time when the President is undertaking to reorient our priorities and meet the crushing domestic needs of our people.

As it is written, the amendment would provide for a whole series of increases for our military personnel—for increases in basic pay rates both active and reserve for certain enlisted and officer personnel, proficiency pay, recruiting incentives, special pay for physicians and dentists and other things.

I believe the distinguished chairman of the Senate Armed Services Committee, Mr. STENNIS, has placed the increased costs embodied in this amendment at $4.3 billion a year. Some say that it would be less and figures which have been quoted place the total at a much higher figure.

I just do not know, and I do not believe anyone else could say with certainty what the cost would be, whether it would go up or down, as the volunteer plan went into operation.

Now I am not opposed to adequate and even generous pay for those who risk their lives to defend our country. I think they sould be paid on a basis that will make military life more attractive. I have supported such pay increases, and I will support them again. But I want to do so after consideration of all the factors involved and not in the way we are approaching the matter with this amendment.

The overall bill before us, as I understand it, would call for expenditures totaling more than $19.2 billion. This amendment, as the chairman of the committee has pointed out, would increase that figure by 22.4 percent.

Furthermore, the pending budget contains no funds for carrying out the proposal. We might stop right here and ask ourselves, how will we finance the increased costs whatever they may be?

Should we take these costs at this time from other undertakings so urgently needed? Or do we wish to pay taxes—would be willing to pay more taxes. It is an old adage that you cannot have your cake and eat it, too.

We are asked to take this step at this particular time without the benefit of a single day of hearings on his proposal. We have a solemn obligation as legislators to give this matter of a volunteer armed force the most searching study, the most thorough analysis. I submit that this, in all frankness, cannot be done on the Senate floor. We need the benefit of hearings, and I associate myself completely with the words of the chairman of the Senate Armed Services Committee, Mr. STENNIS, when he said on the floor here on August 18:

> For the Senate to adopt an amendment of this magnitude without committee hearings in either the House or Senate is to repudiate the fundamental legislative process.

I am convinced that we would move more surely and just as rapidly toward the desirable goal sought by this amendment if we would follow the normal legislative process of hearings before the appropriate committees of Congress. Then we will have the information and material on which to base a sound judgment.

The distinguished chairman of the Senate Armed Services Committee has given assurances that hearings on the extension of the Selective Service Act of 1967 will be started as soon as practicable. He has also given assurances that these hearings will include a full examination of the proposals for a volunteer armed force.

Is not this the course we should follow?

The President has given his full assurances that he supports the idea of a volunteer force. He has been equally explicit in saying that he opposes the course outlined in this amendment.

In a letter which the Senator from Mississippi has placed in the RECORD, the President's reasons for opposing this amendment have been set forth clearly and unequivocally. For emphasis, I would quote them here:

> 1. There can be no certainty that the proposed changes in pay and incentives will attract sufficient volunteers to permit cancellation of the draft on June 30, 1971, as implied in Amendment 765.
>
> 2. It would enact into law a large number of personnel policy changes without knowledge of either their effectiveness or comparative costs with quite possibly more efficient alternative proposals.
>
> 3. It would add several billions of unplanned increased costs to the FY '71 budget.
>
> 4. And, provide no opportunity for the Armed Services Committees to hear the views of the Department of Defense or other interested witnesses.

The Senate should defeat the amendment.

If anyone should know what the military impact of the proposed amendment would be, that individual is Secretary of Defense Melvin Laird. He is very much opposed to the amendment, as he made clear in a letter dated August 14, 1970, to Senator STENNIS.

In that letter, the Secretary wrote:

> The amendment assumes the termination of draft legislation on July 1, 1971. I am convinced that military manpower needs will require the continuation of the draft beyond this date.

And he adds:

> To terminate the draft, as proposed by this amendment, even before the Congress has appropriated funds for pay increases and other incentive programs designed to increase the number of volunteers, would seriously impair the Services' ability to meet their manpower requirements.

That is something, I am convinced, we cannot afford to do at this time.

Mr. President, the issue we are confronting on the Senate floor today is clear.

While the amendment proposed by the distinguished Senator from Oregon (Mr. HATFIELD) and the distinguished Senator from Arizona (Mr. GOLDWATER) has a most desirable objective, it has one basic fault:

It is offered at the wrong time, in the wrong place, and under the wrong circumstances.

The Senate should defeat the amendment.

Accordingly, Mr. President, I add my voice to those who are urging that the pending amendment be rejected.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. GRIFFIN. The time to be equally divided between both sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. STENNIS. Mr. President, I yield 5 minutes to the distinguished Senator from Missouri.

Mr. EAGLETON. I thank the distinguished Senator from Mississippi.

Mr. President, a few days ago—specifically, on August 20, 1970—I addressed myself to the pending question; namely, the wisdom of creating at this time, by an amendment to the pending military procurement bill, the so-called all-volunteer army.

At that time, I raised five rhetorical questions with respect to matters that I thought should be probed in depth through the legislative process in hearings before the Armed Services Committee. Today I would like to address myself to additional questions and make additional comments.

I think we all know that there are many inequities in the present draft system, and I think there is substantial, if not unanimous, agreement that these inequities should be removed. We also know that there are many inequities in our society and that they should be remedied.

Inequities in both the draft and the society throw grave doubt on the type and composition of the volunteer army that would eventually emerge if the Hatfield-Goldwater amendment became law. The type and composition of the Army obviously will affect each of us as well as national policies.

Does a volunteer army provide a nice "out" for those who can afford it? Presently, parts of the draft do, and those parts, those loopholes, should be remedied rather than compounded. By providing an "out," are we about to return to the era when the rich could buy substitutes to serve in their stead? Will entire segments of the population be removed from the concerns of national military policies and, in so doing, apathetically accept foreign military involvement? Quite honestly, Mr. President, I do not know.

I am not sanguine about several of the Gates Commission assumptions, however. For example, does the Gates Commission take changing unemployment levels into account with respect to the willingness of the individuals at certain pay scales to volunteer for Army service?

Is it not relevant to determine what the unemployment rate in the country might be at any given time—and its effect on a volunteer army? With an unemployment rate of, 3 percent, how coveted is volunteer service in the military at x dollars? At an unemployment rate of 6 percent, how coveted is service in the military at x dollars? And God forbid, at a rate of 10 percent, we might have other problems as well.

I am not certain, therefore, that the Gates Commission, assuming the flexibility and the unpredictability of employment at any given time, can give us a fair and safe estimate as to the acceptability volunteer service.

Would the turnover rate in the Army—turnover necessary, first, to breathe fresh life into an otherwise closed system, and second, to supply the amount of young manpower within certain age groups necessary for combat duty—be the same, for example, for a 2 million man Army, a 2.5 million man Army, as proposed by the Senator from Oklahoma (Mr. HARRIS), a 2.9 million man Army or a 3.3 million man force? I do not know. Again, these are questions that I think deserve further attention than were given in the Gates Commission report.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an editorial published in the Kansas City Star of June 14, which raises questions similar to the ones I have just propounded and additional ones as well.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AN ALL-VOLUNTEER ARMY, YES, BUT FIRST FULL DRAFT REFORM

Is it a pipe dream, this idea that the draft—putting aside the clear need for its interim reform—can be ended perhaps as soon as mid-1971 and replaced with a purely voluntary system? Many military leaders are convinced that the concept is spun from gossamer, politically appealing but practicably impossible for the early future.

To make their point, the skeptics tell of a recent gathering of college students in Washington for a discussion of Cambodia, the draft and the all-volunteer forces idea. An administration official who explained the volunteer plan answered several questions about it. Then he tossed out a hypothetical question: Without a draft, how many in the audience would be interested either in enlisting or signing up for officer training? Several hundred young men were present but none raised his hand. Yet they were unanimously in favor of switching to free-will defense service—for the other fellow.

There are also recent studies showing that 75 to 90 per cent of all enlistments in the National Guard or reserves are "draft-motivated." That is, more than three-fourths of today's guardsmen and reservists chose six years in reserve status, including six months of active duty, to protect themselves from being drafted for two years.

How would it be possible then to attract to military service as many as 2 million draft-free young Americans at a time? Melvin R. Laird, secretary of defense, has estimated that the size of the armed forces would have to be reduced to "near the 2-million mark" before the concept would be feasible. The Nixon administration has cut U.S. uniformed strength from a Vietnam peak of 3.5 million to about 3.1 million. A further reduction of 600,000 is contemplated over the next two years as the American involvement in Vietnam diminishes. That would still leave a manpower requirement of 2.5 million.

This outlook indicates overoptimism in the time element of a main recommendation by a special presidential commission that studied the volunteer Army plan. The commission, headed by a former defense secretary, Thomas S. Gates, last February called for ending the draft by June 30, 1971, when the existing Selective Service law expires. The volunteer Army would be instituted at that time.

We specify the Army because in theory the Navy, Marine Corps and Air Force already are composed of volunteers. In fact, as any recruiting officer knows, all services except the Army depend on the pressure of the draft to provide most of their recruits and many, if not the bulk, of their junior officers. It is a matter of choosing a preferred branch of service over forced induction into the Army and a possible fate of infantry fighting in Vietnam.

So it would not simply be a problem of obtaining enough volunteers to fill the ranks of the Army. Without draft quotas, the Navy, Marine Corps, Air Force—as well as the National Guard and the reserves of all four services—would be scratching for the recruits they can now rake in without much trouble.

But the Pentagon knows that President Nixon is committed to the eventual goal of all-volunteer forces. It has prepared a list of specific proposals aimed at boosting enlistments and beginning a gradual shift to a voluntary basis. These proposals include pay raises, improved housing facilities, stronger recruiting efforts, elimination of kitchen duty with civilians performing that function, improving the reserve officer training program and increasing educational benefits. In addition, a major upgrading of the reserve forces is planned.

All of this would cost a great deal of money, even allowing for the savings to be achieved through a smaller turnover with much less being spent to train replacements. The report of the Gates commission has estimated that it would cost 2 to 4 billion dollars a year to operate the defense program without draftees. Other estimates have run as high as 17 billion and some manpower specialists are now saying that 9 billion is a realistic figure.

The point is that conscripts are grossly underpaid in term of civilian salaries. But an all-volunteer force would have to compete with civilian pay scales.

As for its popularity, the latest opinion polls on the subject show that a majority of the public is now in favor of an all-volunteer force. The 1968 platforms of both the Republican and Democratic parties came out for it and it likely will be an issue in 1972. With so much support both in and out of Congress, expense is apt to be a minor consideration.

We believe that the Nixon administration and Congress should make a full effort to get the volunteer plan started at least by 1972. It might or might not work, but the nation will never know until the attempt is made. An effort to manage without the draft for 18 months in 1948–49 had limited success, but it was not backed up by a large and alluring array of special inducements.

Now an entirely different approach is in the making.

Meanwhile a high-priority requirement remains to purge the draft of its inequities. There was a small start this year in the shift to a lottery arrangement and the ending of future occupational and agricultural deferments. On the table for action by Congress are proposals to do away with all undergraduate deferments. That would transform college campuses from being havens for escape from military service. The new draft director, Dr. Curtis B. Tarr, a former university president, adds that it would improve the academic climate by removing any suspicion that it harbors draft evaders.

Dr. Tarr also supports an administration request for Congress to authorize a national call by numbers so that the draft lottery can operate fairly in every part of the country. He is already providing local draft boards with detailed information so that they can apply induction standards more uniformly instead of helter-skelter as in the past.

These would be solid reforms. They are needed, but a laggard Congress is showing little interest in the actions that only it can take. A breakthrough could come with Senate hearings promised for later this month. But apparently a fire has to be built under the reluctant House armed services committee. There is no acceptable reason for stalling until the conscription law comes up for renewal next spring.

Here, then, is a clear program for manpower policy changes that can reduce dissent in the United States, get rid of wholesale inequities to young Americans and point toward the time when the uniformed services are made up entirely of volunteers. But the necessary draft reform must come first.

Thereafter the all-volunteer system will beckon irresistibly until it has been implemented for a thorough trial. If it can be established, it will make military service much more satisfactory and certainly less onerous for all concerned. It also should strengthen the American democracy by relying on true volunteers—instead of coerced or drafted short-termers in the main—to man the country's defenses.

Mr. EAGLETON. Mr. President, I should like to close these brief remarks by echoing, for the purpose of emphasis, a statement made today by the distinguished Senator from Mississippi (Mr. STENNIS), in which he said:

I cannot overemphasize the fact that this amendment is opposed by the President of the United States, opposed by the Secretary of Defense, has no approval from the Bureau of the Budget, and has received no hearings by either the House or the Senate in the Congress.

To enact this amendment with its cost and magnitude without any hearings whatsoever in the Congress is to ignore the basic legislative processes under which we should operate by considering legislation in a detailed and orderly fashion. I urge the Congress not to forfeit the prerogative of this body.

To those remarks, I simply and sincerely say, "Amen."

Mr. STENNIS. Mr. President, I yield 5 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I will support a volunteer army in peacetime. But, when as now, battlefield casualties are high, I do not believe a volunteer army is either wise or equitable.

First, it is inequitable to permit the risks of battle to fall only on those less affluent Americans who are induced to join the army by a payraise. Second, it is unwise to insulate from the horrors of war middle and upperclass Americans who might lead the protest against senseless foreign adventures. I frankly might question, for example, whether the current pressures for deescalation of the Indochina war would be as great if young men from every social background were not threatened with service in that war. Third, when, as now, we have pressing budgetary problems and domestic needs, I think a volunteer army is too expensive.

I recognize that, because of deferment policies, the present draft system contains many of the inequities of a voluntary system. But the draft can be made more equitable, as I have fought to do for years. A wartime volunteer army is inherently inequitable.

There are some who argue that we never would have become involved in a large scale war in Indochina, if it were not for the draft. This is sheer speculation. The one certain fact that we are in Indochina now, and that the process for determining who will serve there should be a fair one.

Some suggest that if the draft were ended, American involvement in Indochina would have come to a grinding halt. This, of course, directly contradicts the findings of the Gates Commission that our military manpower needs could be met by an all-volunteer force. In any event, if the Congress wishes to end the war, it can do so by legislation directly aimed at that goal—the McGovern-Hatfield amendment.

Finally, I wish to emphasize that the cost of the Hatfield amendment for this year is at least $3.2 billion. When we have such pressing budgetary problems and domestic needs I sharply question whether a volunteer army or a military payraise, even if desirable, should rank so high on our list of national priorities.

I point out that the cost of the Hatfield amendment in fiscal 1971 is greater than the total Federal support for elementary and secondary education. It is three times greater than the total Federal expenditures for law enforcement and the fight against crime. It is six times greater than the Federal expenditures for control of air and water pollution.

I believe these points deserve further examination in hearings before the Armed Services Committee. I do not wish to suggest, however, that the hearings should only focus on objections to the voluntary army. These hearings should be, and the chairman assures us, will be comprehensive. They should invite testimony from all sources, including, in particular, the distinguished members of the Gates Commission and the Marshall Commission. The committee should give fullest consideration to the amendment of the Senator from Oregon. It should also consider the issues raised by the amendment of the Senator from Oklahoma. I agree with him that we should seek to devise a means whereby a peacetime voluntary system could be converted to a draft system if American casualties reach a certain level. Similarly, we should consider methods of promptly replacing the present draft system with a volunteer army when American soldiers are no longer dying in Indochina. These are delicate and complex questions which require serious thought and discussion.

I believe, too, that the advisability of a volunteer army should be considered at the same time as are reforms of the draft system. Only then can we truly decide which system is better for our country, and under which circumstances.

I remind my colleagues that many of the draft reforms recommended by the Marshall Commission back in 1967, including some which simply required an Executive order, have yet to be implemented. The decision on these recommended reforms may well influence the views of many Senators on the volunteer army.

For all of these reasons, I will vote against the Hatfield amendment.

Mr. STENNIS. I thank the Senator from Massachusetts very much. Let me say that his remarks are right on the point, right down to the practical question involved here, and the issues presented clearly.

Mr. President, I yield myself 6 minutes.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 6 minutes.

Mr. STENNIS. Mr. President, let me brief and summarize by pointing out that in the beginning I quoted the letter from the Secretary of Defense on this subject, dated August 14, 1970, in which he expressed his strong opposition to the amendment and said that it would, in effect, if adopted and became law, would terminate the draft by June 30, 1971, and that the manpower needs were so great, and as the President says, it would be impossible to meet the situation reasonably anticipated without a continuation of the Selective Service Act beyond that date. He also gave reasons, as cited by the President in his message of April 30, which are identical on this subject, wherein the President at that time gave three strong reasons why they could not shift over from the draft all at once or within a few months.

The President said there must be a phasing out of the system in order to insure the maintenance of a defense posture, that at each step it was necessary to extend that beyond July 1, 1971, and also if reliance on the draft is decreased, that standby draft mechanisms for emergencies should be developed.

Those statements have never been successfully denied. We have talked all around the edges but they have never refuted the statements laid down by the President and the Secretary of Defense. Furthermore, the President in a later letter, dated last Friday, coming through his assistant, Mr. Timmons, addressed to me as chairman, refers to the amendment by name and number.

He says:

Because of the President's temporary absence from Washington, he has asked that I confirm Henry Kissinger's conversation with you and, more specifically, reaffirm his steadfast determination to establish an All Volunteer Force and bring the draft calls to zero at the earliest possible date consistent with the needs of national security and fiscal responsibility.

That is not the chairman speaking, that is the President of the United States

peaking about national security and iscal responsibility.

Then Mr. Timmons gives four specific easons why the amendment should not e adopted:

1. There can be no certainty that the proosed changes in pay and incentives will ttract sufficient volunteers to permit canellation of the draft on June 30, 1971, as mplied in Amendment 765.

The Senator from Michigan, the Senator from Colorado and others have clearly called the shots here. The key question is the need for manpower to carry out our situation in Vietnam as well as others.

Third, the President says—back to his letter—

3. It would add several billions of unplanned increased costs to the FY '71 budget.

No one has disputed that. The President calls it "several billions." They do not know how much; $4.3 billion is the lowest responsible estimate that comes from the Department of Defense. Others run up to $8 billion. But the President says:

Several billions of unplanned increased costs to the fiscal year 1971 budget.

He knows better than anyone else that it is unavailable. We talk about a decrease in revenue and income. I shall not dwell any further on that matter now.

There is not a line in here from the budget, no approval of one thin dime to support the $4.3 billion amendment—not anything, so far as the money is concerned. There is nothing to support it insofar as manpower is concerned, except the hope—just the hope, that is all. That hope is totally refuted and exploded by the facts of the record, the record of the past.

I have all the figures here for anyone that wishes to see them.

Secretary of Defense Laird said that despite the reductions they are making, it is expected that a total of 642,000 new personnel will have to be obtained from civilian life for active duty programs, including 182,000 draftees.

I am talking now about the year in progress now—this year, running until June 30, 1971.

On the basis of experience it can be estimated that about one-half of the 460,000 volunteers will be influenced to enlist by the draft. Of course, that is a practical fact of life. It has been true for years and it will be true in future years.

In particular, I want every Member to remember, as he casts his vote, that there will be no more responsible act he will make than this vote. I hope the vote will be up or down on the amendment.

Just remember that we have not had a real chance to have any hearings, although hearings are promised, no report, no budget estimate, no recommendations from the President—just a wish and a hope that somewhere down the line it would be nice to experiment with a matter of this kind.

Mr. President, we should not do so during a fighting war.

Mr. President, I rest the matter here.

Mr. PELL. Mr. President, will the Senator yield?

Mr. STENNIS. I yield 2 minutes to the Senator from Rhode Island.

Mr. PELL. Mr. President, I have thought a great deal about this matter and have read the Gates Commission report. A great many of my young relatives and friends are directly affected by the draft. I approve of and agree with the goals of the very high minded and high principled sponsors of this amendment, Senators HATFIELD, GOLDWATER, and BROOKE.

However, on balance, I believe that at this time in our history, the disadvantages and the dangers to our Republic if we pass this amendment now would outweigh the advantages.

I believe this for several reasons: First, too large a proportion of this burden would, I believe, be carried by our black citizens.

Second, and most important, the idea of a large "gung ho" volunteer army, going into the millions, would make me quake at a time of real civil disturbance or a division of viewpoint in the Nation.

An army of this kind, taught to do without many civil liberties, an army taught implicitly to obey any command, with no civilian grounding, an army of this size would, I believe, be a real danger to any republic, anywhere in the world, unless it is well thought out and well developed. And the civil liberties of the army personnel and its thinking would have to be along the lines of the civilian populace as a whole.

Finally, I think that we are unfortunately in the midst of war, a war I have long opposed. Moreover, inflation as rampant and the expenses of its amendment are considerable. I think that we should not move into this course without adequate thought and hearings.

For these reasons, although with a heavy heart as I believe in the objective of the sponsors of this amendment, I intend not to support it.

Mr. HATFIELD. Mr. President, I yield 3 minutes to the distinguished Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 3 minutes.

Mr. COTTON. Mr. President, I thank the Senator from Oregon for his courtesy in yielding me 3 minutes, particularly as the Senator knows that I am not speaking for his amendment.

Mr. President, during the past few years a large segment of the academic community, the faculties of our schools and colleges, a large segment of the commentators and the press, the majority, I believe, of the clergy, and many of the leaders in the Congress of the United States have been busily engaged in seeking to convince our youth that there is something disgraceful about wearing their country's uniform.

Therefore, I feel that this is not an opportune time to inaugurate a volunteer army, much as I would like to see the objective attained at some future time.

Having taught our youth not to volunteer, we can hardly reverse the field at this time and expect to defend the country by a volunteer army.

I thank the Senator from Oregon for yielding to me.

Mr. HATFIELD. Mr. President, I yield 3 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized for 3 minutes.

Mr. GOLDWATER. Mr. President, as this debate ends, I want to say a few words in defense of the amendment.

Regardless of what happens to the amendment, I think it is noteworthy that the debate has taken place. We have been trying to air this matter—I, on my part, for 10 years, and the Senator from Oregon for 3 years.

It was part of our platform in 1964 and 1968. On my part when I ran for office, the first speech I made was about the volunteer approach.

I am afraid that we will get up to July 1 next year and this body will probably vote not to continue the draft. If we do this without any structure at all to build on, I think we will have made a mistake. As I said earlier today, I am very concerned about possible decisions that might come from the Supreme Court relative to new interpretations of what a conscientious objector is. If it turns out that a conscientious objector can object to this particular war and not any war at all, the draft is going down the drain.

We ought at least to be able to say to our troops, "This is what we are thinking about. This is a first step. We want to make the pay better in the service so that people will remain in the service after we have spent thousands of dollars to train them."

Why not try it now? People say it will not work. I hear rumors about the fact that the service would mostly consist of the black or the poor.

We have had 138 wars in our history. We have had the draft in only five of those wars. These were not all big wars, but the war with Mexico was not small. We have had engagements that we fought with volunteer troops.

I think it is very essential that we give this a try. I would be the first one to stand on the floor and say that we should not go through with this if there were any indication that it would not work. But we have had no indication that it would not work. I think that the abundance of the evidence points in the direction that it will work and we ought to try it.

Mr. President, I thank the Senator from Oregon for his amendment. It has been a real pleasure to serve with him in the presentation of this amendment. If we have done nothing else, we have gotten the Armed Services Committee to say that it will look into it.

Mr. HATFIELD. Mr. President, I am grateful to the Senator from Arizona for his contribution to the debate and for his long contributions on this subject. The Senator from Arizona is no stranger to this issue, having served on the Armed Services Committee and having had a very distinguished record with the Air Force.

Mr. President, I yield 3 minutes to the Senator from Kentucky.

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 3 minutes.

Mr. COOK. Mr. President, I merely want to say that it was said a moment ago by the chairman that there has been no expression on the part of the Budget Bureau about this matter. I merely want to say that I hope the Budget Bureau does not run the Senate of the United States.

I would like to say to the Bureau of the Budget and I would like to have it in the RECORD so that the Bureau of the Budget will know that there are over 20,000 American military men who are on the welfare rolls in the United States. I would like the Budget Bureau to know that while it sat down and wrote a program and submitted it to Congress for the poverty level, they said that a man with a wife and one child with $3,120 was at the poverty level, but the same Bureau of the Budget authorized a salary to a man with a wife and one child in military service of $3,200 a year—$80 more a year.

We are not talking about the fact that a voluntary army is going to go through now if this amendment were passed. I also express the fear that the Armed Services Committee is going to come up next July with the real problem of passing an extension of the draft. They will be faced with the problem of saying to the volunteers, "Come and be a part of our military service. When you come in, we will pay you $3,200 to start."

I hope that we will not be too disappointed in what the results may be.

I thank the Senator from Oregon and the Senator from Arizona for the amendment because I think we may not get this type of amendment soon, but I think there is one thing for sure that we will get in the next session of the Congress, and that is an increased military pay bill if we get nothing else.

Mr. HATFIELD. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Oregon is recognized for 5 minutes.

Mr. HATFIELD. Mr. President, I am grateful to the Senator from Kentucky for his contribution to this debate.

I do feel that, regardless of the outcome of the vote today, we have aired some viewpoints and thinking on a very important subject.

I would like to make it very clear that, as important as some of the debate and dialog has been on the question of national security and the fact that we are in a war, we have depended upon the the Selective Service System to carry us for the manpower requirement in previous wars as well as this war. Let me make it very clear that this amendment does not commit the Senate to take action on the Selective Service System.

We might as well have been debating that subject as far as the debate on the floor today is concerned. That is not the issue. The issue is simply whether we will provide a pay scale to these young men serving in military life today comparable to what they would be able to earn as civilians.

As we have stated before, when over 20,000 of our military people today are on welfare and receiving welfare checks, I think it is rather a reprehensible situation if we permit it to continue.

It is granted that by providing for a pay increase we can set the stage for a period of testing. We do not know whether pay alone and the other provisions of this amendment will provide sufficient incentive for those who would otherwise seek a civilian career, turn them around, and cause them or entice them into a military career, but we will have 10 months to make that judgment and we will have the evidence to make that decision when we come to the question we must ultimately face, and that is whether to extend the draft or whether to permit it to expire on June 30, 1971.

So I do not believe the Senate can expect to have the kind of material and data on which to make a decision on the question of an all-volunteer military unless we go into some kind of transitional period and develop the experience this amendment would provide.

Much has been discussed today about the cost of this amendment. Let me state again that it will not cost 1 penny more for national defense. But instead of requiring a subsidy to be provided by the men in the service, we would send the bill to the general taxpayer. That is only fair. I do not believe we in the Senate would expect military personnel to serve and to risk their lives, and at the same time subsidize that service as we are requiring today.

The figure of $4.3 billion has been used today and previously. The Gates Commission is a responsible organization. It made a very responsible report and their figure is $3.24 billion.

I wish to point out that today the draft is costing our economy some $4 billion in lost production; and the draft system we have today is costing us over $3 billion. So when one considers we are going to be substituting one system for another system we would be able to wind down the draft system. After all, the Pentagon told us they expect to be able to reduce the draft cost to zero within the year. We would be supplanting the cost of what we are now paying for the draft with the volunteer system, as proposed by the sponsors of the amendment.

I do not think we can say this is an add-on budgetary figure. It is a question of substituting one cost for one system for another cost for another system.

It has been stated in our discussion and colloquy here that today in Vietnam a goodly percentage of those in Vietnam are draftees and this would force the situation upon us where middle America would be insulated from the horrors of war and the requirements to serve in military uniform. I wish to remind the Senate that of our infantrymen in Vietnam today, the riflemen who experience the brunt of battle in that type war, 88 percent are draftees.

Mr. KENNEDY. Mr. President, will the Senator yield at that point?

Mr. HATFIELD. I yield.

Mr. KENNEDY. Would the Senator also include the casualty figures for volunteers and draftees?

Mr. HATFIELD. The figure we have from the Pentagon is that the draftee has two times the possibility of being a casualty than a nondraftee.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. Mr. President, I yield myself 3 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. HATFIELD. Whether one looks at the infantry, rifleman, or the casualty list, I think it will be found that the draftee is subject to greater suffering in the Vietnam war than the nondraftee.

The point is that the President clearly stated that by the time the Senate will have to take action on the Selective Service Act, which expires on June 30, 1971, we will have pulled our ground combat troops out of Vietnam. In other words, we are going to wind down the draft calls to zero and return the combat troops which comprise most of the percentages to which I have referred. We cannot afford to move from one system to another without a transitional period.

Mr. President, in conclusion I wish to say that when we consider the entire program of military service in our country it should be considered in reference to other service as well. I do not think it is a simple question of whether we can expect all young men to serve in the military. Logistically it would not be necessary. There are other ways a young man could serve his country and I do not think we should provide any group a special exemption or special security as opposed to any group in our society.

Where we have this kind of discrimination today in a military service, because it permits some to escape whereas others have to serve, we should take steps to correct that problem. I do not think we will do it by maintaining the draft. I think the situation would be like those who in 1860 suggested the reform of slavery. The draft is an involuntary servitude and it denies the personal freedom of the individual to choose service to his country. Those who talk about reforming inequity are missing the point. We should abolish inequity when we see it, not reform it.

With respect to those who believe an all-voluntary military is a good idea, we will have to take steps to move forward. In the transitional period this measure will take those steps. To those who feel we must keep the draft regardless of all reform proposals, it will still remain a question of some being coerced and required to serve while others escape.

If we retain the present system I say the Senate, in all probability, will be up against the wall when we near the expiration date. We will have no choice but to extend the draft for another 1 year or 2 years. Today is the day to act if we want to avoid that confrontation.

I urge Senators to look at this matter carefully. This measure does not commit us, but it would lay the groundwork for a reasonable period of testing to see if we can create the testing with the pay increase this measure represents. But regardless of the situation in the matter of an all-volunteer military as opposed to the Selective Service System, Senators

should bear in mind that we have young men serving in the military who are not serving with pay comparable to what is earned in civilian life, and I think we should implement a pay increase based on the concept of this amendment.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. BROOKE. Much has been made about the fact that the Committee on Armed Services has not held hearings on this amendment. As a member of the Committee on Armed Services, I certainly am sympathetic with the problems of our distinguished chairman who has had grave matters under consideration and could not get to a hearing on this particular issue.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HATFIELD. Mr. President, I yield myself 3 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. BROOKE. In view of these questions, let me say that I do not think enough has been said about the Gates Commission. Senators should know the composition of the Gates Commission. I understand there were very distinguished generals on the Gates Commission, and a former Secretary of Defense. A very thorough and indepth study was made, resulting in the recommendations of that commission, on which this amendment is based.

Mr. HATFIELD. I would respond to the Senator by saying there were two very distinguished generals, Gen. Alfred Gruenther, former Supreme Allied Commander in Europe, and Gen. Lauris Norstad, former Supreme Allied Commander in Europe. In addition, serving as a member of the Commission was Prof. Milton Friedman, a distinguished economist who made a great deal of effort to bring forth the economic factors involved in the Commission report and recommendation. We have other men in the business field such as Crawford Greenwalt, chairman, finance committee, E. I. du Pont & Co., Allen Greenspan, chairman of the board, Townsend-Greenspan & Co., economic consultants, Thomas Curtis, former Congressman from Missouri, and ranking Republican on the Joint Economic Committee; Thomas Gates, former Secretary of Defense. So we had distinguished men, as the Senator indicated.

Mr. BROOKE. I think this is important because even though the Committee on Armed Services did not have an opportunity to hold hearings on the amendment, the fact remains that we did have the benefit of considerable expertise on this Commission. We did have the military well represented by distinguished members of the military, the Defense Department, or former members of the Department of Defense, as the distinguished Senator pointed out. So we are not here dealing with something abstract and academic. We have had a thorough and in-depth study. We have sound recommendations which, at least, this member of the Armed Services Committee feels are adequate, and on which the Senate can intelligently and with good judgment cast its vote.

Mr. HATFIELD. And would not the Senator from Massachusetts also agree that, whereas the Gates Commission came out with a specific recommendation to establish an all-volunteer service, this amendment does not in itself do that, but, rather, merely lays a foundation for that decision to be made later, when the Senate Armed Services Committee holds hearings—and I hope it will hold hearings on the subject? If this amendment is adopted today, it does not require the Armed Services Committee to act on the question of extending the Selective Service System or creating an all-volunteer service.

Mr. BROOKE. And I suggest the Armed Services Committee will do this, but, as the Senator well points out, this amendment would not preclude that at all. I am sure we would have to conduct hearings prior to the expiration of the Selective Service Act of 1971.

I thank the Senator from Oregon.

Mr. HATFIELD. I thank the Senator from Massachusetts for his questions.

Mr. DODD. Mr. President, I voted against the Hatfield-Goldwater amendment because I believe that this is far too important and far too complex a matter to be acted on after a brief 1-day debate, without prior study and without the benefit of comprehensive hearings on the subject.

Like most Senators, I would, in principle, much prefer a voluntary system to the draft. But we are heading into the most perilous decade in our history, and before we decide to abandon the draft in favor of a voluntary system, I think we have to be very certain in our own minds that such a system will be adequate to the task of national defense.

I hope that the Armed Services Committee at an early date will hold hearings on the feasibility of changing over to a voluntary system of military service.

Mr. JACKSON. Mr. President, over a period of several years, the concept of an all-volunteer army has attracted increasing support throughout the country. The report of the Gates Commission has bolstered the position of those who advocate this concept.

I believe the time has come to try a volunteer army. It is quite clear that some questions about the volunteer army will never be resolved unless we are willing to put them to the practical test. For example, there has been much discussion about the kind of men who would volunteer and the army that might result. Quite frankly, I have serious reservations about the composition of the volunteer army and its implications for our society in terms of burden sharing and responbility for our national security. I am also concerned about the actual cost of a volunteer army at a time when the demands on our resources are increasingly heavy.

But these and other concerns can be resolved most effectively by giving the volunteer army a trial run and I believe that Congress should respond to the widespread support for this approach. Let me emphasize that such a step would by no means relieve us of the obligation to provide a fair and effective standby draft system. The present Selective Service System still needs reform, and Congress must give priority to a careful review of its administration and effectiveness, with particular attention to the continuing problem of deferments.

Recognizing that the volunteer army represents an entirely new approach, I believe we increase its chances for success and minimize the potential for serious error by authorizing this step only after full hearings and careful study by the Armed Services Committee.

I see no reason why we need circumvent the normal hearing process on an issue of such far-reaching significance. It is obvious that all the implications of the present amendment have not been carefully considered. Both the Senate and the amendment will benefit from hearings to explore the problems involved in a volunteer army. I believe the proponents of this amendment should be willing to give the Armed Services Committee a reasonable time to conduct such hearings and write a report which will give the Senate some information and insights on this subject that we now lack.

I will therefore oppose adoption of this amendment today.

Mr. SMITH of Illinois. Mr. President, I am very pleased to be among the Senators who have cosponsored the amendment that my distinguished colleagues from Arizona and Oregon are so ably advocating. In lawyer's terms, they have "made a record" on the issue of voluntary military service that any impartial jury would accept.

They have, for instance, argued most persuasively that voluntary military service is most in conformity with our American principles of individual freedom and individual responsibility. And indeed it is. The confusion, disruption, and interference that universal military training have visited upon the present generation of young Americans needs no elaboration here. The inequities of the present draft are the common experience of families with teenaged sons throughout the Nation—from the poorest farming family in Mississippi that finds itself without that extra "hand" at harvest time, to the middle-income parents of Illinois, struggling to offer their children educational advantages they never had, to the wealthy socialite family of New York City whose son's career plans are upset by draft notice. Their sons must suffer those inequities, that confusion and disruption. All of them wonder, in the midst of family trials brought about by conscription; Is there no better way for free men to defend their freedoms? All of them know that there is. Senator GOLDWATER, Senator HATFIELD, the members of the Gates Commission have shown that there is.

My colleagues from Oregon and from Arizona have also demonstrated the wisdom of creating within the military services those conditions that will permit expiration of the present draft law by July 1, 1971. When this manner of achieving a voluntary military was first proposed, I reacted with much the same skepticism that some of my colleagues who have so eloquently opposed the amendment have: Could voluntary serv-

ice produce the numbers of men essential to national defense? Could it afford the degree of control over entries on duty we have up to now insured by conscription? What about times of national emergency? These were, in fact, some of the very questions so expertly considsidered and resolves in the Gates Commission report. They are questions that have been explored at length here in the Senate by my colleagues from Arizona and Oregon, and with all deference to the distinguished gentlemen who have sought to rebut them, Senators HATFIELD and GOLDWATER have been most persuasive.

They have shown the economies and deficiencies that a volunteer military will bring. They have noted the wisdom of volunteer service from the manpower standpoint, from the career development standpoint, and from the standpoint of a trained, professional, military ready to do the job that armies and navies are supposed to do: protect the national security.

But there is, in my mind, another great advantage to this amendment: its acceptance will mean that the Senate is keeping faith with two great elements of our society: our young people and our servicemen.

Throughout the days following the movement of American forces into Cambodia, thousands of young people came to Washington to express their views, their frustrations, and their aspirations for America. The very greatest number of them were patriotic young men and women who sought to promote their opinions within the system, rather than in the streets. I saw more than 2,000 of these youthful citizens and spent many hours exploring their views, exchanging comments, and, in general, trying to forge a link of communication that they, as citizens, deserve, and that I, as their Senator, owe them. Throughout these days of useful discussion, two important themes recurred and recurred: How can you expect young people to accept the responsibilities and challenges of a system in which they have no voice, despite their intelligence and maturity? How can you continue to conscript young men to waste 2 or more years of their lives in service that is in no way military, that in no way touches upon the skills and abilities they have developed through years of education or experience? What sense does it make to draft a productive young farmer to sit in a tank in Germany, a young accountant to serve as a secretary in Turkey, or a young lawyer to serve as personal valet to some general in the United States? In a time of limited military encounter, or in a time of peace, need we so waste the resources we have so long and so seriously worked to develop?

The Senate has already shown its sensitivity to the need for enfranchising our young people. Although I have supported the lowering of the voting age, the Senate acted, in my opinion, despite serious constitutional questions regarding its authority to act on qualifications for State elections. And it overlooked its serious responsibility to consider the impact of its decision upon other aspects of legal majority. But, there is no question—no doubt—about the Senate's ability to adjust the conditions of U.S. military service and tenure. Its authority is unquestioned, and its duty to America's young men is clear.

The other element of our society with which we must keep faith is our corps of dedicated servicemen and women. The conditions of their service have been improving over the years, it is true, but the very need for a draft demonstrates that the military service is not an attractive calling or profession. The image of the military can hardly be said to have improved over recent years, merely because Congress has granted various pay increases. For, at the same time, the military has come under greater and greater fire from within and without the same Congress. Many of the criticisms of our services are undoubtedly well founded, but the repeated characterizations of our officers and servicemen as incompetents and never-do-wells has made its impact upon prospective career military servants and civilians as well. The time for elimination of make-work military positions is indeed upon us, but as we go about reducing and reforming our military, it behooves us to protect and enhance the status of our career soldiers. The Hatfield-Goldwater amendment is a big step in the right direction on that score.

Mr. President, I intend to vote for the Hatfield-Goldwater amendment and I hope that those of my colleagues who in the past sought or claimed a special rapport with youth will do the same. I hope they will realize that the Hatfield-Goldwater amendment provides a sterling opportunity to make good on some of our most solemn obligations to our young people.

PAY TABLES FOR MILITARY PERSONNEL

Mr. HATFIELD. Mr. President, the Gates Commission in its report recommending the institution of an all-volunteer armed force specified certain pay increases for military personnel, but at the same time their report was issued a two-dimensional pay table was not included. There has been concern expressed by some that two-dimensional pay tables were impossible to develop within the pay increase recommendations and the budgetary expenditure because reversals would occur and an equitable distinction between ranks in pay could not be maintained. Prof. Harry Gilman, Director of Research for the President's Commission on an All-Volunteer Armed Force, and others have developed four two-dimensional pay tables: one for enlisted personnel, one for commissioned officers, one for commissioned officers who have been credited over 4 years' active service as enlisted member, and one for warrant officers. These pay tables meet the constraints delineated by the Gates Commission while incurring no reversals and maintaining clear distinctions between ranks and years of service.

I have chosen not to include these pay tables in the pending legislation but rather offer them as guides to the Defense Department. A matter of this importance should be developed in concert with those whom it will directly affect. Therefore, I ask unanimous consent that the pay tables be printed in the RECORD.

There being no objection the pay tables were ordered to be printed in the RECORD, as follows:

For enlisted men	Under 2	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26
E-9							$701.40	$717.60	$734.10	$750.30	$767.10	$782.10	$823.50	[1] $903.60
E-8						$588.60	605.10	621.00	637.50	653.70	669.30	685.80	728.30	[1] 807.00
E-7	$413.20	$443.40	$459.90	$476.10	$492.30	507.90	524.10	540.90	564.90	580.80	597.00	605.10	645.60	[1] 726.30
E-6	418.10	420.20	416.00	429.40	445.20	461.00	476.60	492.30	507.90	524.10	[1] 532.50			
E-5	351.10	368.70	382.90	397.50	413.30	428.90	444.50	460.50	[1] 468.50

W-1	$39.90	$9.60
W-2	12.70	2.80

A DESIRABLE ALTERNATIVE TO THE DRAFT

Mr. YARBOROUGH. Mr. President, in February of this year, the Gates Commission made known its findings that the draft was not a particularly good way to go about raising and maintaining our military forces. The Commission recommended that this country institute an all-volunteer system as an alternative to conscription. The Hatfield amendment, of which I am a cosponsor, incorporates many of the suggestions contained in the Commission's report, and I urge my colleagues in the Senate to give it their support.

The past 22 years of experience under the current selective service regulations have convinced me that the draft system is riddled with loopholes and inequities. The only equitable draft system is total mobilization. That was appropriate during World War II when we had 16 million men under arms, but our current military commitments do not require such a massive pool of military manpower. Current and projected needs call for only about three million men in the Armed Forces, a total which could surely be maintained under an all-volunteer system. This country has always relied upon a voluntary armed force except during majors wars and since 1948. We have allowed ourselves to get into the habit of thinking of the draft as a "necessary evil." I think that it is time that we remind ourselves that conscription in many ways is indeed "evil," but it can no longer be considered "necessary" at this point in our history. As President Nixon has said:

> We have lived with the draft so long that too many of us accept it as normal and necessary.

I was hopeful that meaningful action was contemplated by the President when he appointed the Gates Commission in March of 1969 to study the feasibility of an all-volunteer Armed Force. Why is it now that when the Senate has called the President's bluff by seeking to establish the machinery to move toward a volunteer force, we hear that he does not favor the Hatfield amendment "at this time." Is it possible that this is another issue where the administration prefers to merely create an illusion of concern and an absence of action? How deep is the President's commitment to ending conscription if it evaporates so quickly under the heat of legislative interest?

The passage of the Hatfield amendment at this time is imperative if we are to make a smooth transition before the expiration of the present Selective Service Act on June 30, 1971. If we continue a policy of indeterminate procrastination, we will be forced into a position of being required to extend the draft for the lack of any alternative. This amendment does not seek to bring about the immediate and total abolition of the draft. What it would do is to establish the structure, mechanisms, and incentives necessary to initiate the process of transition from a conscript to a voluntary army. This transition cannot be accomplished in a day, a week, or a month. That is why we cannot afford to merely give lipservice to the idea of a volunteer military. Time is short; the task is great; action is necessary.

If the provisions of the Hatfield amendment are enacted into law, we are likely to be successful in our efforts to attract sufficient numbers of men into the Armed Services. In that event, we can simply allow the Selective Service Act of 1967 to lapse on June 30, 1971. If problems should arise, we can always move to extend the act beyond its current expiration date. Even if the draft itself is eventually abolished, the pending amendment would provide for a continued system for the registration of all males between the ages of 18 and 26 years of age. This provision will allow the immediate resumption of involuntary induction in the event of threat to the national security of our country.

It has been suggested that the incentives provided by this amendment would not be sufficient to motivate adequate numbers of young men to volunteer for service in Southeast Asia. As long as the war in Vietnam continues, it is argued that we cannot consider moving away from a conscription system. This evaluation, if accurate, raises more questions about the legitimacy of our involvement in Indochina than it does about the feasibility of an all-volunteer system. A nations' leaders should never commit the country's men and resources to fight a war in the absence of enough public support to raise a voluntary force.

Much more could be said in support of the concept embodied by the Hatfield amendment. As a cosponsor of this proposal, I want to stress my belief that the time has come to end conscription as not only inequitable, but also because it is an unnecessary abridgement of personal liberties. The draft system is alien to the traditions of our Nation. I believe this Congress should act upon the mandate of the Gates Commission which stated:

> We unanimously believe that the nation's interests will be better served by an all-volunteer force, supported by an effective stand-by draft, than by a mixed force of volunteers and conscripts; that steps should be taken promptly to move in this direction; and that the first indispensable step is to remove the present inequity in the pay of men serving their first term in the armed forces.

I concur with the assessment and urge my fellow colleagues to do likewise by supporting the pending Hatfield amendment.

Mr. MAGNUSON. Mr. President, I support the concept of a volunteer army, but I believe this concept should be studied further. I cannot support the pending amendment, for while it may be politically popular to support this amendment, it would not, in my view at this time be politically responsible.

An immediate problem with the pending amendment is its costs—$3.24 billion according to its supporters, considerably more according to other estimates. For Congress to add this much money to the Department of Defense budget as an "experiment," without hearings, without congressional study, and simply on the basis of a brief floor debate, would not be responsible.

For the past few years we have been engaged in a difficult effort to reorder Federal spending priorities. The essential pattern of this effort has been to reduce military spending responsibly and to increase our investment in domestic needs like education, health, housing, and hospital construction. We have cut the military budget to some extent—about $5 billion last year, for example. Yet each time we have tried to make even minor increases in domestic areas, our appropriations have been vetoed by the President as "inflationary." The increases that were vetoed—for health, for education, for housing, and for hospital construction—each amounted to between 10 and 20 percent of the $3.24 billion minimum we would spend in 1 year on the Volunteer Army. Together, these vetoed increases amounted to less than half of that $3.24 billion.

So my first question is this: at a time when we are trying desperately, with only limited success, to decrease military spending and to increase investment in domestic programs, is it responsible to suddenly reverse ourselves and add $3.24 billion to the military budget on the basis of a brief floor debate and no committee study? The answer to this is obvious, I believe, if we consider for a moment what our reaction would be to a similar increase in the military budget for a proposed weapons system.

It may be that this huge expenditure for the volunteer army is warranted, particularly if, as its sponsors argue, the true economic cost to society of maintaining the draft is much larger. But the true economic cost to society of not having adequate health care, adequate education, and adequate housing is also great, far greater than the budgetary cost of improving these areas. All of this makes a compelling case for study of the volunteer army concept in Congress, and for action before the draft expires next June. Without such study, precipitous action on the floor would simply not be responsible.

The volunteer army is not, after all, an unmixed blessing. As the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Maine (Mr. MUSKIE) have had the courage to point out on many occasions, there is reason to be wary of the practical and moral problems that the volunteer army raises.

First among these reasons is the likelihood that the volunteer army will exacerbate, or at least continue, the glaring inequities of the draft with respect to who does the fighting and dying on behalf of the United States. This burden now falls primarily on the poor and the

black, and the Gates Commission estimates that the proportion of poor and black in the lower echelons of the Armed Forces will increase, at least slightly, if the volunteer army is implemented. As the Senator from Massachusetts has pointed out, 42 percent of all reenlistments in combat units in Vietnam are blacks, many of whom receive more pay for combat duty and jump pay than they could hope to receive in civilian life. Because these reenlistments are "volunteers" does not alter the fact that the burden of this repugnant war, which is the responsibility of our whole society, falls disproportionately on disadvantaged members of our society.

I subscribe to the principle that in peacetime no one should be forced to serve in the military, but this is not peacetime and hundreds of Americans each month become casualties in Vietnam. The fact that those casualties are not representative of society as a whole is an important moral question that transcends the problems of inconvenience now caused by the draft. Given this situation, we must not be lulled into the false dichotomy of choice between the present system and a "volunteer" system that will not distribute the burden of combat more equitably. There are alternatives, such as the abolition of all deferments, that should be studied. To reduce the visibility and inconvenience of the war in Vietnam by eliminating the draft, while allowing a continuation of the inequities of combat, is not morally responsible. We cannot salve our consciences on this issue simply by increasing military pay, even though that may be desirable. Our task is not simply to eliminate the inequities of the draft, but to eliminate the inequities of military service, and the pending amendment does not do the latter. For this reason, thorough study of the entire issue is imperative. We cannot and must not support any system, existing or proposed, that thrusts a greater burden of combat on the poor and the black, and that simultaneously allows those with greater resources and opportunities to avoid military service altogether. We are not talking about social tasks like the collection of garbage or the sweeping of streets—we are talking about fighting and dying in an odious war for which all elements of our society must bear the responsibility.

There is another issue involved, and that is the opportunity of the military and of the President to become involved in military action without the consent of Congress or the approval of the American people. It has been argued persuasively that this opportunity would be reduced by a standby draft mechanism in place of the easily escalated system of monthly draft quotas. Whether or not the standby draft, requiring the express approval of Congress, would in fact reduce this opportunity is, in my opinion, directly related to the size of the Military Establishment.

It may be argued that the questions I have raised, and the questions raised by the Senators from Maine and Massachusetts, are unfounded, but a careful reading of the Gates Commission report and the arguments of the sponsors of this amendment does not satisfactorily answer these questions. And so I would conclude as I began: This amendment is attractive but its enactment on the basis of only a brief floor debate would be neither fiscally nor morally responsible. To vote against this plan for a volunteer army may be misinterpreted by the public as a vote against the volunteer army concept, but that should not be the case. A vote against this amendment may be misinterpreted as a vote for continuation of the draft, but the draft will continue until next year regardless of this amendment and the draft cannot continue beyond next year without the affirmative action of Congress. Between now and the time that we must make that decision about the fate of the draft, I believe that Congress can and must study this issue in depth. I hope that the result of that study will be the elimination of the inequities of the present system and the proposal of a new system that will be socially and morally acceptable. I will give sincere consideration to such a system when it has been studied, and when the questions I have raised here have been satisfactorily answered.

Mr. GOODELL. Mr. President, I speak today in support of the amendment authored by my distinguished colleague from Oregon, Senator HATFIELD. I am proud to be a cosponsor of this constructive measure which seeks to restore basic individual rights.

My own observation of developments in Indochina, has convinced me that a voluntary army, as proposed by Mr. HATFIELD, can be feasibly implemented before the end of the war.

I. THE VOLUNTARY ARMY

1. THE DRAFT MUST END

The time has come for the creation of an all-volunteer army to replace the draft.

Conscription is a kind of involuntary servitude. It fails to comport with a basic tenet of our democratic society—the right of an individual to determine his own life in accordance with his own values.

The existing draft system has proven costly, inequitable and divisive. It has introduced needless uncertainty into the lives of millions of young men. It has been riddled with loopholes and inconsistencies. It burdens draft boards with impossible decisions about who shall serve and who shall be deferred.

More important still, the draft has been a deeply divisive influence in our society. It has brought the Vietnam war home to our shores, by compelling those who question the morality of that conflict to fight and risk their lives in it.

Admittedly inequitable conscription has for years been considered a necessary evil. It is no longer necessary. It should be ended.

2. THE GATES COMMISSION PLAN

The Gates Commission—chaired by a former Secretary of Defense and composed of distinguished Americans from all walks of life, including two retired generals—has made a powerful and convincing case for the establishment of an all-volunteer military force.

The Commission's report demonstrates that the armed services could meet their military manpower needs—estimated at between 2 and 3 million men—by voluntary recruitment rather than conscription.

The draft has kept military pay levels artifically low. The creation of an all-voluntary army would require pay increases—now long overdue—that would make military careers competitive with civilian work.

The Gates Commission has shown that the cost of these pay increases would be within reason. It would be in the $3 to $4 billion range, about a half a billion of which the Federal Government would recover in the form of increased tax collections from servicemen.

The Commission makes the very telling point that an all-volunteer army would result in long-run cost savings for the Nation, by eliminating the indirect costs of the draft. The economy would benefit from the services of skilled persons who now are forced into military service at low pay and are not permitted to practice their skills. The utilization of these skills would, in turn, benefit the Federal Government through increased tax collections.

A voluntary army would also reduce military training costs through greater retention of trained personnel for longer periods.

Voluntary recruitment would also improve the morale and effectiveness of our Armed Forces. We would have an army of skilled soldiers who served because they wanted to. As my colleague, Senator HATFIELD has said:

> Competence, not compulsion, is the key to an effective national defense.

The Gates Commission has also effectively answered the stock objections that have been raised against the concept of a voluntary army. The Commission refutes, for example, the contention that the draft should be preserved to guard against the growth of an anti-democratic military ethos. The Commission points out that low-ranking draftees do not shape the attitudes of the Armed Forces; rather, the officer corps does, and the officer corps even now is recruited voluntarily.

3. TIME OF IMPLEMENTATION

A year or so ago, it appeared that the manpower needs for the Vietnam war were so great as to preclude the creation of a voluntary army so long as hostilities continued.

The arguments marshalled by the Gates Commission, as well as my own observation of developments in Vietnam, have in the meantime convinced me that a voluntary army can feasibly be implemented before the end of the war.

Accordingly, I concur with the Commission's recommendation that the all-volunteer army be established at the end of the current fiscal year, when existing draft legislation expires.

A STANDBY DRAFT SYSTEM

A volunteer army is certainly capable of meeting the current military manpower needs of the Nation.

It is conceivable, however, that some national emergency would so far expand

these needs that conscription might again become necessary. If such a situation should arise we should be fully prepared to raise additional forces on short notice. I therefore support the Gates Commission recommendation that legislation be enacted to provide for a standby system of conscription which might be relied upon in extreme situations. A standby draft system could only be activated after the President requests and Congress grants requisite approval. I stress that the standby draft system can only be invoked by resolution of Congress at the request of the President.

The Hatfield amendment makes specific provision for reinstituting conscription if voluntary forces should not be adequate in number to meet the demands of national security. The legislation also provides for the continued registration of all males who might be conscripted in the event that the President, with the advice and consent of Congress, should so determine. Both these provisions are consistent with my position and the Gates Commission's recommendation that standby draft machinery be available in the event of a national emergency.

FUNDAMENTAL REFORMS SHOULD ACCOMPANY STANDBY SYSTEM

It is absolutely essential that a standby draft system correct the deficiencies of the present Selective Service System.

Such corrections should include the abolition of student deferments, the reduction of occupational deferments, and the retention of clearly defined hardship deferments. These fundamental reforms should be made now, while we have time to carefully consider the merits of each, rather than later, when we will not have the time or the inclination, to construct a system carefully.

It is also essential that a standby draft system be administered better than the Selective Service System. To head the standby draft system, Congress should authorize a National Selective Service Commission. This would be a five-man civilian body having administrative authority over 300 to 500 local boards.

The Hatfield amendment does not provide for these needed reforms. I will therefore, within the next few weeks, make a series of proposals for a complete overhaul of the existing draft laws—that could be used as a basis for the standby draft.

Mr. BYRD of West Virginia. Mr. President, the concept of an all-volunteer army is indeed an appealing one—and one that I strongly favor.

However, for a number of reasons, I do not feel that amendment No. 765, by Mr. HATFIELD, and others, is the proper means by which to change that concept into a reality.

For one thing, the amendment would add an estimated $4.3 billion annually to the Military Procurement Act, inasmuch as there are no funds currently budgeted for the enactment of amendment 765. Mr. President, the Armed Services Committee worked tirelessly in the preparation of the Military Procurement Act, and had reduced the authorization therein by $1 billion before reporting the bill to the floor for consideration.

Thus, it seems unwise to me for the Senate to pass an amendment that has been offered from the floor that would increase funding under the Military Procurement Act by 22.4 percent.

Another factor which, in my opinion, weighs against adoption of amendment 765 is the fact that no hearings have been held on the amendment, either in the House or in the Senate. I am aware that the amendment is based on the recommendations of the Gates Commission, a group comprised of distinguished and sincerely dedicated persons; but I also believe that consideration of an amendment of this magnitude and far-reaching importance should be preceded by thorough congressional hearings.

Finally, Mr. President, this amendment assumes that the military draft will be terminated after June 30, 1971; and, based on the present situation that eventuality cannot be assured at the moment. The Secretary of Defense has gone on record as favoring a volunteer army, but he has also gone on record as doubting that such a changeover could take place by July of next year.

We are in the midst of a shooting war, Mr. President, and I do not believe that now is the time to make a final decision on whether the draft can be abolished in less than a year's time. We cannot rightly take such a step purely on the hope that next July 1 will find the world a safer place in which to live.

I support the concept of an all-volunteer army, and, in that general respect, I find that amendment 765 has more than a little merit. I am hopeful that sometime in the future it may be possible to enact its substance into law and to end the conscription of our young men without endangering the security of the entire Nation.

However, the high cost of the amendment, the fact that no congressional hearings have been held to determine its possible effects, and the fact that it has been proposed while our country is tied down in a war in Southeast Asia, have convinced me to vote against it at this time.

Mr. HATFIELD. Mr. President, I yield back my time.

Mr. STENNIS. Mr. President, I yield back my time.

The PRESIDING OFFICER. All remaining time on the amendment has been yielded back. The question is on agreeing to the amendment—No. 844.

Mr. STENNIS. Mr. President, what is the parliamentary situation? What is pending before the Senate?

The PRESIDING OFFICER. The amendment, as modified, is pending before the Senate.

Mr. STENNIS. The Hatfield-Goldwater amendment?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. STENNIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STENNIS. This is a straight vote on the Hatfield-Goldwater amendment, up or down, or yes or no?

The PRESIDING OFFICER. That is correct.

The question is on agreeing to the amendment. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD (after having voted in the affirmative). I have already voted in favor of the Hatfield-Goldwater amendment. The Senator from Arkansas (Mr. FULBRIGHT) is absent because of a death in his family. Were he present and voting, he would vote "nay." If I were at liberty to vote twice, I would vote "yea." Therefore, I withdraw my vote.

Mr. HUGHES (after having voted in the affirmative). I have already voted "yea." The Senator from Nevada (Mr. CANNON) being necessarily absent, I withdraw my vote and state that I have a live pair with Senator Cannon.

Mr. KENNEDY. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from Montana (Mr. METCALF), and the Senator from New Mexico (Mr. MONTOYA) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Maryland (Mr. MATHIAS) is detained on official business.

On this vote, the Senator from Alaska (Mr. STEVENS) is paired with the Senator from South Dakota (Mr. MUNDT). If present and voting, the Senator from Alaska would vote "yea," and the Senator from South Dakota would vote "nay."

On this vote, the Senator from California (Mr. MURPHY) is paired with the Senator from Ohio (Mr. SAXBE). If present and voting, the Senator from California would vote "yea," and the Senator from Ohio would vote "nay."

The result was announced—yeas 35, nays 52, as follows:

[No. 271 Leg.]

YEAS—35

Baker	Gurney	Prouty
Boggs	Hart	Proxmire
Brooke	Hartke	Ribicoff
Burdick	Hatfield	Schweiker
Church	Jordan, Idaho	Scott
Cook	McGovern	Smith, Ill.
Cranston	Moss	Symington
Dole	Nelson	Williams, N.J.
Fannin	Packwood	Williams, Del.
Fong	Pastore	Yarborough
Goldwater	Pearson	Young, Ohio
Goodell	Percy	

NAYS—52

Aiken	Dodd	Javits
Allen	Dominick	Jordan, N.C.

PRESENT AND GIVING LIVE PAIRS, AS PREVIOUSLY ANNOUNCED—2

Hughes, for. Mansfield, for.

NOT VOTING—11

Cannon	Mathias	Murphy
Fulbright	Metcalf	Saxbe
Gravel	Montoya	Stevens
Inouye	Mundt	

So the Hatfield-Goldwater amendment, as modified (No. 844), was rejected.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BYRD of West Virginia and Mr. BENNETT moved to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. HARRIS. Mr. President, I previously offered an amendment to the Hatfield proposal which raised certain serious concerns I thought should have been carefully considered before that measure was acted upon.

The authors of the Hatfield proposal were not willing to accept it, nor was the principal opponent of the proposal, the Senator from Mississippi (Mr. STENNIS), willing to support it; therefore, I did not press it to a vote. The distinguished Senator from Mississippi did assure me and the Senate that all these matters would be taken up by his committee in connection with extension of selective service.

But, until the questions I raised are answered—and they were not answered during the course of the debate—to my satisfaction. I did not feel that we were ready to move into the idea of a volunteer armed service. For these reasons, I voted against the amendment.

PAY DETAILS UNDER THE HATFIELD ALL-VOLUNTEER CONCEPT

Mr. STENNIS. Mr. President, I would like to comment on the specific pay proposals contained in amendment No. 765 which has been reprinted as No. 844.

TYPES OF MILITARY PAY AFFECTED

Mr. President, the amendment affects a number of the compensation elements for the Armed Forces. The largest increases would, of course, be the basic pay rates for both the Active and Reserve Forces for the enlisted and officer pay grades during the early years of service with the greatest increases being extended to those with under 2 years of service. In addition the bill would also provide for changes in the special pay for physicians and dentists; expansion of the proficiency pay system; an increase in hostile fire pay from $65 to $200 per month; establish a new category of combat zone pay for $65 per month; provide for an extension of time from 3 to 6 months within which recruitment bonuses might be paid; and provide for certain transportation and travel allowances for enlisted members in the lower pay grades.

Additionally, there would be statutory authorizations for ROTC scholarships of $10,000 in each of the Army, Navy, and Air Force programs.

DISCUSSION OF BASIC PAY INCREASES

Mr. President, the Hatfield amendment itself does not set forth a new basic pay scale for adoption but provides for certain guidelines under which the Secretary of Defense would formulate a pay scale based on years of service and certain dollar differences between the enlisted and junior officer pay scales. The Department of Defense at my request has constructed a pay table based on the general guidelines provided in the amendment. Certain modifications were made in order to prevent pay inversions, that is, instances where persons in a lower rank would be making more than those in a higher rank. I ask unanimous consent to insert the table in the RECORD at this point. It will be noted, the increases are cited on a monthly basis.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

PRELIMINARY DOD ESTIMATES OF BASIC PAY INCREASE AS PROPOSED BY THE HATFIELD AMENDMENT TO H.R. 17123 (MONTHLY)

Mr. STENNIS. Mr. President, the principal increases in this proposal would be for those in the under 2 years of service pay brackets for enlisted personnel. The E–1 recruit would receive a 97-percent increase—$120—from $124 to $245; the E–1, a 104-percent increase—$138—from $133 to $272; the E–2, a 116-percent increase—$160—from $138 to $298; the E–3, an 88-percent increase—$149—from $167 to $316; the E–4, a 49-percent increase—$114—from $231 to $345; the E–5, a 33-percent increase—$92—from $275 to $367; the E–6, a 26-percent increase—$84—from $318 to $403. All of these, Mr. President, relate to these grades in the under 2 years of service pay bracket. In terms of numbers most of the enlisted men would be in the pay grades E–4 and below. The pay scale would also provide for lesser increases ranging out as far as 10 years of service in the extreme cases.

The officer pay grades would be increased in amounts ranging as follows: O–1, 34-percent increase—$142—from $417 to $599; O–2, a 38-percent increase—$179—from $468 to $647; O–3, a 24-percent increase—$147—from $606 to $793.

One of the problems, Mr. President, when a $4 billion pay measure is being considered, is whether all of the increases should be concentrated in the pay brackets for the earlier years. I think a strong case could be made that least hearings should be conducted to see whether any of the career pay brackets should not also be increased to provide a greater inducement for remaining in the service on a career basis. One effect of this amendment is to "flatten out" the pay brackets in a manner which will provide for lesser increases based on years of service with the result that there will be a smaller inducement for remaining in the service and achieving a higher grade.

Mr. JAVITS. Mr. President, for many years I have expressed my opposition to the concept of what is euphemistically called a volunteer army. I have never believed that a mercenary army is best for America and still do not believe so. Thus, I am voting against this amendment.

I have no quarrel with the conclusions of the Gates Commission that a voluntary army is feasible and that it might even improve the efficiency of the armed forces. Nor is my opposition to a volunteer army based solely on cost considerations, although these cannot be completely ignored.

A volunteer army is, in essence, a mercenary army. It is, of course, possible that civilian control could still be maintained over such an army. But history and the experience of other countries speaks loudly to the contrary—too loudly for me. Up to now, at least, free men have been willing to bear the burden—evenly imposed—of fighting for their own freedom. An army of mercenaries has been associated with autocracy and expanding empire.

It has been argued that the draft has not kept us out of Vietnam and that keeping the draft merely insures a continuous supply of cannon fodder for underwriting similar foreign excursions. My answer is that the draft cannot be used as the scapegoat for our policy in Vietnam. The draft is not what got us into Vietnam. On the contrary, as I have stated, it is responsible for the widespread discontent which is helping to get us out. Equally important, it is the present unhappiness with the results of our Vietnam policy which, in my judgment, have lessened the chances of any administration making the same mistake in the future.

Thus, the draft has become a means of limiting the free hand of those who would be quick to commit America's military might to the support of dubious causes. Its existence guarantees that those who would commit our Armed Forces to foreign struggles will be held accountable by all the public, not just a comparative minority whose concerned protests, however strong, can be shrugged off with impunity. An army of volunteers could not possibly have such an inhibiting effect.

Nor do I believe that there is anything inherently "undemocratic" about a draft. On the contrary, insofar as the draft imposes the risk of sacrifice equally upon all, it is clearly more in keeping with fundamental democratic principles than a system which depends primarily on mercenaries, drawn largely from those who have been unable to fit into the domestic mainstream of America.

As those of us who have fought the battle to cut defense spending and establish a higher priority for vital domestic programs in such areas as hunger, education, jobs, housing, and health know all too well, that kind of money is not lying around loose in the Treasury, or in the pockets of American taxpayers. Nor is it going to be found in the defense budget. If it is necessary to find additional funds to cover the higher costs of a volunteer army, they are going to come out of just those domestic programs which offer some hope to those millions of Americans who have been left behind in our steady march toward affluence. For the reasons I have just stated, I cannot conclude that the draft, in principle, is so objectionable that it is necessary to make such sacrifices as to eliminate it.

It is for all those reasons that I have been in principle opposed at this time to the so-called volunteer army. But I have deep concerns about the draft. I do not join in the proposition that the draft is fair. Right now I think it is very unfair in terms of the absence of national standards and the tendency to draft people on the basis of economic condition or on the basis of their fortune—whether or not they are in college, or in other circumstances.

I shall do my utmost to bring about draft reform. We are coming to the time when the draft has to be extended next year, if it is to be extended, and I believe draft reform will be in order.

In short, I believe that in a society like ours the duty of military service is a great restraint to war. The Vietnam experience is educating our people to the meaning of war, and when that is done it is more of a restraint.

But the system must be a just one and appeal to justice in the eyes of the people, the eyes of those subject to the draft, which it does not do today. It must be a truly national system, which it is not today, and lay on with even hands as to the national interest and the liability to the draft of young people, whatever may be their economic or other situation in life.

I pledge my efforts to see that that kind of justice and fairness prevails. As I pointed out, we will have a very good opportunity to do that because the draft comes up for renewal next spring. The way is clear for draft reform, in hearings before the committee, and other action of the Senate, to see that that is brought about. I hope we channel our efforts in that direction.

Finally, let me add, Mr. President, that in the event we are unable to achieve true draft reform in the near future, I shall certainly reassess my position on the issue before us today. I have by no means concluded that the draft, in the inefficient and discriminatory manner it operates today, is any better than a volunteer army would be, for all its problems.

SENATE RESOLUTION 457—SUBMISSION OF A RESOLUTION AUTHORIZING THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO CONDUCT A STUDY CONCERNING THE SHORTAGE OF COAL EXISTING IN THE UNITED STATES

Mr. COOPER. Mr. President, I submit a resolution on behalf of myself and the senior Senator from West Virginia (Mr. RANDOLPH), the Senator from Tennessee (Mr. BAKER), the Senator from West Virginia (Mr. BYRD), the Senator from Kentucky (Mr. COOK), the Senator from Virginia (Mr. SPONG), the Senator from North Carolina (Mr. JORDAN), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Alabama (Mr. SPARKMAN), the Senator from South Carolina (Mr. THURMOND), the Senator from Michigan (Mr. GRIFFIN), and the Senator from Washington (Mr. MAGNUSON), to authorize the Committee on Interior and Insular Affairs to conduct a study and investigation concerning the existing shortage of coal in the United States and the critical shortage projected in the coming months.

The PRESIDING OFFICER (Mr. FANNIN). The resolution will be received and appropriately referred; and, without objection, the material will be printed in the RECORD, as requested by the Senator from Kentucky.

The resolution (S. Res. 457), which reads as follows, was referred to the Committee on Interior and Insular Affairs:

S. RES. 457

Resolution authorizing the Committee on Interior and Insular Affairs to conduct a study and investigation concerning the shortage of coal existing in the United States.

Whereas, the nation's production of coal is a vital element in the ability of the nation to meet its national energy requirements;

Whereas, the nation's existing production of coal is not sufficient to meet the demands therefore;

Whereas, this existing shortage of coal is likely to worsen and impose a severe hardship on the consumer and the nation during the coming months unless immediate action is taken;

Whereas, the Council of Economic Advisors in its Inflation Alert Report of August 7 has found that the price of bituminous coal has increased 56 percent in the first six months of 1970; and

Whereas, the urgency of the situation requires that some action be taken immediately: Now, therefore, be it

Resolved, That the Committee on Interior and Insular Affairs, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to make a full and complete study and investigation with respect to the existing critical coal shortage in the United States with a view to determining the extent to which, if any, each of the following has contributed, is contributing, or may contribute to the existing or any future coal shortage in the United States:

(1) the lack of an adequate number of freight cars of the nation's railroads for loading and transporting coal;

(2) the effect of the Federal Coal Mine Health and Safety Act of 1969—including the unavailability of coal mining equipment required for compliance with the Act—on mine closings and loss of coal production and on the increased costs of coal;

(3) the increasing exportation of coal from the United States to foreign markets;

(4) the existing shortage of manpower needed for operating the nation's coal mines and the lack of adequate training program for miners; and

(5) the growing concentration of ownership of the nation's sources of coal supplies among a few large operators who own and operate competing sources of energy, (such as oil and gas); and the effect of this concentration of ownership on the production of coal.

SEC. 2. The Committee shall report its findings upon the study and investigation authorized by this resolution, together with such recommendations as it deems advisable, to the Senate at the earliest practicable date, but not later than .

SEC. 3. For the purpose of this resolution the Committee, through , is authorized (1) to make such expenditures as it deems advisable, and (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants.

SEC. 4. Expenses of the Committee, under this resolution, which shall not exceed $, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the Committee.

Mr. SCOTT. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the resolution.

Mr. COOPER. Mr. President, I ask unanimous consent that the name of the Senator from Pennsylvania (Mr. SCOTT) be added as a cosponsor of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. RANDOLPH. Mr. President, I commend the distinguished senior Senator from Kentucky (Mr. COOPER) for having submitted a timely resolution which would authorize the Committee on Interior and Insular Affairs to conduct a study and investigation concerning the shortage of coal for marketing and consumption in the United States during this period of fuels and energy crisis. It is a privilege to be associated with the able Senator from Kentucky in cosponsorship of the measure.

Because it is a fact that coal, for so many years, has been the most widely used fuel for the development of electric energy and in the steelmaking process, we find it difficult to realize and understand the condition of scarcity of this essential commodity.

Being from the leading coal-producing State of West Virginia, perhaps I have a broader understanding of the fac-

tors which cause shortages to exist. My able colleague from West Virginia (Mr. BYRD), as well as our colleagues from other leading coal producing States—including the senior Senator from Kentucky—likewise possess special awareness of coal's production, transportation, and marketing problems. But I am sure others feel as do I that these problems are so broad in their scope, application, and origins that their identification and solutions must have national cognizance and consideration.

The Committee on Interior and Insular Affairs can provide the proper forum and the apparatus for the hearings and investigative effort so necessary to identification of causes and effects, and so vital to the development of solutions.

The senior Senator from Kentucky and all of us associated with him as cosponsors of the measure he offers today likewise are joined as cosponsors of S. 4092. I introduced this bill on July 16, 1970, to establish a Commission on Fuels and Energy to recommend programs and policies intended to insure that U.S. requirements for low-cost energy will be met, and to reconcile environmental quality requirements with future energy needs.

Mr. President, I am informed that the distinguished Senator from Utah (Mr. Moss), chairman of the Subcommittee on Minerals, Materials, and Fuels of the Committee on Interior and Insular Affairs, will chair the opening hearings on S. 4092 on September 10 and 11. The area of investigation indicated by the resolution submitted today by Senator COOPER is so vitally connected with the purposes of S. 4092 that I hope both measures can initially have concurrent consideration by the subcommittee chaired by Senator Moss. I express this only as a personal hope, of course, and in no wise as an infringement on the jurisdiction of either the Interior Committee or its subcommittee.

The coal shortage and, indeed, the fuels crisis generally, should have priority and expeditious attention, and I commend the distinguished chairman of the Committee on Interior and Insular Affairs, the Senator from Washington (Mr. JACKSON), and the distinguished subcommittee chairman (Senator Moss) for having made arrangements to begin consideration of S. 4092.

I again commend the senior Senator from Kentucky (Mr. COOPER) for his timely and important resolution.

Mr. MAGNUSON. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. MAGNUSON. I come from an area that relies upon hydroelectric power and will, in the future, rely more heavily upon nuclear power but I want to commend the Senator from Kentucky and the Senator from West Virginia on their statements because if we do not do something about expanding the production of power in the next year or 18 months, we will not have a brownout in 1974 but a blackout. I do not want to be around—and I am sure that the Senator from Kentucky and the Senator from West Virginia feel the same way—when my wife turns on that switch and nothing happens. I want to be out of town that day, because she will say, "What have you done about it? This problem, a brownout or a blackout, will happen unless we begin expanding the ability to generate power.

We have been held up by many problems but they are questions that we can solve. This has become a most serious problem in the United States. It could cripple the country. This is true in the Pacific Northwest which does not rely upon coal, but we know there that this is an important problem in the East. The Senator from West Virginia will recall, as will the Senator from Kentucky, that we put money in the appropriation bill for research into this matter, which must go parallel with this effort. I want to tell you, Mr. President, that this is a very serious problem facing this country.

The power needs of the United States doubles, conservatively, every 8½ years. We are way behind. I cannot see how we can catch up without some use of fossil fuels in a more efficient way in the future, and we can find that way in my opinion.

Mr. COOPER. I thank the Senator from Washington very much. He has stated very clearly the serious issues before us.

Mr. President, during the last few weeks, attention has been focused on this very serious problem of a shortage of coal and, indeed, of other fuels. Many comprehensive articles have been published in the press and statements have been made in the House and Senate. A few days ago, I read a graphic statement by the Senator from Vermont (Mr. AIKEN), who pointed out very clearly that the matter of energy is a question of life or death to the economy of the country, its security, and the future needs of its people. He also stated that it was a situation in which a few companies, by gaining ownership of competitive fuels, could actually hold the future of the country in its hands, according to its own decisions.

We, who are sponsoring this resolution, are aware of the fact that the shortage of other sources of energy as well as coal is a problem that the Committee on the Interior may want to study but, as we represent States in which coal production is of great importance, it is natural that we should emphasize the problems of the coal industry.

Let me point out that the shortage of coal was graphically illustrated by the chief representative of the Tennessee Valley Authority, when he testified before the Public Works Committee on August 14, on H.R. 18104, a bill to increase the authorization of the TVA to issue revenue bonds—from $1.750 billion to $5 billion—for financing needed power facilities. Mr. Aubrey J. Wagner, Chairman of the TVA Board stated that TVA must raise its power rate by an average of 23 percent if the Authority is to meet the requirements of section 15(d)(f) of the TVA Self-Financing Act.

Mr. Wagner testified that one of the chief reasons for increasing rates is the increased price of coal, which has doubled over the last year. He pointed out that the increased price of coal has not stimulated sufficient production, that there is an immediate critical shortage of coal and TVA may not be able to obtain sufficient coal supplies to fuel its steam plants. Upon questioning by the committee, Mr. Wagner stated that the causes for coal shortages were:

First. The inadequate supply of freight cars for coal transportation; second, increased exports of coal; third, the growing concentration of ownership of the Nation's coal production and coal resources in companies producing competitive fuels; and fourth, the Federal Coal Mine Health and Safety Act of 1969, which has caused mine closures and loss of coal production.

As the Tennessee Valley Authority is the largest purchaser of coal not only in our country but in the world, the testimony of Mr. Wagner and his associates is of great importance.

Last year when the Senate was considering the Federal coal mine health and safety bill I pointed out, as did other Members of the Congress, that the bill, while providing many needed safety requirements, also included provisions unnecessary and economically not feasible for hundreds of safe nongassy mines and that, as a result, many nongassy mines with good safety records would be forced to close. This is occurring and will continue to occur and the unnecessary closing of nongassy mines has contributed to the existing shortage of coal. Ironically, the large gassy mines are open, but cannot replace the production of the closed mines. Another unfortunate consequence which I stated at that time would take place has been the shift of underground mining to strip mining with all its unhappy consequences.

Many news articles have commented on the ownership of coal mines and coal resources by oil and gas companies and other companies producing competitive fuels. I have been informed that the Antitrust and Monopoly Subcommittee of the Senate Committee on the Judiciary conducted preliminary hearings on this question early this year, and that the findings of the subcommittee were startling, indicating that many of the largest coal companies in the United States had been acquired by oil and gas companies. It is necessary that the effect of these acquisitions on competition and production be thoroughly investigated not only by the Congress but by the Department of Justice.

Mr. President, I know the investigation of coal and other energy shortages and their causes will be a task of large proportions, one requiring adequate provision of funds and staff. It is possible that the jurisdictions of several committees will overlap, such as that of the Committee on Public Works, to study the problems of the energy requirements of the Tennessee Valley Authority, as an illustration of the problem many industries face; the Committee on Labor and Public Welfare, to examine the effect of the Federal Coal Mine Health and Safety Act on causing unnecessarily the closing of safe mines; and the Subcommittee of Antitrust and Monopoly of the Senate

Committee on the Judiciary to examine further the effect on competition of the acquisition of coal mines and resources by companies owning competitive fuels.

The distinguished senior Senator from West Virginia, Senator RANDOLPH, has introduced S. 4092, a bill "To establish a Commission on Fuels and Energy," and the bill has been referred to the Committee on Interior and Insular Affairs. I understand that hearings will be held soon on this bill. I hope very much that the Committee on the Interior will conduct as quickly as possible a full investigation and study of the shortage of coals and other fuels and will make its recommendations to the Senate.

This is a matter of greatest importance and the recommendations of the committee will be of great service to our country.

Mr. ALLOTT. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I am happy to yield to the ranking member on the Committee on Interior and Insular Affairs.

Mr. ALLOTT. Mr. President, I think that the resolution which the Senator from Kentucky has introduced is a valid and a very good one. The only thing that perturbs me about it is its scope, but I do not believe it should be disregarded because it is so large in scope.

What the Senator has actually offered here is an indepth study of all our energy requirements. It is something that is badly needed. I hope that when this is considered, if it is considered, that we undertake it seriously, because as the Senator said to me the other day when I raised the question with him, it is going to take a pretty large staff, and it will take a highly skilled and professional staff to come up with the kind of answers the Senator is calling for.

I hope that Congress, when this matter comes to the floor of the Senate for consideration, will realize its seriousness and will do the kind of job that is needed; otherwise, I do not believe that we should touch it unless we intend to do it thoroughly with good help—all the help we can get.

Mr. COOPER. I thank the Senator from Colorado very much. The problem is serious. I am glad he has pointed out it would require adequate funds and an adequate staff to take care of this.

Mr. President, I ask unanimous consent that a number of newspaper articles and other relevant statements that have appeared in the past 2 months concerning the current coal shortage, the increase in coal prices, the increase in stripmining, and the problems of the TVA in obtaining coal supplies, together with a copy of the Inflation Alert Report of August 7 by the President's Council of Economic Advisers which found that the price of bituminous coal has increased 56 percent in the first 6 months of 1970 be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE INFLATION ALERT REPORT OF THE COUNCIL OF ECONOMIC ADVISERS RELATING TO COAL—AUGUST 7, 1970

FUELS

Prices of industrial fuels have advanced with exceptional rapidity during the past year and especially during the first half of 1970 (see table). The sharpest increase has been for bituminous coal which rose at the annual rate of 18 percent in the last half of 1969 and spurted to a 56 percent rate in the first half of the current year. There have been several reasons for this development. In the first place, there has been a very substantial increase in foreign demand, especially for metallurgical coal used in steel making, while some domestic utilities have had to use more coal than anticipated because of delays in their nuclear generation projects. Secondly, increasingly stringent pollution regulations have required many electric utilities to change their fuel specifications to low-sulfur coal. As it happens, most low-sulfur coal is also metallurgical grade, further augmenting the pressure on the type of fuel. Third, safety regulations are being tightened and while these may not yet be fully effective, it appears that they have added substantially to mining costs. Labor unrest and wildcat strikes in some fields have put still further pressure on supplies. Finally it takes years to open the new mines that may be needed to cope with this unforeseen increase in demand.

The table referred to follows:

CHANGES IN WHOLESALE PRICES OF FUELS DURING 2D HALF OF 1969 AND 1ST HALF OF 1970

[Not seasonally adjusted, except as indicated]

Item	Percentage change per year during			
		1970		
	1969, 2d half	1st half	1st quarter	2d quarter
Fuel and related products and power[1]	3.3	3.6	0.8	6.5
Bituminous coal	18.1	56.0	34.4	81.1
Residual fuels	6.2	47.6	36.0	60.3
Natural gas	2.4	3.1	−1.1	5.1

[1] Seasonally adjusted; includes some commodities not shown separately.

Source: Department of Labor.

The price of residual oil, most of which is imported, has also advanced very rapidly, at an annual rate of 48 percent in the first 6 months of 1970. Here, again, a number of factors have been involved. World demand has been rising sharply. As in the case of coal, many utilities have been required to shift to lower sulfur oils, adding to costs and limiting sources of supply. In addition, tanker rates have increased very rapidly in recent months, partly as a result of the closure of a pipeline through Syria and production cutbacks in Libya.

Prices of natural gas also rose somewhat more rapidly in the first half of 1970 than in the last part of 1969. The increase in natural gas prices, however, has not been nearly as rapid as for coal and residual fuels, averaging an annual rate of only 3.1 percent in the 6 months ended June 1970. It should be noted, however, that natural gas prices are subject to regulation and that the flow of natural gas to utilities and other major consumers is often "interruptible," subject to being cut off when supplies are inadequate to meet total demand.

[From the Louisville Courier-Journal, July 3, 1970]

LACK OF COAL MAY FORCE ARMCO LAYOFFS AT ASHLAND

CINCINNATI.—Major coal users said yesterday that rising prices and shortages brought on by a strike by miners in four states were causing a critical situation in the United States.

Armco Steel Corp. predicted layoffs in four plants—including one at Ashland, Ky.—if no progress is made by Monday. Representatives of Ohio and Michigan utility companies, hospitals and Ohio manufacturing firms also said their situation is serious. They appeared at a joint news conference.

Meanwhile, a back-to-work trend began developing yesterday in the coal fields of Southern West Virginia and Eastern Kentucky. Only one mine remained closed in Pike County, Ky., while across the border in Mingo County, W. Va., officials reported 10 mines operating that had been shut down by the strike, sparked by disabled miners.

R. P. Hindman, administrative vice president of the Steel Group of Armco, said the company might have to begin laying off workers and curtailing operations at its plants at Middletown and Hamilton, Ohio; Houston, Tex., and Ashland.

Hindman said that Armco has only a 10-day supply of coal left. Normal supply for Armco is 30 to 45 days. Its Middletown plant alone uses 10,000 tons of coal daily.

As many as 17,000 persons at the Armco plants could be affected eventually, Hindman said.

PRICES HIGHER, QUALITY LOWER

Tom Andrews of the Dayton Power & Light Co. said that the price of coal has tripled in the past two years.

Stanley Longefels, associate administrator of Cincinnati General Hospital, said that not only has the price of coal increased, but the quality is "inferior." Spokesmen for the Hamilton, Ohio, city utility division concurred.

A Cincinnati Gas & Electric Co. executive, Arthur Ehrnschwender, said his company has experienced coal increases as high as 25 per cent in the past year and the cost of coal on spot orders to supplement long term deliveries has doubled.

He said the reasons for the coal supply situation were the inability of the mining industry to keep up with the growing demand; increased exports to foreign nations; labor unrest in the mining industry, and the new Federal Mine Safety Law, which has put some mines out of business and has caused a price increase by those still able to operate.

Ehrnschwender also said the quality of the coal his company receives "has deteriorated to a point where we are encountering additional problems in our normal process of handling it, burning it and disposing of the ashes."

[From the Louisville Courier-Journal, July 17, 1970]

STATE IS HAVING TROUBLE FINDING COAL FOR WINTER

(By William Bradford)

FRANKFORT, KY.—In the heat of summer some state officials are concerned about buying coal to keep state facilities warm next winter.

Not only is the cost of coal shooting upward, but producers who are ready to commit themselves to sell to the state are downright scarce. A recent effort by the state to get bids for coal brought only six responses from 110 suppliers who were contacted.

And not a single offer was made to sell coal to Eastern Kentucky University. It is expected to need about 12,500 tons.

N. B. McCubbin, state purchasing director, and his chief buyer, J. A. Luigart, are going to Southeast Kentucky next week to try to buy coal for the university on the spot from mine operators in Clay and Leslie counties.

The recent bid-opening revealed offers that ran 80 to 125 per cent higher than last year for Eastern Kentucky coal and 25 to 44 per cent higher for West Kentucky coal. And bids for deep-mined coal in West Kentucky were subject to 30-day notices of price change and any increase resulting from wage boosts.

LEGISLATION BLAMED

Luigart attributed the high prices and scarcity of bids to "the tremendous confusion" over the federal Coal Mine Safety Act of 1969 and other legislation.

Finance Commissioner Albert Christen has

urged state institutions to stockpile coal this summer to avoid a recurrence of what has been called "dangerously low" supplies last winter.

Another measure which might be taken in some instances is to establish an alternate fuel supply, such as storing fuel oil for emergencies.

The situation is going to put considerable stress on several budgets, Christen said. Some allowance had been made for higher coal prices, he said, "but nothing like what we're going to experience."

McCubbin asserted that there is no coal shortage but that mine operators are unwilling to commit themselves to long-term contracts because of uncertainties over the cost of new federal requirements.

Indicative of that and other problems is a letter the Charles Buddeke Coal Co., Louisville, attached to its bid to sell coal to several state institutions, including Central State Hospital.

REPORT DUE AUGUST 1

"Due to conditions within the coal industry," the letter said, "we are unable to guarantee delivery of the coal because of the inability of the mines to ship, and the railroads to make deliveries. We are unable to give a firm price beyond a 30-day period."

Luigart is to make a study and report on the fuel situation by Aug. 1.

Bids for supplying each ton of coal to some of the major state institutions—with only one bid offered in each case—were: Kentucky State College, $18.20, up from $9.80; Morehead State University, $14.92, up from $8.42; Murray State University, $12.40, up from $9.35; Western Kentucky State University, $10.50, up from $8.50.

For the University of Kentucky's central heating plant, this year's sole bid was $12.93 a ton, compared with last year's adjusted cost of $9.93. For the UK Medical Center, this year's bid was $14.93 a ton, compared with a 1969 cost of $9.33, adjusted to $11.43 in May 1970.

[From the Louisville Courier-Journal, July 26, 1970]

COAL RETAIL PRICES UP BY $6 A TON, MAY GO HIGHER

Retail prices for home-delivered coal have leaped as much as $6 a ton in the past year, Louisville area coal dealers report.

The price of coal "went up a couple times during the summer time, and I'm looking for it to go up again before Christmas," one coal retailer said.

Louisville prices for home-delivered coal, most of which comes from Eastern Kentucky, range up to $24 a ton.

But Louisville Gas & Electric Co., which uses coal from Western Kentucky, reports that its coal costs have risen, too.

B. Hudson Milner, president of LG&E, said the company uses 2.2 million tons of coal a year in its generating plants, explaining that he cannot make the cost of this coal public under the terms of the company's coal contract.

THIRD FACTOR IS NOTED

The cost is "considerably above" what it was five years ago, however, and he added that the new Mining Health and Safety Act alone probably increased the price of coal about 50 cents a ton.

A general shortage of coal also has raised the price, Milner said, "and a third factor in Eastern Kentucky is the competition in there for metallurgical coal, including people from as far away as Japan offering great big prices."

Metallurgical coal, or coking coal, is a purer grade of coal containing fewer noncombustibles. It is used in the steel industry.

The Associated Press reports that the Japanese are buying more coal in their attempts to double their steel production by 1980.

In 1968, Japan bought 14.3 million tons of U.S. coal, and in 1969 that figure jumped to 19.1 million tons.

[From the Washington Star, Aug. 10, 1970]

THE ENERGY PUZZLE

(By Charles Bartlett)

PIKESVILLE, KY.—The prosperity in Pikesville is one piece of a puzzle which is making electric power more costly and less certain to meet the national goals.

The price being paid the mining companies which dig coal out of the mountains and sell it at the railhead here has doubled in less than a year. The miners are getting more wages and a boom spirit is causing small mountain towns like this one to shed their depressed look.

The hair-dressing shops open ahead of the banks these days in Pikesville and the clusters of people waiting to do business in the latter are cheerful and dressy. The three banks in this city of 5,800 are bulging with deposits of over $90 million.

The coal miners are making money but they know they are also making problems for the future. The boom, they sense, will be short-lived because the costs of mining will quickly catch up with the prices. This is the "feast" phase of a "feast or famine" business but the mine operators are too wary of the conservationists, the mine safety law, and the shortage of hopper cars to relish it.

They lost a residential market for coal in the post-war boom and now they fear they may price themselves out of the utility market. Power generation kept the coal industry alive until the Japanese demand developed. But now big customers like TVA, unable to secure low sulphur coal at feasible prices, are starting to urge that foreign oil destined for steam plants be exempted from the import quotas.

The rush to get the coal out of the knobby Appalachians has aroused the conservationists, who know the boom could bring a scarred end to the special beauty of this rugged country. But the new respect for ecology promises that it won't be as easy as it might have been five years ago.

In fact the surface miners, obliged to live with a stiff 1966 Kentucky law, know they are going to have to demonstrate that their reclamation practices will leave the mountain country no less attractive than they found it.

The conservationists insist that this will be impossible. Certainly the cliff-like scars in the forest mantle will be visible for generations, perhaps forever. The compensating factors, surface miners maintain, will be the roads and level spaces they create. They already point to a golf course, an airport, orchards, and homesites which have evolved from their penetrations of the steep slopes.

The real problem is that surface mining is expanding voraciously because the new mine safety law is causing small operators to close down their shafts. Less and less coal will come out of the mines as the new provisions take effect because they require investments which small operators can't afford and machinery which is not available. The law is a key factor in the rise of coal prices.

This seems, from the vantage point of east Kentucky, to have been an instance in which the legislators were more guided by emotion than by wisdom. The Farmington mine disaster swept all the arguments before it and the coal state senators, led by John Cooper of Kentucky, are now rallying their strength to try to amend the impracticalities in the act. They face a difficult task.

But the national policies on coal and other energy sources cannot remain impractical for very long. All the factors, including safety and conservation, need to be closely correlated. The pieces of the puzzle are going to have to be put together, perhaps in Washington, or the nation cannot count with assurance on its future supply of power.

[From the National Observer, July 20 1970]

NEW MINES CREATE A BOOM—AND A BANE

(By Mark R. Arnold)

A strange, disquieting thing is happening to the hills and hollows of Eastern Kentucky. They are being stripped for coal at a rate that alarms local residents and puzzles authorities.

Higher coal prices and an aversion to compliace with last year's Federal mine-safety law have resulted in a rash of new strip mines in the region, their existence reflected in a sudden increase in denuded mountainsides and bad roads.

While conservationists fume, and state officials profess disbeliefs, strip mining—ripping off the earth's face to extract the coal—is becoming Appalachia's most visible growth industry, filling railroad cars with coal and workers' pockets with money even as it defaces the hills and threatens to pollute streams.

A week's investigation in Eastern Kentucky, coupled with talks with officials of three states and visits with strip miners themselves, reveal that:

New strip mines are sprouting at a record rate. Figures compiled for this newspaper by the Kentucky Department of Reclamation indicate stripping activity has jumped 45 per cent this year alone, compared with a usual 10 per cent to 12 per cent annual increase in the amount of land approved for stripping. Officials in neighboring Virginia and West Virginia say coal strip-mine permits are up 20 per cent to 25 per cent over a year ago.

Unquestionably, part of the reason for the boom in strip mining is last year's Federal mine-safety law, which was aimed at improving conditions in "deep" or underground mines. Instead of investing in the new machinery needed to comply with the statute, many operators are selling out their shares in deep mines and investing in new strip operations. "They can get in and recover the coal far faster that way," explains Ben Greene, West Virginia's director of reclamation.

The sudden boom in strip mining is stiffening the resistance of conservationists and citizens groups, transforming a question of ecology into a hot political issue in many mountain communities. Three Kentucky counties have taken action to ban or curb strip-mining practices in recent months, though the constitutionality of their actions is in doubt. The state's attorney general, John B. Breckinridge, a Democrat in the administration of Republican Gov. Louis Nunn, is in the middle of a three-week personal inspection tour of strip-mining sites. He intends to run for lieutenant governor in the fall.

Strip mining long has been controversial, particularly in the mountains of Appalachia, where reforestation is difficult if not impossible, and people draw sustenance and security from the mountains.

Unlike deep mining, stripping, by definition, defaces the countryside: Huge earth shovels scoop deep wedges out of the mountains, then claw out the coal or bore it out with mammoth drills or augers. Until the mid-1960s, the land removed in the search for coal was often pushed over the edge of the mountains. The subsoil and sediment filled up the creeks, flooding the homes in the hollows below under the pressure of heavy rains. When the coal had been extracted, the operators moved on, leaving the land scarred and battered.

Those days, apparently, are gone for good: Citizen groups who faced down bulldozers with shotguns eventually created enough pressure to assure passage of strip-mine legislation at the state level that curbed many of the worst abuses of the industry.

Yet the toll of years of thoughtless exploitation of the land can still be read in the dried-up creeks that line the roads, and in the ugly patches of naked bluffs that break the curtain of lush mountain greenery on any drive through the back roads of eastern Kentucky.

Just how serious the damage from uncontrolled surface mining is in Appalachia was summarized in a study by the Interior Department a few years ago. It found that 3,200,000 acres of land had been disturbed by stripping, of which two-thirds had not been adequately reclaimed. Included in the total are 20,000 miles of cliff like highwalls gouged out of the mountains. "In some cases," says the report, "the walls completely isolate entire mountaintops." In addition, acid drainage from the mines was pinpointed as the major contributor to water pollution. Almost 6,000 miles of streams and 29,000 acres of impoundments and reservoirs have been "seriously affected" by surface mining.

Such conclusions help explain the alarm being felt over the resurgence of strip mining throughout the region today. Warns Harry Caudill, a Whitesburg attorney and one of Appalachia's most outspoken conservationists: "At the rate they're eating up the countryside, there won't be any Eastern Kentucky in four or five years."

To get an idea of how much strip mining has been started in recent months I visited the regional office of the Kentucky Division of Strip Mine and Reclamation in Hazard, center of a four-county coal-mining area that produces 30 per cent of the coal in Eastern Kentucky. The office, which serves Knott, Letcher, Breathitt, and Perry counties, is doing a brisk business these days, issuing permits.

"We have 61 active companies so far this year, compared to 40 as of last September," reports clerk Carol Green, smoothing a crease in her maternity dress. "Seems like we never had so many new outfits stripping for the first time."

I made appointments with several of the strip miners on her list in Letcher County and set out to see them. There are 25 active strip miners in the county, 8 of them new this spring. Why? "Because this is the best business there is in this area," answers Lawrence Sumpter, a good-looking, 35-year-old former policeman who went to work for another strip miner last year, then branched out on his own in March. Today he's working 12 acres of a 79-acre tract of hillside he owns off King's Creek, not far from Whitesburg.

"All there is is coal," adds Mr. Sumpter, gesturing to the surrounding tree-covered mountains. "Someone's gonna mine it. It might as well be me."

Mr. Sumpter is a small operator, with seven workers, two bulldozers, a front-end loader, a truck, and a 32-inch auger. With a capital investment of $300,000, which he figures he can pay off in three years or less, he is mining 300 tons of coal a day, and selling it to a broker for $6.50 a ton.

A LITTLE MORE TIME

"Give me another 18 months," Mr. Sumpter says, shielding his eyes from the sun with his baseball-type work cap, "and I'll be able to get a triple-head auger. Then I'll be able to pull a lot more coal out of these hills."

Like most strippers, Mr. Sumpter argues the callous practices of the past gave the business a bad name. The current strip-mine law assures that the mountains, however defaced by strip mining, will be restored to productive use. "Of course, we can't put the side back on the mountain," he concedes. "But we can reclaim it through proper seeding to be good pastureland for cattle."

A few miles away on King's Creek lives Michael Ison, youngest of nine children of a family that came to King's Creek more than 200 years ago. He's barely 23, the kind of eager young mountain man who a few years ago might—as a matter of course—have deserted Eastern Kentucky after high school for better opportunities in the factories of Ohio or Indiana.

But Michael's not sorry he stayed. A year ago he and his older brother, Richard, converted a fleet of trucks they owned into a $20,000 down payment on a double-headed auger. "The salesman, he knowed we didn't have much money so he threw in a bulldozer for no down payment," Michael recalled last week. Today the two brothers and a partner have turned that initial investment into a stripping operation that turns out 800 tons of coal a day, at $6.50 a ton.

"My brother's building hisself a $30,000 house, and he's got a new Buick. I paid cash for this 1970 pickup truck, and that 1969 Torino hardtop's mine too. Last week end, I did something I always wanted to do." He gestures toward a gleaming new Honda motorcycle parked on the front lawn of the simple white-frame house his grandfather built. "It was $175 but what the hell." He paused, then added: "We're not just filling our pockets in this thing. Why, we've loaned money up and down this creek to people who wanted to buy a truck to run coal or a 'dozer to mine their own. It's keeping the young people from leaving."

A NEW LEASE

Roy Stewart has been in the mining business—deep mining—since the end of World War II, first in Michigan and Illinois and for the past 8 years in Eastern Kentucky. But last summer he and his partner, Jim Hogg, sold out their deep mine, took out a lease on some prime strip land, and went at it in earnest. "It's the new law that made us switch, all the crazy stuff we'd have to put up with, having big brother snooping over our shoulder. Besides that, there's a lot of coal in these hills that can't be taken out by deep mining. You need to strip to get it. We decided to go after it."

Mr. Stewart also runs a tipple, a storage point and loading platform where the coal is funneled into railroad cars for shipment to market. "A year ago, almost all the coal in these hills was being deep mined," he says. "Now we're filling a 20-car coal train every day and 95 per cent of the coal comes from the strip mines. Everyone and his brother is getting into the act to make a dollar."

The reason they can all make a dollar is that the price of coal has skyrocketed in the past six or eight months. "We're getting $9.50 a ton for common utility-quality coal," says Mr. Stewart. "That's exactly twice what we were getting from our customers last December."

Soaring coal prices, stemming from increased foreign orders on top of a sharp rise in domestic energy needs (for electric power, steel production), seem to be encouraging some mountain people to return to Appalachia. Jobs as heavy-equipment operators or coal-truck drivers for the strip mines pay $4.00 to $4.75 an hour, and young men are said to be coming back.

Most of the newcomers to strip mining are small companies, but the prospects of a low-overhead, high-yield alternative to deep mining is also luring some giants. Beth-Elkhorn Corp., a subsidiary of Bethlehem Steel, in the past has prided itself on its refusal to strip mine any of the 40,000 acres it owns in Eastern Kentucky. Now the company is the largest strip miner in Letcher County.

Opponents of strip mining view the new boom with considerable misgivings. Three months ago, Henderson County, an area of rolling terrain in Western Kentucky, approved a resolution prohibiting the reopening of surface mines that were abandoned years ago there. In Eastern Kentucky, a grass-roots organization called Appalachian Group to Save the Land and the People prevailed upon the fiscal court (county council) in coal-rich Knott County to ban strip-mining entirely.

Argued Paul Ashley, a vocational school teacher who heads the Appalachian Group: "We've got to call a halt to all this destruction that's closing in on us."

A third county, Leslie, has chosen another tack; it has set up a new planning commission to try to zone the strippers into submission to local authority. "The idea's to control 'em, not to ban 'em," says County Judge George Wooten. While the constitutionality of these moves is yet to be determined, they point to a rising concern in Appalachia.

Two weeks ago, Mr. Ashley and other strip-mine opponents led Kentucky Attorney General John Breckinridge on a strip-mine tour of Knott County. The trip turned up several instances in which apparent compliance with the state's 1966 strip-mine law did not prevent acid drainage from polluting streams, or huge mudslides.

One stop was at the home of 88-year-old Granville Napier, whose tar-paper shack backs onto a creek turned brown with mine runoff. A state fisheries expert dipped a water-tester into the creek, took a reading, and shook his head. "Isn't anything could live in water like that," he said grimly. Later, Mr. Napier demonstrated how he must walk to get to his outhouse in the rear of the shack. He has had to lay wood planks to get over the mud that has covered over his back yard because of slides from a strip mine above him.

AN APOCALYPTIC VISION

Strip-mining foes insist that the new stripping boom will ravage the countryside like nothing that has gone before. Whitesburg's Harry Caudill, author of *Night Comes to the Cumberlands*, a classic study of Appalachia's people and problems, holds out an apocalyptic vision of the region's strip-mined future:

"With the advances of technology that are upon us," he says, "they'll shear the tops off all the mountains and run the overburden into all the valleys. They'll obliterate all life if they have to, to get at the coal, and turn the land into a vast ugly spoil bank stretching from one end of Appalachia to the other."

The Kentucky Conservation Council wants to prohibit all strip mining in Eastern Kentucky, where flooding and steep slopes have, in some places, all but made a joke of the law's requirement for reforestation. The land in many places simply cannot be restored.

At one of Beth-Elkhorn's prize reclamation projects, at Millstone Creek, Ky., grassy vegetation and small trees dot the site of an old strip mine. But the ground is interlaced with cracks and gulleys that might in time become landslides. And the steep, denuded highwalls, plainly visible from the road, can never be hidden.

The problem is that, in the short run at least, strip mining provides jobs—fewer jobs than deep mining, to be sure, but jobs nonetheless.

Mrs. Polly Ison, who rocks her days away on the porch of the house her grandfather built on King's Creek, knows what that means. She has three sons strip mining now, 23-year-old Michael Ison, and two of his older brothers. Several other children—she has nine altogether—had to leave the state to find work.

"They say it's destructive to do all this strip mining," she says, shaking her head slowly. "All I know is that some young ones are finding jobs right here in these mountains, and we have a little money coming in regular now. I figure that's something to be grateful for."

STRIP-MINE PIONEER DEFENDS METHOD—AND RESULTS

(By Kyle Vance)

HAZARD, KY.—Henry Wombles, the man who started strip and auger mining in the Kentucky mountains, would do it again in similar circumstances.

At the same time, Wombles said he "never dreamed" 18 years ago that the industry would grow as it has or become "as cursed as it has."

"All we were trying to do back there in 1952, I think it was, was to find a way to mine some coal close enough to the railroads till we could ship it out," Wombles said.

"All of the coal under the mountains had been mined out for five to 10 miles around Hazard, just too far away to bring it in when all you could get for it was $1.68 a ton."

Wombles, who said he would take either credit or blame for his part in surface mining history, said the idea for pulling coal out of the mountainsides with augers came to him from an experiment in Leslie County.

"A man over there by the name of Degan was getting to the outcrop some way," he said. "It wasn't augering, but he was getting some coal."

"I heard about an auger that was for sale up in Pennsylvania and I went up and got it. We put it over in Blue Grass Hollow and we got something started, I guess."

A WAY TO MINE MORE COAL

The good-natured Wombles quit the coal business for awhile as the bigger operations took over. Now he's back directing one of the more ambitious jobs at the Perry-Breathitt County line.

He defends strip mining as "a way out for some desperate people."

"It had got to the place where you couldn't pay a man good enough wages to mine 10 or 12 tons of coal a day," he said. "We found a way where, with machinery, he could mine 60 tons a day, and that saved us."

"We didn't think the first thing about hurting anybody or damaging the scenery, and I still think that we have helped an awful sight more than we've hurt.

"I'd like to see all of the money that surface mining has brought in here to our people piled up in one pile. I'd even say I'd like to own it."

Wombles believes too much has been written about strip mining's damages to the mountains and too little about its benefits to mountain people.

"Stripping looks ugly while you're doing it," he said, "but the way they're doing it now it comes back pretty and green and leaves us some flat ground that I am absolutely sure will be put to some use one of these days."

"Even that stuff we did 'way back there at the start, without putting down a grass seed or a bush, has grown up now till you can't see it from the road unless you are looking for it. And when you get up where it is, there is enough flat land to put a farm or a factory."

"SOME FELLOWS A LITTLE CARELESS"

Wombles took the reporter down KY 15 between Hazard and Jackson to demonstrate his claim. He pointed up hollows covered with green foliage.

"What do you see up there?" he challenged. "You see trees. Well, we stripped all the way around that hill and the bench is still up there. Now, if you'll look real close down here, you will see where the bench comes out in the open. . . .

"What you see up there is the old KY 28 and not stripping, but on down here a piece you'll see where we were at again. . . .

"Now look at that house over there. I'll bet it's worth every bit of $20,000 to $25,000. Look what it's sitting on. That's where we dug a little coal. . . ."

Wombles said he believed the strip mining laws became necessary when the industry started growing to giant size.

"Some of the fellows have been a little careless," he said, "but I think almost everybody now knows what he is supposed to do and is doing it.

"If stripping is done right and the land put back in good shape, it won't hurt many people, but it will help a lot of people. Take it away and you won't have anything left but welfare."

[From the Louisville Courier-Journal, July 26, 1970]

COAL IS AGAIN KING IN EASTERN KENTUCKY

(By Kyle Vance)

HAZARD, KY.—All of a sudden, coal is king again in Eastern Kentucky, and the region is beginning to warm up to prospects of a long-awaited prosperity.

"The top has popped right off of the coal market," one operator said. "I never saw the beat of it. Coal is the best it's ever been, and it's going right on up."

The price rise started about two years ago, when prices generally were in the $2.25 to $4 a ton range. The "popping of the top" has occurred in the last few months, carrying the prices on up to $9 and $12 a ton, paid at the rail head.

"It's so good it scares me," said Bruce Stephens, Jr., an executive of Kentucky River Coal Corp. "There's not a doubt that for a time at least the trend will continue upward.

"Personally, I'd like to see the prices level off somewhere, because coal has been known to price itself out of the fuel market. The history of coal has been sharply up and sharply down."

Stephens said all persons connected with the coal business are sharing the new wealth—the operators especially, but also the miners, truckers, mineral owners and others.

Merchants in such trading centers as Hazard, Pikeville, Harlan, Whitsburg and Prestonsburg reported a corresponding upswing in business.

"I've been in business more years than I like to remember," said Don Fouts, Hazard restaurant operator, "and I've never seen business as good as it is right now."

Willie Dawahare, a clothier with stores in Hazard, Corbin, Whitesburg, Neon and Pikeville, agreed.

"You don't have to look in the cash register to see it," he said. "Just walk down the street and you can see it on peoples' faces and in the clothes they're wearing and the cars they're driving."

Stephens and others credit the price spurt to a combination of factors, mainly the new Mining Health and Safety Act, which requires expensive new equipment in underground mines.

A shortage of railroad hoppers and low estimates of coal needs by some utilities helped with the trend. And strikes in four mining states, including Kentucky, have taken their bite out of production.

"The safety law hasn't done anything for safety, but it sure has hit the consumer in the eye," said Cloyd McDowell, secretary of the Harlan County Coal Operators Assn. "The consumer is paying for something foolish that Congress did last winter."

"The prosperity you hear about isn't as big as it might seem," he said, "because you don't put $1 million worth of equipment that you don't need in a mine without hurting in the pocketbook."

McDowell said Harlan operators nevertheless are raising miners' pay $2 to $4 a day to hold their workers.

Blue Diamond Coal Co. at Leatherwood, Perry County, recently raised miners' pay voluntarily by 90 cents an hour even though it had a contract in force with the Southern Labor Union.

The demand for coal and the resulting industry-wide price rise have created some problems, too, especially for mountain operators. Reports were heard in most of the coal counties that recruiters from high-paying Western Kentucky operations have succeeded in hiring men in Eastern Kentucky.

Of all problems, however, operators are growling loudest over a continuing shortage of rail hoppers to ship their coal.

"If we could get the hoppers, you'd see some real prosperity," McDowell said. "We could ship 30 per cent more coal. The operators would make more, and I'd say the miners could make 40 per cent more than they're making now."

EXPORTS PART OF THE PROBLEM

Today there are fewer hopper cars than there were in 1960, according to the Association of American Railroads.

The continued rise in exports is adding to the problem. A spokesman for the Louisville & Nashville Railroad said exports tie up hopper cars twice as long as do domestic shipments.

And while coal is in short supply now, new technical developments are expected to push demand even higher.

One development is pollution control systems that will make it possible to burn coal and still meet low sulphur emission restrictions.

A part of the new coal picture is the influx of large numbers of outsiders who want to get into the coal business, with its promise of wealth.

"Anybody with just a little know-how can become an operator," Stephens, the Hazard coal executive, said. "All he has to do is promise his coal to a needful user and he can get the money to buy machinery and start operating."

The big gainer in the over-all picture, those in the industry agree, is the stripmine operator. He enjoys advantages of the higher prices without having to buy the costly spark-free machinery required for so-called "gassy" underground mines by the Health and Safety Act.

SOME EARN $300 A WEEK

Even so, the strip operators insist, they share the manpower problem and are paying top wages to skilled workers.

"I can show you payroll records where some of our folks are making $300 a week and more," Henry Wombles, a Hazard operator said. "Any man who wants to work around here now can work, and it's up to him how much he makes."

Roy Mullins, a specialist in reclamation of stripped land for Kentucky River Coal Sales, Inc., Hazard, sees some disadvantages to rushed efforts on mountainside auger jobs.

"Some of the new people who don't know too much about auger mining are gouging coal out as fast as they can without concern for the reserves," he said.

"They want to mine as much as they can as fast as they can and get the big money, but they are leaving too much mineable coal under the mountain.

"Some of them are getting no more than a 25 per cent recovery, and they are leaving coal that never can be mined again."

Auger mining involves the uncovering of outcrop coal seams by bulldozers, which lets the augers drill into the mountainsides and pull the coal out.

SELL A PAINTED ROCK

Surface mining of the outcrop seams usually produces coal inferior to that of the underground method, but that doesn't matter in the new market.

"You can paint a white rock black and sell it in this market," one operator said.

Mullins said that more than the high prices is causing some of the frenzied strip and auger mining.

"The people are scared to death that strip mining will be prohibited on the mountain slopes," he said. "The people who own the coal and those mining it, too, want to get it out as fast as they can any way that they can."

And McDowell, of Harlan, said the manpower shortage can be blamed on more than Western Kentucky recruiters, and in spite of the higher-pay opportunities.

"You'd be surprised at what the black-lung law has done to the mine work force," he said. "It makes it easy for a man to say he has black lung and draw $150 a month. The black lung law has reduced mine employment 15 per cent, those who'd rather draw $150 a month for nothing than make several times that much by working."

PRESS RELEASE AND MEMORANDUM RELEASED BY TVA, JULY 17, 1970, ANNOUNCING PROPOSED POWER RATE INCREASES

An estimated $115 million increase in TVA power revenues during the fiscal year that began this month will be necessary to meet requirements of federal law, the agency said today.

New rate schedules now under consideration would increase rates to the region's consumers by about 23 percent over present levels, effective October 1. Details of the rate increase are now being discussed with representatives of the electric systems distributing TVA power.

Electric rates for TVA power will continue to be well below national averages. For residential use the average rate is expected to rise to about 1.25 cents a kilowatt-hour, from just over one cent last year. The national average is about 2.1 cents. Widespread rate increases in record amounts are under consideration across the country.

These figures include a small automatic rise in TVA rates that will take place August 1 under escalation provisions already included in its rate schedules.

Most of this needed increase is due to rapidly rising costs for the coal burned in TVA steam-electric plants. The August rate escalation takes into account last year's fuel expense, but total fuel cost this year is expected to be about $60 million higher. TVA said factors involved in this increase include the rising demand for coal and "seller's market" price trends, the coal industry's costs of meeting mine safety and strip mine reclamation requirements, increased transportation costs and coal car shortages, and delay in nuclear unit operation which will have to be made up by more expensive coal-fired generation.

In addition, short coal deliveries from suppliers and the resulting decline in reserve stockpiles at steam plants are making it necessary for TVA to buy expensive supplemental power from other electric systems to protect its remaining stockpiles.

TVA is required by law to charge rates which will produce gross power revenues sufficient to cover specified obligations: operation and maintenance expense, payments in lieu of taxes, payments to the U.S. Treasury, debt service on bonds, and a margin. The new rates are designed to produce the minimum revenue estimated to be necessary for these requirements, TVA said.

The average residential electric rate in this region dropped from about five cents a kilowatt-hour when TVA was established in 1933 to .89 of a cent in 1967—when rising costs required the agency's first general rate increase. The average has risen to 1.03 cents a kwh after two general rate hikes and last year's automatic escalation.

PROPOSED RATE INCREASE

Additional TVA power revenue is essential to meet rising costs, and this revenue must come through an increase in electric rates. TVA is required, under the TVA Act, to charge rates that will produce gross power revenues sufficient to cover obligations specified in the Act. The new rates are designed to produce the minimum revenue estimated to be necessary to meet these requirements.

The rate increase will provide about $115 million of added revenue during fiscal year 1971. It will result in an increase of 20 to 25 percent in residential rates, and 25 to 30 percent in rates to large industries. Discussions are now under way between TVA and the local electric systems which distribute TVA power, and final details of the new rates should be ready for announcement soon.

The rate increase will be in two stages—on August 1 and October 1. Existing rate schedules provide that rates automatically will rise (or decline) in response to rises (or declines) in the cost of fuel and money. Because the cost of fuel and the cost of money rose during the past year, higher rates will take effect automatically the first of August. The adjustment will provide $15.5 million of revenue to TVA during the remaining months of fiscal year 1971.

Unfortunately, the costs of the things which TVA must buy have been rising so rapidly that the automatic escalators in the present rate schedules are not adequate. These escalators are based on prior year costs, which means that any increase in rates and revenue lags rising costs by a year. If costs rise moderately, the lag would not cause a major problem. But in times like these, when major costs are spiraling upward so rapidly, this lag of a year becomes crucial. Forecasts of operating expenses and the escalators designed to meet changing costs could not anticipate the inflationary spiral that recently has been taking place, nor could they anticipate the series of events causing the cost of coal to skyrocket. Current estimates of operating costs for fiscal year 1971, which started July 1, are more than $100 million higher than the estimates made barely 18 months ago.

About $60 million of the increase in expenses is in the cost of coal, due primarily to the higher prices TVA must pay for the coal itself. The increase also is due to the rising cost of coal transportation and the additional amounts of coal that must be bought to supply power that otherwise would have come from the nuclear capacity that had been scheduled to go in service this fall. This nuclear capacity has been delayed a year and a half.

TVA's cost of money this fiscal year will be $18 million higher than was estimated only 18 months ago, because interest rates have continued to rise. The effective interest rate on a $50 million issue of long-term TVA bonds sold in June was 9.3 percent. Interest charges on outstanding debt will be $9 million higher than originally anticipated. Also, the dividend which TVA pays each year to the U.S. Treasury on the appropriations invested many years ago in power facilities will be $9 million higher in fiscal year 1971 than originally estimated. The dividend rate is based each year on the average cost of money to the U.S. Treasury at the beginning of that year. That cost has risen now to nearly 6 percent and TVA's 1971 dividend on the $1.1 billion of appropriations invested in power facilities will total $66 million instead of the earlier estimate of $57 million.

TVA has extensive arrangements for the exchange of power with neighboring electric systems. Under normal circumstances it delivers more power to neighbors that it receives from them and the exchanges normally produce a modest income for TVA. This year, because of delays in the completion of the Browns Ferry nuclear plant and because of the tight coal situation, TVA will receive more power than it delivers. The net effect of this shift will cost TVA about $15 million more than had been anticipated.

There are other cost increases as well, including higher salaries and wages, and they add up to about $9 million.

In addition to the $15 million of revenue which TVA will receive from the automatic escalators in its existing rates beginning on August 1, it will need another $100 million during the current fiscal year to comply with the TVA Act and to meet bond requirements. To provide it, rates will be increased effective October 1.

The proposed rates are substantial increases, and no one knows it better than TVA. However, after they take effect, rates will continue to be low in comparison with most other regions. TVA is not alone in needing additional revenue. Other systems also are raising, or planning to raise their rates.

A variety of factors are causing fuel costs to rise much more rapidly than the cost of most items. For one thing, there is a seller's market for coal and there is little or no price competition among coal producers. Through acquisitions and consolidations, most of the nation's coal reserves are owned by a relatively few large companies. Most of the parent companies are major oil companies which also control much of the nation's gas, oil, and uranium reserves. The new owners are demanding a higher profit on their investment than was traditional among independent coal producers.

Transportation costs for coal are rising as the railroads take action to meet their rising costs. TVA supports mine safety requirements and laws requiring the reclamation of strip mined lands, but these requirements are adding substantially to its cost of coal. In some cases, these requirements are forcing mines to close because the owners lack the capital or lack enough coal reserves to justify the added investment, and this makes it all the more difficult to find a supply of coal.

The Browns Ferry nuclear plant, which TVA expected to have in operation this coming fall has been delayed a year and a half, requiring TVA to buy a great deal more coal. Other systems also have faced delays in placing nuclear capacity in service, and this has increased the demand for what little coal is available. For a variety of reasons, many coal contractors are failing to deliver coal at contract prices but are insisting on price adjustments, even to long-term contracts.

Finally, there is a shortage of rail cars which continues to delay the shipment of coal and makes it necessary to seek alternate modes of transportation and alternate sources of coal, always at higher cost than originally was planned.

From the nature of the expenses which are rising more rapidly—coal and money—it is apparent that the rising costs are largely beyond the control of TVA. TVA can neither absorb these enormously higher costs nor defer a rate increase, because only if it continues to meet its financial obligations can it continue to provide an adequate supply of power to the region's electric customers. TVA has done and will continue to do all that it can to hold its costs and its rates down.

[From the Wall Street Journal, Aug. 20, 1970]

TVA SAYS COAL SUPPLY MAY RUN OUT, CAUSING A SHORTAGE OF POWER

KNOXVILLE, TENN.—The Tennessee Valley Authority confirmed that it may face power shortages later this year, because it might run out of coal.

A spokesman said that TVA's coal reserves have dropped to under two million tons from about 6.5 million tons only two years ago. The two million tons now in stockpile represent "a dangerously low level," the spokesman said. That much coal represents a reserve of only about 10 to 12 days, he added.

"That's an uncomfortably low level to have in reserve, because of all the possible things that could happen to cut off regular coal deliveries," the spokesman said. As examples,

he cited coal strikes, rail strikes and poor weather.

OVERRIDING PROBLEM

"Our overriding problem is fuel," the spokesman said. "In that sense, our problem is different from the problem in the New York area, where the difficulty is a capacity shortage."

Reasons why TVA's coal supplies have dwindled sharply include a shortage of rail cars and the impact of the Mine Safety Law "which, in effect, forced some smaller underground mines to close down," the spokesman said. "The basic problem, to sum it up, is that coal production isn't being expanded enough in relation to demand."

The biggest suppliers of coal to TVA in the past year were Peabody Coal Co., a subsidiary of Kennecott Copper Corp., and Island Creek Coal Co., a subsidiary of Occidental Petroleum Corp.

"Those two companies supplied TVA with a little over one-third of TVA's total used coal last year," the spokesman said.

Due to rising price of coal and interest, TVA recently announced its plans to increase its power rates generally by about 23% effective Oct. 1 and which would bring in about $115 million a year.

AUTOMATIC RISE

TVA said that the overall rate increase includes a boost of about $15 million resulting from an automatic rise that took place Aug. 1 under escalation provisions already included in its rate schedules.

About two million consumers in seven states now use TVA power. The agency has said that the new rate schedule would increase the average rate per kilowatt-hour for residential use to about 1.25 cents from just over one cent last year. The national average, according to a TVA spokesman, is 2.1 cents.

TVA has estimated that total fuel costs in the fiscal year that started July 1 will "be about $60 million higher" than in fiscal 1970.

TVA is required to charge rates that will provide power revenue sufficient to operate and maintain the system, make payments in lieu of taxes to state and local governments, make payments to the U.S. Treasury as repayment on investment in the system, meet debt service on bonds, and provide a financial margin for additions and contingencies.

COAL LACK COULD CUT TVA POWER OUTPUT

(By Powell Lindsay)

WASHINGTON, August 4.—TVA will be faced with the prospect of shutting down four or five of its coal-fired steam plants this winter unless the coal shortage becomes less acute, says the manager of the TVA power system.

"Frankly, I'm scared," said TVA Power Manager James Watson, after testifying yesterday before a Senate Government operations subcommittee on electric power problems.

He charged that a growing energy monopoly is threatening to restrict coal supplies, plunging the nation into a power crisis.

"ONLY A 12-DAY SUPPLY"

Watson said TVA will have to shut off power to some customers if it has to shut down some steam plants for lack of coal.

"We have two million tons of coal stockpiled, but that's only a 12-day supply," the TVA official said. "Some of our plants have only a four-day supply on hand."

Watson said he did not want to speak for the nation's other power systems, but it is known that a shortage of coal to fuel electric generating stations is worrying utilities across the nation.

A group of utility executives, led by William B. McGuire, president of Duke Power Co., will meet Thursday with Interstate Commerce Commission (ICC) officials to discuss the most pressing aspect of the power shortage—a scarcity of railway coal cars.

But the long-range outlook for coal supplies is just as bleak, Watson said.

"THEY DON'T CARE"

"Eight of the 10 major coal companies in the nation are owned by oil or metal companies," he said. "The oil companies say they don't really care whether they sell coal or keep it in reserve and later convert it to gas or chemicals. They say they won't open any new mines until they get the kind of return (on investment) they can get on gasoline."

AEC WOULD GO FIRST

TVA recently asked bids on a long-term coal contract for 140,000 tons of coal a week for a steam plant it has under construction near Cumberland City, Tenn. Only one company submitted a bid, for 20,000 tons of coal a week.

"What will TVA do if it cannot get the coal?" asked Sen. Edmund S. Muskie (D-Maine).

"We'd have to curtail our load," Watson replied, "the industrial loads first." Watson said the first customers to go would be two Atomic Energy Commission facilities at Oak Ridge, Tenn., and Paducah, Ky.

"We've discussed this with the ICC, the Federal Power Commission and with the President's office," Watson said. "We don't know anyone else to go to."

MUSKIE "SURPRISE"

Watson said TVA has considered switching over to oil-fired plants, but this has proven futile.

"We contacted every major oil company and every broker in the United States, but we haven't been able to find any oil. Most of the companies won't even come talk to us."

"You can't get oil from domestic or foreign sources, is that right?" asked Muskie.

"Yes, sir," Watson answered.

Muskie, eyebrows raised in mock surprise, remarked that the nation's oil companies are complaining that they need protection from low-priced foreign oil.

OTHER AREAS FEARFUL

Watson said he though TVA would be able to survive the winter without cutting service by wheeling in power from neighboring power companies, but the operation would be costly.

He said he hoped the railroad coal car shortage would ease soon, thereby alleviating the short-term problem. But he said TVA might soon have to purchase its own hopper cars—at $22,000 per car—to insure ontime deliveries.

Earlier, former FPC Chairman Joseph Swidler said that many coal cars were sitting at U.S. ports waiting to have their cargoes loaded on board ships for export.

Swidler echoed Watson's warnings about coal shortages in the East and Southeast. He said the Northeast also faces another winter of fuel oil shortages.

[From the New York Times, Aug. 25, 1970]

TVA WILL BUILD 3D NUCLEAR PLANT

KNOXVILLE, TENN., August 24—The Tennessee Valley Authority disclosed today that it planned to build a third large nuclear power plant. The disclosure indicated that, with troubles over coal supplies, T.V.A. was giving more thought to nuclear power production.

The plant would bring the authority's total nuclear power investment to over $1-billion.

The Federal agency announced that the tentative site for the newest nuclear power plant was in Rhea County, one and a half miles downstream from Watts Bar Dam on the Tennessee River, between Chattanooga and Knoxville. It is 10 miles south of Spring City.

Bids from manufacturers for nuclear steam supply systems and fuel for the new plant are being evaluated, T.V.A. said. A new coal-burning power plant had been considered as an alternative, but an invitation from the authority to the coal industry to offer fuel supplies for a large coal-fired plant produced no bids.

Coal piles are now low at T.V.A. steam plants and prices are up. There have also been fewer bidders for coal supplies. The authority said the cost of coal this fiscal year would be up about $60-million and that prices nearly doubled in the last year. The rising cost of coal transportation has also been a concern.

Site preparation for the new plant will begin within 12 to 18 months, T.V.A. said. Construction must await a permit from the Atomic Energy Commission.

The plant is to have two generating units with a combined capacity of about 2.2 million kilowatts, making it similar in size to the Sequoyah nuclear plant now under construction northeast of Chattanooga. The two units are planned for commercial operation in 1976 and 1977.

The cost of the Sequoyah plant is expected to be nearly $400-million. The latest plant proposed would cost at least that much.

The first nuclear power plant, under construction at Brown's Ferry in northwest Alabama, is to cost $500-million. That 3.5 million kilowatt power plant, with 2,750 men at work on it, is the authority's largest current project.

T.V.A., with over two million power users in the seven states that it serves is coordinating plans for the new plant with Federal, state, and local officials. This coordination includes environmental measures to protect water quality, air quality and aquatic life and consideration of other ecological factors of the project.

In its announcement, the power authority said it supported mine safety requirements and laws requiring the reclamation of strip-mined lands but added that these requirements were adding substantially to its cost of coal. In some cases, the authority said, these requirements were forcing mines to close because the owners lacked the capital or enough coal reserves to justify the added investment.

T.V.A.'s buying practices "have not and are not limiting them in any way, but the situation makes it all the more difficult to find a supply of coal," it said.

The authority had expected that the Brown's Ferry nuclear plant would be in operation this fall, but with a delay there, more coal has to be bought, it added.

U.S. OFFICIAL PREDICTS INCREASES IN THE NATION'S UTILITY RATES

WASHINGTON, August 19. — World-wide shortages and skyrocketing prices for fuel oil have hit American utility companies so hard that the result could be across-the-board utility rate increases for the nation's consumers, a high Nixon Administration official has said. The crisis involves residual fuel oil, used principally by heavy industry and utility companies. Since the first of the year, the price of foreign-produced residual fuel oil has doubled, and American fuel oil prices have increased by about 40 per cent.

Nearly two-thirds of the residual oil used in this country is imported.

UTILITIES HIT HARD

"Utility companies are being hit hard," George A. Lincoln, director of the Office of Emergency Preparedness, said in an interview.

Asked if this meant a possible rise in electricity rates, Mr. Lincoln said, "It certaintly does."

"In most places, there's a rate adjustment tied to the cost of fuel, so that when a utility

company's fuel costs go up, electricity rates go up, too," Mr. Lincoln said. "It's the old story. When a company's operating costs go up, those costs are borne by the consumer.

"Some states have provisions that limit such rate increases to industry users of power, but this is the exception. In most places increases are provided right across the board."

Mr. Lincoln would not predict when and by how much utility rates might be affected, but he held out little hope that much could be done to alleviate the crisis any time soon.

He was interviewed yesterday following a news briefing at which he discussed the Administration's decision earlier this week to scrap a proposed revision in the nation's oil import control program.

The revision would have substituted a system of tariffs on foreign petroleum products for the 11-year-old quota system. In abandoning the tariff proposal, the Administration decided to concentrate on improving the quota system.

Residual fuel oil, however, is not affected by the import controls. Because the nation's needs could never be met from domestic supplies, all limitations on importing foreign residual fuel oils were lifted in 1966.

CRISIS IS GROWING

But the crisis in fuel oil supply has continued to grow.

Since the first of the year, the cost of foreign residual oil has risen from about $2 a barrel to a $4 barrel, and American residual oil has gone from $2.50 a barrel to $3.60.

Coupled with the dramatic price rise, there has been a drastic increase in demand, Mr. Lincoln said.

Last year, he said, Americans used 1.9 million barrels of fuel oil a day and the projected average for 1970 is 2.3 million barrels a day.

As a result, the daily cost of fuel oil in this country today is more than twice what it was at the end of last year.

The shortages in fuel oil are attributed to a number of factors, including the Mideast political situation and growing demand worldwide.

One major cause for the increased demand, Mr. Lincoln said, was that residual fuel oil can be refined to a low-sulphur content, a major requirement in many air-pollution-control programs.

"Whatever cost we're paying," he said "should be chalked up to the cost of cleaning up our environment. If you're for clean air, then this is one of the prices, you're going to pay. Nobody ever said it would be cheap to clean up our world, and we're just now finding out how really expensive it can and is going to be."

And Mr. Lincoln was unable to give assurances that fuel oil prices would not rise even higher.

"Frankly," he said, "I would think in the current situation, we'd be doing well just to hold them."

[From the Washington Post, Aug. 22, 1970]

ELECTRICITY FOR THE FUTURE—I: BIG OIL COMPANIES ACQUIRE GRIP ON COMPETING FUELS

(By Morton Mintz and Robert K. Warner)

Since 1965 the nation's largest oil company has become one of the two largest holders of coal reserves. The same corporation, Standard Oil of New Jersey, has also become a principal operator in the newest competitor to coal and oil—uranium, the source of nuclear power.

In the last five years, most of the country's major oil companies have acquired significant holdings in every fuel, a trend that could end effective competition between oil, gas, coal and uranium and result in large increases in the future cost of electricity.

The trend is especially ominous in the uranium industry because nuclear fuel is expected to produce more than half of all electricity by about 1990.

Sen. George D. Aiken (R-Vt.) says:

"There is some group determined to get control of electrical energy in this nation."

At least 18 oil companies have invested in producing and processing uranium; one key step is entirely controlled by two oil firms. Although the petroleum industry now accounts for only one-sixth of uranium production, it holds 45 per cent of all known uranium reserves and makes more than half the new discoveries.

All of the 25 largest oil companies have natural gas interests, which may be inevitable since gas is usually found with petroleum. At least 11 of the 25 have significant interests in coal as well: The two largest owners of coal reserves are both oil companies, and the petroleum industry as a whole accounts for at least 25 per cent of the nation's total production.

Six of the ten largest oil companies have interests in every other fuel.

The Justice Department's deputy assistant attorney general for antitrust warned last May against the growing concentration.

"While few forms of energy supply are not subject to some type of governmental regulation." Walker B. Comegys told the Senate antitrust subcommittee, "we cannot lightly forgo interfuel competition as the most effective long-term force for consumer protection in the energy field."

National Economic Research Association (NERA), a private consulting firm, compiled data for the Senate antitrust subcommittee showing the penetration of the 25 largest oil companies into other fuel industries.

Nine of the oil companies, some of them already corporate giants, had interests in all the other fuel sources—coal, gas, uranium and shale. They are Standard of New Jersey, second in sales volume among all American industrial corporations; Texaco, eighth in sales; Gulf, tenth; Shell, 16th; Atlantic Richfield, 29th; Continental, 35th; Sun, 47th; Standard of Ohio, 97th; and Ashland, 101st. Not only are such firms buying competitive fuels, but because of their size they are in a strong position to outbid other kinds of industries that wish to venture into the energy field.

"The acquisitions by the oil companies across the energy market spectrum . . . may be viewed as classic horizontal integration on a scale comparable to the formation of the trusts in the latter decades of the nineteenth century," NERA said.

"In short, the oil companies, themselves portraying their activities as efforts at diversification, are in fact systematically acquiring their competition."

This economic concentration is occuring at a time when the Country is entering an era of unprecedented demand for electric power and growing difficulty in satisfying the demand.

Over the next five years, the national demand for electricity is expected to increase by at least nine per cent annually, or more than a 50 per cent increase by 1975. In the 10 Northeastern states and Maryland, power needs are expected to grow even more rapidly.

Should these increases continue beyond 1975, and the Federal Power Commission believs they will, the Nation's utilities must more than quadruple their power capacity in the next 20 years.

Opponents of the oil industry's involvement in other fuels say that the increased demand for electricity will give the petroleum industry a strange hold on utilities and on their corporations that depend on energy.

The oil industry has always dominated natural gas, but its penetration of other competing fuels was thin until the mid-1960s.

In September, 1963 Gulf Oil acquired Pittsburgh and Midway, a coal company that accounts for about 2 per cent of national production.

Then, on Oct. 13, 1965 Continental Oil Co. announced a break through: An agreement in principle to buy Consolidation Coal, the largest producer, which alone accounts for about 12 per cent of total coal production.

The Justice Department did not challenge this first giant step by the oil industry into the territory of a rival fuel. The merger was formally completed in October, 1966.

Other acquisitions followed. In January 1968. Occidental Petroleum acquired Island Creek, the third-ranked coal producer with about 7 per cent of annual output. In August 1968 Standard Oil of Ohio acquired Old Ben, for another two per cent. Today, eight of the ten largest coal companies are owned by oil, mineral or large industrial concerns with interests in the energy field.

In addition, oil companies such as Humble, Jersey Standard's major domestic affiliate, have been spending millions of dollars each year to acquire thousands of acres of coal reserves which they do not mine despite the fact that utilities have been complaining of a serious coal shortage.

The oil companies say that current prices do not provide enough incentive for them to to produce coal, and that their coal reserves are long-range investments for the time when they are forced by dwindling oil supplies to artificially convert coal into natural gas and oil.

Oil opponents say that petroleum companies are creating an artificial shortage of coal that will lead simply to higher prices.

The same acquisition trend exists in the nuclear fuel industry. Until 1966, only two oil companies were significant uranium producers. But in 1968, oil companies did 44 per cent of the drilling for uranium exploration and development. In 1969, they did 37 per cent.

S. David Freeman, of the White House Office of Science and Technology, told the Senate antitrust subcommittee last May that as of Jan. 1, 1970, petroleum companies controlled 45 per cent of the known uranium reserves.

NERA described the position of oil companies in the uranium industry as "truly dominant":

Kerr-McGee, an oil company, owns 23 per cent of total uranium milling capacity directly and another 4 per cent through a half ownership. This capacity exceeds that of any other firm.

Only two companies are in the business of converting "yellow cake," the uranium concentrate that results from milling, into UF6, a compound used 1 uranium enrichment. One is Kerr-McGee, which has building plans for half the national capacity. The other is Atlantic Richfield.

In the reprocessing field, which involves taking spent nuclear fuel and preparing it for further use, five plants are in existence or under construction. Oil companies own four of them.

There is one crucial step in atomic power that neither oil companies nor any other private enterprise controls. This is the enrichment of uranium by increasing its content of the fissionable isotope U-235. The complicated process is done only by government plants, at a fixed fee. The Nixon administration wishes to raise this fee by about ten per cent.

Members of the Joint Committee on Atomic Energy are resisting this increase but not because they disagree with the need for a specific price change. They object that the administration plan would be part of a new set of pricing guidelines that would be based not on the actual costs of running the plants, but on projections of 1980 costs of running a hypothetical new plant as "a commercial operation."

The Council of Economic Advisors defends the new guidelines, partly because it wants

to make sure that the government is not unfairly subsidizing the uranium industry at the expense of competing fuels.

A Council staff member said that the real costs of enrichment are obscured by the advantages of using risk-free government money, official bans on imports of foreign uranium and federal support of nuclear research.

A recent report by the General Accounting Office may have settled the issue, however, in saying that the proposed guidelines are of doubtful legality. The Joint Committee has reported out a bill that retains the existing criteria. But even if Congress passes it, the President could veto it, leaving the whole matter unsettled—along with the question of the increase's ultimate impact on the cost of electricity.

Today, an even more basic, long-range issue is unsettled.

At present, a crucial step in converting uranium into usable fuel is accomplished at three gigantic government plants in Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio.

These gaseous diffusion plants were built by the government for $2.3 billion. The government still owns them, although they are operated by private companies, Union Carbide and Goodyear. As a crucial link in the economic chain that establishes the price of nuclear power, these plants and their product have a profound effect on the competitive sources of electricity—coal, oil and gas.

Originally the plants were built to make material for nuclear bombs and they still do. But defense needs have begun to diminish and demands for the same kinds of materials for peaceful nuclear fuel has begun to increase. This demand for nuclear fuel is still relatively small.

The Federal Power Commission estimates that this year nuclear power will provide only 4 per cent of all electricity. Commission figures show that in 1969, coal generated 49 per cent of electricity; natural gas, 23 per cent; and oil, 9 per cent.

Hydro-electric power accounted for 17 per cent, but it is expected to decrease, since most profitable sites of falling water have already been exploited.

But most authorities agree that we are on the threshold of a rapid expansion of the role of uranium in generation of electricity. While in 1970 nuclear reactors produced only 4 per cent of electricity, by 1980 they are expected to produce 29 per cent and by 1990 about 52 per cent.

There are clear reasons for the expected rise of nuclear power. The demand for power is rising rapidly, both from an expanding population and the dependence on ever-larger numbers of devices run by electricity. If nuclear power does not contribute substantially to these new demands, then the projected use of electricity will have to be reduced and the price of electricity greatly increased.

Another reason to expect more nuclear electricity is the rapid rise in the last two years of the cost of coal and oil.

Rep. Chet Holifield (D-Calif.), chairman of the Joint Committee on Atomic Energy, points out that in 1968, power companies paid 28 cents for the quantity of coal needed to produce one million British Thermal Units (BTUs).

In 1969 they paid 30 cents. But last March they had to pay 35 cents and in April 38 cents. A survey by The Washington Post found that some utilities in non-mining areas are now paying about 40 cents per million BTUs, and they expect the price to climb higher.

Before year's end, Holifield warns, the price of coal may be 50 per cent higher than in 1968. And the requirements of many areas for low-sulfur coal, because of air pollution, pushes the fuel's price still higher.

Thus, whatever changes the status of nuclear fuels will have an important influence on the competitive position of coal and oil.

In the view of some, government involvement in the nuclear industry represents a dilution of private enterprise and unfair competition for coal and oil.

For others who fear a growing monopoly on fuels, the nuclear plants represent the only major fuel installations beyond the control of the present energy entrepreneurs.

President Nixon has announced that he intends to sell the government enrichment plants to private industry "at such time as various national interests will best be served . . ."

The possibility of selling the plants was suggested long before the Nixon administration took office. Four years ago the Atomic Industrial Forum, a nuclear trade association, appointed a committee to study the future of the plants.

The committee was chaired by Kenneth D. Nichols, an AEC general manager during President Eisenhower's first term who has worked in recent years for Gulf Oil, the Mellon family and other concerns.

The group concluded, in June 1968, "It is desirable and feasible for the AEC to transfer its enrichment plants promptly to the private sector."

One of the committee's seven members was not so sure. William M. Capron, then an economist at the Brookings Institution, attached a footnote to the committee's report, expressing doubt that "if these plants are sold, the private market thereby created would operate in a sufficiently competitive manner so as to adequately protect the public's interest."

The efficiency of the three gaseous diffusion plants has never been questioned. They are among the largest industrial operations in the world, with a floor space of 640 acres and energy requirements of their own that in 1964 used 4 per cent of the Nation's electricity. If the plants are doing so well, why does the administration want to sell them?

"Sale of these plants could free federal resources for more pressing national uses," the President said last November. "In addition, $2 billion or more is expected to be needed over the next 10–15 years to expand plant capacity to meet increased commercial demand."

If nuclear generating plants are built as expected, current enrichment capacity will be adequate only until 1978 or shortly thereafter, when new plants, major additions or new technology become mandatory.

Because new facilities take at least six years to build, new projects will have to be started soon to meet needs at the end of the decade. Some officials, such as Atomic Energy Commissioner James T. Ramey, say the new projects should have begun some time ago.

At this point private enterprise has shown little interest in buying the plants.

For some time, the plants have been operating at only 40 percent of capacity or less, and even at this low level, they have built up a stockpile of enriched uranium that would last the nation's nuclear generators for some 18 months. A purchaser would have to tie up a huge investment for years before the plants would operate near full capacity.

Yet long before the plants approach capacity it will be necessary to start expanding them to meet future needs—a costly venture but a necessary one if the nation's power demands are to be met.

For the past three years, the AEC has been seeking funds for a $407 million "Cascade Improvement Program" that would increase enrichment capacity by about 25 percent over a six-year period, at the same time, reduce the average cost of enrichment by about ten percent.

Until this year, the project has been given low priority by the Bureau of the Budget, leading to charges from Sen. Albert Gore (D-Tenn.), a member of the joint committee, that the administration is trying to weaken the plants to help justify their sale.

"What they want to do is turn our nuclear fuel facilities into a shambles by refusing to make improvements," Gore said. "Then they'll say that private enterprise must be brought in to improve things."

A high Budget Bureau official said that the Bureau of the Budget found it "imprudent to build to capacity on estimates alone." He said, however, that the needs for nuclear power are such that a decision probably should be made on support of the Cascade program for the year beginning next July 1.

Even if implemented, the improvement program will add only enough capacity to meet needs for two more years, by current estimates. By 1980, a new $1 billion diffusion plant will be needed—and a decision on whether to build that plant must come by 1974 to insure operation by 1980.

Several members of the Joint Committee have been looking for alternative ways to cut back on the demands for enrichment in order to avoid making such overwhelming expenditures. Among the possibilities:

Licensing a foreign nation or consortium to build and operate its own enrichment plant. Nearly half the work now done in the three U.S. plants is for foreign countries.

Increasing the efficiency with which nuclear fuel is used. For some years the AEC has been doing research on a "fast breeder reactor" that might create great quantities of plutonium—a valuable nuclear fuel not yet feasible for electricity—while burning U-235.

Developing a new "centrifuge process" for enriching uranium that would end total reliance on the gaseous diffusion plants. The centrifuge would entail much smaller capital costs than the diffusion process.

While the huge size of the three diffusion plants limits potential buyers to the very richest corporations, the centrifuge might be purchased and operated by a number of smaller companies. But it, like the fast breeder reactor, is still far from commercial feasibility.

A bipartisan alliance of legislators, many of them members of the Joint Committee on Atomic Energy, fears that if the plants are sold, only the giant oil companies—fortified by such financial advantages as the depletion allowance and import quotas—will have the resources to buy them.

Committee member George L. Aiken, a Vermont Republican, believes that the proposed sale of the plants is a political favor to the petroleum industry.

"The President probably feels indebted to those who helped elect him," Aiken told The Washington Post.

The economic stakes for consumers are huge. Testifying last year before the Joint Committee, Philip Sporn, retired president of the American Electric Power Co., the nation's largest utility holding company, estimated that private ownership of the plants would cause an increase of as much as 50 per cent in the total cost of nuclear fuel.

The National Rural Electric Cooperative Association said that by the 1980s, when nuclear fuel may account for more than one-third of generated electricity, such an increase would cost the American public $1 billion a year in higher electric bills, and perhaps more, if the fossil fuels raise their prices to take advantage of the reduced competition from nuclear fuel.

Sen. Aiken said that sale of the plants would be "the most advanced step toward private control of the Nation that has ever occurred.

"When you control energy—and oil interests now control coal and are on their way to controlling nuclear fuel—then you con-

trol the Nation," Aiken said. "I see this as a very serious threat to political democracy."

Today there are several sources of energy, although their control is quickly consolidating. Some power plants are even designed to switch from coal to oil or natural gas depending on which bids lower on fuel contracts. But many utility companies fear that in the near future, when they shop around for fuel they will find only one store.

Twenty years from now nuclear power—today only an infant in electrical generation—will be a powerful force, providing more than half of all American electricity and therefore creating the competitive yardstick by which other fuels will be sold.

Decisions made in Congress and the White House in the next few years will determine whether it will be a vigorous competitor or a silent partner to the present fuels.

[From the Washington Post, Aug. 24, 1970]

ELECTRICITY FOR THE FUTURE—II: UTILITIES TURN TO THE ATOM AS COST OF FOSSIL FUEL SOARS

(By Thomas O'Toole)

When it comes to generating electricity, King Coal is losing power: the heir apparent is uranium.

The evidence is nowhere more convincing than at the Tennessee Valley Authority. That mammoth electric utility is located in the heart of the nation's coal country, but it is building three of the world's largest atomic power plants.

"The country's private utilities figured that if TVA thought the atom could compete with coal," White House energy adviser David Freeman said recently "then by God there must be something to nuclear power after all.

The turn to atomic power comes at a crucial time. In many cities there is already a power shortage and in the next 30 years the national demand is expected to double. At the same time the conventional fuels—coal, oil and gas—are rapidly increasing in cost. Measures against pollution will make them more costly still.

There are only 16 atomic plants generating electricity in the United States now, but 98 additional nuclear power plants are being built or are in the active design stage.

What's more, 80 per cent of these new atomic plants are what utility men call "big," plants able to deliver more than 750,000 kilowatts apiece. Scattered about 27 states and Puerto Rico, these 98 plants represent an investment of almost $22 billion and an electrical output of almost 90 million kilowatts, which is as much electricity as the entire country generated 15 years ago.

While TVA's decision to go atomic may have triggered it, there is far more to the sudden boom in nuclear power.

First is the fruition of postwar atomic research. The Atomic Energy Commission and the Navy have spent almost $5 billion in the past 20 years to develop nuclear power, and these expenditures have begun to pay off in terms of accumulated experience and understanding.

"We've put nuclear reactors into 98 submarines and we have 17 years experience operating four commercial atomic power plants," said John Simpson, president of Westinghouse Power Systems Co., which has won more than a third of the new atomic orders. "Believe me, it's helped us."

Something that has helped at least as much is the steady rise in the prices of coal and oil, the atom's two toughest foes in the struggle for electric power dollars.

While the cost of enriched uranium has barely budged, oil (used in nine per cent of today's U.S. power plants) has risen 50 per cent in price the last five years to about 40 cents per million BTU's of energy, twice that of uranium's.

Many cities have also passed anti-pollution laws requiring utilities to burn only low-sulphur oil, which costs more than conventional heating oils that contaminate the air with sulphur dioxide.

"We burn oil in seven of our plants," says John Kemper manager of engineering for Philadelphia Electric Co. "Turning to low-sulphur oil in these plants increases our fuel bill by $10 million a year."

More important is what happened to coal, which heats steam for 58 per cent of the electric power plants in the U.S.

Coal is now scarce, partly because of labor troubles, partly because of productivity declines and partly because of rail car shortages. A survey taken last spring by the Federal Power Commission found coal shortages at more than half the power companies surveyed, including Virginia Electric and Power Co., Chicago's Commonwealth Edison Co. and the Tennessee Valley Authority.

Coal's price is climbing even faster than oil's. Duke Power Co. President W. B. McGuire said recently the utility's coal cost rose from 28 cents per million BTU in 1968 to 30 cents in 1969, to 35 cents last March, to 38 cents a month later and will reach 42 cents before the end of 1970.

"We're in an era of high fuel costs," McGuire told the North Carolina Utilities Commission two months ago, "and we will be until this company can convert to atom-powered fuel."

Despite such strong endorsements, the new atomic power industry is having excruciating growing pains.

One reason is that atomic power has special costs that are getting more expensive every day. It's true that uranium, the nuclear fuel, costs less than coal and oil. But the costs of constructing atomic power plants are almost 50 per cent higher than fossil fuel plant costs.

While general construction costs were climbing 60 per cent in the past five years, atomic power plants were doubling in price, to $220 a kilowatt compared to $160 for plants using coal.

A striking example of escalating atomic costs is the pair of million kilowatt nuclear plants being built at Peach Bottom, Pa., by Philadelphia Electric Co. They will cost $400 million apiece, an unthinkable price 10 years ago.

"There are many reasons for this, including the fact that we spend twice as much time engineering atomic power plants," said Howard M. Winterson, vice president of Combustion Engineering Co., one of the nation's four major atomic equipment suppliers. "Why, we spend $1 million a year on rent for a computer that does nothing but compute specifications for nuclear reactor vessels."

Strikes and shortages of skilled labor aggravate the normal trial-and-error of any new industry. These were made worse by poor planning by electric companies. In one recent 30-month period, utilities overwhelmed the four major suppliers with 60 new orders for nuclear plants. This sudden burden was a major cause of construction delays of atomic power plants, now averaging 11 months.

Exotic materials, precise design requirements, and a new technology sometimes make nightmares of construction plans. Take the case of the Oyster Creek plant of the Jersey Central Power & Light Co. at Tom's River, N.J. Last September it began generating electricity more than two years behind schedule.

To begin with, the plant's 500-ton reactor vessel, or container, was shipped to the Oyster Creek site sooner than expected.

"They stored it in the open salt air like it was a lawn mower," recalls one AEC official. "It's no wonder what happened."

The AEC man claims that the workmen uncrating the reactor vessel bent its intake and exhaust nozzles. This took weeks to correct.

A second delay came about when inspectors found cracks in the welding of all but nine of 137 steel sleeves located where the drive mechanism for the control rods penetrates the pressure vessel. The AEC is convinced the cracks came from the corrosion of sea air. In any case, it took a year to coat the tubes with a more protective alloy.

Next came what one observer called the "case of the vanishing records."

Houston's Alloy Tube & Pipe Corp. had supplied stainless steel pipe for the Oyster Creek plant just before the Texas firm merged with Ohio's Armco Steel Co. In the course of the merger, the records of the pipe's production and testing were either lost or mislaid.

Since the AEC demands rigid testing of all atomic plant parts and documentary proof of the testing, it insisted on records for the pipe. This meant new tests. By this time the piping was already installed at Oyster Creek. So the stainless steel pipes had to be removed and retested, delaying Oyster Creek's start-up another 10 weeks.

The results of delays like these are not soothing for utility men to contemplate. Jersey Central Power & Light, while waiting for Oyster Creek to start producing cheap nuclear power, had to spend $60,000 a day buying power from its neighbors at twice what Oyster Creek power was supposed to cost.

Watching debacles like Oyster Creek from afar, many utilities have either held off on buying atomic plants or have cancelled plans to build them. The AEC admits that so far this year six electric power companies dropped plans for atomic power. The commission expects one or two more to follow suit before the year is out.

Other firms hedged their bets by installing excess fossil fuel capacity while waiting for their nuclear plants to be built.

"We decided we couldn't count on the nuclear plants coming in on time" said Donald C. Cook, president of American Electric Power Co. "None ever had, so we're building enough fossil capacity so that even if they never come in we'll have enough energy. All we want our customers to know is that when they press the switch they'll have enough power."

What worries power experts the most about nuclear plants is their complexity and the overwhelming need to keep them completely safe. These two requirements have forced numerous shutdowns of atomic plants in the last few years.

A typical complex incident occurred a few years ago when nickel-plated silver-cadmium control rods in a reactor corroded, flooding the reactor core with contaminating silver from the insides of the rods.

"The plant operator had to scrap $750,000 of core parts," said A. Nelson Tardiff of the AEC's Division of Reactor Development, "The plant was contaminated with silver and the accumulated downtime to effect clean-up amounted to two months."

In 1968, all of the 11 atomic power plants then operating were shut down from time to time for minor repairs. Five of them were closed for a total of 27 months because of major break-downs. The 22,000 kilowatt plant at Elk River, Minn. was shut down in February 1968 because of reactor leakage and was never started up again.

A year ago, 12 plants were in operation and enough troubles were encountered to shut down eight of the plants for a total of more than 30 months. The 50,000 kilowatt LaCrosse Boiling Water Reactor at Genoa, Wisc. had to be closed five times for seven months due to breakdowns.

This year, there are 16 plants in opera-

tion and so far there have been three major shutdowns.

Jersey Central's Oyster Creek plant was closed from Apr. 19 to May 22 when the hydraulic seals in the drive mechanisms of six control rods failed. Niagara Mohawk's Nine Mile Point plant was closed Mar. 30 by three cracked parts in a furnace and not reopened until July 12.

Most recently, Consolidated Edison's Indian Point plant was closed May 20 by a broken thermal sleeve in a nozzle connection in the primary cooling system and by cracks in a nearby pipe. At the earliest, Con Ed hopes to have the plant back generating power sometime in September.

"We're dealing with an infant technology," says Milton Shaw, director of the AEC's Division of Reactor Development. "I know the utilities assumed that nuclear power brought with it inherent imperfection, but this business is a tough one."

It's been very tough on the companies in the business of nuclear supply, the firms that make and deliver the reactor vessels, the nuclear fuel elements, the valves, pipes and turbines that make up an atomic steam supply system.

Fewer than half the firms that started out in the atomic power business are still in. The dropouts include such well-to-do giants as Foster Wheeler Corp., American Machine & Foundry Co. and Allis-Chalmers Mfg. Co.

The main reason such firms have dropped out of nuclear power is the red ink that has bathed the entire industry for the last 15 years.

One firm, Combustion Engineering, figures it has spent $60 million on nuclear research and development, none of which it has recovered through profits. Westinghouse's John Simpson says his firm has spent over $100 million on atomic R & D, but thinks Westinghouse might turn a profit this year for the first time.

"We'll be the only ones to do so," he says.

General Electric has probably lost the most money on atomic power, but part of its losses might have come from the deals it struck in the early 1960's attempting to launch the atomic industry. By one account, GE lost more than $100 million on the Dresden atomic plants it built for Commonwealth Edison and an estimated $50 million on the Oyster Creek plant it put up for Jersey Central.

The company that has suffered the most in atomic power has been Babcock & Wilcox Co., which a year ago admitted that it was behind schedule on every one of the 28 nuclear pressure vessels it was putting together in its Mount Vernon, Ind. works. The resulting losses sank profits too low last year to cover the dividend. A vice president of the company committed suicide.

Despite the losses and the suffering, the companies that make up the atomic industry see a bright future for nuclear power.

"I think we all feel the future is nuclear," says Combustion Engineering's Howard Winterson. "We've had some discouraging years, but our costs should begin to level off and when that happens atomic power will be in a better over all competitive position than coal and oil."

Westinghouse's John Simpson said a recently completed study of fuel prices has led his company to predict a steady decline in atomic fuel costs to about 17 cents per million BTU by 1980 and a rise in the cost of coal to about 45 cents per million BTU.

Utility experts are also convinced that pollution laws will drive more power companies away from coal and oil, even the relatively clean low-sulphur forms of both. Only last month, Los Angeles County Judge Bernard S. Jefferson turned down a utility's appeal of a Los Angeles County ban on a new oil-fired plant it wanted to build at Playa del Rey.

"We're converting energy and no matter how you do it there's an impact on the environment," says Philadelphia Electric's John Kemper. "We feel the nuclear plant is the cleanest way to do it."

Though it electrifies only about 4 per cent of the power lines in the U.S. today, atomic power is destined to take on an ever larger role in power generation.

The Atomic Energy Commission expects that by 1980 atomic power plants will be generating 180 million kilowatts of electricity in the U.S. Most experts don't think it will get that high, but most of them agree that at least 130 million kilowatts will be nuclear by 1980, which will still be more than 20 per cent of the U.S. total in 10 years.

The AEC also believes that half the new electric power plants being ordered by utilities in 1980 will be nuclear, that 75 per cent of the orders in 1990 will be nuclear and that by the year 2000 nuclear's share of new orders will be 90 per cent.

If this happens, half the electric generating capacity of the country will be nuclear by 1990 and almost 60 per cent by 2000. There will be 450 atomic power plants in the country by 1990 and 950 by the year 2000, generating more than 1.1 billion kilowatts of electricity.

"I don't see how it can turn out any other way," says the AEC's Milton Shaw. "Coal and oil prices are going to keep going up, and there seems no way of getting the sulphur out of them to anybody's satisfaction. Atomic power is the only answer."

Mr. AIKEN. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. AIKEN. Mr. President, I am very glad that the Senator from Kentucky and his associates have introduced this resolution calling for an investigation of the coal business. I would hope that it would also include all forms of energy in order to be successful.

I read, I believe this morning, that the price of coal at the mine might increase 50 percent in a year. It has already increased more than that up in the northeastern part of the country. The coal that cost $5.50 a ton at the mine in January is now $8.50 per ton. When we add to that the increased cost of transportation, it is nearer 75 percent, in the past 6 months.

I was quite disturbed a few years ago, when witnesses appeared before the Joint Committee on Atomic Energy and frankly stated that 12 to 14 companies could well take care of all the energy required in the United States.

That was, of course, the first indication we had that a monopoly was being planned. But they have gone on from there. It is true that oil companies have gone into other sources of energy in a big way. I think that the latest announcement was the announcement of Jersey Nuclear, a subsidiary of Standard Oil of New Jersey, that it had entered into a $70 million contract to furnish energy fuel for a nuclear powerplant. Of course, they are not off on a wild goose chase. They know that nuclear powerplants are practical, that they are a necessity, and they intend to control them.

The head of one of the largest distributing systems in the country came before our committee one day and stated that he was very much opposed to the sale of three Government-owned gaseous diffusion plants which now produce fuel for the nuclear energy plants in this country. He said, "If they control our fuel, they will control us." This was the head of one of the biggest electrical distribution systems in the United States.

What disturbs me most is the extreme vigor and energy that these people put into any effort to put them under the antitrust laws of the United States. They apparently are determined to make every possible effort to avoid coming under the antitrust laws.

I hope, as has been stated by the Senator from Colorado (Mr. ALLOTT), that the study will include other energy sources. There is without doubt a determined effort made by this group which would seek control of the energy supply of the United States. That indeed means control over the economy and over the security and over other operations of a democracy.

I think we have to face it and see to it that these people do not accomplish what they apparently hope to do. They have the money to develop power. We need to have power developed, but it should be developed under rules and regulations. Particularly, the antitrust laws should apply.

I have no objection to big business or big oil companies going into the nuclear power business but I am decidedly opposed to giving them advantages, legislative or otherwise, which could lead to a monopoly over the bloodstream of our country.

Mr. THURMOND. Mr. President, will the distinguished Senator from Kentucky yield?

Mr. COOPER. Mr. President, I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I commend the able and distinguished Senator from Kentucky for his leadership in this matter.

The shortage of coal is becoming an acute problem in the southeastern section of the United States. Institutions, industries, and utilities are quite seriously affected.

There is a shortage, I recall, in one utility that serves a large portion of my State. They are deeply concerned.

It is my thinking that this investigation will be most helpful. I sincerely hope that it will result in more coal being made available to the utilities, industries, and institutions throughout the country. I am convinced that a larger portion of our coal is now going to Japan. The facts show this. I have been told that the Japanese have offered a larger price than is paid locally. Therefore, the coal is being shipped abroad.

It is possible that the provisions of the Export-Import Act might be invoked. At any rate, this investigation should be made. I feel that it will result in a great betterment of the situation.

I am very pleased to join with the distinguished Senator from Kentucky on the resolution.

Mr. COOPER. Mr. President, I thank the Senator from South Carolina. I know that the Senator has expressed before his concern about the shortages that exist in his own State.

In introducing this resolution, I rec-

ognize that there will be much study and investigation. The results may not show up immediately or quickly. But I hope that, by introducing the resolution and bringing it before the Senate again, we can have a discussion in the Senate and search out ways that would be helpful in the present situation.

I think we should use our influence, such as it is, to see if it is not possible to secure better procedures in the release and routing of cars which could be of immediate help.

I think that some action by the Antimonopoly Subcommittee of the Committee on the Judiciary to resume its hearings—and I understand that they will do so—could have some effect upon the concentration of power over competitive fuels.

I think that many things could be done. I intend to press this matter and urge at least a right-of-way from the Department of Transportation and any other means to secure better use and routings of the available coal cars which we used to call gondolas.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. SPARKMAN. Mr. President, I was very much interested in the matter the Senator brought up. I commend him for this. I was not on the floor when he commenced his remarks, and I have not heard all of them. I do understand, though, that the Senator is introducing a resolution.

Mr. COOPER. The Senator is correct.

Mr. SPARKMAN. Mr. President, I would be very happy if the Senator would permit me to join in cosponsorship of the resolution.

I might state that we are very much interested in this matter in Alabama because of the importance of power in the State of Alabama. Furthermore, as the Senator knows, the Tennessee Valley Authority which serves our area, is, if I am not mistaken, the biggest buyer and user of coal in the world.

Mr. COOPER. Mr. President, I might say that that was the testimony of Mr. Wagner about 3 weeks ago before the Committee on Public Works. He claimed it was the reason for the increase in their power and also explained why it was necessary for their self-authorization financing to be increased. That caused me to introduce the resolution.

He told me and told the committee their reserve of coal was about 3 months. And there was less than a week's supply. They can hardly contract for coal, even though coal is selling for $10 and $15 a ton at the mouth of the mine.

Mr. SPARKMAN. Mr. President, not only is the reserve dangerously low, and it is, but they simply cannot find the coal. They cannot get it.

I have been very much interested in this for some time, and I have made remarks on the Senate floor several times with reference to the threat of a power shortage in many parts of the country, and particularly in the eastern seaboard.

I had felt for a long time that down our way we were rather secure because of the Tennessee Valley Authority. Then we had this impossible situation involving the getting of coal. I think it is a matter of great concern.

The Senator knows that the Tennessee Valley Authority started a couple of years ago to build the world's largest nuclear powerplant not very far from my home. Originally it was their plan that the generator would go into operation on October 1 of this year.

Now it has to be postponed and it seems it will be 1972 before that plant can come in and produce the power they had looked forward to so much for supplementing the power they get from the dams and steamplants throughout the whole area.

I serve as chairman of the Joint Committee on Defense Production. This matter of power shortage came to my attention 6 or 8 months ago and I have commented on it several times.

I understand it is entirely possible that to some extent we will have a power shortage here in the Nation's Capital, probably not more than a brownout or a lowering of voltage, but it will be a shortage of power that otherwise we would want, we would need, and that we would use. I understand there is plenty of coal in the ground.

Mr. COOPER. Plenty.

Mr. SPARKMAN. It is a matter of getting it out. It is a matter of getting the smaller mines back into operation.

Mr. COOPER. The Senate and the House of Representatives passed a bill and I predicted what would happen if we closed them. They are now stripping coal, with all the awful effects of that.

Mr. SPARKMAN. I joined the Senator in that protest made on the floor of the Senate about the effect it would have on small mines. But we must do something to get the coal coming out of the ground.

I thank the Senator for taking this step.

Mr. COOPER. I thank the Senator from Alabama.

Mr. COOK. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. COOK. Mr. President, as a cosponsor of this measure, I want to point out that the Senator from Washington (Mr. MAGNUSON) said something should be done in the next year or 15 months, if the record will bear me out. The only point I really make, and I know my distinguished colleague agrees in regard to this resolution, is that time is truly of the essence. There can be no question about this at all.

I met with a group of people not long ago in western Kentucky. They had just secured a major industry. They wanted to know what they could do to develop more. The first thing I said was that a complete survey should be made of their potential for electric power in the immediate future because they might find themselves making a tremendous community investment for more industrial development and then find they could not have it because the source of energy is not there.

It was not too long ago in another facility in western Kentucky we had to make arrangements to cross grid and bring in electricity from southern Indiana so we could keep a plant in existence until a present facility is enlarged enough to produce adequate power.

As we develop this resolution and debate on it on the floor of the Senate, the one thing we should make absolutely sure of is that time is absolutely of the essence for the people of this country in regard to this matter.

Mr. COOPER. The Senator is correct. I think we can do something about this matter.

I yield the floor.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

AMENDMENT NO. 861: THE PROXMIRE-MATHIAS AMENDMENT TO LIMIT FISCAL YEAR 1971 MILITARY SPENDING TO $66 BILLION

Mr. PROXMIRE. Mr. President, on behalf of the Senator from Maryland (Mr. MATHIAS), the Senator from California (Mr. CRANSTON), the Senator from Missouri (Mr. EAGLETON), the Senator from New York (Mr. GOODELL), the Senator from Michigan (Mr. HART), the Senator from Indiana (Mr. HARTKE), the Senator from Oregon (Mr. HATFIELD), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Wisconsin (Mr. NELSON), and the Senator from Ohio (Mr. SAXBE), I submit an amendment to the military authorization bill which would limit, or place a ceiling on, fiscal year 1971 military spending. The amendment we are jointly introducing puts that ceiling for military spending for Department of Defense military functions at $66 billion.

A $5 BILLION REDUCTION IN SPENDING

This is a reduction of $5 billion or about 7 percent from the proposed military spending outlays in the budget of just over $71 billion.

The limitation applies to virtually all military spending—procurement, manpower, and other items—except for foreign military assistance, military spending by the Atomic Commission, and some defense related activities such as stockpiling and selective service. It applies specifically to those items found on page 82 of the President's budget under "Department of Defense—Military." The term "military functions" is a term of art which has a specific meaning to the Pentagon and those involved in the military budget.

PERCENTAGE CUT SAME AS SENATE ARMED SERVICES

The ceiling of $66 billion is approximately 7 percent below the $71.2 billion proposed in the budget. It is a reduction of almost the same percentage that the

Senate Armed Services Committee cut the $20.5 billion military authorization bill. It therefore carries over the same percentage cut to overall military spending that the Senate Armed Services Committee cut the military procurement authorization.

DEFENSE DEPARTMENT DETERMINES SPECIFIC CUTS

The determination of where to make the specific cuts is left to the President and the Department of Defense. Studies by Members of Congress for Peace Through Law, Congressional Quarterly magazine, former Budget Director Charles Schultze, Mr. Robert Benson, who served in the office of the Comptroller of the Department of Defense, and numerous hearings and studies by Members of the House and Senate have pinpointed specific area after specific area where cuts in procurement, manpower, and activities could be made. The estimates in general run from $10 to $14 billion depending upon the specific assumptions which one makes. Our proposed limitation on overall spending for fiscal year 1971 of slightly more than $5 billion is a very modest proposal. While we have proposed area after area where cuts could be made, we have deliberately left the precise cuts to the Department of Defense. I do not see how they can possibly object about this. Every time we have offered a particular cut, we are told that the experts know more than we do, that we should not usurp their prerogatives, and that the specific proposal has been gone over very carefully. We, therefore, have taken the military at its word and specifically proposed that they determine the priorities within the Department of Defense.

NUMEROUS PRECEDENTS

There are numerous precedents for general cuts or limitations on spending for both military and civilian programs. There should be no great principle which would prevent any Senator from voting for this amendment on the ground that it is a general cut. I say that because the overwhelming majority of Members of the Senate, many of them the strongest supporters of the Military Establishment, have indeed voted for general cuts or to place a ceiling on spending in recent times.

On June 29, 1970, some 29 Members of the Senate voted to place a ceiling on expenditures through the motion offered by the distinguished Senator from Delaware (Mr. WILLIAMS).

On February 27, 1970, a majority of Senators voting, namely by a vote of 45 to 40, voted for a 2 percent reduction in the HEW-Labor bill.

On April 19, 1968, the Senate voted 45 to 42 for a 3 percent reduction in the military procurement authorization bill.

The previous day, April 18, 1968, 28 Senators voted for a $500 million reduction in the military procurement bill. Anyone who argues against this amendment on grounds of procedure or precedent should realize that similar limitations or cuts have been proposed and adopted by Senators in the very recent past. The precedents are legion.

WHERE CUTS COULD BE MADE

While the amendment does not propose specific items where cuts should be made, a thoroughly documented case can be made that cuts in the order of $10 to $14 billion could be made. Among the areas where the Pentagon could effect the limitations are these:

PROCUREMENT

The General Accounting Office has reported that the overruns on 38 major weapons systems amount to $23 billion. This is an increase of $3 billion in 9 months. This area must be reformed. A limitation in spending would make reforms much easier to institute.

Only last week Secretary Packard told an audience on the west coast:

Frankly... in Defense Procurement we have a real mess on our hands.

Mr. Gilbert Fitzhugh, on the release of his report, said at a press conference:

Defense Department's policies have contributed to serious cost overruns, schedule slippage, and performance deficiencies.

OVERSEAS BASES

We have some 429 major and almost 3,000 minor bases scattered in 30 countries throughout the world. Many of these are redundant. The initial purposes for which they were obtained have long been forgotten.

SHIFT FROM TWO-PLUS TO ONE-PLUS WAR STRATEGY

The President and the Secretary of Defense have announced that we have now shifted from the strategic posture of providing the forces capable of fighting two major wars and one minor war at one time to a policy of providing the forces to cope with one major and one minor war. Former Budget Director Charles Schultze has testified that the costs for the one-plus war strategy are $14 billion below those proposed in the fiscal year 1971 budget. While the Pentagon has announced the new policy, no reductions have taken place. This is an area where large savings could be made.

UNIFORM ACCOUNTING

The Defense Production Act just signed by the President includes a provision which Admiral Rickover estimates can save up to $2 billion. While it will take some time for it to be effective, some savings could be made.

MANPOWER

Troop reductions in Vietnam and a general reduction in manpower to the pre-Vietnam level of 2.5 million men, could bring large reductions. Many believe we have an excessive number of troops in Europe. Manpower reductions bring the biggest savings in costs.

WEAPONS

Specific weapons systems could be cut, more prototypes could be built before rushing into production, and a number where the bugs still exist or where the state of the art is not far enough advanced should be kept in the research and development stage. Among these are the MBT tank, the B–1 bomber, the duplication in antisubmarine warfare programs, and a reduction in other areas.

OTHER AREAS

Savings could also be made in food procurement, in the rotation and leave policies of the forces outside Vietnam and combat, and the amounts spent on public relations at the Pentagon, to name a few.

Of course, we have passed the Percy amendment which would effect a saving in the rotation policies.

ARGUMENTS FOR THE $66 BILLION CEILING

In light of our burgeoning domestic needs—for schools, health, antipollution, to name a few—we must shift priorities from the military to the civilian sector. This is long overdue.

In addition, the prospective $10 to $15 billion budget deficit means that no substantial amounts will be available to meet these needs unless a major reduction is made in military spending.

The education and health appropriations bills were vetoed on grounds of excessive spending. Votes for those bills or votes to override them can be more than justified on the ground that a cut of $5 billion from defense outlays vastly offsets the almost $1 billion increase for schools and health. This would bring a real reordering of priorities while remaining fiscally responsible.

Military spending is nonproductive. Tanks, guns, and ammunition satisfy no human needs. We should, therefore, not spend a single dollar more for the military than is absolutely needed to defend the country. A shift from military to needed civilian spending—and I emphasize "needed" civilian spending for it can be wasteful too—can satisfy pent-up human needs, be less inflationary, and be far more productive.

For all of these reasons, I hope the Senate will support this amendment to place a $66 billion ceiling on the 1971 spending for military functions.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the table.

WHY WE SHOULD CUT MILITARY SPENDING—II

Mr. PROXMIRE. Mr. President, very briefly, I would like to mention, in this connection, that last week the President was briefed by his budget experts. It was widely reported that the news he received was that a budget deficit of as much as $10 billion was anticipated for the current fiscal year and an even larger deficit, perhaps $15 to $25 billion, was possible next year in fiscal 1972.

The basic reason for this has not been an increase in expenditures. It has been the huge falloff in receipts as a result of the deliberate slowdown in the economy engineered in Washington to fight inflation. But the results have been continued inflation, a huge increase in unemployment, and a prospective deficit of $10 to $15 billion.

But the prospective huge budget deficit caused by a falloff in receipts is being used to beat back even modest requests for funds to meet this country's unmet domestic needs. It will be argued that there will be no money left for housing, for schools, for antipollution efforts, and other needs. The administration has already mounted such an attack.

Congress is accused of being fiscally irresponsible for adding modest amounts to the education and health appropriation bills. But the deficit is due to a falloff in receipts rather than an increase in spending.

The President has vetoed both of these bills. Schools and health are ordered to bear the burden for the policies of slowdown and induced unemployment.

Now we are urged to cut back even

further on needed domestic programs, while filling every request for dollars for defense and the Military Establishment.

At the time the President vetoed the school and health bills, Secretary Laird was telling a press conference that we should not cut the defense budget a dollar. In response to a question on August 6 about the $1 billion Congressman MAHON believes that the defense budget should be cut, Secretary Laird had this to say:

I'm going to do everything that I can to see that it isn't (cut by a billion dollars). I think we have submitted a rock bottom budget this year.

The message is very clear. Full funding for defense. Veto the education bill and health bills.

This is just a foretaste of what will come. It is the major reason why we must cut the defense budget this year. Every unmet domestic need is tied to cutting the military budget. With a $10 to $15 billion deficit and a fully funded military budget, the cuts will come in schools, health, and antipollution.

In these circumstances, the case for cutting the bloated military budget is overwhelming. The only way we can meet these pressing social needs is to cut and cut hard on the military budget. We should cut at least $5 billion this year from the proposed $71.2 billion for military functions.

AMENDMENT NO. 784

Mr. GOODELL. Mr. President, later in the day the Senator from Wisconsin (Mr. NELSON) will call up an amendment of which we are coauthors, the amendment to prohibit environmental warfare. Since I shall not be able to be present when it is called up, I shall take just a very brief time to state that tomorrow I shall present the major portions of my reasoning in support of that amendment. I think it is important that the Senate act upon the amendment on its merits individually, and also because it is related to the message the President has transmitted to the Senate requesting advice and consent on the Geneva protocol of 1925.

Mr. President, many things are happening in Vietnam with reference to antiplant chemicals, including the drift from antichemical operations to water supplies, and the use of such chemicals to destroy trees. Looking beyond the links between the ecosystem and the food chain, there can be no doubt that the massive application of antiplant chemicals is having an effect on the people in Vietnam. What effects it is having on the people in Vietnam, when they show up in the future, may be one of the saddest chapters in the epilog on the war.

THE EQUAL RIGHTS AMENDMENT

Mr. COOK. Mr. President, Senator ERVIN's Senate Joint Resolution 231, designed as a substitute for the equal rights amendment, would not improve women's legal status; in fact, it very probably would be a setback if it were ever ratified.

In a letter to all Senators suggesting cosponsorship, the senior Senator from North Carolina (Mr. ERVIN) explicitly states that his amendment would legitimatize State schools segregated by sex. In two recent cases the courts moved toward integrating such institutions under the 14th amendment. (*Kirstein et al.* v. *The Rector and Visitors of the University of Virginia, Etc., et al.*, E.D. Va., Richmond Division, Civil No. 220–69–R, 1969; *Margaret de Rivera, on behalf of her daughter, Alice de Rivera,* v. *Leonard J. Fliedner, principal of Stuyvesant High School, the Board of Education of the City of New York, and Bernard E. Donovan, Superintendent of Schools,* Supreme Court of New York, Manhattan County, 00938–69, 1969.)

There certainly is a strong possibility that ratification of Senate Joint Resolution 231 would deter the courts from pursuing this auspicious start toward equal educational opportunity for women under the 14th amendment.

The equal rights amendment would, of course, prohibit public schools from excluding women or men, and from applying higher admission standards to women.

Mr. President, I might digress a moment, since it may seem strange to some for me to be in favor of this amendment, to say that one of the reasons is that I happen to be the father of four daughters. I have a young daughter who wants to go to law school.

I inquired of a law school in the East, and found out that last year in its graduating class, four of the graduating seniors were women. When the larger law firms in the country went to that college and discussed positions with members of the graduating class, they discussed positions in the law firms in the United States with all of the students in the class except those four women. The young men went out of that law school, after passing their bar examinations, with an average starting salary of between $10,000 and $16,000 a year.

While all of the four girls graduated in the top 10 percent of their class, the highest salary attained by one of those four girls was $10,000. One became a legal secretary, one went to work for a bank, and two of them went to work for the Federal Government.

Mr. President, I would be happy to send my daughter to law school if the law school would permit me to pay only half the tuition paid for a male student, since she will receive only approximately half what they get when she graduates. But I am afraid I shall not have that opportunity.

Senate Joint Resolution 231 is patently unacceptable to everyone who is concerned with advancing women's legal status, and this is why I want to correct the record as to the effects of the equal rights amendment. Senator ERVIN says that:

The amendment nullifies all existing laws making any legal distinction whatever between the respective rights and responsibilities of men or women.

However, nullification is not the only option open to the courts in dealing with a law that is unconstitutional. In numerous cases the courts, both Federal and State, have taken other courses of action.

In *Neal* v. *Delaware,* 013 U.S. 370 (1880), the Supreme Court said:

Beyond question the adoption of the fifteenth amendment had the effect, in law, to remove from the State constitution, or render inoperative, that provision which restricts the right of suffrage to the white race.

In *Levy* v. *Louisiana,* 391 U.S. 68 (1968), the Supreme Court did not strike down a statute that had been interpreted by the State supreme court to exclude illegitimate children from the right to recover for the wrongful death of their mother; it extended the right to the illegitimate children.

In *Takahashi* v. *Fish and Game Commission,* 344 U.S. 410 (1948), the Supreme Court extended to "a person ineligible to citizenship" the right to a commercial fishing license. It did not strike down California's statute governing issuance of such licenses.

It is also clear that the Supreme Court would give great weight to the intent of Congress in interpreting the equal rights amendment, and the purpose of the proponents is clearly not to nullify all laws distinguishing on the basis of sex.

Antieau in "Modern Constitutional Law" says:

In the construction of the United States Constitution, the intention of those responsible for the particular clause should be ascertained, if possible, and the Supreme Court has many times endeavored to do this.

Comparably, in construing amendments to the Constitution it is necessary to discover, if possible, what was said in the Congress that proposed the amendment. Illustratively, in seeking to discover the meaning of the Fourteenth Amendment, the Supreme Court has often had recourse to the statements made in the Congress that proposed this amendment.

Utterances of Congressmen who proposed the amendments, as well as those who were most responsible in the convention or the Congress for the passage of the proposal are especially respected, as witness the traditional consideration given to James Madison's views on the first amendment by the courts . . . as bearing upon the intent of those responsible for a constitutional provision, it is important to ascertain the background of the times leading to the proposal and ratification. The Supreme Court said in 1887: "It is never to be forgotten that in the construction of the language of the Constitution . . . we are to place ourselves as nearly as possible in the condition of the men who framed that instrument."

In construing constitutional provisions, the Supreme Court has regularly looked for the purpose the framers sought to accomplish. (pp. 711–714.)

It is very clear that the courts would give great weight to the words of Representative MARTHA GRIFFITHS in the House debate and to the words that will be spoken by the proponents of this amendment on the floor of the Senate, as well as the Senate committee report. The chief proponents of this legislation, both inside and outside the Congress, have stated explicitly that they interpret the amendment to extend to the other sex many of the laws that distinguish on the basis of sex. The excellent legal memorandum prepared by the Citizens' Advisory Council on the status of women takes this position.

Representative GRIFFITHS said, and I agree, that in those States that allow alimony only to women, men would become eligible for alimony, but women who are homemakers would not lose the right to

support in the event of divorce. Making men eligible for alimony is not a revolutionary idea, as in many States men are now eligible for alimony.

Under the Uniform Marriage and Divorce Act, recently adopted by the national commissioners on uniform State laws, "maintenance"—which replaces alimony—is provided for either spouse depending on relative financial conditions of the parties, ability to earn a living, and appropriateness of employment outside the home for the custodian of the children. This Uniform Act has no distinctions based on sex, and I have no doubt that passage of the equal rights amendment by the Congress will accelerate adoption of this reform legislation by the States. I was quite pleased to see recognized in this proposed uniform law the economic contribution of homemaking to the family. It is the first time I have seen it explicitly recognized in law.

Under the equal rights amendment, women who are homemakers are not going to lose any right to support by their husbands, but wives who are employed or who have independent means would have to share the responsibility for support of the family within their means.

In the few States that provide dower rights for the wife with no similar right for the husband, the right would be extended to the husband under the intent expressed by Representative GRIFFITHS.

Representative GRIFFITHS stated that in those few States where minimum wage laws apply only to women, the law would be extended to men—North Carolina's and Kentucky's laws apply to both men and women.

The laws that prohibit women from some types of employment are another matter. They restrict women's opportunities, and any that are left on the books by the time the amendment is ratified would be invalidated. Many changes have already been made in these laws as a result of title VII of the Civil Rights Act of 1964.

A number of court cases have been brought challenging these laws—all by blue collar union women, I might add.

The court decisions to date, including two by circuit courts of appeal, and the guidelines of the Equal Employment Opportunity Commission and the Office of Federal Contract Compliance, support the view that these laws are superseded by title VII of the Civil Rights Act of 1964. I am confident that the invalidation of these laws will encourage the passage of good labor laws protecting both men and women from unconscionable demands of a few employers.

The distinguished Senator from North Carolina (Mr. ERVIN) states in his letter to his colleagues his belief that the motive of the advocates of the equal rights amendment is to invalidate present and future laws which make invidious or unfair discriminations against women. I respectfully beg to differ with the distinguished Senator from North Carolina. The testimony I heard in the May hearings and my conversations convince me that the advocates want the full legal responsibilities of citizenship as well as the legal rights and that they want to eliminate discrimination against men as well as against women.

These women recognize that they can achieve their full dignity as citizens only by shouldering responsibilities of which they are capable. They are not advocating that all women be employed outside the home, but they are asking that those who do have a commensurate share of the financial liability for the family. They are not advocating that all women seek graduate degrees, but they are seeking equal opportunity for admission to graduate schools supported by the State for those who so elect.

The August 10, 1970, CONGRESSIONAL RECORD states:

> They are not downgrading the role of homemaker. Indeed, as Congresswoman Dwyer so ably put it, "The equal rights amendment would not take women out of the home. It would not downgrade the roles of mother and housewife. Indeed, it would give new dignity to these important roles. By confirming women's equality under the law, by upholding woman's right to choose her place in society, the equal rights amendment can only enhance the status of traditional women's occupations. For these would become positions accepted by women as equals, not roles imposed on them as inferiors."

They are not advocating that mothers—or fathers—caring for small children be called for jury service if adequate care cannot be provided for the children, but they do want women who do not have a sufficient excuse to be required to serve on juries, just as men are required to serve.

They are not advocating that mothers be drafted, but they do want women to share in the responsibilities for defending the country to the extent they are able. They particularly want to open to poor girls the avenue of upward mobility that the military has always provided for poor boys.

They do not want husbands of working wives left with small children to rear without a social security benefit based on the wife's service. They do not want men saddled with alimony payments to wives with adequate independent means, nor do they want disabled husbands left without means of support by wives able to provide alimony. They believe that wives who abandon children and husbands—and they do exist—should have a responsibility for child support commensurate with their circumstances.

In other words, I believe some of the opponents of the equal rights amendment do not understand the motivation of the advocates.

I have been very puzzled by the strong feeling of those opposed to the amendment. The changes it would make in law simply do not warrant all the fuss. I can understand why the advocates feel strongly because the passage of the amendment has great symbolic significance and will enhance the self-respect of women, in addition to the more tangible benefits of opening up of educational opportunities and removal of some disabilities of married women in managing their property. I personally am convinced that, in addition, the ratification of the amendment will greatly accelerate reforms in the law that are already underway.

I can only conclude that the opponents have not given the matter sufficient current study to understand the nature of the actual changes in law that will result. There have been many changes in law and circumstance since the amendment was last seriously considered that seem to have escaped the notice of the opponents. The statement on the legal effects relied on by opponents was written in 1946, and it is surprising to see newspapers quoting this paper as if it were written yesterday. The author might even be willing to reconsider before committing himself today.

The equal rights amendment is an idea whose time has come, and it is my sincere belief that this Congress will respond with passage this session.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

AMENDMENT NO. 784

Mr. NELSON. Mr. President, I call up my amendment, No. 784.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

> SEC. . PROHIBITIONS ON ENVIRONMENTAL WARFARE.—No part of any amount authorized or appropriated pursuant to this Act or any other law shall be expended for the purpose of—
>
> (1) engaging directly in the military application of antiplant chemicals;
>
> (2) entering into or carrying out any contract or agreement to provide agents, delivery systems, dissemination equipment, or instruction for the military application of antiplant chemicals;
>
> (3) procuring or maintaining agents, delivery systems, or dissemination equipment intended for the military application of antiplant chemicals.

UNANIMOUS-CONSENT AGREEMENT—ORDER FOR RECESS FROM TOMORROW UNTIL 9 A.M. THURSDAY

Mr. BYRD of West Virginia. Mr. President, will the Senator yield for a unanimous-consent request, with the understanding that he will not lose his right to the floor?

Mr. NELSON. I yield.

Mr. BYRD of West Virginia. Mr. President, the program to which we have agreed by unanimous consent thus far is as follows:

The Senate will recess at the close of today's business until 9 o'clock tomorrow morning. Immediately after disposition of the Journal tomorrow, time on the amendment offered by the able Senator from Wisconsin (Mr. NELSON), to be equally divided in accordance with the previous agreement, will be limited to not to exceed 3 hours; and, if I understand the able Senator correctly, it may not require the entire 3 hours. But the outside limitation would be 3 hours, with the understanding that time could be yielded back, after which the vote would occur on the amendment offered by the able Senator from Wisconsin (Mr. NELSON).

Following that vote on tomorrow, it has already been agreed that time on the amendment to be called up by the Senator from Wisconsin (Mr. PROXMIRE), dealing with the C–5A, would be limited to not more than 3 hours, equally divided and controlled, with the vote to follow at the end of that time.

Following the vote tomorrow on the amendment offered by Senator PROXMIRE on the C–5A, it has already been agreed that the so-called end of the war amendment—offered by the Senator from South Dakota (Mr. MCGOVERN) and the Senator from Oregon (Mr. HATFIELD), and cosponsored by various other Senators—would be laid before the Senate and made the pending business.

Thus far, the program I have enumerated has already been agreed to.

Mr. President, having been authorized by the majority leader to do so, I am about to propound a unanimous-consent request—after having discussed it with the various principals involved, including the manager of the bill, the able assistant minority leader, and the authors of the various amendments—as follows:

Mr. President, I ask unanimous consent that when the Senate completes its business on tomorrow, it stand in recess until 9 o'clock Thursday morning, August 27.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. May I raise one point with the Senator? If the amendment that I have just called up is rejected, I will have two more amendments in which I would be prepared to agree to a debate of 5 minutes on each side. I would hope that in propounding this unanimous-consent request now, the reservation would be included that if the environmental warfare amendment is rejected I could offer two amendments, with a time limitation of 5 minutes to a side on each.

Mr. BYRD of West Virginia. Does the Senator want to call these up immediately following any adverse action taken on his pending amendment?

Mr. NELSON. Yes. They can be disposed of in 5 minutes, 3 minutes, or 2½ minutes. It does not make much difference. They are simple and brief. We could finish voting on them in a short time.

Mr. MCINTYRE. If the Senator will yield for a question, are these amendments printed and at the desk?

Mr. NELSON. No, but they are simple. One has reference to crop defoliation. They would not take but 10 seconds to be understood. One second for the Senator from New Hampshire.

Mr. MCINTYRE. Mr. President, I would agree to 30 minutes on each amendment, but not 5 minutes. I would not agree to a 10-minute limitation, 5 minutes to a side, if I understand the Senator correctly. But 30 minutes would be adequate.

Mr. BYRD of West Virginia. The difficulty here lies in the fact that we already have a unanimous-consent agreement agreed to earlier today, under which the C–5A amendment is to be laid before the Senate immediately upon the disposition of the pending amendment on tomorrow.

Mr. NELSON. All right. I will withdraw that and if this amendment does not prevail, I will attempt to call up the two amendments in some other manner.

Mr. GRIFFIN. Mr. President, there will be an opportunity later in the week, even under the unanimous-consent request which is about to be propounded.

Mr. BYRD of West Virginia. I appreciate the Senator's being willing to cooperate. I want to say that the agreement whereby the Senate will take up the amendment offered by the Senator from Wisconsin (Mr. PROXMIRE) on tomorrow, following the vote on the pending amendment, has us locked in, insofar as sandwiching in any votes in between is concerned

Mr. NELSON. If it should happen that we would conclude in advance of the time allotted to us, I would hope it would be feasible to take up the two amendments I am talking about. If the Senator from New Hampshire (Mr. MCINTYRE) has no objection to 15 minutes, that would be satisfactory. I would serve notice to the Senate that if we finish prior to the 3-hour limitation allotted to us, I will offer these two amendments.

The PRESIDING OFFICER (Mr. HUGHES). Is there objection to the order for the recess as stipulated?

The Chair hears none, and it is so ordered.

Mr. BYRD of West Virginia. Mr. President, anent the two amendments the Senator has referred to, without prior consultation with the manager of the bill I do not believe I could enter into a unanimous-consent agreement just now, but I do not feel that there will be any problem. The leadership will endeavor to assist the Senator.

Mr. NELSON. I am not requesting anything in addition. If we have any time left over, I will make that time available for the two amendments. If there is objection, then we will do it later in the week.

Mr. BYRD of West Virginia. I am sure that the leadership on both sides of the aisle will cooperate in every way to assist the Senator in getting a vote at an appropriate time if the occasion arises.

ORDER FOR RECESS FROM THURSDAY, AUGUST 27, 1970, TO 9 A.M. ON FRIDAY, AUGUST 28, 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Thursday next, it stand in recess until 9 a.m. on Friday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM MONDAY, AUGUST 31, 1970, TO 9 A.M. ON TUESDAY, SEPTEMBER 1, 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday next, it stand in recess until 9 a.m. on Tuesday morning, September 1, 1970.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the controlled time on the amendment to be offered by the Senator from South Dakota (Mr. MCGOVERN), the so-called end the war amendment, be limited to 6 hours, the last hour of which would begin running immediately following the prayer on Tuesday morning next, September 1, 1970; the time to be equally divided between the author of the amendment, the Senator from South Dakota (Mr. MCGOVERN) and the manager of the bill, the Senator from Mississippi (Mr. STENNIS), with the vote thereon to occur at 10 a.m. on Tuesday morning next.

I also ask unanimous consent that on Monday next, August 31, 1970, beginning at 12 noon, there be 5 hours of debate on the amendment offered by the Senator from South Dakota (Mr. MCGOVERN), the so-called end the war amendment, to be equally divided between the Senator from South Dakota and the Senator from Mississippi.

The PRESIDING OFFICER (Mr. HUGHES). Is there objection?

Mr. GRIFFIN. Mr. President, reserving the right to object—and I do not expect to object—what if there were amendments to the McGovern amendment? Does the unanimous-consent request provide an opportunity for such amendments to be offered?

Mr. BYRD of West Virginia. May I finish the unanimous-consent request?

Mr. President, I ask unanimous consent that before the Senate completes its business on Thursday next, August 27, 1970, the amendment which will be called up by the Senator from Wisconsin (Mr. PROXMIRE), and which would require a $5-billion reduction in the authorization, laid before the Senate and made the pending business and that immediately after the prayer on Friday morning, August 28, 1970, not to exceed 3 hours of debate be allotted on the amendment, to be equally divided between the author of the amendment, the Senator from Wis-

consin (Mr. PROXMIRE), and the manager of the bill, the Senator from Mississippi (Mr. STENNIS), with a vote thereon to occur at the conclusion of 3 hours.

The PRESIDING OFFICER (Mr. HUGHES). Is there objection to the requests of the Senator from West Virginia?

Mr. GRIFFIN. Mr. President, reserving the right to object——

Mr. BYRD of West Virginia. Mr. President, it is perfectly all right with me not to agree to any of these requests until I have the whole package in the mill.

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object—and I do not object to any of these requests—but in the event, at the last minute, amendments to the amendment are offered, could we have it understood that there will be at least 10 minutes allowed, with 5 minutes to a side, to explain what the amendments are? I do not anticipate such amendments but they may be offered.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that 30 minutes be allowed on each amendment, appeal, or motion with respect to the so-called "end the war" amendment, to be equally divided between the mover and the Senator from South Dakota (Mr. McGOVERN), if he is opposed thereto. If Mr. McGOVERN is not opposed, then the time in opposition would be controlled by the manager of the bill, the Senator from Mississippi (Mr. STENNIS).

The PRESIDING OFFICER (Mr. HUGHES). Is there objection to any of the requests of the Senator from West Virginia?

The Chair would like to be informed if, in any of the motions the Senator has mentioned, he would like to include a motion to table, which otherwise would not be debatable?

Mr. BYRD of West Virginia. I thank the Chair. Under the rule, a motion to lay on the table would not be debatable. I do not mean my request to exclude a motion to lay on the table, if the motion is made just prior to the time on which the Senate has agreed to vote.

Mr. GRIFFIN. With respect to any of the amendments?

Mr. BYRD of West Virginia. Yes, any of the amendments to which I have thus far referred in this request.

The PRESIDING OFFICER (Mr. HUGHES). There being no objection to the unanimous-consent requests propounded by the Senator from West Virginia, they are agreed to.

Mr. GRIFFIN. Mr. President, reserving the right to object——

Mr. BYRD of West Virginia. It has been stated emphatically by the majority leader that there will be a Saturday session this week.

ORDER FOR RECESS FROM FRIDAY, AUGUST 28, 1970, TO SATURDAY, AUGUST 29, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, at this time, I ask unanimous consent that when the Senate completes its business on Friday next, it stand in recess until 10 a.m. on Saturday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM SATURDAY, AUGUST 29, 1970, TO MONDAY, AUGUST 31, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Saturday next, August 29, 1970, it stand in recess until 10 o'clock on Monday morning next.

The PRESIDING OFFICER. Did the Senator from Michigan wish to pose an objection to that last request?

Mr. GRIFFIN. On the request concerning the recess to Saturday, no. The previous request I need not reserve an objection to, but I ask the Senator from West Virginia concerning the situations when amendments to amendments are in order, to avoid the mixup we had today, could we clarify when they will be in order? Would it be at the expiration of the time?

The PRESIDING OFFICER. If there is no objection to the request for the starting time on Monday, that request is agreed to. The inquiry of the Senator from Michigan will be in order at this time.

Mr. BYRD of West Virginia. Mr President, the able assistant minority leader presents an appropriate question. If I understand correctly, inasmuch as we are talking now about amendments to an amendment, the vote on such amendments to an amendment could only occur after the time on the amendment had expired except by unanimous consent.

This would be different from the situation in which amendments were being offered to a bill, in which event they could be brought up at any time and voted on. However, in voting on amendments to an amendment it is my understanding—and I ask this of the Chair—that the usual procedure is that, unless otherwise agreed to by unanimous consent, the vote on an amendment to an amendment occurs after the time has expired and just before the vote is had on the basic amendment.

The PRESIDING OFFICER. The Senator from West Virginia is basically correct. When an amendment is up and a time limitation has been agreed to, an amendment to the amendment would not be in order until such time as the time is used up or yielded back.

Mr. BYRD of West Virginia. Mr. President, may I say this in addition to what has been said thus far. The agreements that we have entered into have been proposed and have now been agreed to in an effort by the leadership on both sides of the aisle to bring about final action on the pending bill before the Senate recesses for the Labor Day holiday.

I would like on behalf of the leadership on this side of the aisle to urge that all Senators who have amendments—other than those amendments which have been locked into the agreement—be prepared to call up their amendments and have them acted on. Certainly with all of the time that has transpired on this bill, Senators should be in a position to bring their amendments to the floor, call them up, and have them disposed of without further delay. Controlled time on the amendment by the distinguished Senator from South Dakota (Mr. McGOVERN) will not start running until noon on Monday next, and in the meantime, once that amendment is laid before the Senate on tomorrow afternoon, it can be laid aside temporarily by unanimous consent and other amendments can be called up.

Mr. President, I ask unanimous consent with respect to additional amendments—not stating a date or time on which to vote, but limiting the time within which they may be discussed—that two amendments to be offered by the Senator from Massachusetts (Mr. BROOKE) be limited each not to exceed 3 hours, the time to be equally divided between the Senator from Massachusetts (Mr. BROOKE) and the manager of the bill, the Senator from Mississippi (Mr. STENNIS), with amendments thereto limited to 10 minutes, 5 minutes to the side as suggested.

The PRESIDING OFFICER. Is there objection?

Mr. GRIFFIN. Mr. President, reserving the right to object—and I shall not object—I associate myself with the remarks made by the distinguished acting majority leader. He has been particularly diligent in doing everything possible to get Senators to agree to time limitations so that we can move on to final passage of the pending bill before the Labor Day recess.

I commend him for his leadership in particular. I might say that, although the Senator from Massachusetts is not present at the moment, I have discussed the time limitations just requested with him and he is agreeable to the 3-hour limitation on his two amendments when they are called up. There will be no objection.

The PRESIDING OFFICER. There being no objection, the unanimous-consent request is agreed to.

Mr. BYRD of West Virginia. Mr. President, it is my understanding that the able Senator from Illinois (Mr. PERCY) has an amendment on which he is willing to accept a 2-hour limitation.

I ask unanimous consent, therefore, that on the amendment to be called up by the distinguished Senator from Illinois (Mr. PERCY), there be a time limitation of 2 hours, with the time to be equally divided between the offerer of the amendment (Mr. PERCY), and the manager of the bill, the Senator from Mississippi (Mr. STENNIS), and that on any amendment to the amendment there be a time limitation of 10 minutes, the time to be equally divided between the mover of the amendment and the Senator from Illinois if he is opposed to such amendment; otherwise the manager of the bill, if he is opposed, would control the time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, on Tuesday next, immediately following the vote on the amendment offered by the Senator from South Dakota (Mr. McGOVERN), there be laid before the Senate amendment No. 754, by the Senator from Wisconsin (Mr. PROXMIRE), prohibiting the sending of draftees to South Vietnam, Cambodia, and Laos, and the amendment be made the pend-

ing business; that the time thereon be limited to 1 hour, to be equally divided and controlled between the author of the amendment (Mr. PROXMIRE) and the manager of the bill (Mr. STENNIS), and that any amendment thereto be limited to 20 minutes, the time to be equally divided between the author of such amendment and Mr. PROXMIRE, if he is opposed, otherwise the time in opposition to be controlled by Mr. STENNIS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, it is hoped that action on this bill may be completed on Tuesday next. I merely stress that as a hope. With the agreements that have been locked in today, I think some momentum has been generated. I hope that goal can be achieved.

I express appreciation now to the able assistant minority leader and to all Senators who are principal authors of amendments and especially to the manager of the bill for their cooperation in making it possible for these agreements to be reached.

Mr. GRIFFIN. Mr. President, if the Senator would yield for a further comment, I particularly want to join him in the notice he serves to those Senators who have amendments that we expect them to be called up.

After the weeks of debate we have had on this bill, it seems to me that anyone who has an amendment should be ready to go and that further delay to allow a Senator to get ready to present an amendment, it seems to me, would be unreasonable.

I hope that all Senators will take notice of what the Senator from West Virginia has said and that they will be ready with their amendments. Now that we have a general framework of time laid out for the bill, there will be time this week for any Senator who has an amendment to offer it.

Mr. BYRD of West Virginia. Mr. President, I thank the Senator and if the Senator will yield briefly, may I add this comment. In the event the Senate completes its work on the pending bill by Tuesday next, it is anticipated that 1 additional day would be included in the recess for Labor Day.

Mr. President, I will close by saying that, under the precedents, any Senator can call up any amendment authored by another Senator. So, it is appropriate to say that if Senators are not present on the floor and if they have amendments at the desk, it could very possibly be that a move to call up such amendment may be made by another Senator. Of course, tabling motions are in order at any time with respect to amendments concerning which a date and time have not yet been agreed on which to vote.

Mr. GRIFFIN. Mr. President, while the leadership tries very hard to protect the interests of all Senators, if a Senator were to make such a motion, it might be difficult for the leadership to continue to protect a Senator indefinitely.

Mr. BYRD of West Virginia. Mr. President, I thank the able assistant minority leader for the timely observation. I hope that all Senators take notice and carefully read the RECORD with respect to the program so that the Senate can expedite its work and complete the bill which has been under consideration already now for many weeks.

Mr. WILLIAMS of Delaware. Mr. President, I congratulate both the acting majority leader and the acting minority leader on the fact that at long last we will break this filibuster on a bill that was laid before the Senate on July 23.

I hope that Senators will be on notice and that those who have not yet spoken on this matter will take the time to express their views on the bill between now and then. I think the filibuster has been going on long enough.

Mr. BYRD of West Virginia. Mr. President, I thank the Senator.

ENVIRONMENTAL WARFARE

Mr. NELSON. Mr. President, in 1962, with no idea of what the consequences would be, the United States began a new form of warfare on the environment of Vietnam that is likely to have future disastrous reactions on all forms of life in that small Southeast Asian nation.

In a little more than 8 years, the United States has sprayed more than 100 million pounds of assorted herbicide chemicals over more than 5½ million acres of Vietnam to defoliate forests and kill food crops allegedly grown to supply enemy forces. The United States has sprayed enough chemicals to amount to 6 pounds for every man, woman and child in that country.

Never in history has any nation ever declared war on the environment of a nation, and the United States has embarked on this unprecedented ecological experiment without adequately investigating the chemicals used to see if they would have any dangerous consequences to humans and all other forms of plant and animal life.

This Nation may well have set an ecologic time fuse in Vietnam that will reverberate down the life chain causing widespread destruction by wiping out forms of plant, animal, and aquatic life that can never be replaced, with implications for the people who live there that cannot be evaluated until some time in the future.

Distinguished scientists the world over are becoming increasingly alarmed over man's massive environmental intrusions which are disrupting life systems on a global scale. If for another 50 years we pursue the present course of unabated accelerating pollution of the land, the air, and the water, it spells disaster of unmeasurable proportions. Neither conventional nor nuclear war poses a threat as certain or as serious.

Among the critical environmental pollutants is a class of chemicals called herbicides, now being widely used as defoliants and plant killers. The immediate question is whether we will have the foresight at this point in history to eliminate this chemical as an instrument of war.

Several questions require urgent consideration:

If our role is to defend Vietnam, how can we risk destroying the environment in which they must survive when we leave?

Do we intend to be the only country in the world that defends these chemicals as valid military weapons?

By our continued use do we intend to put our stamp of legality on it?

If we claim the right to destroy agricultural crops with it on the theory that it denies food to the enemy, what real limits are there to its use? Will it not then provide justification for any country in the future to engage in starvation warfare by spraying all crops on the ground that it is necessary in order to deny food to the fighting troops?

If in World War II these chemicals had been available and used by all countries in the same density as we have used it in Vietnam—6 pounds per person—what would be the worldwide consequences?

This is a cheap weapon, and it does not take much sophistication to use it. Do we endorse the proliferation of this weapon into the hands of all nations, developed and developing alike, so that they can engage in anticrop and environmental warfare?

Measured in the long view and, in fact, in the short view, is it not in the best interest of our Nation and the world that we now renounce its use in a worldwide agreement to eliminate it as an instrument of warfare?

Independent scientists have only recently begun to study the cancer-causing, mutation-inducing and fetal-deforming effects of the chemicals used to remove the leaves from plants and destroy food crops.

Dr. Arthur W. Galston, a Yale University biologist and a distinguished authority on herbicides, warned in a recent Washington, D.C., conference that the environmental warfare the United States is conducting in Vietnam may "so alter the ecology of a large region that permanent scars will be left."

In a transcript of his remarks that will appear in the forthcoming book, "War Crimes and the American Conscience," edited by Erwin Knoll and Judith Nies McFadden, Galston charged:

> It seems to me that the willful and permanent destruction of environment in which a people can live in a manner of their own choosing ought similarly to be designated by the term ecocide. . . . At the present time, the United States stands alone as possibly having committed ecocide against another country, Vietnam, through its massive use of chemical defoliants and herbicides.

Mr. President, we will be voting on this amendment which I introduced on July 16, 1970, for myself and Senator CHARLES GOODELL and nine cosponsors. It is the environmental warfare amendment to the military authorization bill for procurement, H.R. 17123.

The amendment would terminate the use of herbicides by the United States as an instrument of war in Vietnam and elsewhere. Specifically, it would prohibit the United States from using antiplant chemicals for military application, would prevent the transfer of such weapons and the equipment necessary to spread the chemicals to another country for it to use, and would provide for the elimi-

nation of the present stockpile of the chemical compounds and all herbicidal equipment related to such use—directing the equipment be used for other purposes.

The chairman of the Senate Armed Service Committee is to be commended for taking the initial step in attempting to find out what the effects of the environmental warfare program have been in Vietnam. Section 506(c) of the military authorization bill for procurement calls for the Secretary of Defense to enter into appropriate arrangements with the National Academy of Sciences for the purpose of conducting a comprehensive study and investigation to determine the ecological and physiological dangers inherent in the use of herbicides and the ecological and physiological effects of the defoliation program carried out by the Department of Defense in South Vietnam. The report is to be transmitted by the Secretary of Defense to the President and the Congress by March, 1972.

A comprehensive study should, of course, be made, but even the Department of Defense has said such a comprehensive study could not be completed in any meaningful way in the next 18 months because it will take much longer to accurately know what the consequences will be from our extensive use of herbicides. A further complication is that most of the defoliated area is still under enemy control and it will not be possible to get into those areas with a scientific investigating team until the war has ended.

The Department of Defense failed in its responsibility to carefully study the long-range effects of the use of herbicides on man, his environment and the vast array of creatures living there before engaging in this intolerable kind of chemical warfare that may cause irreversible and disastrous future damage.

In 1969, the General Assembly of the United Nations passed by a vote of 80 to 3 a resolution that declared the use of military herbicides a form of chemical warfare which is forbidden under the Geneva Protocol. The United States, Australia, and Portugal were the only dissenters.

The United States has pledged itself to uphold the Geneva Protocol ban against the first use of chemical weapons, but has never officially ratified the agreement. Instead, the United States has been actively using antiplant chemicals in unprecedented amounts in Vietnam and has the questionable distinction of setting the precedent in this kind of warfare.

Just last week the President sent the 1925 Geneva Protocol agreement to Congress to approve its ratification, but argued that the use of tear gas and chemical herbicides were not to be considered as part of the 45-year-old ban. The President's action is to be applauded especially since this country is the only major military power in the world not to have signed the agreement. Environmental warfare through the use of herbicides, however, is irresponsible, and we have now learned enough about the dangerous implications of environmental warfare to join the other responsible nations of the world who have prudently agreed it is a dangerous activity that must be stopped.

Even before the Geneva Protocol agreement, the United States was party to the "Hague Regulations With Respect to the Law and Customs of War and Land" annexed to the Hague Convention of 1907. Article 23, paragraph (a) of those regulations specifically states:

It is especially forbidden to employ poison or poisoned weapons.

The Army has interpreted this restriction in its Field Manual, Law of Land Warfare, FM 27–10, page 18, which states:

Relevant treaty position is that it is especially forbidden to employ poisoned weapons.

The foregoing rule does not prohibit measures being taken to destroy through chemical or bacterial agents harmless to man, crops intended solely for consumption by the Armed Forces (if that fact can be determined).

In light of these policy positions, two major points are raised. First, are we sure that we are not employing a poisonous chemical harmful to man to destroy crops? Have there been any tests conducted in Vietnam to confirm conclusively that agent blue, which contains cacodylic acid, has not poisoned North Vietnamese, Vietcong or South Vietnamese? The areas sprayed, by the Department of Defense's own admission, are remote and controlled by the guerrillas. So it is virtually impossible to know whether we are or are not violating the Hague Convention until the war is over.

How do we know that the only crops destroyed are "intended solely for consumption by the Armed Forces—if that fact can be determined?" Some 500,000 acres of rice and other food crops have been destroyed since 1962. Up until 1967 or 1968, agent blue rained down on rice paddies in areas controlled by the guerrillas.

It is well proven that a substantial percentage of the food crops killed were grown by civilians for civilians. There have been studies conducted by and for the Department of Defense that differ greatly over the military effectiveness of the anticrop program, including the point about whether and to what extent civilian crops are affected.

The Army steadfastly maintains that 100 percent of crops destroyed by chemicals are grown by or for the Vietcong. Even that stand can be challenged by a glaring gap in its logic. The Army is obviously assuming that any rice crop grown for guerrillas is for them exclusively, with no part of the crop intended for consumption by non-Communist farmers.

The weakness of that assumption was evident in hearings of the House Subcommittee on National Security Policy and Scientific Developments, chaired by the gentleman from Wisconsin, Representative CLEMENT ZABLOCKI, entitled "Chemical-Biological Warfare: U.S. Policies and International Effects," in November and December 1969. These important hearings dealt at length with the use of herbicides and tear gases in Vietnam. One of the witnesses, Rear Adm. William E. Lemos, Director, Policy Plans and National Security Council Affairs, Office of the Assistant Secretary of Defense for International Security Affairs was questioned on the anticrop program.

A dialog between the gentleman from Minnesota, Congressman FRASER and Admiral Lemos follows:

Mr. FRASER. Your statement on crop destruction on page 13 says that crops in areas remote from friendly populations and known to belong to enemy that cannot be captured by the ground operations are sometimes sprayed.

Admiral LEMOS. We are really talking about very isolated crops in areas of known Vietcong and North Vietnamese army units, and which are clearly a part of that complex and being grown by them, or by people forced by them to grow for them.

Mr. FRASER. How can you determine whether or not the crops are being grown by direction of the VC?

Admiral LEMOS. By the proximity of the main force VC and North Vietnamese units and by information derived from the people in the surrounding area.

Mr. FRASER. As I understand it, we are under an injunction under the Hague Convention not to destroy crops which may be in part for the use of the population, is that right?

Admiral LEMOS. Yes, sir.

Mr. FRASER. How are we able to verify adequately whether or not the crops are in fact aimed just for the fighting units of may not, in fact, be intended for noncombatants—I know this is a difficult problem in this kind of war.

Admiral LEMOS. It is very difficult.

Mr. FRASER. How do we determine that under these circumstances?

Admiral LEMOS. As I indicated, we take extensive aerial photographs of every area where such a proposal is made and those aerial photographs are very carefully analyzed by a broad spectrum of people and if the crops are close to populated areas, they are not subjected to herbicides.

Mr. FRASER. What do you mean by "populated areas?"

Admiral LEMOS. I can't give you the specific cutoff, but the crop destruction program is associated with enemy camp areas and not the villages and hamlets.

Mr. FRASER. How can you be sure (that you are destroying only guerrilla crops)?

Admiral LEMOS. All you can do is the best possible.

Admiral LEMOS (continuing). There has to be substantial evidence that the crops are being grown specifically for the use of Vietcong troops and North Vietnamese troops.

During the same hearings, Thomas R. Pickering, Deputy Director, Bureau of Political Military Affairs, Department of State, commented on the degree of proof in an anti-crop mission. He said agent blue was used where it is believed that the food crops involved are for the use of the Vietcong and North Vietnamese military forces in the area. Without getting into a discussion on what degree of certainty each of these Government officials had in mind and without revealing testimony discussed during executive session to demonstrate the counterproductive aspects of this policy. Admiral Lemos' comments are very revealing. Lemos said that crops are sprayed only in areas that cannot be captured by ground action.

The admiral admitted that in making the "yes" and "no" decision "all you can do is the best you can." If, as some sources have indicated, a substantial

percentage of all crops destroyed—500,000 acres, or 781 square miles—were to be consumed at least in part by friendly South Vietnamese, then the "our best" is incredibly poor or else the product of gross negligence.

The antiplant program in Vietnam and the anticrop program in particular are having adverse effects on the noncombatant South Vietnamese. The report of the Student Task Force for Washington Research on Chemical-Biological Warfare, prepared by a group of Princeton students on June 1, 1970, is a well-documented analysis of the herbicide program. The report states:

> The main result of the food denial program seems to have been the creation of thousands of refugees. When their crops turn yellow and die, peasants are forced to leave their homes and travel to the cities or to refugee camps maintained by the Saigon government at American expense. Food may be available here, but the living conditions are less than desirable. Abhorrent though the thought is to American civilians, the creation of refugees seems to have been and may still be the ultimate goal of the program. Representative Richard C. McCarthy (in his book, *The Ultimate Folly*) quotes ex-Presidential Science Advisor, Donald F. Hornig, as saying that the program is designed to force farmers outside of American/South Vietnamese held areas to abandon their farms and move into our sphere of influence. The Department of Defense denies that this is their goal, but even they cannot deny that this is a result of a program they insist on continuing.

The ad hoc international scientific commission composed of four scientists—Drs. A. H. Westing, plant physiologist, and E. W. Pfeiffer, animal physiologist, both of the United States; and Dr. Jean Lavorel, plant biophysicist, and Leon Matarasso, lawyer, both of France—in their "Report on Herbicidal Damage by the United States in Southeastern Cambodia," presented a graphic example of the effects of herbicidal warfare on the civilian population:

> A large variety of garden crops (both agricultural and horticultural) were devastated in the seemingly endless number of small villages scattered throughout the affected area. Virtually all of the *ca.* 30,000 local inhabitants are subsistence farmers that depend for their well-being upon their own local produce. These people saw their crops, then growing, literally wither before their eyes. Indeed, it was the widespread death of the vegetables that heralded the rest of the damage to the area. Their then current crops of vegetables of numerous kinds, pineapples, of jackfruit, of papayas, and of many more were simply destroyed.

The stated policy of the military is to use herbicides in remote areas of low population "not exceeding eight persons per square kilometer" or 21 persons per square mile. Yet, evidence has indicated that crops have been destroyed in areas where the population density is as great as 1,000 persons per square mile.

Even more damaging is the Department of Defense's public admission:

> Approval (for anti-crop mission) includes arrangement for indemnification, if later necessary, as well as plans for supplying food to the South Vietnamese who might thereby be denied food sources.

General Blanchard, in his official statement in a briefing with Senator THOMAS MCINTYRE, said:

> Such targets (anti-crop targets) are carefully selected so as to attack only those crops known to be grown by or for the Viet Cong or North Vietnamese.

If, as Admiral Lemos admits, it is difficult to make that determination, and if we only attack Vietcong or North Vietnamese crops as General Blanchard so categorically states, then why do we enunciate a policy of paying those South Vietnamese citizens who are deprived of their food source? It would seem clear that this is an obvious violation of the Hague Convention of 1907.

Alarming reports from official Government sources and independent scientists are beginning to show that the careless use of antiplant chemicals may be endangering a vast variety of plant and animal life and in some places destroying vital soil organisms. Distinguished scientists fear, for example, that vast timber areas sprayed as suspected Vietcong hiding places may not recover, or may take a number of years returning to normal growth. No one can accurately predict what some of the chemicals used will do to other organisms and plant and animal life, but recent research is proving that it is not enough to study whether a chemical is toxic to animals.

Until the past 5 or 10 years, researchers testing a new chemical were satisfied if the agent fed to a laboratory animal did not kill him. They know now that that is not enough. Some chemicals which are harmless in a toxicity test, will later turn out to be carcinogenic—cancer-inducing, mutagenic—mutation inducing, or teratogenic—inducing abnormalities in developing embryos. The thalidomyde disaster of a few years ago and other recent findings linking cancer with seemingly "safe" chemicals and food additives, points to the need to test new compounds in more sophisticated ways to determine that they will not be harmful to humans and other forms of life.

This kind of careful, sophisticated testing was not conducted on the herbicidal compounds before the United States began using them in Vietnam.

The U.S. environmental warfare program moved from limited testing in 1961–62 to the reduction of foliage along roads and waterways in 1963. In 1964, the military began destroying crops allegedly grown by or for the enemy forces and then began spraying large tracts of swamp and forests in 1965–66. By 1967–68, more than 2,000 square miles a year were sprayed at an annual expenditure of some 8 million gallons of the chemicals. By 1970, 5½ million acres, or 12 percent of Vietnam was defoliated, an area about the size of the State of Massachusetts.

The three herbicide compounds used in Vietnam are known by the code names—agents orange, white, and blue. Orange and white are defoliants and agent blue is used to destroy crops.

Agent orange is a mixture of 2,4-D and 2,4,5-T and was the most common herbicide used in Vietnam. White is a mixture of 2,4-D and picloram in a water base. It is less volatile than orange and hence is used where drift damage to friendly crops is feared. Blue is a water solution of cacodylic acid and is used to destroy rice and other food crops.

Of the four chemicals used in the three herbicides, two have been tested extensively. The chemical 2,4,5-T was shown to cause fetal deformities in chicken embryos, mice, and rats. Because of these findings, the U.S. Surgeon General restricted the domestic use of the chemical. The following day, April 15, 1970, the Deputy Secretary of Defense banned the use of Agent Orange in Vietnam. Up to that point, the United States had sprayed 40 million pounds of 2,4,5-T over the Vietnam landscape.

The chemical 2,4-D has also been shown to cause fetal deformities in tests on chicken embryos and hamsters. Comprehensive testing of this chemical is continuing at Food and Drug Administration laboratories and the National Institute of Environmental Health Sciences. The Surgeon General has not imposed restrictions on 2,4-D because he said the tests were still not conclusive enough.

While some tests are underway, the attention the Federal Government gave 2,4,5-T and 2,4-D has not been given picloram and cacodylic acid.

Picloram is a highly persistent chemical that some scientists maintain is the herbicidal equivalent of DDT. Like DDT, picloram has been used extensively both domestically and internationally without any comprehensive studies to determine what long-term effect it has on the natural environment. After some 26 years of extensive and widespread usage, it was not until Rachel Carson published her dramatic volume, "Silent Spring," that extensive studies finally showed that DDT was a persistent, long-lasting chemical compound that had spread throughout the environment, endangering many species of life and causing serious future consequences no one can predict. Government experts have admitted that they do not know how long-lasting or persistent picloram is.

With the discontinuation of Agent Orange containing 2,4,5-T, picloram was given greater usage in Vietnam because it appeared to be innocuous. In feeding tests with laboratory animals it showed up quite nonpoisonous.

Recent tests, however, presently being performed by W. T. Jackson and O. R. McIntyre at Dartmouth University have shown that the chemical causes an inhibition of protein synthesis in human white blood cells tested outside the body in test vessels and an inhibition of normal cell division patterns. Preliminary research at the Food and Drug Administration is finding some malformation in development induced by this compound.

The lengthy life picloram has in the soil was reported in an article in the Dow Chemical Co. house organ, "Down to Earth." The magazine of the company that produces the chemical compound said that in certain soils less than 3.5 percent of picloram disappears after 467 days; in other soils as much as 20 percent disappears.

Those are remarkably low levels of disappearance and if picloram is applied to soils year after year, scientists predict that a gradual build-up is inevitable. The fact that picloram apparently has an effect on cell division together with the

fact that no single microorganism is known which will degrade picloram, graphically shows that in some respects this herbicide is as dangerous as DDT and is so persistent that it should not be used as a herbicide in any indiscriminate manner.

The fourth herbicide used in Vietnam, cacodylic acid, is 54 percent arsenic. It is alleged in the usual feeding toxicity tests to be no more toxic than aspirin. Research scientists report that cacodylic acid in an organic state is generally not considered harmful. They warn, however, that no one knows if some microorganism in the soil or water might react with the relatively stable arsenic atoms and transform the chemical into a deadly compound that could cause catastrophic ecological consequences.

Scientists have warned that there are several other possible long-term ecological dangers from the military application of chemical defoliants in Vietnam. They include laterization, or irreversible hardening of soil no longer protected from the sun by foliage; pemanent destruction of mangrove swamp forests; poisoning of aquatic life by runoff into the water system, elimination of many forms of animal life and opening up vast areas to the permanent invasion of fast-spreading undesirable plants like bamboo, forcing out the future growth of normal plant life.

The implications of herbicidal warfare in Vietnam were discussed in part recently at hearings before the Senate Committee on Foreign Relations. In response to questions from the committee chairman Donald G. MacDonald, the Director, U.S. Agency for International Development, Vietnam, since 1966 said:

> The damage done to the economy on a permanent basis is a subject of great interest obviously to me as the head of the AID program in South Vietnam, and I have studied it rather closely. There is, I suppose one could say, an enormous physical loss of forests as a result of defoliation.

Hardwood forests cover about two-thirds of Vietnam and formally employed about 80,000 persons in the timber industry. About 2,500,000 acres have been sprayed with one treatment of agent orange, causing a 10 to 20 percent permanent kill. Another 1,250,000 acres have been sprayed two or more times with a 50 to 100 percent permanent kill.

Without even considering the incalcuable ecological implications of such extensive killing of trees and plants, the destruction of so much timber could be a very serious economic blow to Vietnam since timber is potentially the greatest export of the country.

The long-term effect of massive spraying upon the forest and its life systems is anybody's guess—and it is a matter too important to guess about.

Two zoologists, Gordon H. Orians and E. W. Pfeiffer, in a recent article on the "Ecological Effects of the War in Vietnam" in Science magazine found that the almost complete destruction of all the vegetation on the mangrove areas that had been sprayed had a severe effect upon the animals living there:

> During our tour of the defoliated areas, we did not see a single species of insectivorous (insect eating) or frugivorous (fruit eating) birds with the exception of barn swallows . . . which are migrants from the north.

An international scientific investigative team, assessing the damages to the unexplained defoliation of some 173,000 acres in Cambodia which occurred in late April and early May 1969, said in their December 1969 report:

> It is interesting to note that eastern Cambodia in general has experienced quite a substantial increase in a variety of wildlife, apparently driven out of Vietnam by the defoliation and other ravages of war. Included are munjacs, and other species of deer, wild cattle, (Gaurs, Bantengs and some Koupreys) elephants, a number of monkeys species and wild pigs.

Dr. J. B. Neilands, a University of California biochemist, has listed some of the animal species of Vietnam which are known to be in danger of extinction. The douc langur and the Indochinese gibbon, both on the verge of extinction, it is feared, will be wiped out completely since these creatures exist exclusively on a variety of plants growing in the heavily defoliated areas.

It can be supposed that some will argue that the destruction of some animal and plant species is relatively unimportant in relation to the war effort. But if the wildlife is being destroyed, what then is happening to the delicate tropical ecosystems comprising the complex relationship of all plant and animal life? An even more pressing question is what effect, direct and indirect, does the herbicide program have on the people of South Vietnam? And finally, what exactly are the limits, if any, to a military program such as this and what are the moral implications?

The poisoning of aquatic life by runoff into the water system is a real problem in Vietnam. Marine fauna are known to be injured and killed by 2,4-D and 2,4,5-T, the major defoliant chemicals. Tests of the effect of from one to two parts per million of 2,4-D showed it had a deleterious effect on mayfly nymphs, leeches, clams, and snails.

Dr. Galston points out that—

> The estuarine environment in which the mangroves grow is tremendously important to shellfish and migratory fish, which deplete a portion of their life cycle in the ecosystem enveloped by the mangrow roots. With these plants killed, the fish will probably go elsewhere. This will lead to a decline in the fish and shellfish catch, which constitutes an important source of protein and essential amino acids.

In 1968, aware that there was little data on the ecological effects of the military use of herbicides in Vietnam, the State Department sent F. H. Tschirley of the Department of Agriculture to make a 30-day study. Tschirley's report indicated the military defoliation program "is having a profound effect on plant life in Vietnam."

One of the long-range effects that Tschirley found was in the massive destruction of mangrove forests. He declared that mangroves are extremely susceptible to defoliants and that one application was sufficient to kill most trees. He reported visiting the Rung Sat Peninsula that was still completely barren, even though it had been sprayed years earlier. He estimated it would take about 20 years for the reestablishment of a mangrove forest.

Zoologists Gordon H. Orians and E. W. Pfieffer, in their recent Science magazine article argued, however, that Tschirley's estimate was conservative because it was based on the assumption of the immediate redistribution of seeds to the defoliated areas and the presence of suitable germination conditions when they arrive.

Emphasizing the lack of knowledge on the use of defoliants, the zoologists contended that there is reason to believe that the timetable for mangrove regrowth may well be longer than 20 years.

There are areas of sprayed mangrove forests in Vietnam defoliated in 1961 that still have shown no significant recovery.

Most of the defoliation has occurred along a strip extending from the northern boundary of South Vietnam through the center of the country halfway to the southern tip and also along the Ho Chi Minh Trail from Laos as it leads into South Vietnam. Defoliation on a smaller scale is being conducted in Thailand. The ecology of tropical forests is discussed in "A Legacy of Our Presence: The Destruction of Vietnam," prepared by the Stanford biology study group. The report states:

> Tropical forests and soils are very different from those in the temperate zone. Thus to understand the long-term effects of the war in Southeast Asia it is necessary to describe certain characteristics of tropical forests and soils.
>
> One such feature is the intricate interdependence of the plants and animals. For instance, the trees of tropical forests depend entirely upon insects, birds and bats (rather than wind) for pollination. Birds, bats and ground dwelling mammals are responsible for dispersing seeds from the parent plants to new clearings. These complex plant-animal relations have reached their greatest intricacy in tropical forests because of the mild and predictable climate. Animals can be active the year around because many flowering and fruiting trees provide food continuously. Massive defoliation means an end to this reliable food supply and death for those animals that are most important to the survival of the forest plants.

The U.S. defoliation program has set the stage for irreversible environmental damage. The flora and fauna depend on one another. If you destroy one, you almost inevitably destroy the other.

The study group also discussed the unique problem of laterization, or the irreversible hardening of soil no longer protected from the sun by foliage. The report stated:

> From 30 to 50 percent of Vietnamese soils are of a type which have the potential to turn into a brick-like substance, known as laterite, if they are deprived of the organic covering which protects them from exposure to severe weathering. The potential for laterization is greatest in areas which were already disturbed before herbicide application. Cropland, as well as bombed and bulldozed areas along roadways, fall into this category. The permanence of laterite is well illustrated by the Khmer ruins around Angkor Wat in Cambodia where many of the temples were constructed primarily of this rock nearly ten centuries ago. Obviously, laterized land is useless for agriculture.

More incredible than Operation Ranchhand where the popular slogan is "Remember, only you can prevent forests," the military dreamed up Operation Sherwood Forest and Operation Pink Rose. The rationale was that after defoliating a forest, fire raids similar to the fire bomb attacks on Dresden and Tokyo in World War II would completely decimate jungle areas of South Vietnam. As Thomas Whiteside wrote in his book "Defoliation":

The ultimate folly in our defoliation operations in Vietnam was possibly achieved during 1965 and 1966, when the military made large scale efforts in two defoliated areas to create fire storms—that is, fires so huge that all the oxygen in those areas would be exhausted. The apparent intention was to render the soil barren. (A fire storm would also, of course, have the result of burning or suffocating any living being in the area.) Operation Sherwood Forest, conducted in 1965, was an attempt to burn a defoliated section of the Boi Loi Woods. In October, 1966, the military began Operation Pink Rose, a similar project. Neither of the projects, in which tons of napalm were thrown down on top of the residue of tons of sprayed 2,4,5-T succeeded in creating the desired effect . . .

Before the U.S. Surgeon General banned the use of 2,4,5-T, the military took a hard line on the chemical's dangerous effects and maintained there was no correlation between the use of this defoliant and any hazards to human health.

On October 30, 1969, the Department of Defense stated in a press release:

The policy of the Department of Defense always has been to use Orange (a liquid solution of 2,4,5-T and 2,4-D) in remote areas away from the population. This policy is being reiterated and emphasized; additional precautions are being taken to insure that Orange is not used in populated areas.

This policy statement raises one crucial point. What does the phrase "away from population" mean? A recent column by Daniel Deluce of the Associated Press reports that in areas of the Mekong Delta where Americans fought "there are empty fields, cratered by bombs, growing only weeds, coconut palms killed by defoliants lean crazily. The farm houses have vanished." The most highly populated rural area in South Vietnam has been defoliated.

However, it is interesting to note that the Department of Defense planned to conduct a survey by going through Vietnamese hospital records to determine if there is a correlation between herbicides and the rate of miscarriages, still births, and fetal deformities. The study group concluded before they began that the study could not be conducted. The conducted a general survey that proved nothing. The report of the study is unclassified, but the Department of Defense refused to make it public, ostensibly on the basis of an agreement with South Vietnam. Nobody is to see the study until it is published. Yet in talking to Department of Defense officials, no one was sure even who in Defense could see it.

In spite of the Saigon and Hanoi newspaper allegations to the contrary, the military has steadfastly maintained that there have been no claims on South Vietnam or the United States for any health hazards caused by defoliants. At the same time, over $3 million in claims to property damage have been honored by the Government of South Vietnam and paid through counterpart funds by the United States.

Bionetics Laboratory conducted a study of the teratogenic or birth deforming effects of 2,4,5-T and 2,4-D in 1968. The results showed that both chemicals, the major defoliants in Vietnam, possibly have teratogenic effects. That study was not released until late 1969. The Federal Government took action only after a number of articles by Thomas Whiteside appeared in the New Yorker and only after the Senate hearings, "Effects of 2,4,5-T on Man and the Environment."

The international scientific commission that went into Cambodia in late 1969 to study the effects of defoliation on the environment that occurred earlier that year discussed in their report the health hazards defoliants have on animals. The study declared:

All of the interviews with the local inhabitants consistently disclosed that village livestock became ill for a period of several days soon after spraying. Whereas the larger animals (water buffaloes, cattle and mature pigs and sheep) became only mildly ill and all recovered, some of the smaller ones (chicken, ducks and young pigs) suffered more severely and in some cases were reported to have died. The domestic mammals were described as having digestive problems, whereas the domestic birds became partially paralyzed. Apparently many wild birds became similarly disabled and could be captured easily. There were also a number of small dead birds found at the time in the woods and fields.

An article in an April issue of the London Times stated that the British Forestry Service had also seen many paralyzed birds when they sprayed 2,4,5-T. This was in addition to the dizziness and nauseous feeling the people spraying had experienced themselves.

On ABC–TV, July 27, 1970, a program entitled, "The Poisoned Planet," which depicted the serious state of affairs in the world since the wide-spread use of pesticides and herbicides, showed several vivid shots of birds trembling helplessly in reaction to herbicide spray.

Dr. Jacqueline Verrett, who was instrumental in determining conclusively for the Food and Drug Administration that 2,4,5-T was teratogenic, has tested samples of orange and white and found that they both produced fetal deformaties in her laboratory experiments. The State Department has admitted that agent orange and white were used in the mysterious herbicidal attack on Cambodia last year.

The ad hoc independent scientific commission, when in Cambodia, interviewed many of the local inhabitants about human health effects from the mysterious spraying.

Many (people) spoke of widespread temporary diarrhea and vomiting, particularly among infants and to a lesser extent among the general adult population. At one location (Chipeang) water was trucked in for a time following spraying to provide uncontaminated water for the children. In those instances where the people depended largely upon deep wells for their water supply we received no report of human digestive problems.

The New York Times reported on June 6, 1969:

Many residents of the area (Fish Hook) reported to have been affected by the defoliatin suffered from diarrhea, vomiting and colitis.

Keeping these factors in mind, the anticrop program is particularly worthy of discussion.

The World Health Organization in its report, "Health Aspects of Chemical and Biological Weapons," published in 1970, defined chemical agents of warfare to include all substances employed for their toxic effects on man, animals and plants. They later added:

Very little is known about the chronic toxicity or long-term effects of anti-plant agents, for example, their teratogenicity or carcinogenicity. In this connection it must be borne in mind that the military employment of anti-plant chemicals may lead to their intake, by humans in water and food, in dosages far higher than those experienced when the same chemicals are used for agricultural and other purposes. While it may be untrue to say that the possibility of chronic toxicity has been entirely ignored, it cannot be said that it has received anything approaching adequate study.

On both the political and military level, the anticrop program is a dangerous facet of environmental warfare because it can be directed in a punitive way and bring about starvation in a massive and indiscriminate manner. Who is to say when some nation will decide to use it for that purpose too?

During last April and early May 1969, 173,000 acres or 270 square miles of the Fish Hook area of Cambodia was sprayed with defoliants, confirmed to be agents orange and white. The Cambodian Government subsequently claimed $8.7 million—now $12.2 million—in compensation from the United States for heavy damage to 37,000 acres of rubber and fruit trees several miles inside the border. Because this was an international incident, the State Department sent a governmental team of technical experts to Cambodia to assess the damage.

The State Department unequivocally denied U.S. involvement in the incident and that no other party could be found at fault. One is entitled to wonder who else in that war has the planes and equipment to engage in this kind of warfare?

The report to the State Department of July 1969 concluded that—

Defoliation of rubber, fruit and forest trees farther north (of the Cambodian border) was probably caused by a direct spray application by an unknown party. . . .

Thomas Pickering, Deputy Director, Bureau of Political-Military Affairs, Department of State, submitted the following statement to the House Subcommittee on National Security Policy and Scientific Developments in December 1969, that—

The greatest part of the damage was caused by a deliberate and direct overflight of the rubber plantations.

In contrast, the Department of Defense on May 22, 1970, asserted that—

The defoliation of Cambodia was neither punitive nor in preparation for military action.

How could the DOD maintain that it was "neither punitive nor in preparation for military attack," while Pickering, speaking for the State Department, asserted that the defoliation was "deliberate?" Since the official position is that the United States was not found culpable, it is, indeed, surprising that the State Department is still considering the claim. The State Department and the DOD could not determine the intent of the mission unless they know about the origin of the mission.

Finally, Mr. President, I refer to the second part of the environmental warfare amendment, which states that the United States shall be prohibited from entering into or carrying out any contract or agreement to provide agents, delivery systems, dissemination equipment or instruction for the military application of anti-plant chemicals.

In other words, the amendment would not allow our country to turn over to the South Vietnamese or any other country this indiscriminate weapon of warfare.

The indiscriminate, extensive use of herbicides is further compounded by the fact that, even while a proposed study is underway to examine the effects of the antiplant chemicals, the U.S. Armed Forces are in the process of turning command and control of the herbicidal program over to the South Vietnamese as part of the administration's Vietnamization plan.

With such little scientific knowledge available on the environmental implications of the use of herbicides, this nation cannot be permitted to allow the proliferation of this dangerous kind of environmental warfare, especially proliferation into the hands of the South Vietnamese Government.

General Blanchard, in his Senate briefing of April 29, 1970, asserted that the United States was considering how to transfer the herbicidal program to the South Vietnamese. The DOD letter of May 22, 1970, to the committee on CBW, composed of Princeton University students, stated quite the contrary:

When the United States instituted a ban (April 15) on the use of 2,4,5-T in military operations, the South Vietnamese government instituted a similar ban. The United States will not supply 2,4,5-T to SVN or other governments until the problem of teratogenic effects has been resolved.

Clearly, before General Blanchard had made his presentation, the United States had been supplying herbicides for military application to South Vietnam. It appears from the DOD statement that we were providing agent orange to other governments, which raises even graver issues.

The forcing function of technology has allowed the introduction of a new form of warfare. A type that is of questionable military value, ecologically and biologically damaging and politically explosive. We have to develop new attitudes so that we will not automatically equate technology with progress and efficiency and will not see it as a panacea to cure the problems of the Nation and the world.

The entire planet is facing an environmental crisis because progress for the sake of progress became the standard for success. In the wake of this mad rush to accomplish and be successful, man has violated earth with his impatience.

Technology and science provided the short cuts to eliminate pests with pesticide compounds that were used indiscriminantly and man irritated and surprised when he found that the chemicals were destroying and threatening to destroy other forms of life.

He dumped the wastes of his advanced civilization into the water systems and seas and was irritated and surprised to learn that the waters of the water planet had a saturation point.

He exhausted the fumes of his industries and his motors into the thin envelope of air surrounding the planet and was irritated and surprised when the air became clogged and choked many of his major cities.

Now there is a new advancement. Chemical compounds have been found that can destroy plants that man finds undesirable along his roads and highways. Science and technology have produced chemicals that efficiently and economically can be used militarily to destroy the foliage suspected to be hiding an enemy or kill the crops believed grown to feed him.

Unfortunately, like so many other of the rapid advancements of his society, man created another potential for disaster. By engaging in warfare on the environment this country has taken the leadership in conducting a long range warfare on man himself and future generations, friend and enemy alike.

Mr. McINTYRE. Mr. President, I have listened to the remarks of the distinguished Senator from Wisconsin (Mr. NELSON) with a great deal of interest. The military use of herbicides for defoliation and crop destruction in Vietnam has been a source of controversy almost since it was initiated in 1962. I myself have had some doubts about the wisdom of the herbicide program about its possible effects on civilian elements of of the Vietnamese population, about its long-term ecological consequences, and about its implications for a wider use of chemical and biological warfare agents.

The present Nelson-Goodell amendment is the product of similar doubts. It would cause a termination of the herbicide program, also banning a resumption at any time in the future. On the surface there is much which commends it to me. I might even like to support the amendment. It appeals to one's emotions.

But in all good conscience, I cannot do so. For whatever the possible side effects of our herbicide program, its primary contribution is indisputable: it has saved the lives of Americans in Vietnam. As long as our participation in this tragic war continues, this is, to me now, an overriding consideration.

The Armed Services Committee knew, during its deliberations on the present bill, that our herbicide program would be an issue once the bill reached the floor. Accordingly, it subjected the program to a thorough examination, in an attempt to reach an independent conclusion as to whether it should be continued.

Before proceeding to a determination of this basic question, the committee sought to define with care the precise scope of its inquiry. There were two issues, it decided, which could best be left out of the debate.

One was the consistency of our herbicide program with the terms of the Geneva protocol. As you know, the United States is one of the very few nations of the world which maintains that herbicides are excluded from the protocol's chemical warfare ban. The committee decided to eliminate this issue because it will itself be presented to the Senate sometime in the very near future, now that the protocol has been sent over for a vote on its ratification. That would be the proper time, the committee felt, to weigh in detail the arms control implications of our herbicide program. To inject that issue here would not serve to erase the policy we have followed. And it could only prevent a clear consideration of the more immediate issues.

A second issue which the committee chose to put aside was the wisdom of our overall Vietnamization policy. Not only is this another matter on which we will vote quite shortly, there is good reason not to allow one's attitude toward Vietnamization to determine one's position on herbicides. Whether we should get out of Vietnam is one question, the protection to be afforded our troops if we stay itself a very different one.

In the committee's view, a decision on our herbicide program thus required a weighing of conflicting considerations: the possible ecological and physiological dangers inherent in the program's continuation, on the one hand, and the military implications of its termination on the other.

Let us look first at the possible adverse side effects.

There have been many claims of possible long-term ecological dangers from the use of chemical defoliants. These include: First, laterization of the soil—its conversion to hardened, infertile form—Second, permanent destruction of mangrove swamp forest—Third, poisoning of aquatic life.

A study of the ecological effects of defoliation in Vietnam was undertaken in 1968 by Dr. Fred H. Tschirley, of the Department of Agriculture, who was invited to conduct the study by the Department of State and the Department of Defense. A report on his observations was made at a convention of the American Association for the Advancement of Science—AAAS—and was published in their weekly journal Science—volume 163, February 21, 1969. I ask unanimous consent that the article be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McINTYRE. Tschirley found no evidence that laterite soil was being produced as a result of our defoliation program. While acknowledging that laterization was a long-term process, he also

expressed doubt that defoliation would produce it over time. The main reason he cited was the fact that bare soil does not result from defoliation. While some trees and brush may be killed, the grassy ground cover survives and indeed grows rapidly when exposed to the greater sunlight which defoliation allows to get through. Thus Tschirley concluded that while 30 percent of the soils in Vietnam indeed have a potential for laterization, laterite was not a predictable result of our herbicide program in that country.

Tschirley also found no evidence that mangrove swamp associations—found frequently along waterways in Vietnam—would themselves be permanently damaged. Surveys of defoliated mangrove areas have shown definite signs of regrowth after 6 or 7 years. While full recovery of mangrove areas may take as long as 20 years, Tschirley found no reason to doubt that eventually it would occur.

Nor did he find any evidence of adverse effects on the aquatic food chains—such as shellfish and migratory fish—dependent on mangrove areas for their existence. He noted that the increased fish catch in the mangrove areas indicates that no damage has occurred. Moreover, care has been taken not to destroy all of the mangrove in any particular area, so that germination of seed from the established forest could go on.

The Defense Department has also conducted many other studies to minimize possible danger of its herbicide program.

Five years have been spent together with the Department of Agriculture, studying the effects of herbicides in areas of Puerto Rico and Texas, areas similar to portions of South Vietnam. A year's study was also made on experimental plots in South Vietnam. Moreover, a botanical survey of South Vietnam has been compiled and on several occasions Department of Defense and Department of Agriculture scientists have gone to Vietnam to search for evidence of adverse ecological change. The Agency for International Development of the Department of State has also made such surveys, utilizing consultants from universities, the Department of Agriculture and the U.S. Forest Service. Several years have also been spent on studying the effects of herbicides on experimental plots in Thailand. These studies have been published in the open literature.

Additionally, the United States has reviewed the experience of and studies conducted by other nations, which have employed herbicides domestically. For example, herbicides have been used extensively in rubber and oil-palm plantations in Malaysia for over 20 years at an application rate 5 to 6 times those used in Vietnam. The herbicide operations in Malaysia were conducted to kill old nonproductive trees and jungle vegetation in preparation for planting new trees. As the program of herbicide usage has continued in Vietnam, nearly continuous review has been made of the resulting effects. All of the information available indicates that herbicides are not concentrated in soil or water, nor to any appreciable degree in plants.

During the past year, however, a concern about the possible ecological side effects of our herbicide program has largely given way to a new concern over the teratogenic, or fetus-deforming properties of herbicides in use in Vietnam.

What precipitated this concern was a report by Bionetics Research Laboratories that 2,4,5-T caused abnormal fetuses in mice, rats, and chicken embryos. 2,4,5-T is present in agent orange, the agent most heavily used in the herbicide program for most of its duration.

The initial Bionetics report precipitated a major controversy. It was argued, for example, that the teratogenic properties in question were the result not of 2,4,5-T but a dioxin contained in the specific test samples used.

More recent research by the Departments of Agriculture and HEW has convincingly exploded this theory and has shown 2,4,5-T to indeed be teratogenic. This research has also raised questions as to the possible teretogenicity of 2,4-D, which is contained in agent white, the main substitute for agent orange now available to the Defense Department.

These findings have given rise to a review of the herbicide program within the Defense Department. The use of agent orange has been officially suspended in a move paralleling restrictions placed on the domestic uses of chemicals containing 2,4,5-T by the Agriculture and Interior Departments.

The Defense Department has declined to indicate under what circumstances the use of agent orange might be resumed or the use of agent white itself suspended. It claims that its present suspension of agent orange was a precautionary move, pending further study, and that a resumption of its use would not clearly pose a threat to the health of Vietnamese civilians.

In support of this contention, the Department argues that animal data cannot be directly extrapolated to humans. Even if humans were similarly susceptible—itself a point to be established—far larger doses would be required to produce the same effects. The Department contends that the danger to a Vietnamese woman would depend on the quantities of contaminated water she drank for about 3 months during the middle of her gestation period, and that it is highly unlikely that she could drink a sufficient amount to put her in serious danger. Assuming an extensive rainwater collection system, the Department estimates that the required level of contamination could not arise unless the area in question were sprayed every few weeks. Since an area is normally sprayed only once during any 6- to 9-month period, this postulated condition would be virtually impossible to attain in the Department's opinion.

The Department notes, also, that not a single incident of verified malformed births from herbicide operations has uncovered during the entire 8 years of the program's existence. An intensive examination of hospital records in Vietnam has been initiated, but the results have not yet been completely collated. Preliminary indications, however, point to a birth defect rate essentially unchanged from the predefoliation era. In addition, an examination in December 1969, of the hospital records in Mimot, Cambodia showed no increase in birth defects as a result of the accidental spraying of rubber plantations in the area which occurred in April 1969.

While the committee is heartened that no evidence of birth defects from our herbicide program has been uncovered, it commends the Department's decision to suspend the use of agent orange in its program. It hopes that the Department will continue to show a similar strong concern about the potential side effects of its defoliation activities in the future.

In determining whether or not to recommend a termination of the herbicide program in Vietnam, the committee had to weigh against the potential ecological and physiological consequences just considered the military implications of the program's cessation. The committee concluded that these implications could be serious. For there can be no doubt that the program has been of critical importance in saving American lives.

Consider for a moment some of the uses to which defoliants are put:

First. Perimeter defoliation. Herbicides have been used to restrict the growth of high jungle grass, bushes, and weeds around base camps and fire bases. Their use in this manner provides fields of fire for and prevents surprise attacks on friendly forces in such areas.

Second. Defoliation of lines of communication. Defoliation of heavy growth along roads and canals serves a similar function. It permits aerial surveillance ahead of moving forces and minimizes the possibility of concealment from such forces themselves, thus reducing the risk of ambushes.

Both of these uses of defoliants have been questioned. It has been claimed that defoliation merely permits the enemy to attack with heavier weapons and robs friendly forces of cover if they are attacked.

What this view overlooks is the crucial importance of providing observation out to 200 or 300 yards, thereby denying the enemy a close-in, concealed ambush position.

Any soldier will tell you that it is easy, with a rifle or machine gun, to hit a target up to 100 feet away, but that it becomes increasingly difficult to hit one at 600 to 1,000 feet. The critical period in an ambush is the first 10 to 15 seconds, after which evasive action and counter-ambush fires will reduce its effectiveness. The inaccuracy of distant fires—even with heavy weapons—gives our troops a chance to survive the first few critical moments and then overcome or evade the enemy forces.

Third. Defoliation of infiltration routes. Areas used by the enemy as routes of approach, resupply or movement are important targets for herbicide spray. Defoliation of these routes permits aerial observation and allows better detection of enemy units and their resupply activities.

Fourth. Defoliation of enemy base camps. Spraying of enemy base camps is used to expose them to aerial obser-

vation, after which either the enemy himself or his bunkers, living quarters, and other facilities can be destroyed.

The effectiveness of these two defoliation uses has been questioned on the grounds that they seldom produce direct military contact. The enemy is usually gone by the time the area sprayed has actually been defoliated.

But this absence of contact itself can be a measure of the defoliation's effectiveness. To cite just one example, in Sa Dec Province a major VC base was defoliated in August 1968. After defoliation, an ARVN battalion was able to remain overnight in the area for the first time in 5 years. Many enemy bunkers were opened to observation and destruction. Since the defoliation, the VC presence has decreased to the point that only regional and popular forces are now necessary for local security.

Fifth. Crop destruction. The Department of Defense claims that crop destruction has been a small but important part of the herbicide program. It notes that the crops destroyed have never exceeded 1 percent of Vietnam's annual food supply and that great care is taken to attack crops known to be grown by or for the enemy himself.

The committee is aware of the fact that studies of the effectiveness of our crop destruction program have reached conflicting conclusions. A Rand Corp. study, conducted at the Department's request, concluded that the program was largely counterproductive, given its alienation of the civilian population. At the same time, captured enemy documents have revealed that Vietcong and North Vietnamese units have been put on reduced rations and forced to divert tactical units from combat missions to food-growing and food-transportation operations as a result of the program. The committee expresses no judgment of its own regarding this conflicting evidence. It did not feel competent, however, to second-guess the experience of our military commanders who almost to a man believe that the program is effective on balance.

Mr. President, there can be no doubt that these uses of herbicides in Vietnam have protected friendly forces, conserved manpower, and thereby saved American and South Vietnamese lives. I could cite many specific examples where this has been the case, but two should be enough to dramatize my point:

First. Helicopter defoliation operations were conducted in 1968 against infiltration routes and mortar and rocket sites in the vicinity of Pleiku City. Aerial observation of the area is now possible and Pleiku has not experienced mortar or rocket attacks since the area was defoliated.

Second. A portion of National Highway No. 4 in Phong Dinh Province was defoliated in June 1968. This mission was conducted after a series of missions against GVN convoys and troop movements. The target area consisted primarily of coconut palms and banana trees that had been abandoned for several years. The vegetation had become so dense that convoy security elements were unable to see more than 5 meters into the underbrush. It required three companies of regional and popular forces and an armored cavalry troop to secure the target during the helicopter spraying. Since defoliation, convoys have used the highway two to three times a week without attack or harassment. Only one platoon of popular forces is now required to provide local security to the nearby hamlet and the highway.

Against this background, the committee had no alternative but to recommend against a complete cessation of our herbicide operations.

At the same time, however, it believed that the potential side effects of our herbicide program—especially the physiological effects surfaced in the past year—themselves demanded serious attention. A twofold response to these potential effects was necessary in the committee's view.

One was a detailed study of the side effects themselves. While no hard evidence of serious dangers from our use of herbicides in Vietnam has yet been uncovered, no really comprehensive study of their use has yet been made. Dr. Tschirley's investigation, for example, was of only 1 month's duration and his access to many areas was restricted by battlefield conditions. His study, moreover, was made 2 years ago, immediately after the scope of our herbicide program expanded to a significant level. Far better evidence of the long-term effects of the program would be available at the present time.

The committee was of the opinion that any study, to be authoritative, would require adequate funding and time and would have to be conducted by an unimpeachable group. Dr. Philip Handler, President of the National Academy of Sciences, graciously consented to have the Academy undertake the investigation. He has given me his personal assurances that the investigating group will me representative of a wide spectrum of political views regarding herbicides. Funds for the study, to whatever extent necessary, are to be provided from the fiscal 1971 CBW budget of the Department of Defense. Its results are to be furnished first to the Secretary of Defense and then to the Congress by March 1, 1972. In light of the planning which a comprehensive study will entail, and in light of the dangerous conditions under which it will be conducted, the 18-month time provided is essential if its integrity is to be assured.

The main focus of the study, in the committee's view, should be on the effects of our herbicide program in Vietnam itself. But laboratory studies, to the extent needed to evaluate field data and to resolve any issues affecting our basic policy are also strongly encouraged.

In addition to further study of our herbicides program, the committee felt it was important to restrict the use of herbicides to situations in which they were clearly dictated by military needs. The committee has been assured by the Department of Defense that the herbicide operations programed for fiscal 1971 are at a level only 25 percent as large as the level at which such operations have been conducted in this past 2 years. All but the most essential operations will be eliminated. In light of these assurances, as well as the Department's commendable action in suspending use of the agent orange, the committee decided that legislation specifically limiting these operations was not required for now. Such legislation might well detract from the flexibility required for optional decisionmaking.

Mr. President, I would like to comment in conclusion on an article by Dr. Pfeiffer and Dr. Orians which was inserted in the RECORD on July 16 by the distinguished Senator from Wisconsin (Mr. NELSON).

This article was based on a visit to Vietnam by these two gentlemen and questioned the value of the defoliation program in light of the ecological consequences. It should be noted that in a press interview in New York upon his return, which was later reported in the April 4, 1969 edition of the New York Times, Professor Pfeiffer expanded somewhat on his report. He observed that it was completely unrealistic to expect military commanders to abstain from defoliation actions. "There is no question about it," he said, "they save American lives." On a 65-mile journey by armed boat from Saigon to the sea, he said, "We scarcely saw a living plant." However, he added, that had the vegetation not been destroyed, he and his companion would probably not have returned alive.

Mr. President, the same may be true of many American boys now serving in Vietnam if the present amendment is passed. Accordingly, I must vote against it and urge my colleagues to do the same.

EXHIBIT 1

DEFOLIATION IN VIETNAM—THE ECOLOGICAL CONSEQUENCES OF THE DEFOLIATION PROGRAM IN VIETNAM ARE ASSESSED

(By Fred H. Tschirley)

(NOTE.—The author is assistant chief of the Crops Protection Research Branch, Crops Research Division, Agricultural Research Service, U.S. Department of Agriculture, Beltsville, Maryland. The assessment and report on which this article is based were prepared by the author when he served as an adviser to the U.S. Department of State. That report was released in September 1968 by the U.S. Embassy in Saigon.)

An assessment of ecologic consequences of the defoliation program in Vietnam was undertaken at the request of the U.S. Department of State. This article is based on a report made as a part of an overall review of the defoliation and crop destruction programs in Vietnam.

The timetable for completion of the policy review required submittal of a report 1 month after my arrival in Vietnam on 15 March 1968. The period from mid-March to mid-April was the end of the dry season when many tree species are naturally defoliated. This added to the difficulty of determining the effects of herbicides on vegetation.

The dry season, the short time available, and the difficulty of making on-the-ground observations were restrictive for an ecologic evaluation. Thus, this report is not a detailed analysis, but an assessment based on the observations that were possible and on discussions with foresters and others knowledgeable about the local situation. The observations were supported by scientific reports and personal research experience in ecology and the effect of herbicides on vegetation in temperate and tropical America.

There were no constraints placed on what

I was permitted to see in Vietnam nor on what I reported. Some areas and vegetative types could not be visited because there was not adequate time, or because safety could not be assured in areas of military activity. In other areas, inspections were limited to aerial observations because the sites were not sufficiently secure to permit ground assessments. Civilian and military elements of the U.S. mission in Vietnam gave me all the help and cooperation that was possible. The military provided aircraft for aerial surveys of defoliated and nondefoliated forests, arranged transport to Special Forces camps and a security force for observations from the ground, arranged briefings on all aspects of the defoliation program, and made available whatever records I wished to see on where and when forests were sprayed with defoliants. Civilian elements of the U.S. mission provided background information based on their experiences in Vietnam, aircraft for additional aerial surveys, introductions to Vietnamese foresters, and background material needed for writing my report. Probably the best indication of the lack of constraints on my activities was that the report which I prepared was released, without a word having been changed, by the U.S. mission in Saigon.

This article is essentially the same as the report I prepared in Vietnam. Some material has been deleted because of space limitations, but my observations and conclusions do not differ from the original report.

DEFOLIATED AREAS SURVEYED

Time did not permit a survey of all the defoliated areas in Vietnam. Therefore, my observations were limited to those areas where large blocks of forest had been sprayed with herbicides. The ecologic consequences of the defoliation program would be expected to be most evident and most readily definable in such areas.

The most intensive defoliation treatments in the mangrove vegetational complex have been applied in the Rung Sat Special Zone, an area that surrounds the shipping channel into Saigon. Defoliation of the mangrove was started in 1966, but most of the defoliation flights were made after June 1967. A block of about 460 square kilometers had been treated by the end of January 1968. The Rung Sat Special Zone was surveyed from a helicopter ranging in height from treetop level to about 1000 feet. Mangrove on the Ca Mau peninsula was surveyed from a C–123 flying at about 2000 feet. This flight also permitted a survey of a 1962 herbicidal treatment of mangrove on both sides of the Ong Doc River.

The most intensive defoliation treatments on upland semideciduous forest have been applied in war zones C and D and in the Demilitarized Zone. My efforts were limited to war zones C and D. War zone C is northwest of Saigon between the Song Be River and the Cambodian border; war zone D is northeast of Saigon between the Son Be and Song Dong Nai rivers. Blocks of about 920 and 1920 square kilometers have been sprayed in war zones C and D, respectively. Some areas within those blocks have received two to four treatments.

Defoliation in the semideciduous forest was observed from two relatively high-level flights in fixed-wing aircraft, six high- and low-level flights in helicopters, and observations from the ground in forests surrounding the four Special Forces camps of Thien Ngon, Katum, Tong Le Chon, and Bo Dop. Several hours were spent in the forest at each location to assess defoliation, refoliation, successional patterns, and to get an idea of the possible effects of the defoliation on wildlife. In addition to my own observations, men at the camps were questioned regarding the effect of defoliation on their operation, their impressions about the relative difficulty of human movement in the forest (a rough measure of the density and composition of the understory vegetation), and sightings they had made of wildlife.

EFFECT OF DEFOLIATION ON CLIMATE

Not uncommonly one hears that large-scale modification of vegetation (forest to savanna or grassland, for example) or the vegetable denudation of an area will cause a change of climate, particularly in the amount of rainfall. The theory behind this statement is that as forest is converted to grassland or the soil is bared of vegetation, the evapotranspirational surface is reduced, and thus there is less moisture released to the atmosphere for subsequent precipitation. The fallacy of the theory is readily apparent when one considers the vast scale of atmospheric air flow, with the moisture it contains, and the relatively insignificant reduction in moisture that might be caused by reduced evapotranspiration from a small area. Some simple calculations point out the fallacy of the theory more explicitly.

By applying the reasoning used for an arid area (1), let us apply some simple calculations to a forested area that is 100 kilometers on a side. If we assume, conservatively I think, that the total moisture in a vertical column of the atmosphere above the area has a depth of 3 centimeters and the air mass is moving over the area at a rate of 5 kilometers per hour, we can calculate that moisture is passing over the area at a rate of 4.17×10^9 grams per second. Now let us further assume that our hypothetical forest has been entirely denuded of vegetation and we reasoned that it may have been contributing 10 percent to the total atmospheric moisture. In other words, we expect a 10-percent decrease of rainfall after the vegetation is removed.

Ten percent of the total atmospheric moisture would be 4.17×10^8 grams per second. In other words, our hypothetical forest would have to be contributing moisture to the atmosphere at a rate of 1.1×10^8 gallons per second. Such a figure is unreasonable. If we carry this calculation further and consider one tree with its branches in the upper or middle canopy for each 10 square meters, then evapotranspiration from each such area would have to be 417 milliliters per second. That is far beyond the measurements that have been made for salt cedar (*Tamarix pentandra*), one of the heaviest users of water (2).

The work of Ohman and Pratt (3) also lends itself to this discussion. They measured dew point over and downwind from a desert irrigation project covering some 100,000 acres near Yuma, Arizona [annual precipitation about 3 inches]. Despite application of annual totals of from 5 to 10 feet of irrigation water on this area extending some 20 miles parallel to prevailing winds for the summer months studied, all influence of the irrigated fields upon crop-level dew points became immeasurably small only 100 feet to the lee of the downwind edge of the entire area. And at 12 feet (3.6 meters) above the crop level, dew points were not measurably increased even at points inside the irrigated acreage. These measurements were made under midday conditions in July and August when monthly totals of irrigation varied between about 0.7 and 1.5 feet of applied water. These measurements show the small effect that artificial measures have on atmospheric moisture content.

My conclusion is that defoliation in Vietnam has no significant measurable effect on atmospheric moisture and thus would have no effect on precipitation.

Another point that refutes the evapotranspiration-precipitation theory is that water molecules are not motionless in the atmosphere. Sutcliffe (4) estimated that the average time between a water molecule's evaporation into and its precipitation from the atmosphere was about 10 days. Thus, from consideration of the mean wind speed, the average water molecule must drift several hundred miles before it is precipitated.

Extensive defoliation would be expected to change temperature patterns through a forest profile simply because there would be less shielding of direct solar radiation. In addition, the average wind speed would be greater in a defoliated than in an undefoliated forest. These two factors probably would not have a great effect on higher plants and animals, but might temporarily affect lower life forms that are more dependent on specific microclimatic niches for growth and survival.

EFFECT OF DEFOLIATION ON SOILS

One of the principals fears about exposing soil in the tropics is the possibility of increased laterization. The term laterite generally refers to an indurated concretionary deposit, high in iron or aluminum oxide content, which has formed in place by the weathering of rocks. True laterite hardens irreversibly. Laterite has been found to be best developed when the following conditions exist (5). (i) the climate must have high rainfall and uniformly high temperatures. (ii) The topography must have been fairly gentle, peneplain in nature. (iii) A well-drained soil must have been present. This is usually an alluvial soil, but soils high in iron content may be an exception. (iv) There must have been a uniformly fluctuating water table which had a definite low level during the dry season. (v) Stable geological conditions must have existed for a long time.

About 30 percent of the soils of Vietnam have a potential for laterization (5). Many of the red soils of Vietnam (often confused with laterite) dry out and become hard but soften again when wet. The soft doughy laterite, which hardens to a rocklike material when exposed to alternate wetting and drying, is not found in significant amounts in Vietnam.

Two kinds of lateriate are found in Vietnam Wormhole laterite is generally consolidated and occurs as massive beds, commonly at the bottom of a 1- to 30-foot layer of well-drained soil. It is red to brown in color, and has a sloggy appearance due to numerous holes, often interconnecting, and thus facilitate the passage of groundwater. Wormhole laterite occurs throughout most of the Mekong Terrace region, in soils of both forested and cultivated areas.

Pellet laterite is unconsolidated and occurs as small pellet-like concretions in an iron- or aluminium-rich soil. The hard concretions are usually surrounded by fine-grained material that is generally clayey when moist. The coarser particles in this fine-grained material are commonly iron-stained quartz sand. Pellet laterite occurs on the iron-rich basalt plateau soils of the Mekong Terrace, the basalt plateau of Ban Me Thuot, the extreme western edge of the high plateau west of Pleiku, and in a small area around Quang Ngai. Pellet laterite has been observed forming on the metamorphic rocks near Bong Son and on some of the rocks near Qui Nhon. It is likely that wormhole and pellet laterite could occur in the northeastern coastlands, but this has not been substantiated by field studies.

Laterization under natural conditions is a long-term process. The process is accelerated when soil is exposed to direct solar radiation and wind. I do not find it reasonable to conclude that the defoliation program in Vietnam would hasten the laterization process significantly because bare soil does not result from defoliation. It is possible, however, that laterization will be accelerated around base and Special Forces camps where the soil is maintained free of vegetation.

The amount of erosion that occurs as a consequence of defoliation depends on soil

type, topography, relative degree of vegetative cover, and amount and intensity of rainfall. In general, erosion is greatest on steep slopes of bare soil, decreasing as slope decreases and as vegetation becomes more dense. It was not possible to examine defoliated forest in mountainous terrain for evidence of accelerated erosion. I did not detect such evidence during flights over the defoliated areas. Gully and sheet erosion were noted around camps where there was little or no vegetation, regardless of whether or not those areas were sprayed.

The possibilities of flooding or of changes in the water table as a result of defoliation are subjects that need careful consideration. The replacement of woody vegetation with grass in the southwestern United States has resulted in perennial flow of streams that were only intermittent before and also in the flow of springs that had been dry for many years. There are cases where harvesting trees increased stream flow (6) and where clear-cutting resulted in a marshy condition unsuitable for desirable timber species (7). I mention these points because they have occurred elsewhere and could conceivably occur in Vietnam. But I do not know the local situation well enough to make a reasonable assessment of that probability.

Microorganisms are an essential feature of the soil system. A herbicide that killed the microorganisms would have a severe effect on soil ecology. What are the possibilities of destroying the microbial population in the soil with the chemicals being used for defoliation in Vietnam?

The code names for the defoliants used in Vietnam are Orange and White. The constituents of Orange are the normal butyl esters of (2,4-dichlorophenoxy)-acetic acid and (2,4,5-trichlorophenoxy)acetic acid, better known as 2,4–D and 2,4,5–T, respectively, in a 1: 1 ration. The constituents of White are triisopropanolamine salts of 2,4-D and picloram (4-amino-3,5,6-trichloropicolinic acid in a 4 :1 ration. There seems to be no danger that any of the three chemicals will kill microorganisms. Actually, numbers of soil microorganisms capable of inactivating 2,4-D apparently increase when 2,4-D is present in the soil. Thus, repeated applications of 2,4-D were less persistent in soil than the initial application (8). There are no reports, suggesting that the effect of 2,4,5-T on microorganisms is significantly different from that of 2,4-D. Picloram does not destroy soil microorganisms, but neither is the microbial population enriched as a result of picloram application. Thus, picloram cannot be considered a good energy source for microorganisms. The decomposition of picloram is an incidental process in the breakdown of soil organic matter, requiring the loss of approximately 10,000 to 100,000 pounds of organic matter per pound of herbicide (9).

EFFECT OF DEFOLIATION ON PLANT AND ANIMAL POPULATIONS

The chemicals 2,4-D and 2,4,5-T are highly selective herbicides, but picloram is somewhat less selective. Not all plant species react similarly to them. The differential susceptibility may be a function of such factors as time of treatment, nature of the leaf surface, variable capacity for absorption and translocation of the herbicide, biochemistry of the plant, or the nature of the herbicide itself. Some established annual and perennial grasses are tolerant to rates of application used in the Republic of Vietnam (RVN). Thus, in any vegetative type, one would expect that some species would not be killed; some would be killed easily; others with difficulty. Most species in the mangrove association are highly susceptible to the herbicides being used for defoliation in Vietnam, and thus represent an exception to the general rule. For that reason, and because the mangrove association presents a different set of ecological considerations than the semideciduous forest does, each will be discussed separately.

MANGROVE FOREST

Botanical considerations. The mangrove association is relatively simple floristically. The principal species include: *Avicennia marina, A. intermedia, Rhizophora conjugata, Bruguriera parviflora, B. gymnorhiza, Ceriops candolleana Nipa fruiticans, Phoenix* spp., *Lumnitzera coccinea, Sonneratia acida, Melaleuca leucadendron, Excoccaria agallocha, Carapa obovata, and Acronychia laurifolio.*

Other plant species are represented in the mangrove type, but they are of lesser importance. Bamboo was not observed in the mangrove association.

Susceptibility to herbicides. The mangrove species seem to be almost uniformly susceptible to Orange and White, the herbicides used for their control in Vietnam. An exception is *Nipa fruticans,* which is reported to be resistant to White. Strips of mangrove on both sides of the Ong Doc River, sprayed with Orange in 1962, were of particular interest. The treated strips were still plainly visible. Thus, one must assume that the trees were not simply defoliated, but were killed.

Successful aspects. The mangrove type in the Republic of Vietnam occurs on about 2800 square kilometers (10). *Avicennia marina* is the pioneer species of the mangrove type, colonizing on the clay accretion areas at the sea face. At the 5th and 6th year *Rhizophora conjugata, Bruguiera parviflora,* and *Ceriops candolleana* will develop where there has been partial stabilization of the soil. At about the 20th year *Rhizophora* and *Bruguiera* will dominate the site. From that point on, further succession depends on the degree of silting and the consequent decrease of water circulation. As organic matter accumulates, conditions are created for the advent of other species into the mangrove complex. The final stage in the mangrove type is the cajeput (*Melaleuca leucadendron*) found on the highest, most stable soil above high tide.

Seed production of mangrove species is annual and abundant to prolific, with seeds viviparous or otherwise, of high germinability and capable of remaining viable for long periods (11). Germination and rooting are usually rapid and successful. In some locations, when the seeds are able to settle as a result of favorable water conditions, natural regeneration may become successfully established in less than a year. The movement of the water, however, may not only bring in seeds but may also carry them away before they can take root.

The most serious animal pest is the crab, which may entirely prevent regeneration by attacks on seedlings (12). In Malaya two species of *Acrostichum* (a fern) may hinder the establishment of waterborne seedlings. The fern grows and spreads rapidly when the tree cover is removed. McKinley (10) mentions two ferns (Choai, a creeping form; Don, an erect form) as occurring in the climax mangrove, but does not comment on their possible interference with regeneration.

Ecological considerations. According to the timetable discussed by McKinley, about 20 years are required for the establishment of a dominant *Rhizophora-Bruguiera* association. That timetable was established for a situation in which newly silted areas were colonized by *Avicennia* and then were replaced by *Rhizophora-Bruguiera.* It is not unreasonable to suspect that the same timetable might apply to areas in which the trees had been killed by herbicides. Dead trees do not hold soil as well as living trees do. The amount of soil removed would depend on the rapidity of tidal recession, which is unknown to me. The greater the amount of soil removed, the greater would be the time required for regeneration of a mangrove stand similar to the original.

The regeneration of mangrove since the 1962 treatments along the Ong Doc River was observed from an aircraft flying at 2000 feet (600 meters). Regeneration was apparent as fingers extending into the treated strip, but I could not determine whether regeneration had occurred across the entire breadth of the treated strip.

In the mangrove areas treated in 1962, trees of the colonizing species were not yet discernible from 600 meters on all the treated area. Thus, if the information provided by McKinley is extrapolated, 20 years may be a reasonable estimate of the time needed for this forest to return to its original condition.

There is little information available on the effect of killing mangrove on animal populations. In that regard, I considered the food chain among aquatic organisms. Although it was not possible to obtain information on the many links in the food chain, phytophagous and carnivorous fish would be near the top of the food chain. Disruption of lower links in the chain might be expected to reduce fish populations.

Information on fish populations is based on fish catch statistics provided by the Fisheries Branch of U.S. Agency for International Development (AID) (Table 1).

TABLE 1.—THE TOTAL CATCH, IN METRIC TONS, FOR THE PAST 3 YEARS IN THE REPUBLIC OF VIETNAM

Year	Fish		Others[1]
	Freshwater	Marine	
1965	57,000	289,000	29,000
1966	64,710	287,450	28,340
1967	54,300	324,700	31,700

[1] Including cuttlefish, mollusks, shrimp, crabs, and the like.

Fish catch appears to have been increasing. The drop for freshwater fish in 1967 was at first a cause for concern. But the assistant chief of inland fisheries explained that the reduction was due to an absence of flooding in the Mekong Delta in 1967. When flooding does occur, fish are trapped in rice paddies and fishermen have no trouble catching them.

The statistics on the fish catch give a strong indication that the aquatic food chain has not been seriously disturbed. Data comparable to those available for fish were not available for birds and other animals.

The application of herbicide in strips or in a checkerboard pattern rather than large-area treatment would have an ecologic advantage. The trees remaining in untreated strips would provide a seed source for reforestation as well as a habitat for animals and lower plant forms. The ecological effects in large treated areas would be greater and recovery would probably be slower.

SEMIDECIDUOUS FOREST

The Republic of Vietnam has a total area of 172,540 square kilometers, of which about 30 percent is forested (10) (Table 2).

TABLE 2.—THE TYPES OF FOREST, THEIR AREA OF COVERAGE, AND THE APPROXIMATE AREA TREATED FOR DEFOLIATION IN THE REPUBLIC OF VIETNAM

Vegetation type	Coverage (km^2)	Area treated (km^2)
Open forest (semideciduous forest)	50,150	8,140
Flood area:		
Mangrove	2,700	960
Other aquatic plants	2,000	0
Coniferous forest:		
Three-leaved pine	900	0
Two-leaved pine	350	0

Some coniferous forest may have been treated in strips along roads, but I have no specific information on that point. I am sure that no large areas of coniferous forest have been treated.

Botanical considerations. I will not attempt to characterize all of the vegetation types of the Republic of Vietnam. There are different forest types, but except for the pine forest, the differences are ones of degree rather than substance. My discussion of the forests in III Corps can be extrapolated to other semideciduous forests of RVN. It cannot be extrapolated to the pine forests or to the small area of rain forest that probably exists in a small area of the northwestern part of RVN, along the Laotian border.

The forests of war zone C are, for the most part, secondary forests with an admixture of bamboo, and semideciduous forest of *Lagerstroemia* and legumes (General Forest Map of RVN, Phan Thuong Tuu, 1966.) The forests of war zone D are moist forest over most of the area, and semideciduous forest of *Lagerstroemia* and legumes over the remainder.

There are obvious differences among the three forest types. The differences are taxonomic for the most part. Physiognomically, they are similar. In terms of ecologic considerations, therefore, they will be discussed collectively.

The three forests are similarly characterized by having members of the family Dipterocarpaceae as dominant trees in the upper canopy. This does not mean necessarily that dipterocarps are numerically superior. Other well-represented families include the Leguminosae, Meliaceae, Lythraceae, Guttiferae, and Sterculiaceae (*10, 13, 14*). Botanical composition, taxonomically and numerically, varies from one location to another.

The difficulty of a botanic description of the forest may be appreciated with the knowledge that about 1500 woody species occur in RVN (*10*). Moreover, I saw the forests at a time when identification was most difficult. Many species are normally deciduous during the dry season; many that are normally evergreen had been defoliated by herbicides or by fire.

The period from mid-March to mid-April was not an ideal time to assess the ecologic impact of the defoliation program on the semideciduous forests of the Republic of Vietnam. The combination of natural defoliation, defoliation by herbicides, and defoliation by many, many fires (civilian and military caused) made the determination of the causes of defoliation difficult. A careful delineation of the causative factors within a 1-month period was not possible. An observer making an ecologic assessment during the middle or latter part of the rainy season would not have to contend with the confounding influences of natural defoliation and fire.

Susceptibility to herbicides. Trees in the semideciduous forests of Vietnam are almost uniformly susceptible in terms of initial defoliation. But when refoliation and the percentage of plants killed are considered the average susceptibility of the vegetative type is unknown. The best estimate I can obtain is an extrapolation of data developed in Thailand by Darrow *et al.* (*15*) and in Puerto Rico by Tschirley *et al.* (*16*).

Darrow's test in Thailand were conducted in a semievergreen monsoon forest having an annual precipitation of about 40 inches. Two hundred twenty plant species were identified from two test sites totaling 3400 acres. so species diversity was high. Darrow found that two or more gallons of Purple (same as Orange except that 20 percent of the 2,4,5–T is an isobutyl ester rather than *n*-butyl ester) caused defoliation greater than 60 to 65 percent for a period of 6 to 8 or 9 months. Percentages of kill were not given, but they would have been considerably lower than for defoliation.

My collaborators and I worked in a semievergreen forest in Puerto Rico (*16*) having an annual precipitation of about 85 inches. Species diversity was high; 106 woody species were recorded on 2.4 acres, in an area adjacent to the aerial test pilots. We also worked in a tropical rain forest in Puerto Rico having an annual precipitation of about 120 inches (*16*). About 88 woody species were recorded for the rain forest site. Defoliation of the semievergreen forest treated with 3 gallons of Purple was 61 percent 6 months after treatment. In the rain forest, an equivalent rate of Orange provided 66 percent defoliation 6 months after treatment and 55 percent 1 year after treatment.

Thus, the defoliation obtained in taxonomically distinct forests in opposite parts of the world was similar. It is justifiable, then, to expect that average defoliation in the semideciduous forests of Vietnam would be about the same. Actually, I would expect defoliation in Vietnam to be somewhat lower because applications are made from greater height than was the case for the experimental work in Thailand and Puerto Rico.

Multiple treatments were not made in Thailand or Puerto Rico, so the effects of two and three treatments in war zones C and D can only be inferred from extensive experience in woody plant control in temperate zones and from my experience in tropical America, instead of being extropolated from actual research data. But the inference is necessary because the ecologic impact becomes greater with each succeeding treatment.

A single treatment with 3 gallons of Orange or White would not be expected to have a great or lasting effect on a semideciduous forest in Vietnam. Some trees would be killed, and the canopy would be less dense temporarily. But within several years the canopy would again be closed, and even a careful observer would be hard pressed to circumscribe the treated area. A second application during the period of recovery would have a wholly different effect.

Research on a two-storied oakyaupon forest in Texas showed that the top canopy intercepted about 72 percent of the spray droplets and the understory intercepted an additional 22 percent. Only 6 percent of the droplets reached the ground (16). Thus, one would expect that the principal effect from an initial treatment would be on trees of the top canopy. As the density of the top canopy is reduced, subsequent treatments will kill more trees in the top canopy and have a far greater effect on the understory, regenerating vegetation.

The theoretical response to multiple herbicide applications was supported by my observations on the ground. The area visited at Thien Ngon was sprayed with Orange on 19 December 1966; the area at Katum was treated with White on 9 November 1966 and with Orange on 28 October 1967. Two areas were visited at Ton Le Chon; one was treated with Orange on 23 September 1967, and the other was treated with White on 7 November 1966. There were more dead trees and a higher percentage of defoliation at Katum than at any other site. Granting the inadequacy of the sample at each location, the difference between Katum and the other sites was obvious. Despite more defoliation and more dead trees at Katum, the ground was not bare. Many established grasses are tolerant to the herbicides used. In addition, grasses, sedges, and vines quickly occupy areas that have been defoliated. Grasses were abundant in all defoliated areas observed on the ground.

Successful aspects. I can think of no better introduction to this section than a quotation from Richards (17).

"The process of natural regeneration in tropical forests is no doubt exceedingly complex, and though its practical importance to the forester is obvious, surprisingly little is known about it. Much of what has been written about the so-called 'natural regeneration' of rain forest refers to the reproduction of a few economic species under conditions rendered more or less unnatural by the exploitation of timber. Before regeneration under these artificial conditions can be understood or controlled scientifically, we need to know what happens under undisturbed conditions, and information about this is extremely scanty."

I must emphasize the last sentence of the quotation. Data on regeneration of tropical forests is indeed scanty—and particularly scanty for Vietnam!

There is general agreement that the usual successional series in a terrestrial tropical forest is grass—shrub—secondary forest—primary forest (14, 17, 18). The same successional series could be applied equally well to deciduous forests in temperate zones.

Because of the inadequacy of data about forest regeneration in Vietnam, perhaps an example in a different situation would be instructive. The island of Krakatau presents a good example of ecologic succession. Richards described the island as follows (17).

"Krakatau is one of a group of small volcanic islands situated between Java and Sumatra. Early in 1883 it was about 9 km long and 5 km broad, rising to a peak 2,728 ft (822 m) above sea level. At this date the whole island was covered with luxuriant vegetation. About the nature and composition of this vegetation next to nothing is known, but there is every reason for supposing that it was mostly tropical rain forest similar to that now existing in the neighboring parts of Sumatra. In May 1883, the volcano which had long been regarded as extinct began to be active and the activity gradually increased until it reached a climax on August 26 and 27. On these two days occurred the famous eruption, the sound of which was heard as far away as Ceylon and Australia. More than half the island sank beneath the sea, the peak being split in two, though its highest point still remained. The surviving parts of Krakatau were covered with pumice stone and ash to an average depth of about 30 m and a new marginal belt 4.6 km in area was added to the southern coast. During the period of volcanic activity the bulk of the vegetation was certainly destroyed.

For a while the island remained without any vegetation. The only living thing a visitor saw in May 1884 was one spider. In 1886 there was already a considerable amount of vegetation on the island and the succeeding serial stages have developed quite rapidly.

In 1964 Richards wrote about the ecology of Krakatau.

"The development of vegetation on Krakatau has not yet reached a stable climax stage, but the general course of future changes can be predicted with some confidence, at least for the middle and upper regions of the island. In the former it may be expected that the *Macaranga-Ficus* woodland will develop by a series of changes into a stable climax rain forest to some extent similar to the mixed primary rain forest of the neighboring parts of Sumatra and Java. How long this development will take is difficult to guess, but the study of secondary successions suggests that it will be much longer than from the great eruption to the present day."

The example of Krakatau cannot, and should not, be applied to the semi-deciduous forests of Vietnam for at least three reasons. (i) Defoliation does not destroy all vegetation; (ii) it does not cover the soil with pumice stone and ash; and (iii) RVN is not an island. Krakatau is merely an example of the relative time needed for the development of a mature forest when it must start from nothing. That is not the case in Vietnam.

There are a few records available for tree ages in tropical forests that give an indication of the time required for regeneration of a mature forest. An average individual of *Parashorea malaanonan* in the Philippine dipterocarp forest reaches a diameter of 80 centimeters in 197 years (19). The average maximum age of *Shorea leprosula* in Malaya

is 250 years (20). Both are primary forest species. The fast-growing trees characteristic of secondary forest have a shorter life than do primary forest species.

The principal ecologic danger imposed by repeated treatments with herbicides is that saplings and poles present in the lower story, and then seedlings, may be killed. If that happens in large areas, natural reseeding may be a problem. Dipterocarp seeds are disseminated by the wind and thus would be expected to be among the first tree species to repopulate an area. Seeds of other species, dependent on dissemination by small mammals and rodents and by birds, would probably not spread as rapidly. Seeds of some species would undoubtedly remain viable in the soil and would germinate after the last in a series of multiple treatments. Many species in the family Leguminosae have that capability. Less is known about seed characteristics in other families. Turrill (21) reported it has been proved at Rothamstead that seeds of arable weeds remained viable in soil under pasture after 300 years in one area and 30 to 40 years in others.

"Little is known of the time scale of secondary successions in the tropics. Chevalier (1948) states that the forest on the site of the ancient town of Angkor Vat in Cambodia, destroyed probably some five or six centuries ago, now resembles the virgin tropical forest of the district, but still shows certain differences. In general, it seems clear that the longer the period between the destruction of the primary forest and the onset of the secondary succession and the greater the modification of the soil and the environment in general during this period, the longer the time needed for the re-establishment of the climax"(*17*).

The paragraph quoted does not apply to the forests being defoliated in Vietnam because the Vietnamese forests were not primary, but secondary, at the time of treatment. The time required for the establishment of a secondary forest is much less than for a primary forest.

The greatest danger resulting from repeated defoliation treatments in Vietnam is that such areas will be invaded by bamboo. The presence of bamboo is the most constant feature of the semi-deciduous forests I saw in Vietnam. Species of large bamboo (the most common being *Dendrocalamus strictus* and *Bambusa arundinacea* according to a local RVN forester) are particularly apparent in areas where the "rai" (slash and burn) system of agriculture has been practiced. But bamboo is not limited to areas that were previously cleared of trees. A small-stemmed bamboo is present as an understory in many forested areas and can be seen frequently where trees have been defoliated. In addition, the small bamboo *Schizostachyum sollingeri*, 10 to 15 feet high, was present in the forest at all of the camps I visited. The presence of bamboo in Asian forests is well documented (17, 22). Aerial observations in RVN suggest that it first invades new areas along routes of more favorable moisture supply. From there it can spread throughout the forest.

While making ground observations at the four Special Forces camps. I attempted to evaluate the relative density of seedling and sapling tree species in bamboo-infested sites. Although I have no quantitative data, seedlings were rare in dense bamboo, but frequent to numerous where there was no bamboo. Probably of more importance is the fact that saplings were rare in dense bamboo.

The length of time that bamboo might retard the natural successional progression is unknown, but I am certain it would cause a retardation. The following statement by Ahmed (23) may be cause for concern: "A bamboo will be the first member to colonize on a new site in a seed year and will be the last to leave it. Once established on a soil it is difficult to eradicate it."

The life history of different bamboo species varies, but usually culms die after flowering. The germination to flowering cycle may be from 30 to 50 years (17, 24). Flowering is gregarious (whole populations flowering in 1 year) in some species and sporadic in others. Most bamboo species have very efficient vegetative reproduction from buds on creeping rhizomes.

Seedling mortality of tree species is naturally high in tropical forests. A study of *Enterpe globosa*, a palm found in the American tropics showed that the mortality of seedlings was 95 percent of established seedlings 12 percent, and of shrubs 64 percent. Thus, only 1.6 percent of the seedlings survived to become trees (25). Another study (25) showed the average half-life of all seedlings in test plots to be 6 months.

If it were not for the probable invasion by bamboo of severely defoliated areas in the forests of Vietnam, I am reasonably certain that the successional progression to a secondary forest would proceed without undue retardation. A reason for feeling so is based on data I obtained from plots in Puerto Rico that were treated at the rate of 3, 9, and 27 pounds per acre as follows: picloram, 5-bromo-3-*sec*-butyl-6-methylural [bromacil], 3.6-dichloro-*o*-anisic acid [dicamba] 3-(3,4-dichlorophenyl)-1, 1-dimethylurea [diuron], (2,3,6-trichlorophenyl) acetic acid [fenac] and 2,4-bis(isopropylamino)-6-(methylthio)-*s*-triazine [prometone] applied to the soil. Two years after treatment the plots were examined for the presence of seedlings. Many of the secondary forest species and several primary forest species were present as seedlings. In addition, there was no apparent differential effect of the six herbicides.

The presence of seedlings on plots treated with such high rates of herbicides is an important point. Several of the herbicides, particularly fenac and picloram, persist in soil. There is no doubt that highly susceptible plant species would be affected by herbicide residues in the soil. But experience has shown that species commonly present in forests are not so susceptible that regeneration would be prevented. The small experimental plots in Pureto Rico were treated with 27 pounds per acre of picloram; one treatment with White in Vietnam would apply only 1.5 pounds of picloram per acre.

In conclusion, the time scale for succession in a semideciduous forest in RVN is unknown. Single treatments with defoliants should not cause severe successional problems, but multiple treatments probably will because of site dominance by bamboo.

Ecologic considerations. The ecologic considerations as they apply to plant populations were discussed in the previous section of this article. The effect of defoliation on animal populations is truly unknown.

Men stationed at Special Forces camps have told me of seeing deer (two reports), birds (many reports), tiger (one sighting, several sound identifications), elephant (two reports), monkey (numerous reports), and cold-blooded vertebrates (numerous reports). I saw a tiger track in the road at Katum. There were no reports of bovines. It is possible that such bovines as the kouprey, gaur, and banteng, reported to be rare (26), are no longer present in the defoliated areas in war zones C and D. But I suspect that bombing, artillery fire, human presence, and hunting have had a far greater effect than has defoliation.

TOXICITY OF HERBICIDES

A discussion of ecologic effects would hardly be complete without mentioning the relative toxicity of the herbicides being used for defoliation and crop destruction. The herbicides used in Vietnam are only moderately toxic to warm-blooded animals. None deserves a lengthy discussion except for Agent Blue (cacodyic acid), which contains arsenic. Inorganic arsenicals such as arsenic trioxide, sodium arsenite, lead arsenate, calcium arsenate, and Paris green are extremely toxic. Organic arsenicals, such as Blue, have a low mammalian toxicity. Two series of organic arsenicals are used as herbicides. The arsonic acid series is formed by a single organic group combined directly to arsenic; the arsinic acid series has two organic groups. By varying the organic group in either series, a wide range of phytotoxicities can be obtained in products with a relatively low level of mammalian toxicity (26) (Table 3).

TABLE 3.—THE LD_{50} (DOSE IN MILLIGRAMS PER KILOGRAM OF BODY WEIGHT NEEDED TO KILL 50 PERCENT OF TEST ANIMALS) FOR THE HERBICIDES USED IN RVN AND FOR SEVERAL OTHER CHEMICAL COMPOUNDS ARE AS FOLLOWS (29)

Chemical	LD_{50}
Sodium arsenite	10-50
Paraquat [1]	150
2,4,5-T	100-300
2,4-D	300-1,000
Cacodylic acid [2]	830
Aspirin	1,775
Picloram	8,200

[1] 1,1'-Dimethyl-4,4'-bipyridinium salt.
[2] Active ingredient of Agent Blue.

Toxicity studies for White have shown the oral dose needed to kill 50 percent of test animals to be (LD_{50}) 3080 milligrams per kilogram for rats, 2000 for sheep, and more than 3163 for cattle (27). The oral dose for Blue is 2600 milligrams per kilogram for rats (28). There is no evidence to suggest that the herbicides used in Vietnam will cause toxicity problems for man or animals.

SUMMARY AND CONCLUSIONS

If my assignment had been simply to determine if the defoliation program had an ecologic effect, the answer would have been a simple "yes," and a trip to the country would not have been necessary. But to assess the magnitude of the ecologic effect is an entirely different matter.

One must realize that biologic populations, even those remote from man, are dynamic. Seasonal changes, violent weather events, fire, birth, maturation, senescence, and death cause a continuing ecologic flux. Normally, the ecologic flux operates within narrow limits in a climax community. It is only catastrophic events that cause an extreme ecologic shift and reduce the community to a lower seral stage.

The defoliation program has caused ecologic changes. I do not feel the changes are irreversible, but complete recovery may take a long time. The mangrove type is killed with a single treatment. Regeneration of the mangrove forest to its original condition is estimated to require about 20 years.

A single treatment on semideciduous forest would cause an inconsequential ecologic change. Repeated treatments will result in invasion of many sites by bamboo. Presence of dense bamboo will then retard regeneration of the forest. The time scale for regeneration of semideciduous forest is unknown. Available information is so scanty that a prediction would have no validity and certainly no real meaning. Most of the defoliation treatments in the semideciduous forests have been made in strips along lines of communication. The ecologic effect of defoliation in those areas would not be as severe as in areas where large blocks have been treated.

The effect of defoliation on amimals is not known, but it does not appear to have been extreme. I hasten to add that I know far less about animals than about plants. Fish catch

has increased during a period of intensive treatment for defoliation, which surprised and pleased me. Actual data were not available for population trends of other forms of animal life. Large mammals have been seen recently in war zones C and D, the areas of greatest defoliation activity. Included were tiger, monkey, elephant, and deer.

RECOMMENDATIONS

(1) The desirability of ecologic research in Vietnam after the war ends cannot be overemphasized. The research should be administered through an institution that will provide continuity and breadth for the research program. The opportunity of establishing ecologic research under the International Biological Program should be explored.

(2) Continuing assessement of the defoliation program as it affects forestry and watershed values should be made. Ground observations are most desirable, but aerial surveys during various seasons of the year will contribute much good information.

(3) From an ecologic point of view, the concept of defoliating in strips or in a checkerboard pattern has great merit. Undefoliated areas would serve as a seed source for regeneration and as habitat for wildlife.

SENATE RESOLUTION 456—SUBMISSION OF A RESOLUTION TO PROVIDE FOR AN INVESTIGATION RELATING TO THE INTRODUCTION OF CERTAIN PRIVATE RELIEF BILLS.

Mr. WILLIAMS of Delaware. Mr. President, today I call attention to an atrocious situation wherein certain unscrupulous lawyers have taken advantage of a group of Portuguese aliens in the Connecticut area who were seeking U.S. citizenship.

Recently the Hartford Courant, Hartford, Conn., carried a series of articles outlining the various instances where these aliens were being charged from $2,500 to $4,000 merely for getting a private bill introduced in Congress.

It should be pointed out that under the present procedure the introduction of a private bill relating to an alien seeking citizenship automatically stops deportation proceedings of that alien until the adjournment of that Congress. After adjournment if the bill has not been passed and if no other steps have been taken to insure his permanent status the alien is subject to deportation.

In Connecticut we find instances where they were advised by their attorneys that the best method for getting citizenship was to marry an American. Accordingly, on the advice of attorneys some of these aliens paid as much as $1,000 to the women who would marry them so that they could stay in the country. Then after the arranged marriage the woman would file petition papers through immigration officials to make her "husband" a permanent resident.

It appears that the average attorney fees to get a private bill introduced in the Congress are $2,500, and some attorneys are operating what in effect is a "bucket-shop" operation.

As evidence of this point I quote excerpts from a series of letters written by one Hartford attorney. The complete letters along with the name of the attorney have been made available to the Department of Justice.

I quote from a letter dated January 27, 1969:

This is to confirm the fact that I am holding the sum of Two Thousand Five Hundred ($2,500.00) Dollars in my Clients Fund Account.

This amount of money will become my fee as soon as any private legislation on your behalf is filed with the Congress of the United States. When and if said private legislation is filed on your behalf, you will be able to start work in the United States, and you will be able to stay in the United States until January 1, 1971. At this time if your status is not adjusted, another Private Bill will have to be filed on your behalf.

If this happens, additional fees will be charged. Furthermore, if any adjustment of your status is to be made with the necessary applications involved, then additional fees will be also charged. Of course, any and all costs and disbursements are in addition to any fees.

I quote from another letter dated April 16, 1969, signed by this same attorney.

I want to make it clear that the original fee of $4,000 which I obtained was only for securing Private Legislation on your behalf in Congress. It does not include securing labor certification and the adjustment of your status.

On October 23, 1969, the lawyer wrote another client as follows:

This is to acknowledge the fact that I have obtained the sum of Two Thousand Five Hundred ($2,500.00) Dollars from you as a retainer for the purpose of trying to adjust your immigration status.

First: If a Private Bill is obtained on your behalf in the Congress of the United States, then the Two Thousand Five Hundred Dollar retainer will become my fee as soon as the bill is filed. If this happens and then if any adjustment of your status is to be made with the necessary applications involved, then additional fees will be charged.

Second: If no Private Bill is filed on your behalf in Congress and we try to adjust your status via labor certification, then it is your responsibility to secure an employer to apply for labor certification on your behalf. The said employer and I will prepare the necessary applications and then apply for such labor certification on your behalf. If your status is adjusted to that of a permanent resident via such labor certification or through any other means of adjustment, then the entire retainer of Two Thousand Five Hundred ($2,500.00) Dollars will become my fee...

Third: All expenses that might be involved are in addition to fees charged. For example, if I make a long distance call or expenses are required by the Immigration Office, these are disbursements and are not included in my fee.

I quote from another letter dated February 5, 1969. The lawyer wrote this client as follows:

This is to confirm the fact that I am to hold the sum of Two Thousand Five Hundred ($2,500.00) Dollars in my Clients Fund Account.

This amount of money will become my fee as soon as any private legislation on your behalf is filed with the Congress of the United States. When and if said private legislation is filed on your behalf, you will be able to start work in the United States, and you will be able to stay in the United States until January 1, 1971. At this time if your status is not adjusted, another Private Bill will have to be filed on your behalf.

If this happens, additional fees will be charged.

I quote from another letter sent by this attorney under date of July 28, 1969:

With respect to your immigration matter, this is to confirm the fact that you have signed a Demand Note promising to pay me, ----------, the sum of Two Thousand Five Hundred ($2,500.00) Dollars.

You have agreed to make monthly payments to me in the amount of $100.00 commencing August 1969. Said money shall be held in my Clients Fund Account on your behalf until private legislation is filed on your behalf in Washington, D.C.

As soon as private legislation on your behalf is filed in the Congress of the United States, whatever amount that is in my Clients Fund Account will become part of my fee, and whatever the balance that is due me from the Demand Note which you signed will also become part of my fee.

If private legislation is filed on your behalf, you will be able t stay in the United States until January 1, 1971. At that time if your status is not adjusted and another private bill will have to be filed on your behalf, additional fees will be charged.

Furthermore, if any adjustment of your status is to be made with the necessary applications involved, and special problems in regard thereto arise, then additional fees will also be charged.

Mr. President, these letters clearly establish that excessive fees are being charged solely for the purpose of having a Member of Congress introduce a private bill. This is a racket, and it must be stopped. If left unchallenged this practice of shaking down these aliens who are seeking American citizenship with charges of from $2,500 to $4,000 merely for having a bill introduced in Congress is a reflection both on the American bar and the Congress.

Since these articles as appearing in the Hartford Courant were first called to my attention I have talked with Mr. Thomas D. Williams, the reporter, and while names of the aliens in many instances are omitted in order to protect them, he has authorized me to state that he is ready to make available to the Department of Justice documentary support for each allegation that has been cited in his news stories.

With the understanding that the aliens involved would be protected, he made photostatic copies of many of the documents available to my office. I in turn, with his consent, have already forwarded them to the Department of Justice along with the reporter's offer to cooperate with the Department by furnishing all information that he has which is essential for prosecution.

Charging $2,500 to $4,000 to have a private bill introduced in Congress or charging $1,000 to provide a temporary wife for an alien in order for him to become a citizen is a racket that must be stopped. Likewise, the Department of Justice should determine how these large fees were distributed.

I am advised that the same racket which we find operating in Connecticut relating to getting private bills introduced in Congress may exist even to a greater degree in the area of New York City.

In fact, just last September I placed in the CONGRESSIONAL RECORD, volume 115, part 20, pages 27503–27510, a series of allegations contained in articles written by Mr. Seth Kantor, a staff reporter of Scripps-Howard, relating to somewhat similar charges for the introduction of private bills involving Chinese ship jumpers.

In those articles there were direct accusations that the large fees charged by certain unscrupulous attorneys were being split with congressional offices.

The case of the victimization of the Portuguese aliens in the Connecticut area and the case involving the Chinese ship jumpers, while different, are somewhat similar in that in each instance they involved a group of unscrupulous lawyers who were shaking down aliens by charging exorbitant fees for the purpose of getting private bills introduced in Congress. In the September 1969 case, involving the Chinese ship jumpers, lawyers were allegedly splitting fees under the guise of campaign contributions with employees of congressional offices or with the Members of Congress themselves. Those allegations involving the payment of large fees for the introduction of private bills for Chinese ship jumpers were referred to the Senate Select Committee on Ethics. I understand that they in turn have forwarded their report to the Justice Department.

At this point I ask unanimous consent to have printed in the RECORD at the end of my remarks the recent series of articles appearing in the Hartford Courant by Thomas D. Williams relating to the manner in which the shakedown operation involving a group of Portuguese aliens in the Hartford area is operating.

The PRESIDING OFFICER (Mr. HUGHES). Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. I identify these articles as follows:

The first article is dated June 7, 1970, entitled, "Gullible Immigrants Pay and Pay—Some Lawyers Take and Take"—see exhibit 1.

The second article appeared in the Hartford Courant under the same date—June 7—and is entitled, "Government Heads Balk Courant Probe"—see exhibit 2.

The next article is also dated June 7 and is entitled "The Battle With Bureaucracy"—see exhibit 3.

The next three articles appeared on June 8 in the Hartford Courant and are entitled: "Fees for Attorneys Set by Association," "Lawyers Say Alien Needs Special Help," and "Bar Association To Join Courant in Investigation," respectively—see exhibit 4.

The last article to be inserted is dated July 8, 1970, and is entitled "Probers Say Aliens Able To Buy Wives"—see exhibit 5.

My statement of September 29, 1969, along with a series of articles outlining more complete details relating to the allegations involving large payments by Chinese ship jumpers for the introduction of private bills in the Senate along with alleged fee splitting with congressional offices were all incorporated in the CONGRESSIONAL RECORD, volume 115, part 20, pages 27503–27509; therefore, they will not be reincorporated at this point.

However, I have forwarded to the Attorney General of the United States the complete files involving the cases of both the Portuguese aliens in Connecticut and the Chinese ship jumpers along with the request that these allegations be given special attention and appropriate steps be taken to stop this racket.

At the same time I am suggesting that both the Senate and the House Judiciary Committees should reexamine the present rule relating to the introduction of private bills, the manner in which they should be handled, and to what extent they should affect deportation proceedings.

In this statement I do not mean to infer that there is anything wrong with the introduction of a private bill by a Member of Congress to take care of what he thinks is a meritorious case, and there is nothing wrong with the Judiciary Committee's and the Congress' considering these bills on their merits; but under no circumstance can it ever be proper for any attorney or group of attorneys to conduct a bucketshop operation where they are selling the services of a Member of Congress, and most certainly Congress cannot allow to go unchallenged or unanswered the inference that the introduction of a bill in Congress was contingent upon a payment or a campaign contribution.

Our country was established by our ancestors, all of whom were aliens, and many aliens entering our country today prove to be among the most loyal of citizens. To allow a group of unscrupulous lawyers to take advantage of their desire for citizenship naturally gives these prospective citizens an unfavorable opinion of our country, and again I state most emphatically that this racket has got to be stopped.

At this point I ask unanimous consent that there be printed in the RECORD my letter of August 11, 1970, wherein I referred all these allegations to the Attorney General with the request that his office, after conducting a thorough investigation, take whatever steps are appropriate.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
August 11, 1970.

Hon. JOHN N. MITCHELL,
The Attorney General,
Washington, D.C.

MY DEAR MR. ATTORNEY GENERAL: My attention has been called to two rather serious allegations to the effect that large fees are being charged to aliens apparently for the purpose of arranging the introduction of private bills in the Congress. Recently there appeared a series of articles in The Hartford Courant, Hartford, Connecticut, written by Mr. Thomas D. Williams, wherein he related several incidents involving Portuguese aliens in the Connecticut area who are being charged fees from $2500 to $4000 for the purpose of having a lawyer make arrangements to get a private bill introduced in the Congress, and also there are allegations that some attorneys are providing an American who for a payment of $1000 will marry an alien in order to expedite his citizenship status.

Enclosed are copies of a series of letters signed by Mr. * * *, an attorney in Hartford, Connecticut, which confirm that fees of from $2500 to $4000 are being charged merely for the purpose of getting a private bill introduced in Congress in their behalf.

Also enclosed are copies of a series of articles by the reporter, Mr. Williams, which appeared in The Hartford Courant. These contain more detailed allegations relating to the exploitations of immigrants by these attorneys.

This is the second time that allegations have been made that large fees are being collected by attorneys for the sole purpose of arranging for the introduction of a private bill in the Congress. Last September I referred to the Senate Ethics Committee a series of articles written by Mr. Seth Kantor, a reporter for Scripps-Howard, wherein at that time he alleged that large fees were being paid by Chinese ship jumpers to attorneys as compensation for having made arrangements for the introduction of private bills in their behalf, and he quoted representatives of certain Congressional offices as confirming that portions of the fees had been accepted by the Congressional offices introducing the bills as campaign contributions or otherwise. It is my understanding that the Senate Ethics Committee later forwarded these allegations along with their report to your Department.

We both recognize the seriousness of these allegations, not only as they relate to the alleged exploitation of these aliens but also as they reflect upon the integrity of both the Congress and the American Bar. They cannot go unchallenged. For that reason I am enclosing a copy of my remarks which will be delivered in the Senate the first of next week along with copies of the letters and newspaper articles referred to above wherein these allegations are outlined, and at the same time I asked that the Judiciary Committees of both the House and the Senate study Congressional procedure relating to this same subject.

In addition I am enclosing a copy of my remarks of September 29, 1969, along with the various insertions, as appearing in the CONGRESSIONAL RECORD, vol. 115, pt. 20, pp. 27503–27509 relating to the alleged racket involving the introduction of private bills for the benefit of certain Chinese ship jumpers.

I am sure that both Mr. Williams and Mr. Kantor, the reporters for The Hartford Courant and Scripps-Howard, respectively, will give their full support to the Department of Justice.

During the course of my inquiry into both these cases I have received repeated assertions that a similar and perhaps even more extended racket relating to payments for the introduction of private bills may exist in the New York City area. I am requesting that your Department consider the allegations in all these cases and take the appropriate steps, and if in the opinion of your Department additional laws are required I would appreciate receiving your recommendations.

Yours sincerely,

JOHN J. WILLIAMS.

EXHIBIT 1

[From the Hartford Courant, June 7, 1970]

GULLIBLE IMMIGRANTS PAY AND PAY: SOME LAWYERS TAKE AND TAKE

(By Thomas D. Williams)

"I am the immigrant clutching the hope I seek—
And finding only the same old stupid plan
Of dog eat dog, of mighty crush the meek."

(Langston Hughes: Let America be America Again.)

Immigration is big business.

It is a business of exploitation of the poor and ignorant by the well-to-do and well-educated—a business that takes thousands of dollars out of the pockets of immigrants and puts them into the bank accounts of lawyers, especially lawyers with political connections.

The immigrant pays because he is afraid to face immigration officials alone and because he doesn't know that free help is available.

The business is biggest in the ports of entry: Boston, New York, Los Angeles, San Francisco. But it flourishes in states near such ports—especially in Connecticut, where heavy industry has attracted the tenth largest alien population in the nation.

A Courant investigation stretched out for almost a year because the Immigration and Naturalization Service and the Justice Department both refused to release the addresses of Connecticut's aliens, revealed that attorneys' fees for immigration work range from $200 to $5,000 per client.

In Hartford, four lawyers who do a great deal of immigration work use different standards in setting their fees.

All four said they charge as little as possible in cases involving aliens with small financial resources. They also claimed they have worked on many hardship cases without fee.

One of the lawyers is the city's deputy mayor. Atty. George A. Athanson. His retainer fees, between $1,500 and $5,000, seem to run considerably higher than the fees charged by the other three attorney's.

The three other lawyers said that in most cases $500 is the highest they would ask as a retainer fee, although their total fees ranged from as low as $200 to as high as more than $2,000.

Of the four lawyers, the one who handles the most cases is Atty. Benjamin Globman of 915 Asylum Ave. Globman said 75 per cent of his practice involves working with aliens. Of 200 cases he handles each year half are clients from the Caribbean.

Atty. Samuel Tapper of 750 Main St. said he works on between 100 and 150 immigration cases a year which accounts for 70 per cent of his business. Many of his clients are Italian or Chinese.

The prosecuting attorney for Circuit Court 15, Atty. Francis McVane of 1 Webster St., said he has only about six or seven clients a year.

SOME FEAR TO TALK

Because the aliens are afraid to talk and because they often pay the lawyer in cash, it is well-nigh impossible to determine what any of the four lawyers gross in immigrant trade.

But The Courant has seen letters that show that in just two years, Athanson's fees from seven Portuguese aliens, three Brazilians and two Greeks totaled $25,765.

The Athanson figure is hardly unique, however.

"It's a regular money machine," a government official said. "I know two immigration employes from the West Coast who quit their jobs to become lawyers. They went into immigration work after law school . . . all above board, you know . . . and now they've bought out a bank. So you can imagine what those other attorneys make when they walk the thin line of the law."

Immigration is a lucrative business because the alien has few alternatives. He will do almost anything to achieve his one objective: to stay in the United States for the rest of his life.

Thousands of aliens, faced with deportation, move from state to state, always hiding from the government men who can cut short their new lives. A few ensure their rights to stay here by quick marriages to an American citizen.

The immigrants who turn to lawyers do so because they don't want to spend their lives in hiding, and marriage to an American for one reason or another, is not possible.

Lawyers provide several ways of keeping immigration officials off their clients' backs.

One is the visa extension that prolongs the alien's visit to the United States for as short a time as an hour and for as long as a year at a time.

Another way aliens can legally stay in the country is through what is called labor certification which is based on the state's need for either skilled workers or professional men. Recently, because of rising unemployment, this route to eventual citizenship has been cut short by the U.S. Labor Department.

There is also a complex legal procedure to aid illegal foreign visitors faced with deportation. By a series of legal maneuvers—the alien's voluntary surrender, court settlements and extensions on the deportation order—the lawyer can keep his client here for an extended period of time. Then he sends the alien out of the country—often to Canada—and brings him back on a legal visa.

The fourth alternative is the private immigration bill.

Only those close to the legal aspects of immigration—lawyers, immigration officials, congressmen and their staffs and a few laymen—are familiar with the bill, which amounts to an exception to the federal deportation laws.

The exception was originally written into the law to provide relief for aliens who have hardship situations warranting immediate action for permanent residence or citizenship.

But the intent of the law has been perverted. In many cases, the private bill has becomes a means of stalling deportation. Lawyers are aware that it can take up to two years for the bill to be acted on.

The Courant found that most immigrants who put hundreds of dollars on the line in their first meeting with a lawyer think they are making a down payment on American citizenship. Later, they learn they are only buying time, until the bill is acted upon. As long as the bill is alive, they can stay here indefinitely.

The odds against becoming a citizen through a private bill are heavily against them. Of every 35 private immigration bills introduced, only one passes the Senate, the House of Representatives and is signed into law by the President.

Connecticut's senators and congressmen introduced nearly 200 bills within the last two years. Not one of the state's congressional delegations knew for certain how many of the bills passed, but the best estimate was six. On the national level, 7,293 bills were introduced in the 90th Congress and only 229 were enacted into law. Most recent statistics show 5,620 bills were introduced in the first session of the 91st congress. Only 49 were passed.

The majority of bills are submitted by lawyers who know a congressman. Thus political connections are not ignored.

COULD COST ONLY TIME

But it isn't necessary to hire a lawyer to get a private bill introduced. In fact if the immigrant has a friend or relative who knows a senator or a congressman, getting a bill introduced would cost only his time. Congressmen must work on bills without charge.

A prominent immigration lawyer who practices in Washington, D.C., when told of The Courant's investigation, said: "You are on to one of the biggest stories in the country. This area (the private bill) has been abused for years.

"Lawyers have taken advantages of the situation to delay the status of immigrants and make high fees. I have also heard rumors that some members of the Congress have used their private law offices for the same purpose."

Asked what the fee to introduce a bill should be, he said: "No fee should be charged for the introduction of a private immigration bill. I charge in cases where there are deportation hearings and actual complications in the immigration procedure."

With the help of someone who knows English, any alien can handle the immigration paper work himself. Registration fees

for filing petitions for permanent residence and citizenship, seeking visa extensions and applying for passports range between $10 and $25. When a private immigration bill becomes law, there is only an $18 fee for citizenship forms.

The Adult Education Department of Hartford's board of education at 239 High St. offers the resident alien a free immigration information service.

A citizenship consultant for more than 30 years, Mrs. Angeline D. Ricco helps between 6,000 and 7,000 immigration and naturalization applicants a year without charge. She said 53 per cent of her business involves filling out forms for immigrants who do not understand the complex paperwork.

Before alien labor certification was suspended early this year, she annually processed hundreds of applicants successfully under the foreign quotas for skilled state jobs.

But, although most immigration officials and others are willing to help the alien, many foreigners succumb to the middleman racket.

In the old country, they learned that if you pay the price in a bureaucracy, the red tape will disappear. And minor scrapes with the law have left them with a certain awe of government officials. This is why they go to a lawyer, a man who represents their bridge to the government.

A relative of an Italian immigrant, asked why his countrymen were so willing to pay the price without question, said: "We learn this in the U.S. consulates of our country."

"In my case, I couldn't get a relative over to this country, who was legally ready," he said, "because so many on the quota behind him had their files moved ahead by paying off people who worked in the offices."

Once the alien has paid a substantial amount of money to the lawyer, he is hooked into the system.

He gets angry and frustrated—but he keeps paying.

A Greek alien, represented by Athanson in his past struggles with immigration authorities, related what he said were his experiences with his lawyer.

"I was really mad when I found out what he was doing to me. I wanted to go to the newspapers and complain. But I talked with some Greek friends in Hartford about my problem with him and they told me: 'You can't do that to him. He's a Greek and he's running for the council.'"

The Greek, a merchant seaman who jumped ship in the summer of 1966, lived in the United States illegally for a year before he decided he needed legal help to remain in this country.

He was referred to Athanson by Greek friends. In their first meeting, the lawyer talked to him in his native language and told him it would cost $700 or $800 to make his stay here legal, the seaman recalled.

Two months later, Athanson told his client to come down to his office with $1,000 in cash for an "immigration bond," the immigrant said. So he went to the bank and withdrew the money he had saved while working on his construction job.

BOND NOT MENTIONED

Athanson took his client to the immigration offices, but the matter of the bond wasn't mentioned; the immigrant said he was surprised by this, but Athanson told him not to worry: they didn't need the money after all.

Back at the lawyer's office the client learned why he had been asked to bring the "immigration bond" money. He was told, he said, that it was to be part of Athanson's fee. Athanson denied that he ever mentioned an immigration bond in the case, and said he later received the money in monthly payments.

The usual charge for legal work on immigration cases was, Athanson told him, between $2,500 and $3,000.

"Since you are my friend," Athanson told his Greek countryman, "I will charge you $1,500," the sailor recalled.

The lawyer and his client haggled over the legal fee and finally decided, the client said, that more than half of the $1,000 would be used as a downpayment for Athanson's work.

During the year and a half that the former seaman did business with his lawyer, Athanson continued to charge his client for various services, the immigrant said. Some of the bills—$30 fees for telegrams to Washington, D.C., and visa extensions—caused the alien increasing concern, he said.

But later, when the alien needed help for his brother who had also jumped a Greek merchant ship to live in the United States, he said he again turned to Athanson. Here the fee was even higher: $2,500. The immigrant argued with his lawyer, but finally decided he had no alternative but to pay Athanson's asking price. He didn't have ready money but Athanson said he would collect his fee on the installment plan, he said.

TWO HUNDRED DOLLARS FOR PASSPORT

The feeling that Athanson was charging him too much for services crystalized, the alien said when he went to New York to arrange for his brother's Greek passport. The passport cost only $8. Athanson had charged $200 for his own, he said.

But the alien kept going to Athanson for help. The breaking point came only when the former Greek seaman wanted his lawyer to translate some legal papers from German to English. Athanson's translator's fee was $250, he said.

"This really made me suspicious," he said. "I began to realize that these lawyers can charge just about what they want."

Around the time the Greek became involved with Athanson, the seaman had married an American girl. She had questioned her husband's dealings with his lawyer for some time, he said.

After her husband came home and told her what Athanson had wanted for the translation, she decided she would take time off from her job to work on her husband's citizenship problems herself.

On her first visit to Hartford's immigration offices, she was told her husband didn't need a lawyer.

She processed the paper work herself. Within a month her husband obtained his permanent residence card. He paid only a small fee for registration.

"It was very complicated and aggravating," she said. "But it only showed us that money spent on a lawyer was ridiculous."

Athanson collected a total of $1,500 for his work on behalf of the two Greek seamen, the first immigrant said. Only $200 was paid toward the $2,500 Athanson demanded to work on a private bill for the brother. That case was closed when the brother, impatient about his situation, returned to Greece. The rest of the money—about $1,300—bought Athanson's first client a sheaf of correspondence and legal documents, he said.

DIDN'T NEED BILL

The $1,300 wasn't intended to pay for a private bill. After he was married, the seaman didn't need one.

Athanson said that be had only received a total of $900 from the two brothers. He also challenged the wife's version of the story.

During his work with the husband, Athanson said, the American girl threatened to withdraw the Greek seaman's application for permanent residence. He said their marital troubles caused him considerable aggravation and expense.

In the course of his business with Athanson, the sailor said Athanson suggested he might contribute to Sen. Abraham Ribicoff's campaign fund. The immigrant said he was told that the senator's office had aided Athanson in expediting his legal paper work.

Athanson said he doesn't recall ever having suggested that any client make a campaign contribution.

Athanson's client never made the alleged political contribution, but the Courant's investigation uncovered several instances in which aliens did contribute to political campaigns.

A Chinese immigrant, using a friend who is a lawyer and is charging him no fee, said he is applying for a bill through U.S. Rep. Robert N. Giaimo of New Haven. In 1968 he contributed $800 to Giaimo's campaign. If the bill passes, the alien will gain the right to permanent residence for his family of four, now living in New Haven.

Another New Haven alien who has hired a lawyer to promote a private bill also sponsored by Giaimo contributed $50 to the congressman's campaign fund in 1968. He claims he is being charged very little by the lawyer handling his case.

The family of an Italian immigrant, who also lived in New Haven, has contributed to the campaign funds of two candidates. A private immigration bill has been introduced for them by Giaimo, but they claim that no lawyer was hired to advance their case.

In 1966 the family contributed $50 to Giaimo's campaign. In 1968 they upped their contribution to $100 and also gave $50 to Sen. Ribicoff's campaign.

JITTERS STANDARD

When asked about their private bill, which had not been acted upon, a relative of the alien became very nervous, so nervous that she later called Giaimo's office to find out who was investigating the family's case.

Jitters is almost a standard reaction in aliens questioned about their status with the immigration service. In some cases the immigrants and their relatives wouldn't talk at all.

In one instance, an Italian alien who agreed to talk about his fear that he would get himself and his lawyer in trouble. But his brother-in-law told this story:

The alien, call him John, migrated to Venezuela from Italy about 15 years ago.

John operated a successful Coca Cola trucking franchise there until a stroke partially paralyzed him. His doctors told him he should move to a less humid climate.

So he returned to Italy where he ran a small truck hauling business until he again became restless.

His plan was to move to a less humid part of Venezuela, visiting his sister in Connecticut on his way there. He sent his wife and three children ahead of him to Connecticut while he sold his business interests in Italy.

The delay was to cause him trouble with the immigration service. For some reason the fact that his family arrived several weeks before he did looked suspicious to immigration officials. When his brother-in-law made an application for an extension on John's visa, he was turned down.

When the family lawyer was consulted he said nothing could be done and that any money spent would be wasted. Eventually though, he came up with the name of a lawyer who could help, Atty. Francis J. McVane.

EXTENSION OBTAINED

McVane's first fee was $500 for a visa extension, John's brother-in-law said. The cost might have been high but the lawyer succeeded where the brother-in-law failed—he got the extension.

Since then McVane has obtained several other extensions and also arranged for a private bill to be introduced by U.S. Rep. Thomas Meskill of New Britain. All this has cost at least $1,500, according to the brother-in-law, but there is no guarantee that the bill will pass.

McVane confirmed that the fee was $1,500 but said he did not charge anything for pri-

vate bills. The original $500, he said, was a retainer. Complications in the case, involving possible deportation for the family, two job certifications and several visa extensions, required the additional fees, said McVane.

Ironically, during the family's stay in Connecticut, John's wife gave birth to a child who is automatically a citizen.

The immigration business is full of ironies.

One of the few immigration bills passed in the last two years cost its beneficiary nothing except for a few registration fees.

Because of a technical error, the alien who came to Connecticut from New Zealand in 1959 never received permanent residence status while his parents who came here in 1962 were given this right.

There was no problem until the New Zealander neared the end of his law education and discovered that he could not be admitted to the bar unless he became a citizen. A private bill was his only remedy.

His first bill introduced by Sen. Thomas J. Dodd in the winter of 1967 was blocked by another senator in reprisal for one of his bills which had failed to pass, according to the alien.

A second bill, introduced some eight months later by both Sen. Dodd and the late U.S. Rep. William St. Onge of Putnam passed on April 11, 1969.

HIGHER IN JERSEY

"I guess I was just lucky. It's hard to understand how these bills get through," said the alien. "I didn't pay anything for mine, but I understand that lawyers in New Jersey are charging between $5,000 and $10,000 for private bills to be introduced."

The lucky ones are rare. In the immigration business the tragedies far outnumber the stories with happy endings.

Aliens who finally run out of time and are sent back to their native lands can lose out on investments like cars—even homes—bought with their hand-earned cash.

The greatest tragedies, however, are those that break up a family:

"I don't know when I'll ever get him back . . . my husband ever since he's gone I'm nervous and upset . . . and I shouldn't be talking to you about it . . . but I can't help it. I've got to tell somebody once in a while because sometimes I feel like I'm dying."

The woman, who comes from a small town in southern Connecticut, had married an alien.

He had been married in Italy but was separated from his wife. He had known the woman who was to be his second wife only a few months when his visa ran out. The only way he could stay in the United States was to marry an American.

The problem was that he was still married to his first wife. The couple was told that they could arrange for a quick divorce in Mexico and then marry immediately afterward. They followed their lawyer's advice.

They had little trouble crossing the border into Mexico, but two days after they were married they tried to return and were detained. The immigrant was told he would not be allowed back into the country despite his marriage to an American.

STILL SEPARATED

The newlyweds were forced to separate. Reluctantly she came back to Connecticut. He eventually made his way back to Italy.

Nine months have passed and four letters have been sent to the American Consulate in Naples, but so far there have been no results.

The husband is back in Italy—another alien who was deported after getting questionable advice from several attorneys who bled him dry, according to another relative who was familiar with his legal dealings.

Some immigrants become quickly disillusioned with their lawyers. A Brazilian immigrant, who had heard about The Courant's investigation through a friend, contacted the newspaper in an attempt to relieve his frustrations.

"I need some help from you. There are many bad men in this world. They—the lawyers—they want your money, but they don't do anything for you. I know you don't charge. I want your help."

He spoke rapidly. When he pronounced his name, it was slurred and not easy to understand. Fear was in his voice. He wanted to stay in the United States, this land of opportunity, but his legal presence here was gradually coming to a close. Soon the immigration investigators might be looking for him.

"The lawyer told me if I found a good American girl I could get married and then become a citizen. But I can't just go out and look like that. It's wrong for her—wrong for me.

"I don't want to see a lawyer now. If you don't get them the money, they say they won't do a thing. They make you sign a paper say this."

LIKED CONDITIONS

The alien came to Connecticut from Brazil to work for a travel agency in February 1969. He found that the salary and living conditions here were so much better than those in Brazil that he decided he would try to stay in the United States.

A friend advised him to contact a New York lawyer before his visa expired. The lawyer charged him $1,000 to get a private immigration bill introduced into the U.S. Congress through a New Jersey representative.

The price might have been worse, but he is now due to leave the country in February 1971, the date his bill expires. It is not likely to be approved.

A minister, who came to this country as an immigrant and has seen the whole legal problem from the inside, offered a more sophisticated view.

"It is the law that's the problem. Your law of the lawyer. Your whole judicial system. It pretends to make laws for the immigrant's benefit when it is actually trapping them into paying fees to a lawyer."

It is apparent that the immigrant's personal experience with what is wrong in the system is not understood in official Washington. The government, it would appear, is so busy looking for criminals who flaunt the immigration laws that it tends to overlook the problems of the alien who just wants to stay here and make a better way of life.

The way the government sees the problem is reflected in an analysis in the 1961 U.S. Code Congressional and Administrative News for the first session of the 87th Congress.

"The alien whose sole immigration offense is, perhaps, a defect in his visa, or an overextended stay as a visitor, usually accepts the order of deportation and departs.

"Other aliens, mostly subversives, gangsters, immoral or narcotics peddlers, manage to protract their stay here indefinitely only because their ill-gotten gains permit them to procure the services of astute attorneys who know how to skillfully exploit the judicial process."

DON'T JUDGE INDIVIDUALS

There are several ironies here.

One is that lawyers make as much or more money on the alien who overextends his stay. And while congressmen and senators readily talk about the judicial system's problems in handling undesirable aliens, they don't often comment on their own problems in deciding which honest, hard-working alien has the greatest hardship and thus will gain the privilege of having their private bill become law.

The congressmen also don't discuss the fact that the private immigration bill, which is supposed to apply only to cases of extreme family hardship, has become so commonly abused that thousands clog the Congress. In some years the bills have taken more than 20 per cent of the legislative calendar.

Already the House of Representatives has limited the number of applicants for private bills, thus curtailing a practice that has been flourishing unchecked in constantly increasing numbers since after World War II.

The House Committee on the Judiciary added a stipulation to their rules of procedure. It became effective on March 12.

Under the new rule six, deportation cannot be deferred in the cases of private bill beneficiaries who have entered the country as "visitors, exchange visitors, students, stowaways, in transit, or deserting seamen, or by surreptitiously entering without inspection through the land or sea borders."

The rule applies only to the House, however, which leaves the Senate still wide open for lawyers with political connections to continue business as usual.

TIP OF ICEBERG

The Courant's investigation was able to document only a part of what gave every indication of being a widespread business.

In other of Connecticut's big cities, especially New Haven, Waterbury and Bridgeport where there are many immigrants, attorneys are also charging high fees for immigration work.

And lawyers are not restricted to dealing with congressmen for their own state when seeking private bills on behalf of a client. Many lawyers from New York and Massachusetts were found to have handled numerous private immigration bills for Connecticut based aliens as well as immigrants living in their own states.

A Brazilian, with friends in Massachusetts, described how some lawyers in the immigration business keep their clients in line.

"Up there they charge $1,000 and up to keep you in the country and they're loaded with cases. If they find you're giving them trouble, they'll drop your case and report you to immigration authorities as a deportable alien."

The Courant found no cases where a Connecticut lawyer threatened to turn in a client to immigration authorities. Indeed, in most cases, the lawyer was anxious to portray himself as a friend of the alien and to give his client a strict accounting of what he is doing to earn his fees.

One of Athanson's clients is a Portuguese woman who has been waiting for her permanent residence card since the summer of 1968.

In his first letter to this woman, he said: "I want to make it crystal clear" that the $2,000 fee, set in a previous meeting, would only cover his work on the private bill.

Since that time his fees have run up to $2,265, but the woman has still to become a permanent resident.

So she has decided to seek another way of becoming a citizen.

A friend suggested that if her mother and father immigrate from Portugal they probably can become citizens easily because they have American relatives more closely related to them than to their daughter. And when the parents become naturalized, their daughter can in turn become a citizen.

Athanson, however, has continued to emphasize the work he has done on the case.

His most recent letter gives a complete, itemized accounting of his charges for hearings, office meetings, legal papers and drafted letters. This letter, sent in early February, makes it clear that the two private bills prepared for her will not cost one cent—a seeming contradiction of the letter sent in September 1968.

In summing up the work he has done on the case, Athanson's letter said:

"The vigorous actions undertaken by this office on your behalf helped relieve that

anxiety and that desperation and has been the springboard of ultimately leading to your becoming an American citizen. How much is that really worth?"

GOVERNMENT HEADS BALK COURANT PROBE

Federal agencies on every level refused to cooperate with The Courant's year long investigation into high legal fees paid by immigrants.

The Courant had the names of aliens applying for private immigration bills, through a public record but it lacked the addresses.

Beginning in the spring of 1969, The Courant sought the information first from the Immigration and Naturalization Service, then from the Justice Department and finally the White House staff. The response was always the same: the addresses of aliens with private immigration bills filed in the U.S. Congress could not be released.

In each instance, The Courant informed agency representatives that its investigation centered on lawyers who charge high fees for immigration work in connection with the bills—which can be introduced by the congressmen without charge to the alien.

Federal officials were assured that the names or addresses of aliens would not be printed. It was also pointed out that local immigration officials monthly release the names, addresses and zip codes of immigrants who become naturalized citizens in Connecticut's three federal courts and several of its superior courts.

Here is the record of The Courant's efforts to locate aliens with complaints about their lawyers' fees and advice:

In the spring of 1969, the Hartford district offices of the immigration service cited a federal statute protecting the release of the addresses of aliens. It referred The Courant to its regional headquarters.

Several days later, the regional headquarters of the immigration service in Burlington, Vt., refused to release the information. It referred The Courant to its national headquarters in Washington, D.C.

On May 21, 1969, The Counrant wrote to Raymond Farrell, Commissioner of Immigration and Naturalization, and sent copies of its request to John N. Mitchell, the Attorney General, and U.S. Rep. Emanuel Cellar, chairman of the Committee on the Judiciary.

On June 30, The Courant received a reply from Commissioner Farrell. In order to receive aliens' addresses, Farrell said, it would be necessary to fill out an "application for a search of the records." The application, enclosed in his letter, included a space for the addresses of aliens, the very information The Courant was seeking.

On Aug. 5, The Courant sent back the application with a request for the addresses of all of Connecticut's aliens applying for private immigration bills. The Courant already had the names of aliens applying for such bills from a public record entitled a "Summary of Activities of the Committee on the Judiciary, 90th Congress."

On Aug. 20, Richard G. Kleindienst, the deputy attorney general, sent The Courant a letter denying the application because "this particular information cannot be disclosed . . . It would constitute an invasion of their (the aliens') personal privacy."

On Nov. 4, a representative of The Courant spoke personally with Kleindienst in Washington, D.C., and was assured that despite previous denials, The Courant's request would again be given serious consideration.

On Nov. 21, The Courant's representative received a telephone call from Kleindienst and was told that despite the deputy's personal conference with Attorney General Mitchell, the request was again denied.

Several weeks later, The Courant telephoned Clark R. Mollenhoff, special counsel to the President, to ask his help in convincing the administration of the importance of its investigation.

During the course of a long conversation, Mollenhoff said that the addresses of some aliens might be protected under the cloak of the Central Intelligence Agency.

On Dec. 4, The Courant wrote to Herbert Klein, and informed him of its problem in getting information and the entire purpose of its investigation.

On Dec. 15, The Courant wrote to Mollenhoff and enclosed a copy of the letter to Klein.

On Dec. 24, 1969, and Jan. 16, 1970, The Courant received two letters from Mollenhoff. Neither letter explained the White House staff position on the release of the addresses. The second one repeated the Justice Department's opinion about The Courant's request.

The Courant never received an answer to its letter to Klein.

On the other hand, during The Courant's investigation, the Hartford district immigration offices were most cooperative in supplying general information about their work. In fact, it was this cooperation which enabled The Courant to compare work and fees in the immigration process with the work and fees of lawyers.

THE BATTLE WITH BUREAUCRACY

Elsewhere in the paper today, we are printing an article on the needless cost and harassment to which many immigrants who are in the United States on short term visas are exposed when, usually futilely, they seek the passage by Congress of what are called private immigration bills permitting them permanent residence in this country. The article is the fruit of more than a year's investigation, and we commend it to our readers.

One of the reasons for the length of time it took to accumulate the material that provided the background for the article was the stubborn resistance of the Federal Immigration and Naturalization Service, the Justice Department and the White House itself to The Courant's request for the addresses of Connecticut's alien residents.

Under federal law, aliens who are in this country for six months or longer are required to register with the Federal Government, giving their names and addresses as well as other pertinent information. When private immigration bills are filed in their behalf with Congress, that information is also required.

The names and addresses are readily available within the Immigration and Naturalization Service, as is indicated by the fact that each month the Service furnishes to the press a list of the immigrants who have been granted citizenship, complete with names, addresses and zip code numbers.

Our vain pursuit of the information began with the local office of the Service in Hartford. Denied here, it was appealed to the regional office in Burlington, Vermont, and from there to the national office in Washington. Denied at the national level, we appealed to the office of the Attorney General where again we were turned down. Finally, we asked for assistance from the White House and received no answer to our request. And in no case did we receive a logical explanation to what seemed a completely legitimate request for information. When we got an explanation at all for being turned down, we were told that giving out the addresses of the aliens was "contrary to regulations."

In spite of a bumbling bureaucracy, we finally got from other sources sufficient material to confirm fully the suspicions that led to the investigation. But we got it in spite of the opposition of the Immigration and Naturalization Service and the Justice Department and the refusal of the White House to order the release of legitimate and harmless information. It took us more than a year to piece together the information behind the article on the plight of immigrants seeking permanent residence in this country when, had the bureaucracy not tried to block us, it could have been assembled in a matter of weeks.

We do not begrudge the unnecessary time, effort and expense and stupid—if, indeed, it was not worse than stupid—refusal to release the information cost us. And we think that today's article on the problems that face aliens seeking permanent residence justifies the extra effort the battle with bureaucracy cost us.

[From the Hartford Courant, June 8, 1970]

FEES FOR ATTORNEYS SET BY ASSOCIATION

The Association of Immigration and Nationality Lawyers, a group of some 400 attorneys from around the nation, sets a fee policy for its membership.

The association's minimum fees assume cases of average difficulty; and indicate that fees above the minimum should be adjusted on the basis of the specific difficulty of the case and novelty of the point at issue.

Association policy also states that minimum fees do not take into account the ability of the client to pay, which will necessarily be a factor in setting the fee in a particular case. Suggested minimum fees also do not include the lawyers costs or expenses.

In individual cases, the association allows two exceptions to their minimum fee rule:

Where counsel is retained by the same client in a connected series of matters, the total fee may be less than the total of suggested minimum fees.

Where additional beneficiaries, such as spouse or child, are included within a given application or other case, the fee for the additional person may also be less than the suggested minimum fee.

Here is the minimum fee schedule for specific immigration cases:

Visa extensions, $50 to $100; visa cases, $350 to $750; adjustment of alien status without deportation proceedings, $150 to $500; and deportation cases, $500 to $1,500.

Also waivers of alien status, $500 to $750; changing alien status, $500 to $1,500; uncontested naturalization applications, $100; reexamination of naturalization, $150; and contesting naturalization, $250 to $1,000.

Also applications of citizenship through a relative, $250 to $1,000; appeal to board of immigration, $250 to $500; appeal of denial of labor certification, $500.

Also application for passport, $100; appeal of denial of passport, $1,000; reconsideration of loss of citizenship, $1,000.

Also petitions before either the U.S. District Court or the U.S. Supreme Court, $1,000 to $2,500; consultation, $50; hourly rate for items not covered, $50; rate per day, $350; and criminal charges to be faced before the immigration service, $1,000.

[From the Hartford Courant, June 8, 1970]

BAR ASSOCIATION TO JOIN COURANT IN INVESTIGATION

Anthony V. DeMayo of New Haven, president of the Connecticut Bar Association, Sunday commended the efforts of The Courant in investigating the problems of immigrants and promised that the association will review alleged "exploitation" of immigrants by local lawyers.

The following is the text of DeMayo's statement:

"In response to the charges reported in The Hartford Courant, Sunday, June 7, of alleged 'exploitation' by certain lawyers of immigrants seeking an extension of visa or

other legal services, I have called a special meeting of the officers of the Connecticut Bar Association next Monday, June 15.

"The entire matter will also be considered at a special meeting later this month, by the Board of Governors, which represents the entire membership of the association.

"I am also asking the association Committee on Civil Rights and the Committee on Professional Ethics to review the charges. In addition, the Committee on the Administration of Civil Justice will be requested to review federal and state immigration laws and make any necessary recommendations to the Board of Governors.

"The Connecticut Bar Association is a voluntary, professional organization. Only the Grievance Committee of Connecticut Superior Court has the statutory powers to take disciplinary action against individual members of the bar.

"However, in cases where allegations of unethical practice or conduct not in the public interest, are made which reflect on the integrity of the legal profession, this association stands ready to take the leadership in determining the actual circumstances involved and, if warranted, to transmit its recommendations to the grievance committee.

"The Connecticut Bar Association commends The Hartford Courant for its efforts to perform an important public service by calling attention to possible inadequacies and complexities in our immigration laws.

"The association will move swiftly to determine the facts and will make all possible efforts to effect any necessary improvements."

[From the Hartford Courant, June 8, 1970]

LAWYERS SAY ALIEN NEEDS SPECIAL HELP

(By Thomas D. Williams)

Four Hartford lawyers who specialize in immigration work defend the fees they charge their alien clients on the grounds that the laws are complex and each case takes time.

In fact, all four said their fees are low when compared to those charged by attorneys in other specialties.

The Courant Sunday documented the difficulties—and large fees—that some immigrants feel they encounter in dealing with lawyers.

The minimum fee schedule for the Association of Immigration and Nationality Lawyers ranges from $50 to $2,500 depending on the complexity of the alien's case. The association is a group of some 400 specialized lawyers from all parts of the country and has its headquarters in Brooklyn, N.Y.

FEE COMPARISONS

Two of the lawyers compared normal immigration hearings with an appearance in traffic court which costs the violater $250, a minimum fee of the Hartford Bar Association schedule.

Another indicated that sometimes the immigration process was a lot tougher than getting a divorce for an unhappy married couple. The fourth lawyer said that criminal immigration legal defense was just as difficult, if not more so, than the sophisticated defense for a big time criminal.

Deputy Mayor George Athanson said he charges $50 an hour and $350 a day for immigration work because it is a specialty. His less specialized work, he said, costs the client $35 per hour.

SPECIAL TRAINING

In addition to his regular law training, Athanson attended a three-day immigration institute several years ago to qualify him in the specialized nature of the law.

Attorneys Samuel Tapper, of 750 Main St., and Francis J. McVane, of 1 Webster St. both are former long-time employees of the Immigration and Naturalization Service. Atty. Benjamin Globman of 915 Asylum Ave., has practiced immigration law since World War II.

Athanson, who charges retainer fees which are much higher than the other three lawyers said his fees are in line with a minimum schedule set by the association of immigration lawyers.

Although they were reluctant to be quoted because of bar association rules against publicity, the lawyers indicated varying fee standards. Tapper and Globman said the association's schedule of minimum fees are usually higher than they charge their clients.

HARDSHIP CASES

McVane said he was not familiar with the schedule and based his charges strictly on the individual case. If the client can't afford to pay regular fees, he said, the charges are as low as he can possibly make them.

The other three lawyers also agreed with this approach. All four said they had handled many difficult hardship cases at no cost to the poverty-stricken client.

Asked about the alien client who is afraid to face immigration authorities and merely needs a piece of good advice to handle his own situation, Tapper indicated that well over half of the people who come to his office are counseled once without charge.

McVane, on the other hand, said that almost all those ailens who come to this office need extended legal help and could not solve the situation without a lawyer.

REFERRALS

Athanson said most foreigners who visit his office have been referred to lawyers through organizations, individuals, some travel agents or the immigration service itself. "If they say, 'I want a lawyer,' I'm not going to kick them out," he explained.

Said Globman, "The majority of people who come here are wise to have legal counsel."

All four lawyers indicated that some of their immigration work is so complex that it takes appeals to higher courts in Washington, D.C., to extricate some of their clients. They all cited some hardship cases which went that far and cost their clients under $1,000. Such cases are a financial loss to the lawyers they indicated.

Challenged about the seeming conflict between their more expensive services and their clients' often scanty financial resources, the lawyers said legal costs are only commensurate with the complexity of the law and the slow technical nature of immigration applications.

ABILITY TO PAY

In addition, they said many of their clients are not only supported by richer relatives, but have obtained jobs in violation of their status as a visitor. And many aliens are making money out of proportion to what little they earned in the old country.

One of the lawyers gave an example of another kind of client situation.

The alien, he said, got married to an American citizen, but "I learned he was here originally as an agricultural worker, skipped his contract and was deported."

Later, said the lawyer, the alien came back as an agricultural worker under another name. With that background the alien wanted to apply for a visa.

FIGHTING PROSECUTION

The lawyer said that his client not only faced deportation, but had to fight prosecution. The alien should have waited a year to apply through the U.S. Attorney General for permission for a visa. His failure to do that upon returning to the United States was a statutory crime.

In addition, said the lawyer, he returned to this country under a false name, another statutory crime.

The lawyer began his work for the client. He beat the court order to show cause why the alien shouldn't be deported, and got voluntary departure for him.

Then the lawyer got his prosecution dismissed in U.S. District Court, and got the attorney general to retroactively waive the alien's original requirement to ask permission for a visa application.

Finally, the lawyer filed for a visa for the alien with the U.S. Consulate in Halifax, Canada. "Now he (the alien) is on the waiting list and if he behaves and his marriage doesn't crumble, he'll be O.K.," said the lawyer.

REDUCED FEE

The attorney said that the minimum schedule just for deportation requires a $1,500 fee; and that the multi-troubled alien paid him only $1,100 for all that complex legal maneuvering.

Another alien's troubled siutation cost him a lot more.

The Portuguese man and his wife came to this country on a six month visa in October, 1968. Without proper working status, both immediately took jobs in the Hartford area.

Within a short period of time, the immigration service discovered that the Portuguese woman was working illegally.

The couple was so frightened by this turn of events that a day later they purchased tickets to return to Portugal.

REFERRED TO LAWYER

However, after talking the situation over with his boss, the Portuguese man said he was referred to Atty. James N. Egan, of 49 Pearl St. and upon visiting Egan's office, the couple said they were told it would cost them $500 to stay their deportation and get an additional 30-day extension on their visa.

Later, when the couple went to the immigration office, they said they were represented by Atty. Tapper. Tapper was successful in getting them through both the deportation proceedings and in adding an extension to their visa.

The Portuguese man said the one fee was sufficient for both lawyers.

During the 30 days of their extended stay, the couple began to search for another lawyer who could keep them in the country permanently. A friend referred them to Athanson.

AGREED TO PAY $5,000 RETAINER

In an initial meeing with Athanson, they agreed to pay a $5,000 retainer fee; however, because they were still conscious of the $500 already spent on lawyers, the couple wanted the money kept in a joint bank account with Athanson. The lawyer agreed to this arrangement, they said.

Athanson later secured a private immigration bill for the wife. It was introduced through Sen. Abraham Ribicoff, and is still pending. Of course, if the couple had known the law, they could have secured the bill without charge directly through the senator.

Athanson is now still working on immigration applications for the couple.

The Portuguese man and his wife have absolutely no complaints about their lawyer. They are convinced that Athanson is representing them well.

REPRESENTED SAVINGS

The couple said the $5,000 represented most of their total savings. They explained that in order to make enough money to afford the fee and have enough left over to live on, both have to work full-time. It is still tough for them to meet ordinary living expenses.

Asked what the couple's total annual take home pay was to afford such legal expenses, Athanson looked in his files and replied, "They are making a total of $12,701.83."

In response to an earlier question about the Portuguese couple's ability to pay such a high retainer, Athanson said that the private bill had given them the freedom to work and earn money over a period of several years.

Athanson also claimed that the retainer was not necessarily a final fee. He said that

he collected his expenses from his client's retainer fund.

When asked if he made it a practice to return parts of the original retainer, Athanson said this is done when his final fees are lower than the original retainer, or when there is extreme financial hardship.

In some cases investigated by The Courant, Athanson not only tabulated up to the full amount of the retainer, but added over $200 to the final bill.

EXHIBIT 5

PROBERS SAY ALIENS ABLE TO BUY WIVES

(By Thomas D. Williams)

Aliens are being sold phony passports and visas to enter the country, then temporary marriages are arranged to keep them here.

Federal investigators in Connecticut exposed this scheme in a continuing probe into immigration that has been under way for a year. Two men have been arrested thus far. They were later released on $10,000 full surety bonds.

Charged with arranging marriages for two Portuguese men were Joaquim Ferreira Pepeira of 667 Noble Ave., Bridgeport, and Secondino (Dino) De Mello Morais of 51 River St., Waterbury.

A federal warrant indicates that Peperia allegedly paid an American woman $1,000 to marry the Portugese alien so he could stay in the country as a permanent resident.

WANTED TO STAY

The alien was reportedly in the United States for a two or three week visit when he decided he did not want to return to Portugal. According to the warrant, Pepeira went with the couple for blood tests in Danbury and later was present when they were married in Bridgeport on June 4, 1968.

In addition, the warrant says the woman was told she did not have to live with the alien and the only time she would see him again was when they got a divorce.

The warrant also makes these allegations:

Pepeira told the woman not to tell marriage license officials that she had been married before.

The woman was instructed to tell immigration officials she had been living with her Portuguese "husband."

After the alleged marriage payoff, the woman was told to apply for petition papers through immigration officials to make her "husband" a permanent resident. She reportedly filed the papers with the Hartford offices of the immigration service on June 10, 1968.

ENTERING COUNTRY

A second federal warrant charges that Morais met with another Portuguese alien in Portugal in August of last year. The accused told the alien he would charge him 55,000 escudos (over $1,900) to come to the United States.

Later, the warrant says, the alien went from Portugal to Spain and to France. He then flew from France to Kennedy International Airport in New York City on Sept. 30, 1969.

Shortly after the alien arrived in this country, the warrant says, Morais met with him at his home in Waterbury to arrange a marriage with a New York City woman. The alien and a Bronx, N.Y., woman were allegedly married on Oct. 15, 1969.

According to the investigation, the couple never lived together. And in fact, the Portuguese man was never able to locate his "wife" after the marriage in order to have her file the necessary immigration papers for his permanent residence.

ARRESTED IN MAY

Both Pepeira and Morais were arrested by federal agents from the Hartford District offices of the Immigration and Naturalization Service in May.

According to Assistant U.S. Atty. F. Mac Buckley, the arrests were not made public until Thursday because it was felt that government witnesses might be "intimidated and scared to talk."

Buckley said the probe is only partially completed and that he will call for federal grand jury indictments of a number of suspects in the fall.

The investigation, he said, was originated by Hartford's immigration offices and has involved probes into racket activities in Bridgeport, Waterbury, Danbury, New York City, France, Portugal and Belgium.

An immigration spokesman said their investigation has been aided by several other district offices along the Eastern seaboard.

Mr. WILLIAMS of Delaware. Mr. President, I submit for appropriate reference a resolution, asking the Committee on the Judiciary to consider these allegations and take whatever steps are necessary, legislative or otherwise, that they deem appropriate. I ask that the resolution be appropriately referred, and that it be printed in the RECORD.

The PRESIDING OFFICER (Mr. HUGHES). The resolution will be received and appropriately referred, and will be printed in the RECORD in accordance with the Senator's request.

The resolution—Senate Resolution 456—was referred to the Committee on the Judiciary, as follows:

S. RES. 456

That the Committee on the Judiciary, or any duly authorized subcommittee thereof, shall, under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, make a full and complete study and investigation of—

(1) the fees being charged by private persons for procuring the introduction into Congress of private relief bills for the benefit of aliens in order to stay deportation proceedings brought by United States officials against such aliens; and

(2) the need for any change in the present rules concerning the effect of the introduction and consideration of such bills upon the staying of those proceedings.

Sec. 2. The Committee shall report to the Senate at the earliest practicable date the results of its study and investigation, together with its recommendations for any necessary legislation.

RECESS UNTIL 9 A.M. TOMORROW

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 9 o'clock tomorrow morning.

The motion was agreed to; and (at 5 o'clock and 56 minutes p.m.) the Senate recessed until tomorrow, Wednesday, August 26, 1970, at 9 a.m.

NOMINATION

Executive nomination received by the Senate August 25, 1970:

CORPORATION FOR PUBLIC BROADCASTING

Thomas W. Moore, of Connecticut, to be a member of the Board of Directors of the Corporation for Public Broadcasting for a term expiring March 26, 1976, vice John D. Rockefeller, 3d, term expired.

EXTENSIONS OF REMARKS

SENATOR PROUTY AND OUR ENVIRONMENT

HON. J. CALEB BOGGS

OF DELAWARE

IN THE SENATE OF THE UNITED STATES

Tuesday, August 25, 1970

Mr. BOGGS. Mr. President, the distinguished Senator from Vermont (Mr. PROUTY) brought to Congress 19 years ago his experience and concern for conservation. In 1951, perhaps we should have heeded men like Senator PROUTY who warned us of the dangers of disregarding our environment. If we had, perhaps we would not be faced with today's ecological problems. In his years of service in Congress, Senator PROUTY has been a strong advocate for legislation aimed at protecting our environment.

I ask unanimous consent that his record be included in the Extensions of Remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATOR PROUTY AND OUR ENVIRONMENT

Senator Winston Prouty's career as a strong advocate of conservation of our environment started before he entered the United States Congress.

In 1948, Winston Prouty was appointed to serve as Chairman of the Vermont State Water Board after completing a term as Speaker of the Vermont House of Representatives. This service on the board reinforced Senator Prouty's strong respect for our natural environment.

Senator Prouty feels that until recently, one discipline, ecology, has served only the agricultural and medical community. It is the science of ecology that offers us the hope that our knowledge will better serve us and that the knowledge on which we base our actions will be more complete.

As Senator Prouty wrote in a guest column on September 6, 1969: "Pollution is waste management gone wrong, or in the extreme, the absence of waste management."

There is a new sense of involvement with our environment and its relationship with life patterns. This is a good trend and, hopefully, one that will continue until we have reached the objective of a quality environment for all Americans.

Senator Prouty realizes that money alone cannot provide an instant panacea and laws alone are not enough to reach our goal of a quality environment. The people must provide change in their attitude on the environment and its use.

To achieve the good we all desire, Senator Prouty says "We must change our thinking and accounting. Our decisions and our balance sheets must reflect environmental factors. Our actions must be based on ecological knowledge."

In the past, it is interesting to know, for example, that water pollution legislation stems from an 1886 Act of Congress to forbid the dumping of hazards to naviga-

tion in New York harbor. Concern for navigation marked early water pollution legislation, but by 1912 Congress had moved to control water-borne diseases. Subsequently water pollution legislation has responded to the growing awareness of the need to halt abuses of this precious resource.

Concern for the quality of our air was slower in developing. Our nation was midway into the twentieth century before Congress passed the first act in this area, the 1955 Air Pollution Control Act.

Senator Prouty in a recent speech before the Vermont Library Association put forth his ideas of an environmental ethic and environmental accountancy which are basic to the successful solution to the existing problem. As said by Senator Prouty:

"Each day we hear a new figure as to how much it will cost to repair our ravaged earth. Yet probably the most accurate thing that can now be said is that the only thing more expensive than cleaning up our environment is not cleaning it up.

As for determining who is responsible for our environmental dilemma, I would suggest we ignore for a moment President Nixon's admonition that "the fight against pollution is not a search for villains." Let us seek out the villains. We do not have far to look. As the cartoon character Pogo says, "We have met the enemy and they is us."

People are the polluters. Let us realize we all live in environmental glass houses and stop throwing stones. Perhaps we are not comfortable being the villains. But it was our search for comfort and convenience that led to our villainy, that brought us at odds with our surroundings.

It is not so much a question of individual intent, but of collective neglect.

We were led to near disaster by our concepts and must rescue ourselves in part with technology, but also with a new way of thinking, an environmental ethic if you wish.

We must make our economic and social decisions in the context of our surroundings. Our environmental ethic will require more caution in our planning, more care in our daily conduct. It will require that each decision we make be made with concern for our fragile ecology.

We cannot build dams considering only the affect downstream. We must look upstream as well.

We cannot think only of whiter, brighter washes without contemplating our algae-choked streams.

We cannot think of our no-deposit, no-return, throw-away culture as a blessing without considering the problems of solid waste disposal.

Each product we demand cannot be considered in a vacuum. We must consider the cost in the environmental context of its production and use.

The prices of goods must reflect the cost of conserving and restoring our environment. The polluters will pay and since "they is us", we will pay.

We will have to develop not only an environmental ethic, but environmental accountancy wherein our product price tags, corporate balance sheets and national income accounts reflect the true cost of doing business, taking into consideration that a quality environment isn't free.

Clearly we must develop new economic indicators that reflect the quality of our life as well as the quantity of our goods and services.

It is at this point that the forces of anti-progress are arrayed.

They contend that we have too long equated progress with growth. In this they are correct.

However, when they insist that the only way to repair our environment is to stop growth, they advocate abandoning human needs.

We must not become so pre-occupied with environmental problems that other pressing human problems are put aside.

But this is what the advocates of zero growth would do.

I say we must as a nation continue to grow with a new emphasis on how we grow rather than on how much we grow.

Perhaps our most compelling assignment is to look away from the Gross National Product toward a more meaningful indicator of true progress. Man cannot live by Gross National Product alone, and we need indicators that reflect man's need for pure air, clean rivers and lakes, and quiet. Nowhere are these reflected in the G.N.P.

On the contrary, if a new factory pollutes a clear stream, the G.N.P. will go up, not only because of the mill's output, but because of expenditures downstream needed to cleanse the befouled water.

I am not an economist, but I am confident that our knowledge is sufficient to provide new indicators, or adjust or append present indicators, to reflect environmental factors and record our true progress not merely the growth of goods and services.

If we fail to re-adjust our thinking and our accounting and make progress along these lines, the arguments for the zero-growth school will be strengthened and the hopes of those who seek not only a better environment, but better housing, jobs, education, and health care as well, will be diminished."

To Senator Prouty the basic approach of government has advanced from the day when it was only a referee among competing resources to the day when the government must be considered the trustee of the environment for all the people.

The Government must administer this trust, not with stop-gap measures to halt specific abuses, but with a clear top priority national goal of a quality environment for all Americans. Simply declaring this goal is not enough in itself. We must channel our wealth into protecting our future.

Man's stewardship over the earth's environment has guided Senator Prouty as a strong supporter of conservation and environmental legislation.

During his entire career in the U.S. Senate, Senator Prouty has consistently supported and voted in favor of the conservation legislation which has come before that body.

Yet Senator Prouty's attention since he entered the Senate has not only been on an national level, but directly in tune with the conservation needs of the Green Mountain State. It is an important fact that Senator Prouty has used his influence to prevent construction of the Victory Dam and Gaysville Dam. For example, just recently Senator Prouty directly opposed the Corps of Engineers efforts to begin work on the Gaysville Dam which was authorized in the 1930's.

When the public works appropriation bill for fiscal 1970 was referred to the Senate, it contained an appropriation of $500,000 for planning of the Gaysville Reservoir. As a result, Senator Prouty contacted the Chairman, Senator Allen Ellender, and the ranking Minority member, Senator Milton Young (N. Dak.) on October 21, 1969, asking that they remove this amount from the appropriation as not being money which should be spent, since the Gaysville Dam was opposed by him and by the people of Vermont.

In the letter of October 21st, Senator Prouty said:

"I write you today, Mr. Chairman, to express my very great opposition to the portion of the public works appropriation bill which provides for construction and planning activity at the site of the Gaysville Dam at Gaysville, Vermont.

"Mr. Chairman, most, if not all, of the beautiful and productive valleys in the Green Mountains of Vermont are scheduled to be inundated with the construction of additional dams to complete an over-all plan designed years ago by the Corps of Engineers. Unfortunately, this concept does not necessarily consider the people of the State of Vermont, nor does it consider the ever more important necessity for retention of our naturally beautiful areas."

He wrote to the other eight Republican members of the Subcommittee and received word in reply that as long as he opposed the dam, they would also oppose it and it was, therefore, removed from the appropriations report when the bill passed the Senate on November 12, 1969.

Senator Prouty also then contacted the House of Representatives members of the appropriations conference and asked that they recede from their position, which they did do.

As a result, the $500,000 planning grant for Gaysville Dam was removed from appropriations in 1970.

Senator Prouty feels that Vermont has given enough of her beautiful valley to flood control that does not benefit Vermont, just submerges her valleys.

Another example of Senator Prouty's work against the flooding of Vermont is his active support to kill the Victory Dam project and save Victory Bog.

Being a resident of the Northeast Kingdom, the Victory Bog and its preservation is important to Senator Prouty. Since entering Congress, he has kept constant tabs on the Victory Dam project. Senator Prouty has worked behind the scenes with Senator Aiken to prevent a dam the people don't want, and the area doesn't need.

Senator Prouty's constant vigilance of the Victory project has prevented the Corps of Engineers from obtaining the necessary authorization or any money for this dam. The Senator is determined to not only prevent this project, as he has been able to do in the past, but to effectively kill the project so that the Corps of Engineers can no longer undertake any planning for the dam as a result of non-Vermont influence that is presently pushing for the dam. Senator Prouty noted that the effective killing of the Victory project will take some time since the project has been in existence for thirty to forty years. The Senator feels that time is on our side as long as the Governor does not authorize the project as happened in 1967.

A compilation of environmental legislation supported by Senator Prouty during his tenure in the United States Senate follows:

THE 86TH CONGRESS

Sept. 9, 1959—H.R. 3510—Amends the Federal Water Pollution Control Act to increase grants for construction of sewage works and for other purposes.

THE 87TH CONGRESS

Sept. 6, 1961—S. 174—Establishes a National Wilderness Preservation System. It established a national wilderness preservation system, limited to Federal lands already withdrawn for recreational use and classified in the following categories: (1) Areas in national forests classified as "wilderness" wild or canoe; (2) areas in national forests classified as primitive; (3) areas in national parks and monuments, each of which embraced at least 5,000 acres without roads, and (4) selected portions of wildlife refuges and game ranges already established.

THE 88TH CONGRESS

April 9, 1963—S. 4—Wilderness Act. Explanation same as S. 174.

October 16, 1963—S. 649—Federal Water Pollution Control Act Amendments of 1963. Establishment of Federal Water Pollution Control Administration within HEW to administer programs under the Federal Water Pollution Control Act of 1961. Authority for the Secretary to regulate the discharge from Federal institutions of waste into waters of the United States

August 12, 1964—H.R. 3846—Land and Water Conservation Fund Act. It created a land and water conservation fund from which appropriations would be made to provide outdoor recreation areas and facilities at State, local and Federal levels.

THE 89TH CONGRESS

January 28, 1965—S. 4—Water Quality Act of 1965. Establishment of Federal Water Pollution Control Administration within HEW to administer programs under the Federal Water Pollution Control Act of 1961.

January 18, 1966—S. 1446—Wild Rivers Act. It established a national wilderness system.

July 12, 1966—S. 3112—Clean Air Act Amendments of 1966. A new grant program was instituted allowing air pollution control agencies up to one-half of the cost of maintaining programs to prevent and control air pollution.

July 14, 1966—S. 2947—Federal Water Pollution Control Act Amendments and Clean Rivers Restoration Act of 1966. Established the clean rivers restoration program as a supplement to the existing water pollution control program for planning and construction of treatment works on a river basin basis.

THE 90TH CONGRESS

July 18, 1967—S. 780—The Air Quality Act of 1967. This measure expanded grants for pollution control programs, and promulgated Federal ambient air quality criteria by which the states would establish standards. The measure also required the Secretary of the Department of Health, Education and Welfare to designate air quality regions, to publish information on control techniques, and to enforce established standards.

August 8, 1967—S. 119—Wild and Scenic Rivers Act. This act classified certain streams possessing outstanding scenic, recreational and other values as wild or scenic rivers to be preserved in a free-owing condition, and protected for the enjoyment of all Americans.

April 29, 1968—S. 1401—An amendment to the Land and Water Conservation Fund Act of 1965, which authorized the annual expenditure of $200 million to finance the acquisition and development of Federal and State recreation areas.

P.L. 90–515, The National Water Commission Act. This act created the National Water Commission for the purpose of making a comprehensive survey of the Nation's water resource problems.

P.L. 90–411. An Amendment to the Federal Aviation Act of 1958. This Act authorized the Federal Aviation Administration to set aircraft noise and sonic boom standards.

THE 91ST CONGRESS

June 26, 1969—S. 1075—The National Environmental Policy Act. This act declares, for the first time in the history of the United States, a policy for environmental management designed to create and maintain conditions under which man and nature can coexist in productive harmony. The bill requires all Federal agencies to take into account the environmental impact of all actions they propose. Specific directives to prevent adverse environmental effects of Federal agency activities are indicated. This new law also created, in the Office of the President, a permanent three-member Council on Environmental Quality. The new Council is modeled after the Council of Economic Advisers, and is authorized an annual appropriation to cover the expenses of a professional staff. The principal functions of the council are to recommend environmental policies to the President and to assist him in the preparation of an annual environmental report to be submitted to the Congress beginning in July, 1970.

June 26, 1969—S. 1076—Youth Conservation Corps. This measure would establish a nationwide Youth Conservation Corps, consisting of young men between 14 and 18 years of age who would participate in supervised summer conservation work and educational projects. This bill recognizes that if the future leaders of this Nation are to be expected to understand that the great out-of-doors has a relevant role in their lives, they must experience the sense of accomplishment in completing a difficult task, of understanding the importance of land and water conservation and management, and of working in programs to assure that future generations will enjoy life in a quality environment. The measure is particularly important to urban youth who, because of the lack of adequate job opportunities, often turn from walking the streets seeking jobs to roaming the streets in pursuit of mischief.

October 8, 1969—S. 7—Water Quality Improvement Act of 1969.

S. 2276—An amendment of the Clean Air Act. The law extends for one year research grants of $45 million in air pollution resulting from fuel combustion.

H.R. 11363—Endangered Species Act. This law described by conservationists as the most important wildlife legislation before the 91st Congress, prohibits the importation or interstate shipment of endangered species of fish and wildlife, and protects alligators.

S. 1830—The Alaska Native Land Claims Settlement Act. The claims of the native people of Alaska to the land and to the resources of Alaska have been a source of conflict between the State of Alaska, the native people of Alaska, and the Federal government for a number of years. This legislation would finally resolve these problems, and also provide an opportunity to lay a foundation for social and economic advancement of Alaska Eskimos, Indians and Aleuts, most of whom live under poorer circumstances than any other Americans. The bill also directs that a study be made of all public lands in Alaska and requires the Secretary of the Interior to recommend areas for inclusion in the National Park System.

H.R. 8794—An amendment to the Marine Resources and Engineering Act, which extends for one year the National Council on Marine Resources and Engineering Development. This legislation provides time for the Council to complete their work, and for Congress to take legislative action on their proposals.

S. 2315—An amendment to the Land and Water Conservation Fund. This measure is designed to continue the Golden Eagle passport program due to expire next March, and also to increase the annual fee from $7 to $10. The bill also would continue the advance contract authority for land acquisitions to deal with the increasingly serious problem of land-cost escalation.

Pending legislation in the 91st Congress which Senator Prouty is cosponsoring and supporting:

S. 3468—Environmental Financing Act of 1970—(Senators Scott and Prouty).

To create an Environmental Financing Authority whose purpose is to assure that inability to borrow necessary funds in the market at reasonable interest rates does not prevent any state or local public body from carrying out a waste treatment work project from receiving a grant by the Secretary of the Interior.

1. Five member board of directors (Secretary, Treasurer, etc.).
2. Initial capital—$100 million.
3. Annual Report submitted to Congress.
4. Audit by provision of government corporation control act.

S. 3466—To amend the Clean Air Act—(Senators Scott and Prouty.)

The bill extends for an additional three years (FY 71–73) the general authorization of appropriation for the "Clean Air Act", as well as to the special appropriation authorization in that Act for research related to fuels and vehicles.

1. Compliance testing and certification of motor vehicles and engines.
2. Registration and regulation of fuels and fuel additives.
3. National Air Quality Standards.
4. Stationary Source Emission Standards.

S. 3469—Waste Reclamation and Recycling Act—(Senators Scott and Prouty.)

To authorize the Council on Environmental Quality to conduct studies and make recommendations respecting the reclamation and recycling of material from solid wastes to extend the provisions of the "Solid Waste Disposal Act".

1. Study of incentives to reuse of materials from solid wastes.
2. Special consideration to the problems of motor vehicles hulks.

S. 3467—To amend the Land and Water Conservation Fund Act of 1965—(Senators Scott and Prouty).

It would amend the Land and Water Conservation Fund Act to insure that the revenues presently available to the Land and Water Conservation Fund will be effectively augmented by the additional receipts which can be expected to result from the concentrated effort to dispose of unneeded Federal real property.

1. To sell surplus land for park and recreation purpose at public benefit discounts up to 100%.
2. GSA could use receipts from sales of surplus land to relocate government agencies.

S. 3470—To amend the Federal Water Pollution Control Act—(Senators Scott and Prouty).

The bill would add a new section five which would clarify the existing language to indicate the basic purpose to be achieved. The techniques available to achieve these purposes and limitation which apply to the use of these techniques. Major emphasis is focused upon effective performance and substantial improvement of state and interstate programs.

S. 3471—To amend the Federal Water Pollution Control Act—(Senators Scott and Prouty).

The bill would amend the declaration of policy in section one of the Act to express concern for the quality of total environment, amend section three to expand the authority of the Secretary of the Interior to develop comprehensive water quality management programs, and strengthen the enforcement authority in section ten. The bill reflects the modern concept of water quality as a vital part of a livable environment and recognizes the interrelationship of all water resources.

S. 3472—To amend the Federal Water Pollution Control Act—(Senators Scott and Prouty).

The bill would amend section eight of the Act to authorize the Secretary of the Interior to incur obligations in the form of grant agreements or otherwise in an aggregate amount of $4 billion ($1 billion per year from FY 71 to FY 75). The bill would revise the allocation formula to provide greater flexibility to meet the most severe water pollution problems and to give an added incentive to the states to fully utilize the funds allocated.

S. 3388—Establish an "Environmental Quality Administration"—(Senators Scott and Prouty).

To establish an independent agency responsible for developing and conducting comprehensive national policies, programs, and activities to improve the quality of the American environment and to insure that the improved quality of the environment is maintained. Transfer many functions for the areas of air, water pollution and solid waste disposal away from department to the new administration. Federal Water Pollution Control Administration and Water Resource

Commission will become part of the Administration. Serve as a clearing function in the pollution program.

S. 3072—The Federal Low Emission Vehicle Procurement Act. This measure would stimulate the development, production and distribution in interstate commerce of low emission motor vehicles in order to provide increased protection against the hazards of vehicle exhaust emission.

S. 3151—The National Environmental Education Act—(Senators Nelson and Prouty).

This measure would provide financial assistance to all levels of education for developing environmental education curricula and for training faculty to teach such courses. Funds are also provided to generate and disseminate environmental education information.

S. 3598—Authorize Federal assistance for Fish and Wildlife and Recreation Development—(Senators Aiken and Prouty).

The bill would authorize the Secretary of Agriculture to share part of the cost of installing public fish and wildlife or recreation development in resources conservation and development projects, and up to half the cost of any needed land, easements, rights-of-way, and basic public facilities.

S. 4076—Humane Seal Protection Act of 1970—(Senators Goodell and Prouty).

Prohibits the clubbing of seals after July 1, 1972, the taking of seal pups, and taking of female seals on Pribilof Islands or on any other land and water under the jurisdiction of the United States.

THE CONSUMER AGRICULTURAL FOOD PROTECTION ACT OF 1970

HON. BURT L. TALCOTT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. TALCOTT. Mr. Speaker, ever since my election to the Congress, and before, I have actively and personally worked to improve agriculture, particularly the working and living conditions of farmworkers.

Our Nation depends on agriculture—nutritionally and economically. Agriculture is our Nation's No. 1 industry. Growers in my congressional district lead the world in productivity, innovation, and progress. Farmworkers in my district, including migrants, receive higher wages, and enjoy better working and living conditions than they can find doing anything else anywhere else in the world.

Still this is not good enough and we are trying to improve our produce, our working and living conditions.

We have many migrant farmworkers who follow the harvests—they are the poorest of the poor and the most disadvantaged of the disadvantaged. Migrancy is their nemesis. Their wages are not disproportionate to their skills, but the cost of moving and the lack of regular employment caused by the vagaries of the harvests, keep them poor.

To help the farmworkers in my district, I have proposed comprehensive legislation to compliment the efforts of the industry, the unions, the local and State governments, as well as the public and private social organizations.

I have introduced, and advocated passage of legislation during several Congresses to provide "impacted aid" to school districts through which the children of migrant farm families must swarm.

I have introduced, and advocated, passage of legislation during several Congresses to provide extra and compensatory bilingual training for the children of farmworkers.

I have cosponsored legislation for manpower training to enable farmworkers and their children to develop skills which will permit them to obtain permanent jobs and to escape the grinding poverty of migrancy.

I have supported legislation to establish supervised day care centers for children of farmworkers. I have introduced legislation during the last two Congresses to require all States to provide workers with benefits comparable to industrial labor benefits, including:

First. Regulation of farm labor housing centers and employer-furnished housing accommodations, including standards of sanitation, location, construction, density, and maintenance of housing.

Second. Regulation of farm labor contractors and crew leaders, requiring annual licensing or registration and prompt payment of wages to laborers, and prohibiting such undesirable employment practices as giving false information on terms, conditions, or the existence of employment.

Third. Regulation of transportation of migratory farmworkers, including standards for safety and operation of equipment, qualifications of drivers, and safety and comfort of riders.

Fourth. Regulation of uniform minimum ages for agricultural employees.

Fifth. Regulation of uniform minimum wages for agricultural employees.

Sixth. Regulation of wage payments requiring regular paydays, payment in cash or readily negotiable form, and prompt payment on termination of work.

Seventh. Workmen's compensation providing monetary and medical benefits to agricultural employees injured on the job.

Eighth. Temporary disability insurance providing benefits for agricultural workers for non-work-connected illnesses or injuries.

Ninth. Unemployment insurance laws providing benefits for agricultural employees during periods of involuntary unemployment.

Tenth. Regulation of field sanitation facilities.

It was only recently that a few other Members of the Congress displayed any interest in unemployment compensation for farmworkers—and this was a superficial "grandstand" last-minute amendment to an industrial compensation bill without any prior committee study or deliberation.

Mr. Speaker, recently, while the farms in a small portion of my congressional district were producing approximately 70 percent of the head lettuce consumed in the United States, most of the farming operations were struck. The harvest, shipment, and distribution of head lettuce was choked to a stop. Thousands of agricultural workers—including harvesters, truckdrivers, packinghouse workers, processors, railroad employees, carton manufacturers, and so on and on—were affected.

Additionally, tons of lettuce spoiled in the fields. Growers and farm suppliers lost thousands of dollars—some face bankruptcy. The price of lettuce to the housewife and restaurateur skyrocketed.

In fact, hundreds of thousands of innocent persons were deprived of an important nutritional food.

Farmworkers, farmers, employees of allied industries and the consumers were injured and harmed. The losses were permanent, unrecoverable. Lost wages cannot be recouped. Spoiled crops cannot be revived.

Such injuries, losses, and waste should not be tolerated by our society. Events which have transpired recently in the Salinas Valley make it incumbent upon me, as the elected Representative of over 500,000 residents of the 12th Congressional District and as the Representative of an agriculture region upon which the 200 million consumers in the United States depend for approximately 30 percent of their principal row crop vegetables, to advocate enactment of agricultural labor management legislation which will protect these consumers from loss or interruption of their nutritional food supply.

Our brains should be applied to develop machinery to resolve farm labor disputes without such permanent injury and unrecoverable losses.

Some ground rules must be adopted at the earliest possible date in order to assure the orderly process of planting, growing, harvesting, and distributing agricultural products so vital to our Nation's health.

Disruptions of the agriculture process, especially of harvests, are quite different from disruptions of a manufacturing process. Assembly lines can often stop and steel ingots and automobiles can be stored or inventoried for weeks without deterioration—as a matter of fact, with an increase in value. No man, group, or government can stem the inexorable process of fruit and vegetable growth and maturation. A strawberry, for instance, must be picked, processed, and packaged within hours of maturity or spoilage begins and losses accelerate.

Agricultural losses are compounded when the processes are interrupted. Even spoiled crops must be picked, or disced under, at additional costs even though they are useless. Vegetables that spoil after harvest while stalled enroute to market, for instance, must be disposed of, as garbage, usually at great cost and without any recoupment.

Farmworkers can least afford a harvesttime strike, with attendant loss of work, because after the crops mature there is no work until the next harvest—which may be months away. Also, harvesttime provides special opportunities for extra work—overtime, additional jobs, longer shifts; when extra work is available, the work stoppages are extraordinarily disastrous for the farmworker.

The flow of farm produce to the consumer is always subject to the exigencies of weather, availability of transporta-

tion, refrigeration, markets—over which the individual farmer and farmworker have no control.

The consumer, when all is said and done, is the ultimate loser in the game of one-upmanship in the current drive to organized agricultural fieldworkers.

Everyone, whether farmer or worker, is a consumer. No self-anointed pressure group, however vocal, should be permitted to force its will on the overwhelming majority of the American people for its own selfish ends.

Obviously an entirely different legal and administrative mechanism—other than the one presently used in settlement of industrial disputes—is necessary for the settlement of disputes in agriculture and the food processing industry.

There are historical, economic, and humanitarian reasons why a Federal Farm Labor Relations Board is necessary. The basic structure of the extant National Labor Relations Board can be useful, but such a Board and its functions and operations must be modified to fit the unique conditions and problems of agriculture, farm labor, and food products.

A unique need is certain—there can be no strike, slow down, or lockout at harvesttime.

I believe strikes and lockouts can be eliminated without jeopardizing the rights or the power of the farmer or the farmworker. I believe a mechanism can be established to protect the farmer, the farmworker, and most importantly the consumer.

Congress should devote its attention toward developing a mechanism to achieve a balance between the demands of agriculture workers and the policies of the farmers in order to protect themselves and the consumer from being exploited or injured.

I have introduced some comprehensive legislation, H.R. 19023, to establish a National Farm Labor Relations Board.

My bill has been drafted with the rights of the individual citizen, the individual consumer in mind. No individual citizen or group is entitled to abridge these rights or to claim favored treatment. A unique feature of this bill prohibits strikes and lockouts. In lieu of strikes and lockouts, I have proposed a Board of Arbitration to expedite the fair settlement of all farm labor disputes. It would be instituted whenever a work stoppage occurs or a labor dispute arises.

The five-man Board of Arbitration would include one representative designated by labor and one representative by management; these two would then jointly select three neutral other members. This Board would assist the parties in reaching a fair settlement of the dispute. If the dispute is not settled within 30 days, the Board would publicly announce the offer of each party which is most favorable to the other party. If the dispute is not settled within 5 days thereafter, the Board will designate the proposal which it considers the more reasonable—not a compromise of the two. The designated proposal will immediately become the agreement of the parties and subject to enforcement by law.

This new legal mechanism will permit the parties to bargain freely; it will provide strong incentives for the parties to bargain promptly and reasonably.

Union representation, collective bargaining, and all other benefits and privileges of conventional labor-management relations are available and encouraged—excepting the strike and lockout.

Most labor-management experts recognize that the strike and lockout are outmoded and barbaric techniques for solving problems in a civilized society. Violence and interference with the rights of third parties must be avoided in labor-management relations just as in other aspects of societal living. Harvesttime work stoppages and interruptions of our food supply must be minimized.

A fair, reasonable, and workable mechanism to replace the strike and lockout is the key feature of my bill.

Time is of the essence. The disruption of the harvest and orderly flow of agricultural products from the farm to the consumer is wasteful, costly, and injurious to the farmer, the farmworker, and the consumer.

It is past time for platitudinous rhetoric, but time for sincere, practical solutions to the problems arising in farm employer-employee relations.

I solicit any objective appraisal of the proposal which I have submitted. I am convinced that the individual agricultural worker will quickly realize that my proposal can settle the emotional as well as the practical disputes.

The text of my bill, H.R. 19023, follows. I welcome the cooperation and counsel of anyone interested in fair farm labor legislation:

H.R. 19023

A bill to be known as the Consumer Agricultural Food Protection Act of 1970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

SHORT TITLE

This Act may be cited as the "Consumer Agricultural Food Protection Act of 1970".

STATEMENT OF FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) The Congress hereby finds—

(1) that the production and distribution of an adequate supply of food at reasonable prices is essential to the health and welfare of the people of the United States;

(2) that the food industry of the United States from grower to consumer is, and has proved itself to be, capable of satisfying the desires and needs of the American consumer with wholesome products at reasonable prices;

(3) that the food industry of the United States has developed under a system in which the role of government has been to build a legal framework in which our competitive system operates to make available abundant quantities of healthful, appetizing food to all Americans at just and fair prices;

(4) that in recent decades there have been dramatic changes in farm technology and productivity and transportation in the preservation and distribution of food products; and

(5) that, because of these changes, the legal structure guaranteeing our food supply must be strengthened in order to maintain the free flow of agricultural products from the farms of the United States to the consumer of such products and to assure that all who have a public or economic interest in the strengthening of this framework, including consumers, agricultural employees and employers, are fairly treated.

(b) The Congress further finds—

(1) that orderly and peaceful relationships between labor organizations representing or seeking to represent agricultural employees and employers of those employees are essential to protect the availability, quality, and price of food products;

(2) that any interruption in those orderly and peaceful relationships between labor organizations and agricultural employers which interferes with the activities of neutral employers and employees who transport, prepare for market, and market agricultural products unfairly jeopardizes the fulfillment of the needs of consumers for adequate food supplies at reasonable prices; and

(3) that coercive or restrictive pressures on consumers of agricultural products unjustly jeopardizes the rightful interest of consumers in such food supplies.

(c) The Congress also finds that agricultural employees are entitled to the right to organize and bargain collectively, if they so wish, in order to establish fair and equitable terms and conditions of employment while maintaining an orderly and peaceful employment relationship.

(d) Because of the perishability of agricultural products and the essential role they play in the health and well-being of our country, the Congress further finds that it is necessary to enact legislation specifically designed to establish an equitable balance between the interests of consumers, agricultural employees, and employers and thereby to protect the production and distribution of food supplies for consumers by establishing a legal system encompassing that production and distribution.

(e) It is hereby declared to be the purpose and policy of this Act, through the exercise by the Congress of its power to regulate commerce among the several States and with foreign nations, (1) to encourage and promote the normal flow of agricultural products produced on the farms of the United States, and to protect the consumers of such products, by providing safeguards for the production and distribution of agricultural products against interruption of the peaceful relationships between labor organizations representing or seeking to represent agricultural employees and the employers of such employees, and (2) to provide an orderly system under which agricultural workers may organize and bargain collectively, if they so wish, which is compatible with the public interest in assuring to consumers adequate and wholesome food supplies.

DEFINITIONS

SEC. 3. When used in this Act—

(1) The term "person" includes one or more individuals, labor organizations, partnerships, associations, corporations, legal representatives, trustees, trustees in bankruptcy, or receivers.

(2) The term "agriculture" includes farming in all its branches which is in commerce or which affects commerce and, among other things, shall include the cultivation and tillage of the soil; dairying; the production, cultivation, growing, and harvesting of any agricultural or horticultural commodity (including commodities defined as agricultural commodities in section 15(g) of the Agricultural Marketing Act, as amended); the raising of livestock, bees, or poultry; and any practices (including any forestry or lumbering operations) performed by a farmer or on a farm as an incident to or in conjunction with farming operations, including the preparation of any agricultural commodity for market, delivery of any such commodity for storage or to market or to a carrier for transportation to market, and any activity connected with providing housing and food for persons employed in agriculture.

(3) The term "employer" includes any person acting as an agent of an employer,

directly or indirectly, but shall not include the United States.

(4) The term "agricultural employer" means any employer engaged in agriculture affecting commerce who, during any calendar quarter during the preceding calendar year, used more than 500 man-days of agricultural labor. Such term shall also include any person who provides labor and services on one or more farms as independent contractor if such person, during any calendar quarter during the preceding calendar year, provided more than five hundred man-days of agricultural labor. In calculating the average number of agricultural employees employed by an agricultural employer or provided by an independent contractor, one hour or more of employment in any one day shall be considered one man-day and three hundred man-days shall be considered one man-year.

(5) The term "employee" includes any employee of a particular employer and shall also include any individual whose work has ceased as a consequence of, or in connection with, any current labor dispute or because of any unfair labor practice, and who has not obtained any other regular and substantially equivalent employment; but such term shall not include any individual—

(a) employed by his parent, spouse, or by an immediate relative;

(b) having the status of an independent contractor;

(c) employed as a supervisor, or in a confidential capacity or as a clerical employee, or as a guard;

(d) employed as a professional or technical employee;

(e) who has quit, been discharged, or been laid off from work and has no reasonable expectancy of being recalled to work within sixty days from the date of lay off; or

(f) who is a tenant or sharecropper and responsibly directs or shares in the management of an enterprise engaged in agriculture.

(6) The term "agricultural employee" means any employee who is employed by a particular agricultural employer and who has been so employed for at least fourteen workdays during the preceding thirty calendar days and has been employed by that employer or another agricultural employer for at least one hundred workdays during the preceding calendar year. If otherwise qualified, a person shall be considered an agricultural employee if the employer pays the wages of the employee and the work is performed for the employer's benefit or on his behalf, even though the supervision, bookkeeping, and the issuance of payroll checks is by a person other than the employer. In calculating a workday of an agricultural employee, one hour or more of employment in any one day shall be considered a workday.

(7) The term "farm" means any enterprise engaged in agriculture which is operated from one headquarters where the utilization of labor and equipment is determined and which, if consisting of separate tracts of land, are within a fifty-mile radius of the headquarters.

(8) The term "representative" includes any individual or labor organization.

(9) The term "labor organization" means any organization of any kind, or any agency or employee representation committee or plan, in which employees, as defined in this Act or in the National Labor Relations Act, as amended (29 U.S.C. 151–168), participated and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

(10) The term "commerce" means trade, traffic, commerce, transportation, or communication among the several States, or between the District of Columbia or any territory of the United States and any State or other territory, or between any foreign country and any State, territory, or the District of Columbia, or within the District of Columbia or any territory, or between points in the same State but through any other State or any territory or the District of Columbia or any foreign country.

(11) The term "affecting commerce" means in commerce, or burdening or obstructing commerce or the free flow of commerce, or having led or tending to lead to a labor dispute burdening or obstructing commerce or the free flow of commerce.

(12) The term "unfair labor practice" means any unfair labor practice listed in section 206 of this Act.

(13) The term "labor dispute" includes any controversy between an agricultural employer and his agricultural employees concerning terms, tenure, or conditions of employment, or concerning the association or representation of persons in negotiating, fixing, maintaining, changing, or seeking to arrange terms or conditions of employment.

(14) The term "Farm Labor Relations Board" means the Farm Labor Relations Board provided for in section 201 of this Act.

(15) The term "superior" means any individual having authority, in the interest of the employer, to hire, transfer, suspend, lay off, recall, promote, discharge, assign, reward, or discipline other employees, or responsibility to direct them, or to adjust their grievances, or effectively to recommend such action, if in connection with the foregoing the exercise of such authority is not of a merely routine or clerical nature, but requires the use of independent judgment.

(16) The term "professional employee" means—

(a) any employee engaged in work (i) predominantly intellectual and varied in character as opposed to routine mental, manual, mechanical, or physical work; (ii) involving the consistent exercise of discretion and judgment in its performance; (iii) of such a character that the output produced or the result accomplished cannot be standardized in relation to a given period of time; (iv) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or a hospital, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine, mental, manual, or physical processes; or

(b) any employee, who (i) has completed the courses or specialized intellectual instruction and study described in clause (iv) of paragraph (a), and (ii) is performing related work under the supervision of a professional person to qualify himself to become a professional employee as defined in paragraph (a).

(17) In determining whether any person is acting as an "agent" of another person so as to make such other person responsible for his acts, the question of whether the specific acts performed were actually authorized or subsequently ratified shall not be controlling.

(18) The term "ultimate consumer" shall mean the person who purchases an agricultural product for consumption.

TITLE I—PROTECTION OF AGRICULTURAL PRODUCTS

PROHIBITED ACTS

SEC. 101. It shall be unlawful—

(a) For any labor organization or its agents or for any person acting on behalf of a labor organization or to further the objective of a labor organization—

(1) to induce or encourage any individual employed by any person engaged in commerce or in an industry affecting commerce to engage in a strike or a refusal to use, process, transport, display for sale, sell, or otherwise handle or work on any agricultural commodity after such commodity leaves the farm or situs where grown or produced, or to picket or threaten to picket any other person;

(2) to threaten, restrain, or coerce any person; or

(3) to enter into or maintain any contract, combination, or conspiracy with any employer, labor organization, or other person where an object of any of the foregoing conduct, directly or indirectly, is to force, require, or persuade—

(a) any person to cease or refrain from using, selling, displaying for sale, processing, transporting, or otherwise dealing in any agricultural commodity;

(b) any person to enter into any unlawful agreement pertaining to the production, processing, transporting, marketing, or sale of any agricultural commodity;

(c) any agricultural employer to recognize or bargain with a labor organization as the representative of his employees unless such labor organization has been certified as the representative of such employees after a valid secret ballot election;

(d) any agricultural employer to assign particular work to employees in a particular labor organization or in a particular trade, craft, or class rather than to employees in another labor organization or in another trade, craft, or class; or

(e) any employer or self-employed person engaged in agriculture or in an industry affecting agriculture to join any labor or employer organization.

(b) For any person—

(1) to induce or encourage the ultimate consumer of any agricultural commodity, unless such inducement or encouragement is limited to honest, truthful, and undeceptive publicity and specifically identifies the producer of such commodity; or

(2) to restrain, coerce, or threaten such ultimate consumer, where an object thereof is to force, require, or persuade such ultimate consumer not to purchase, consume, or use such agricultural commodity. Permissible inducement or encouragement within the meaning of paragraph (b)(1) shall not include publicity of any kind if such publicity identifies the producer of an agricultural commodity by, or is directed against, any trademark, trade name, or generic name which may include products of another producer or user of such trademark, trade name, or generic name, and shall not include picketing at a retail establishment.

(c) For any person to initiate, participate in, conspire to, or threaten a strike, picketing, or refusal to perform work, in whole or in part, at a farm (i) if such action will result in a cessation of operations necessary to prevent the loss, spoilage, deterioration, or reduction in grade, quality, or marketability of an agricultural commodity in commercial quantities or (ii) if there is then in effect a collective bargaining agreement with respect to labor performed or to be performed at that farm by agricultural employees.

(b) For any person to picket or cause to be picketed, or threaten to picket or cause to be picketed, any employer where an object thereof is to induce, encourage, force, or require (i) an agricultural employer to recognize or bargain with a labor organization as the representative of his employees, or (ii) the employees of an agricultural employer to accept or select such labor organization as their collective bargaining representative, unless such labor organization is currently certified as the representative of such employees—

(A) where the employer has lawfully recognized in accordance with this Act any other labor organization and a question concerning representation may not appropriately be raised under section 207(c) of this Act;

(B) where within the preceding twelve months a valid election under section 207(c) of this Act has been conducted; or

(C) where a petition has been filed under section 207(c) of this Act.

COURT JURISDICTION

SEC. 102. (a) Whoever shall be aggrieved or shall be injured in his business or property by reason of any violation of section 101 of this Act may sue in any district court of the United States, without respect to the amount in controversy or without respect to the citizenship of the parties, or in any other court having jurisdiction of the parties, and shall recover damages and cost of the suit. Upon the filing of such suit the court shall have jurisdiction to grant such injunctive relief or temporary restraining order as it deems just and proper, notwithstanding any other provision of law. Petitions for such injunctive relief or temporary restraining orders shall be heard expeditiously. Petitions for temporary restraining orders alleging a violation of section 101(c) shall be heard forthwith and, if the petition alleges that substantial and irreparable injury to the petitioner is unavoidable, such temporary restraining orders may be issued without notice and shall continue in effect until the court has heard and ruled upon a request for a temporary injunction.

(b) For the purposes of this title, district courts of the United States shall have jurisdiction of a labor organization (1) in the district in which such organization maintains its principal office, or (2) in any district in which its duly authorized officers or agents are engaged in promoting or protecting the interests of employee members or in the solicitation of prospective members.

(c) The service of summons, subpena, or other legal process of any court of the United States upon an officer or agent of a labor organization, in his capacity as such, shall constitute service upon the labor organization.

(d) Any labor organization which represents employees as defined in this Act or in the National Labor Relations Act, as amended (29 U.S.C. 151–168), in an industry affecting commerce and any employer whose activities affect commerce as defined in this Act shall be bound by the acts of its agents. Any such labor organization may sue or be sued as an entity and in behalf of the employees whom it represents in the courts of the United States. Any money judgment against a labor organization in a district court of the United States shall be enforcible only against the organization as an entity and against its assets, and shall not be enforcible against any individual member or his assets.

(e) For the purposes of this section, in determining whether any person is acting as an agent of another person so as to make such other person responsible for his acts, the question of whether the specific acts performed were actually authorized or subsequently ratified shall not be controlling and any person acting on behalf of a labor organization or to further the objective of a labor organization shall be deemed to be acting as an agent of that labor organization. Nothing in this section shall be deemed to preclude an agent being sued both in his capacity as an agent and as an individual.

SEC. 103. (a) It shall be unlawful for any person to threaten or engage in arson, mass picketing, libel, slander, injury to person or damage to property, or other violent conduct where an object is to prevent the display for sale, selling, or transportation of any agricultural commodity.

ESTABLISHMENT OF BOARD; TERMS OF MEMBERS; GENERAL COUNSEL

SEC. 201. (a) There is hereby established a board which shall be known as the Farm Labor Relations Board (hereinafter referred to as the "Board") and which shall consist of three members.

(b) There shall be in the Department of Agriculture an Assistant Secretary for Farm Labor Relations who shall be a member of the Board and shall serve as its Chairman. The Assistant Secretary for Farm Labor Relations and the two additional members of the Board shall be appointed by the President, by and with the advice and consent of the Senate. One of the two additional members shall be appointed for a term of ten years, and the other for a term of five years; and their successors shall be appointed for terms of ten years each, except that any individual appointed to fill a vacancy of any such additional member shall be appointed only for the unexpired term of the member whom he is succeeding. The two additional members of the Board may be removed from office by the President upon notice and hearing for neglect of duty or malfeasance in office, but for no other cause.

(c) There shall be a General Counsel of the Board who shall be appointed by the President, by and with the advice and consent of the Senate. The General Counsel shall have final authority, on behalf of the Board, with respect to the investigation of charges and the issuance of complaints under section 208, and with respect to the prosecution of such complaints by the Board, and shall have such other duties as the Board may prescribe or as may be provided by law.

(d) Each member of the Board and the General Counsel of the Board shall be eligible for reappointment and shall not engage in any other business, vocation, or employment. The duties of the Assistant Secretary for Farm Labor Relations shall be limited to those duties set out in this Act.

(e) A vacancy in the Board shall not impair the right of the remaining members to exercise all of the powers of the Board and two members shall, at all times, constitute a quorum of the Board. The Board shall have an official seal which shall be judicially recognized.

(f) The principal office of the Board shall be in the District of Columbia, but it may meet and exercise any or all of its powers at any other place.

(g) (1) Section 5315 of title 5, United States Code, is amended by striking out "(11) Assistant Secretaries of Agriculture (3)." and inserting in lieu thereof the following:

"(11) Assistant Secretaries of Agriculture (4)."

(2) Such section is further amended by adding at the end thereof the following:

"(92) Members, Farm Labor Relations Board (except Assistant Secretary of Agriculture for Farm Labor Relations).

"(93) General Counsel of the Farm Labor Relations Board."

AUTHORITY OF BOARD; DELEGATION OF AUTHORITY

SEC. 202. (a) The Board may, by one or more of its members or by such agents or agencies as it may designate, prosecute any inquiry necessary to its functions in any part of the United States. A member of the Board who participates in any such inquiry shall not be disqualified from subsequently participating in a decision of Board in the same case.

(b) The Board shall have authority from time to time to make, amend, and rescind, in the manner prescribed in sections 551–559 of title 5, United States Code, such rules and regulations as may be necessary to carry out the provisions of this title.

(c) The Board is authorized to delegate to such regional or area offices of the Department of Agriculture as it deems appropriate its powers under section 207 to determine the unit appropriate for the purpose of collective bargaining as defined in section 207(b), to investigate and provide for hearings, and to determine whether a question of representation exists, and to direct an election or take a secret ballot under subsection (c) or (e) of section 207 and certify the results of such election; but the Board may review any action, taken pursuant to the authority delegated under this subsection, by any regional or area officer upon a request for a review of such action filed with the Board by any interested party. Any such review made by the Board shall not, unless specifically ordered by the Board, operate as a stay of any action taken by the regional or area officer. The entire record considered by the Board in considering or acting upon any such request or review shall be made available to all parties prior to such consideration or action and the Board's findings and action thereon shall be published as a decision of the Board.

OFFICERS AND EMPLOYEES OF THE BOARD

SEC. 203. (a) The Board shall have authority to appoint an executive secretary and such attorneys, hearing officers, trial examiners, and other employees as it may from time to time find necessary for the proper performance of its duties.

(b) The Board may not employ any attorney for the purpose of reviewing transcripts of hearings, or preparing drafts of opinions, except that any attorney employed for assignment as a legal assistant to any Board member may for such Board member review such transcripts and prepare such drafts.

(c) No trial examiner's report shall be reviewed, either before or after its publication, by any person other than a member of the Board or his legal assistant, and no trial examiner shall advise or consult with the Board with respect to exceptions taken to his findings, rulings, or recommendations.

(d) The Board may establish or utilize such regional, local, or other agencies, and utilize such voluntary and uncompensated services, as may from time to time be needed.

(e) Attorneys appointed under this section may, at the discretion of the Board, appear for and represent the Board in any case in court.

(f) Nothing in this title shall be construed to authorize the Board to appoint individuals for the purpose of conciliation or mediation, or for economic analysis.

EXPENSES OF THE BOARD

SEC. 204. All of the expenses of the Board, including all necessary traveling and subsistence expenses outside the District of Columbia incurred by the members or employees of the Board under its orders, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the Board or any individual it designates for that purpose.

RIGHTS OF EMPLOYEES

SEC. 205. (a) Except as provided in subsection (b) of this section, agricultural employees shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection except to the extent that such right may impair the rights of aggrieved or injured persons under title I of this Act, and shall also have the right to refrain from any or all of such activities except to the extent that such right may be affected by an agreement requiring membership in a labor organization as a condition of employment as authorized in section 206 (a) (3).

UNFAIR LABOR PRACTICES

SEC. 206. (a) It shall be an unfair labor practice for an agricultural employer—

(1) to interfere with, restrain, or coerce employees in the exercise of the rights guaranteed in section 205;

(2) to dominate or interfere with the formation or administration of any labor organization or contribute financial or other support to it: *Provided*, That, subject to rules and regulations made and published by the Board pursuant to section 204, an agricultural employer shall not be prohibited from permitting employees to confer with him during working hours without loss of time or pay;

(3) by discrimination in regard to hire or tenure of employment or any term or condi-

tion of employment to encourage or discourage membership in any labor organization: *Provided*, That nothing in this Act, or in any other statute of the United States, shall preclude an agricultural employer from making an agreement with a labor organization (not established, maintained, or assisted by any action defined in section 206(a) of this Act as an unfair labor practice) to require as a condition of employment membership therein on or after the thirtieth day following the beginning of such employment or the effective date of such agreement, whichever is the later, (i) if such agreement is lawful under applicable State laws, (ii) if such labor organization is the representative of the employees as provided in section 207(a), in the appropriate collective-bargaining unit covered by such agreement when made, and (iii) unless following an election held as provided in section 207(e) within one year preceding the effective date of such agreement, the Board shall have certified that at least a majority of the employees eligible to vote in such election have voted to rescind the authority of such labor organization to make such an agreement: *Provided further*, That no agricultural employer shall justify any discrimination against an employee for nonmembership in a labor organization (A) if he has reasonable grounds for believing that such membership was not available to the employee on the same terms and conditions generally applicable to other members, or (B) if he has reasonable grounds for believing that membership was denied or terminated for reasons other than the failure of the employee to tender the periodic dues and the initiation fees uniformly required as a condition of acquiring or retaining membership;

(4) to discharge or otherwise discriminate against an employee because he has filed charges or given testimony under this Act;

(5) to refuse to bargain collectively with the representatives of his employees, subject to the provisions of section 207; *Provided*, That nothing in this Act shall be construed as requiring an agricultural employer to bargain collectively until a representative of his employees has been determined by means of a valid secret ballot election conducted in accordance with the provisions of section 207.

(b) It shall be an unfair labor practice for a labor organization or its agents—

(1) to restrain or coerce (A) agricultural employees in the exercise of the rights guaranteed in section 205: *Provided*, That this paragraph shall not impair the right of a labor organization to prescribe its own rules with respect to the acquisition or retention of membership therein: *Provided further*, That it shall be an unfair labor practice under this section for a labor organization to threaten or impose any fine or other economic sanction against any person in the exercise of rights under this Act (including but not limited to the right to refrain from any or all concerted activity, to refrain from compliance with a union rule, policy, or practice which establishes or affects wages, hours, or working conditions at such person's place of employment, or to invoke the processes of the Board); or (B) an agricultural employer in the selection of his representatives for the purposes of collective bargaining or the adjustment of grievances;

(2) to cause or attempt to cause an agricultural employer to discriminate against an employee in violation of subsection (a)(3) or to discriminate against an employee with respect to whom membership in such organization has been denied or terminated on some ground other than his failure to tender the periodic dues and the initiation fees uniformly required as a condition of acquiring or retaining membership;

(3) to refuse to bargain collectively with an agricultural employer, provided it is the representative of his employees subject to the provisions of section 207(a);

(4) to engage in any activity or conduct defined as unlawful in title I of this Act but nothing in this subsection (b) shall be construed as limiting the rights of aggrieved or injured persons under title I of this Act;

(5) to require of employees covered by an agreement authorized under subsection (a)(3) the payment, as a condition precedent to becoming a member of such organization, of a fee in an amount which the Board finds excessive or discriminatory under all of the circumstances. In making such a finding, the Board shall consider, among other relevant factors, the practices and customs of labor organizations in the particular industry, the expected duration of employment, and the wages currently paid to the employees affected;

(6) to cause or attempt to cause an agricultural employer—

(A) to pay or deliver or agree to pay or deliver any money or other things of value for services which are not performed or not to be performed;

(B) to establish or alter the number of employees to be employed or the assignment thereof; or

(C) to assign work to the employees of a particular employer;

(7) to fail to furnish each of its members, within ninety-one days after the close of each of its fiscal years, with a copy of a report setting forth its receipts and disbursements during its preceding fiscal year and its financial condition at the end of that year, together with the report of an audit of the foregoing conducted by a certified public accountant.

(c) The expressing of any views, argument, opinion, or the making of any statement (including expressions intended to influence the outcome of an organizing campaign, a bargaining controversy, a strike lockout, or other labor dispute), or the dissemination thereof, whether in written, printed, graphic, visual, or auditory form, if such expression contains no threat of reprisal or force or promise of benefit, shall not (i) constitute or be evidence of an unfair labor practice under any of the provisions of this title, or (ii) constitute grounds for, or evidence justifying, setting aside the results of any election conducted under any of the provisions of this title. A statement of fact by either a labor organization or an employer relating to existing or proposed operations of the employer or to terms, tenure, or conditions of employment with the employer shall not be considered to constitute a threat of reprisal or force or promise of benefit. No employer shall be required to furnish or make available to a labor organization, and no labor organization shall be required to furnish or make available to an employer, materials, information, time, or facilities to enable such employer or labor organization, as the case may be, to communicate with employees of the employer, members of the labor organization, its supporters, or adherents.

(d)(1) For the purposes of this section, to bargain collectively is the performance of the mutual obligation of the employer and the representative of the employees to meet at reasonable times and confer in good faith with respect to wages, hours, and other terms and conditions of employment which directly affect work of the employees, or the negotiation of an agreement, or any question arising thereunder, or any question concerning the furnishing of necessary and relevant information, if any, requested by the other party in connection with the negotiation of an agreement or any issue arising under such agreement, or requiring as a condition for entering into an agreement the giving of a bond by either party in a sum adequate to compensate the other party for loss caused by breach of the agreement and the execution of a written contract incorporating any agreement reached if requested by either party. The failure or refusal of either party to agree to a proposal, or to the making, changing or withdrawing of a lawful proposal, or to make a concession shall not constitute, or be evidence, direct or indirect, of a breach of this obligation; nor shall the Board in any remedial order direct either party to make any concession or agree to any proposal or to make any payment of money except to employees who are reinstated with back pay as provided in section 208(c)(1). This section shall not require any employer to bargain collectively with respect to any decision, not prohibited by other provisions of this Act, or to discontinue, contract out, sell, lease, or otherwise change, modify, or dispose of his farm, equipment, or operations, or any part thereof, or to determine the methods, equipment and facilities to be used in producing agricultural products or the agricultural products to be produced.

(2) Where there is in effect a collective-bargaining contract covering employees in an industry affecting commerce, the duty to bargain collectively shall also mean that no party to such contract shall terminate or modify such contract, unless the party desiring such termination or modification—

(A) serves a written notice upon the other party to the contract of the proposed termination or modification sixty days prior to the expiration date thereof, or in the event such contract contains no expiration date, sixty days prior to the time it is proposed to make such termination or modification;

(B) offers to meet and confer with the other party for the purpose of negotiating a new contract or a contract containing the proposed modifications;

(C) notifies the Federal Mediation and Conciliation Service within thirty days after such notice of the existence of a dispute, and simultaneously therewith notifies any State or territorial agency established to mediate and conciliate disputes within the State or territory where the dispute occurred, provided no agreement has been reached by that time; and

(D) continues in full force and effect, without resorting to strike or lockout, all the terms and conditions of the existing contract for a period of sixty days after such notice is given or until the expiration date of such contract, whichever occurs later.

The duties imposed upon employers, employees, and labor organizations by paragraphs (A), (B), and (C) shall become inapplicable upon an intervening certification of the Board, under which the labor organization or individual, which is a party to the contract, has been superseded as or ceased to be the representative of the employees subject to the provisions of section 207(a), and the duties so imposed shall not be construed as requiring either party to discuss or agree to any modification of the terms and conditions contained in a contract for a fixed period, if such modification is to become effective before such terms and conditions can be reopened under the provisions of the contract. Any employee who engages in a strike within the sixty-day period specified in this subsection shall lose his status as an employee of the employer engaged in the particular labor dispute, for the purposes of sections 206, 207, and 208 of this Act, as amended, but such loss of status for such employee shall terminate if and when he is reemployed by such employer.

REPRESENTATIVES AND ELECTIONS

SEC. 207. (a) Representatives selected by a secret ballot for the purposes of collective bargaining by the majority of the agricultural employees in a unit appropriate for such purposes, shall be the exclusive representatives of all the agricultural employees in such unit for the purposes of collective bargaining in respect to rates of pay, wages, hours of employment, or other conditions of employment: *Provided*, That any individual employee or a group of employees shall have the right at any time to present grievances

to their employer and to have such grievances adjusted, without the intervention of the bargaining representative, as long as the adjustment is not inconsistent with the terms of a collective-bargaining contract or agreement then in effect: *Provided further,* That the bargaining representative has been given opportunity to be present at such adjustment. No person may serve as an officer of any labor organization which agricultural employees are given the right to join under section 205 of this Act unless he is elected as such by secret ballot in election which is conducted by, and whose results are certified by, the Farm Labor Board.

(b) The unit appropriate for the purposes of collective bargaining shall consist of all agricultural employees of an agricultural employer working at the farm or processing facility where such employer grows, produces, processes, or packages agricultural products unless the persons filing a petition under this section and the employer involved agree that a different unit is also an appropriate bargaining unit.

(c)(1) Whenever a petition shall have been filed, in accordance with such regulations as may be prescribed by the Board—

(A) by an agricultural employee or group of agricultural employees or any individual or labor organization acting in their behalf alleging that a substantial number of agricultural employees (i) wish to be represented for collective bargaining and that their employer declines to recognize their representative as the representative defined in section 207(a), or (ii) assert that the individual or labor organization, which has been certified or is being currently recognized by their employer as the bargaining representative, is no longer a representative as defined in section 207(a); or

(B) by an agricultural employer, alleging that one or more individuals or labor organizations have presented to him a claim to be recognized as the representative defined in section 207(a) or that an individual or labor organization which has previously been certified as the bargaining representative is no longer a representative; the Board shall investigate such petition and if it has reasonable cause to believe that a question of representation affecting commerce exists shall provide for an appropriate hearing upon due notice. If the Board finds upon the record of such hearing that such a question of representation exists, it shall direct an election by secret ballot and shall certify the results thereof. The date of such election shall be set at a time when the number of temporary employees entitled to vote does not exceed the number of permanent employees entitled to vote.

(2) In determining whether or not a question of representation affecting commerce exists, the same regulations and rules of decision shall apply irrespective of the identity of the persons filing the petition or the kind of relief sought or whether the persons filing such petition did so in good faith. In no case shall the Board deny a labor organization a place on the ballot by reason of an order with respect to such labor organization or its predecessor not issued in conformity with section 208(c).

(3) No election shall be directed in any bargaining unit or any subdivision within which, in the preceding twelve-month period, a valid election shall have been held. Employees engaged in an economic strike who are not entitled to reinstatement shall be eligible to vote under such regulations as the Board shall find are consistent with the purposes and provisions of this Act in any election conducted within three months after the commencement of the strike. In any election where none of the choices on the ballot receives a majority, a runoff shall be conducted, the ballot providing for a selection between the two choices receiving the largest and second largest number of valid votes cast in the election. An agricultural employee who has voted in a valid election shall not be eligible to vote in any election at the farm of another agricultural employer in the same geographical area for a period of twelve months thereafter. Any agricultural employee who shall be found to have sought or accepted employment for the purposes of affecting the outcome of an election shall not be eligible to vote in an election conducted pursuant to the provisions of this Act for a period of twelve months.

(4) Nothing in this section shall be construed to prohibit the waiving of hearings by stipulation for the purpose of a consent election in conformity with regulations and rules of decision of the Board.

(d) Whenever an order of the Board made pursuant to section 208(c) is based in whole or in part upon facts certified following an investigation pursuant to subsection (c) of this section and there is a petition for the enforcement or review of such order, such certification and the record of such investigation shall be included in the transcript of the entire record required to be filed under section 208(e) or 208(f), and thereupon the decree of the court enforcing, modifying, or setting aside in whole or in part the order of the Board shall be made and entered upon the pleadings, testimony, and proceedings set forth in such transcript. The court shall not enforce any order of the Board which rests, in whole or in part, upon evidence adduced from witnesses who have not testified under oath and who have not been subject to cross-examination by opposing parties.

(e)(1) Upon the filing with the Board, by 30 per centum or more of the agricultural employees in a bargaining unit covered by an agreement between their employer and a labor organization made pursuant to section 206(a)(3), of a petition alleging the desire that such authority be rescinded, the Board shall take a secret ballot of the employees in such unit and certify the results thereof to such labor organization and to the employer.

(2) No election shall be conducted pursuant to this subsection in any bargaining unit or any subdivision within which, in the preceding twelve-month period, a valid election shall have been held.

PREVENTION OF UNFAIR LABOR PRACTICES

SEC. 208. (a) The Board is empowered, as hereinafter provided, to prevent any person from engaging in any unfair labor practice (listed in section 206) affecting commerce. This power shall not be affected by any other means of adjustment or prevention that has been or may be established by agreement, law, or otherwise.

(b) Whenever it is charged that any person has engaged in or is engaging in any such unfair labor practice, the Board, or any agent or agency designated by the Board for such purposes, shall have power to issue and cause to be served upon such person a complaint stating the charges in that respect, and containing a notice of hearing before the Board or a member thereof, or before a designated agent or agency, at a place therein fixed, not less than five days after the serving of said complaint: *Provided,* That no complaint shall issue based upon any unfair labor practice occurring more than six months prior to the filing of the charge with the Board and the service of a copy thereof upon the person against whom such charge is made, unless the person aggrieved thereby was prevented from filing such charge by reason of service in the Armed Forces, in which event the six-month period shall be computed from the day of his discharge. Any such complaint may be amended by the member, agent, or agency conducting the hearing or the Board in its discretion at any time prior to the issuance of an order based thereon. The person so complained of shall have the right to file an answer to the original or amended complaint and to appear in person or otherwise and give testimony at the place and time fixed in the complaint. In the discretion of the member, agent, or agency conducting the hearing or the Board, any other person may be allowed to intervene in the said proceeding and to present testimony. Any such proceeding shall, so far as practicable, be conducted in accordance with the rules of evidence applicable in the district courts of the United States under the rules of civil procedure for the district courts of the United States, adopted by the Supreme Court of the United States pursuant to the Act of June 19, 1934 (28 U.S.C. 723–B and C).

(a) The testimony taken by such member, agent, or agency or the Board shall be reduced to writing and filed with the Board. Thereafter, in its discretion, the Board upon notice may take further testimony or hear argument. If upon the preponderance of the testimony taken the Board shall be of the opinion that any person named in the complaint has engaged in or is engaging in any such unfair labor practice, then the Board shall state its findings of fact and shall issue and cause to be served on such person an order requiring such person to cease and desist from such unfair labor practice, and to take such affirmative action including reinstatement of employees with or without back pay, as will effectuate the policies of this title: *Provided,* That where an order directs reinstatement of an employee, back pay may be required of the employer or labor organization, as the case may be, responsible for the discrimination suffered by him: *And provided further,* That in determining whether a complaint shall issue alleging a violation of section 206(a)(1) or section 206(a)(2), and in deciding such cases, the same regulations and rules of decision shall apply irrespective of whether or not the labor organization affected is affiliated with a labor organization national or international in scope. Such order may further require such person to make reports from time to time showing the extent to which it has complied with the order. If upon the preponderance of the testimony taken the Board shall not be of the opinion that the person named in the complaint has engaged in or is engaging in any such unfair labor practice, then the Board shall state its findings of fact and shall issue an order dismissing the said complaint. No order of the Board shall require the reinstatement of any individual as an employee who has been suspended or discharged, or the payment to him of any back pay, if such individual was suspended or discharged for cause. In case the evidence is presented before a member of the Board, or before an examiner or examiners thereof, such member, or such examiner or examiners, as the case may be, shall issue and cause to be served on the parties to the proceedings a proposed report, together with a recommended order, which shall be filed with the Board, and if no exceptions are filed within twenty days after service thereof upon such parties, or within such further period as the Board may authorize, such recommended order shall become the order of the Board and become effective as therein prescribed.

(d) Until the record in a case shall have been filed in a court, as hereinafter provided, the Board may at any time upon reasonable notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any finding or order made or issued by it.

(e) The Board shall have power to petition any court of appeals of the United States, or if all the courts of appeals to which application may be made are in vacation, any district court of the United States, within any circuit or district, respectively, wherein

the unfair labor practice in question occurred or wherein such person resides or transacts business, for the enforcement of such order and for appropriate temporary relief or restraining order, and shall file in the court the record in the proceedings, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, the court shall cause notice thereof to be served upon such person, and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to grant such temporary relief of restraining order as it deems just and proper, and to make and enter a decree enforcing, modifying, and enforcing as so modified, or setting aside in whole or in part the order of the Board. No objection that has not been urged before the Board, its member, agent, or agency, shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The findings of the Board with respect to questions of fact if supported by substantial evidence on the record considered as a whole shall be conclusive. If either party shall apply to the court for leave to adduce additional evidence and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the hearing before the Board, its member, agent, or agency, the court may order such additional evidence to be taken before the Board, its member, agent, or agency, and to be made a part of the record. The Board may modify its findings as to the facts, or make new findings, by reason of additional evidence so taken and filed, and it shall file such modified or new findings, which findings with respect to questions of fact if supported by substantial evidence on the record considered as a whole shall be conclusive, and shall file its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with it the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the same shall be subject to review by the appropriate United States court of appeals if application was made to the district court as hereinabove provided, and by the Supreme Court of the United States upon writ of certiorari or certification as provided in section 1254 of title 28, United States Code.

(f) Any person aggrieved by a final order of the Board granting or denying in whole or in part the relief sought may obtain a review of such order in any circuit court of appeals of the United States in the circuit wherein the unfair labor practice in question was alleged to have been engaged in by filing in such court a written petition praying that the order of the Board be modified or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Board, and thereupon the aggrieved party shall file in the court the record in the proceeding, certified by the Board, as provided in section 2112 of title 28, United State Code. Upon the filing of such petition, the court shall proceed in the same manner as in the case of an application by the Board under subsection (e) of this section, and shall have the same jurisdiction to grant to the Board such temporary relief or restraining order as it deems just and proper, and in like manner to make and enter a decree enforcing, modifying, and enforcing as so modified, or setting aside in whole or in part the order of the Board; the findings of the Board with respect to questions of fact if supported by substantial evidence on the record considered as a whole shall in like manner be conclusive.

(g) The commencement of proceedings under subsection (e) or (f) of this section shall not, unless specifically ordered by the court, operate as a stay of the Board's order.

(h) When granting appropriate temporary relief or a restraining order, or making and entering a decree enforcing, modifying, and enforcing as so modified, or setting aside in whole or in part an order of the Board, as provided in this section, the jurisdiction of courts sitting in equity shall not be limited by the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes", approved March 23, 1932 (29 U.S.C. 101–115).

(i) Petitions filed under this title shall be heard expeditiously, and if possible within ten days after they have been docketed.

(j) The Board shall have power, upon issuance of a complaint as provided in subsection (b) charging that any person has engaged in or is engaging in an unfair labor practice, to petition any district court of the United States (including the District Court of the United States for the District of Columbia), within any district wherein the unfair labor practice in question is alleged to have occurred or wherein such person resides or transacts business, for appropriate temporary relief or restraining order. Upon the filing of any such petition the court shall cause notice thereof to be served upon such person, and thereupon shall have jurisdiction to grant to the Board such temporary relief or restraining order as it deems just and proper.

(k) Whenever it is charged that any person has engaged in an unfair labor practice within the meaning of paragraph 206(b)(4), the preliminary investigation of such charge shall be made forthwith and given priority over all other cases except cases of like character in the office where it is filed or to which it is referred. If, after such investigation, the officer to whom the matter may be referred has reasonable cause to believe such charge is true and that a complaint should issue, he shall, on behalf of the Board, petition any district court of the United States (including the District Court of the United States for the District of Columbia) within any district where the unfair labor practice in question has occurred, is alleged to have occurred, or wherein the person alleged to have committed the unfair labor practice resides or transacts business, for appropriate injunctive relief pending the final adjudication of the Board with respect to such matter. Upon the filing of any such petition the district court shall have jurisdiction to grant such injunctive relief or temporary restraining order as it deems just and proper, notwithstanding any other provision of law: *Provided further*, That no temporary restraining order shall be issued without notice unless a petition alleges that substantial and irreparable injury to the charging party will be unavoidable and such temporary restraining order shall be effective for no longer than five days and will become void at the expiration of such period. Upon filing of any such petition, the courts shall cause notice thereof to be served upon any person involved in the charge and such person, including the charging party, shall be given an opportunity to appear by counsel and present any relevant testimony: *Provided further*, That for the purposes of this subsection district courts shall be deemed to have jurisdiction of a labor organization (1) in the district in which such organization maintains its principal office, or (2) in any district in which its duly authorized officers or agents are engaged in promoting or protecting the interests of employee members. The service of legal process upon such officer or agent shall constitute service upon the labor organization and make such organization a party to the suit.

INVESTIGATORY POWERS

SEC. 209. For the purposes of all hearings and investigations, which, in the opinion of the Board, are necessary and proper for the exercise of the powers vested in it by section 207 and section 208—

(1) The Board, or its duly authorized agents or agencies, shall at all reasonable times have access to, for the purpose of examination, and the right to copy any evidence of any person being investigated or proceeded against that relates to any matter under investigation or in question. The Board, or any member thereof, shall upon application of any party to such proceedings, forthwith issue to such party subpenas requiring the attendance and testimony of witnesses or the production of any evidence in such proceeding or investigation requested in such application. Within five days after the service of a subpena on any person requiring the production of any evidence in his possession or under his control, such person may petition the Board to revoke, and the Board shall revoke, such subpena if in its opinion the evidence whose production is required does not relate to any matter under investigation, or any matter in question in such proceedings, or if in its opinion such subpena does not describe with sufficient particularity the evidence whose production is required. Any member of the Board, or any agent or agency designated by the Board for such purposes, may administer oaths and affirmations, examine witnesses, and receive evidence. Such attendance of witnesses and the production of such evidence may be required from any place in the United States or any Territory or possession thereof, at any designated place of hearing.

(2) In case of contumacy or refusal to obey a subpena issued to any person, and district court of the United States or the United States courts of any Territory or possession, or the District Court of the United States for the District of Columbia, within the jurisdiction of which the inquiry is carried on or within the jurisdiction of which said person guilty of contumacy or refusal to obey is found or resides or transacts business, upon application by the Board shall have jurisdiction to issue to such person an order requiring such person to appear before the Board, its member, agent, or agency, there to produce evidence if so ordered, or there to give testimony touching the matter under investigation or in question; and any failure to obey such order of the court may be punished by said court as a contempt thereof.

(3) No person shall be excused from attending and testifying or from producing books, records, correspondence, documents, or other evidence in obedience to the subpena of the Board, on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture; but no individual shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testifying or produce evidence, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

(4) Complaints, orders, and other process and papers of the Board, its member, agent, or agency, may be served either personally or by registered mail or by telegraph or by leaving a copy thereof at the principal office or place of business of the person required to be served. The verified return by the individual so serving the same setting forth the manner of such service shall be proof of the same, and the return post office receipt or telegraph receipt therefor when registered and mailed or telegraphed as aforesaid shall be proof of service of the same. Witnesses summoned before the Board, its members, agent, or agency, shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and

the persons taking the same shall severally be entitled to the same fees as are paid for like services in the courts of the United States.

(5) All process of any court to which application may be made under this Act may be served in the judicial district wherein the defendant or other person required to be served resides or may be found.

(6) The several departments and agencies of the Government, when directed by the President, shall furnish the Board, upon its request, all records, papers, and information in their possession relating to any matter before the Board.

SEC. 210. Any person who shall willfully resist, prevent, impede, or interfere with any member of the Board or any of its agents or agencies in the performance of duties pursuant to this Act shall be punished by a fine of not more than $5,000 or by imprisonment for not more than one year, or both.

LIMITATIONS

SEC. 211. (a) Nothing herein shall prohibit any individual employed as a supervisor from becoming or remaining a member of a labor organization, but no employer subject to this Act shall be compelled to deem individuals defined herein as supervisors as employees for the purpose of any law, either national or local, relating to collective bargaining.

(b) Nothing in this Act shall be construed as authorizing the execution of application of agreements requiring membership in or the making of any payments to a labor organization as a condition of employment in any State or territory in which such execution or application is prohibited by State or territorial law.

(c) Nothing in this Act shall be deemed to prevent or bar any agency or the courts of any State or territory (including the Commonwealth of Puerto Rico, Guam, and the Virgin Islands) from assuming and asserting jurisdiction over labor disputes not subject to this Act.

SEC. 212. Wherever the application of the provisions of section 272 of chapter 10 of the Act entitled "An Act to establish a uniform system of bankruptcy throughout the United States", approved July 1898, and Act amendatory thereof and supplementary thereto (11 U.S.C. 672), or the provisions of the National Labor Relations Act, as amended (29 U.S.C. 151–168), conflicts with the application of the provisions of this Act, this Act shall prevail; but in any situation where the provisions of such other Acts shall remain in full force and effect.

SEC. 213. If any provision of this Act, or the application of such provision to any person or circumstances, shall be held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

SEC. 214. The provisions of this title shall become effective one hundred and eighty days after the date of enactment of this Act.

TITLE III—CONCILIATION OF LABOR DISPUTES IN INDUSTRIES AFFECTING COMMERCE

SEC. 301. The Federal Mediation and Conciliation Service (hereinafter referred to as the "Service") established pursuant to title II of the Labor Management Relations Act, 1967 (29 U.S.C. 171), shall furnish assistance to parties in labor disputes involving agricultural employers and employees and their representatives, including the services of mediators familiar with agricultural operations.

SEC. 302. In order to prevent or minimize interruptions of the free flow of commerce growing out of labor disputes, agricultural employers and employees and their representatives shall—

(1) exert every reasonable effort to make and maintain agreements concerning rates of pay, hours, and working conditions, including provision for adequate notice of any proposed change in the terms of such agreements;

(2) whenever a dispute arises over the terms or application of a collective-bargaining agreement and a conference is requested by a party or prospective party thereto, arrange promptly for such a conference to be held and endeavor in such conference to settle such dispute expeditiously; and

(3) in case such dispute is not settled by conference, participate fully and promptly in such meetings as may be undertaken by the Service for the purpose of aiding in a settlement of the dispute.

TITLE IV—SUITS BY AND AGAINST LABOR ORGANIZATIONS

SEC. 401. Suits for violation of contracts between an agricultural employer and a labor organization representing agricultural employees, or between any such labor organizations, may be brought as provided in section 301 of the Labor-Management Relations Act, 1947.

SEC. 402. In an action brought under section 401 to enforce an agreement not to strike, picket, or lock out, such court shall have power to grant such relief (including injunction or temporary restraining order) as it deems just and proper and its jurisdiction to grant such relief shall not be limited by the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes", approved March 23, 1932 (29 U.S.C. 101–115) or any other provision of law.

TITLE V—RESTRICTIONS ON PAYMENTS TO EMPLOYEE REPRESENTATIVES

SEC. 501. Restrictions on payments to employee representatives set forth in section 302 of the Labor-Management Relations Act, 1947, shall be applicable to agricultural employers or associations of agricultural employers and representatives of agricultural employees.

TITLE VI—ARBITRATION OF DISPUTES IN LIEU OF STRIKE OR LOCKOUT

SEC. 601. No agricultural employer or agricultural employee shall, as a result of a labor dispute, carry on any strike or lockout, but in lieu thereof each such employer and employee shall have the right to avail himself of the procedure provided in this title for the settlement of the dispute.

SEC. 602. If either an agricultural employer or the representative of his agricultural employees believes that a labor dispute between the employer and such employees cannot be resolved by collective bargaining the employer or the representative may give notice to the other party and in such notice designate one (1) individual as his representative to serve on the board of arbitration. Upon receipt of such a notice, the other party may designate one (1) individual to serve as his representative on such board. The two representatives so designated shall as soon as practicable select three (3) additional individuals to serve on such board. In the event the representatives of the parties are unable to agree upon one or more additional individuals to serve on the board, such additional individuals shall be appointed by, but not from, the Farm Labor Relations Board.

In the event one party fails or refuses to designate a representative to serve on the board or in the event a duly designated representative fails or refuses to act under the provisions of this title, then the Federal Labor Relations Board shall designate a representative to act for the party until the party shall designate an individual who will act as such representative.

SEC. 603. The board of arbitration, immediately upon the designation of the five individuals who are to be its members, shall endeavor to obtain an agreement between the parties, but in the event the dispute has not been resolved within thirty days from the time the notice referred to in section 602 was given, the board shall announce the terms and conditions of the offer made by each side which is most favorable to the other. Within five days from the date of such announcement if the dispute is not sooner resolved, the board of arbitration shall designate which one of the two offers it believes to be the more reasonable considering all the circumstances surrounding the dispute.

SEC. 604. The offer designated as provided in section 602 shall be deemed to be in full force and effect for a term not to exceed twenty-four months without further modification of its terms (except by agreement of the parties), and shall be considered a contract between the parties for the purpose of section 401.

HEALTH

HON. PETER H. DOMINICK

OF COLORADO

IN THE SENATE OF THE UNITED STATES

Tuesday, August 25, 1970

Mr. DOMINICK. Mr. President, much is said about what needs to be done to improve our health care system. I have served on the committee handling this matter with my good friend the Senator from Vermont (Mr. PROUTY), his ability and leadership in this field are clearly seen by his record to date and show clearly the tremendous value which his continued service will provide. I ask unanimous consent that a summary of his record on health legislation be printed in the Extensions of Remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SENATOR WINSTON PROUTY AND HEALTH CARE FOR ALL AMERICANS

Our nation is experiencing a health crisis with a rapidly rising demand for health care services and an inadequate supply of health facilities and personnel.

A member of the Senate Health Subcommittee, Senator Prouty has provided continuing leadership in health legislation.

He helped draft the major health programs of the 1960s and is now revising the legislation for the 1970s.

HEALTH MANPOWER

The Health Professions Educational Assistance Act, the Nurse Training Act and the Allied Health Professions Personnel Training Act were developed and reviewed and revised with Senator Prouty playing a major role each step of the way. His experience in education and manpower training, combined with his understanding of our nation's health needs, has enabled him to contribute significantly to health manpower and education programs.

Prouty has never hesitated to propose bold and innovative programs. He is an author of the Veterans in Allied Health Professions and Occupations Act of 1969. This Prouty measure provides training for veteran "medics" to serve in civilian health roles.

Prouty also co-sponsored a measure to provide $100 million in emergency assistance to the nation's financially troubled medical schools.

Both these measures were passed by the Senate as part of the extension of the Allied Health Professions Personnel Training Act of 1966.

Senator Prouty is a co-sponsor of the National Health Service Corps of 1970. This measure would set up a VISTA-type program within the Public Health Service.

The National Health Service Corps would provide a framework within which the idealism and social commitment of our young

health professionals and medical school students can be put to work in rural and urban areas short of health personnel.

Senator Prouty also co-sponsored the Family Practice Act of 1970, which has passed the Senate. This measure authorizes a $457 million five-year program of grants to medical schools and hospitals to encourage and promote the training of medical and paramedical personnel in the field of family medicine.

While supporting the measure's intent, Senator Prouty was concerned that the bill's restrictions might hinder the progress of the Family Practice Program at the Medical College, University of Vermont. Consequently, Senator Prouty, revised the bill so it provides $10 million annually for special developmental grants to enable a medical school such as Vermont's to build on its existing family practice programs.

Another bill co-sponsored by Senator Prouty focuses on the shortage of family physicians. "The Family Physician Scholarship and Fellowship Program Act", when enacted, will provide special assistance to young men and women who agree to practice in areas designated as physician-shortage areas. The four-year scholarship and loan program recognizes the particular need for family physicians. At present only 15 percent of medical school graduates plan to enter general practice. The bill will provide incentives for medical students to enter general practice in the areas where such practitioners are particularly needed.

The Vermont Republican is not content with merely setting up programs, therefore, he has consistently pressed for adequate appropriations for health manpower programs to educate and train doctors, nurses and medical technicians.

Looking to the future, Senator Prouty continues to press for new patterns of federal assistance to the nation's medical, dental and nursing schools. Prouty envisions a form of assistance which encourages rather than discourages innovation and initiative.

HEALTH FACILITIES

The Hill-Burton program provides the basic federal support for hospitals and other health facility construction.

Senator Prouty has consistently pressed to make this program more responsive to the needs of Vermont.

Hill-Burton funds are allocated to the states on a formula basis, with each state receiving a minimum allotment. Senator Prouty successfully raised this minimum allotment from $750,000 to $1.2 million, thus providing Vermont an additional $450,000 for hospital construction each year.

Prouty also discovered that complicated regulations hampered Vermont's spending of the funds and he amended the Hill-Burton Act to remove these expenditure restrictions. Thanks to Senator Prouty, Vermont will not have to turn back any Hill-Burton funds as it has in the past.

In 1968, Prouty realized that grant assistance was not enough and he co-sponsored an amendment to the Hill-Burton Act to provide for federal guarantees of hospital loans with interest subsidies. In 1970, such provisions were enacted, thus easing the community burden of financing a hospital.

Realizing that emergency care begins not in the emergency room but where the patient is, Prouty drafted an emergency treatment provision of the Hill-Burton Act to provide federal grants for improved emergency transportation systems. These grants would stress innovation such as helicopter ambulances.

While pleased with his accomplishments to date, Senator Prouty noted at the May second ground-breaking ceremonies for the Northeastern Vermont Regional Hospital that further modifications of the Hill-Burton program are necessary to simplify the federal grant structure.

HEALTH RESEARCH

Senator Prouty has continually supported the activities of the National Institutes of Health and sufficient funding to retain our nation's health research momentum.

Senator Prouty has been concerned that while some health research must be undertaken in huge urban complexes, the National Institutes of Health must not overlook smaller research facilities. In 1970 when research funds were scarce, Prouty, the ranking Republican on the National Science Foundation Subcommittee, brought to the Foundation's attention the excellent cancer research at the Putnam Memorial Hospital Institute for Medical Research. The Foundation's review of the Institute's work led to the support of the Institute in 1970. Thus Bennington remains a vital center for cancer research.

Senator Prouty has consistently helped researchers at the Medical College, University of Vermont, obtain research grants and thus continue the excellent work and reputation of the College.

HEALTH CARE DELIVERY

"Health research is not an end in itself, the results must be applied," Prouty insists. And he has sought to provide new and innovative ways of bolstering the delivery of health care to everyone.

Prouty helped enact the Regional Medical Program legislation of 1965, which led to the establishment of the Northern New England Regional Medical Program.

This program has set up a system of coronary care units throughout Vermont. However, the Program, based in Burlington, wants to expand its activities and assist regional planning efforts for efficient health care delivery systems.

Prouty was particularly encouraged by the excellent efforts of the Connecticut Valley Health Compact and sought to provide expanded authority to allow the two programs to work together.

The Vermont Republican was able to redraft legislation to provide greater flexibility for local initiatives.

HEALTH PLANNING

The Partnership for Health Act of 1966 provided for federal assistance for health planning purposes at the state and local level. Senator Prouty, who helped draft the initial legislation, this year sought to bring the health planning agencies which set health strategy into a closer working relationship with the Regional Medical Program which provides tactical assistance to communities. Prouty's efforts have succeeded and he looks forward to a pilot project in Vermont testing new ways of bringing together the existing medical resources to provide every Vermonter adequate health care.

MENTAL HEALTH AND RETARDATION

The Senate Health Subcommittee in 1963 drafted the first comprehensive approach to mental retardation and mental health. The Mental Retardation Facilities and Community Mental Health Facilities Construction Act of 1963 was an important first step.

However, in the seven years since its enactment, Senator Prouty realized that much improvement was needed in our efforts to aid those with developmental disabilities or emotional problems.

Consequently, Prouty worked toward creating a new federal assistance program to states and communities for developing and maintaining appropriate services and facilities for the mentally retarded.

The programs set up by the Development Disability Services and Facilities Construction Act of 1970 are similar in approach to the Community Mental Health Centers approach.

To Senator Prouty, the Community Mental Health Center Program is "perhaps the best program to come out of the 1960's." Prouty is determined to build on the program's successes. He and other members of the Senate Health Subcommittee drafted legislation on expanding assistance for operating the Centers with extra assistance for poverty areas.

As enacted into Law, the Community Mental Health Centers Amendments of 1970 represent a significant increase in federal support to the centers.

While the support has been expanded, Senator Prouty believes that the next extension of the program should provide for perpetual federal support of these centers which have gained great community support.

COMMUNICABLE DISEASE CONTROL

While the Partnership for Health Act of 1966 was supposed to take care of communicable disease programs, it became apparent that an additional approach was needed, particularly in view of the possible outbreak of another rubella (German Measles) epidemic. Prouty and other members of the Senate Health Subcommittee worked out the Communicable Disease Control and Vaccination Assistance Amendments of 1969, which provides funds for state and local programs for controlling tuberculosis, diphtheria and other communicable diseases.

ALCOHOLISM

About fifty million Americans are directly or indirectly affected by the disease of alcoholism. Senator Prouty has recognized the need to bolster efforts to prevent the spread of alcoholism and treat and rehabilitate those affected by alcoholism.

Prouty contributed to the expansion of the Community Mental Health Center program to include specific projects for alcoholism. However, it became apparent that increased efforts were needed, and co-sponsored the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 to provide a bold and comprehensive approach to alcoholism, yet one that can be carried through the Community Mental Health Centers and other community agencies.

Prouty worked on the measure to insure that it provided some funds to each state to gear up a program to combat alcoholism.

DRUG ABUSE

Senator Prouty realizes that growing drug use and abuse is not merely a matter of law enforcement and education. While he has supported measures to increase the penalties for those selling dangerous drugs and drafted legislation to provide educational programs to prevent drug use, Senator Prouty has also co-sponsored a bill to provide a comprehensive program for treatment and rehabilitation of drug abusers.

The Prouty co-sponsored measure, known as the Federal Drug Abuse and Drug Dependent Prevention, Treatment and Rehabilitation Act of 1970, will provide federal support for coordinating state and local plans to respond fully to mounting drug abuse.

FAMILY PLANNING

Senator Prouty believes that family planning assistance should be available to all who want such assistance. He has co-sponsored legislation to assist state and local voluntary family planning programs. In the Health Subcommittee he helped draft a measure which coordinates family planning programs and population research in the Office of Population Affairs in the Department of Health, Education and Welfare.

The Prouty-sponsored legislation provides for training of family planning personnel, construction of family planning centers and allocates money to the states for voluntary family planning programs.

HEALTH APPROPRIATIONS

In 1968 with Senator Prouty's assistance, education programs were exempted from any statutory spending limitations. This move sets a clear priority for education. In June

of 1969 when this provision was successfully defended, Senator Prouty supported a similar provision for health programs. This amendment to exempt health programs was narrowly defeated in the Senate. Subsequently, Senator Prouty, joined a bi-partisan effort to achieve this exemption for health programs. The effort succeeded and now most health programs are exempted from statutory budget ceilings. Health funds appropriated must be spent.

NATIONAL HEALTH INSURANCE

There is much talk about national Health Insurance. Several proposals are pending in Congress which bear price-tags of up to $37 billion annually. Senator Prouty is aware that neither Medicare nor Medicaid has proven adequate to meet an exploding demand for health care or to control a rapid and inflationary escalation of health care costs. The situation is much the same for private health insurance. Although 85 percent of the American people have some form of private health insurance, such insurance covers only a third of their health care expenditures.

Senator Prouty is convinced these gaps must be filled. Like his colleagues on the Health Subcommittee, who have continued to study our health care system, he knows that we must continue to develop the capacity of the system through planning, innovation and accelerated health manpower programs. His record in this regard is as progressive as that of any member of Congress. His proposals have been far reaching for he knows that we must move toward an adequate health insurance system for all Americans. He knows that we must increase the supply of quality health-care services as we increase the demand for such services.

Senator Prouty is not committed to any one of the several national health insurance proposals pending. Each, he feels, demands careful study and consideration.

For this reason Senator Prouty joined a majority of his colleagues on the Health Subcommittee in support of an amendment requiring reports on various national health-care plans. The amendment instructs the Secretary to develop through utilization of the systems analysis method, alternative plans for health-care systems. Under the amendment the alternative plans must be submitted to Congress by June 30, 1971. A second part of the amendment requires a cost and coverage report on pending national health insurance proposals before December 31, 1970.

Senator Prouty believes we must proceed with our study of alternative health-care proposals as we revamp and expand our health-care system. Senator Prouty will continue to propose and press for innovative health-care programs.

VERMONT HEALTH CARE

Senator Prouty maintains close contact with Vermont's health officials and community programs. Vermont's health needs and the responsiveness of federally-supported programs in Vermont are of prime importance to Senator Prouty in forging new health programs.

Senator Prouty is proud of the efforts of Vermonters in community responses to health needs. He seeks to continue to build on these successes in attacking our health care failings.

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

How long?

THE SILENT MAJORITY

HON. THOMAS M. REES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. REES. Mr. Speaker, those who defend President Nixon's policies in Southeast Asia are fond of saying that the silent majority of Americans—including the majority of America's young people—are also in support of the President's policies.

There is nothing, in my judgment, which could be farther from the truth. The vast majority of America's young people, particularly, are saddened and disturbed by the continuing moral and military disaster in Southeast Asia.

To emphasize the point that opposition to the war is broadly based among the young, I am pleased to insert in the RECORD the following petition signed by 12 district presidents of the California Association of Student Councils, including the president, vice president, and secretary of the State association:

DISTRICT 19, THE CALIFORNIA ASSOCIATION OF STUDENT COUNCILS

The undersigned, acting under only their own consciences, are presidents of various districts of the California Association of Student Councils.

A declaration by concerned individuals against the war to the U.S. Senate and the U.S. House of Representatives:

We, the undersigned, being of the philosophy that continuing and expanding the war in Southeast Asia is illegal and immoral, declare our dissent from the existing national policies.

We dissent from the actions of our internal security forces which blunt our sense and turn the ordinary acts of daily life into a painful struggle.

We dissent from the monstrous absurdity of a world where nations stand poised to destroy one another and men must kill their fellow man.

Name	District	Area
Steve Ross	19	Los Angeles County.
Richard Johnson [1]	8	Monterey-Salinas.
Jan Passovoy	21	Orange County.
Steve Halasey	CASC State	Vice president.
Regina Catterin	7A	San Mateo County.
Larry Maguire	11	Napa and Solano Counties.
Bruce Lymburn	21	ASB president, Newport. Harbor High.
Robert Sharrah	14	Fresno and Madera Counties.
Joe Peixoto	7B	Santa Clara County.
Cathernie McCauley [2]	8	Monterey County.
Dan Manley	20	Los Angeles County.
George Rojas	13	San Joaquin County.
John Savage	12B	Butte and six other counties. North of Sacramento.

[1] Richard Johnson is the CASC State president.
[2] Catherine McCauley is the CASC State secretary.

RESIGNATION OF DR. LEE DuBRIDGE

HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. DADDARIO. Mr. Speaker, it is with genuine regret that I note the departure of Dr. Lee A. DuBridge from his office as the President's Science Adviser. Dr. DuBridge has served his country long and well, not only in academic research and teaching, but in vital defense research which he conducted during the second World War in the field of radar development. As president of the California Institute of Technology from 1946 through 1968, he led that institution to new pinnacles of excellence, and contributed significantly to the success of the U.S. space program. His professional and civic activities are too numerous to mention but I should like to point out that he has made invaluable contributions to our major scientific and philanthropic institutions, in the arts as well as in the sciences.

Dr. DuBridge assumed the post of Presidential Science Adviser at a most difficult time in the history of our Nation. Since World War II we have seen an unprecedented expansion of scientific activities in the United States. This was initially spurred by the realities of the cold war, and later fueled by American reaction to Sputnik. The goal of manned exploration of the moon, first initiated by President Kennedy, reached its culmination during Dr. DuBridge's tenure in office.

A number of circumstances have made the past few years extremely difficult for those of us concerned about the welfare of American science. Dr. DuBridge has had to contend with fickle currents of history, a new romanticism if you will, which has blindly castigated the rationalism of science and condemned the massive applications of technology which it has made possible. Some have criticized him for continuing to defend large budgets for scientific research, development, and education. Others, within the scientific community, have complained that he acquiesced in damaging reductions in support for American science. I believe both are wrong, and that within the context of the times in which we live, Dr. DuBridge has done as much as anyone in his position could possibly have done to maintain the scientific leadership of our country.

Many of us believe that our country has reached a watershed in our Government-science relationship. Now is the time of changing national goals. Science has attained the very difficult objectives determined for it in the fields of defense and space during the decades of the 1950's and the 1960's. It now faces new challenges in the civilian sphere of interest, such as the complex ecological and social problems which we face. The Federal Government, which was so successful in attaining those goals it set for science in the defense and space fields, has been unable to keep up with the public expectations in these new and quite different areas. We have not, so far,

properly focused our scientific and technical expertise on solutions for these problems facing our society. Ironically, because of this we are finding over the last few years American support for scientific research and development has been reduced drastically, thus further increasing the gap between expectation and accomplishment.

Dr. DuBridge has performed an important public service in his untiring efforts to cope with these knotty problems during this frustrating period for American science. His stature, dignity, and good judgment have been invaluable.

This does not, however, mean that I am pessimistic concerning the future of science in our Nation. To those who believe that our ecological and social crises are the result of the misapplication of science and technology, I would say that these problems can be cured only by increasing the intelligent application of an ever more sophisticated use of these tools. During this transition the President's Science Adviser will continue to play a vital role.

Our subcommittee has had a constructive relationship with Dr. DuBridge and his staff, as well as with his predecessors, during the past years. With the appointment of his successor, Dr. Edward E. David, Jr., we look forward to mutually helpful relationships of equal value in the future. I think it is appropriate that during this period in our national life where increasing emphasis is placed upon the application of scientific knowledge to practical social problems, that an engineer of the competence of Dr. David be selected for this post. I would expect, however, that this in no way indicates a lessening emphasis by the Nixon administration upon the role of basic research in the attainment of our national goals. Our Nation has no alternative to a continued commitment to the basic sciences if we are to retain our security and our preeminent position in the technology-intensive sector of the world market place.

To Dr. DuBridge I offer congratulations for a job well done, and heartiest best wishes for a rich retirement. I am pleased to note that his influence in our national policies respecting the support of science will continue to be felt as a result of his new appointment as a member of the President's Science Advisory Committee.

I look forward to further mutually beneficial relationships between the Subcommittee on Science, Research, and Development and the President's Office of Science and Technology. The subcommittee has always worked closely with OST and will continue to do whatever it can to insure the success of Dr. David in his new and extremely important post during the coming years.

ENCHAINED CZECHOSLOVAKIA

HON. JOHN O. MARSH, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. MARSH. Mr. Speaker, time tames our indignations of the moment, and it may be that this usually is for the best.

Two years ago, we were revulsed by the cruel spectacle of bloody repression of freedom in Czechoslovakia by the military might of the Soviet Union. If our national fidelity to the principle of individual liberty is not to become flawed, this unhappy memory must not pale.

Czechs and Slovaks in the unhappy homeland continue to feel the tightening screws of Communist conformism, and sadness at the plight of relatives and friends dilutes the relief of the exiles who have found asylum.

We shall be in recess a week from today—August 21—the anniversary of the Soviet occupation, but we can spare a moment for reflection on that sad anniversary in recognition of the sacrifices made by Czechs and Slovaks over the years in their struggle to gain and retain freedom.

In our preoccupation with current crises in the world, we must not forget that Czechoslovakia remains a captive nation, the overwhelming majority of whose people, outwardly resigned to the regimen of Communist masters, still tend zealously in their hearts secret fires of liberty.

VISITS IOWA'S SCHOOLS

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CULVER. Mr. Speaker, in the 6 years I have been privileged to represent Iowa's Second District in Congress I have visited most high schools in the district at least once every 2 years. I have had the chance to meet with the students and discuss their plans and aspirations. I have been very pleased to note how many of them are heading for institutions of higher learning.

Our Nation can be justly proud of its system of colleges and universities, which provide for the youth of America, educational opportunities unexcelled anywhere on this planet. This is a time, however, when these institutions are being faced with growing pressures from a number of different directions. One of the most critical of these comes from skyrocketing costs and the necessity of finding a way of paying for them in a manner which will enable all our children to benefit.

Education is an investment. It is an investment in the future well-being of our country. Through better preparation and training our men and women will become productive citizens, capable of using modern technology to produce the goods and services which contribute to our national prosperity. They will also gain exposure to other ways of life and acquire the understanding essential if our Nation is to remain strong.

But it is an expensive investment. The costs of running and maintaining a university are rising at an alarming rate, forcing up the fees which the institution must charge each student for room, board, and tuition. For example, the University of Iowa recently was forced to raise its tuition and fees by over 66 percent from 1968 to 1969 and 1970 to 1971. In calculating the total cost of 1 year at college, of course, one must add to these expenses the amount which could have been earned by the student if he were not studying. When he was president of the University of Iowa, Howard R. Bowen estimated that the total cost of 1 year of college during the academic year 1968–69 was $6,566.

The problem of paying for higher education is likely to become much greater in the next decade. By 1980 it has been estimated that there will be at least 11 million students, or more than double the present figure. Operating costs, faculty salaries, and the cost of new construction will continue to increase. The difficulties of the State-supported institutions are compounded by the scarcity of State funds and by demands made upon them by other pressing needs.

The increased costs are falling more heavily upon the individual student and his family. Traditionally, each student has paid 20 to 25 percent of the total costs, but more recently his share has been about one-third of the total.

These trends pose grave problems for our Nation, if we are to continue to provide high quality education and at the same time realize the goal of equal opportunity for all qualified students. As tuition and other costs increase, many talented youth will find themselves unable to afford a college unless substantial assistance is available.

The Federal Government is already bearing a large part of the cost of higher education, and most experts in the field agree that it must continue to do so in the future, if the quality of education in the United States is to remain high. At the present time, Federal programs for higher education consist of direct assistance to the institutions and assistance to the student. There are four main programs in the latter category:

Educational opportunity grants, which provide funds for low-income students on a matching basis with the college or university.

Work-study programs, which provide employment for low-income students on the campus or college community in jobs of public interest.

National defense student loans, from Government funds and repayable after graduation or the termination of education.

Guaranteed loans, from private sources, administered by the banks, in which the Government pays the loan interest while the student is in college.

Following President Nixon's message to the Congress on higher education, the character of these programs has been the subject of intensive debate. Changes are being carefully considered in Congress at the present time, but it is not likely that the debate will be resolved before the 92d Congress convenes in 1971.

The deliberations center upon the three major problems of the existing programs:

Inadequate funds, which have forced colleges to turn away applicants;

Uncertainty for the student, who cannot predict how much aid he is going to receive; and

Inequity in funding, which many times finds students who need it most, not getting enough money.

The outcome of this debate will be of the utmost importance, since it is likely to determine Federal policies on higher education for much of this decade.

EQUAL RIGHTS

HON. THOMAS M. REES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. REES. Mr. Speaker, the passage of the equal rights amendment by Congress this year should not blind this House to the fact that a great many women feel that equality between the sexes is not enough, and that working women particularly need greater protection under the law.

In this regard, I have received a petition signed by approximately 400 southern California women, members of the Workshop of Working Women, setting forth a seven-point program for legislative action.

Clearly, they speak from the heart in calling upon the Congress to enact their program. I urge all Members of this House to give their petition the most careful consideration.

The petition follows:

PETITION OF THE WORKSHOP OF WORKING WOMEN

A mounting work crisis is developing for working women. In the coming highly technical, computerized society, many work roles are becoming or about to become obsolete, particularly in the clerical or white collar field where the largest numbers of women are employed. Experienced women, phased out of past jobs, and the growing numbers of highly educated women coming out of the colleges and universities are overqualified for the available work roles for women, and their talents and potential are not being utilized. Additionally, the breakdown of marriage, diminished family size, add growing numbers of married, single, divorced, and widowed women in the work arena.

We respectfully request the Federal government plan a new area of work roles commensurate with the needs of society for women, to retrain and reeducate women in the areas of human needs, medicine, public health, mental health, community work, social service, and communications, as well as programs to upgrade them in both the existing private and public work sectors. The potential of the women work force should be utilized to its fullest in the making of the future society.

We ask the following:

1. Minimum wage commensurate with rising cost of living, not to drop below $2.50 hr.

2. Women's educational grants (a special fund) to aid women to complete their education, particularly those who had to drop out due to marriage, childbirth or dependents' responsibilities.

3. On-the-spot training programs by industry, flexible hours and subsidies to further education to upgrade women into more highly-skilled responsible work roles.

4. Day care centers wherever women work, study and live at minimal cost.

5. Paid maternity leaves and guarantee of job after child birth.

6. Guaranteed wage for women unable to work, or in unpaid housekeeping or housewife roles.

7. Tax aids for lone women head of family and single women.

NATIONAL CONVENTION OF THE AMERICAN LEGION

HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mrs. GREEN of Oregon. Mr. Speaker, on August 28 in my home city of Portland, Oreg., the American Legion will host the 52d annual convention of the American Legion.

Portland and the State of Oregon are pleased to have the Legionnaires visit the Pacific Northwest and are particularly pleased that past hospitality of Oregonians have persuaded the Legion to return for their second national convention in our city in the last 5 years.

Following is a statement by American Legion National Commander J. Milton Patrick which explains the objectives of the Legion's convention and expresses the hope that the meeting will be a peaceful and productive gathering:

AMERICAN LEGION NATIONAL COMMANDER J. MILTON PATRICK GIVES LEGION POSITION ON UPCOMING NATIONAL CONVENTION IN PORTLAND AND THREATS OF VIOLENCE FROM DISSIDENT GROUPS

WASHINGTON, D.C., August 13, 1970.—J. Milton Patrick, National Commander of The American Legion, today issued the following statement concerning the Legion's National Convention, to be held this year in Portland, Oregon from August 28, to September 3, 1970:

"Legionnaires everywhere look forward to our return this year to Portland, Oregon—the hospitable "City of Roses"—for our 52nd Annual National Convention. We were thrilled and delighted to accept the city of Portland's invitation to return again to this lovely setting.

"This year marks the third time in American Legion history, and the second time in the past five years, that we have chosen Portland for our convention. This is most certainly not a coincidence. We have always found the people of Portland to be open and friendly; we have found convention facilities unequalled anywhere; and we have found city and state authorities exceedingly cooperative.

"The purpose of our National Convention, like the convention of any organization, is to provide the working base for the continuation of the good works of The American Legion through the coming year in our areas of primary concern. These are primarily aimed at serving the veteran through rehabilitative efforts in job training, medical care and education, and working for legislation at all levels of government to promote those ends. Additionally, the Legion concerns itself with matters of National Security, Americanism, Child Welfare and Community Service. The G. I. Bill, to which so many veterans owe their college or other training, was a direct result of Legion efforts. The Veterans Administration, which services 27 million veterans through one central agency, is another result of Legion effort. The thousands of youths who yearly pass through The American Legion's youth programs—Legion baseball; local, state and national oratorical contests with college scholarships as prizes; Boys and Girls State and Nation—all positive efforts to reach the youth of America with programs promoting good citizenship and patriotism, are continuing Legion concerns. Our Child Welfare program which has, since its inception, channeled more than 200 million dollars in benefits to needy children, is still another Legion effort to help youth.

"This, in brief, is our business in Portland. These are the matters our commissions and committees will be discussing through this five day period. We believe they are matters which emphasize the positive aspects of life in America, just as the Legion has always stood for what is right and positive about America. Our programs are constructive for we believe in building and not in tearing down this country of ours.

"We are, of course, aware of the fact that certain groups plan a jamboree during the period The American Legion will be in Portland. We have been told that the express purpose of these gatherings will be to attempt a confrontation with The American Legion. I assure the people of Portland that The American Legion comes to your city again this year, and at your invitation, with only peaceful intentions to transact the business I have described. We seek no confrontation with dissident groups. Predictions of trouble, of possible violence, have not come from the Legion. Our Portland convention has been planned for several years, with Portland's invitation winning out over similar invitations submitted by many other cities. We look forward to the same pleasant conditions we have heretofore enjoyed in Portland. It is the belief of the national body of The American Legion that any questions concerning the other groups, who will allegedly be present in Portland during the period of the Legion convention, for whatever purpose, should be addressed to authorities of the city of Portland who have cognizance of such matters."

CULVER INTRODUCES NUTRITION PROGRAM FOR ELDERLY

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CULVER. Mr. Speaker, those of us in the Congress who are particularly concerned with the needs of our senior citizens have been gratified by the legislative action already taken toward a solution of these problems. The increase in social security benefits is, perhaps, the most important example of these measures.

Many difficulties remain, however. Testimony last year before the Senate Select Committee on Nutrition and Human Needs emphasized the fact that the lack of social contacts and proper nutrition, which often occur in the later years, reduce an individual's ability to derive maximum satisfaction from life.

In 1965, under title IV of the Older Americans Act, Congress authorized a number of projects to provide a comprehensive nutrition program in a social setting. These projects were successful in bringing the participating individuals out of their isolation and in affording them the opportunity for proper nourishment, which, because of a lack of mobility, skill, knowledge, or desire, they could not provide for themselves. Twenty-seven projects were carried out during a 3-year period and were concluded about

a year ago. They demonstrated not only the desirability but also the feasibility of a larger, more comprehensive Federal effort in this direction.

I am a cosponsor of legislation which would have this effect by providing the elderly with low-cost, nutritionally sound meals served in strategically located centers. The bill envisions Federal, State, and local funding on a matching basis for the preparation of at least one hot meal per day at a reasonable low cost to the participant.

The Congress has demonstrated its concern for the health of the Nation's senior citizens through the medicare program, but medicine does little good to a body consistently deprived of proper nourishment. I believe that this program would make a significant contribution to their general well-being and enjoyment, and I urge its early passage.

I insert in the RECORD at this time the opening sections of the bill and the statement of "Findings and purpose":

H.R. 19041

A bill to amend the Older Americans Act of 1965 to provide grants to States for the establishment, maintenance, operation, and expansion of low-cost meal programs, nutrition training and education programs, opportunity for social contacts, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Title VII of the Older Americans Act of 1965 is redesignated as title VIII, and sections 701 through 705 of that Act are respectively designated as sections 801 through 805.

SEC. 2. Section 101(1) of the Older Americans Act of 1965 is amended by deleting the semicolon and inserting a comma and inserting immediately thereafter the words "except for the purposes of title VII where the term 'Secretary' shall mean the Secretary of Agriculture."

SEC. 3. The Older Americans Act of 1965 is amended by inserting the following new title immediately after title VI thereof:

"TITLE VII—NUTRITION PROGRAM FOR THE ELDERLY

"FINDINGS AND PURPOSE

"SEC. 701. (a) The Congress finds that the research and development grants, title IV, Older Americans Act, nutrition program has demonstrated the effectiveness of and the need for permanent nationwide programs to provide the nutritional and social needs of millions of persons aged sixty-five or older who are unable to overcome the complex and intertwining problems of inadequate diets. Many of these elderly persons do not eat adequately because they cannot afford to do so, while others, who are economically better off, do not eat well because they lack the skills to select and prepare nourishing and well-balanced meals, have limited mobility which may impair their capacity to shop and cook for themselves, and have feelings of rejection and loneliness which obliterate the incentive necessary to prepare and eat a meal alone. These and other physiological, psychological, social, and economic changes that occur with aging result in a pattern of living, which causes malnutrition and further physical and mental deterioration.

"(b) In addition to the food stamp program, commodity distribution systems and old-age income benefits, there is an acute need for a national policy aimed at providing the elderly with low cost, nutritionally sound meals served in strategically located centers such as community centers, senior citizen centers, schools, and other public or private nonprofit institutions suited to such use and through other means toward this purpose. Besides promoting better health among the older segment of our population through improved nutrition, such a program, implemented through the use of a variety of community resources, would be a means of promoting greater opportunity for social contact ending the isolation of old age, increasing participants' knowledge of nutrition and health in general, and promoting positive mental health and independence through the encouragement of greater physical and mental activities.

MORE ON POPULATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CRANE. Mr. Speaker, in recent months there has been a great cry about the need for immediate and far-reaching controls over the most private decision a couple can make—namely, how many children to have. Some of us have cautioned against intemperate action, and fortunately, the Congress has not enacted any legislation which is irreversible. Two different matters have recently come to my attention on this subject. The first of these is an article by the distinguished Newsweek columnist and Yale University professor, Henry C. Wallich. Professor Wallich's article "More on Population" answers some of the quick questions which are frequently raised in this regard.

The second item is a straight news article from the front page of the Washington Post of August 13, 1970. Here the headline tells the story: "Census Forecast for Year 2000 Lowered as Much as 100 Million." The article, based on the latest Census Bureau findings, indicates that any projections are really a "tentative and risky" business.

I commend these two items to the attention of the readers of the CONGRESSIONAL RECORD at this point.

MORE ON POPULATION

(By Henry C. Wallich)

In Newsweek, June 29, I wrote a column, "Population Growth," which argued that population control was urgent for developing countries but not for the U.S. and that the proposal for zero population growth was positively mischievous. In effect, the wrong problem, in the wrong country, at the wrong time. Unfortunately, I cannot deal individually with a pile of about 300 letters—mostly critical, to put it very mildly. Hence, this collective rejoinder.

My critics, whether they know it or not, are writing a distinguished tradition. The Rev. Thomas Robert Malthus, one of the great classical economists, produced the first great population scare book in 1798. Malthus said that population tended to increase in geometric progression (1, 2, 4, 8 . . .) while food increased at best algebraically (1, 2, 3, 4 . . .). Unacquainted with modern birth-control methods, Malthus concluded that "vice and misery" would check population growth unless people practiced "moral restraint." Except for Marx's prediction of progressive pauperization of workers under capitalism, Malthus's was probably the worst forecast ever made by an economist.

As we know, food increased faster than population. After a temporary bulge, while death rates came down ahead of birth rates, Western countries leveled off with moderate population growth. Today's underdeveloped countries are going through a similar process. They are being urged to speed it up, because cutting the growth of their numbers would greatly raise the growth of their income per capita.

CREDIBLE MOVE

Some of my correspondents agree that the U.S. is different. But, they say, how can we give credible advice to others without applying it to ourselves? I am unable to follow. If my friend is dangerously overweight, I might take it upon myself to urge him to diet. If my own weight is normal, must I diet too?

But many of my correspondents are deeply worried about U.S. population growth. Some worry about running out of space, or if not out of space, then out of food, or if not out of food, then out of other natural resources, or if none of those, they identify population growth with pollution. Many of them refute one another; they are all contradicted by the logic of the case.

Lack of space clearly is an implausible concern for the U.S. Lack of food seems a peculiar fear in a country historically plagued by farm surpluses. Other resources will indeed be exhausted some day, whether we increase our numbers or not. Substitutes will have to be developed for coal, oil, iron and all the rest, in the event that by then these products have not become obsolete. This is a question of cost; the technologies can be developed. Pollution is a very serious problem. It exists and needs to be tackled now. But if we are told that pollution is directly dependent on population levels, that is not so. A rich nation can have a clean country if it is willing to pay the price.

NEEDLESS WORRIES

Many of my correspondents use the arithmetic of the late Rev. Mr. Malthus. If population grows at 3 per cent, it doubles in 24 years, if at 2, in 36 years, and so on. A look at past and present population projections for the U.S. shows up the fallacy. An important set of estimates was published by the National Resources Committee in 1938. The lowest of these had the U.S. population leveling off in 1955 at about 137 million and then dropping; the highest had us reaching about 174 million by 1980. Then came the post-World War II baby boom, utterly ruining these estimates. By 1956, we had reached a net growth rate of 1.81 per cent. Reverberations of this high figure can be heard in the letters reaching me. Meanwhile, the worries once more have been outdistanced by the facts. In 1968, the net growth rate was down to 1.0 per cent.

A nation that within a dozen years voluntarily reduces its growth rate by almost one-half obviously can make very flexible decisions about family size. If people should feel seriously crowded, or incommoded by the high cost of rearing their children, they will reduce the birth rate further. There is no need for a tax on "excess babies," which, with the white fertility rate far below the non-white, would be predominantly a tax on blacks. And when there are so many real and urgent problems before the country, the population issue is a false alarm. One can do damage by crying "fire" in a theater when there is none, even when that theater is very thinly populated.

CENSUS FORECAST FOR YEAR 2000 LOWERED AS MUCH AS 100 MILLION

(By Richard Harwood)

The Census Bureau announced yesterday a major downward revision in its population projections for the next 30 years.

It is possible, the bureau said, that there will be nearly 100 million fewer Americans in the year 2000 than had been forecast in one maximum projection made just three years ago.

The revised projections are based on the dramatic decline in birth rates experienced in the United States in the 1960s. The birth

rate in 1968, for example, was the lowest in American history.

The bureau's new projections foresee a population of between 266 million and 320 million by the year 2000, compared with about 205 million now. The 1967 projections ranged from 283 million to 361 million. The median decline in the projections amounts to 29 million since 1967.

All of these projections are based on certain assumptions about births, deaths and immigration in the years ahead. They may prove to be grossly inaccurate because it is impossible to predict future attitudes toward family size and its effect on the environment or to predict effects of possible abortion law changes.

In the early years of the last decade, birth rates were relatively high. If they had continued at that level—3.35 children for each woman during her child-bearing years—the population of the United States in the year 2000 would have been 361 million. But they did not continue and, in fact, fell off sharply after 1963.

The new projections are based on four possible birth rates and continued net immigration in the years ahead. The highest projection—called Series B—assumes that the birth rate over the next 50 years will match the birth rate of the early 1950s—3.1 children per woman.

If the Series B assumptions are realized, the population in 2000 will be 321 million.

The Series C projection is based on the fertility rate experienced in the 1940s—2.78 children per woman. This would produce a population of 301 million thirty years from now.

Series D is based on the fertility rate of the late 1920s which is approximately the current rate—2.45 children per woman. It would produce a population of 281 million in 2000.

Series E is based on a rate of 2.11, which is the rate necessary to produce just enough babies to replace the people who die. If that rate prevails for the next 30 years, the population in 2000 will be 266 million. The growth would come about because of the inrceased number of women of child-bearing age and because of continued immigration.

The Census Bureau makes one more projection—a hypothetical Series X. It assumes a fertility rate of 2.11 with no net immigration after 1969. Under those conditions, said the bureau, the U.S. population would level off at 276 million in the year 2037.

The tentative and risky nature of population projections is recognized by the bureau and is illustrated by the errors made in 1967.

Similar miscalculations may be involved in the current projections. The highest projection—Series B—is in line with what young married women are currently saying about family size.

But those expectations could change, the bureau said, "in view of the current concern with population growth and its effect on the environment, along with possible changes in the laws on abortion." It is even possible, said the bureau, that the fertility rate could drop below the level needed for population replacement—2.11 children per woman.

If that kind of stability is reached, the nature of the American population in 2037 would be far different from what it is today. The median age would rise from 27.7 to 37.3 Only 20 per cent of the people would be under the age of 15, compared with 29 per cent today. The percentage of people over 65 would be 16 per cent, compared with 10 per cent now.

CULVER CITES AIR POLLUTION DAMAGE TO FARM PRODUCTION

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 14, 1970

Mr. CULVER. Mr. Speaker, in recent months much attention has been drawn to the damage which modern society inflicts upon our environment, but not enough emphasis has been placed on the damage suffered by the farmers from air pollution. We hear how our lakes and streams are becoming choked with poorly treated sewage and industrial wastes. We hear how the air of our cities is being poisoned by the exhaust fumes from automobiles and industrial smokestacks. And we hear how our landscape is being clogged with rusting automobile carcasses and other solid wastes.

This realization is long overdue. In the flood of concern for the polluted air and water afflicting our cities, however, sight is too often lost of the great damage done to the farmer and the production of our national food supply by these pollutants. Of course, rural residents have long been aware of the problems caused by dust originating from many different sources. It is the danger posed by certain chemicals on which more attention should be focused. According to the best available estimates air pollutants alone cause $500 million in crop and livestock damage annually.

Sulfur dioxide from fuels used in homes and factories can slow down and stunt the growth of alfalfa, cereal grains, sweet corn, and a number of other crops.

Airborne fluorides have become a serious toxicant to vegetation and animals over the last few decades in areas near certain industries, including aluminum, steel, and some nonferous metal plants and phosphate fertilizer manufacturers. Fluorides act as cumulative poisons to plants. For example, 0.005 parts per million of hydrogen fluoride in the atmosphere will be concentrated to 178 p.p.m. dry weight of corn foliage in only 150 hours. Large amounts of fluorides in plants can cause chronic fluorosis in cattle and other livestock. Although small amounts of fluorides can be safely ingested by livestock if they are in good health, amounts in excess of 1 or 2 milligrams per kilogram can cause excessive wearing of the teeth, pitting of the enamel, and exposure of the dentine. Severe cases can result in bone damage.

A number of dangerous pollutants are produced through the reaction of sunlight on the exhaust gases of motor vehicles. Ozone is one of these and in sufficient quantities can be a threat to field and forage crops. A concentration of 0.25 p.p.m. for 2 hours will burn back the tips of onions and will kill 20 percent of the foliage. It has been responsible for the kill of the ponderosa pine in the San Bernardino National Forest 80 miles east of Los Angeles.

Peroxyacetyl nitrate—PAN—another chemical created by the reaction of sunlight on exhaust gases, can be dangerous to many field crops including alfalfa and a long list of leafy vegetables. Some gases, such as nitrogen dioxide, may slow plant growth without causing visible injury.

Also originating from the exhaust fumes of automobiles and from the tetraethyl lead added to gasoline are lead compounds. These have often been found concentrated in large quantities, especially in grasses along highways. Although there is little evidence of lead poisoning to livestock up to the present time, numerous authorities believe that the situation is becoming critical.

Except in the Far West and the East damage from sulfur dioxide, ozone, and PAN is presently limited to the areas immediately surrounding urban areas. Farmers all across the country, however, should be aware of the potential danger to their own crops if this pollution spreads. Although agriculture adds less than 1 percent of the contaminants into the atmosphere, and although farmers generally live far enough away from cities not to be overly burdened by oppressive air conditions, all should realize the large stake they have in reducing the poisons we are sending into the air every day.

SENATE—*Wednesday, August 26, 1970*

(Legislative day of Tuesday, August 25, 1970)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. GEORGE MCGOVERN, a Senator from the State of South Dakota.

The Reverend Lester Cotto-Thorner, pastor, Orlando United Methodist Circuit, Orlando, W. Va., offered the following prayer:

Almighty God, direct and bless those of our generation who speak where many listen, and write what many read. Shape our desires and our deeds in accordance with Your purpose for the world, that, seeking first Your kingdom and righteousness, we may set forth the true welfare of mankind. Guide the rulers of this Nation and of the world with Your wisdom, and restrain the passions of the people, so that bloodshed may be averted and peace be preserved.

Look, O Lord, upon Your family of nations and men, to whom You have given power in trust for our mutual health and comfort. Save us, O Lord, and help us, lest we abuse Your gifts and make them our misery and ruin. Heal our divisions, cast out our fears, and renew our faith in Your unchanging purpose of good will, and peace on earth.

In Thy name we pray. Amen.

THE REVEREND LESTER COTTO-THORNER

Mr. RANDOLPH. Mr. President, I am very grateful for the understanding of the leadership in permitting me this privilege to speak at this moment.

The Senate prayer this morning was

given by a young man, the Reverend Lester Cotto-Thorner of West Virginia. He is 21 years of age. I believe, from a search of the records, that he is the youngest minister to offer in the Senate the prayer at the beginning of a daily session.

He is a student at the West Virginia Wesleyan College, and while at this institution of higher learning he is serving seven small churches, of the United Methodist faith, in the central section of our State.

One of the churches is at Clover Fork. Out of its small membership of eight, the youngest member is 92 and the oldest member is 97.

I felt that it was unique that we have such a young man here today. I know that he has been delighted with the opportunity to join the Senate in the service of a beginning of this body's deliberations with the presentation of the morning prayer.

We are grateful for the cooperation of the Chaplain of the Senate, the Reverend Dr. Edward L. R. Elson, in Reverend Cotto-Thorner's appearance.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will read a communication from the President pro tempore of the Senate (Mr. RUSSELL).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 26, 1970.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. GEORGE MCGOVERN, a Senator from the State of South Dakota, to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. McGOVERN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, August 25, 1970, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore (Mr. McGOVERN) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received today, see the end of Senate proceedings.)

THE SENATE'S SCHEDULE—A PLEA

Mr. SCOTT. Mr. President, this is simply a plea. All Senators understand that we will be here every morning at 9 o'clock, and on Saturday morning at 10 o'clock. I express the hope that some Senators may find it possible to restrain the extension of their rhetoric, and that perhaps we may yield back some of the time allotted for debate, because, assuredly, if some of the time is not yielded back, we will not finish the bill before Labor Day. In that case I would not blame the general public for blaming us and saying that we have wasted the time of the country; that we have needlessly palavered where we might have produced.

I, therefore, hope that some mutual understanding will arise in this Chamber to permit some degree of limitation of debate, so that we may be less concerned about what the people read about us and more concerned about what the people think about us.

If some sort of spirit can be engendered in this Chamber, we may finish the pending bill before Labor Day, and we may even be able to go home before Christmas. But if we continue to think only in terms of the beauty of the written word as it appears in the CONGRESSIONAL RECORD, the turkey which will be envisioned by the public will not be the turkey of Thanksgiving but the turkey which this body will then come to suggest itself to be, as symbolic of what we have accomplished.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The ACTING PRESIDENT pro tempore. The Chair lays before the Senate the unfinished business.

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of the amendment of the Senator from Wisconsin (Mr. NELSON). Time for debate on this amendment is 3 hours, with the time to be equally divided between the proponents and the opponents of the amendment.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time be equally charged against both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Who yields time?

Mr. STENNIS. Mr. President, I yield 5 minutes to the Senator from New Hampshire.

Mr. BYRD of West Virginia. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. McINTYRE. I yield.

ORDER FOR ADJOURNMENT TO TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate stand in adjournment instead of in recess at the close of business today until 9 a.m. tomorrow.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(Later in the day, this order was modified to provide for the Senate to adjourn until 8:30 a.m. tomorrow.)

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate continued with the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

Mr. McINTYRE. Mr. President, one of the peripheral issues in the debate which will take place this morning on herbicides is the use to which chemicals containing 2,4,5-T may now be put in the United States.

It is well recognized that domestic agencies of the Government have acted to restrict some domestic uses of such chemicals. It is less well known, however, that many domestic uses are still permitted.

Accordingly, a brief summary of the present situation might be useful.

On 14 April, 1970, the Secretaries of Agriculture, Interior, and Health, Education, and Welfare, pursuant to the Interagency Agreement for Protection of the Public Health and the Quality of the Environment in Relation to Pesticides, issued a statement on chemicals containing 2,4,5-T, pointing out the dangers involved and the steps needed to meet those dangers.

Mr. President, I ask unanimous consent to have the statement printed in the RECORD at the conclusion of my brief remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McINTYRE. Following the issuance of this statement, the Department

of Agriculture published two regulations designed to implement it. These were as follows:

First. Pesticide regulation No. 11.—This regulation suspended the use of liquid formulations of 2,4,5-T on lakes, ponds, ditch banks, around homes and on food crops. It prohibited manufacturers from making interstate shipments of 2,4,5-T intended for these specific uses and required manufacturers' labels to be changed so as not to list any of the uses cited as recommended targets for the chemicals' application.

Second. Pesticide regulation No. 13.—This regulation suspended use of granular formulations of 2,4,5-T around homes, recreation areas, and on crops grown for human consumption.

Shortly thereafter, the Department of the Interior announced that chemicals containing 2,4,5-T would not be used on any lands under its administrative control, such as national park lands. The Department of Agriculture, however, is continuing to use chemicals containing 2,4,5-T on some lands under its administration, such as national forest lands.

The following is a brief summary of the areas in which the use of chemicals containing 2,4,5-T is and is not permitted:

Areas on which 2,4,5-T can still be used:	*Million acres*
U.S. national forests	187
State, county and private forests	180
Forest industry (paper, lumber)	216
Nonfarm grazing	317
Pasture grassland	487
Rights of way (unknown)	-------
Total	+1,387
Areas on which 2,4,5-T may *not* be used:	
Department of Interior	534
Food crop land	385
Pasture/crop land	109
Urban areas (roads, etc.)	160
Farmsteads	29
Total	1,217

I hope, Mr. President, that this information will be useful to Members concerned about our use abroad of chemicals controlled at home. According to information furnished me by the Defense Department, the series of restrictions to which I have referred have affected only 10 percent of the domestic 2,4,5-T market.

EXHIBIT 1

2,4,5-T

A statement prepared in accord with the Interagency Agreement for Protection of the Public Health and the Quality of the Environment in Relation to Pesticides. Department of Agriculture, Department of Interior, Department of Health, Education, and Welfare.

Secretaries Hardin, Finch and Hickel today announced the suspension by the Department of Agriculture of almost all registered uses of liquid formulations of the weed killer, 2,4,5-T for use around the home and registered uses on lakes, ponds, and ditch banks.

These actions are taken pursuant to the Interagency Agreement for Protection of the Public Health and the Quality of the Environment in Relation to Pesticides among the three Departments.

They also announced that the Department of Agriculture intends to cancel registered uses of non-liquid formulations of 2,4,5-T around the home and the registered uses on all food crops (apples, blueberries, cereal crops, rice and sugar cane).

The suspension actions were based on the opinion of the Department of Health, Education, and Welfare that contamination resulting from uses around the home and in water areas could constitute a hazard to human health.

New information reported to DHEW on Monday, April 13, 1970 indicates that 2,4,5-T, as well as its contaminant dioxins, may produce abnormal development in unborn animals. Nearly pure 2,4,5-T was reported to cause birth defects when injected at high doses into experimental pregnant mice but not in rats. No data on humans are available.

These actions do not eliminate registered use of 2,4,5-T for control of weeds and brush on range, pasture, forest, rights of way and other nonagricultural land. Users are cautioned that 2,4,5-T should not be used near homes or recreation areas. Registered uses will be reviewed to make certain that they include adequate precautions against grazing treated areas long enough after treatment by 2,4,5-T so that no contaminated meat or milk results from animals grazing the treated areas.

While residues of 2,4,5-T in meat and milk are very rare, such residues are illegal and render contaminated products subject to seizure. There is no tolerance for 2,4,5-T on meat, milk or any other feed or food.

USDA will issue guidelines for disposal of household products containing 2,4,5–T.

BACKGROUND INFORMATION

Secretary Finch's Commission on Pesticides, which reported its findings in November and December 1969, expressed concern that research conducted at Bionetics Research Laboratories, under the Direction of the National Cancer Institute, indicated that 2,4,5–T had produced a number of birth defects when fed or injected into certain strains of mice and rats. Because the test material contained substantial concentrations of chemical impurities (dioxins), the birth abnormalities could not be attributed with certainty either to 2,4,5–T or to the impurities known to be present. Representatives of the chemical industry pointed to evidence of extreme potency of the impurities as toxic agents, demonstrated that 2,4,5–T now being marketed is of a greater purity than that which had been tested in the Bionetics experiments and urged that further testing be undertaken to clarify the questions raised.

Responding to this suggestion and utilizing materials supplied by one of the major producers of 2,4,5–T scientists at the National Institute of Environmental Health Sciences promptly initiated studies to determine whether 2,4,5–T itself, its impurities, or a combination of 2,4,5–T and its impurities had caused the earlier findings, and whether the 2,4,5–T now being marketed produces birth abnormalities in mice and rats. The experiments were completed last week and the statistical analyses performed over the weekend. On Monday and Tuesday of this week the analyses of the data were presented to the regulatory agencies of the Federal Government and to the members of the Cabinet.

The dioxin impurities and the 2,4,5–T as it is now manufactured, separately produced birth abnormalities in the experimental mice. Because absolutely pure 2,4,5–T was not available for testing, it is possible only to infer from certain of the observations that the pure 2,4,5–T probably would be found to be teratogenic if it were tested. But, since pure 2,4,5–T is not marketed and could not be produced in commercial quantities, this is not a practical issue for consideration.

Believing that prudence must dictate action in these circumstances, the regulatory agencies of the Federal government will immediately move to minimize human exposure to 2,4,5–T and its impurities. The measures to be taken will be designed to provide maximum protection to women in the childbearing years by eliminating formulation of 2,4,5–T from household, aquatic and recreational area uses. Its use on food crops will be cancelled, and use on range and pastureland will be controlled. Maximum surveillance of water supplies and marketed foods will be maintained as a measure of the effectiveness of these controls. These measures will be announced more specifically in the Federal Register in a very few days.

While the restriction to be imposed upon the use of this herbicide may cause some economic hardship, we must all cooperate to protect human health from potential hazards of 2,4,5–T, other pesticides and the dioxins.

The chemical industry should be commended for its prompt and willing cooperation with the National Institute of Environmental Health Sciences in the studies to clarify questions raised by the initial studies of this herbicide and for working closely with the FDA in the other studies still underway. We look to the full support of industry, agriculture and the home gardner in insuring the safe use of 2,4,5–T and other pesticides which contribute in important ways to the welfare of the Nation.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. McINTYRE. I yield.

Mr. NELSON. Did I understand the Senator to say that 2,4,5-T may not be used on Department of Interior land but that it is permitted to be used in the national forests?

Mr. McINTYRE. That is correct.

Mr. NELSON. Does the Senator have any knowledge of the reason for the permission of the use on lands under the control of one department but not under the control of the other department?

Mr. McINTYRE. No. I just suspect the Department of Agriculture and the Department of Interior differ on the need for a prohibition of the chemical insofar as lands under their control are concerned.

Mr. NELSON. Would it not indicate to the Senator that apparently in the Department of Interior the environmentalists, the ecologists, and the scientists decided it is too dangerous a chemical for them to permit it to be used on Interior Department land.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. McINTYRE. Will the Senator from Mississippi yield to me for 5 additional minutes?

Mr. STENNIS. I yield 5 minutes to the Senator from New Hampshire.

The ACTING PRESIDENT pro tempore. The Senator from New Hampshire is recognized for 5 additional minutes.

Mr. NELSON. My question is: Would it not appear to the Senator that the Department of Interior—which traditionally has been more concerned about the environment than the Department of Agriculture has a more sound position than the Department of Agriculture?

Mr. McINTYRE. Some might perhaps claim that the Department of Interior is a little more concerned with the environment. I, myself, have no evidence on which to base such a statement.

One of the problems in connection with the amendment offered by the Senator from Wisconsin and the Senator from New York is that there are differing opinions on the effects of these herbi-

cides, to the extent that reasonable people can differ on their future and present danger. That is why we find some experts expressing grave concern about the future of the mangrove forests, while others are saying that secondary forests should, in the natural course of events, be reestablished in 10 to 20 years. There are differing opinions on the effects of these chemicals.

Mr. NELSON. I wonder if the Senator would advise me which report he is referring to? The Tschirley report said it would be 20 years. Then the Pfeiffer report, which came after the Tschirley report, disagreed on the ground that it would take longer because it felt Dr. Tschirley had not taken into consideration the fact that the ground was hardened and was not reseeding naturally.

Does the Senator have a report contradicting that, the one saying it would take 20 years and the Pfeiffer report, following the Tschirley report, saying it would take more than 20 years for reforestation to occur?

Mr. McINTYRE. No; I think that is probably correct.

I am just trying to point out that the Tschirley report and the Pfeiffer report differ over the effects and the potential danger of these herbicides, that the scientists, biologists, and botanists of this country do not all foresee the same horrible consequences of which the Senator has spoken.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. McINTYRE. I yield.

Mr. NELSON. In what way do the Tschirley report and the Pfeiffer report differ, except that the Pfeiffer report, which was made subsequent to the Tschirley report, says it is worse than Tschirley says it is? I do not think there is any dispute. The dispute is over how many years it will take a mangrove forest to recover. One of the reports says 20 years. Another one says it will take longer than that. That is not a dispute about the devastation that occurs; it is just a dispute about how long it will take before there will be a recovery from the serious intrusion into the environment, in this case the mangrove forest.

Mr. McINTYRE. I read the Tschirley report, and it has far from the alarming tenor that would lead the Senator from Wisconsin and the Senator from New York to bring in an amendment which says that the U.S. Army should suddenly be barred from using herbicides in Vietnam. Tschirley says that he was there only 30 days and did not have a chance to go into territory held by the enemy, but that as far as he could determine our defoliation program will not produce permanently damaging effects.

Let me ask the Senator a question. Under whose auspices did Dr. Pfeiffer go to Vietnam?

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. NELSON. Mr. President, I yield myself 5 minutes.

He went there under his auspices. He is a physiologist at the University of Montana, a man of considerable distinction in his field.

Mr. McINTYRE. Is the Senator talking about Dr. Pfeiffer?

Mr. NELSON. Yes.

Mr. McINTYRE. I think Dr. Pfeiffer was the one who said that in a journey somewhere across Vietnam he did not see a living plant, but that had the vegetation in question not been destroyed he would probably not have returned alive.

Mr. NELSON. Would the Senator mind addressing himself to this question: The military, as the Senator knows, takes the view that we need to spray these defoliants for perimeter defense, that we need to spray them along the waterways to destroy enemy cover and on crops to deny them food. It also takes the view that we need to spray them along the trails to expose their view from the air. As a consequence of this military policy, we have sprayed about 100 million pounds of agents orange, blue, and white that we have been talking about here. That is 6 pounds for every man, woman, and child in South Vietnam. One of these agents contains arsenic—54 percent. The agent 2,4,5-T and the agent 2,4-D have both been demonstrated to be teratogenic—which means that they deform the fetus as demonstrated in several animal tests. We have now sprayed approximately 6 million acres, an area almost the size of Massachusetts.

Does not the Senator have any real concern about this? Is he not worried about the long-term ecological implications? Is he not concerned about the frightening parallel, thalidomide? Thalidomide was discovered to be teratogenic too. That that drug went into the marketplace and was prescribed to women all over the world? It did not hurt the user, but suddenly we began to see in Germany, France, South America, Spain, babies being born with no arms and legs, because they had received a teratogenic substance just as 2,4,5-T is and just as 2,4-D is.

Does it not concern the Senator that we, as the only nation in the world, in the history of the world, have now sprayed 100 million pounds of these herbicides over the South Vietnam countryside as a matter of military tactics?

We now know that these herbicides have a fetal deforming effect. That has been proved. We know it kills the mangrove forests. We know two sprayings of it will kill 50 percent of the hardwoods. One spraying will kill 10 percent. Yet we are continuing the program.

Does not the Senator have some worry about what kind of environment we are going to leave the Vietnamese when we get out of there? Does he know what the implications are? Does he have enough scientific information to assure us that we are not sewing the seeds of ecological disaster? No he does not. Nobody knows. But all thoughtful scientists are concerned if not alarmed.

All the scientists are worried about it—all but the military at least in their public posture. However, they are worried about it, too, if we look at some of their classified documents, as the Senator knows.

Mr. McINTYRE. In answer to my good friend from Wisconsin, let me say that the Senator from New Hampshire——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BYRD of West Virginia. Mr. President, in behalf of the Senator from Mississippi, I yield 2 minutes to the Senator from New Hampshire.

Mr. McINTYRE. Of course, the Senator from New Hampshire, like every other Senator, is concerned about the ecological effects of herbicides.

The point I want to make here this morning is that these herbicides are used for the protection and safety of the American fighting man, and that this immediate benefit has to be weighed against the possible ecological consequences. It is not a clear-cut case.

We have no figures or statistics to give the Senator, to tell him how many American lives have been saved by the use of defoliants in Vietnam, but we do know that they have been effective in this regard.

Mr. NELSON. Mr. President, if the question is that pure and that simple, and the only test of the conduct of the American military is the safety of American boys, why do we not drop the nuclear bomb? That would finish it in a hurry.

Mr. McINTYRE. I think that the effects of a nuclear bomb are far more clear-cut than the effects of herbicides. But in response to the Senator's earlier question, I have the same fears as he does about the ecological future of America and the world.

I question, however, whether the Defense Department has shown less concern about that future than other agencies. No one was concerned until the thalidomide tragedy and Rachel Carson's publication of "The Silent Spring." The Department of Interior and all the rest were just as dumb about it; is that not right?

Mr. NELSON. "Stupid" is a better word.

Mr. McINTYRE. All right. But we should not regard the Defense Department as the big ogre.

Mr. NELSON. But now we know; so why do we not stop it?

I should like the Senator to address himself to this point: On the floor of the United Nations General Assembly last fall 80 nations of the world voted to declare that the defoliants, the antiplant chemicals, the herbicides were, in their judgment, to be proscribed from use under the Geneva protocol. Three nations voted no: The United States, Australia, and Portugal. We now sit here as the only nation in the world advocating——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. NELSON. I yield myself 5 additional minutes.

Advocating the use of herbicides as a new instrumentality of warfare. The only nation. Does not the Senator think that leaves us in an indefensible position?

Mr. McINTYRE. I thought Australia and Portugal voted with us, did they not?

Mr. NELSON. Yes, they did. I said that. I said 80 to 3.

Mr. McINTYRE. I thought the Senator said "all the nations of the world."

Mr. NELSON. I read the statement of the Australians, and it made no sense

whatever on the merits. I could not find that Portugal made any statement at all. Ours was a weak position on technical grounds that the United Nations General Assembly did not have the authority to make legal interpretations of treaties.

But I ask the Senator, is this not an impossible position to defend? Here we are, trying to reach peace in the world; we are trying to stop the proliferation of nuclear weapons; we are trying to negotiate agreements on stopping the arms race; what does the Senator think about the position of the United States being the only country in the world that advocates establishing the legality of ecological warfare?

Mr. McINTYRE. Mr. President, I do not intend to get into the argument that is forthcoming in the U.S. Senate about the Geneva protocol and our position with regard to the riot control agents and herbicides. But, is it not true that we have consistently taken the position that these were outside the protocol?

Mr. NELSON. We have not acted on the protocol yet. The President took that position; I have not. We have not voted on it yet.

Mr. McINTYRE. Unfortunately, we are involved in a very tragic war over in Vietnam, doing our best, I think, to extricate ourselves. And herbicides have been helping us to do just that.

I think the Department of Defense would be the first to admit that they have made some mistakes in their use of herbicides; that they used them in indiscriminate fashion at times until rather recently.

We are talking now, however, about an amendment the Senator is offering that would prevent herbicides from being used on the moderate scale they are being used today.

Mr. NELSON. Moderate scale?

Mr. McINTYRE. Moderate scale as compared to the years 1967–69, and with the purpose of saving American lives.

Let me ask the Senator, suppose he were riding in a 2½-ton truck, down a dirt road in South Vietnam.

Would the Senator like to have the jungle which is over there right on top of him, or would he like to have that jungle about a thousand feet off to the right and left as protection against any ambush?

I believe that by the use of defoliants we have very substantially reduced the possibility of ambushes by Vietnam guerrillas.

Mr. NELSON. Mr. President, I have read all the documents the Defense Department has produced to justify military usage of these chemicals in Vietnam, the classified ones and the secret ones. They assert its use is to save life. An equally powerful argument can be made that it is costing us much more than we are gaining.

As the Senator well knows, we destroyed a whole lot of crops over there that were planted by civilians, to be used by civilians, and it has been a serious morale factor. If all the Senator is saying is that any instrumentality of war that appears to us to be helpful, we will use, why not spray those trails that they are on with mustard gas? We would just have to do that once, and that would be the end of the trail.

Mr. McINTYRE. I do not think that is a fair argument at all. The devastating and permanent effects of mustard gas, nerve gas, or nuclear weapons, for example, are indisputable. Those of herbicides are not.

Let me say that the troops over there, and the company commanders, the battalion commanders, and the brigade commanders have all written in report after report that these herbicides have saved lives and been great morale boosters to the American troops.

I am concerned for the safety of American troops over there. That is why I oppose the Senator's amendment.

Mr. NELSON. We went over there, presumably—and I am the only one left in the U.S. Senate who voted against all the appropriations to go—but we went over there, it was said, to defend the South Vietnamese. Is it the Senator's idea of defending a country that you indiscriminately spray 100 million pounds of chemicals over the land with no idea of the long-term consequences. Is that the way we are going to defend that country?

We say we are over there to protect American boys. We could have protected American boys better by never having gone in the first place.

What are we leaving behind us? Does the Senator know, when we destroy the mangroves along the Rung Sat and alter marine estuaries what the effect will be? Does he know that we may be destroying the habitat shell fish and other marine creatures from which the people get most of their proteins?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. NELSON. Mr. President, I yield myself an additional 5 minutes.

What are we leaving behind for the Vietnamese? I do not think anybody can stand here and say that we are entitled to do anything that we think will be of any benefit to a soldier who is there. That is why we do not drop the nuclear bomb. That is why we do not use mustard gas. That is why we do not do all kinds of things in war, because we have decided that some of them at least are unacceptable instruments of warfare.

I do not think it is very civilized or very sensible to be spreading into the atmosphere pollutants that are likely to cause problems that nobody can predict.

The Senator well knows that picloram like DDT is a long lasting persistent chemical that remains in the environment for an indefinite time.

The Senator knows what we did out of our ignorance with DDT in this country.

All I am saying is that it is environmental warfare, and we have no notion of what is happening to the oceans, the rivers, the soil, the plants, the animal life, or the insect life, and we are going ahead and using it, anyway.

The Senator says that we use it in the United States. We have done many foolish things in the United States, and we will continue to do them, I assume, but there is a difference. As irrational as our use of these chemicals is in the United States, it is 2 pounds per acre, and we are using 27 pounds per acre over there, which is a lot more intensive dose. But neither makes any sense, in my judgment, even for agricultural purposes, when we consider the discoveries they have now made about the teratogenic effect of these chemicals as well as the unsettled questions about their unknown effects in the environment.

All I can say to the Senator is that, as I understand it, his defense is that we are entitled to use these things because we claim that the use of them saves American lives. Is that it?

Mr. McINTYRE. As far as ecological effects are concerned, all we are talking about is possibilities. The Senator does not know for a fact, for example, that 20 years from now the mangrove forests will not be reestablished.

Yet the military benefits of herbicides are certain. I am saying that as long as we are in Vietnam we cannot simply ignore this side of the question.

Mr. President, this is on my own time, if the time of the Senator from Wisconsin has expired.

Mr. STENNIS. Mr. President, I yield to the Senator from New Hampshire such time as he desires.

Mr. McINTYRE. The Senator has mentioned agent blue. Is that correct?

Mr. NELSON. Blue, orange, and white.

Mr. McINTYRE. And the Senator has mentioned picloram. Picloram was tested by the U.S. Department of Agriculture in Puerto Rico—a tropical environment—at concentrations 30 times those used in Vietnam. Even at these high concentrations it did not affect food crops or natural vegetation the following year. Tests of soil from areas in Vietnam sprayed with picloram revealed no picloram present 11 months after spraying. In very dry soils it may persist for very long periods, but in areas of heavy rainfall it is carried down into the lower layers of soil where it is ineffective.

Picloram is one of the least toxic of herbicides and has been fed to numerous laboratory and domestic animals at much higher doses than could possibly be attained by animals grazing on sprayed areas. None of these data indicate any effect on the animals or their offspring. Picloram does not accumulate in the food chain, as DDT does, for example, so there is no danger from animals grazing on sprayed land.

Cacodylic acid, on the other hand, was at one time a drug given directly to humans. It has been replaced by newer more effective drugs. There is considerable medical experience to attest that its toxicity is indeed comparable to that of aspirin. There is no scientific basis for fearing that the arsenic in it would be changed in nature to the more toxic state. In any event the more toxic form of arsenic has been widely used in some Asian countries on rubber and cocoanut oil plantations. Concentrations 100 times the concentrations used in Vietnam have been applied annually for a quarter of a century or more with no ill effects to humans or to the ecology.

Mr. NELSON. Let me respond to the Senator by saying, No. 1, that the problem with all these agents—herbicides, pesticides—is that we conclude that be-

cause we do not see any immediate damage, there is nothing dangerous in their use, and we begin to use them without extensive tests, without understanding what we are doing until it is too late.

We started using DDT 30 years ago. I recall being attacked 7 years ago for introducing a measure to ban the use of DDT. I could not get anybody in either House to join me in that because my friends who were interested in the environment said, "I will be attacked as a kook if I join you in legislation to ban the use of DDT." Yet, long before 7 years ago, the knowledgeable scientists were raising the alarms about the continued use of this slow degrading pesticide.

Then Rachel Carson came along and published "The Silent Spring," and she was attacked by many entomologists and other scientists all over the country as unqualified in this field. They said that what she was saying about the disastrous effects of the irrational introduction of slow degrading herbicides and pesticides into the atmosphere was simply wrong. She was not qualified to make such a judgment. Some entomologists who worked on it for the companies came to see me and said it was all nonsense.

What is the result? A disaster is the result. The Senator knows it and I know it. So, after 30 years of spewing hundreds and hundreds of millions of ponds of DDT into the atmosphere, just as we are doing with these chemical herbicides, we find out that DDT is everywhere. We find it in the fatty tissue of the Adelie penguin in the Antarctic, where no DDT has ever been used. In 500 samples of fish in rivers and lakes all across this country, all but a few had DDT in their fatty tissue.

We see that the peregrine falcon and the bald eagle are being driven to extinction now because they have ingested so much DDT, being creatures that feed at the end of the food chain. We find now that the hen cannot produce enough calcium to produce a shell strong enough to hold the chick.

These are some of the ramifications of the indiscriminate use of DDT. Everybody throws up his hands now and says, "Why did we do it?" We did it because we were ignorant about the consequences of indiscriminate use of very potent pesticides and herbicides, and we are proceeding on the same ignorant basis now with 100 million pounds of it in Vietnam.

If you cannot answer the questions—if neither the military, the scientists, the Senator from New Hampshire, or anybody else—cannot say what the effect is on human and the environment we should not use it.

If you cannot answer the question about whether those mangrove forests will ever recover, you should not use it. If you cannot answer the question about what the effect is on all living creatures in the forests we are destroying, you should not use it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NELSON. I yield myself 5 additional minutes.

If you cannot answer what is going to happen to all the shellfish and marine creatures in the estuaries that feed the people in Vietnam, you should not use it. If you cannot answer the question as to those people who eat those shellfish and other fish, if their tissue becomes infiltrated with picloram you should not use it. The only argument that anybody has to use it is that it is a defense weapon that is helpful to us. But we have no notion at all what that means to the environment in Vietnam or, for that matter, the rest of the world. The DDT we sprayed on the fields in Wisconsin and Minnesota, or New Hampshire, is over the Indian Ocean, it is in the Antarctic, it is all over the world because it is picked up by evaporation and goes all over the world. It is in the fatty tissues of practically every animal in the world.

So, I say to you, Senator, that we are doing exactly the same thing with this herbicide as we have so tragically done with DDT. Now we see what the prospects and the consequences are. All I say is, it is not moral for us to continue to use it. I cannot find any defense that is, on balance, on any cost-to-benefit ratio, in terms of human beings, or anything else, that justifies us to proceed to medicate the whole countryside—and that is what it is—without knowing what the results will be.

Mr. McINTYRE. The Senator should make that speech to the company commanders at the various bases and centers in Vietnam. He should make it to the men who have the job of patrolling the areas where they can be ambushed and killed. They would make clear that the short-term benefits of herbicides are quite considerable, and that these have to be weighed against long-term ecological possibilities.

Mr. President, I do not know whose time I am on, but I will yield myself 5 minutes.

The PRESIDING OFFICER (Mr. ALLEN). The Senator from New Hampshire is recognized for 5 minutes.

Mr. McINTYRE. Mr. President, a number of the scientists who went over to Vietnam are confirmed opponents of our war effort and would admit that they went determined to condemn our herbicide program as a result.

Dr. Tschirley went over there with an open mind. I placed his report in the RECORD on yesterday.

Let me read some of the high points of his conclusions as a result of his 30-day study:

> One of the principal fears about exposing soil in the tropics is the possibility of increased laterization.
>
> About 30 percent of the soils of Vietnam have a potential for laterization.
>
> But I do not find it reasonable to conclude that the defoliation program in Vietnam would hasten the laterization process significantly because bare soil does not result from defoliation.

Tschirley continues with some of the conclusions he reached as a result of his visit and study:

> The defoliation program has caused ecologic changes. I do not feel the changes are irreversible, but complete recovery may take a long time. The mangrove type is killed with a single treatment. Regeneration of the mangrove forest to its original condition is estimated to require about 20 years.

On the question of the fish catch, he says:

> Fish catch has increased during a period of intensive treatment for defoliation, which surprised and pleased me.

His final recommendation is as follows:

> The desirability of ecologic research in Vietnam after the war ends cannot be overemphasized. The research should be administered through an institution that will provide continuity and breadth for the research program. The opportunity of establishing ecologic research under the International Biological Program should be explored.

Mr. President, this is the type of study which the committee is providing for in the bill. It has asked the National Academy of Sciences to conduct the study. The Academy is a most distinguished and unimpeachable group. It will conduct research on the herbicide problem in Vietnam and report back to us within 18 months. This seems to me to be the most sensible thing we could do to try to get the facts.

Mr. NELSON. Mr. President, if the Senator will yield for a question, I know the Senator is aware of the fact that the Department of Defense itself stated that in most of the areas, a substantial percentage of the areas defoliated and sprayed, cannot be studied until after the war is over because they are in territory that cannot be gotten to because the way is blocked by the Vietcong or other areas under their control. So a study really cannot be made and we cannot make one in 18 months that would answer the questions, anyway.

But if—I emphasize if, Senator—if the problem is serious enough so that every environmentalist I know of that has commented on it, whether it be Dr. Tschirley or Dr. Pfeiffer or Dr. Galston, or any of the rest who are concerned and alarmed and say that it is critically important that a careful study be made to find out what has happened, if—if it is so critically important to make that study, because we are worried about what we might find out, does not the Senator think that we should stop using these chemicals until we find out what the results will be?

Mr. McINTYRE. Mr. President, I think I should point out to the Senator that at this moment in Vietnam we are down to a level of 25 percent of what we have used in the past on defoliants. There has been a response from the Department of Defense to the findings of Agriculture and Interior on 2,4,5-T. Its use has been suspended. But we cannot eliminate the whole program consistent with the safety of our troops.

Mr. GOODELL. Mr. President, will the Senator from Wisconsin yield?

Mr. NELSON. How much time does the Senator wish?

Mr. GOODELL. Fifteen minutes.

Mr. NELSON. Mr. President, I yield 15 minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 15 minutes.

Mr. GOODELL. Mr. President, last week the President transmitted to the Senate for advice and consent the Geneva Protocol of 1925. As its title indi-

cates, it is the "Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare."

Under the interpretation of the administration, as stated in the report of the Secretary of State, the protocol's ban is not to apply to this country's use in war of chemical herbicides and a variety of antipersonal chemicals. The decision has been reached by the administration that the protocol's prohibition on chemical warfare is limited in coverage to only certain kinds of chemical weapons.

This protocol interpretation no doubt will be raised during the present debate on the Environmental Warfare Prohibitions amendment which I have authored with the Senator from Wisconsin (Mr. NELSON). Our amendment prohibits the use, transfer, and stockpiling of antiplant chemical weapons used in herbicide and defoliation military operations.

Defoliation, the reduction or elimination of forest vegetation and plant growth, has been adopted for warfare by the Department of Defense on the grounds that it allows an additional military tactical option for U.S. forces in combat. Objectives of this environmental warfare program are to deny an enemy food and concealment. Such military thinking then has brought into existence and use a vast antiplant chemical weapons arsenal, including the antiplant agents: orange—a mixture of 2,4,5-T and 2,4-D; white—a mixture of 2,4-D and picloram; and blue—an aqueous solution of cacodylic acid. Collectively, these agents have commonly been called "herbicides" and "defoliants." Technically, "orange" and "white" are growth regulating compounds and are directed mainly against forest vegetation; "blue" is considered a dissicant and is used primarily to destroy crops. Each of these antiplant chemical agents has been used as a weapon of war in Vietnam. Each can be used interchangeably to carry out programs of forest defoliation or crop destruction.

The military herbicide chemicals in formulated products of orange, white, and blue constitute the bulk of our antiplant chemical warfare arsenal. They have never been submitted to the U.S. Department of Agriculture for registration. The point here is that we are not talking about the use of domestic chemical pesticides 2,4,5-T; 2,4-D, picloram, and cacodylic acid. It is true that formulated products of these chemicals have been submitted to the USDA for registration and have registered uses. Nevertheless, according to the Pesticide Regulation Division, USDA, "none of these—domestic pesticide—chemicals are registered for use in the United States as defoliants." These chemicals are only registered for use to kill specified types of plants.

The fact is that military application of herbicide chemicals and domestic application of pesticide chemicals are different. Again, according to the Pesticide Regulation Division, in regard to domestice pesticide chemicals: 2,4,5-T; 2,4-D; picloram and cacodylic acid—

(1) "None are registered for application to crops or non-food crop areas at the dosages claimed to be used in Vietnam" (27 lbs. per acre in Vietnam as contrasted to average 2–4 lbs. per acre use in United States);

(2) "None are registered to be applied as an undiluted spray;

(3) "None are registered for use on rivers and streams."

The myth which blurs the distinction between military and domestic use—and the common misunderstanding which gives momentum to the myth—must be shattered.

Distinctions can be made which show that military use of herbicide chemicals is quite different from domestic use of pesticide chemicals. These distinctions include: dosage; concentrations of spray; limitations on use; and application at sites of use—be they food, feed, aquatic, or nonfood areas such as roadsides, rights-of-way or ditchbanks.

There is, however, a similarity between military herbicide chemicals and domestic pesticide chemicals. And it should be noted. The similarity is in the stark lack of study and the scarcity of real knowledge on the relationship of use to a safe and livable environment and the health safety of man now and for the future.

On many occasions I have criticized this "use now-study later" approach to unleashing chemicals into the environment. What we do know now, however, can help us to put a stop to reckless and harmful chemical use. This especially applies to the massive and indiscriminate use of military herbicide chemicals as used in defoliation and crop destruction operations.

What we know is that there are no food, feed, or aquatic registered uses of cacodylic acid or picloram for this country. Regarding nonfood areas, such as roadsides, rights of way or ditchbanks, picloram is registered for use with the following limitations:

First. Do not contaminate water used for domestic or irrigation purposes.

Regarding nonfood areas use, cacodylic acid is registered for use with the following limitations:

First. Keep children and pets off treated area until after first rain;

Second. Do not graze livestock on treated areas;

Third. Do not contaminate water used for domestic or irrigation purposes.

Cacodylic acid which is so restricted for use in the United States is the military herbicide chemical, blue, used in defoliation operations in Vietnam. It has been used to destroy crops. Let us think about that—used to destroy crops. Now let us reflect on those very strict limitations set for use here at home. It has been estimated that 7 percent of Vietnam cropland has been sprayed with chemical blue. At least 1 million gallons of blue has been sprayed on Vietnam cropland. Blue, it will be recalled is an aqueous solution of cacodylic acid. Cacodylic acid is 54 percent arsenic. It is described in the Merck Index as poisonous. By some quirk of irony, we have sprayed 1 million gallons of chemical containing poisonous substance on a country we are attempting to help save. Many of the crops sprayed, the Defense Department has to admit, have been grown by Vietnam civilians, many of whom are subsistence farmers.

How we can say that we are helping to save the country of South Vietman with crop destruction—how we can say this with any reasonableness, completely escapes me. It is mere lunacy.

The amendment before us outlaws this type of environmental warfare. Our amendment relates to military herbicide chemicals not to domestic pesticide chemicals. As a practical matter, our amendment would apply in the first instance to the use of chemical blue since the Department of Defense has recently banned the use of orange and the supply of white is low.

The present low-profile use of herbicide chemicals may also be used as an argument against our Prohibitions on Environmental Warfare amendment. It may be said that defoliation operations are phasing themselves out so why legislate them out? I cannot accept this argument.

First, the crop destruction program should be stopped, stopped now, not merely phased out.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. GOODELL. I yield.

Mr. NELSON. Mr. President, the Senator refers to phasing out. Is the Senator aware that in 1969 $1,600,000 was spent for procurement of these herbicides and that in 1970 the amount was $5 million? That does not sound to me like it is being phased out.

Mr. GOODELL. Mr. President, I agree with the Senator from Wisconsin. I think there is a grave question as to whether it is being truly phased out. Indeed, the amount of money we are spending on this herbicide program is increasing.

Second, we should be concerned not only with use but with the proliferation of use of any and all military herbicide chemicals.

Third, the budget amounts requested for next year's herbicide R. & D. and procurement plans do not reflect a phasing out of defoliation operation at all. That is the point made by the Senator from Wisconsin.

The report of the Senate Armed Services Committee reflects a request of $500,000 for R. & D. in herbicide chemicals; and $1 million for procurement of herbicides. The report notes that "procurement programs for CBW are not subject to authorizing legislation." I think this is unfortunate. This is a way procurement programs get out of hand. I understand that presently the Defense Department has revised its request and the revision is upward. I understand that the request is now for $6 million in procurement funds and that plans are for the procurement of over 1 million gallons of chemical herbicides white and blue. This does not appear to me as a "phaseout" operation.

The argument of myth and the argument of gradual phase out may be used against our amendment. So too may the protocol interpretation be used as an argument against the Senate in making an independent judgment on the use of antiplant chemical weapons and in making

an independent determination on the wisdom of forest defoliation and crop destruction as tactics of war.

Mr. President, I do not wish now, nor is it necessary at this time, to engage in a lengthy discussion as to the history of the protocol—as to whether its framers, the American delegation to the 1925 Geneva Conference, intended the protocol's ban to cover all kinds of gas for use in war or merely some gas; whether all disease-producing germs or only some come under the prohibition for use in war.

At this point, I would like to make only brief observations regarding the history of the protocol.

Let us recall that the 1925 Geneva Protocol was advanced by the United States to universalize the prior treaty of the Washington Arms Conference, that is the 1922 Treaty Relating to the Use of Submarines and Noxious Gases in Warfare. This was a treaty negotiated by the United States, Great Britain, France, Italy, and Japan. The treaty proposed a prohibition on "the use in war of asphyxiating, poisonous or other gases and all analogous liquids, materials, or devices."

Secretary of State Hughes in explaining the position of the United States at that time cited the following passages from the report of the Advisory Committee to the American Delegation:

The Committee is of the opinion that the conscience of the American people has been profoundly shocked by the savage use of scientific discoveries for destruction rather than for construction . . . The American representatives would not be doing their duty in expressing the conscience of the American people were they to fail in insisting upon the total abolition of chemical warfare . . .

Resolved, that chemical warfare, including the use of gases, whether toxic or non toxic, should be prohibited by international agreement, and should be classed with such unfair methods of warfare as poisoning wells, introducing germs of disease, and other methods that are abhorrent in modern warfare.—Source: Minutes, Sixteenth Meeting, Committee on Limitation of Armament, January 6, 1922, p. 732.

The U.S. Senate approved this treaty on March 29, 1922. The vote was 72–0.

The only exchange in this Chamber then regarding the kinds of gas covered in the prohibition on chemical warfare was an exchange between Senator Wadsworth of New York, chairman of the Military Affairs Committee and Senator Henry Cabot Lodge. The CONGRESSIONAL RECORD records the exchange as follows:

Mr. WADSWORTH. . . . I think article 5 is drawn somewhat carelessly. . . . The phrase 'other gases' is all inclusive. It reads: 'asphyxiating, poisonous, or other gases.'

Mr. LODGE. To be used in war.

Mr. WADSWORTH. Yes; but there are gases used in war other than asphyxiating or poisonous gases. . . . For balloons, such as helium gas, and hydrogen. A strict construction would seem to prevent the use of any gas in war. Undoubtedly that is not meant. . . . It would seem in the French text that the word 'similaries' ties the matter up, but in the English text the equivalent of "similaries" is not used. That, however, is a point of comparatively small importance.—Source: U.S. Congressional Record, 67th Cong., 2d Sess., 1922, LXII, Part 5, p. 4729.

The remarks of Senator Wadsworth indicate his concern that the prohibition of the 1922 treaty could be construed to cover not only gas as a weapon of war, but also gas applied for a nonweapon use. The Senate, however, did not pursue this question of the kinds of gas covered by the treaty. The question, having been raised, remained unresolved.

Mr. President, for decades now, there have been varieties of interpretations by this country and other countries of the world over the kinds of gas to be prohibited for use in war. Regarding the protocol, interpretations over the years have faced difficulties such as those arising from the fact that scientific discovery brought into existence new chemical and germ weapons which were unknown at the time the protocol was negotiated. Moreover, there have been contradictions in interpretations within governments over the years. Contrasted to contradictions, there have been differences of opinion among governments as to whether all kinds of gas or only some gas should be banned in chemical warfare. Last December, 80 nations voted in favor of a U.N. resolution which declared in part that:

Any chemical agents or warfare—chemical substances, whether gaseous, liquid or solid—which might be employed because of their direct toxic effects on man, animals or plants are contrary to the generally recognized rules of international law, as embodied in the Protocol.

Of the 80 nations voting in favor of this resolution, 38 are parties to the protocol.

Let us bear in mind the vote of the United States against this U.N. resolution. Let us keep in mind the administration's interpretation of the protocol. Let us also, however, remember that successive administrations have repeatedly announced, as did President Nixon when he sent the protocol to the Senate last week, that this country observes the principles and objectives of the protocol.

What are the principles and objectives of the protocol? There is the principle of no first-use. There is the objective of prohibiting in the interest of humanity the use of chemicals and germs in warfare. There is the objective of bringing gas and germ weapons under control and the use of these weapons stopped. There is the objective of outlawing in war gases which in the words of the protocol "has been justly condemned by the general opinion of the civilized world."

ENVIRONMENTAL WARFARE AMENDMENT CONSISTENT WITH PRINCIPLES AND OBJECTIVES OF PROTOCOL

Mr. President, I have no intention in this debate to make the case that antiplant chemicals are covered in the protocol. I do believe, however, that our amendment to control antiplant chemical weapons and prohibit their use in war is consistent with the principles and objectives of the protocol.

Regarding antiplant chemical weapons, what has become of the principle of no first-use? What has become of the objective of stopping in the interest of humanity chemical warfare operations that threaten innocent noncombatant civilians?

U.S. FIRST-USE OF ANTIPLANT CHEMICALS IN VIETNAM

ANTIPLANT AGENT FROM CLASSIFICATION: FROM BIOLOGICAL TO CHEMICAL

According to a 1969 Army training manual, antiplant agents for military application are:

Chemical agents which possess a high offensive potential for destroying or seriously limiting the production of food and defoliating vegetation. These compounds include herbicides that kill or inhibit the growth of plants; plant growth regulators that either regulate or inhibit plant growth, sometimes causing plant death; dessicants that dry up plant foliage. . . . Military applications for anti-plant agents are based on denying the enemy food and concealment.—Source: Department of the Army Training Circular TC 3–16, Department of the Army, April 1969, p. 62.

It is of interest to note that in 1964 antiplant chemicals were officially listed as biological agents not chemical agents. In 1964 the joint manual of the Departments of the Army and Air Force on Military Biology and Biological Agents listed antiplant chemicals under the heading "Microbiology Applied to Biological Agents." Antiplant chemicals were so listed, according to the manual, as indicated below, as a matter of convenience:

MILITARY BIOLOGICAL AND BIOLOGICAL AGENTS MICROBIOLOGY APPLIED TO BIOLOGICAL AGENTS

The military application of microbiology concerns only those microorganisms which may be deliberately employed in weapon systems to cause disease or death to man, animals, or plants, or to cause deterioration of material. Certain chemical compounds that effect plant life, as well as toxins, may be used in chemical weapon systems and are included as a matter of convenience. These are grouped as shown below for discussion purposes, and they will be considered in this manual along with vectors of disease.

a. Microorganisms. . . .

b. Toxins. . . .

c. Vectors of Disease. . . .

d. Chemical Antiplant Compounds. Plant growth regulators, herbicides, weed killers, defoliants, and desiccants.—Source: Department of the Army Technical Manual. Department of the Air Force Manual TM 3–216. AFM 355–6 (Departments of the Army and the Air Force, March 1964).

In 1965, the joint manual omitted antiplant chemicals from the biological agent classification.

In 1968, however, the Joint Chiefs of Staff recognized that for certain regional organizations, such as SEATO and CENTO of which the United States is a member, biological warfare included the employment of plant growth regulators to produce death or casualties in man, animals, or plants.

Antiplant chemicals, as with biological toxins, were classified later as chemical weapons. Presently, antiplant chemicals are considered part of the chemical warfare arsenal.

U.S. FIRST-USE IN VIETNAM

The United States initiated use of antiplant chemicals in the Vietnam war. The antiplant chemical warfare arsenal was not brought into use in retaliation against enemy use of such chemicals.

Use of defoliants by U.S. forces began on December 4, 1961, when President Kennedy authorized the Department of Defense to test the military effectiveness

of defoliation on several lines of communication in South Vietnam. Since that time, this country has spent over $96 million to defoliate over 5 million acres of forest and cropland in South Vietnam. The primary target has been forest areas. Roughly 13 percent of South Vietnam's forest areas have been sprayed at least once and 15 to 20 percent of this sprayed forest area has been subject to repeated sprayings. Regarding crop destruction, it is estimated that 7 percent of Vietnam croplands have been sprayed.

Mr. President, I ask unanimous consent to have printed in the RECORD a table entitled "Chemical Defoliation and Anticrop Operations in South Vietnam for the Period 1962 to July 1969."

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CHEMICAL DEFOLIATION AND ANTICROP OPERATIONS IN SOUTH VIETNAM—1962 TO JULY 1969

[Figures in acres]

Year	Defoliation	Crop	Percent crop versus defoliation
1962	4,940	741	5
1963	24,700	247	1
1964	83,486	10,374	12
1965	155,610	65,949	42
1966	741,247	103,987	14
1967	1,486,446	221,312	15
1968	1,267,110	63,726	5
1969 (January to July)	797,180	38,819	5
Total	4,560,719	505,155	

Source: Data supplied by the Defense Department to the National Security Policy and Scientific Developments Subcommittee of the House Foreign Affairs Committee (December 1969).

NOTES

The total land area of South Vietnam is approximately 42,000,000 acres. Of this, about 7,600,000 acres is reported to be under intensive cultivation and about 14,000,000 acres is forested.

Aims of this environmental warfare program are to deny the enemy food and concealment. According to the Defense Department, "in the final analysis the sole purpose of the herbicide program is to protect friendly forces, conserve manpower and deny food resources to the enemy."

Mr. GOODELL. Mr. President, the defoliation program, then, has a number of objectives, including:

First, to improve vertical and horizontal visibility of the United States and Vietnam troops;

Second, to aid in target acquisition, that is, finding the enemy;

Third, to force enemy troop movement from one place to another in range of fire; and

Fourth, to make significant numbers of the enemy divert energy from fighting to growing food.

ANTIPLANT CHEMICALS: WAR USES

According to the Defense Department, antiplant chemical weapons have been put to the following war uses:

1. Defoliation of base perimeters

A portion of the small-scale ground based or the helicopter spray missions are used in improving the defense of base camps and fire bases. Herbicides are a great help in keeping down the growth of high jungle grass, bushes, and weeds which will grow in cleared areas near these camps. This clearance opens fields of fire and affords observation for outposts to prevent surprise attack and as such is truly a life-saving measure for our forces and our allies. Without the use of herbicides around our fire bases, adequate defense is difficult and in many places impossible.

2. Defoliation of lines of communication
